Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message of sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; sir or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston. June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, matbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round comers, silt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

NUMBER 3

Life Eternal

ETHEL ADÈLE DENNY

THE Christian world is very familiar with the text, "And this is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent." At times these words have seemed inadequate and ineffectual comfort in the face of the supposed inexorable witness of death. Indeed, the Bible is affluent in its promises of eternal life to him who serves God. The children of Israel were saved whenever they turned absolutely to God for protection. Elijah, under the juniper tree, almost persuaded to give up, found "a cake baken on the coals, and a cruse of water at his head." Daniel died not in the lions' den, nor did the furnace seven times heated consume the Hebrew children. All of these God protected.

Of this divine protection set forth in the Bible the very unsatisfactory explanation has been made that it was not the gift of God to all for all time but a special favor to a few in a time long past; that at present God improves the lives of His children by medicine, by the cunning of man rather than by the power of Almighty Spirit,—and thus protected, a man perishes by fire and sword, by pestilence and accident. It is obvious, then, that while mortal man has desired eternal life, and sought for it in devious ways, he has not found it because he has not known what it was. Instead of looking for Life, he has looked for lives, for a material body preserved from day to day to an eternity of added days and years. In other words, he has looked for eternal life in matter instead of in Mind.

Now when in sickness, accident, poverty, and trial, the righteous man turns to God and is delivered, the Bible promises are proved true. It is just this that Christian Science demonstrates. Christian Science is not only teaching but proving that whatever was true yesterday is inevitably true now. It is revealing the fact that the works of the prophets and of Jesus were demonstrations of the eternally present, operating law of Spirit, which operates to-day as completely and perfectly as at any time.

Now Jesus proved conclusively and finally that life is not in matter. Had he accepted the law that life is extinguished when air and mortal ways of sustaining it are cut off, he could never have called the living Lazarus forth from the grave. Eye and ear gave overwhelming testimony that Lazarus was dead, that all that men call life was absent from the flesh. But Jesus, knowing that Life exists independent of a man's false belief or ignorance of it, could prove its

presence, manifest as Lazarus alive, brought forth from the

How Jesus raised Lazarus from the grave wherein he had lain four days, how this law of God works, is part of the knowledge of "the law of the Spirit of life in Christ Jesus," which one must have and understand in order to set a Lazarus free from the law of death. Martha did not comprehend the present power of this law, for when Jesus stated that Lazarus would rise again, she said that she knew he

would do so at the last day. This answer was characteristic of the belief of life in matter, that life in some mysterious way enters into matter at a material birth and departs at death, to reappear again at that last day when, after a death lasting longer than a world of lives, there is a resurrection of the material body. Jesus' reply to Martha was the metaphysical explanation of his power to raise Lazarus then. He said, "I am the resurrection, and the life: he that believeth in me, though he were dead, yet shall he live: and whosoever liveth and believeth in me shall never die."

This was no claim of personal power. It was the triumphant declaration of the reality and the potency of the law of God, Life. The "I" was not the man Jesus, but the Christ, the spiritual idea of the one "I AM," the right knowing of Him who is Life eternal. "Life demonstrates Life," says Mrs. Eddy on page 306 of Science and Health. And she continues: "The immortality of Soul makes man immortal. If God, who is Life, were parted for a moment from His reflection, man, during that moment there would be no divinity reflected. The Ego would be unexpressed, and the Father would be childless,—no Father." That is, man's real life is his understanding of God, who is all the Life there is. "And this is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent."

God, divine Life, is Himself infinite consciousness, eternally mindful of His perfect spiritual idea, man. This man is the reflection of God, the perfect Mind. This reflection is his eternal life. Not material brain, blood, heart, bones, but the idea of Life, substance, and intelligence, what God knows about these things, is man's living. Since what God, Spirit, knows is wholly spiritual and wholly apart from the human sense of things, what man knows is spiritual. Man reflects Life because God is Life, but he reflects Life as Mind, not as matter, for God is Mind. In "Unity of Good" (p. 3), Mrs. Eddy states this very clearly when she says: "God is All-in-all. Hence He is in Himself only, in His own nature and character, and is perfect being, or consciousness. He is all the Life and Mind there is or can be. Within Himself is every embodiment of Life and Mind." Then man can embody no life save the Life that is God. God's thoughts are substance and Life, and they are manifest in man as right thinking about all that he does. They are the angels, or pure thoughts of His presence. Mortal thoughts are temporal, powerless things. They have no real existence. Such were the thoughts of them who laughed to scorn the one who knew enough about God, Life, to restore the daughter of Jairus.

As a man overcomes sin and sickness and obstacles in the way of right accomplishment, he advances in his understanding of the law of Life, and gains more of the Life that cannot be destroyed. No imprisonment or persecution can touch or check this advance. Peter understood this so well that the prison bonds could not hold him, because he had proved the true idea of Life, God, who is independent of matter and mortal judgments, and he walked out of the prison through the iron gate that opened of its own accord. Why not? Why should it be "a thing incredible" that the God who is infinite

Copyright, 1921, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as second-class matter. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of October 3, 1917, authorized on July 11, 1918.

Life, Mind, and Spirit, should be omnipotent to protect those who follow Him? Even so must all false beliefs of life in matter fall away. Every time that a man rests in the thought of God as all-acting Life, he is renewed in body, for the angels literally minister unto him.

So is Life, God, demonstrated to the follower of Principle. For this Life there need be no fear, for God sustains it as His own. Only there must be no faltering in the perception of it, no matter how large the stone which the senses say cannot be rolled away. The power to do this, to think aright, is the gift of God indeed, the gift of eternal Life which He gives of His own nature perpetually. Then Life comes to man not in days that add age, and slope to death, but in days of the unfoldment of Mind's allness, in days of ever ascending glimpses of God as Mind, the radiance of which can never dim, but rather brightens into the full light of the day that knows no night. These are the days of creation, the days which are ended when man understands God. Lighted by such advancing understanding Mrs. Eddy writes of the third day of creation (Science and Health, p. 508): "The third stage in the order of Christian Science is an important one to the human thought, letting in the light of spiritual understanding. This period corresponds to the resurrection, when Spirit is discerned to be the Life of all, and the deathless Life, or Mind, dependent upon no material organization. Our Master reappeared to his students,-to their apprehension he rose from the grave,-on the third day of his ascending thought, and so presented to them the certain sense of eternal Life."

The True Man and the Sham

NATHANIEL J. BUSKIRK

HE more the truthfulness of anything real and eternal is I learned, the more apparent becomes the falsity of any untruth about that which is true. In other words, a knowledge of the real discloses the falsity of the unreal. This axiom, so to speak, has no more striking illustration than in the correct teaching of Christian Science as to perfect and immortal spiritual man, as compared with erroneous mortal man. As devout students of Christian Science are learning by degrees, through demonstration, of the majesty and grandeur of the perfect man of God's creating, the shallowness and utter baselessness of the claims of mortal man are perceived. A practical instance of the ability to detect the untrue, as a result of knowledge of the true, may be seen in the government mints. The coiners at the mints, who are thoroughly familiar with the molds, texture, and designs of the legal national currency, are, because of the possession of this knowledge, able to detect the discrepancy of counterfeit currency should it be presented to them. Each additional point gained as to the nature of the real and genuine dollar increases proportionately the capacity to detect the counterfeit dollar.

There is a universal belief that man is a material organism, with a mind contained in the cranium, and this man is held to be the veritable man of God's creating. Upon this type of man, which is the only man that mortals uninstructed by Truth know of, mortal belief places the burden of solving the problems of life. Millions upon millions have believed in the verity of this man, and have pinned their faith to him, to bring them that which seemed to their sense most desirable. In some cases it might appear that this matter model has attained to seeming heights of happiness, but in far more instances the débris of human hopes and aims are seen strewn in the wake of mortal man's earthly experience. The multitudinous failures and the unexpected and complete

wreckage of the best laid and most cleverly formulated plans of the most intelligent of humanity, would awaken mortals from reliance upon that which is false, were it not for the density of mortal belief. The tenacity of error is, in belief, the resultant of generations and generations of false beliefs, but all of these false beliefs can be rendered null and void here and now by an understanding of man in the image and likeness of his Maker. This one can prove beyond the shadow of a doubt to-day.

On page 186 of "Science and Health with Key to the Scriptures" Mrs. Eddy states: "If mortal mind knew how to be better, it would be better. Since it must believe in something besides itself, it enthrones matter as deity." It is the lack of knowledge on the part of humanity of the true man, which would keep mortals from seeking a higher and more perfect pattern than that afforded by the Adam belief of man. Christian Science has supplied this higher pattern and through its clear and lucid teaching is daily making possible in human experience an appreciable understanding of the spiritual, perfect man, who is now expressed in all his grandeur, continuity, and might. This perfect man is no abstract vision of the religionist, but is revealed here and now existent in all of his completeness, to the spiritual thought. to deliver the children of men from every ill that flesh is heir to. Mrs. Eddy defines man on page 475 of Science and Health in part thus: "Man is idea, the image, of Love; he is not physique. He is the compound idea of God, including all right ideas; the generic term for all that reflects God's image and likeness; the conscious identity of being as found in Science, in which man is the reflection of God, or Mind, and therefore is eternal; that which has no separate mind from God; that which has not a single quality underived from Deity; that which possesses no life, intelligence, nor creative power of his own, but reflects spiritually all that belongs to his Maker."

Throughout the writings of the revered Leader of the Christian Science movement, man is held to be the image of his Maker. Now manifestly the image of a thing is like the original, and so as there is just one God, and man is the image of God, man is like God; that is, he reflects God in every respect, just the same as one's reflection in the mirror portrays all of his features with perfect accuracy. Generically speaking, this is the only veritable man there ever has been, is now, or ever will be. The idea of Truth is never mortal, but immortal and indestructible. One must begin to look away from mortal characteristics if he would gain even a measure of perfection. This looking away from human frailties is not with the intention of excusing or condoning those frailties; rather is it with the express and sole purpose of doing just the very opposite, that is, of destroying those shortcomings. To attain perfection one must begin with perfection as a working basis.

Can we not correctly term the mortal and material conception of man as the "sham man," for all that he claims to do is found to be an attempted usurpation of the prerogatives of God? For ages untold this "sham man" has paraded his claims to divine sanction, and has been accepted as being the man of God's creating, spoken of in the first chapter of Genesis; but gradually, his seeming thralldom is being thrown off, and the incorporeal ideal, which generically speaking is the only man, is appearing. The appearing of this perfect man is indeed portentous to humankind. To attain a correct understanding of man in the image and likeness of God is to gain dominion over the conditions of mortal existence, and thus to begin to govern, instead of being governed by those conditions.

Our Sufficiency

MILDRED E. BEANS

THE moment we set self aside and understand that we can THE moment we set sen aside and understand Paul when he of ourselves do nothing, or realize as did Paul when he said in his letter to the Corinthians, "Not that we are sufficient of ourselves to think any thing as of ourselves; but our sufficiency is of God," then and then only are we assured of the success in which discouragement plays no part. If, for example, we should be endeavoring to grasp some line of work or study which we have not undertaken before, it should be done with the understanding that nothing can be new to the one Mind, which man as the son of God expresses, and therefore that the particular endeavor is but an unfoldment of the knowledge man already has. And what is there that can claim to withhold or retard the unfoldment of this knowledge? It is nothing but a belief that we ourselves are trying to grasp something which is wholly unfamiliar and difficult, a belief which says that success depends entirely upon one's own capabilities. Nothing could be more erroneous than a notion of this kind. Man knows all now because his sufficiency is of God.

What reality can discouragement have with the man who has planted his feet firmly upon the fundamental fact that God, good, is the only Mind and is his sufficiency? Discouragement can have no place at all in his thinking. To be sure discouraging thoughts may suggest themselves to him, but he does not open the door and let them in; on the contrary, he closes the door upon them. Almost any kind of erroneous thoughts may present themselves to a person, but that does not mean that they are going to be acknowledged. For instance, an honest man, finding himself absolutely alone in a store, may be confronted with the thought that he could take away with him anything he wanted and never be found out. But does he act upon that suggestion? Most assuredly not; it is not even a temptation to him, and he laughs at the very notion of it. Now, the suggestions of discouragement have no more power over God's man than have suggestions of dishonesty. They cannot be known to him because they are not logical and cannot be derived from Principle, God. Mind, which is his sufficiency.

It goes without saying that we must be loyal to what we know to be true; that is, we must be consistent in our practice of the truth, no matter what the seeming problem. Under the paragraph heading, "Patience and final perfection" on page 254 of "Science and Health with Key to the Scriptures" Mrs. Eddy writes: "Individuals are consistent who, watching and praying, can 'run, and not be weary; . . . walk, and not faint,' who gain good rapidly and hold their position, or attain slowly and yield not to discouragement. God requires perfection, but not until the battle between Spirit and flesh is fought and the victory won." The only loyalty that can really exist is, of course, the loyalty to Principle; anything else is stubbornness in clinging to error. By refusing to entertain error of any kind, we are proving our loyalty to God and becoming worthy of the name of Christian Scientist.

Over and over again Jesus tells us that he himself was not responsible for the good he did but that it was God the Father who worked in him, and he also said that each and every one of us could do the same things and even greater. With God as man's sufficiency what right has a person to limit himself for a moment to any amount of intelligence or good? To do this would be the same as admitting a weakness in Him who already knows all. We must examine our thoughts, be alert, and as we read in II Timothy, "be instant in season, out of season; reprove, rebuke, exhort with all

longsuffering and doctrine." On the other hand, we must never forget that God is Love, who expresses His love in His care and watchful guidance of His creation. The second stanza of hymn 149 in the Christian Science Hymnal expresses most beautifully this thought:—

Wherever He may guide me,
No want shall turn me back;
My shepherd is beside me,
And nothing can I lack.
His wisdom ever waketh,
His sight is never dim;
He knows the way He taketh,
And I will walk with Him.

Keeping the Vision

HELEN PREBLE ALDRICH

IN Proverbs we read, "Where there is no vision, the people perish." One hears much in these strenuous modern times, of ambition, desire for preferment, pride of place and high position. The man who reaches these high places is pointed to as worthy of praise. The unthinking person, therefore, strives for the things which the world calls good until, little by little, the clear vision of childhood and early youth fades and new and less worthy desires prod to greater striving for the things which never satisfy and the keen delight of worth while vision lessens. While material aims predominate one is indeed in the valley instead of on the mount. If, however, the vision is clear enough, the vision which shows man made in God's image, capable of all that that relationship implies, if ambition is untinctured with desire for human power or praise, the heights will be reached.

Mary, the mother of Jesus, kept the vision and pondered in her heart the wonderful things which God had showed to her, watching with patient love the child who had been from the beginning a most un-understandable problem. Hiding in her heart the things which she did not understand, she trusted and fared on to greater knowledge, secure in her faith that all was well. Christ Jesus kept the vision, with nothing of pomp or power to ease the rugged way. It was enough that he was reflecting the one infinite Mind, that he was thus always about his Father's business. He sought not those of high degree but chose the lowly fishermen to be his companions. He supped with the humblest and needed not the trappings of high estate nor the praise of those called great to encourage or sustain him on his way. In those last earthly hours, his eyes alone seeing through the darkness, he could still behold the vision, realizing that the understanding of Mind and Mind's idea is the only prize, the only goal of true ambition.

Mrs. Eddy says in "Science and Health with Key to the Scriptures" (p. 61): "The good in human affections must have ascendency over the evil and the spiritual over the animal, or happiness will never be won. The attainment of this celestial condition would improve our progeny, diminish crime, and give higher aims to ambition. Every valley of sin must be exalted, and every mountain of selfishness be brought low, that the highway of our God may be prepared in Science."

In the light of these words of our Leader, ambition takes on new meaning; the lowliest tasks demand our best attention; and, knowing that there is but one authority, one real power, all things become possible. The prize is not for the rich or the powerful, nor even to the gifted. Each one of us is reflecting quite as much of God as we allow ourselves to understand of God. There is no limit to this reflection because man is the idea of God, and all that the Father is the

.

はないがん かんながんながん かんしかい

child must of necessity be. True ambition, then, is attained by faithfully keeping the vision of Truth, Life, and Love, knowing that though the path may be steep and the way tortuous, each honest step taken with the vision of man's Godgiven right as God's reflection before us, will lead to the heights where one can say with Paul, "I have kept the faith."

Some poet has said, "Every day is a fresh beginning," but in Christian Science we know that there is no beginning nor ending, just the eternal now, God's perfect, finished idea. "The kingdom of God is within you," said Jesus. This is only realized when the true vision is ours, the vision of joy and consecration, of contentment and spiritual ambition shining through the mist of material temptations, aims, and pleasures, which lead to the end of the rainbow and dissolve into nothingness. Just so long as one chases the rainbow of matter with its glancing colors and illusive effects, just so long is one standing outside the true vision, the vision of God and His idea, wherein we realize an atmosphere of Love divine.

Criticism

FAY FRISBIE JOHNSTON

COMMON usage has emphasized the definition of criticism as censure or unfavorable comment to such an extent that it almost never recognizes the equally correct definition of critical observation, true judgment, or detailed examination. To employ a word in a statement without an understanding of its complete significance renders the statement either wholly or partially incorrect. Hence it is readily seen how quickly and easily the mistaken conclusion can be formed when one speaks of another as having offered a criticism of some one or some thing, when this criticism may have been a detailed examination on the part of the one lending the criticism, an examination resulting in a good conclusion.

The value of understanding and employing words in their complete definition is illustrated by Mrs. Eddy in her original use of the Glossary in "Science and Health with Key to the Scriptures" wherein she gives to the Biblical words both their so-called material definitions and the true or spiritual meaning, which she states is also their original meaning. In the introductory paragraph of the Glossary (p. 579) she says: "In Christian Science we learn that the substitution of the spiritual for the material definition of a Scriptural word often elucidates the meaning of the inspired writer. On this account this chapter is added. It contains the metaphysical interpretation of Bible terms, giving their spiritual sense, which is also their original meaning." The fact that, in a work in which she was entirely concerned with expressing the spiritual truths, Mrs. Eddy emphasized the need of giving both or all the definitions of a word is of importance to the student of her works. It is evidence that she realized that the entire truth about every expression must be known, whether that truth seems pleasant or disagreeable. But one of the many blessings she bestowed on mankind was in showing that the seemingly disagreeable meaning of any word or experience could be so understood spiritually as to rob it of all sense of harm or unpleasantness of any kind. thought is expressed by Mrs. Eddy on page 428 of Science and Health in these words, "We must realize the ability of mental might to offset human misconceptions and to replace them with the life which is spiritual, not material." Our Leader set for herself the task of showing the truth or the spiritual fact about every phase of existence, and in so doing she utilized all types of definitions, showing the infinite character of her task and pointing her students to no less sweet

a task if they would work out their own salvation as Jesus commanded. In Christian Science there is no definition or condition to run from, so to speak, but harmony in all things is maintained through complete understanding, quite as Mrs. Eddy says on page 233 of her textbook, "Ye who can discern the face of the sky,—the sign material,—how much more should ye discern the sign mental, and compass the destruction of sin and sickness by overcoming the thoughts which produce them, and by understanding the spiritual idea which corrects and destroys them."

So the word criticism, much as the human mind seems to object to it, fear it, or be bothered by it, is but an open door to greater understanding of the spiritual or true word, or word of God, good. God is infinite Person; so He is the only Person who can make all the criticism that it is possible to make, to be heard, or to be felt, whether it is censure or detailed observation. The divine Mind, of course, censures error only by reducing it to nothingness. The student of Christian Science knows that whatever God does is absolutely good, and therefore the word criticism at once becomes good in its varied definitions. Even as there are several ways of obtaining the same answer to a mathematical problem, so there can be many definitions to a word; yet the truth must be seen about each before the word can unfold to consciousness in the light of true understanding and usefulness. A stanza of one of our hymns shows plainly the nothingness of misunderstanding, and this seeming when replaced with understanding is a weapon powerful unto victory. The stanza reads (Hymnal, No. 155):-

> Dreams of sense disappear As Truth dawns on the sight, The phantoms of thy fear, Fleeing before the light.

"Come unto me"

PEARL LOUISE LONG

*OME unto me, all ye that labour and are heavy laden, and I will give you rest. Take my yoke upon you, and learn of me; for I am meek and lowly in heart: and ye shall find rest unto your souls. For my yoke is easy, and my burden is light." Such was the great invitation extended to tired humanity by Jesus the Christ. To all suffering from the burdens of wrong thinking, wearied from laboring under false beliefs and illusions, here a door of escape is opened "And I will give you rest." The rest is yours and mine to the extent that we accept the Master's invitation, "Come unto me," and, "Take my yoke upon you, and learn of me." Looking away from the material ways of finding rest and surcease, which fail us in times of need, we turn to God and learn of His ways. We turn to divine Love and find harmony and deliverance and rest. After many years of servitude to mortal mind and its material laws of bondage, after many fruitless trials of this thing and that thing, we may find our burdens are still with us. Each much recommended material cure has failed to meet our need, and in despair we look for something else.

Christian Science teaches us the utter nothingness of theories put together by mortal man, and of human guesswork about man's welfare and happiness, and brings to light the absolute certainty of the real man's harmony and freedom as the child of God, subject to divine Principle only. So when the discouraged one turns from material laws to God's law of harmony, he finds, perhaps to his surprise, something inviting and peaceful in the atmosphere of the truth, and after further investigation he grows hopeful and casts his burden at the feet of Truth and bears a song away.

四部 四日 四日 四日 四日

Only through relying radically on God, good, can we prove our progress peaceful and restful. When we have learned to trust our Father-Mother God even as a little child trusts his earthly parents, our tumbles will be less frequent and severe. When a small child realizes the presence of his parent, his fear immediately vanishes and he knows full well that he is safe from what to his childish fancy might harm him. He is at rest in the loving protection of his parent. He knows that he abides safely. The earthly parent does everything possible for the good of his child, but our heavenly Father does even more, and only the things for his welfare and advancement. Thus our way grows brighter and brighter and a man proves that "the Lord's hand is not shortened, that it cannot save; neither his ear heavy, that it cannot hear." As we turn to God and accept divine good as our guardian, we do abide securely and undisturbed. As we do this wholly and completely, we are hearing the call, "Come unto me," and are guided "into the land of Christian Science," as Mrs. Eddy expresses it on page 226 of Science and Health, where she says, "I saw before me the awful conflict, the Red Sea and the wilderness; but I pressed on through faith in God, trusting Truth, the strong deliverer, to guide me into the land of Christian Science, where fetters fall and the rights of man are fully known and acknowl-

Thus, our walk with God becomes closer and the peace that passeth understanding is found to be present in consciousness. "For I am meek and lowly in heart," loving, patient, kind, pitiful, indulgent, "not willing that any should perish, but that all should come to repentance." John tells us that God is Love. "For my yoke is easy, and my burden is light." One definition of yoke, according to Webster, is "that which connects or joins." To be joined to God, good, divine Principle, is indeed no hardship but a joyous privilege; and as this association is proved to be truly intimate, the seeming burdens of the flesh will fade away into their native nothingness. The burden of right thinking is light indeed and is in itself freedom. It involves the letting go of the false and fleeting and the claiming of the true and eternal. Then, in the words of a familiar hymn (Hymnal, No. 241):—

Come to the feast of love, come, ever knowing Earth has no sorrow but Love can remove.

Individuality versus Personality

MARGARET A. ACHESON

THE dictionary defines individuality as a state of oneness; distinct existence. We are taught in Christian Science that man is one with God. Oneness means state or quality of being one; unity. Thus we see that man expresses distinct existence. And this is what we look for in Christian Science; that is, to express this distinct existence here and now. To express distinct existence we must come into accord with all good and express it, good which is ever present and ever operative. The daily living as expressed by mortals is but a counterfeit of the real existence; yet the only real man does express the real spiritual Life which is God.

In Christian Science we should be very careful to distinguish between individuality and personality. The more careful we are to do this the less apt are we to criticize, for we shall see the real individuality where before we saw the unreal personality. Human personality may be pleasing or displeasing. It is usually misleading. It is a belief of a mortal selfhood and is often selfish, unkind, deceitful, critical, proud, and arrogant, and it may be self-righteous. It

is the counterfeit of true individuality, and has no real existence. "The verity of Mind shows conclusively how it is that matter seems to be, but is not," Mrs. Eddy says in "Science and Health with Key to the Scriptures" (p. 123); and continues, "Divine Science, rising above physical theories, excludes matter, resolves things into thoughts, and replaces the objects of material sense with spiritual ideas." Thus we see that material personality has no power, even though it may try to mesmerize one into believing that it has

The false sense of personality is entirely unknown to divinity. Therefore we as students of Christian Science must be careful not to accept as real an error in an individual, a thing, or any state of affairs. Error is quite apart from real individuality, the true individual, the child of God. When one goes to a practitioner to be healed, the practitioner endeavors to see the eternal, individual child of God, that which is always good and perfect, always lovable and loving. In our association in church work, personality may try to suggest itself as self-important, and may think it has to steady the ark. It is a good schooling and a necessary one for each one to study to see only good as present and to know that, no matter how we ourselves may look upon an affair, be it business or church, there is only good present and only God's law operating. Mrs. Eddy alludes to personality in the daily work, on page 117 of "The First Church of Christ, Scientist, and Miscellany," where she says: "There was never a religion or philosophy lost to the centuries except by sinking its divine Principle in personality. May all Christian Scientists ponder this fact, and give their talents and loving hearts free scope only in the right direction!"

The individuality is the real and eternal, and when any one realizes man's individuality or oneness with God, then the healing takes place. The individuality of man is ever perfect, for it is the reflection of God. The individuality of man never dies; and in proportion as we know that true individuality is manifest, in that proportion do we experience the truth of Jesus' saying, "Neither shall they say, Lo here! or, lo there! for, behold, the kingdom of God is within you." As we know that the true individuality is manifest in daily living we begin to see things in a broader light. Jesus said, "Be ye therefore perfect, even as your Father which is in heaven is perfect." Mrs. Eddy explains this saying on page 336 of Science and Health, where she says, "The spiritual man's consciousness and individuality are reflections of God."

[Written for the Sentinel]

Knowledge

CHRISTINE EMERY

ONLY to know Thee,
That is all we ask or need,
To know Thee as Thou art,
A new and wondrous creed

That brings surcease from pain, And banishes all fears, Making every step a gain, Throughout unfolding years.

For hope will grow,
New strength will be supplied,
And trusting hearts will wake to know
No evil can betide.

Each child of God
Shall walk secure and unafraid,
For kindly is the guiding rod,
And good is all He made.

The Sermon on the Mount

THE Sermon on the Mount sums up the Christian religion. As Mrs. Eddy writes, on page 174 of Science and Health, "The thunder of Sinai and the Sermon on the Mount are pursuing and will overtake the ages, rebuking in their course all error and proclaiming the kingdom of heaven on earth. Truth is revealed. It needs only to be practised." In the Ten Commandments Moses set down the primary demands of law; in the ninety-first psalm David insisted on the protecting power of Truth; in the Sermon on the Mount Christ Jesus ranged the whole field of spiritual metaphysics, concluding with the warning that those who did not put into practice what he was teaching them would pay the inevitable penalty of their neglect. How much those who listened to his words understood of what he was saying it is, of course, impossible to tell. But this, at any rate, is certain, that they could not begin to put into practice his teaching until they began to live in accordance with it. The failure to do this was the initial failure of Christendom, with the result that, as time went on, the temptation grew to regard the Sermon not as a practical rule of everyday life but as a counsel of perfection, not as a standard attainable upon earth but as a condition to be reached in some future life. In this way the whole animus of Christianity was perverted. Theology added excuse after excuse for avoiding the challenge, until a Christian bishop wrote off the entire conception as an unattainable ideal.

It was about this time that Science and Health was given to the world, and that the attempt was made by Mrs. Eddy to clarify the human conception of metaphysics, and to show the world that the Sermon on the Mount was the most scientific pronouncement to which it had ever listened, a pronouncement of no shadowy nature, but ablaze with the quintessence of realism, when realism was once understood to be spiritual and not material. Here then, at the very outset, Mrs. Eddy boldly stated the original dilemma, the refusal to grapple with which had been the cause of the church's failure to demonstrate the power of Principle in the perpetuation of what is known as the miracle. And, indeed, it is not difficult to comprehend how the men of those centuries when the known world lay, as it were, in the maw of the Romans, watching the spread of that amazing civilization rolling over mountain ranges and jumping seas, should have come to believe that there was nothing without the range of their material senses, and should have set down their philosophy in the words of Juvenal, Orandum est, ut sit mens sana in corpore sano, "To possess a healthy mind in a healthy body is a thing to be prayed for." What could such a generation be expected to make of that saying, uttered to a solitary visitor, in the silence of the Syrian night, "That which is born of the flesh is flesh; and that which is born of the Spirit is spirit. Marvel not that I said unto thee, Ye must be born again." Much more astounding, to the multitude on the hillside, above Capernaum, must have been the

very first words of the wonderful Sermon, "Blessed are the poor in spirit: for their's is the kingdom of heaven."

From those words until he reaches the words of the final warning, the careful reader must be aware that it is one denunciation following another of the reality of matter and of human subserviency to material conditions that is being urged upon him. And as he reads on, the conclusion must be forced upon him that all this would mean nothing, would indeed be nothing but mere words, were it not possible for him to prove the nothingness of this matter, and to rise above the evidence of the senses. For it is now that Jesus brings the old morality into comparison with the new, and shows that it is not the mere material action which condemns a man, but the thought behind it, "Ye have heard that it was said by them of old time, Thou shalt not kill; . . . But I say unto you, That whosoever is angry with his brother without a cause shall be in danger of the judgment." To-day the revised text has dropped the words, "without a cause," and the pure metaphysical fact stands out that murder is but the expression of a mental condition which is at once the cause of the material action and a counterfeit of spiritual reality. In just the same way, Christ Jesus insisted that the Mosaic law prescribed the punishment for adultery, but that it was the lust which leads to adultery that Christianity denounced, and in just the same way, he pointed out, that it was not perjury that was specially sinful, but the ignorance of Truth which makes light of a departure from Principle.

Thus Jesus brought home to his listeners the mental origin of sin no matter how material its expression, and then went on to show the utter unreality of matter whether in the shape of what a man might eat or in what he might be clothed, since his food and his clothing were every whit as much dependent on his mental condition as were the restraint or license of his material passions. The fowls of the air had no barns, the lilies no looms, but the same Mind which fed and clothed them would sustain the life of a man and provide him with raiment, in a way little understood by the sparrows.

Then again he turned to the more apparently mental side of things to impress upon his hearers that what stood between them and the ability to demonstrate all this was their own passionate carnal-mindedness. They would judge their neighbors instead of measuring themselves against Principle, they would take the easy, sensuous road instead of the narrow road of Spirit, they would listen to the false prophets prophesying smooth things instead of to the disquieting voice of Truth. And, as a consequence, they were found building their houses in the sands instead of on the rock, beset with false arguments leading to false deductions, the cumulative effect of which was moral and physical death.

Thus the Sermon on the Mount is no loose collection of impractical spiritual aphorisms. It is a closely knit, well balanced, and perfectly sustained argument, which, starting from a series of spiritual axioms, proceeds to lay down the unreality of mortal mind, and its various material manifestations, and closes with the intimation that in order to prove the arguments it is necessary that this should be demonstrated in a practical manner. His own immediate actions on descending from the Mount were to heal the leper and the centurion's boy, the mother of Peter's wife, many possessed with devils, and all that were sick, and afterwards to still the tempest on Lake Galilee. The chapter which directly follows those which contain the Sermon on the 'Mount is, in this way, a chapter of demonstration, proof following argument. It was so always with Jesus, and it must be so with his followers; and because of this Mrs.

Eddy, on page 11 of the Message to The Mother Church, for 1901, has written, "To my sense the Sermon on the Mount, read each Sunday without comment and obeyed throughout the week, would be enough for Christian practice."

FREDERICK DIXON.

The Immediate Possibility

In the study of Christian Science one learns that there are actually no impossibilities. Most people know that Christ Jesus said, "If ye have faith as a grain of mustard seed, ye shall say unto this mountain, Remove hence to yonder place; and it shall remove; and nothing shall be impossible unto you." Yet, believing in limitations as inevitable, many people have submitted with cringing to seeming handicaps that they abhor. The fear that cows and hampers is the very opposite of the faith, or understanding, that removes the mountain. How to overcome cowering unbelief with the sureness of Principle, Christian Science is showing to the many day by day. The sturdy recognition, without human outlining, and in spite of any seeming, that "with God all things are possible" is the right beginning. Then as the seeker continues to turn in the right direction, the truly scientific trust in Principle supersedes any forlorn unbelief and proves that real living in Mind, not in matter, is unlimited now and always.

Consistent practice in accord with Principle breaks through the seeming limits of human endeavor and achievement and reveals the infinite possibility of the divine Mind and its manifestation. The realm of infinite consciousness and its activity is, indeed, real, solid, and tangible, as no merely human sense of things could ever be. When one reasons persistently in accord with Principle, the appearing of the spiritual actuality may seem, to borrow Walter Pater's words, "like the breaking in of the solid world upon one, amid the flimsy fictions of a dream." On page 261 of Science and Health Mrs. Eddy tells us, "Breaking away from the mutations of time and sense, you will neither lose the solid objects and ends of life nor your own identity." Again later, on page 371, she declares: "No impossible thing do I ask when urging the claims of Christian Science; but because this teaching is in advance of the age, we should not deny our need of its spiritual unfoldment. Mankind will improve through Science and Christianity. The necessity for uplifting the race is father to the fact that Mind can do it; for Mind can impart purity instead of impurity, strength instead of weakness, and health instead of disease. Truth is an alterative in the entire system, and can make it 'every whit whole."

If some particular improvement in one's condition has seemed needful and yet especially difficult, that sense of limitation is an excellent opportunity for the immediate and uncompromising realization of Mind's activity as infinite. Often one must deliberately determine that now is the time for the operation of Principle once and for all to break through and dispel the false belief. In such a case, one must act fearlessly in conformity with the intelligent inspiration. The wise and fearless doing of one righteous act that seems impossible opens the way for further freedom. Of course this decisive refusal to be bound by beliefs of matter, whether chronic or acute, cannot be an exercise of mere human will. It must be the doing of the divine will through the realization of its operation as the present possibility.

The first step may be the quiet recognition that the desired end is possible to accomplish now. It was the White Queen who told Alice, "Why, sometimes I've believed as

many as six impossible things before breakfast." To understand that the way of Principle, divine Love, is infinitely expressed is to know, without mortal outlining, the immediate possibility for one's self of unlimited good. Now the word "possible," spiritually comprehended, does not imply any such lingering doubt as may often be humanly associated with the term. To the divine Mind, the real possibility is actual ability, not static or latent or potential, in the ordinary meaning of those terms, but manifest as energetic right action. Infinite Mind, with its manifestation, is always spiritually and truly dynamic, never dormant. So it is scientific practice to reason out and accept the present possibility of whatever may have seemed right but impossible. Through this work, one proves goodness, beyond the range of old, timid hopes, as his immanent experience.

Man, the immortal image of God, possesses, by reflection, all that the divine consciousness includes. Hence each one must look to infinite Mind, not to matter, and find here the immediate and altogether satisfying fulfillment of all that he could ever have desired. The expression of perfect intelligence possesses all good. Understanding and demonstrating this, a man finds himself able, for instance, to pay his debts and to have all that is important for his progress. He experiences, moreover, the continuous unfoldment of healing with that quiet and sure joy which is never human emotionalism. He gladly discerns harmony as ever present, even where there may have seemed to be discord.

Each one turning to Christian Science is entitled to expect instantaneous healing. Yet he is also willing to be endlessly patient. Often there is the instantaneous change from a wrong sense of things to the right condition after what may have seemed a long period of struggle. Sooner or later a man must be able to say to himself, "I am well and free now." He may find, of course, a constant and gradual improvement in his experience, or he may prove a rapid overcoming of supposed troubles. In any case he must go dauntlessly forward, with the certainty that spiritual idea manifesting Principle is the solid essence of man's being. In spite of any seeming, this unlimited idea is forever intact and indestructible. The genuine consciousness of right activity is the immediate reality. To accept this consciousness as present and absolutely unbounded is, of course, to prove that all things are possible to him who understands divine Love.

GUSTAVUS S. PAINE.

[Written for the Sentinel]

Pouring in Oil and Wine

MARY H. CUMMINS

WHAT am I pouring into a wounded world?
That which inflames and rankles, irritates and smarts,
That which adds burden to already burdened hearts,—
The thought which pain, instead of peace and joy, imparts?

What of the daughter of my people's hurt?
Daily do I pour in the oil of charity,
The wine of understanding and true unity,
And so inspire to health and greater liberty?

Is there to-day no need of oil and wine,
No need of consecration, gentleness, and prayer,
Of Love's true ministration, redolent and fair,
Of that compassion which alone will wrong repair?

Oh, may I ever pour in unctuous grace!

The thought which always blesses, purifies, and heals,
The thought which God and His redeeming truth reveals,
And thus man's real at-one-ment with the Father seals.

Testimonies of Healing

Five years ago last November my little daughter began to show signs of difficulty in walking, and after due consideration I decided to take her to a specialist and have him diagnose the case. Two X-ray examinations were made, and the difficulty was pronounced to be hip disease. He advised putting her in a plaster cast, this being the only remedy known to him for such a disease; however, before doing so he decided to hold a consultation with other physicians, during which one of the attending physicians suggested an operation, to which the specialist replied, "It would be of no avail." So it was finally decided to resort to the plaster cast, which was in due time applied to the child's right side from the waist down to the feet. Suffering intensely from the pressure of the cast she cried and pleaded to be freed from her torture. This continued for forty days. The specialist then called me to his office and, after consulting with his associate, decided to perform the operation, which, he said, would save time, trouble, and money, and the child would be healed within a year or eighteen months. I was surprised, to say the least, at his change of view in regard to the operation which he had before pronounced useless, but with the hope that the child would be able to walk within the specified period of time I gave my consent and she was taken to the hospital. Later I was told that she had been operated upon twice within one week. How true this is I do not know, but I do know that in two weeks' time she was so emaciated I had her taken home.

From this time on the suffering became worse. The plaster cast was so tight that it caused other difficulties, which kept the child in a continuous state of suffering and prevented her from getting much rest or sleep. We submitted to this treatment for over a year and a half, then seeing that the child was getting worse instead of showing some signs of improvement, I became discouraged. I then began to argue with the specialist and questioned his motive as to the performance of the operation. My means having become exhausted, I was not so punctual in paying my bills as formerly and was finally told that if I thought some one else could do more for the child, it would be better for me to take her to him.

Not having any means at my disposal to secure the help of another specialist, I took her to a hospital conducted by a state institution. There the same kind of treatments were continued and more experiments were indulged in. To prevent the disease from reaching the other limb it was also placed in a cast similar to the first one, with a brace between the knees which was long enough to spread the feet about fifteen inches apart. Two and a half years were passed in this way, making a total of four years and four months in plaster casts. With no signs of improvement in sight, I was told by the doctors that she would never be able to walk again, and that as a last resort it would be necessary to put her in bed for a period of from forty to fifty days and attach weights to her feet, in a final effort to force the lower part of her body into a normal position; but I would not give my consent.

While returning from the hospital one day, I met a friend who had for some time witnessed our plight, and he advised me to try Christian Science treatments for the child. Although he had spoken to me about it on several occasions I was not ready to try it until I had lost all hope of receiving help through material means. This time, however, I accepted his advice and went to the practitioner whom he recommended and upon whom we called for treatment. After the

first treatment a marked improvement was noticed and in one week's time the casts were removed. At the end of the second week she was able to turn over in bed unassisted, a thing she had been unable to do for over four years. In another week's time she abandoned the use of one crutch, and after a few days the other one. She improved so rapidly that within a month's time she was able to walk unassisted. After three months of Christian Science treatment she was up and able to walk and enjoy her freedom. She is now happy, healthy, and contented. All the fear, darkness, and hopelessness which had enslaved her have at last been dispelled.

Words fail to express the gratitude we feel for the blessings we have received through the knowledge we have gained and are still gaining of God and His laws, through the teachings of Christian Science. And now our greatest desire is that we may prove ourselves to be worthy of all the good that infinite Mind holds in store for those who are grateful for what they have already received.

Louis Fineo, San Francisco, California.

٠

I have much to be boundlessly grateful for through the study of Christian Science, which is daily awakening me to the futility of reliance on aught but God, and the necessity for obedience to the Scriptural injunction, "Trust in the Lord with all thine heart; and lean not unto thine own understanding. In all thy ways acknowledge him, and he shall direct thy paths." All the happenings of one's daily experience are seen as opportunities to put into practice the understanding of the truth.

I also wish to express deep gratitude for the teachings of Christian Science, which have revealed the glorious truths of the Bible, which is indeed our guide to eternal Life, and for Mrs. Eddy's great gift to the whole world, "Science and Health with Key to the Scriptures," and all her other writings; as well as for the periodicals which she instituted as missionaries to carry the truth to all mankind. I am also very grateful for many healings, both physical and moral, especially for release from great defects of character, which were made self-evident through even a small understanding of the truth, and this understanding is daily bringing more and more blessings as it is being utilized. One of the great blessings is the love which is to be found everywhere and in every one, though in differing degrees, as one sets out to look for it. Deep gratitude is also expressed for the privilege of church membership, for class instruction, and church work, some of which is the distribution of the Christian Science literature, which is breaking down prejudice against the teachings of Christian Science and is indeed proving to be the "cup of cold water" to the thirsty wanderers in the desert of mortal belief .- (Mrs.) ALICE BAR-RINGER, Hampstead, London, England.

4

I feel it my duty to send in a testimony relating my wonderful healing through Christian Science. One morning
I awakened feeling a very severe pain in my back, and
was unable to move for half an hour. Although I soon felt
better, I remained home from work for a few days, thinking that I would thus become quite well again; my condition
became worse, however, and I commenced coughing. My
husband and I went to a physician, who treated me for
over two weeks. I had very high fever, continued to become
weaker, and suffered incessantly from a pain in my right
side. The physician had forbidden me to eat and told me
to drink only milk. We then consulted another physician,
who examined me and stated that I had quick consumption

and must go to a hospital; also that I required plenty of fresh air.

I had known of Christian Science for four years, having worked in a Christian Science family, and was interested in reading Science and Health, which had benefited me greatly. I had married and moved to another state when stricken with this disease and did not know how to reach a practitioner. Before going to the hospital I wrote to the Christian Science family mentioned, telling them that I was very ill and begging them to help me or to turn my case over to a practitioner, which latter they did. I felt better from the first hour the work was commenced for me, and after two weeks the treatment was taken up by a practitioner in my home town. In three weeks I left the hospital feeling cheerful and experiencing no pain, and I was also healed of many other ills. After six weeks of Christian Science treatment I was healthy and strong and dismissed the practitioner. I am becoming more and more interested in reading the Christian Science

Next to God my gratitude is due to our Leader, Mrs. Eddy, and to the practitioners who have helped me. This teaching has lifted me out of the dark abyss of error in its manifold forms, to the eternal light of Truth. Instead of living in the combined joys and sufferings of materiality I now daily and hourly experience the divine joys of Spirit, partake of its infinite love and goodness, through which alone we can attain strength, health, happiness, and peace. My husband and I thank God, the omnipotent Father, for health and all the good which we have received through Christian Science. -(Mrs.) Christine Schuster Bachner, Watertown, New

I have had many healings since I began the study of Christian Science. The first physical healing was of facial paralysis. I have also been healed of colds and neuralgia, and have been able to lay aside glasses which had been worn for over ten years. On page 494 of Science and Health Mrs. Eddy tells us, "Divine Love always has met and always will meet every human need." I have proved this to be true, and am indeed grateful for Christian Science, and for all the help I have received.

(Miss) EDITH M. IRWIN, Manchester, New Hampshire.

I wish to express my gratitude to God and to Mrs. Eddy for Christian Science, which came to us when we were in desperation nine years ago. Since that time we have relied upon its healing efficacy entirely, and every problem has been met beautifully. The Christian Science literature has also been very helpful to us.

Some of the diseases which have been overcome in our family are kidney trouble, rheumatism, infected hands, and la grippe. By holding to the truth, and with the help of a practitioner, I have proved God to be always "a very present help in trouble." When we first became interested in Christian Science, our son was ill with liver trouble. Being the daughter of a physician, I had great faith in material remedies, and we tried allopathic, homeopathic, and osteopathic treatments for him, without success. Then we turned to Christian Science, and after a week's treatment he was healed. Later, when serving on the battle fields of France, he was protected every moment by the understanding of the truth, and at the close of the war he returned to us in splendid condition.

Divine Love has cast fear out of our lives and we are much happier, and trying each day to advance spiritually. These words of Mrs. Eddy, on page 21 of Science and Health, have inspired our highest effort: "If the disciple is advancing spiritually, he is striving to enter in. He constantly turns away from material sense, and looks towards the imperishable things of Spirit. If honest, he will be in earnest from the start, and gain a little each day in the right direction, till at last he finishes his course with joy."

MRS. J. P. RADCLIFFE, Chicago, Illinois.

It is over five years since Christian Science was first brought to my notice by a friend. I was then attending a summer normal school, and was a member of a denominational church. I became interested and began attending the meetings and studying the Lesson-Sermons. I did not then know of the healing power of Christian Science or that I was in need of its healing. But I had not studied this beautiful truth long before I realized that I had been healed of extreme nervousness, also indigestion of long standing. A number of months after the discovery of this new-old truth, I was suffering from a severe cold and was unable to speak without difficulty. Wishing to test the healing power of Christian Science further, I refused to have medical aid as my sister insisted. I called a practitioner by telephone and told him of my condition and asked for treatment. Treatment was lovingly given and sometime that afternoon the healing took place, and was complete.

I am indeed grateful for the help received at the birth of a son and for the blessings we have received through the help of a faithful practitioner. At times the way seemed as black as night, but the light was always found when rightly sought; for what "shall be able to separate us from the love of God, which is in Christ Jesus"? For these and numerous other benefits I am truly grateful, but most of all for the knowledge of the ever presence and all-power of the divine

Mind.

(Mrs.) CORAL M. MARQUETTE, Cushing, Oklahoma.

I am glad for the opportunity of again expressing through the periodicals my gratitude for the teachings of Christian Science. In the more than fifteen years since I became a student of its teachings, I have had many healings, which include mental, physical, and financial betterment. Of these happy experiences, the following may be of interest. At a time when there was great fear of what is called the grip or influenza, I was teaching in a school at some distance from my home. On a particular day I expected to teach for several hours and then take a thirty-mile journey to fill a concert engagement. In the morning I awakened with most of the symptoms of this prevailing malady, but on keeping thought patiently and persistently in line with the truths of Christian Science I was enabled to do the teaching creditably.

On walking to the train, an unfrequented street was chosen, and the "scientific statement of being," found on page 468 of our textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, was declared audibly. It seemed as if the familiar words had never meant so much to me and the truth contained in them was truly a staff upon which I leaned. Still the sense of exhaustion and fever was almost overpowering and the thought kept recurring, How am I to do all that is expected of me at that concert-especially as I am not to have notes and I feel anything but clear-headed? I rested quietly on the train, however, and read at intervals from "The First Church of Christ, Scientist, and Miscellany," by Mrs. Eddy, which I had taken with me. Argument was endeavoring to convince me that this illness was the result of several weeks of hard

\$4.1 V

work, during which there had been almost no time for the study of the Science which I loved. At this point, turning to page 161 of Miscellany I read these words: "Lest human reason becloud spiritual understanding, say not in thy heart: Sickness is possible because one's thought and conduct do not afford a sufficient defence against it. Trust in God, and 'He shall direct thy paths.'" This I joyfully accepted as my answer, and little by little fear was overcome, until at the journey's end I felt greatly relieved, and my confidence in God's ability to lead every step of the way was restored. It is sufficient to say that I was told by those present that the concert was unusually enjoyable, and no one knew of the battle of error against Truth until told a few days later.

A somewhat more recent experience is also remem-bered with especial gratitude. There came a time, in spite of much good which had unfolded in my profession, when things seemed unusually dark. After years of conscientious work the outlook seemed less hopeful than at any time I could recall. Then I remembered how physical help had come to another a few weeks before through the illumination, to my thought, of these passages from Science and Health, "Be firm in your understanding that the divine Mind governs, and that in Science man reflects God's government" (p. 393). I saw that this admonition was just as applicable to the present difficulty, and set to work as we are taught in Christian Science. Several days of earnest study brought the conviction that God's law operates continuously and that the result of its operation would be manifested in my affairs. In a week's time, from an unexpected source there came an offer, the acceptance of which has proved most happy both artistically and financially. Through such experiences fear becomes beautifully less, and we learn to be "instant in season, out of season," and, in the words of Mrs. Eddy, to "stand porter at the door of thought" (Science and Health, p. 392). Is it any wonder that we are grateful to the Discoverer and Founder of Christian Science?

(Miss) Persis A. Cox, Brookline, Massachusetts.

4

When I first heard of Christian Science, through a friend, physicians had prescribed a treatment which was to be kept up constantly; through the application of the teachings of Science, however, this was discontinued and I was healed. The blessings of Christian Science were experienced later, when on different occasions burns, severe colds, and stomach trouble were healed, and in addition many other problems were solved.

I am thankful to God and very grateful to Mrs. Eddy, as well as to the dear friends who constantly stood by me; I also desire to express my sincere gratitude for the spiritual awakening, which to me is best of all.—(Miss) Anna C. Maurizio, Vicosoprano, Kt. Graubünden, Switzerland.

4

I have been a member of the Christian Science Sunday school for five years, and my cup is so overflowing with gratitude for what Christian Science has done for me that I will not delay any longer to send in my testimony.

Last term an illness kept me out of school for eight weeks, which is over half the term. My teacher told me she did not think I would pass even on "condition." I did not do any overwork but knew that time and space are unknown to God. At the end of the term I was promoted to the next grade. One evening my throat suddenly became very sore. I put my hand up to it as though expecting to find something there. Realizing that that was making a reality of it, I

picked up the *Journal* and turning to the testimonies began to read. Before I had finished reading a testimony the pain had ceased. I have had so many healings that I cannot tell them all.

I have had sprained ankles and headaches vanish when I turned to Truth for help. On page 468 of "Science and Health with Key to the Scriptures" by Mary Baker Eddy we read, "All is infinite Mind and its infinite manifestation, for God is All-in-all," and in the same paragraph: "Spirit is God, and man is His image and likeness. Therefore man is not material; he is spiritual." The truth contained in these sentences always brings relief to me. I am thankful for the literature, daily, weekly, and monthly, and to Mrs. Eddy for giving us this wonderful truth.

(Miss) MARGARET CHESSMAN, Long Beach, California.

"Ye are my witnesses." I have felt for some time that I should acknowledge to the world some of the blessings I have received since I took up the study of Christian Science. It is nearly seven years since I bought a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy. I had only been reading it about two weeks when I discovered that I had no more use for glasses, as I could see perfectly, and without any weakness or pain. A bladder trouble of long standing was next to yield to the truth. Then a very severe attack of acute indigestion was instantaneously cured through the realization that it was not real because not of God. Many other discordant conditions have been met and overcome by the understanding of divine law, for all of which I am very grateful.—(Mrs.) Hattie Bacon Aldrich, Port Byron, New York.

About four and a half years ago a friend asked me if I would accompany her on a visit to a Christian Science practitioner. At the time she was in great fear of cancer, and had heard there was healing in Christian Science. I shall always be deeply grateful for that visit, and for the clear, loving statement of truth presented, which resulted in an instantaneous healing.

From that day I began to study Christian Science, not very steadily at first, but seeking more and more earnestly as I saw that therein is "the pearl of great price." In a short time I realized that neuralgia, which had become an almost constant companion, had quite gone. My profession necessitated much talking, and frequent loss of voice was a great disadvantage. This, too, was healed without treatment. When I began to study Christian Science, I seemed to have many financial responsibilities, and very little with which to meet them. To-day every financial need is met, and I know that error cannot present any problem which cannot be overcome by Truth. Although I am very grateful for these and many other blessings, words cannot express my gratitude for the peace and joy which have come into my life, and for some understanding of that spiritual sense of which Mrs. Eddy says (Science and Health, p. 209), "Spiritual sense is a conscious, constant capacity to understand God."

In the fifty-fifth chapter of Isaiah we read, "For my thoughts are not your thoughts, neither are your ways my ways, saith the Lord." As we are faithful over a few things more and more of good unfolds, and we rise to the realization of God's ways, and to the expression of God's thoughts. I am deeply grateful to our beloved Master for showing us the way, and to our dear Leader, Mary Baker Eddy, for again pointing out that way.

(Miss) KATHLEEN ST. ALPHONSE, London, England.

I have felt for a long time that I should send my testimony for publication, for I have received so much good from the testimonies of others in the Sentinel and Journal, and hope others may get as much good from mine. For sixteen years I gave seven doctors a fair trial, tried everything they had to offer, and received no help from them. They said I had liver and heart trouble, rheumatism, and neuralgia, as well as another internal trouble, and that nothing but an operation would help me, to which I would not submit. I then heard of Christian Science and went to a practitioner, and after eight treatments came home a well woman. This was twenty-four years ago and I have not had that operation yet.

Christian Science has been my only medicine all these years and I am so grateful to God and to Mary Baker Eddy, our beloved Leader, for the many, many blessings I have received, which are more than I can number. I am also grateful to all those who have helped me, and to the loving practitioner who helped me over the dark places. For twenty-seven years I belonged to a denominational church. Its teachings did not satisfy me; I was told that it was God's will that I should suffer, and that I must submit to His will. Christian Science has taught me that God does not know evil, therefore does not send evil to His children, and that it is not God's will that any should suffer. The Bible teaches that God is Love, and I could not reconcile the teaching of Jesus with the teaching of the church. In December, 1898, I sent my first testimony to the Journal, and in all these years Christian Science has been my only medicine. I have so much to praise God for, for the truth has been a present help in every time of need. I am grateful to Mrs. Eddy for her pure and devoted life for the cause of humanity, for the Bible-Lessons, and for all the Christian Science literature.

(Mrs.) M. J. KARR, Indianola, Iowa.

.

For many years before taking up the study of Christian Science I was under the care of specialists both on the Pacific and Atlantic coasts, and finally went to Europe in search of health. The specialists decided that nothing but a capital operation could possibly restore me to health. Being very much averse to undergoing an operation, and there being grave doubts as to my having sufficient strength to survive one, I determined not to submit to it but simply to keep myself as comfortable as possible.

Returning to my home in California, and being much of the time confined to my bed, there seemed nothing before me but days of invalidism. When in this condition a great sorrow came into my life and the prostration which followed seemed complete, for I was unable to leave my room for four months. At the end of this time the earnest study of Christian Science was begun. Not having benefited by years of treatment under materia medica, I declared my intention of giving Christian Science a faithful trial, and, before deciding its value to me, of studying it as diligently as one would any other branch of learning for one year-provided I lived that length of time. It was, however, but a comparatively short time before the conviction came that the Principle of Christian Science was something which could be made practicable throughout all eternity and which, if one really gained a thorough understanding of it, could never be set aside.

Since then, about twelve years ago, no medicine or material remedies of any kind have been resorted to, nor was it ever necessary to perform an operation. I have found Mrs. Eddy's admonition on page 454 of "Science and Health with Key to the Scriptures" to be most helpful: "Wait patiently

for divine Love to move upon the waters of mortal mind, and form the perfect concept;" also the statement on page 254 of the same book, "When we wait patiently on God and seek Truth righteously, He directs our path." My improvement seemed very slow, but I gained steadily, until once more I had the ability to express activities which for many years had been relinquished. Walking, riding, dancing, and even skating which I had never before learned, became pleasurable to me.

One little realizes what this freedom means—this self-government, this dominion gained through the knowledge of Christian Science, unless he has been deprived of them. When I could accept the teaching on the immortality of man, in the writings of Mary Baker Eddy, the nothingness of death which had hitherto seemed so terrible became sufficiently apparent to replace sorrow with the joyful understanding of God and His idea as omnipresent.

(Mrs.) Mary B. Hale, San Francisco, California.

٠

Mere words cannot express my deep gratitude for Christian Science. I became interested in its teachings, not for any physical healing for myself, but I had been told that my young son, then five years old, could be healed of defective eyesight. He was wearing glasses at the time and the doctor and specialist told me he would always need them. The child also had a slight squint and the lashes on the lower lid grew inward, causing irritation. Treatment was given, the glasses were thrown away, and I bought "Science and Health with Key to the Scriptures" by Mary Baker Eddy, and with my Bible we went to the country for all that summer. My husband was in India, and was much opposed to what he believed Christian Science to be. During those summer months and in a lovely old-fashioned garden I found reading from those two books simply beautiful, and as the truth slowly unfolded and I lost much fear and doubt the boy's eyes grew straight, lashes normal, and sight perfect. Since then we have had many proofs of God's omnipotence and loving care. In 1919 my husband returned from abroad and was delighted to see us all looking so happy and well, and we are a very united family.

I am ever so grateful to God for gently guiding me to this healing truth; it has given me in some degree that peace "which passeth all understanding," and for that alone I am deeply grateful. I love all the literature and enjoy the church of which I am a member. My greatest wish is to be a Christian Scientist in deed and in truth.

(Mrs.) KATHLEEN M. FLOWERS, Southsea, England.

After my first healing through Christian Science, which took place twelve years ago, I began to attend the services most regularly, for I reasoned that if Christian Science could benefit me physically it certainly could morally and mentally. My progress along these lines has been most wonderful to me as well as to my friends. As time went on I received class instruction and became a member of The Mother Church; I also served as First Reader in our local society and eventually as committee on publication for this district, and will say it all has been a great uplift to me.

No greater blessing has come to me, however, than the privilege of reading the literature founded by Mrs. Eddy. I would no more think of dispensing with the periodicals than I would the daily reading of the Lesson-Sermon. It is the same old story with me as with thousands and thousands of others: I am very, very grateful.

C. H. Field, Ketchikan, Alaska.

Signs of the Times

["Employment"-The Christian Science Monitor, Boston, U.S.A., Feb. 5. 1921]

To realize what true employment is destroys forever the fear of unemployment. There can be no fear of inactivity when one perceives that man as the image of Mind, God, reflects Principle. It is only when reasoning is reduced to the level of matter that the arguments of progress in industry, changing occupation due to changing world demands and various other economic conditions, can claim to deprive workers of their employment. The understanding in Christian Science that man's real employment is in right knowing opens at once the way of liberation, for right knowing or the activity of the one infinite intelligence is unceasing in its operation and manifestation. Unemployment is unknown to omnipresent Mind, and, therefore, likewise unknown to man, the image and likeness of Mind.

Legislative protection of trade never creates employment. Since it is a quality of Mind, employment can never be assured to the individual by acts of Parliament or statutory regulations, for any narrowing process that deals with employment as an end to be achieved at the sacrifice of others is doomed to failure. Personal and national points of view must be eliminated in favor of the viewpoint of Principle which provides equal opportunity for all mankind. Inasmuch as the one reliable corrective is to establish for the individual the certain knowledge that man is always and forever employed in reflecting Principle, the problem of unemployment cannot be solved by dealing with the outward phases of the situation. Employment is the individual demonstration of the activity of Principle.

General employment is ordinarily supposed to be governed entirely by business conditions, by a nation's prosperity or adversity, by certain so-called economic laws. On page 73 of "Miscellaneous Writings" Mrs. Eddy states, "Belief fulfils the conditions of a belief, and these conditions destroy the belief." As long as mortals submit to the mesmerism of belief and accept certain economic conditions as law. just so long will employment to them depend upon business prosperity, and unemployment follow upon so-called financial depression. But the student of Christian Science, knowing that understanding frees him from the belief that conditions of belief control him, recognizes that man is governed only by the just law of God which provides righteous and productive work for each and every individual. What becomes then of the misleading assertion, "In suing for employment luck is everything"? The element of luck or chance has no place in the ordered and equitable design of God. Notwithstanding mortal sense testimony to the contrary, one needs only to know that man is always rightly placed, justly conditioned, and forever provided with useful occupation.

Neither can lessened seasonal activity in any branch of industry injuriously affect the man who understands that constancy of employment is not dependent upon the seasons or variable climatic conditions but is subject only to his understanding that the industry of Principle proceeds harmoniously in utter disregard of what mortals call good or bad crops, wet or dry weather. God is supreme in season and out of season, and His law of righteous activity continues always unchanged. There is therefore no need to fear transition either from one season to another or from one occupation to another when one knows that the law of progress, governing man in a constantly ascending scale, is the inevitable law of God.

Employment should not be looked upon as the end-all of

life, but as the means of a better understanding of Principle. for employment is really advantageous only when it advances men spiritually. However lucrative the employment, if it impedes spiritual growth or the individual's increasing attachment to Principle, it should be regarded as disadvantageous. In general practice advantageous and disadvantageous employments have been weighed in the scale of materiality with the balance in favor of the employment that would result in personal preferment, promotion to power and influence, and accumulation of worldly wealth, but with the advent of Christian Science, business standards are being raised and that employment which gives one the greatest opportunity for spiritual unfoldment in the service of Principle is seen to be actually the most advantageous. Seeking first the kingdom of righteousness a man shall have added unto him whatever is necessary to make happy his existence.

If one recognizes Mind as his employer it is unnecessary to resort to coercive methods to secure a just wage, for the individual employed by Mind finds Mind expressing justice to its idea, man. The economics of Principle, maintaining that "the labourer is worthy of his hire," establishes a recompense that is justly commensurate with the labor. When this recompense is seen as the individual's understanding of Mind there need be no lack, for the understanding of Mind. God, is available to all in immeasurable degree. Dealing with effects never satisfactorily solves the problem of unemployment, the reason for which must be recognized as the fundamental belief that man is a separate entity, quite apart from the parent Mind-in other words, the supposition that matter is real. Any temporary provision such as government maintenance for the unemployed or other relief measures will never destroy the mortal's belief in matter and therefore can in no way offer any conclusive solution. The secret of happiness is to acknowledge that God's guidance can never be thwarted, that it is supreme in every circumstance and situation. Mrs. Eddy gives helpful advice on page 85 of "Retrospection and Introspection" when she says, "Seek to occupy no position whereto you do not feel that God ordains The sure knowing that God does place man in his proper sphere of usefulness forever silences the suggestion of lack of ample employment.

Since all living is the practice of one's understanding of God, one can never succeed in any line of endeavor, whether in business, in the professions, in the trades, or in healing the sick, if one is persistently employed in wrong thinking. Christian Science teaches that God, good, is omnipotent, a premise to be proved by the demonstration of Principle.

4

[Spiritual Healing to be Revived in Jewish Synagogue]

"Spiritual healing as taught by the Hebrew religion centuries ago is to be revived and practiced in the Congregation Ohabai Shalome, according to the announcement made by its rabbi last night at the Bush street temple," reports the San Francisco (California) Examiner.

The rabbi told his people, "We have strayed too far from the real teachings of our religion. In ancient days healing through the power of the Spirit was taught and lived by the Hebrews; to-day we have all sorts of sickness and trouble because we have got too far away from those sacred truths, and we must return to them. Hereafter our Friday evening service is to be devoted to teaching and practicing spiritual healing. We are going to do away with outward form and ceremonial and develop the inner life. . . . Our methods are going to be comprehensive, treating every condition that brings sickness and discord into man's life."

This is the first time that such a movement has been in-

troduced in a Jewish synagogue in this country. Judaism has from its incipiency recognized the healing power of God. but with the age of materialism it, too, like other religions, departed from the healing system, in the opinion of the rabbi.

[M. Clemenceau on Alcohol, as Quoted in The Pioneer]

The Paris correspondent of The Times, writing on Christmas day, says that M. Clemenceau has written the preface to a pamphlet entitled, "Alcohol: A General Economic Study; its Bearings upon Agriculture, Commerce, Legislation, Taxation, and Individual and Social Hygiene," which has just been laid before the Paris Academy of Medicine. M. Clemenceau, like the author of the pamphlet, finds it deplorable that the "omnipotent authority" of the state should seem to be powerless against "the most formidable enemy of social peace, of general welfare, and of the rise of the humblest classes to a higher life." He ridicules existing remedies, which consist in taking drunken men to the police office or placarding the inside of public houses with prohibitions of drunkenness, while all the time the laws of France relating to the manufacture and sale of the most deleterious kinds of spirit contribute to foster this particular vice.

"To-day," M. Clemenceau continues, "it is beginning to be understood that the right to poison people cannot properly be regarded as one of the achievements of the French Revolution. Universal suffrage would really put itself out of court if it had only succeeded in emancipating itself from the yoke of a single tyrant in order to fall under the sway of a league of private interests, which are in open warfare with the public interests. All well-intentioned men, without distinction of party, ought to join in a common effort for the salvation of our country, which is menaced from so many directions at once." Professor Debove, who presented the pamphlet to the Academy of Medicine, thanked the author and congratulated M. Clemenceau on his courageous and patriotic preface, which was in contrast with the attitude of so many of the French legislators, whose motto, he said, seemed to be, "The fear of the publican is the beginning of wisdom."

[From "Peace and Pessimism" by Hugh Black in The Atlantic Monthly]

I am not temperamentally an optimist. A man born into Scottish life and cradled in Scottish theology is hardly the best subject for membership in a sunshine club. He is inclined to have views about total depravity. He suffers from the sort of conscience which has close affinity to the New England variety. The hard, gray climate gets its work into the backbone rather than into the wishbone. I am an optimist, not by temperament but by faith, and because I was trained to look at and interpret facts. A somewhat grim training taught us to distinguish sentiment from sentimentalism. May such an one be allowed to strike a note of hope amid the universal lamentation of our day? . .

Since the armistice I have spent a year and a half in Europe, most of it in Great Britain, with the exception of seven months with the American Army in France and afterwards in the occupied territory in Germany. I found in Great Britain many signs that at least make me wish to temper the extreme pessimism of some moralists. For instance, the schools and colleges there, like those in America, are crowded with eager students. I heard from the heads of universities the same testimony that President Hadley of Yale has given in his recent report. "Not only did these boys come back, but they came back with an interest in college life in all its sides. They were enlightened by the war, but not disillusioned." At Oxford teachers and tutors told

me that the students were more serious, worked harder, and had finer ambitions than ever before. The picture cannot be all gloomy, if the future leaders are shaping themselves to nobler ends.

The impression of a single observer on the social state of a country can be only partial, and I give mine for what anybody may think it is worth. Frivolity, pleasure-seeking, selfishness were of course to be seen there, as elsewhere; but beneath the surface I saw many an evidence of a new spirit, When one got down to the serious places in men's minds, it seemed that the tone of the average man was more earnest and chastened and modest. The old British attitude, which was distasteful to Americans and which most can recall without having it described, had almost disappeared. The leaders in business displayed an amazing courage in facing the appalling tasks ahead of them. The peace was more difficult even than the war, but I felt that they were on the way to win the peace. They were confronted with troubles which, however, they are surmounting. Time after time the labor difficulties were met with courage and kindliness. In spite of the cries of the Hotspurs, to have a fight to a finish and show the beggars who is the stronger, there was a spirit of compromise and a thought for the common weal. . .

The pessimists of peace use their most lurid language when they speak of our leadership. There it seems that we have had, and have, a mixture of fool and knave. The possibility is never suggested that they might be honest men striving to deal with a tremendous situation. Why must we assume, in a democracy, that our leaders and statesmen are always weak where they are not wicked? Even this is no new thing. Every generation has been sure of the bank-

ruptcy of its political leadership. . . .

It is a strange superstition that a true man ought to be rather stupid. He ought not to be able to play the game with the best, and perhaps beat them at the game. There were always detractors of Mr. Gladstone, because he was so agile in fence, and so able to hold up his end. He confessed that he was "an old Parliamentary hand," and knew the ropes of politics. This was looked on as a sign of insincerity, or worse. It is part of the weird expectation that a good man should be a fool, easily tricked. There is a great word that calls on disciples to be "wise as serpents, and harmless as doves."

[From Concord (New Hampshire) Monitor, as Quoted in The Commercial Bribery and Tipping Review]

It is a well-known truth that genuine reform, either in the individual or the organization or larger group, must come from within. It is therefore a hopeful and wholesome sign to find business men and business associations taking a stand against the exchange of gratuities in the normal transaction of business. Petty bribery of this sort complicates relations between buying and selling agents, not to mention their employers. It also impairs the efficiency and capacity of production of a business organization. It touches the consumer, too, for every gratuity must necessarily be reflected in prices. The public may rejoice when the death sentence of commercial bribery has been pronounced.

[From the Manufacturers Record]

We are not apologists for all of the acts of Great Britain at present, any more than for those in the Revolutionary days, but we know that everything that stirs ill feeling between this country and the British Empire is of the devil. These two great Christian nations, speaking the same language, to a large extent having the same laws and customs,

must live in peace and harmony or else all civilization would be doomed. . . .

May God save Britain and the United States from any spirit of growing hostility and may the time soon come when these two great nations, the foremost in civilization and in work for humanity and Christianity which the world has ever known, shall stand side by side for the advancement of civilization and of Christianity throughout all the world!

[A Textbook on Americanization Quotes The Christian Science Monitor]

"Americanization," a textbook by Ellwood Griscom, Jr., has recently been presented to the public free schools by the Texas bodies of the Ancient and Accepted Scottish Rite of Freemasonry. Its purpose, as stated in the foreword, is to help to make thinkers and leaders ready to assume the duties and responsibilities of citizenship. It includes selections from the speeches and writings of such men as Theodore Roosevelt, Woodrow Wilson, Lawrence Lowell, Lyman Abbott, and many others. It also contains a condensed editorial from *The Christian Science Monitor* entitled, "Loyalty to Democratic Standards."

[From "Current Events and Discussions" in The Journal of Religion]

The Jesus of the gospels, however criticism may seek to recompose his historical reality, makes an appeal to multitudes who are outside of the churches, and to whom the traditional theology has no meaning; it is to what they understand to be his teaching about God and man that they look for the light to guide the steps of society to-day along the forward path. Such movements as the "Faith and Labor" groups show that there is an approach of men and women of good will in the churches and in the labor organizations toward one another.

4

[From a Letter in The News, Santa Barbara, California]

Inasmuch as your published report of a sermon delivered by Dr. James H. Batten contains unwarranted and misleading criticisms of Christian Science I ask opportunity to make a correction. When Dr. Batten commends the affirmations of Christian Science and in the same breath refers to its denials as "absurd" he at once admits the fact that he is not familiar with the subject. An intelligent affirmation includes a denial; for instance, the affirmation that "God is All" necessarily includes the denial of evil, all that is unlike Him. The "absurd denials" that the gentleman objects to are identical with those made by Christ Jesus, as when he referred to the devil, evil, as "a murderer from the beginning," that "abode not in the truth, because there is no truth in him" (John 8:44). Here is the emphatic declaration that there is no truth (reality) in evil.

Multitudes are to-day rejoicing in health and improved character gained through the Christ-method as taught in Christian Science, and they are convinced that the denial of evil and its claims brings forth very practical results which are very far from being "absurd." In discussing the treatment of children Dr. Batten again evidences that he is not informed as to the efficacy of Christian Science treatment. He evidently is unaware that most of its beneficiaries seek its aid as a last resort and after all hope has fled. In reply to the frequent query, "Where do all the adherents of Christian Science come from?" it has been well said, "Most of them come from their graves."

After experiences of this kind is it strange that loving parents should seek the same efficient aid for their children? Does Dr. Batten seriously hold that the state through "rigid

laws" would be more sympathetic, watchful, and competent than the parents of a child who stand ready to make every sacrifice in its behalf? If Dr. Batten will take the time to compare the death rate of children under materia medica treatment with that of Christian Science treatment, I am sure that his sense of justice and fair play will cause him to withdraw his criticisms and rejoice with us that the practice of the "Physician of Galilee" is again operative among men, redeeming them from sin and disease, and, better still, making them earnest and sincere followers of the Master.

[From "The Use and Abuse of Organized Religion," by Barbara Wooton in The Hibbert Journal]

We may perhaps look to see organized religion a useful feature of our spiritual life for a long time to come. But if there is truth in the view I have tried to present, organized religion ought to occupy an essentially secondary place. Instead of being an institution which is destined to grow in size and splendor, it should take rank with those institutions which work toward their own undoing. . . . Organized religion is a glass through which we see, darkly indeed, but still, if we use it aright, more clearly than if we had no window at all. But if we devote all our energies to polishing the glass—if, becoming window cleaners, we look at it and not through it—then indeed the fair prospect upon which it opens is forever lost to us.

Organized religion no longer occupies the place in our national life which once it held. Especially is this the case with the more educated sections of the populace. The nominal membership of churches and of other religious bodies may rise and fall, and their active membership may vary also. But I do not think we can dispute that the influence of the churches is perceptibly waning. Their own agitations on the subject bear sufficiently cogent testimony. But the distress of the spokesmen of religious organizations is largely due to the belief that the decline and fall of organized religion must also be the decline and fall of religion itself. Were that necessarily so, then indeed they would have cause for alarm. But it is not necessarily so. We probably are less religious than we once were. It is not to be expected that, after embracing for six years the methods of materialism in the dealings of nation with nation, we should emerge with strengthened spiritual ardor. But in other ways our very indifference to organized religion may be a sign of a new birth of religion in forms which we have hardly yet learned to recognize as truly religious. There are departments of our life in which we need to be dragooned and regulated by ordinance, in which failure to comply with established usage would be a sign of real delinquency. But our religion is not such. Our faith is perhaps the one sphere in which the old human desire to be "let alone" may rightly reign unchallenged. And if some of us are saying to the churches that we want their ministrations either not at all or only in a secondary capacity, it does not follow that there should be weeping and wailing and gnashing of teeth. Religion is like the wind which bloweth where it listeth. Build shelters to catch it, and you will find that in them there is no blowing at all.

[From Introduction to a Christian Science Lecture in Corry, Pennsylvania]

The Christian Scientist accepts the teachings of Jesus in all their simplicity, and believes they apply to present-day conditions as well as they did to conditions existing two thousand years ago. The Bible is the authority for the statement that Jesus said to his disciples of all time, "He that believeth on me, the works that I do shall he do also; and greater works

than these shall he do." Christian Science comes supporting and expounding all Scriptural truths and it has come to my understanding as a religion of infinite justice, a religion whose right thinking and right living take away the wrongs but not the rights of mankind. It is not destructive but constructive and positive. We all believe in the Bible in a vague sort of a way, and how few of us are able to use our knowledge of religion to meet our everyday needs.

It is plain to Christian Scientists that the reason for its growth and the explanation of its healing are that Christian Science is based upon a demonstrable understanding of God as omnipotent, ever available good. Jesus the Christ brought to the world the idea of God as Spirit, as infinite Mind, Truth, Love. Mrs. Eddy when she wrote and published "Science and Health with Key to the Scriptures" made plain the teachings of the Savior and the spiritual import of the Bible. Christian Science is not a new religion or a new creed. It is just the religion of Christ explained and understood, nothing more. The message that will be delivered to you is one abounding in glad tidings, right thinking, and great joy, and the whole may be summed up in the one immeasurable word—Love.

[From Public Opinion, London, England]

"The fall of 'The Fall of Man' has been received with equanimity," said The Nation. "So far as we can be aware of any occurrence outside the records of personal experience, we know that the dogma of man living thousands of years ago in a golden age, in communion with the Divine, and falling from grace by disobedience to the heavenly will, or, in other words, falling with a thud from the top of the evolutionary tree when he was still fumbling about at the roots, is theological moonshine. . . . The older physicists explained the universe in terms of molecular energy, and interpreted the living creature as a physico-chemical mechanism. We now know from the experiments of Jennings and the patient researches of Driesch, that not the meanest organism that waves its cilia in the waters but employs a force in its vital functions, baffling every mechanistic formula. amœba behaves; it is capable of profiting by and registering the gains of experience, it 'trades with time,' and can learn by the 'method of trial and error' to reject and accept.

progress which so vindicates idealism. . . . Huxley painted nature as a 'gladiatorial show,' William James as a 'harlot' and 'mere weather,' but the moderns have swung over to the other side, not as artists and dreamers, but investigators of facts, and we have Professor Bourne saying: 'This fratricidal war is not so evident—I doubt whether it exists to any great extent—in the animal world.'

"The Darwinians defined competition as the rule of natural life; the modern zoologist listens to Kropotkin's: That is the watchword that comes to us from the bush, the forest, the river, the ocean. "Therefore combine—practice mutual aid!"' The new knowledge that man has conquered the world not by brute force . . . and that altruism, as Herbert Spencer in his day cried to deaf ears, is an integral and increasing part of the order of nature, is a further example. Before this wonderful turnover of opinion, accomplished in so short a period and derived from quarters used to treating sentiment as an irrational bogy, we need feel no surprise at Professor Muirhead's statement that 'it is not too much to say that religion in the wider sense of the word exercises a stronger hold on the mind of the civilized world to-day than it has done at any period since the Reformation.'"

[From "Saturday Night Thoughts" Column in Boston Evening Transcript]

I recognize fully that we are pilgrims and strangers in the earth; but I am thankful that for those who go in faith it may be an unhurried pilgrimage. The goal is so certified to the children of God that we need not take anxious thought. Let us make no mistake about this; he who lives in a hurry is out of step with the purpose of God. For it is evident to any one who looks that God is not in a hurry. It is Christ's saying that we must work while the day lasts, because the night cometh when no man can work. But if you put that in general form it is a warning that we must do things at the moment of their opportunity and not that we are bound to hustle and hurry as we go. And so it is quite consistent with that divine saying reported by Isaiah, "He that believeth shall not make haste."

The daughters of haste are panic and inefficiency. . . . And the father of haste is selfishness. . . .

As card-sharpers like to get their victims excited with drink before they fleece him, as brigands count upon fear as a weapon in their hands, so the genius of blundering counts upon haste as an accomplice in its work. Of course the highest genius must learn to decide instantly in a great emergency. The leader in the field must adapt himself to the changes of the battle as they come. But most of us are not in any emergency that compels decision without consideration. . . . The way of attainment is not deliverance from the affairs of the world but that serenity of heart which comes of faith in God and a genuine and active good will toward men. He who keeps the two great commandments of supreme love to God and a love which puts one's neighbor on a plane of complete equality with one's own self has a good chance of passing through his days of pilgrimage with an unhurried mind.

[From Business Chronicle of the Pacific Northwest]

To be effective, publicity should first of all be truthful. Nothing of an enduring nature can be built on other than a foundation of truth and square dealing.

Church Notices

+ + +

From the Clerk of The Mother Church

Church Tenets.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank

draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Admission to Membership in The Mother Church

The next admission of candidates will take place on June 3, 1921, as provided in Article XIII, Section 2, of the By-laws of The Mother Church. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Friday, May 20, 1921. Consideration of any applications received after that date will be deferred until the November 4, 1921, admission.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to November 5, 1920, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

Charles E. Jarvis, Clerk,

236 Huntington Avenue, Back Bay, Boston 17, Mass.

Announcements

From The Christian Science Publishing Society

Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in *The Christian Science Monitor*, were run off at the time of their publication in the *Monitor*.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 81/4" x 103/4". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and sub-

scriptions for The Christian Science Monitor, Journal, Sentincl, Quarterly, and Heralds, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and immediate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and appre mately all points west of Billings, Montana; Cheyenne, Chang; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlet in Russian

There is now on sale a new Russian translation of "Christian Science: Its Advantage to Mankind" by Edward A. Kimball, with alternate pages in English. Price 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U. S. A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U. S. A.

Articles and Testimonies

+++

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U.S.A.

Letters of Appreciation

Many letters of appreciation of The Christian Science Monitor and other Christian Science activities are constantly being received. These letters express what these activities mean to different individuals in various occupations an' pursuits. The favorable comment that has been received on those already published ir that they are welcome and helpful; therefore others will be published under the above heading. Extracts from such letters follow:

While studying this question (renewing a subscription), it came to me that I could not possibly be deprived of The Christian Science

Cr

Monitor, and that I myself must be a monitor as I go about my duties, daily expressing a higher perception of the truth about the world in general and the activities of each country, and the bearing of important decisions or steps by any country on the welfare of all the world—as we find on the outside pages of the Monitor. Then in closer association,

I, too, as does the Monitor, must express each day a higher and clearer appreciation of the great minds of history, of art and literature, of work and play, of music and poetry. And to those who know me best must I express Love, the fulfilling of the law, and so bless all and injure none. Through this experience I appreciate Mrs. Eddy's perpetual gift to the world as I have never done before.

I AM very grateful for the fearlessness with which the editorials in The Christian Science Monitor are uncovering world problems and their ac-

Education and the MONITOR

tivities. It is an inspiration and education beyond human estimation of value. The Christian Science Monitor is my only means of communication with the many different countries in which I have lived and in whose welfare I am deeply interested, and I know that only love can flow through its columns. Its education, written from the stand-

point of Principle, on the League of Nations, universal suffrage, labor problems, prohibition, and many other vital questions of the day and age, is one that must uplift thought to unselfish reasoning, which will undoubtedly lead to individual ideal citizenship. It fills a place in human need that can be filled in no other way.

The Christian Science Publishing Society, Boston 17, U.S.A. Sole Publishers of All Authorized Christian Science Literature

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each Large Type Edition, designed especially for the use of First Readers. Large Type (18-point) on Warren's heavy India Bible paper, bound in leather. Size 8 by 1034 inches. Single copy 87.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in The Christian Science Journal from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in The Christian Science Journal and Sentinel, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco. limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Containing the By-laws of The Mother Church Manual. Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

German Translation. Alternate pages of English and German.

Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges,

single copy 50 cents; six or more, each 35 cents.

Printed in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six

or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more,

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, mutbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

Christian Science Literature

"Science and Health with Key to the Scriptures" and all other published writings of Mary Baker Eddy are listed on the outside back cover page of this Sentinel.

Christian Science Sentinel

Established, 1898, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. Subscription price, payable in advance, postpaid, to all countries: One year, \$3.00; six months, \$1.50; three months, 75 cents; single copy, 7 cents.

The Christian Science Journal.

Founded, 1883, by Mary Baker Eddy. This monthly magazine is an official organ of The First Church of Christ, Scientist, in Boston, Massachusetts. Contains articles, editorials, and testimonies of healing, a directory of Christian Science Churches. Societies, and Reading Rooms; also in the January. April, July, and October issues a list of Christian Science Practitioners and Nurses. Subscription price, payable in advance, postpaid to all countries: One year, \$3.00; six months, \$1.50; three months, 75 cents; single copy, 30 cents.

The Christian Science Quarterly

Founded, 1800, by Mary Baker Eddy. Published January, April, July, and October. Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size. Subscription price, payable in advance, postpaid, to all countries: One year, \$1.00; single copy, 25 cents.

The Christian Science Monitor

An International Daily Newspaper. Founded, 1908, by Mary Baker Eddy, Daily, except Sundays. Its own world-wide news service is supplemented by the service of the Associated Press and of the United Press Association. Complete in its departments; unique in its Home Forum page. Full page of editorials dealing truthfully and fearlessly with vital questions of the day. Subscription price, payable in advance, postpaid to all countries: One year, \$9.00; six months, \$4.50; three months, \$2.25; one month, \$5 cents; single copy, 5 cents.

Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months 50 cents; single copy, 20 cents.

Der Herold der Christian Science

Authorized, 1903, by Mary Baker Eddy. A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months, 50 cents; single copy, 20 cents.

Subscriptions will begin with the next issue after the receipt of the order. Information regarding bound volumes of the weekly and monthly periodicals will be given upon request.

NUMBER 3

"We tread on forces"

THE riddle of the universe! Philosophers have tried to solve it all through the ages. We observe the sun and the stars, the seasons and atmospheric changes, and we assume that the universe consists of material bodies of spherical form to which other bodies of similar form are attracted and around which the latter circle in definite paths or orbits with unceasing, unspent motion. But whence the initial propulsion arises, when it began, how it is maintained, when it will end, and what it is for, no one can explain. The accepted theory is only a supposition which furnishes a plausible temporary explanation of such observable phenomena as varying seasons, night and day, cold and heat, and so on. The theory is an excuse, not a solution of the problem, because it has an unexplainable basis, a basis of fancy, not of fact. It is a theory of relativity, not touching the absolute. The ordinary thinking individual is therefore in the very unsatisfactory position of one who sees no hope of ever arriving at any reasonable explanation of what life and the universe really mean. Like a child who is put off with, "Don't ask so many questions; you will know some day," he has to be content with what the physical scientist gives him from time to time.

If we examine any one of the so-called material laws in the light of modern thought we shall find that there is not one that can hold water. The law of gravitation is one most generally accepted. It decrees that one material body attracts another. That is quite easily believed so long as matter is accepted as substance. We accept the implications of the supposed law of gravitation because every one else accepts them, but we feel instinctively that it is no law. By this false belief man is tied and fettered, and from it he wants to be and can be freed. He wants to find a real law to ring out the false and ring in the true.

To-day the great modern mathematician classes the law of gravitation as a law of curvature. He finds that a moving material body, unopposed by any external resistance, would travel in a straight line. Attracted by gravity it is drawn out of its straight path and begins to form a curve. Now, a curve, however slight, must eventually come back upon itself and inclose a space. Gravity, then, becomes a supposed force of attraction, a secondary force, which interferes with and opposes another initial force of propulsion and tries to limit and circumscribe its action. This is all very interesting and reasonable. But here the mathematician stops. He does not say whence the initial force to which gravitation opposes itself is derived, and we are left in the quandary of not knowing which of these two opposed forces is the stronger. It is presumably a balance of relative forces, a theory of relativity, with no absolute truth in it; a theory which breaks down because it tries to put life, truth, intelligence, and substance into matter.

It is here that the author of the Christian Science textbook, "Science and Health with Key to the Scriptures,"

comes to the rescue. More than fifty years ago Mrs. Eddy was divinely led to discard all consideration of matter in her beneficent work of exploring and discovering a solution of the riddle of the universe. On page 124 of Science and Health Mrs. Eddy writes, "The universe, like man, is to be interpreted by Science from its divine Principle, God, and then it can be understood; but when explained on the basis of physical sense and represented as subject to growth, maturity, and decay, the universe, like man, is, and must continue to be, an enigma." By the simple process of lifting thought out of material sense and bringing it into metaphysical concepts, to its rightful ownership in the one Mind, the problem is solved. Christian Science does not recognize matter as an actual fact, and therefore cannot recognize any material law. It says, in effect, that matter is only a temporary, illusive concept of mortal mind, and then, having accepted the existence of only one Mind, God, it logically discards the existence of any mortal mind, classing mortal mind and matter as an error of statement. From this position it is only one step to the recognition of all actuality as spiritual. Hence Mrs. Eddy's powerful statement on page 469 of Science and Health, "The exterminator of error is the great truth that God, good, is the only Mind, and that the supposititious opposite of infinite Mind-called devil or evil-is not Mind, is not Truth, but error, without intelligence or reality."

Those who follow, even superficially, the results of modern research into physical science, cannot fail to notice the gradual progress in the attenuation of matter as a belief. Matter is losing its reality as substance, and material laws are becoming threadbare,—so threadbare that the real spiritual law, of which they are the counterfeit, can be discerned in place of them. As long as material belief continues, the so-called law of gravity will seem to exist. It is the counterfeit of the real law of Spirit. On page 124 of Science and Health Mrs. Eddy says: "Adhesion, cohesion, and attraction are properties of Mind. They belong to divine Principle, and support the equipoise of that thought-force, which launched the earth in its orbit and said to the proud wave, "Thus far and no farther."

Whether he knows it or not the philosopher, whilst searching into physical science, is looking for an actual spiritual law, which he will eventually find as he passes through the apparent material law which hides it. As the dream of life in matter begins to fade, the reality of eternal spiritual existence appears. On page 124 Mrs. Eddy writes: "We tread on forces. Withdraw them, and creation must collapse. Human knowledge calls them forces of matter; but divine Science declares that they belong wholly to divine Mind, are inherent in this Mind, and so restores them to their rightful home and classification." Mind, self-existent, creates, governs, and sustains a real, substantial, spiritual universe. There is no other intelligence, force, or substance. The dream of mortal, material man in which, through a veil of error, he sees a universe of matter and for which he is tempted to devise material laws, is a temporary illusion. The

ii,

real man is individual, eternal, without whom Mind would be unexpressed. The divine forces which constitute the life of man and the universe are unlimited, irresistible, unopposed forces emanating from Mind, governed by spiritual law, unalterable, beneficent, and harmonious.

The very moment that this is understood and accepted, even in part, the existence of the mortal is changed. He is "born again." He becomes more healthful and free. His actions are stronger; his decisions more accurate and direct; his powers of observation more keen; his appreciation and estimation of beauty in art and in nature more reliable. Understanding that all the conditions which surround him are mental effects, he can control them through his knowledge of Truth. Extremes of heat and cold need not affect him. The output of his industry need not be controlled or limited by atmospheric disturbance, by mechanical breakdown, by apparent unrest, or by economic failure. He is free, master of his own progress, the child of God.

This knowledge has brought health, peace, and happiness to thousands of men, women, and children in all parts of the globe. It is the truth of being which the Master taught to his disciples, which the ancient prophets of the Bible discerned in part, and which Mrs. Eddy again discovered and gave to the world. The psalmist was aware of it when he wrote, "The earth is the Lord's, and the fulness thereof." He knew nothing of the material law of gravity which would fetter us, pull us down, and deflect us from the straight and narrow way. The mathematician is on safe ground only when dealing with metaphysics, for mathematics in itself is truth. Therefore the wise student will seek for the real spiritual law which underlies every supposed material law. The forces which he treads upon will then sustain and protect him.

Opportunity

ELSIE FARR

THE human mind is prone to make excuses, and one of I the most frequent excuses put forth is lack of opportunity. This person or that person boasts of the remarkable achievements he might have attained had he had the opportunity, while another wastes time repining over a supposed lack of opportunity for progress, missing meantime the great opportunity to exercise his God-given dominion by overcoming the very circumstances which he has been accepting in the false name of lack of opportunity. Such individuals might well ask themselves what opportunity means to them. It might be at first unpleasant to admit that they had been regarding opportunity much in the light of a fairy godmother who in some mysterious way, without any effort on their part, would suddenly surround them with their heart's desire, but after all, might there not be some aptness in the illustration? A child who fretted because his mathematical problems did not "come out right," while he paid no heed to the rules of mathematics, would gain little sympathy, and yet the child's attitude is in many respects analogous to that sometimes shown by older persons. The fullness and completeness of infinite Mind are reflected as Mind's idea, man, and are equally demonstrable to one and all.

Now it is always well to be quite sure in what name a claim is made, just as men in authority, before acting on a claim or petition, if they are wise, first ascertain in whose name it is presented, and this largely determines its validity. If the petition was made in the name of a supposed organization found to have no valid existence, or was made without authority in the name of some one who denied all knowledge thereof, it would at once be declared null and void. The one Ego, divine Mind, being infinite, knows nothing of lack of opportunity, nor does its infinite idea, man, because his very being is infinite opportunity to express the completeness of good. Hence such a claim,-in fact, any argument of lack of any kind,—can only emanate from the counterfeit, the suppositional opposite, of the one Mind, and by reason of its false origin, it is on the face of it without validity; it is merely an excuse for the inevitable limitations of the human mind. But we can at least discover the truth by reversing the material fable. Thus we find that only evil, the suppositional absence of good, is without opportunity, because good is infinite, and therefore there is no place for its unlikeness. Good is All.

The ever presence of true opportunity has been affirmed and reaffirmed times without number, but never more clearly than in the words of the Christ, "Behold, I stand at the door, and knock: if any man hear my voice, and open the door, I will come in to him, and will sup with him, and he with me." The Christ, or Truth, the Savior of mankind, is ever at hand for those who have ears to hear and eyes to see, declaring the true sense of life and freedom and pointing the way to the realization of God's kingdom. The trouble is that mortals are so engrossed in the belief of pleasure in matter that they frequently do not hear the still, small voice of Truth, calling them away from the din of material strife to find enduring joy and peace in the conscious at-one-ment with the Principle of man's being. So absorbed has mankind become in a finite, fleeting sense of life that it actually resists, perhaps unconsciously, the opportunity which is always present to turn away from failure and disappointment to the fullness of Life.

It will scarcely be disputed that there never has been a time in the world's history when the right thinker and doer has had more of an opportunity than he has now to prove the truth he knows. Mrs. Eddy asks in "Miscellaneous Writings" (p. 176): "Are we duly aware of our own great opportunities and responsibilities? Are we prepared to meet and improve them, to act up to the acme of divine energy wherewith we are armored?" Man's inherent capacity, as the idea of infinite Mind, to reflect the infinite qualities of this Mind, leaves not the slightest possibility for doubt as to the nothingness and impotence of evil. Continuing in the same article, Mrs. Eddy asks on the following page, "Will you doff your lavender-kid zeal, and become real and consecrated warriors? Will you give yourselves wholly and irrevocably to the great work of establishing the truth, the gospel, and the Science which are necessary to the salvation of the world from error, sin, disease, and death? Answer at once and practically, and answer aright!"

The Christian Scientist knows, of course, that the only practical answer to such a question is the proof of the absolute unreality of error, sin, disease, and death, and he knows, too, that this proof can be given in no other way than by demonstration of the allness of good. Only through the revelation and demonstration of the true sense of life and being can the world be saved from its false sense of existence. Then does it not behoove Christian Scientists to avail themselves to the full of this solemn opportunity by giving practical proof of man's oneness with the one infinite Mind which includes all good? No circumstance nor combination of circumstances can alienate man from the Principle of his being. Even that which the world may interpret as adversity can but test the strength of a man's reliance on good. As Mrs. Eddy says in the textbook, "Science and Health with Key to the Scriptures" (p. 89), "We are all capable of more than we do." And again, on page 204 of "The First Church of

and to victory.'

Christ, Scientist, and Miscellany" she says, "My faith in

standard of living for the people. He was meek and lowly, Kr. Com giving God the credit for the good he expressed. He spoke r CC of "our Father," realizing the oneness of man with God. This oneness he demonstrated continually, healing the sick and raising the dead. Wherever he went he refused to see

other than the perfect man. Even his strong rebukes were of evil, while he proved man to be God's image. Can we not go about the world with a heart full of goodness, realizing our ability to do good? Such ability comes from God. Our brother, too, has the same amount of goodness available to him. Evil is impotent to turn us or our brother away from

the goodness of God. If we refuse to declare that evil is, and steadfastly know the allness of God, good, how our hearts will burn within us. Holding steadfastly to Truth

forgiveness? Such an attitude is sure to be right regardless

deprived of its healing power would be worthless to man.

Then, if we would be true Christians, we should give out only the healing truth.

and Love constitutes true loyalty to Principle. Jesus said, "The Father hath not left me alone; for I do always those things that please him." Are we pleasing so-called mortal mind, personal opinion, or mad ambition, or are we humbly

and meekly doing the very things that please God-expressing love, kindness, humbleness, gratitude, joy, charity, and

of what our brother may do.

Healing is accomplished not by admitting the seeming reality of so-called evil, but by utterly refusing to accept sense testimony, and knowing what actually is in place of

what seems to be. Thus we destroy false beliefs and bring to light man's perfect selfhood. Christianity if it could be

[605]

The real man is one with God. He is listening to the angels' song and is never frightened by any foolish suggestions of evil. To magnify so-called evil would be an impossibility to him, knowing as he does the utter nothingness of false beliefs. In this way he is conscious of his oneness with God, the Father. On page 340 of Science and Health Mrs. Eddy says: "One infinite God, good, unifies men and nations; constitutes the brotherhood of man; ends wars; ful-

fils the Scripture, 'Love thy neighbor as thyself;' annihilates pagan and Christian idolatry,-whatever is wrong in social, civil, criminal, political and religious codes; equalizes the sexes; annuls the curse on man, and leaves nothing that can

sin, suffer, be punished or destroyed."

There never has been and never will be more than the one infinite God. The one source of goodness is all the source there can be. It is useless for us to try to attain health or harmony by looking to materiality or seeing our brother in the wrong light. The goodness of God is manifest everywhere. Divine intelligence is the only real guide. Every earnest worker in the whole Christian Science movement must labor to exalt God, and prove the absolute guidance of intelligence. What a glorious world is here, not shall be, when it is viewed in the right way. Sin, sickness, and death have no real dominion, and we should never fear them nor believe them to be real.

Christian Science leads one away from superstition and teaches that man is the reflection of good, the expression of divine Love. If one continually declares evil to be present, that one may be continually frightened at his own false concept of things. The Christian Scientist is alert and is not trying to fasten evil on some one or declaring it to be in God's universe. Our thanks are due to Mary Baker Eddy, the Discoverer and Founder of Christian Science, for uncovering and exposing evil's hidden ways. She proved for herself and others the infinitude of good and the glorious possibilities of man, equipped with a knowledge of divine Science. The fear of evil is disappearing and the "fear of the Lord" is taking its place. The brotherhood of man is nearer than ever before. Christianity is on a firm basis. The little book, "Science and Health with Key to the Scriptures," and the other writings of Mrs. Eddy, shine out as beacon lights to the world, shedding their rays of light on the Bible. The many avenues provided by our Leader to keep this light burning, among which are the Lesson-Sermons, the literature, and the lectures, should be taken advantage of by every one with a deep sense of gratitude. If we are faithful, we shall be counted worthy to sit "upon white horses, clothed in fine linen, white and clean."

The Time of Trial

HELEN K. BROCK

MID the seeming unrest, turmoil, and upheaval which A the world is manifesting to-day, there is much comfort to be derived from the experiences related in the Bible. In the twentieth chapter of II Chronicles we are told a bit of history that illustrates one of the greatest lessons which we need to learn in our warfare with the arguments of error. After Jehoshaphat, king of Judah, had thrown down the idols and places of worship of Baalim, the record tells us that he dwelt in peace at Jerusalem, and sought to serve the Lord in all things. But the children of Ammon and the children of Moab, whose history as related in the nineteenth chapter of Genesis shows them to be children of error, with others whom they had influenced, came against him to do battle with him, and Jehoshaphat was afraid because they seemed so great a multitude compared with his own people. So he

...

Hi i

7.1

≅ŧų

THE WAY

ો કો k વીસ

S (d)

called his people together and prayed, declaring the omnipotence of God, affirming his confidence that the divine power both hears and helps, and waiting for the word of the Lord.

Then came the answer, through the prophet Jahaziel, in these words: "Hearken ye, all Judah, and ye inhabitants of Jerusalem, and thou king Jehoshaphat, Thus saith the Lord unto you, Be not afraid nor dismayed by reason of this great multitude; for the battle is not your's but God's. To morrow go ye down against them: behold, they come up by the cliff of Ziz; and ye shall find them at the end of the brook, before the wilderness of Jeruel. Ye shall not need to fight in this battle: set yourselves, stand ye still, and see the salvation of the Lord with you, O Judah and Jerusalem: fear not, nor be dismayed; to morrow go out against them: for the Lord will be with you."

So instead of rushing forth to battle with the enemy, Jehoshaphat set his people to praising God, and to declaring His greatness and omnipotence, and we are told that the enemy began to fight among themselves until all were destroyed. And Jehoshaphat, rising up early in the morning, appointed singers to go before his people praising the Lord and declaring that His mercy endureth forever, and when they came to the tower in the wilderness to look down upon the enemy, "behold, they were dead bodies fallen to the earth." And descending among them, the people of Judah found so much spoil that it took them three days to carry it away.

We who take up the study and the practice of Christian Science find ourselves in much the same position as did Jehoshaphat. When we have begun to realize even a little of the wonderful brightness of His glory, and have begun to reject the various idols that we have been cherishing, we seem to have attained a point where we feel entirely at peace, and it seems as though surely nothing could disturb us any more. But if we are not watchful, there comes a time when we grow a little apathetic and perhaps go to sleep at our post; and lo, when we awake, there are the children of Ammon and of Moab, the erroneous beliefs which never had any excuse or foundation for being, but which are ever seeking an opportunity to assert themselves, waiting outside our gates for recognition, endeavoring to disturb our peace and throw us down from the heights to which we have attained, to undermine and destroy our governments and institutions, and often assuming a guise of great friendliness and profound wisdom to gain their end.

Then is the time when we must remember the words of Jahaziel and know that the battle is not ours but God's; that the power of God is the only power to be recognized, in spite of the hue and cry at our door. There is an old saying that "an empty wagon makes the most noise," and we find error forever clamoring to be heard and to assert itself. Truth works silently, but none the less inexorably, knowing its power to be infinite. Manifestations are of God, other seeming manifestations are unreal. There can be no mixture of the two. Therefore we must not recognize any reality in any manifestation which is not clearly of God, infinite Mind. As Mrs. Eddy declares in "Science and Health with Key to the Scriptures" (p. 468), "All is infinite Mind and its infinite manifestation, for God is All-in-all."

If we stand fast in the presence of our fears, declaring the ability of God to save from all that is unlike Himself, being not dismayed nor led astray by the multitude of arguments that would array themselves on the contrary side, but holding fast to Truth, and praising the Giver of all good continuously, knowing that in our efforts to overcome materiality we shall find like Jehoshaphat that all that is opposed to good destroys itself; and when the uproar and strife of op-

posing argument are over we shall find that we may glean many a precious gem of wisdom, strength, and gratitude from the experience.

When the forces of evil seek to obstruct and destroy the channels through which the waters of truth may flow to the thirsty, to overthrow the citadel and make its laws of no effect, when the dragon roars without the gate, and wolves in sheep's clothing lie in wait for the stragglers, and false prophets arise "to seduce, if it were possible, even the elect," what is more necessary than that we stand firm, knowing that God both directs and protects His own in all circumstances, and that evil has no power but to destroy itself.

We may have to pass through the fire, but we know that it will only purge away the dross, and the pure gold of Christian Science will emerge unharmed. On page 574 of Science and Health, we read: "The very circumstance, which your suffering sense deems wrathful and afflictive, Love can make an angel entertained unawares." And so we may know that although the present day may seem to be dark and stormy, still the world is being slowly but not the less surely filled with the knowledge of divine Principle, while Christian Science points ever to the truth that Principle governs; and when the morning shall dawn, we shall all go forth like the people of Judah with singing and rejoicing, and find ourselves on the tower of demonstration overlooking the wilderness, in a position to witness the overthrow and destruction of evil instead of being overwhelmed by it.

Let Us Follow and Rejoice

RUTH REA IRWIN

CHRISTIAN SCIENCE is not a religion to be lived on Sunday and forgotten during the week. We do not get anything worth while for nothing, and the things worth something are worth striving for. We gain from Christian Science in proportion as we apply it with consecration. If we work spasmodically or half-heartedly, we must not expect marvelous results. If on the other hand we are awake, earnest, joyful, active, and progressive, and use what we have each day to the best of our understanding, Truth unfolds to us and our growth and strength will be increased. Right thinking thus becomes habitual. Going to church and reading the letter of Christian Science will never heal a case or make error less real unless we live our religion in everyday life and demonstrate spiritual understanding.

Much of my time, since beginning the study of Christian Science, has been spent in the country, far from a church or society. Two years ago last winter, four months were spent in a large city. It was a great privilege to visit the large churches and reading rooms. As the time drew near for my return home, a feeling of sadness and regret presented itself. Then I thought of a stanza from one of Mrs. Eddy's hymns:—

From tired joy and grief afar,
And nearer Thee,—
Father, where Thine own children are,
I love to be.

I turned to the Glossary of Science and Health, to the definition of Church (p. 583): "Church. The structure of Truth and Love; whatever rests upon and proceeds from divine Principle," and realized that I could have Truth and Love at home. The material church edifices of stone or brick did not constitute Church. It is Truth that speaks from the pulpit. Truth that is impartial, universal, healing, purifying, must be expressed as the real service. Divine Love manifest is the real Church. As Mrs. Eddy says in Science and Health

(p. 113), "The vital part, the heart and soul of Christian Science, is Love." Right at home I could continue to love, and the sense of regret and loss was overcome.

The thought came to me that all churches grew in the first place from one student or a few students of Christian Science who loved and labored for Christ, Truth. We could not all live in the city; some must live in the isolated parts; but there are no places remote from God. Wherever we are we must let our light shine. All can be more loving. If Christian Scientists cannot express true love, who can? The world expects this of us, and it should not be disappointed. The place for each one of us to become more loving is where he is to-day. A more convenient place or time will never be found. A child does not jump from the third grade into the fifth because the third is too hard. He must first learn well the lessons in the third and then he will be ready to advance to the fourth and then to the fifth.

If we find our present environment inharmonious or not to our liking, we gain nothing by running away. Let us look at what claims to be our own consciousness and there find and destroy the error. As our thought changes, so will the conditions. We cannot jump or hate our way out of inharmonious situations; we must work and live our way out. On a long motor trip we have our guide book, signboards along the way, and the advice of those who know the route. Our beloved Leader, Mrs. Eddy, has marked out the highway for us; the Bible, and Science and Health, and all Mrs. Eddy's other writings, show the path. Our Lesson-Sermons for daily study are a guide book, marking each day's travel. The periodicals and other literature for which Mrs. Eddy provided show us the experience of other travelers who help and cheer us along the way. Let us lovingly follow and rejoice. Let us pray, in the words of another of Mrs. Eddy's hymns:-

Shepherd, show me how to go
O'er the hillside steep,
How to gather, how to sow,—
How to feed Thy sheep;
I will listen for Thy voice,
Lest my footsteps stray;
I will follow and rejoice
All the rugged way.

Right Living

E. H. HUGHES D'AETH

RIGHT living is right thinking, and right thinking, when we get down to facts, to the bedrock of things, is love, the expression of divine Love, first, last, and all the time, love of God, love of good. We cannot love God, good, supremely and at the same time harbor evil thoughts. The thoughts may come, but our love for good will cause us to turn from them with loathing, knowing that it is only in the harmonious and true that we shall find peace and joy. No man loves evil. He may not love good, or he may think that he does not, but he cannot love evil. He may think that he finds a certain amount of pleasure in it, but he is never satisfied or contented with it; there is always something lacking, a blank that is never filled until his thinking changes and his whole life is filled with the love of good.

We are told not only to love our friends but to love our enemies, and our enemies often turn out to be our best friends, when we have conquered feelings of resentment, anger, hatred, and these inharmonious conditions give way to thoughts of love. Then, rejoicing in our knowledge that we have conquered evil and are reflecting and glorifying God, we bless our enemies, for they have been the unconscious means of giving us the opportunity of proving our love of

good. We think that we have a hard task before us when we know that we have to love our enemies, but is it such an easy thing to love our friends, to love them with the real love? We may admire them, take pleasure in their society, prefer them to our enemies, love them with a material love, but do we really love them in the highest sense? How often after spending happy hours with them do we not, while thinking of and admiring their sweetness of disposition, clear thinking, all their good qualities, ponder and wonder over that one little failing which we think we have discovered in them? If we loved them as we ourselves would be loved, would we see that little failing? Would not we see the image and likeness of God as the reality of friend?

Loving good we must hate evil; that is, we must see the utter unreality and nothingness of evil. It is comparatively easy for the student of Christian Science to recognize and be prepared for the approach of sin in its more flagrant forms; it is the little sneaking errors that get in their work almost before one knows they are there, that so often cause one to trip. Such are irritability, jealousy, pride, criticism, judging, condemning, and that most insidious of errors, discouragement. In fighting against this last I do not know anything more helpful than a careful study of the life, as far as we know it, of that lovable, headstrong, impetuous man, the disciple Peter. Always the first to act, the first to speak, impelled, as it were, by his great love for the Master to thrust himself forward, often blundering, often failing, yet we never hear of his being discouraged. Bitterly grieved he must have been very often, but always pressing on. What a dreadful rebuke of sin that must have been from a beloved Master, "Get thee behind me, Satan: thou art an offence unto me." How inclined would a man be, with less of Peter's great love, to let discouragement in, feeling that however good a fisherman he might have been he was no good at his present work and that the best thing he could do would be to go back to his former vocation. But Peter was a fighter and would not turn his back on the enemy. And how Jesus understood and helped him. He fostered the great love that he saw was there and checked the impulsiveness. He seems to have kept Peter always near him, watching over him, encouraging him, and rebuking him when necessary. In the last chapter in Mark we read that when the two Marys and Salome saw the young man in the sepulcher he bade them take the message to "his disciples and Peter."

So, if we would gain the realization of infinite good we too must see divine Love universally expressed, for it is only by searching for and realizing this true Love that our own sense of love will grow. Always striving to realize the ever presence of divine Love, we shall naturally fall into the habit of right thinking, and right living will be the result. "Love fulfils the law of Christian Science, and nothing short of this divine Principle, understood and demonstrated, can ever furnish the vision of the Apocalypse, open the seven seals of error with Truth, or uncover the myriad illusions of sin, sickness, and death" (Science and Health, p. 572). In the fourth chapter of I John we read: "Beloved, let us love one another: for love is of God; and every one that loveth is born of God, and knoweth God." "And we have known and believed the love that God hath to us. God is love; and he that dwelleth in love dwelleth in God, and God in him."

4 4 4

How soon forgot, the passing storms
When sunshine brings the rainbow fair;
Let joy shine bright upon your plight,
And lo, you'll find but blessings there!

Deception

A HALF-TRUTH is worse than a whole lie. It is, to begin with, necessarily more deliberate, and while it lacks the courage of the flat lie, it assumes the pretense of truth. It is, in other words, deception in its most despicable and dangerous form. "A lie," Mrs. Eddy writes, on page 17 of "Unity of Good," "has only one chance of successful deception, to be accounted true. Evil seeks to fasten all error upon God, and so make the lie seem part of eternal Truth." A man who takes refuge in a half-truth, with the intent to deceive, really makes the attempt to extract two chances of deception from his action. He tries to get the full imaginary benefit of his lie by making a partial something instead of an absolute nothing of it. In other words, he seeks to give evil the hallmark of good, in the insane hope that he can make it real and eternal. It is, therefore, the very deliberation and calculation involved in the half lie that makes it so dangerous to its perpetrator, in the long run; for there is nothing hidden that shall not be revealed.

The thing, of course, which the practicer of deception always leaves out of account is the solid, practical fact that in reality he is never deceiving any one but himself. If he is not a metaphysician he may have some difficulty in perceiving exactly what this means, and how it works out, yet it is extremely simple. Nothing that is not true can be real. Consequently, a lie is an unreality. No matter if a man were to say a thousand times a day that two and two make five, it would not make them do so. He might deceive a thousand ignorant people in the course of the day, he might turn their ignorance to his own apparent benefit for some financial end or to bolster up a false position. But what is really occurring all the time is that the perpetrator of the lie is falling into the error pointed out by Paul, when he wrote to the Galatians, "For if a man think himself to be something, when he is nothing, he deceiveth himself." The liar, in other words, in imagining that he is taking advantage of others, is thinking that he is something, when he and his lie are nothing, and thus is deceiving himself. So long as the lie seems to effect its purpose, the deception may seem to be successful. But, unfortunately for such reasoning, life is eternal, and, as time goes on, those who have been deceived through innocence or ignorance, through credulity or willingness, awake to a sense of the truth, whilst the deceiver also slowly awakes to the fact that all that has been happening, so far as he is concerned, is that he has so tangled his own sense of integrity that he finds himself in the position of the foolish virgins when they knocked at the door of the marriage feast, saying, "Lord, Lord, open to us. But he answered and said, Verily I say unto you, I know you not."

Therein lies the metaphysical meaning of divine protection. A man can suffer from the malicious intention of a lie only to the extent of his own belief in the supposititious power of evil. Consequently, it is his business to protect himself against every such effort through a clear obedience to the intention of the Manual, where, in Art. VIII, Sect. 6, Mrs. Eddy has written, "It shall be the duty of every member of this Church to defend himself daily against aggressive mental suggestion, and not be made to forget nor to neglect his duty to God, to his Leader, and to mankind. By his works he shall be judged,-and justified or condemned." Now the suggestions of mortal mind, in the effort to counterfeit infinity, are not to be numbered. It is impossible, therefore, that they should daily be denied individually. But in the exact proportion in which a man lives in obedience to Truth, he withdraws himself from the radius of evil, and this effort to devote every moment of his day to the exclusion of evil, by dwelling upon good, is the very surest protection he can afford himself. This is manifestly what Mrs. Eddy was saying to the members of the Church when she gave to them that wonderful counsel, printed on page 210 of "The First Church of Christ, Scientist, and Miscellany": "Beloved Christian Scientists, keep your minds so filled with Truth and Love, that sin, disease, and death cannot enter them. It is plain that nothing can be added to the mind already full. There is no door through which evil can enter, and no space for evil to fill in a mind filled with goodness." Would it be possible for the individual to protect himself daily, against the myriad aggressive suggestions of evil in any other way?

Such self-protection must bring to every one who avails himself of it the wonderful assurance of peace unfolded in the ninety-first psalm. Against the defenses of the man who really keeps his mind filled with Truth and Love, the suggestions of evil, whether half-truths or whole lies, will shatter themselves in vain. He will not have to go out and engage in a battle of words with the purveyors of suggestion: all he will need to do is to "be still, and know that I am God." Then, not only is he protected, but he must conquer. And, moreover, he will fight out his battle without a moment of uneasiness. There is one thing, and one thing alone, that ever causes a man's heart to be disquieted within him. It is his belief in matter, and his subjection to the lusts of the flesh. In the degree in which these remain real to him must be his lurking fear of the power of evil, of the influence of a lie, but when he has assured himself, even in a measure, of the unreality of matter, and freed himself, even in a measure, from the lusts of the flesh, his understanding of Truth and Love, of Principle, has expanded sufficiently to make it plain to him that evil is the great red dragon, foredoomed to destruction as he feeds on the whole conception of matter which is real, of lies which have power, and of truths which can be reversed.

Truth, wrote the Roman, is great, and will prevail. Even the pagan mind was capable of realizing that. One with God, Truth, it was insisted, centuries later, is a majority. Why, then, however overwhelming the odds may seem to be, should the man who carries the standard of Truth doubt victory for one moment? The cause of Truth has always been the cause of the minority. That, in the nature of things, is almost a metaphysical necessity. No sooner has one aspect of Truth been recognized than the majority of those who have fought for the recognition go to their tents to rest, or find relief from the strife in a fresh contact with matter. But there is always the irrepressible and troublesome minority. For them the enemy is still ahead, and the banner has to be raised again. "There is always some tumult," Mrs. Eddy says, on page 225 of Science and Health, "but there is a rallying to truth's standard." FREDERICK DIXON.

Both the Tree and Its Fruits

that it is demonstrable. This does not mean, of course, that

a human appearance of improved conditions is a guarantee

that right methods have been used to bring it about. In

Christian Science it is possible to prove the correctness of

both practice and Principle by logical and undeniable rea-

soning. It is also possible to demonstrate by actual works

the exactness of the operation of Principle. For permanent

right results, Principle and practice, cause and effect, must

be understood as spiritual and scientific. As Christ Iesus

said repeatedly, "The tree is known by his fruit." A care-

ful consideration of this statement leaves no room for the be-

lief that the mere physical senses can testify truly as to

fruitage. The evidence that Principle is the sole governing

power must be spiritually discerned. Spiritual understand-

health is understood, the human belief in any limitation or

lack of wholeness disappears. This is the healing process.

It is not the patching of a physical body, but the lessening of

the belief in physicality through the demonstration of spirit-

uality. One may be healed through Christian Science with-

out recognizing much of what this real process is. Con-

tinued study with unfolding understanding is necessary,

however, for the proving of undisturbed freedom always.

In order to be forever free one must be alert to know how

divine Principle manifests itself as right action. Eternal

health can be proved only through the understanding of in-

finite Mind and its spiritual idea. This is the understanding

Scriptures" by Mary Baker Eddy, we read: "Science not

only reveals the origin of all disease as mental, but it also

declares that all disease is cured by divine Mind. There can

be no healing except by this Mind, however much we trust a

On page 169 of "Science and Health with Key to the

that Christian Science is giving to the world.

Real health is spiritual wholeness. As this true idea of

ing must bear witness to the actuality of spiritual cause.

THE great advantage of Christian Science to mankind is

fact 5: Ts. I

35.2 :1:: 16.25

drug or any other means towards which human faith or endeavor is directed. It is mortal mind, not matter, which brings to the sick whatever good they may seem to receive from materiality. But the sick are never really healed except by means of the divine power. Only the action of

ing and arranging for the Christian Science periodicals she has provided one of the ways in which the expression of

Truth may reach the world. Mrs. Eddy herself has testified to the improvement which the understanding of divine Principle brought about in her

own experience. She also provided for testimonies of healing

by the many, both in the periodicals and in the Wednesday

evening meetings. Thus she says in the Manual of The Mother Church (Art. VIII, Sect. 24): "Testimony in regard to the healing of the sick is highly important. More than a mere rehearsal of blessings, it scales the pinnacle of praise and illustrates the demonstration of Christ, 'who healeth all

thy diseases' (Psalm 103:3)." Science should not, of course, overemphasize the seeming

physical improvement that comes about for them as they turn to Principle for the true help. The right way is to take

demonstration of Christ." There are also many other examples than what appear as physical healings. All sorts of

Digitized by Google.

better conditions in daily living, realized through the reliance on Principle, indicate that just so much of materiality has

given way to the spiritual idea of Life.

With sincerity and dignity, each student of Christian Science can recognize for himself and for the benefit of others the improvement that is developing in proportion as he accepts the divine consciousness as the reality. One need not dwell unnecessarily on a previous state of unpleasant illusion. In a testimony it is as well to state with gladness the healing that has been proved through the ever presence of the Christ, or spiritual idea of Principle, revealed in Christian Science. It may be helpful for the one giving a testimony to explain briefly for the benefit of readers or hearers something of how the healing was proved and what prejudices, preconceptions, or seeming discouragements were overcome. Testimonies are one way in which Christian Science is bringing to the attention of the world the true unity of Principle and practice, one means of showing conclusively that the "good tree bringeth forth good fruit." They have, therefore, an entirely natural part in the unfoldment of Christian Science for the blessing of all mankind.

Since this is so, one need not have the slightest diffidence in testifying to the power of Principle. Every improvement in living conditions, realized through the application of Christian Science to the seeming circumstances, is evidence that divine intelligence does govern the true man and does manifest itself as right activity. No proof of Principle is unimportant. Every glimpse of divine Life and its manifestation is an experience of healing. Any insight into the infinity of Principle is beneficial to the one seeking health and happiness. The resolute overcoming of self-distrust through the comprehension that the one I AM is the only real selfhood is a step forward. Every step has to be one of demonstration. The giving of a testimony, whether in writing or orally, is a happy experience when it is understood as an evidence of cooperative helpfulness in the turning to Principle that is necessary for all. It is a presentation of facts that must be coordinate with the one Principle which is the only cause. The whole study and practice of Christian Science must be a constant rejoicing in the goodness of both the tree and its fruits. GUSTAVUS S. PAINE.

Heritage

ETTA LAMBERT-KNIGHT

HAIL, son of God! I know thee as thou art; No faltering step, nor raiment mean and worn, No empty earth-bound dreams which fear impart Can veil the heritage to which thou 'rt born.

Thy noble birth is stamped upon thy face, Thy Father's kingly realm is close at hand, And raptured love awaits but to embrace And welcome thee from distant alien land,

Where, lured by phantom joys of mortal sense, Amid the maze of winding paths alone Thou wanderedst far to seek a recompense, While perfect gifts awaited thee at home.

Awake, thou son of God! and claim thy right To dwell in peace, where Love can see no wrong, Where Truth bestows the robe of purest white, And soul is lifted up in joyous song.

Testimonies of Healing

I gratefully avail myself of the privilege of testifying to the many blessings which have come to me and mine since I began to study Christian Science. I may say that before this divine gift came to me, I had searched in many directions for the truth. Various denominations, spiritualism, theosophy, and pagan philosophies had been tried but none of these could give me what I yearned for, that is, a solution of the so-called riddle of life. "Why am I here? What is my duty, and what is the end to be?" were some of the questions I wanted answered, and I am indeed grateful to say that Christian Science has supplied the answers and has met my every need.

The first reading of "Science and Health with Key to the Scriptures" by Mrs. Eddy convinced me as to the truth contained therein, and I resolved to study it faithfully and thoroughly. About six weeks after this, our little baby boy was suffering from dysentery. I therefore decided to trust to what I now knew to be Truth. As I sat by his bedside mentally affirming God's allness and denying the presence of any discord, the little fellow fell asleep, which he had not done for forty-eight hours, and slept for just twelve hours. Then he awakened with a clear complexion and a happy disposition which had seemed foreign to him just before. Since then my wife and I have worked out our own problems and those of our children solely through our understanding of Christian Science; and while we recognize the loving and unselfish work done by practitioners, we also realize that it is much more satisfactory if one can work out one's own salvation.

I did not think I needed any healing when I first came to Science, as I thought I was fairly robust, but I am grateful to testify that I have been healed of a poisoned leg; also of the drinking and smoking habits, of the use of obscene language, of bad temper, and of financial troubles. My wife has had many proofs of God's loving-kindness, and our children's discords have all been overcome by the truth, through our understanding of the allness of God, good.

During the influenza epidemic, I, among many others, volunteered to help look after several hundred Kaffirs, who were brought in from outlying kraals for isolation, and although I was advised to smoke frequently, take quinine tabloids, throat lozenges, and the like, I did nothing but rely on the teachings of Christian Science, and am grateful to say that neither my wife, the children, nor I myself contracted it. Once when coming down a flight of steps from a public building, my little boy caught his foot on a step and pitched forward headlong. I at once realized the truth. He gently bumped from step to step until he reached the bottom, when he arose more startled than hurt. A lady who witnessed it exclaimed, "What a brave little boy not to cry." Neuralgia and chronic sore throat have been overcome by realizing the truth of the "scientific statement of being" as given on page 468 of our textbook.

I am grateful for membership in The Mother Church, also in a branch church. I find the various activities, including distribution work, a great help. I am also grateful for the Sunday school and for the periodicals which our beloved Leader worked so bravely to provide for us. I find I have no inclination, time, or need to read any other newspaper than The Christian Science Monitor, and our children are also greatly interested in the Children's Page. It is my earnest desire to be a faithful and loyal follower of the Wayshower, Christ Jesus, through the teachings of our Leader, Mary Baker Eddy.

Тномая Joseph Аввотт, Pretoria, South Africa.

We took up the study of Christian Science nearly five years ago and have depended wholly on the truth ever since for our every need. I have been healed of nervousness, and in our little family of four children many ills have been overcome, some of which were measles, colds, chicken pox, and whooping cough. The two younger children have never had medicine and the two older ones have not had any for nearly five years. They are well, and know how to meet their own little problems.

The Wednesday evening meetings as well as the Sunday services have meant much to me, and we could not get along without the daily study of our Bible Lessons from *The Christian Science Quarterly*. For the many, many blessings we have received we are indeed thankful to God and grateful to Christ Jesus the Way-shower, and to our dear Leader, Mary Baker Eddy.

(Mrs.) PEARL GOENS, Indianapolis, Indiana.

I wish to express my gratitude for the blessings and benefits I have received from the study of Christian Science and through the help of practitioners. I have been healed of many physical ills, including a severe case of throat trouble. I have also been helped in a business way. Christian Science has brought about a wonderful change for the better in my life, and I am certainly grateful for the spiritual awakening as well as for the physical healings I have received. I am indeed grateful to God for His goodness, and to Mrs. Eddy, for revealing the truth to the world.

LAWRENCE H. BESS, Glendale, California.

At the beginning of my study of Christian Science I remember reading in one of the Christian Science periodicals of the simple trust of a child in the omnipotence of God. The incident related contrasted the attitude of this child with that of an adult who did not know how to trust. I knew as I read, that that woman's difficulty was my own, that I also did not know how to trust. Material sense argued that one was either born with a trustful thought or one was not, and that if not there was no way out. But I knew there must be a way out and that the power which had brought me to see and acknowledge Christian Science as a healer of the body would show the way of escape from fear. Experience in the endeavor to put into practice what gradually unfolded of the idea of man's unity with God showed that to believe in a lack of trust was simply to believe in a suggestion which never at any time was part of one's self. Viewed in this way, lack of trust was as powerless to prevent demonstration of God's omnipotence either for one's self or others as any other supposition of error. This knowledge came by degrees, but looking back over a stretch of years it is clear that freedom has come in proportion as fear has been proved incapable of making one afraid.

One of the first conditions which Christian Science enabled me to face was that of home and authority. The need of healing was very great and it was only after some strenuous facing up to conditions—such as would have been simply out of the question but for Christian Science—that freedom was won and the fact that the truth blesses all was abundantly proved. Many a time since the period when I first began to look to Christian Science in every difficulty I have experienced the quick manifestation of God's presence in moments of extreme need. I have had help from a Christian Science practitioner time and again while going through what the human mind regards as dangerous and protracted physical conditions, and I have also had instantaneous and overwhelming proof of God's saving presence when no human aid

was near. Little by little, through experiences which have often been trying to the last degree to human sense, I have learned how to turn to Principle and watch for the appearing of the Mind that is in the Christ, instead of watching my own thought processes in the attempt to correct them. Christian Science alone could enable one to face this condition of self-mesmerism and come out of it triumphantly. No other experience brings so clear a proof that it is the divine Mind that heals, while it is the human mind with its personal and illusory sense which leads into captivity. With this healing came also freedom from irritability and the continuously unfolding experience of work done happily instead of laboriously.

(Miss) Helen M. Inman, London, England.

٠

With thankfulness to God from whom all good comes, and gratitude to Mary Baker Eddy for revealing Christian Science to this age, a religion whose teaching is practical and can be used in our everyday problems, I give this testimony of the many benefits received from this wonderful teaching. When I first became interested in Christian Science, and while reading the textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, for the first few times, I was cured of the tobacco, gambling, and swearing habits of many years' standing. An attack of influenza was overcome in a few days through the application of what I understood of Christian Science, and chronic nervous indigestion of several years' standing was cured with help from a practitioner.

While I am thankful to be rid of these bad habits and diseases, I consider the understanding of God and man's relation to Him a far greater blessing. Before becoming interested in Christian Science I never allowed my thought to dwell much on God or the subject of religion. Not that I did not believe there was a God, but I thought He was far removed from our daily affairs, and any knowledge I ever hoped to gain of Him would probably be in the hereafter. I am thankful to say that through the teaching of Christian Science my thought has been cleared to a great extent on the subject of religion and it has given me an understanding of God that I can apply to my everyday problems.

Not only am I grateful for what Christian Science has done and is doing for me, but I am grateful for what it is doing for the whole world. I am grateful for all the periodicals, including the *Monitor*, and that all who wish may avail themselves of these guides to the truth which does indeed make free.—J. C. CRAIN, Gerlach, Nevada.

*

It is with a heart full of joy, love, and gratitude for benefits received through Christian Science, that I testify to this living truth. It was brought to me in time of great need, when it was proved that "man's extremity is God's opportunity." I had been in bondage for years and had tried many material remedies with only temporary relief, and was growing worse. The doctor finally gave up the case, and it was at this point that Christian Science was asked for, treatment was indeed lovingly given, and resulted in my rising from my bed the next day a well woman and able to attend to my duties, which I have done ever since. This was almost six years ago. The study of Christian Science was begun in earnest; every moment that could be spared was given to reading "Science and Health with Key to the Scriptures" by Mrs. Eddy, then the reading of the Lesson-Sermons was begun, and through almost constant study and striving to know more of this blessed truth, for it was what I had been seeking and longing for, my heart was filled with gladness as it unfolded to my thought. It freed me from bodily ills, and I was, in some measure, able to help others as well, and I now know that the truth is ever operating in accordance with the law of God, which changeth not.

I have learned that we are not brought into Science to gain ease to material sense, nor to look for faultfinding or shortcomings, but so to manifest and reflect Truth and Love as to lose sight of every material seeming and to attain to the heaven bestowed harmony and liberty that belong to the children of God. I have been healed of stomach trouble and lifelong nervous headaches, which were supposedly inherited, the grip, neuralgia, and many other ills too numerous to name. I sometimes wonder if I can ever be grateful enough for what Christian Science has done for me and mine. I cannot express what it means to me and what I feel for our Leader, who stood with Principle for the redemption of all mankind. On page 242 of Science and Health she says, "In patient obedience to a patient God, let us labor to dissolve with the universal solvent of Love the adamant of error,self-will, self-justification, and self-love, - which wars against spirituality and is the law of sin and death."

(Mrs.) Christine M. Moenck, Omaha, Nebraska.

I wish to express my sincere gratitude for the many blessings that have come to me through the study and application of Christian Science. I was healed two years ago of a nervous breakdown after having exhausted all material means. This condition seemed difficult because of the many phases of fear manifested, but I earnestly and persistently studied "Science and Health with Key to the Scriptures" by Mary Baker Eddy, and in one month's time I was healed. One by one the fears left, until all was peace.

My little daughter was healed of whooping cough in a comparatively short time and had no ill after effects. This to me was an absolute proof of the healing power of Christian Science. I have also proved God's protection in the case of accidents, for which I am very grateful.

I am more grateful each day for Christian Science, for the loving practitioners, for all our helpful literature, and I have deepest regard for our beloved Leader, Mary Baker Eddy. I earnestly desire that I may gain more of this glorious truth, and that I may let my light so shine that I may glorify my Father in heaven.

(Mrs.) ADA M. ROGERS, Chicago, Illinois.

4

I first heard of Christian Science seven years ago, and though almost from the very beginning I knew in my heart that it was the truth, it seemed to be too much trouble to study a religion which I then thought would mean the sacrifice of many material things which were dear to me. However, after the birth of my first child, when I really learned for the first time how to love unselfishly, I felt the need of a knowledge of the protection of the loving Father-Mother God for the baby, and so turned to Christian Science.

The truth has been a great help and comfort to me in every problem which has arisen, especially with regard to the children. My little daughter has had wonderful healings of croup, influenza, dysentery, and of many other ailments; and it has been so comforting just to place the child in the loving care of the Christ, Truth, and to know that she would be healed. Later I was taken ill through my unloving attitude toward another. I was seized with great pain. My sister, who was in the house, at once helped me and telegraphed to the Christian Scientist who was treating me. I very shortly fell asleep, and awakened quite well the next morning. For all the love in my life and for the many bless-

ings vouchsafed to me I can never thank God enough, and my desire is to be a real student of Christian Science, and to help others as lovingly and patiently as I have been helped.

(Mrs.) Molly K. Young, Simla, Punjab, India.

4

"Science and Health with Key to the Scriptures" by Mary Baker Eddy first entered our home in the spring of 1905, it having been lent to us by a friend, who is a Christian Scientist. From this time until the following August I spent hours with this book, covering its text three times before purchasing my first copy. Previous to this reading, I knew what it meant to lie in bed for six weeks at a time with muscular and inflammatory rheumatism and to spend as many more in my room convalescing.

Soon after becoming interested in Christian Science, symptoms of rheumatism were again manifested. A practitioner was called on Saturday, and, although it was difficult for me to move about that night, on Sunday morning I attended a Christian Science service several miles from my home, to which I went in a drizzling rain. I had two absent treatments, and the result was healing. Our Leader, Mary Baker Eddy, says in Science and Health (p. 411), "The procuring cause and foundation of all sickness is fear, ignorance, or sin." I rejoice that fear of rheumatism has been destroyed in my thought and that I know I live and move and have my being in God.

Rheumatism in my feet had made it necessary for me to have my shoes made, one of which was two sizes wider than the other. Christian Science enabled me to wear mates. Three fingers were severely burned nearly the entire length, and I was told that my hand would be disfigured. The healing through Christian Science was perfect; not even a scar remains. Two large warts also have disappeared.

I am grateful to God for this healing truth and to Mary Baker Eddy, who revealed to us its ever operative Principle, the understanding of which, rightly applied, demonstrates harmony. In Science and Health we read on page 3: "Gratitude is much more than a verbal expression of thanks. Action expresses more gratitude than speech." Being identified with the cause of Christian Science, as a member of The Mother Church and of a branch church, the pleasure and privilege of serving in the Sunday school are mine, and in the degree that I respond to each call to go forward, I express my gratitude for Christian Science.

(Miss) ALMIRA F. CHACE, Warren, Rhode Island.

٥

It has been something over three years since this wonderful truth, Christian Science, came to my notice. I was a weary wanderer in a desert land, seeking something that would heal me and make life worth while. I had been in bondage for several years to an internal trouble, grasping at everything that I thought would help. I moved to another town, where my sister lived, and learned that she had had many healings through Christian Science. I told her that if there was any good in it, I wanted it, as I had not found what I wanted in a denominational church. She gave me a copy of the Scntincl, and I at once began to read it. Only those who have experienced the healing know how happy I was, for I was healed before I knew it. For all this I am very grateful, and that Christian Science is enabling me to do unto others as I would have them do unto me.

I am thankful to God, and grateful that Mrs. Eddy had such a wonderful understanding of the truth as to be able to impart it to others.

(Mrs.) O. L. Brantley, Brownwood, Texas.

Almost all my life I had been a semi-invalid, always having to give up the things I most wanted to do, on account of illness. From a child I was troubled with indigestion, and later with chronic bowel trouble. Doctors of various schools treated me, until I lost all faith in their curative powers, as well as in drugs. I then turned to osteopathy and experienced some relief, but nothing permanent. About three years ago I began losing weight very rapidly, although I had always been underweight, and became very emaciated. Unable to get any relief from osteopathy and having no faith in drugs, I tried dieting as a last resort. Less than a year ago I was taken to a hospital; at that time I weighed only eighty pounds, was afraid to eat anything, and had almost constant bowel trouble. I was told I had a floating kidney, a prolapsed stomach, and gallstones. I had no faith in anything, not even in religion, although I was a member of the Congregational church, which I had attended for years.

A friend of my sister persuaded her to try Christian Science for me, and sent me some literature. Knowing nothing of what Christian Science really is, I told them I was so weak in both body and mind that I did not think anything of that kind could help me, but they could try if they wished. I had tried so long, and failed, that all hope had gone and I was filled with fear of everything. After the first absent treatment I could see some improvement, greatly to my astonishment, and a little hope revived. After two more treatments I was brought home, where the improvement continued very rapidly. I was soon out of bed, eating anything I wished, and was fast gaining in weight and strength. Now after nine months I have gained fifty pounds in weight, and can eat anything I wish. I have no knowledge of stomach, kidney, or bowel trouble, and can work all day with almost no fatigue. But wonderful as the physical healing has been I feel that I am going through a mental and spiritual healing more wonderful still. I am so thankful for the literature. It seems as though every periodical has an answer to some problem I have been working on. I hope by my life to show my gratitude for the wonderful teachings of Christian Science.—(Mrs.) HATTIE H. THORNE, San Jose, California.

4

On page 254 of Science and Health our Leader says, "When we wait patiently on God and seek Truth righteously, He directs our path." This has been my experience since the day I inquired at a bookstore for a copy of Science and Health and was directed to a Christian Science reading room. This was in March, and the following November I had conclusive proof of the healing efficacy of the truth. Awakening one morning with a sore throat and the grip, but, thinking only of the seeming incongruity of a trained nurse telephoning for absent treatment, I resolved to defer the request until the household had retired for the night, in the meantime clinging steadfastly to the "scientific statement of being" (Science and Health, p. 468), the Lord's Prayer and its spiritual interpretation, and the twenty-third and ninetyfirst psalms. Early in the evening, after reading an article in a copy of the Sentinel I fell asleep, awakening a few moments later not only healed but with a sense of peace and joy I had never known before.

The same discord has since been manifested, but only to disappear into its native nothingness, as have resentment and other discordant conditions, as well as the desire for tea and coffee. Although studying Christian Science constantly I seemed to pass through a veritable "slough of despond" covering a period of many months. A visit to a practitioner, however, always enabled me to substitute "the garment of

praise for the spirit of heaviness." Many fears have been overcome, and I have learned how to rejoice. My desire is to be "not a forgetful hearer, but a doer of the work," likened by our Master to "a man which built an house, and digged deep, and laid the foundation on a rock: and when the flood arose, the stream beat vehemently upon that house. and could not shake it: for it was founded upon a rock." Christian Science teaches one how to "dig deep" and eradicate hate, malice, revenge, and every evil thought. "Casting down imaginations," as Paul says, "and every high thing that exalteth itself against the knowledge of God, and bringing into captivity every thought to the obedience of Christ." "Good thoughts," Mrs. Eddy reminds us on page 210 of "The First Church of Christ, Scientist, and Miscellany," "are an impervious armor; clad therewith you are completely shielded from the attacks of error of every sort. And not only yourselves are safe, but all whom your thoughts rest upon are thereby benefited."

Our periodicals have been of inestimable value to me. They are indeed joyfully anticipated and welcome guests. I humbly thank God for every activity of the Christian Science movement.

(Miss) BETTIE M. PARSONS, Seattle, Washington.

0

Christian Science has given me a reason for the hope I From childhood I loved to read the have always had. Bible accounts of the healings and miracles which Jesus and his disciples performed, and I had a firm conviction that if we only knew him better, we too would be able to prove that "with God all things are possible." When I was an infant my mother's prayers had saved me from becoming a cripple, and when the physicians despaired of my life her strong faith overcame the last enemy for me, to the doctor's amazement. This may account for the faith I had, which enabled me to put aside crutches later, when after an accident, followed by the most rigorous treatment at a sanatorium, I was obliged to use them for a time. The attending physician prophesied the gravest consequences for this action,—and my healing, which was not founded on understanding but was simply the result of faith coupled with will power, was not permanent; the things foretold and unconsciously feared seemed to come upon me. I put up a brave fight but at times suffered much and had dark visions of becoming an invalid. It was at this time that I became interested in Christian Science, not as a therapeutic agent, however; but having heard it discussed and criticized most severely by people not in favor of its teachings and very poorly defended by one who knew very little of it, I became desirous to know what it taught. While staying in the country, "Science and Health with Key to the Scriptures" by Mrs. Eddy was lent to me and from the first I realized that it was the truth I had always searched for. Fear of invalidism and the pain I had tried so hard to will away, vanished; what I read filled me with joy, and the thought of being able to be of service to my fellow man was a source of happiness and an incentive to strive for the letter and the spirit of Christian Science.

Extreme nervousness, insomnia, heart trouble, fainting spells, a tendency to take cold, throat trouble, supposedly inherited, and pneumonia, are some of the physical ailments of which I have been healed. One of my limbs, which was somewhat shorter than the other, was elongated, and whereas formerly a short walk fatigued me I have been able to participate in strenuous mountain trips and to walk miles, fully enjoying the exercise and the freedom of man's God-given dominion over such things as palpitation of the heart and fear of high altitude. I was also freed from intense self-

consciousness and the fear of meeting people, through the understanding that all are God's children.

But more than all the physical healings, for which of course I am grateful, knowing that they are but the outward sign of growing spiritual understanding, I value the fact that Christian Science has given me a purpose in life. It has answered the many questions about mortal existence that formerly tormented me, it has changed blind faith into understanding, and is teaching me to know myself and to replace the false beliefs of life in matter by the truth about the real Life of man, which is God; it has taught me my relationship to God and man, and has made the Bible a new book for me. The truth of Mrs. Eddy's words in her Message for 1901, "Rest assured you can never lack God's outstretched arm so long as you are in His service," has been proved many times for me. These words have sustained me in moments of great exertion and given me strength to stand firm in the understanding of God's presence when suggestions of sin and disease, fear and death, seemed overwhelming, especially during the war and the influenza epidemic. It is my earnest desire to be ever found in His service.

The periodicals which our Leader has given to the world have ever been angel visitors, bearing their message of encouragement and healing to a sin tired world, and I have had many occasions to be thankful for their blessing to myself, and to witness the healing they brought to others. When I first learned of Christian Science I had a great desire to express my gratitude to Mrs. Eddy for the good she has given to the world. Since then I have realized that I can prove how truly grateful I am by living in accordance with her teachings, ever mindful of the fact that my progress is in exact measure to my faithfulness. My gratitude to Mrs. Eddy is due to her consecration and devotion to her noble purpose of revealing the law which enables us to demonstrate the ever presence of divine Principle, the Father-Mother God, who is the source of all good and to whom all praise belongs .- (Miss) Louise FANNY BODMER, Boston, Massachusetts.

4

I wish to express my gratitude for what Christian Science has done for me. I came to Christian Science many years ago for the healing of a closed tear duct, when threatened with total blindness of one eye, the ball of the eye being seriously affected. I was under the treatment of a specialist for a year or so and had had many operations. At one time I felt that the condition had been improved, though not entirely cured; and the specialist told me he had done all that could be done, so I tried to be content to go through life taking special care of my eyes and being a slave to glasses.

I finally suffered a relapse; the trouble seemed more aggravated than before and in desperation I came to Christian Science, the result being a complete cure. The healing was slow but I think it was accomplished long before I would acknowledge it. Fear seemed to hold me; but when I did awaken to the fact that I did not have to bow down to that mortal mind law, and that God's law is the only law and ever operative, I was absolutely free and have been ever since. This experience is only one of many, and while I am grateful for the physical healing I am still more grateful for the spiritual awakening; for the unfoldment of the truth which is being manifested to me every day.

I wish also to express my deep appreciation of the message of good which the Christian Science literature is bringing to me regularly. My desire is that I may become a better transparency for the truth as revealed to us by our dear Leader, Mrs. Eddy.

(Mrs.) CARRIE T. SLEEPER, Los Angeles, California.

[613]

Signs of the Times

["Primitive and Civilized"—The Christian Science Monitor, Boston, U.S.A., February 8, 1921]

The frequency with which we hear, since the war, of the "failure of civilization" is evidence of the passing of a god which the human mind has been worshiping more and more complacently for many centuries. Civilization has no succinct definition even in dictionaries, but it is generally understood to be the process by which primitive man, so called, is cultivated and refined, or at least subdued and chastened. Up to very recent years primitive has been a derogatory term when applied to peoples, nations, or conditions, while to be civilized has been considered highly desirable. For many years novelists describing the virtues of their heroes and heroines have spoken of them as elegant, refined, cultured, and these novelists have only reflected the thought of the civilized countries in which they lived.

Then comes a tremendous event which reveals even to the most unthinking that primitive man, so called, has not been educated away, but is apparently with us in all his starkness. And this discovery has led to deep and universal interrogation of that which we have called civilization. It is recalled that even before the war there was some question about it. So-called civilization brought drink, and drugs, and disease to primitive peoples. In one of those widespread reactions which are of its essence, mortal mind begins to wonder whether, after all, simple peoples are not more virtuous and admirable than their more sophisticated neighbors. It begins to bow down to the primitive. Those sensitive recorders of the popular thought, the novelists and reviewers, begin freely to use such adjectives as elemental, primal, and primordial. The machinery for worshiping a new god is being set up in the world.

But Christ Jesus, whose words have not passed away, declared: "God sent not his Son into the world to condemn the world; but that the world through him might be saved." The student of Christian Science does not bow down to, nor react from, nor condemn any human concept, but seeks through his apprehension of the true idea of all things to destroy the false beliefs about them. He does not balance the human sense of civilization against the human sense of primitiveness nor seek to escape from the one in the other, but endeavors to see and experience the truth about them both and thus to "save the world" from all it can be saved from, false concepts.

Primitive is defined as that which pertains to the beginning or origin. So long, therefore, as the premise that man originates in matter is accepted, it is correct enough to term any emotion, condition, or activity which is not far removed from the animal, primitive, and it is not surprising that we should frequently read statements such as "the primitive in man is a beast which it is hard to chain." But the premise that man begins in matter either wholly or in part, which is being challenged by natural scientists to-day, is, as revealed by Christian Science, a false hypothesis. It is a misstatement of the truth set forth in the first chapters of Genesis and the gospel according to John: "In the beginning God created the heaven and the earth," and "In the beginning was the Word, and the Word was with God, and the Word was God. The same was in the beginning with God. All things were made by him; and without him was not any thing made that was made." Then if the word primitive is used correctly it can be used only in referring to God, Spirit, and His eternal and original idea, man. Mrs. Eddy uses the word in this way on page 102 of "Miscellaneous Writings," where she says: "God is like Himself and like nothing else. He is universal and primitive. His character admits of no degrees of comparison." He is "like nothing else." He is not, then, like finity, ignorance, materiality, and since he is primitive, these supposed conditions are not. "God is like Himself," like good, like infinite intelligence, like perfection. These qualities reflected constitute primitive man and nothing else does.

It is not necessary to "chain the beast" in this man; "relative advancement"-which is one of the dictionary definitions of civilization—is not necessary to him, since, like his Maker's, his being admits of no degrees of comparison. His are always the intelligence, the refinement, the breadth and richness which constitute true civilization. Civilization is not, then, a gradual removal from or control of the primitive, but is in reality inseparable from it. Man in reality is primitive now and has always been civilized. On page 10 of the Message to The Mother Church for 1902 Mrs. Eddy says, "Rev. Hugh Black writes truly: 'The birthplace of civilization is not Athens, but Calvary," because it was at Calvary that the complete and eternal truth about man was first and finally demonstrated. It was there that man's everlasting freedom from ignorance with all its sequela, to death itself, was triumphantly proved. That process which, figuratively speaking, may be said to have had its birth at Athens, or in Greek philosophy, of consciously attempting to refine the belief of a mind other than God while leaving the belief itself intact is what has so recently and cruelly failed. True civilization has not failed. In proportion as the momentous event at Calvary and the orderly steps which led to it are understood to-day, the belief of a mind apart from God is being actually destroyed and true civilization is becoming more and more manifest. There is no need, then, to be troubled by gloomy forebodings as to the ultimate of civilization. We sometimes hear it predicted that humanity is doomed to lapse into the elements from which it is supposed to have sprung, but does not this hint a great and joyous truth: that the world is inevitably returning more and more to the true primitive, is realizing more of what Mrs. Eddy meant when she wrote of man on page 63 of the Christian Science textbook, "Science and Health with Key to the Scriptures," "Spirit is his primitive and ultimate source of being; God is his Father, and Life is the law of his being."

[From "A Philosophy of Social Progress," by E. J. Urwick]

I have tried to show that social science, or the science of social phenomena, cannot be regarded as a science in the same sense as the sciences of natural phenomena; and that prevision of social change is therefore impossible. And part of the argument used in support of this position involves a denial of the paramount importance of intellect as the directing faculty in human affairs. . . . [The] spiritual element I regard as the reality of the individual, and the clue-if only we could read it-to each individual's character. . . . The wise social philosopher knows that the spiritual forces which lie behind the reforming impulses and determinations and which are of the essence of the will to reach out and attain an ideal are far mightier than any of the natural forces with which science has to deal-very much as the really religious man knows that faith can remove mountains, though the engineer doesn't believe, or at any rate does not take that fact into account.

It is a good thing, no doubt, to be better off and happier, just as it is a good thing to be healthier, but only as a means to something beyond happiness and health. But both the socialist and the eugenist will by this time have become scorn-

fully impatient. Is not the realization of their aims the essential condition of the attainment of any other ends? Filth, poverty, misery, and disease—are these the friends of virtue, or are they the sure breeders of vice? Till they are put away, what progress can come? I hope I am not so foolish as to dispute the verdict of common sense in these things. We will and must work to make any one healthiernot in order that he may be a more efficient person or a more fully satisfied self but in order that he may be better equipped to be a victor in the fight against the world, the flesh, and the devil. . . . Both the methods and the results of reform differ enormously according as we think of an evil as merely a preventable barrier to increased satisfaction, or as a barrier to the attainment of a good life; and the distinction underlying the difference is that between the conception of ourselves as beings capable of enjoyment and the conception of ourselves as instruments capable of perfection. . . .

We think that by our hygienic and therapeutic ingenuities, we are going to make society healthy; by our economic ingenuities, to make it better off; by our political ingenuities, to make it contented. If these desirable results occur, it will not be from these causes, nor from any ingenuities whatever. Most probably they will not occur. We may escape from cholera and typhus only to find our health threatened by greater nervous instability; we may increase wealth tenfold, only to find a growing consciousness of want permeating our whole community; we may establish good government and good management, only to find unsuspected forms of social unrest producing new and harder problems of social adjust-For that is the way with our ingenuities; they are never quite ingenious enough to solve any of the problems of life. But in the face of good will and honest effort guided by true purpose, the problems one by one disappear; or, if they remain, perhaps remain rather as safeguards than as hindrances. And this is the philosopher's final lesson: to learn that what is of importance is not the reform but the will that prompts it; not the improvement of social machinery but the resolve that machinery shall be improved until all are helped by it; not the results achieved by our devices, but the effort to achieve something good for the use of our fellow citizens. If the reformer dislikes this doctrine, let him remember that it is after all but a corollary from the assumption which we took as our foundation, namely, that the supreme purpose of human life, whether individual or social, is a spiritual purpose, even as the sole interpretation of its significance is a religious interpretation. For this means that all actions derive their value from the part they play in the working out of the spiritual process, not for their immediate or apparent effects upon the social process.

[Turning Swords into Plowshares—From the French Information Service of the Bankers' Trust Company of New York]

Two thousand workmen's homes, an agricultural exposition building, and a city university are among the structures to be erected on the sites of the old fortifications of Paris. Rapid progress is being made in the work of razing the forts. Workmen's cooperative societies are demolishing Forts 61, 62, and 63, whose sites will soon be put at the disposal of the Minister of Agriculture. On one of these sites the palace for agricultural expositions will be located. Two bastions of Clignancourt already have been leveled and construction of modern homes for workmen is to be begun at this place within a year. Parks, squares, landing places for aeroplanes, and open grounds having three times the present area of parks within the city will be provided through the removal of the forts. The Municipal Council has approved the project for

a Cité Universitaire adjoining one of the outlying parks. The protecting moats of the old fortresses will be used as reservoirs and the space between the fortification walls and the present military zone beyond them is to be occupied by a boulevard which will circle Paris entirely.

٠

["Fear"-From The Duluth (Minneapolis) Herald]

There is sound testimony for the assertion that in time of plague fear kills as many as the plague itself. Wars are often if not usually the product of some nation's fear that some other nation will get ahead of it if it does not cripple it by a war. Poverty frequently is the result of fear that prevents the timid from undertaking, at a risk, an enterprise that might free them from poverty. . . .

Life's greatest victory is the conquest of fear. All the great pathfinders, all the great leaders, all the great doers of history, were men and women who refused to be shackled by fear. They led on, while those who let themselves become helpless victims of fear cowered timidly in the rear.

It is worth thinking about that the most ignorant are the most fearful. The ignorant are afraid of a thousand things that are harmless commonplaces to the enlightened. To the savage an eclipse of the sun is a fearsome thing, presaging the destruction of the world; while to a civilized person it is only an interesting phenomenon. We should have confidence enough in the tenderness and mercy of the creator of all things to believe that if there could be such a thing as a man who knew all things, he would not know fear. Most fearsome things dissolve into harmless nothingness when they are boldly faced. Fearful anticipations of evil cause more suffering than any real experienced evil can cause. . . .

To make the most of life, conquer fear. And those who find their strength not great enough to conquer fear—as most do find—may discover a ready and exhaustless fountain of courage and strength in that love of which John the apostle wrote his inspired words: "Herein is our love made perfect, that we may have boldness in the day of judgment: because as he is, so are we in this world. There is no fear in love; but perfect love casteth out fear: because fear hath torment. He that feareth is not made perfect in love."

4

[From "The Significance of Jesus' Hope." by Charles Henry Dickinson in The Journal of Religion]

Jesus' gospel of the kingdom offers not only inspiration to an attainable goal, but guidance no less. . . . His dominant beatitudes are to the hungry, who shall be filled; for them that mourn, who shall be comforted. The earth is the inheritance of the meek, even the lowly and oppressed. These announcements are not figurative. Does one offer rescue in a figurative sense to drowning men, or figuratively promise bread to starving children? Nor is he pointing to heaven, as we have indolently and supinely misunderstood him. He is speaking of the establishment of the Father's kingdom upon the earth. Those who groan under the intolerable yoke of tyranny, inequality, inhumanity, and are hungering and thirsting for God's righteousness on the earth, shall have their longing satisfied. . . . God's workmen have no time off. Sleep and food, recuperations, and replenishments of exhausted powers, play, . . . books and art, joy and love, prayer, meditation, and the cultivation of the spiritual life, all are for the world's work that we have to do, and implicit in it; and the sternest demand of the work, which is the life, is that it shall somehow and every way direct itself and concentrate itself upon Jesus' great purpose of ministry to the last and least. When this is done, the care and fret and exhausting self-regarding ambition, with slavish dependence upon the world's estimates of success, fall away, leaving it all a delight in the spirit and purpose which now occupy even its least details.

Perfection, it is urged, is unattainable and undesirable. It would turn to evil if attained. A perfected earth, with all its problems solved, all its ambitions accomplished, with nothing to do except the same old things, nothing left to strive for, to amend, would be a Lubber-land, a garden of Eden, a blank, an extinction. But it is a deeper thought that perfection is not static, but dynamic, an energy of holy love that fulfills itself and accomplishes evolving tasks always and from more to more. No lower, idler perfection than this is in Jesus' thought, nor is anything unworthy of this in his hope. Hope does not contradict the energies that form it. . . . And when we feel ourselves transcendent of these limitations, for God hath set not the world only, but eternity, in our heart, we may see our earth task flashing its signals beyond the orbit of Mars. They are responsive signals. God's work of redemption is everywhere in His encircling skies, accomplished by those who in every lot attainable by them work together for His kingdom in the works appointed them.

[From "Thought," by Charles D. Bornwasser in The New Age]

The gift of gifts which the Father of lights gave to man was thought—. . . It is easy to picture the cave man of prehistoric days wandering about, perplexed no doubt at what must have seemed truly supernatural happenings, but which to us of to-day are thoroughly accounted for because of the trend of thought which urged men on to think and reason out the whys and wherefores of day and night, of calm and storm, of cold and heat, and then, when thought had mastered these mysteries, how comparatively easy it was to harness the phenomena to the wants of man. From such time as history has record, let us recall briefly as we jump through the centuries, how thought has accomplished all. . . .

With thought such a potent factor, then, is it any wonder that cunning and contriving despots and priests, both modern and ancient, have vainly sought to stem the tide of thinking men. . . . It would seem, however, that at least our children will see the end of this struggle, and man, free to think as God would have him do, will think.

[Raymond G. Fuller, in The Survey]

The progress of child labor reform is much concerned with the substitutes for child labor, particularly suitable schooling, suitable play, and suitable work. The establishment of these substitutes is both a method and a goal of child labor reform. Not an unoccupied but a well occupied child-hood is the aim. Society, as one of its contributions to its own difficulties, has failed to make a serious constructive attack on the problem of children's work, as distinguished from child labor. That is, it has not sufficiently interested itself in discovering what work children ought to have and in seeing that it is provided as part of their education. In consequence, we have had too much child labor and too little children's work. Child labor will not be over until children's work has taken its place.

[From an Introduction to a Christian Science Lecture in Phoenix, Arizona]

From the beginning of time mankind has sought the way to happiness in material things. He has looked for it in the movements of the stars, searched for it in far-off lands, tried to distil it from strange herbs, and endeavored to procure it by accumulating great possessions. But in the words of the Preacher, the result has always been "vanity and vexation of

spirit." The reason for this is that, man being in truth the image of God, of Spirit, spiritual things alone can bring him satisfaction; the Son being the likeness of the Father, only that which is of the Father can possibly be natural or good to the Son. At this day there is a growing perception of this truth and a yearning for that apprehension of God and man which is eternal life.

Just as a study of the science of numbers brings to us an understanding of the fundamentals of mathematics, so the study of that Science of Christianity which Jesus taught and practiced and which Mary Baker Eddy has rediscovered and made plain to this age leads us into a knowledge of the Principle of all reality and good, which we name God.

[From Intercollegiate News Service. Intercollegiate Prohibition Association, Chicago, Illinois]

"The closing of saloons is sending many young people to college." Thus declared William Jennings Bryan in a recent interview with a reporter for the Ohio State University Lantern. "Five years ago we spent three times as much money on intoxicating liquors as we did on education. A part of that money at least has been diverted to educational channels. Five years ago less than ten per cent of all the pupils in the common grades entered high school, and not over two per cent ever went to college. If only four per cent now go to college, we can see why the university halls are filled to overflowing."

[From a Letter in The Globe, Toronto, Ontario]

The Globe of January 1 contained an article by Tertius, in which he commends Dr. Cody for his sermons against Christian Science, and condemns Christian Science "as not only non-Christian but anti-Christian." And why? Because Christian Science does not teach the doctrine of atonement, according to Tertius. The Popular and Critical Bible Encyclopedia has this to say on the subject of atonement: "Three prominent views have been entertained of the atonement: (1) View of Anselm; (2) view of Abelard; (3) view of Grotius. . . . Between these three views the church of to-day is divided." If we knew which, if any, of these views Tertius accepts, we might conjecture which one, in his estimation, Christian Science denies.

The Discoverer and Founder of Christian Science parted from the theologians when she perceived God to be divine Principle and Love, and thereby swept away at one stroke the necessity of explaining a God of wrath who was propitiated by the sacrifice of a sinless one for the sins of the "Atonement," Mrs. Eddy writes in Science and Health (p. 18), "is the exemplification of man's unity with God, whereby man reflects divine Truth, Life, and Love." On the next page she says, "It was therefore Christ's purpose to reconcile man to God, not God to man." And again: "Jesus aided in reconciling man to God by giving man a truer sense of Love, the divine Principle of Jesus' teachings, and this truer sense of Love redeems man from the law of matter, sin, and death by the law of Spirit,-the law of divine Love." This understanding of the atonement shows the mediatorial Savior to be the truth which Jesus brought to mankind, and so he became the Mediator or Messenger reconciling man to God. If Tertius can and will set forth the Biblical doctrine of atonement by quotations from the Bible alone (and this should be possible), without any elaborations of that doctrine which may have been added from the time of Anselm to Tertius, we can safely promise that Christian Scientists would generally and gladly subscribe to such a statement.

[From an Editorial in The Baltimore (Maryland) News]

The latest achievement of the theory of relativity is the discovery that our universe, after all, may have finite bounds. The New York Times publishes an interview with Einstein elucidating this theory, which, according to Professor Eisenhart, of Princeton, who comments upon it, is now given to the public for the first time, although scientists have already known of it as one consequence of the general Einstein hypothesis. Science, then, is offering a new answer to the agelong question of what lies beyond the stars. The idea of an infinite space stretching out endlessly in all directions was not an easy one to evolve. Human experience has never known infinity. . . .

Space is something in which physical and mathematical laws hold good. But man has for ages known of other laws than the merely material and mathematical. Is it any more reasonable to suppose that space goes on forever (an idea quite unsupported by any material observation) than to suppose it to come to a definite spatial end, beyond which are to be found realms whose nature, like that of the spiritual realm, is totally foreign to all material experience? . . .

At the dawn of modern science, two centuries ago, men welcomed or feared it as the destroyer of the spiritual world that the ages had worked out. Science was to unlock all secrets by the key of reality, it was to laugh the spiritual out of court, to disprove God. Men light-heartedly became atheists on the strength of it. And now, where has it brought us! Following the most rigidly practical investigations, concerning themselves with the most material of things, the scientists have brought us to conceptions as impalpable, as baffling . . . as those of the mediæval mystics!

[Rabbi Kopald, as Quoted in The World, of New York City]

The war evidenced the fact that religion had succeeded in creating everything but God. All the peoples of the earth have sought to find God, but the way of each and every one has failed. The way of the Jew has failed. The way of the Christian has failed. The way of the Catholic has failed. The way of the Protestant has failed. They have failed, and failed ignobly; and the moral maelstrom, the spiritual chaos, the social reactionism of the moment are the children of their creation, because religion has proved itself to have created everything but the reality of God in life. Religion will fail again unless God becomes to us more than a name, an idea, a fetish, a prayer, a cathedral, a church, or synagogue. We need God in a new way.

[From The Christian Science Monitor]

King Albert of Belgium offered a cup for the trans-Atlantic race to decide the sailing championship of the seas chiefly because he wished to make a valuable contribution toward international amity. He realizes the extent to which such an international sporting event can spread understanding and good will among nations. He has witnessed the effective manner in which the America's Cup races have promoted friendship between Great Britain and the United States. And by providing an impetus for an international race with scarcely no restrictions he signifies his hope that the most valuable result of such a contest will be an increased amity among all the nations which take part. This view of the announcement of the King's offer was stated to a representative of The Christian Science Monitor yesterday by the Belgian Consul here, at whose office entries for the race will be received.

Asked whether the King's chief purpose was not to promote international amity, the Consul replied: "You are quite right. The King wishes to do what he can to further inter-

national friendship. His visit in your country convinced him that the more different peoples see and know of each other the longer they will refrain from fighting each other. When mutual understanding is promoted, through sporting events as well as through other channels, for a century, then the possibility of war between such friendly nations is unthinkable. Your paper surely understands that. We see the necessity of heightening reciprocal interest among the nations as a world community, and the trans-Atlantic race will surely contribute vitally to this end."

[From Our Dumb Animals]

Through our field representative we learn that resolutions to the effect that "the presiding bishop and conference give place in their thought and effort to our humane responsibility and stewardship," have been adopted by the African Methodist Episcopal, the Colored Methodist Episcopal, and the Methodist Episcopal churches, at their annual conferences, held recently in the state of Texas. These resolutions were all unanimously adopted, and elicited favorable comment by the presiding bishop and others in attendance.

Church Notices

Boston, Mass.—The First Church of Christ, Scientist. Sunday services, 10:45 a.m. and 7:30 p.m.; Sunday school, 10.45 a.m.; Wednesday evening meeting, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading rooms: Little Building, corner of Tremont and Boylston Streets (fourth floor); open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. National Union Bank Building (seventh floor), 209 Washington Street, opposite old State House; open daily, except Sunday, from 9 a.m. to 5.30 p.m. Massachusetts Trust Company Building, 236 Huntington Avenue; open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 7 p.m.

From the Clerk of The Mother Church

Church Teners.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank

draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Admission to Membership in The Mother Church

The next admission of candidates will take place on June 3, 1921, as provided in Article XIII, Section 2, of the By-laws of The Mother Church. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Friday, May 20, 1921. Consideration of any applications received after that date will be deferred until the November 4, 1921, admission.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to November 5, 1920, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

CHARLES E. JARVIS, Clerk,

236 Huntington Avenue, Back Bay, Boston 17, Mass.

Announcements

From The Christian Science Publishing Society

Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in *The Christian Science Monitor*, were run off at the time of their publication in the *Monitor*.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 81/4" x 103/4". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and sub-

scriptions for *The Christian Science Monitor*, *Journal*, *Scntincl*, *Quarterly*, and *Heralds*, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and immediate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlet in Russian

There is now on sale a new Russian translation of "Christian Science: Its Advantage to Mankind" by Edward A. Kimball, with alternate pages in English. Price 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S. A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U.S.A.

Letters of Appreciation

Many letters of appreciation of The Christian Science Monitor and other Christian Science activities are constantly being received. These letters express what these activities mean to different individuals in various occupations and pursuits. The favorable comment that has been received on those already published indicates that they are welcome and helpful; therefore others will be published under the above heading. Extracts from such letters follow:

I CONSIDER it no exaggeration to say that THE CHRISTIAN SCIENCE MONITOR is the most wonderful newspaper ever printed, covering as it does every conceivable clean subject the world over. Its editorials are scholarly in the highest degree and the Wednesday literary page is a constant delight. Bound volumes of this paper constitute an invaluable library, containing as they do reproductions of the best in English literature from the beginning, and will be read with as much profit a hundred years hence as now. To my mind the paper is of greater educational value than the textbooks of the schools, and we regard it as a privilege to preserve it, well bound, in our library.—From a librarian.

FROM the standpoint of accuracy of information and of grammatical construction the Monitor as a newspaper cannot be equaled. It is a paper that meets every need and is welcomed by all classes of people. I have sent the copies with the book reviews in them to a fine English scholar, the art pages have been gratefully received by an artist friend, and the copies containing the Children's Page have been eagerly looked for by my little friends.—From a teacher.

AM so glad the way has opened so that I am able to subscribe for our paper again. My appreciation for The Christian Science Monitor is growing more and more. As I sat reading it this evening I felt that I never wanted to be without it again. I was much helped and uplifted through the reading of it. I feel that we can never be too grateful to our dear Leader for these beautiful gifts to our church.—From a general reader.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder

of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large Type (18-point) on Warren's heavy India Bible paper, bound in leather. Size 8 by 103/4 inches. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in The Christian Science Journal from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in bit of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in The Christian Science Journal and Sentinel, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. taining Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six

or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1:50; six or more, each \$1.15.

Christian Science versus Pantheism. Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more,

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more,

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

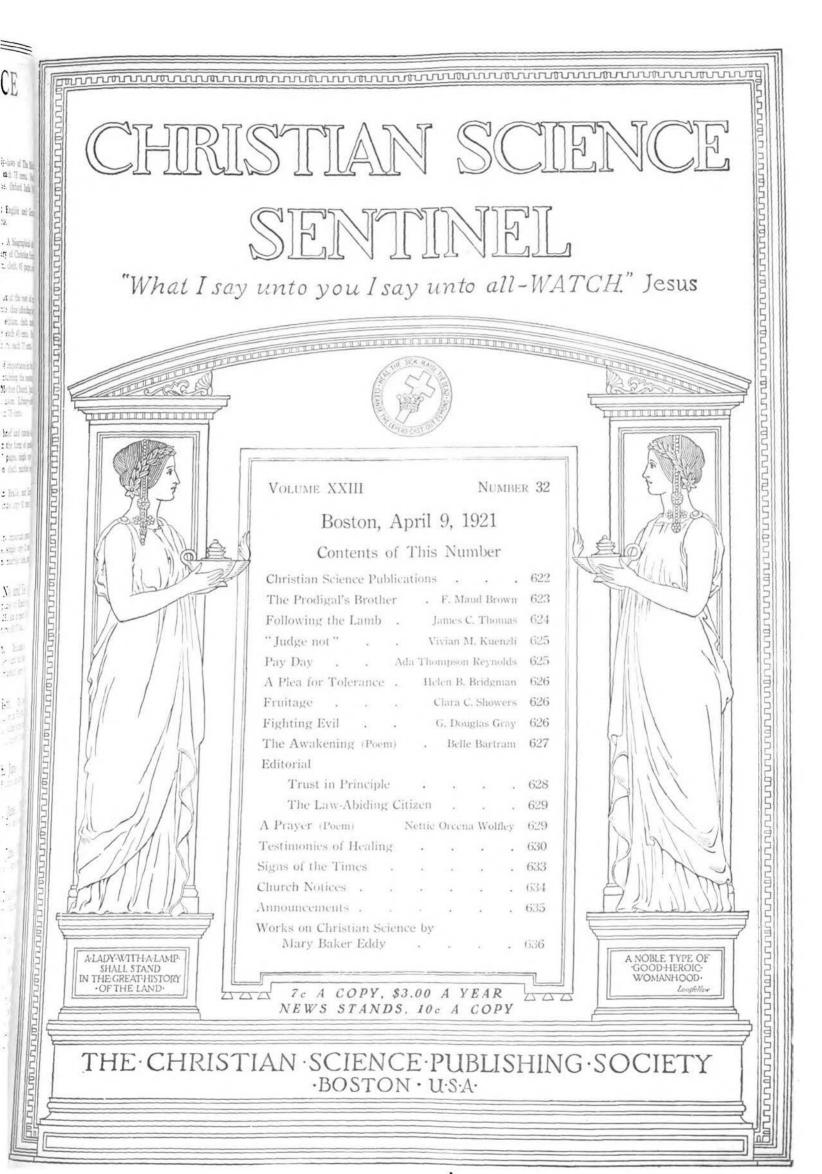

This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, BOSTON 17, U.S.A.

Sole Publishers of All Authorized Christian Science Literature

Christian Science Literature

"Science and Health with Key to the Scriptures" and all other published writings of Mary Baker Eddy are listed on the outside back cover page of this Sential.

Christian Science Sentinel

Established, 1898, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. Subscription price, payable in advance, postpaid, to all countries: One year, \$3.00; six months, \$1.50; three months, 75 cents; single copy, 7 cents.

The Christian Science Journal

Founded, 1883, by Mary Baker Eddy. This monthly magazine is an official organ of The First Church of Christ, Scientist, in Boston, Massachusetts. Contains articles, editorials, and testimonies of healing, a directory of Christian Science Churches, Societies, and Reading Rooms; also in the January, April, July, and October issues a list of Christian Science Practitioners and Nurses. Subscription price, payable in advance, postpaid to all countries: One year, \$3.00; six months, \$1.50; three months, 75 cents; single copy, 30 cents.

NUMBER 32

The Prodigal's Brother

F. MAUD BROWN

WHEN the multitudes gathered around Jesus and he taught them, it is probable that none listened so attentively to all that he said as did the Pharisees. In spite of this attentiveness, however, none failed so completely to grasp his meaning. This was because they did not come to Their whole energies were bent learn, but to condemn. toward discovering some word or deed which might prove him guilty of breaking the law, and so rid them of the man they considered a dangerous enemy. Thus, without knowing it, they were expressing mortal mind's inevitable antagonism to the truth which destroys it. Jesus' direct and unflinching method of dealing with this antagonism is well illustrated in the fourteenth and fifteenth chapters of Luke's gospel. We read that, although he had gone to the house of one of the chief Pharisees as a guest, even there they watched him with the same evil purpose in their hearts. They did not have long to wait for something unusual to occur. Jesus, seeing in front of him a man with the dropsy, healed him, and then refuted the Pharisees' unspoken censure because he had healed on the Sabbath, by asking which of them would not save his ox or his ass if it fell into a pit on the Sabbath day. Jesus not only healed the sick right in his enemies' midst and fearlessly defended his actions, but, when he noticed how the guests on their arrival at the house sought out the chief rooms, he rebuked them by means of a parable, and pointed its moral with the words, "For whosoever exalteth himself shall be abased; and he that humbleth himself shall be exalted."

After this feast great multitudes followed Jesus, and the ever watchful Pharisees, mingling with the crowds, remarked that publicans and sinners thronged around him. This they thought gave them an opportunity to condemn him, and they murmured, doubtless to any one ready to listen, that here was a man who received sinners and ate with them. Jesus allowed this criticism no opportunity to spread its poison among the people; he answered it immediately. In the beautiful parables of the lost sheep, the lost piece of silver, and the prodigal son, he exposed the selfrighteous sense of the Pharisees and revealed God's unfailing care for all. The father in the parable of the prodigal had two sons. One of them, claiming his share of the inheritance, set off for a far country and spent his substance there in riotous living, while the other stayed quietly at home. It is not very difficult to see why the prodigal's name has been given to the parable, as though he symbolized the whole of its teaching; for the loving welcome which awaited this son when, penitent and humbled, he returned home seeking forgiveness is so appreciated by every one who hears or reads the story that it seems to overshadow somewhat the lesson which the story of the other son teaches.

When the prodigal's brother came in from the fields and learned that the sounds of dancing and feasting which he heard were in celebration of his brother's home-coming he was angry and would not go into the house. The same loving father who had gone to meet the prodigal, when he saw him coming from afar, now came out to entreat this son to enter; for he made no distinction between his children. This son, however, could not enter. Self-will and self-love made it impossible, and, a sense of his own wrongs surging up within him, he said to his father, "Lo, these many years do I serve thee, neither transgressed I at any time thy commandment: and yet thou never gavest me a kid, that I might make merry with my friends: but as soon as this thy son was come, which hath devoured thy living with harlots, thou hast killed for him the fatted calf."

No words could have revealed more clearly how little he knew of true service. Exceedingly well pleased with himself because he had stayed at home and worked in the fields, he had yet to learn that his father's real business lay in bringing consolation to those in trouble and in replacing their sorrow with joy. If he had been sharing this work with his father, then he must have rejoiced with him at his brother's home-coming. The boast that he had never broken his father's commandments only proved that he did not know enough of their true meaning to make him conscious of his oft-repeated failures; while the complaint, "Thou never gavest me a kid," was the cry of jealousy and covetousness. Lacking enough generosity and enterprise to make merry with his own friends, he yet begrudged his brother his new-found happiness, and, worst of all, would have burdened him with the stigma of past sins. His father answered this outburst with the perfect rebuke of love. Already one son had turned from his folly, and would not the other awake also and, realizing his true sonship, forget himself in the service of others? So he simply said to him, "Son, thou art ever with me, and all that I have is thine. It was meet that we should make merry, and be glad: for this thy brother was dead, and is alive again; and was lost, and is found."

The brother who had stayed in his father's house and according to his light worked faithfully, had failed as well as the prodigal. Why was this? It must have been because his motives were wrong. Filled with pride in his own dutiful obedience and comparing himself favorably with his renegade brother, he went his way, oblivious of the true nature of the work to be done in his father's house. He had not yet begun that task of self-denial which all must undertake and of which Mrs. Eddy writes in "Science and Health with Key to the Scriptures," on page 242: "Self-love is more opaque than a solid body. In patient obedience to a patient God, let us labor to dissolve with the universal solvent of Love the adamant of error,—self-will, self-justification, and self-love,—which wars against spirituality and is the law of sin and death."

There is something of the prodigal's brother which has to be rooted out of each one of us. It is not enough to feel sure that we are doing the right work or taking the right stand; we must ask ourselves continually from what motives we are acting. No matter how much progress we may appar-

Copyright, 1921, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as second-class matter. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of October 3, 1917, authorized on July 11, 1918.

ently make, no matter how much praise friends may bestow on us, if our motives are not right we accomplish nothing at all. We are building on the sand, and the next tide will sweep all our labors away and leave no trace of them. It demands and will continue to demand constant watchfulness that our motives may become pure, free from self, from materiality, and sin. Pride and vainglory wait ready to take possession of our thoughts if we give them entrance, and we only bar them out by remembering that glory belongs to God alone. Knowing this, Paul asked the Corinthians, in his first epistle to them, "For who maketh thee to differ from another? and what hast thou that thou didst not receive? now if thou didst receive it, why dost thou glory, as if thou hadst not received it?"

The Pharisees might well have asked themselves these same questions. The carping self-sufficiency which made them so critical of Christ Jesus that they missed his message of love was the exact opposite of the compassion which the father in the parable bestowed on both his sons. We cannot guard too carefully against this fatal fault of self-complacency and superiority, for we are all of us sons of one Father, making the same journey, all of us learning and ofttimes failing. When we are tempted to criticize or to condemn one another, let us remember that Mrs. Eddy wrote of those that love God (Miscellaneous Writings, p. 10): "Their God will not let them be lost; and if they fall they shall rise again, stronger than before the stumble. The good cannot lose their God, their help in times of trouble. If they mistake the divine command, they will recover it, countermand their order, retrace their steps, and reinstate His orders, more assured to press on safely."

Following the Lamb

JAMES C. THOMAS

ALL men must eventually follow the Lamb, whether this year or next year, this century or next century, and that they must do so sooner or later is inescapable. The Lamb is a term used in the Scriptures and accepted and further explained in Christian Science as the spiritual idea of Truth. Truth is the Almighty which knows not error, "neither shadow of turning." The idea or representation of such All-power must be and is the exact reflection of its cause and so is also without shadow of turning. In other words, this idea is one thing alone, whole or infinite good. Its wholeness and its simplicity make it entirely intelligible to men, so that they may follow good or the right without turning aside in any way to half good, half right, or indeed, to anything less than what expresses Principle. Since Truth is another name for good, and the spiritual idea is what expresses Him, and is what He has created, this idea is the Son of God, or Christ, the blessed activity of Spirit always present.

Following the Lamb, therefore, is the willingness to leave material pursuits in all their countless forms of false ecclesiasticism, lust for bodily satisfaction, greed for commercial success based on questionable practices, and any desire whatever to temporize with evil and to pursue it just a little longer. It is the willingness to abandon wrong things, and the acceptance of the battle that ensues when a man strives to turn his willingness to do good into good deeds actually done. Following the Lamb, or obeying the more and more clear-cut demands of Principle in this age is not an easy thing for the materially minded person, but it is increasingly easy for the one who desires to do right and who is therefore as spiritually minded as his desire is deeply founded. But

doing right is simple, and there is nothing in the process of doing right or following the Lamb, the idea of Mind, that is not clear and direct. It is the winding way of wrong that is devious, complicated, and deceiving. It is not hard to do right. The difficulty comes in having the willingness to turn, and in the actual turning from evil things.

The Lamb, being the expression of infinite good, or Principle, is infinitely gentle, but unyielding in its rightness. The willing man obedient to the demands of the Christ, or Truth, will find the true idea thus communing with him, "Behold, I stand at the door, and knock: if any man hear my voice, and open the door, I will come in to him, and will sup with him, and he with me." To sup thus is to enjoy the green pastures and the still waters of the twenty-third psalm; but it is also to take part in that "war in heaven" which results when the goodness that men accomplish displaces the suppositional evil that continually disputes progress and denies the salvation of men and of the world. And the goodness that men achieve, they achieve as they perceive that omnipotent good is right here now, and that the Christ or spiritual idea expresses it, and, further, that it is only their false trust in another presence than God and His idea that prevents the demonstration of harmony for them.

The spiritual idea, then, always leads upward, and they who follow whithersoever it goeth ascend in their comprehension of it and what its demands are, namely, the unqualified wiping out of the myth that there is material mind and material activity. In every day in every month, continually, the spiritual idea will require more and more testing of the world's inhabitants and their systems. "Whithersoever he goeth," whatsoever new demand for progress is made, those who are willing, and ready, will welcome it gladly and will not groan or complain over the hardness of the road. Indeed, their very willingness and readiness will make the road, and are making it now, radiant with the freshness and peace of green pastures and still waters even in the midst of apparent waste and waterless places. And such as these are "they which follow the Lamb whithersoever he goeth." Mary Baker Eddy, writing in Science and Health of "three classes of neophytes," describes the last of the three in this way: "A third class of thinkers build with solid masonry. They are sincere, generous, noble, and are therefore open to the approach and recognition of Truth. To teach Christian Science to such as these is no task. They do not incline longingly to error, whine over the demands of Truth, nor play the traitor for place and power" (p. 450). Who can say where the spiritual idea goeth; that is, where the unfoldment of new things for the systems of the world will lead to, and what new-old demonstration men will be called upon to make as the result of the demands put upon them by their increased spiritual understanding? All must be ready when this unfoldment comes and not "whine over the demands of Truth," for this unfolding idea is wonderful in promise, and they who, like the wise virgins, are waiting and ready, will have the blessing. In fact, the unfoldment of good is taking place always, and Principle alone determines what it shall be.

The spiritual idea in its destruction of evil in the world may appear to be met with opposition that at times seems unconquerable, but, as Mrs. Eddy says: "Divine Science shows how the Lamb slays the wolf. Innocence and Truth overcome guilt and error. Ever since the foundation of the world, ever since error would establish material belief, evil has tried to slay the Lamb; but Science is able to destroy this lie, called evil" (Science and Health, pp. 567-68). The story of Cain and Abel, of Pharaoh and Moses, of the Syrian

king and Elisha, of Herod and the babe Jesus, and later the chief priests and the Master, the story of Wycliffe, Luther, and other leaders in the Reformation, and the dense materialism that they opposed, as well as other and later examples of the continual attempt to destroy, are matters of history. But through it all, unconquerable healing has gone on. Moses drove back the sea so that dry ground appeared for his people; Elisha took captive those sent to capture him, he healed leprosy, and raised the dead; the Master healed all manner of diseases and raised himself from death; Wycliffe lifted the Scriptures out of the dead Latin into English and they never again were lost; Mary Baker Eddy discovered Christian Science in 1866 and gave to the world the key to the Bible in "Science and Health with Key to the Scriptures." And in this age the healing of all known diseases, the destruction of sin and dead beliefs, have taken place and are now occurring, thus proving that healing is the effect of ever present Truth or God, and therefore can never in reality be absent.

"Judge not"

VIVIAN M. KUENZLI

"THEREFORE thou art inexcusable, O man, whosoever I thou art that judgest: for wherein thou judgest another, thou condemnest thyself; for thou that judgest doest the same things." This fearless declaration of Paul's is a "Stand and deliver" to mortal mind, which is always seeking opportunity delicately to insert a suggestion of self-righteousness, where a grosser temptation might never find entrance. Surely there is greatest need to watch and pray that we be not led into temptation but delivered from evil, remembering in all gratitude that temptation cannot, without our consent,

. (30. One phase of fear which besets many beginners in the study of Christian Science is first manifested in a desire to "treat" every person and condition, in season and out, later to be evidenced in the effort to refrain from thinking at all, lest it infringe on man's right of self-government. This apathetic condition is corrected by earnest study and practice of the teachings of our Master and their elucidation by Mrs. Eddy, for it is merely a matter of getting wisdom, "and with all thy getting, get understanding." There is no limitation in this getting, other than we ourselves allow, although it is not enough passively to desire improvement. An active striving for good, against every suggestion of evil is essential, even to the overcoming of self.

In this striving, one early learns that the truth regarding every condition and concerning every situation must be realized. This is far from "treating" another, but is a vigorous mental effort to save ourselves the inevitable pain resulting from belief in a lie. We are given instances throughout Mrs. Eddy's writings in which healings took place without a conscious effort, as touching the hem of Jesus' garment produced marvelous results. We know that there was no healing in merely touching the garment itself, but it is very evident that the wearer of that garment must have been so clear in thought regarding the allness of God and the perfection of His spiritual creation, as opposed in belief to that which we must call the counterfeit, that some degree of healing inevitably took place wherever a receptive state of thought was found.

There need be no fear of wrongdoing, when we are reminded through some unpleasant or painful circumstance or surroundings that it is our privilege to know the truth that no such condition or environment can obtain, since God fills

all space. Our reluctance to make the necessary effort to do this ofttimes makes the process by which Truth compels a change of thought seem a chastening to our suffering sense. In any case, an alert awareness of what Paul expresses in the verse quoted above is most essential in order that the needful healing be not delayed.

Beginning on page 261 of our textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, we find this statement, "Good demands of man every hour, in which to work out the problem of being." Only through individual application of this demand can the joy of work well done be realized. Every day opportunity is given to each of us to demonstrate in the sight of men that Christian Science is religion expressing divine Love; that despite differing degrees of understanding and varying conditions of thought, Christian Scientists do stand shoulder to shoulder in an unwavering and unbroken line of loyalty and allegiance to their highest conception of good. This conception is developed and strengthened as it is tenderly cherished in purity of thought, in loving-kindness, and consideration one for another, and in prayerful effort to refrain from condemning anything other than evil. Thus each will be able to declare with gladness of heart, "My soul doth magnify the Lord," and the Christ revealed as never absent will be nourished in our hearts and lives.

Pay Day

ADA THOMPSON REYNOLDS

PAY day is practically a universal belief. Few escape its phases. The employer must reckon with it, the employee expects it, and beyond him there is almost certain to be some one anticipating it, either as a so-called dependent or some one from whom he will buy. Pay day is not peculiar to industrialized nations; some peoples meet at regular intervals to barter, others not so advanced have an aspect of pay day in their dependence on seasonal returns of food. Thus pay day persists among all people.

The beliefs of mortal mind about conduct following pay day hold among all races. The Eskimo pays his gambling debts, the miner his rent, or the high salaried person may write out checks, but through it all the belief survives that at one time man is freer to act than at another. This outlined conduct points to the finite character of a pay day resting on a lapse of time for its occurrence. This sort of pay day is a finite arrangement because it is based on a belief in material activity. Some one works in a way that can be measured and is paid by something that can be seen by mortal eyes: this is indeed a part of the Adam-dream wherein a man sleeps in the erroneous thought that he earns his living materially, ofttimes by much sweat of his brow. Furthermore, the human belief about pay day is finite because it may be here this week but taken away next week, or a general scarcity of pay days may seem prevalent, as during a period of economic adjustment.

Moreover, mortals have another pay day than that which involves compensation by a medium of exchange, that is, the time for the collection of sin's wages, payment in terms of discord for wrong thought. The world has granted that punishment for a criminal is his rightful reward, that is if he has committed against society an offense that can be seen by mortal eyes; but it is not so ready to admit that there are wages for all phases of sin. A man may earn a calamity, his pay for untrue thinking, and he is commiserated. Yet the calamity is but the concomitant of error. Every thought of ungodly character brings its pay. Through seeking Truth one learns that, as Mrs. Eddy says on page 240 of "Science and Health with Key to the Scriptures," "In trying to undo the errors of sense one must pay fully and fairly the utmost farthing, until all error is finally brought into subjection to Truth."

Mrs. Eddy discovered for us that everything must be translated back into Mind. The work of translating consists of reversing the testimony of sense. By contrast to the payment for wrong thinking and to an economic pay day, there is the true pay day. It is not related to time but is constantly with God's children. His pay day is always at hand, for He is always giving His idea the infinite spiritual necessities. He is always knowing the needs of His creation and is, with no interruption, sustaining His idea with divine supply. Jesus told his followers that a laborer is worthy of his hire. This points to the fact that there is work to be done and that compensation is inevitable. When the only employer is known to be God, then every day is pay day, reward comes hourly, even thought by thought. Mrs. Eddy indicates the joy of such reward in "No and Yes" (p. 3), where she says, "How good and pleasant a thing it is to seek not so much thine own as another's good, to sow by the wayside for the way-weary, and trust Love's recompense of love."

A Plea for Tolerance

HELEN B. BRIDGMAN

IN speaking of Jesus the Christ, Mary Baker Eddy has written in "Science and Health with Key to the Scriptures" (p. 54): "Through the magnitude of his human life, he demonstrated the divine Life. Out of the amplitude of his pure affection, he defined Love. With the affluence of Truth, he vanquished error." This is not only a rare and beautiful triad of spiritual graces, revealing the complete and abundant proof of the wholeness of divine Principle, but it is also a very possible model for mankind to follow. Sometimes we are apt to hold aloof from individuals because of their differences of religious expression and because we suspect in them a spirit of unfriendliness; this also fosters in ourselves an attitude of clannishness far removed from the teachings of Jesus. This point of view has led many of us astray, often preventing that opportunity of divine proof wherein we have the privilege of displaying a magnitude of thought and beholding the offspring of God, instead of recognizing only the contrary expression, thus gaining the mortal's confidence and trust.

Such was the compassion and affection of Jesus of Nazareth, who wept because humanity could not understand his love and divine message; but he continued to teach and heal, knowing full well that the following would be inevitable when the Spirit of truth, the holy Comforter, became recognized. As Christian Scientists we must befriend all, substituting for the conception of friendship so commonly accepted a friendship that is always spiritual and loving, a friendship that is always true, with the motive of pure justice, and a friendship that is always compassionate, founded upon divine Principle, which is "the same yesterday, and to day, and for ever." Consecration to this practice brings us into a larger and finer realization of the sweet and abounding amplitude of pure affection. It also gives us a deeper appreciation of the complexities and perplexities of error, and establishes in our thought that oneness of idea and unity of manifestation resulting in freedom from a sense of mortal selfhood in ourselves or others. To those who are richly supplied with this affluent truth there can never be any sense of cleavage or of separation.

Fruitage

CLARA C. SHOWERS

WEBSTER defines the word fruitage as the state or process of bearing fruit; the product or result of any action; effect, good or ill. It is within the province of each one to study diligently the effects of his doing, and where he finds it necessary to make changes in order to reap better results. he should do so without reluctance. In all kinds of vegetation man expects to reap according to the kind of seed planted and every tiller of the soil looks well to the qualities of seed and the preparation of the soil that no stone or clod may hinder the growth. All students of Christian Science have learned that we live in a mental realm, and our pursuits, our purposes, and their success are determined by the quality of our thoughts. On page 272 of "Science and Health with Key to the Scriptures" by Mrs. Eddy, we read: "The spiritual sense of truth must be gained before Truth can be understood. This sense is assimilated only as we are houst, unselfish, loving, and meek. In the soil of an 'honest and good heart' the seed must be sown; else it beareth not much fruit, for the swinish element in human nature uproots it."

When we learn that holiness cannot be rooted in or grafted upon unholiness, we perceive that if we would reap good fruit we must permit only accurate thinking and refuse to indulge in exaggeration of speech or the use of meaningless words. To learn to think without regard to personality will cause one to steer his course according to the guidance of divine wisdom. What Paul gave us in these words, "God is not mocked: for whatsoever a man soweth, that shall he also reap," is as true to-day as when he wrote them, because the truth never changes. By looking to the sowing and reaping, one may know the way he is walking. Mrs. Eddy gave us many pages in Science and Health showing the fruitage gained from the study of the book, and as all work, or mental activity, has its fruitage, we have only to look and see what has been sown. Let honesty of thought direct the preparation and the sowing, and let the cultivation be with sincerity and an earnest desire to glorify our Father in heaven, and harmony will be the fruitage, seen in all the various walks of life.

Fighting Evil

201

· Ar

...

G. DOUGLAS GRAY

THE active Christian life is a continuous warfare, and if we are not active, then we are going backward. It is impossible to stand still or mark time. We have either to go forward spiritually or to risk being carried backward by the ever moving current of materialism. Some people may seem to be standing still, but this is not so. In religious things, as in everything else, there is no middle course without danger. Life is action, and if we are truly reflecting the all-acting God we must be up and doing something, not necessarily for ourselves only, but for the world. We cannot get unless we give; we cannot be blessed unless we bless others. The beautiful thing about Christian Science is that every victory won over sin and sickness claiming to be our own mentality is a victory gained for all, because it lessens the sum total of error in the world.

Jesus' life was a constant fight against materiality. It is noticeable how often during his recorded ministry he retired for prayer, evidently to gain spiritual strength in order to meet some difficult situation as its master. If we imitate him in this we, too, shall never fail to demonstrate the all-power of good over evil, for we shall be able to utilize wisely the sword of divine Truth which destroys error. When fight-

ing against our belief in evil we must hit it quickly and keep on hitting; it is folly to dally with it.

Mrs. Eddy says, "Emerge gently from matter into Spirit" (Science and Health, p. 485). But "gently" is not a synonym for slowly. Gently means softly, meekly, mildly, according to one dictionary; it never means slowly. If we do not get our blow in first, depend upon it, the belief we entertain of evil will hit us again. The more quickly we resist, the sooner we win. James writes in his epistle, "Resist the devil, and he will flee from you." We have also Jesus' example given us in the fourth chapter of Matthew. His replies to each temptation were instant and decisive. He did not argue or beat about the bush. He simply hit evil with each mighty utterance of the truth, until the error was utterly vanquished, and we read that the devil (or evil), baffled and beaten, left him, and angels came to minister unto him. The fighting ground is what claims to be one's own mentality; once we have got complete victory there we are unassailable. Mrs. Eddy explains this very clearly on page 323 of Science and Health, where she says: "This strife consists in the endeavor to forsake error of every kind and to possess no other consciousness but good."

Every object in material thought, every unreal thought that proceeds from mortal mind, has to be reversed and replaced by the spiritual reality. Whenever inharmonious conditions in others appear to us they have to be seen as false, and we must continually see man as the perfect image and likeness of his Maker. When the conversation going on around us is about sickness and sin we must mentally deny it and be strong enough to show that we do not sympathize and assent, even if by our silence alone we indicate this. When we walk through the streets and error is presented to our eyes in the form of a cripple or a blind man, we should instantly deny the error and know that what our corporeal senses have seen is a lie and a counterfeit of that perfect health which God has bestowed upon every child of His perfect creation. As we persevere with a right understanding of the facts we shall gain strength and by degrees replace the material lie by the eternal truth of the spiritual creation and begin to see that everything in God's universe expresses Him alone and is therefore perfect and immortal like God.

Are we striving for victory against error in its various forms? Then we must be constantly alert, always on the lookout to prevent evil getting a footing in any way. We must hourly watch and pray lest we enter into temptation; this requires constant spiritual activity, the activity which is a conscious reflection of divine intelligence. As long as we rely upon Truth alone to fight against evil we shall win in the struggle, for all the evil there seems to be comes from the corporeal senses and is a lie, always a lie, and nothing else but a lie. "Seeing this, we should have faith to fight all claims of evil, because we know that they are worthless and unreal" (Science and Health, p. 529). The myriad disguises of evil will not deceive us, for we shall see through them if we apply the light of Truth to every false claim of evil. Each victory will leave us stronger and better able to fight again, for we shall have proved or demonstrated the power of Truth. Thus each victory, however small, should encourage us to go forward surer than ever of the complete victory. "If God be for us, who can be against us?" We have the glorious Scriptural promise, "My presence shall go with thee."

Those great victories recorded in the Bible by others may seem altogether impossible for us to emulate, but if we carefully examine the Scriptural record we shall find that

they were only the culmination of many previous and lesser victories. David had met and defeated several smaller Goliaths before he vanquished the great Philistine champion. Daniel did not begin his spiritual warfare by facing the lions. He already knew and had proved Him in whom he believed, and was confident that He was able to shut the lions' mouths. Jesus' definite statement, "He that believeth on me, the works that I do shall he do also; and greater works than these shall he do," removes any limit from the healing power of infinite Truth and Love. If, therefore, we do not demonstrate this power, then the fault lies in our lack of spiritual understanding, for the healing of sickness and sin is just as possible to-day as it was in Jesus' time,-God, divine Principle, being "the same yesterday, and to day, and for ever." So we, too, shall go on from strength to strength, always gaining by each experience and never satisfied till we are able to say with Paul, "I have fought a good fight, I have finished my course, I have kept the faith." Such spiritual victory will not result in any human feeling of exultation, for all vanity of victory will be lost in adoration of Him whose power it is that such overcoming reflects.

Let us remember that every sharp experience is an opportunity for us to exercise greater strength and cannot rob us of anything. Did not Jesus say distinctly that his followers must take up his cross if they desired to follow in his footsteps? But this same cross leads to a glorious crown of rejoicing and strength, as it brings us closer to our Father-Mother God, and our faith becomes a spiritual understanding of Him to know whom is eternal life. Let us, then, take up the cross patiently and rejoice that we are counted worthy to fight with that glorious band of Christian warriors who, through much tribulation, have overcome evil, and for whom is laid up in true heaven a harmony which is ever present, an everlasting crown of righteousness, joy, and peace.

[Written for the Sentinel]

The Awakening

BELLE BARTRAM

WHEN in an early morning hour I gazed across the sky, Reflected there I saw the power Of Him who reigns on high.

As broke the sun's first morning beam Forth from the shades of night, I seemed to waken from a dream; My beart was filled with light.

I stood and watched the rising sun As brighter grew the morn, And praised the Lord for victories won, For thoughts of Love new born.

And as I gazed across the skies,

The love reflected there

Touched my cold heart, tears filled my eyes,

Love chased away despair.

Dear Christ, as we at early morn Awake from dreams of night, May we each day awake new born, More clearly see the Light

Which quickens hearts new filled with Love, And render every hour True gratitude to God above Truth, Life, and Love, All-power.

Trust in Principle

THE books of the world are full of aphorisms about doing right, but not many of these aphorisms take it for granted that, if there is such a thing as Principle, doing right is the veriest self-preservation, and doing wrong the most practical form of suicide. An excellent example of the failure to understand this is to be found in, of all books, "A Priest to Temple." There Herbert writes, "Do well and right, and let the world sink." Now if Herbert had meant by the world the flesh and the devil, had he understood something of the unreality of matter as unfolded in the pages of the New Testament, there would have been considerable wisdom and much foresight in his saying. As it was, Herbert was as sure of the personality of the devil as Archbishop Dunstan, and as convinced of the reality of matter as Francis of Assisi. The fact is that until the world realizes that the devil is just mortal mind, it will be in no position to as much as smile at Dunstan for the effort to take him by the nose, as the chronicler assures us he did, with, of all things, a red-hot pincers, whilst, as long as it believes in the reality of matter, it has no excuse for taking exception to the Franciscan doctrine of "my brother the ass." Therefore, will it continue to fear evil, and to proclaim the reality of matter, instead of insisting upon the infinity of good.

The only way, in plain English, in which it is possible to let the world sink with any scientific expectation of fulfilling the Christian exhortation to overcome it, is by realizing its material nothingness, in the light of an understanding of its spiritual reality. The great scholars may quarrel, that is to say, over the structure of the Book of Job and its exegetical meaning, but unless the Book of Job is explaining to mankind the supposititious nature of the universe, and the consequent domination of Spirit, even in a universe of concepts derived from mortal mind, it degenerates into a mere human work of art, and is divorced from any metaphysical message for the enlightenment of the race. But take the Book of Job metaphysically; let the reader once grasp the fact that when the writer made Job say, "Yet in my flesh shall I see God," he intended nothing so foolish as that the carnal minded animal, named Job, should appear clothed in the flesh in the realm of Spirit, but rather just what Christ Jesus demonstrated when he raised Lazarus and healed the centurion's servant, and the extreme practicality of the Gospel becomes instantly apparent. Then the world may begin to see how it was that Canute, believing in this reality of matter, in vain ordered the tides to retreat from his throne, whereas the writer of Job, convinced of the dependence of the supposition of the counterfeit upon the existence of the reality, could say, of the stars in their courses, that it was Principle which brings forth Mazzaroth in his season, and guides Arcturus with his sons.

It is precisely because of this that Truth, as the Roman saw, must always conquer. Therefore, the only power that

any one needs, in any circumstance, is reliance upon the only power there is, Truth. Canute, to do him justice, up to a point understood this, and staged his seashore drama for the specific discomfiture of the materiality of his courtiers. But he had not, of course, begun to dream of the Science of Christianity, and would not have known how to set about the simplest of demonstrations. He would, without a question, have reinforced his faith with all the arguments and expedients which would have defeated the end he had in view, by proving that he did not absolutely rely on Truth. Yet any appeal to anything less than Truth is, in itself, a sign of weakness. In every attempted demonstration, it is as Mrs. Eddy says of healing, on page 167 of Science and Health: "The scientific government of the body must be attained through the divine Mind. It is impossible to gain control over the body in any other way. On this fundamental point, timid conservatism is absolutely inadmissible. Only through radical reliance on Truth can scientific healing power be realized."

One demonstration is exactly like another. And in every one of them, if Truth is understood and relied upon, the result is inevitable. There are no such things as difficult demonstrations, or, to put it rather differently, the difficulty is in the ratio of individual materiality. There is no such thing as long odds; the odds are in proportion to individual understanding. "Who did hinder you," Paul demanded of the Galatians, "that ye should not obey the truth?" whilst Christ Jesus told his listeners upon the Mount, "Blessed are the pure in heart: for they shall see God"-Truth. A man, however, cannot see Truth, God, clearly if he is not living in obedience to Truth, purity. Thus practice must always coincide with theory if demonstration is to be effective. When, therefore, the human being falls back upon remedies, aids, or maneuvers, which are in the nature of a departure from a radical reliance upon Truth, it is obvious that he is weakening his hold upon Truth, and so lessening his chance of success according to the extent in which this concession is inspired by necessity or unfaithfulness. It is a necessity, for instance, that a man should feed himself and clothe himself; it is not a necessity that he should give way to appetite or vanity. It may be necessary for him to fight, but never to lie; to be considerate, but not to be diplomatic. "During the sensual ages," Mrs. Eddy writes, on page 254 of Science and Health, "absolute Christian Science may not be achieved prior to the change called death, for we have not the power to demonstrate what we do not understand. But the human self must be evangelized."

All this, surely, is why Mrs. Eddy wrote, on pages 170 and 171 of "The First Church of Christ Scientist and Miscellany," "In parting I repeat to these dear members of my church: Trust in Truth, and have no other trusts." If any man has this trust in Truth, he will find himself able to pass through all the storms which may beset him, without a single doubt and without one moment of disturbance. If he doubts, if he finds himself disturbed, it is because he is taking himself into consideration instead of resting absolutely secure in the certainty that Truth governs, and, therefore, that if everything has been trusted to Truth, the result, whether contrary or not to his own preconception, is Truth's way of working out the problem. This was exactly what Christ Jesus meant when he said, in the garden of Gethsemane, "Not my will, but thine, be done." FREDERICK DIXON.

The Law-Abiding Citizen

THE orderly expression of divine Principle is spiritual law. All true activity, therefore, operates as genuine law in perfect harmony. Necessarily the spiritual idea in Mind is orderly. True cause and effect cooperate in thorough concord. Christian Science reveals that this concord is the verity of immortal existence now and always. The real man, as spiritual idea, is orderly and harmonious because his whole being is in accord with Principle. Hence the real man is law-abiding in the best sense of the term. Immortal man simply continues to live forever in harmony with divine intelligence. Divine intelligence, or Principle, creates and maintains spiritual law and order. The infinity of divine intelligence unfolds, of course, as all the growth that is real. On page 206 of "Miscellaneous Writings" Mrs. Eddy says, "Growth is governed by intelligence; by the active, all-wise, law-creating, law-disciplining, law-abiding Principle, God."

For progress in the study of Christian Science, one must turn continually to the divine Mind and its spiritual law. Healing in Christian Science is the process by which human beliefs, limitations, and discords are replaced with divine order. The basic point to understand is that infinite Principle governs the real man and produces only right activity. This is the ideal and real government. Each one is entitled to demonstrate that this is the fact for himself. All of Mrs. Eddy's writings show to the seeker the way to demonstrate this truth.

In this connection it is interesting to read Article VIII, Section 26, entitled "Uncharitable Publications," in the Manual. Here Mrs. Eddy says: "A member of this Church shall not publish, nor cause to be published, an article that is uncharitable or impertinent towards religion, medicine, the courts, or the laws of our land." What are called national or state laws represent the attempt of each commonwealth to arrange activity harmoniously. The demonstration of Christian Science can in no way interfere with the public welfare. Indeed, Christian Science is revealing to the world the true Principle of welfare. As Mrs. Eddy says on page 87 of "Retrospection and Introspection," "Genuine Christian Scientists are, or should be, the most systematic and law-abiding people on earth, because their religion demands implicit adherence to fixed rules, in the orderly demonstration thereof."

The understanding of divine Principle is bound to improve human concepts of law. If the legal code of any nation has inadvertently permitted injustices, those defects in the human sense of law can be remedied in proportion as the actual order of infinite intelligence is discerned. The knowing that there is one true Principle governing the real man in perfect order is what replaces any seeming imperfections of human law with the healing truth. When a state law is seen to be manifestly unjust, it can easily be repealed. Until it is repealed, it must be considered intelligently, and any steps to enforce it or improve it must be taken in accord with regular legal procedure. The democratic system of government provides that all have the equal right of justice and the equal privilege of proving what essential justice is.

A law-abiding citizen, in the true sense of the term, must be first of all one who abides in the understanding that divine Principle is the source of real law. To know and prove that infinite Principle is the supreme authority requires constant alertness, kindliness, and patience. Sooner or later all must learn to cooperate in this reliance on Principle, for in this way only can the perfect balance of right activity be manifest throughout experience. The happy warrior for Principle is, indeed, well described in Wordsworth's lines:—

—'Tis he whose law is reason; who depends Upon that law as on the best of friends; Whence, in a state where men are tempted still To evil for a guard against worse ill, And what in quality or act is best Doth seldom on a right foundation rest, He labours good on good to fix, and owes To virtue every triumph that he knows.

The best type of human government is that in which all turn together to Principle as the supreme governing power. This is the genuine democracy.

The unfolding demonstration of divine Love, Principle, as the ruler of man is the fulfillment of all that Mrs. Eddy taught. With this fulfillment, there is no room for a single one of her precepts to become null and void. All that she has written for the benefit of the world, to show what the practice of Christian Science is, must be considered as a whole. Through prayerful, consecrated study of all her writings in connection with the Bible, each one can discern and experience for himself the manifestation of divine Love in daily affairs. By this quiet and honest study, the seeker finds his interpretation of spiritual good constantly broadening. Absolute dependence on Principle shows to each one a continually renewed meaning to all that Mrs. Eddy has provided for the progress of the student of Christian Science. The one infinite divine Mind actually does manifest itself infinitely. Thus the true law and order must express the infinite Mind. It is a joy to know and to prove this, for in proportion as one realizes the omnipresence of spiritual law as the evidence of divine Love, one finds true healing as here and now. In the Sermon on the Mount Christ Jesus declared: "Think not that I am come to destroy the law, or the prophets: I am not come to destroy, but to fulfil. For verily I say unto you, Till heaven and earth pass, one jot or one tittle shall in no wise pass from the law, till all be fulfilled." Students of Christian Science rejoice to comprehend the spiritual meaning of this statement, for they are learning that divine intelligence fulfills all good by giving the divine idea in place of any seeming. GUSTAVUS S. PAINE.

[Written for the Sentinel]

A Prayer

NETTIE ORCENA WOLFLEY

DEAR Father, tend the garden of my thoughts,
Thy dearest care,
And uproot every weed and flower Thou hast
Not planted there.

Give me, to keep my paths and borders straight,
Thy Golden Rule,
To fashion them like his who left for men
No sharper tool.

Teach me to know at sight, in any guise,
One noxious weed,
The "root of bitterness" which, springing up,
Bears evil seed.

Warm with the sunshine of Thy love the soil
Around each tree
That, looking from the earth up toward Thy light,
Bears fruit to Thee.

Testimonies of Healing

It is with some measure of the compassion Jesus had for his fellow man that I write this testimony, knowing that there are thousands upon thousands who are in need of the truth which makes free from sickness as well as from sin. I am unable to find words with which to express all the gratitude I feel for the many good things that God has done for me through Christian Science. My thoughts are overflowing with gratitude to Mrs. Eddy, who has given to us "Science and Health with Key to the Scriptures," which is enabling us to interpret the Bible spiritually and to know God as He is. By reading this wonderful book my thought has been changed from despondency to hope, health, and happiness.

Two years ago I was healed through Christian Science of diabetes which was said to be incurable; hence it is no wonder that my heart is full of joy and gladness for this wonderful healing, since which I have received sufficient understanding of Christian Science to overcome many minor troubles, and I have not only been healed physically but morally. The only regret is that I did not find Christian Science years ago, but I am truly thankful that I found and accepted it when I did. The Christian Science periodicals have been a great help to me, and it is my earnest hope that this testimony may be the means of helping some one to the realization that Christian Science is the same practical religion taught and demonstrated by Jesus, which heals all manner of sickness and sin. Christian Science has proved to me that "God is our refuge and strength, a very present help in trouble."

EDWARD A. WILSON, Metropolis, Illinois.

4

In the hope of helping others I wish to tell what Christian Science has done for me. About eight years ago, when very ill I was advised by one of my sisters to try Christian Science treatment, which she said would help me. I had had medical advice, and although I carried out all instructions I became no better, but rather worse, and was very depressed and weak, not being able to do anything that my sisters enjoyed doing. When it was first recommended I said nothing, as I had always disliked the sound of the name Christian Science, although I had never read anything about it. As time went on she again asked me to read "Science and Health with Key to the Scriptures" by Mary Baker Eddy, saying it would certainly do me no harm, so I consented. I have never ceased to be grateful for that day, for at once my whole outlook on life was altered and Christian Science gave me hope. The trouble, however, did not leave me at once, but I steadily became stronger. I then had help from a practitioner who was most loving and patient with my slow progress.

I was instantaneously healed of influenza and a strained ankle; although my foot was quite black and very swollen the pain left in a few hours and I was able to walk about as usual. I was healed of ringworm in quite a short time. I had great fear and a feeling of disgust over it; directly that sense was destroyed I was healed. I was healed in a most wonderful manner of a very serious illness. I asked for help, and the symptoms which were many and very alarming were at once held in check and in a few days overcome and with the exception of one day, which was spent in bed, I was able to attend to my daily duties. In a little over a week I was well. Another time I had great fear regarding one of my eyes. It seemed to have something at the back of it which looked like a growth. I could not see well with it and was very much frightened about it. I

asked for help, and in three weeks the eye was quite normal. For all these blessings I am indeed thankful and, as I said before, I have never ceased to be grateful for the day when I first commenced the study of Christian Science, which will set all those free who turn to it with an honest heart.

(Miss) CHRISTINE SMITH, Stroud, England.

I have much pleasure in bearing witness to the truth of the above testimony, and at the same time I should like to say a few words on my own account. When Christian Science first came to my notice I accepted it at once as the most logical form of Christianity I had heard of, but oddly enough, though its demonstrations of healing appealed to me most, I have personally not had any instantaneous cures of sickness, although in one unforgetable instance the little knowledge I possessed instantaneously cured a very sick little dog. I had always considered my health very good before reading Science and Health, but afterwards I realized I had been in bondage, more or less, all my life to rheumatism. It was "in the family," and I had become so used to the complaint in various mild forms that I took it as a matter of course. But having learned that all discord is the result of wrong thinking I could no longer just go on passively enduring, without at least trying to think rightly about it. One sudden and severe attack of lumbago disappeared in a week through the help of a friend, but stiff knees, which made hill climbing and strain a trial, took about two months. Then came the time when my ankles were so stiff first thing in the morning that I could scarcely stand on getting out of bed, and suffered very much in going downstairs. This would pass off in an hour or so, only to return the next morning. At the same time my hands felt twice their usual size, without appearing to be swollen in the least, and I was unable to grasp anything. This also was only on first waking and generally passed off by the time I was dressed. These unpleasant conditions lasted so long-quite three years-that sometimes I despaired of ever being healed of them; but one never need despair in Christian Science. Hands and feet are once more normal, though the cure was so gradual that I do not know when it occurred. I mention these details in the hope of giving encouragement to any one else similarly afflicted. In all other respects my general health has greatly improved, also my physical strength. The most noticeable benefit, however, is undoubtedly mental. An abnormally sensitive disposition, which seemed to leave my peace of mind entirely at the mercy of any one who chose to be disagreeable, is absolutely cured. For that alone I can never be too grateful to Christian Science, and I have also found it a wonderful support in times of great mental shock and strain. Another very satisfactory result is the complete absence of worry over all financial affairs and the constant daily supply when left to the guidance of the divine Mind.

(Miss) MARGARET SMITH.

For several years before I heard of Christian Science I had suffered from nervous exhaustion in a very severe form, so severe that for the last three years of that time I was quite unable to do any work of any kind. I spent my days wandering from one health resort to another, both at home

and abroad. I was then living in England, and was trying different kinds of curative treatments, so called, but without gaining even temporary relief.

At last, when I had apparently exhausted everything. Christian Science was presented to me. At first I would have nothing to do with it, holding "all such things," as I

classed it, in the utmost contempt. In the end, however, when almost without hope I decided to try it on the basis that it could at least do me no harm.

My healing was slow and was attended, at times, by bitter resentment, but it was none the less sure. Some nine months after I first commenced treatment, I was back again at work, and since that time, now some twelve years ago, I have been absent from my work for one short half day because of sickness.

HUGH A. STUDDERT KENNEDY, Boston, Massachusetts.

٠

Seven years ago I was a sick, miserable woman; to-day, through Christian Science, I rejoice in health and happiness. I first came to Christian Science for help for valvular heart trouble which was healed in one treatment and has never returned. Dropsy, from which I suffered, was not healed until all other means had been exhausted and I came to realize that God is my only help; then in one month's treatment the dropsy also disappeared. I have had many other healings, including tonsillitis in the most severe form, poisoning of the kidneys, sore and aching feet, and many other minor troubles.

While I am very thankful for these physical healings I am more thankful for the great peace of mind which Christian Science gives to those who apply it to their everyday problems. Worry, a sense of financial lack, and oversensitiveness have been conquered to a great extent, and though there are still problems to be solved I know divine Love governs and that all discord will be overcome.

MRS. F. E. TUTTLE, San Jose, California.

٠

Christian Science came to me, through a demonstration in our family, at a time when there were many doubts and misgivings in my thought as to the divine order of things. While I had always been quite a close student of the Bible, I was prone to interpret it literally and to note seeming contradictions; in fact it was fast becoming to me a sealed book and I was taking a more material view of life as a result, and found more discord was manifested in my daily experience, until the morning usually found me awakening with doubts and fears and wondering what great calamity would befall me that day.

I was in this condition, honestly groping for the light but seeing nothing ahead but "chaos and old night," when, out of the seeming darkness, like a beacon light, the demonstration above referred to was made. I immediately purchased a copy of "Science and Health with Key to the Scriptures" by Mary Baker Eddy, and slowly began to unlearn and empty thought of things material and to fill it with the truth as revealed by our Leader. The process was slow and there were many misgivings but I am so grateful that through Mrs. Eddy's teachings and the Bible I have been led out of a wilderness of belief into the blessed understanding that, as Mrs. Eddy says on page 468 of Science and Health, "All is infinite Mind and its infinite manifestation, for God is Allinall"

About a year later I was called upon to examine a mining property located across the divide of the Rockies. Access could only be had by mountain trail on horseback. I became lost in a blizzard but finally, after many hours of exposure, the horse found its way back to camp. Upon awakening the next morning I found that one side of my face was paralyzed. Fear began to manifest itself, and urged on by my friends not in Science I was rushed to one of the most noted nerve specialists, who pronounced it a form of paralysis, stating there was nothing that could be done and that my face would probably be better within three or four months.

As has been said, "Man's extremity is God's opportunity," so I returned to the practitioner through whom the demonstration previously referred to had been made. The next morning I went to the practitioner, and words fail to express my gratitude for this demonstration which was practically instantaneous, although I returned for treatment once or twice after that. This experience revealed to me a fuller understanding that God is our only source of supply in all things, in business, in the home, and in every walk of life. Since that time the seeming difficulties and problems have vanished into the nothingness from which they came, and each morning unfolds to me more of love and harmony, and I rest in the assurance that all that God made is good. For this and many other demonstrations that have come to me and my loved ones I am truly grateful. A knowledge of Christian Science brings harmony and removes every discordant element, bringing a realization of that Mind "which was also in Christ Jesus."-O. A. King, Denver, Colorado.

4

Having received so much benefit from reading the testimonies of others, I send mine with love and gratitude, and in obedience to the command, "Freely ye have received, freely give." I was healed in two weeks, through absent treatment, of nervous indigestion and a weak heart. Before taking up the study of Christian Science I suffered from toothache and neuralgia. My teeth were in such condition that it seemed necessary to have them all extracted. After an unsuccessful attempt I became so nervous that I gave up, and continued to suffer, until I was healed through Christian Science treatment. I later returned to the same dentist and, much to his surprise, had the teeth removed without an anæsthetic. There was almost no pain and no after effects.

I do not have the privilege of church services very often as I do not live very close to a church, and I am indeed grateful for the Lesson-Sermons, also for the literature, which we find helpful in our home. I have had many other blessings too numerous to mention and am indeed grateful for the understanding gained through the study of Christian Science, also to the loving practitioners and many friends who have been so helpful to me. I am thankful to God and grateful to our revered Leader, Mary Baker Eddy, for this great truth that makes free.

(Mrs.) EMMA HARDEE, Grimesland, North Carolina.

4

I was considered a very nervous child, being subject to nightmares and fears too numerous to mention, and when I entered womanhood I became weakly. I took tonics but received little relief. At fourteen years of age I suffered a stroke of paralysis and at eighteen a second one. At the birth of my first child I got on very poorly and was unable to be on my feet for any length of time. I was treated by a number of doctors but my condition became more critical. In the year 1914 I underwent two operations, and during the last one was under the influence of an anæsthetic for over four hours, and it was claimed that my system underwent a great shock. The head surgeon said I could never be a well woman, and I shall not try to tell what I suffered. A kidney trouble was manifested soon after the operation, which was diagnosed as Bright's disease. I spent many days in hospitals under treatment. In February, 1919, I was prostrated, and having lost much confidence in medical treatment refused to call a physician, although I used several kinds of medicine daily. A neighbor who is interested in Christian Science lent me a copy of Science and Health, which I read, and she also read to me. On the fourteenth of April I decided to give up all medicine and to rely on God

alone and I arose and walked alone for the first time in more than two months. I took a bath, dressed myself, and was whole. In eight days I took charge of all my housework, and could have done so sooner only my family thought it better for me to rest. My healing has been permanent and Mind has since been my only medicine.

When fourteen I united with a denominational church. I read my Bible a great deal and often prayed God to heal me, and wondered why He desired me to be sick of an incurable disease when my life meant so much to my family. Through reading Science and Health I gained a truer conception of Deity. It is such a joy to know that God is Love and that He did not send my affliction. I have never had an opportunity to attend a Christian Science service, as I live on a ranch twenty miles from a railroad. I have "Science and Health with Key to the Scriptures" and "Miscellaneous Writings" by Mrs. Eddy, and I take the Journal, Sentinel, and Quarterly, and hope to subscribe for the Monitor soon. I study the Lesson-Sermon every day and feel that I am growing in grace and in the knowledge of Truth. I hope this testimony may encourage others who are in need of Christian Science, as I was.

(Mrs.) CORA LOBB, Sedan, New Mexico.

4

Out of love and gratitude I wish to give my testimony for all the good and love of which I have been a recipient through Christian Science. Five years ago I heard of this beautiful teaching for the first time, when I was so downhearted that I thought I could never be happy again. My only daughter passed away at the age of seventeen. This loss made me nearly desperate. A dear friend called my attention to Christian Science and gave me a copy of Der Herold to read. After reading it through I had a deep desire to know more of this beautiful teaching. A dear Christian Scientist helped me with great patience and love to overcome the deep sense of sorrow and through Christian Science I learned to know that there is no pain, no separation, no sorrow, and I experienced rest and peace.

I also wish to testify to another healing. I had lost all my hair, and was completely bald. This condition had existed for over two years and all the material remedies applied were without result. I believed that it would continue to be so for the rest of my life, but through Christian Science treatment the condition was overcome and to-day I have a full growth of hair. I desire to express heartfelt thankfulness to God for all the blessings I have received through Christian Science. I am grateful to Mrs. Eddy, who did not avoid any sacrifice in order to give to the world a demonstrable understanding of the teachings of Christ Jesus. I thank all who have stood by me and have helped me in word and deed. I hope that my testimony may encourage others to seek a knowledge of God so that they, too, may find peace, harmony, and healing.—(Mrs.) TRINA METTLER-ABDERHALDEN, Hundwil, Kt. Appenzell, Switzerland.

4

Many years have passed since my first healing through Christian Science. In sheer desperation, and after fighting against it for some time, I at last turned to it hoping to find relief from weak eyes, and as Mrs. Eddy says of the disciples of old, "Convinced of the fruitlessness of their toil in the dark and wakened by their Master's voice, they changed their methods, turned away from material things, and cast their net on the right side" (Science and Health, p. 35), so I turned from matter to Spirit. The understanding gained from the first interview with a practitioner enabled me to see

in a small degree man's relation to God, his creator, which resulted in my laying aside glasses, which I had worn for five years but have not worn since. This was but the beginning of a firm stand for Truth. My gratitude to God for His loving care, and my appreciation for the unselfish devotion which made it possible for Mrs. Eddy to reveal to us this glorious truth can be expressed only in small measure, for it is almost impossible to put into words the gratitude and joy one feels for the benefits received through Christian Science.

(Mrs.) HARRIET H. ABBOTT, New York, New York.

4

I should like to say how grateful I am for Christian Science and for the healing of a very discordant condition in one of my ears. Quite suddenly one morning there was a deafening sound in this ear, and both ears seemed full of water. I had to go to work as usual, to an occupation in which good hearing seemed an essential, and I felt very deaf.

The slight knowledge of the truth which I had helped to keep fear away to a great extent, but I could not get rid of the discordant sounds in my ear. I then asked help from a practitioner, which was most kindly given, and some little time afterwards the discordant conditions entirely left me. I felt as if I had awakened from a bad dream. Words can but feebly express my gratitude to God for this healing, and for this wonderful truth as taught in Christian Science.

(Miss) GERTRUDE BIDDLE, Wimbledon, England.

٠

Having so many times received help through reading the testimonies in the Sentinel, I wish to express my gratitude to God, to our revered Leader, Mary Baker Eddy, and to the friends who so lovingly helped me in taking my first steps. In the four years since I have learned to know God as divine Love, perfect Principle, and man as the reflection, made in His image and likeness, I have had many beautiful demonstrations of Love's healing power. I have been healed of a weak heart which I had experienced since childhood, also of neuritis, from which I had suffered for ten years and had no hope of ever being well. My daily desire is to overcome a sense of criticism, to know nothing unlike divine Love, and to manifest more of that Mind which was in Christ Jesus. For all the good that has come and is coming to me daily I am truly grateful.

(Mrs.) NELLIE V. PROBASCO, Lankershim, California.

4

I would like to express my gratitude for the many healings which have come to me and to my family through the study of Christian Science. My two children have had several of the so-called children's diseases,—measles, mumps, and chicken pox,—and in each case there was not more than one hour's sickness; although the outward manifestations remained for a few days, there was no other inconvenience. In the case of the older boy, whooping cough was entirely healed in three days with the help of a practitioner. Through these healings and many others which we have experienced, some of equally short, and others of longer duration, I have indeed proved that Christian Science heals. God is no respecter of persons, and the truth is available to all who earnestly seek it.

I am grateful for the textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and for all the other publications and the help received through the faithful work of practitioners.—(Mrs.) SARAH F. BLANCHARD, Shrewsbury, Massachusetts.

Signs of the Times

["Face to Face"-The Christian Science Monitor, Boston, U.S.A., Feb. 3, 1921]

Christian Science may be said to be a religion of seeing face to face. Through an application of its teachings all phenomena are scientifically traced to their true source. All false beliefs, which are responsible for the bondage in which humanity finds itself, are dissolved by an understanding of the truth. Sickness is thus replaced by health, sin by holiness, and discord by harmony. Thus does the light of true knowledge, born of the divine Mind, dispel the darkness of mortal beliefs. And one sees, perhaps for the first time, that success in Christian Science is to be gained in the measure that one abandons the utterly false beliefs, predicated on life in and of matter, and puts on the new man, "which after God is created in righteousness and true holiness." Thus does a man strip off his disguise, as of the earth earthy, and he sees himself as man, the perfect image or reflection of God who is infinite Mind, Principle, and therefore not subject to any of the ills and limitations imposed by the so-called carnal mind. He is commencing to see face to face, to maintain his knowledge of God as infinite Spirit and man as the expression of Spirit, and therefore wholly spiritual. Scientific discernment alone lifts him into spiritual understanding, which he supports by actual demonstration. This true knowledge enables him to detect the chaff of ignorance, or materiality, and to separate it from the wheat of spiritual perception. Thus he finds that God is the sole activity, the one and only cause. He will rejoice, for he will have awakened to see himself as man, spiritual, and not material, created in the likeness of Mind, God, not theoretically, but actually and practically. He will recognize further what he previously failed to grasp, while accepting the testimony of material sense,-that, being a spiritual idea, man has always dwelt, is now dwelling, and will forever dwell in the domain of divine consciousness or Mind, and nowhere else. Through this metaphysical knowledge, or direct seeing, he will soon behold the fruits of the Spirit, expressed through love, peace, contentment, health, and harmony. He will know, for all time to come, that in reality the kingdom of heaven is here and now, on earth "as it is in heaven." And all the beliefs that have hampered his growth Spiritward, he will see, have no existence, in fact, for they must be outside of the realm of infinity, the one reality, which is impossible.

It is little wonder, therefore, that those who have been taught to believe that God is anthropomorphic, an enlarged material personality, should "see through a glass, darkly," and that their entire vision of God, or Principle, who is infinite, invisible, and incorporeal, should have been obscured. From the beginning of his study of Christian Science, the student is immeasurably helped by its elucidation of the fact that the Bible must be spiritually discerned. Mary Baker Eddy, the Discoverer and Founder of Christian Science, has made this extremely simple, and has pointed out this realization as a prerequisite to all healing. "The Bible teaches transformation of the body by the renewal of Spirit," writes Mrs. Eddy in "Science and Health with Key to the Scriptures" (p. 241). Then follow these significant words: "Take away the spiritual signification of Scripture, and that compilation can do no more for mortals than can moonbeams to melt a river of ice." And thus the Christian Scientist is ever at work gleaning from the Bible its spiritual meaning. In this connection as in all others the Christian Science textbook and Mrs. Eddy's other writings are of inestimable value.

This struggle to improve a man's spiritual vision, until he finally sees God face to face, is by no means peculiar to this day and generation. It is as ancient as the ancient of days, and can be traced throughout the entire Bible record. It is described in many incidents, and wherever men's vision was elevated to a better understanding of God, strength and spiritual power measurably increased. And similarly, he who has gained the loftiest vision of Truth is proving most abundantly that the Christ is as available now as when the master Metaphysician preached and practiced, through healing, among the multitudes in the streets of Capernaum and in Jerusalem.

4

It will be remembered that when Jacob wrestled with the angel, his name was changed to Israel, and he called the place Peniel, "for," he said, "I have seen God face to face, and my life is preserved." He had caught a vision of the Christ, or Truth. The significance of this incident is completely lost unless the incorporeality of God, infinite Mind, is clearly recognized. For without this realization one would fail to understand what the experience of Jacob was designed to reveal, that is, the struggle of the human mind in overcoming its own beliefs and the ultimate recognition of the ever presence and infinite power of Mind, divine Love. Mrs. Eddy writes, "Jacob was alone, wrestling with error, -struggling with a mortal sense of life, substance, and intelligence as existent in matter with its false pleasures and pains,—when an angel, a message from Truth and Love, appeared to him and smote the sinew, or strength, of his error, till he saw its unreality; and Truth, being thereby understood, gave him spiritual strength in this Peniel of divine Science" (Science and Health, p. 308), and finally, we read on the next page: "The result of Jacob's struggle thus appeared. He had conquered material error with the understanding of Spirit and of spiritual power. This changed the man."

And thus the experience of Jacob typifies the continuous effort of mankind, daily striving to work out of the flesh and its enslavements. And in some degree, at least, every one is struggling to put off the old man which is corrupt according to the deceitful lusts. That is to say, every one is laboring, consciously or otherwise, to put on the Mind of Christ. He will, at length, put on the new man, clad in the vestment of immortality, fully conscious of his unity with Principle. And there will be great joy, for he will have awakened from the dream of life in matter, by the rejection of every suggestion of imperfection and impotence. He will rejoice, for he will see God face to face.

[From President Harding's Inaugural Address]

Mankind needs a world-wide benediction of understanding. It is needed among individuals, among peoples, among governments, and it will inaugurate an era of good feeling to mark the birth of a new order. In such understanding men will strike confidently for the promotion of their better relationships, and nations will promote the comities so essential to peace. . . . The earth is thirsting for the cup of good will. Understanding is its fountain source. I would like to acclaim an era of good feeling amid dependable prosperity and all the blessings which attend. . . . There is no short cut to the making of these ideals into glad realities. The world has witnessed, again and again, the futility and the mischief of ill-considered remedies for social and economic disorders. But we are mindful to-day, as never before, of the friction of modern industrialism and we must learn its causes and reduce its evil consequences by sober and tested methods. Where genius has made for great possibilities, justice and happiness must be reflected in a greater common welfare.

1861

Service is the supreme commitment of life. I would rejoice to acclaim the era of the Golden Rule and crown it with the autocracy of service. I pledge an administration wherein all the agencies of government are called to serve and ever promote an understanding of government purely as an expression of the popular will. One cannot stand in this presence and be unmindful of the tremendous responsibility. The world upheaval has added heavily to our tasks, but with the realization comes the surge of high resolve, and there is reassurance in belief in the God-given destiny of our Republic. If I felt that there is to be sole responsibility in the Executive for the America of to-morrow, I should shrink from the burden. But here are 100,000,000, with common concern and shared responsibility, answerable to God and country. The Republic summons them to their duty and I invite cooperation.

I accept my part with single-mindedness of purpose and humility of spirit and implore the favor and guidance of God in His heaven. With these I am unafraid and confidently face the future. I have taken the solemn oath of office on that passage of Holy Writ wherein it is asked, "What doth the Lord require of thee, but to do justly, and to love mercy, and to walk humbly with thy God?" (Micah 6:8.) This I plight to God and country.

[From Kolnische Zeitung, as Reprinted in The Living Age]

Our old materialistic philosophy has departed with the brilliance of the imperial era. Our faith in what is merely earthly, in what we call "real," in liberal dividends and modern sanitation, as the true view of life, has been shaken like many other of our convictions. We have overturned not only thrones, but also what seemed securely rooted creeds. People are filled with a longing for things which are not of the visible world—things which we cannot see, but whose power we feel. . . . Christian Science, which had some vogue here before the war, gathers many adherents in quiet West End meeting rooms.

[From "Foundations of Faith," Anniversary Address at Union Theological Seminary, by the Rev. John Kelman, D.D.1

Materialistic scientists had supposed that their foundations were secure down to the very bottom of things, and that believers in spiritual realities had no such foundations beneath their convictions. Yet, when we come to think of it, no claim could be less valid than this. Take matter itself, of which people speak as if they knew all about it, and let us try to define it. The attempt takes us back through many successive theories which have arisen and subsided, even within a lifetime. The atoms have journeyed through a longer course than the Israelites, and have encountered more adventures than Ulysses, without reaching a promised land of definition. Even to-day they elude all search, and indeed Bishop Berkeley, who denied the objective reality of matter altogether, has never yet been finally and convincingly answered. Force is in no better position, nor motion. Electricity is known simply so far as the utilizing of it for practical purposes goes, but no one knows what it is in itself. Until recently the law of gravitation seemed to be a matter thoroughly understood and probed to the bottom, until Einstein suddenly arose and relegated gravitation to the same category of insoluble mystery as the rest. We can utilize them all but we cannot know them, and we seem to be no nearer the knowledge of their ultimate nature than our fathers were.

The problem of life is in no better case. Biology has given us wonderful accounts of the facts as they present

themselves to the observer, and physiology has disclosed the marvels of the mechanism which lies behind all these phenomena; but when a definition of the ultimate meaning of the fact of life is demanded of it, science is no nearer a solution to-day than it was of old. Indeed, Herbert Spencer's word remains still as good as any that has been spoken, defining life merely as the sum of the forces that resist death. . . . Hugh Benson has translated the scientific confession into popular form when he says that . . . "the highest possible outcome of human knowledge, in any line almost, consists in this—that one can state with something like correctness, not the key to the mystery, the answer to the riddle, but the riddle itself." . . .

There are times when the anxious believer discovers that faith's foundations are out of sight and have apparently vanished. At such times it is not surprising if he should be tempted to ask, What if it be not true after all? Nor will it be surprising if, in his attempt to answer that question, he should discover that he has no argument by which he may effectually silence doubt. At such a time there is but one thing for it. He must fall back upon his own experience and find there a sufficient ground for believing. Whatever floods of mystery the doctrines of Christianity are ultimately founded on, here in actual present experience there is solid ground beneath them, a sufficient platform for faith to stand upon. Religion does not mean that we profess to know what God is and are able to define Him. It means that we know God as an actual potent factor in our own lives. . . . All human faith ultimately rests on experience, either direct or transmitted, and the real strength of the faith is measured by the directness and immediacy of its connection with the believer's own experience.

[George Eastman, as Quoted in The American Magazine]

The man who thinks he has done everything he can do, has merely stopped thinking. He is what might be called "up and out," and excepting that he has more money his case is not really very different from that of the man who is "down and out."

[From The Lewis, Bulletins Published by Campbell-Ewald Co.]

There is nothing to efficiency but truth at work—and there is nothing so practical and profitable as truth.

Church Notices

+ + +

Admission to Membership in The Mother Church

The next admission of candidates will take place on June 3, 1921, as provided in Article XIII, Section 2, of the By-laws of The Mother Church. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Friday, May 20, 1921. Consideration of any applications received after that date will be deferred until the November 4, 1921, admission.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to November 5, 1920, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

CHARLES E. JARVIS, Clerk,

236 Huntington Avenue, Back Bay, Boston 17, Mass.

From the Clerk of The Mother Church

Church Tenets.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society

Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in *The Christian Science Monitor*, were run off at the time of their publication in the *Monitor*.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 81/4" x 103/4". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for *The Christian Science Monitor*, *Journal*, *Sentinel*, *Quarterly*, and *Heralds*, should now be sent direct to The Christian Science Publishing Society. Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and immediate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings. Montana; Cheyenne, Wyoming; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlet in Russian

There is now on sale a new Russian translation of "Christian Science: Its Advantage to Mankind" by Edward A. Kimball, with alternate pages in English. Price 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U. S. A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U. S. A.

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Scntinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U.S.A.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder

Good Alone Is Real

NINA GRANT

IT is sometimes surprising, even to the student of Christian Science, to find how belief in the reality of both good and evil permeates human thinking, even in what are considered its best aspects. Men and women who are earnestly desirous of helping their fellow creatures and alleviating the suffering around them, handicap their efforts through a fixed and illogical belief in the reality and divine permission of the evil which they are attempting to destroy.

Another curious illusion of the human mind is the belief that personal experience of sickness or sorrow is helpful, if not positively essential in order to be able to help others to be healthy and happy. A remark recently made to the writer to the effect that a man could only learn through suffering how to help and cheer his fellow man, showed how much reason we have for gratitude to Christian Science for an understanding of what happiness is, and how it can be realized here and now. Any erroneous statement made is only an opportunity for knowing the true fact, and it was gratefully realized, in the instance alluded to, that the man who best helps his fellow man is he who knows most about God. He is also the happiest man, for he is daily proving, in healing sorrow, sickness, and sin, that Spirit, divine Mind, is the only creator, and man in the image and likeness of Spirit reflects infinite Life, Truth, and Love, and therefore is spiritual, deathless, perfect. For the one demonstrating this glorious truth there can be nothing but rejoicing.

Any one who has experienced in the slightest degree the joy and peace of knowing that God is ever present Love, and that the only law governing man and the universe is the eternal, unchanging, supreme law of divine Principle, good, knows that true happiness is forever independent of any material sense of wealth, fame, or even personal affection, and is experienced in spite of the presence or absence of these conditions, and quite irrespective of them. Indeed, if we cling to the mortal sense of joy in persons or things we but sentence ourselves to suffer the doom of this false sense as satisfaction in or with matter gives way, as it inevitably must, before the unfoldment of the ever present consciousness of true being.

On page 96 of the textbook, "Science and Health with Key to the Scriptures," Mrs. Eddy has written: "This material world is even now becoming the arena for conflicting forces. On one side there will be discord and dismay; on the other side there will be Science and peace. The breaking up of material beliefs may seem to be famine and pestilence, want and woe, sin, sickness, and death, which assume new phases until their nothingness appears." It is worthy of note that she points out that while on the one side will be discord and dismay, on the other side there will be Science and peace. We are all of us free to choose Science and peace, if we desire the truth of spiritual being, rather than the thorny road of suffering as the result of resistance to Truth. A man does not need to believe in or suffer from a lie in order to be able to

demonstrate Truth for himself or another. We do not read that Jesus, the greatest healer the world has ever known, had to experience sin, sickness, or death in order to heal all who came to him. True, he "was in all points tempted like as we are," yet he was "without sin," and the man who knew enough of God, infinite, omnipotent good, to be able to feed the multitude, purify the sense of the Magdalen, and finally prove for all time that life is eternal, could never have suffered from nor accepted poverty, sin, disease, or death as anything but falsities of belief, to be corrected with the fact of ever present Life, Truth, and Love.

What we need, then, in order to heal the sense of discord in ourselves and others, is to displace the belief about happiness as depending on riches, environment, worldly success, or popularity, with the fact of man's eternal inseparableness from good. Because Spirit, God, is all there is, man can never for an instant be separated from the consciousness of true spiritual substance, for there is, in fact, nothing to come between God and His spiritual idea, or expression, man. The understanding of this fact eliminates the false sense of separation between man and his Maker which finds expression in the belief of mortality, or life in matter, governed by material conditions, and replaces it with the consciousness of the ever presence of the only Life, Spirit.

This realization is not gained to-day, any more than in Jesus' time, by the one who wraps himself in the mantle of self-righteousness or callous disregard of the seeming sufferings of others, nor by the one indulging in unjust censure or condemnation of others. Instead of complacently remarking that "so-and-so cannot expect to be well so long as he is so unloving or fearful or prone to criticize," let us turn the searchlight of Truth on our own thinking and cast out the belief in evil as causative intelligence, so that we see the Christ so clearly that we can prove for our brother the glorious truth that cause and effect, Mind and idea, are forever good and harmonious.

If we love God sufficiently to recognize as real and potent only that which reflects the divine Mind, we shall gain the purity of vision that detects error and corrects it without believing in it as reality, and instead of believing in a mortal material mind resulting in a sick and sinning mortal man we shall begin to realize the joy of coming "in the unity of the faith, and of the knowledge of the Son of God, unto a perfect man, unto the measure of the stature of the fulness of Christ."

Bullying

ALEXANDER F. PRIMROSE

BULLYING is unfortunately not confined solely to boys' schools, though it is usually looked upon as being the ill-treatment which boys sometimes receive at the hand of bigger and stronger ones. Where it occurs in other walks of life, it is usually called by some other name. Bullying is always looked on with disapproval and steps are taken to stamp it out when it is discovered. The reason for this is simple. A bully is always a coward at heart, and never dares

Ċ,

to hurt any one if he imagines for a moment that there is any chance of his not being able to do so with impunity. No one has ever any use for a coward, and bullying has always bad results for those who are not able to resist it.

When asked what a small boy is to do who is being bullied, some people sometimes glibly advise his fighting the bigger boy who is tormenting him. Though the advice may be well meant, if acted upon literally it usually has rather disastrous results. The proper way to overcome bullying is well given in "Tom Brown's School Days," that delightful description of life at a big boarding school. The advice given in this book to those who are not able to protect themselves by physical means is to "grin and bear it." This is a sure remedy for bullying, because once the bully sees that his efforts are not causing fear he transfers his attentions elsewhere. He thinks he does so because there is no fun in tormenting some one who does not mind it; but really it is because he has an instinctive fear of being hit back. Fear is like the darkness which vanishes into its native nothingness before the light of Truth.

There is no one, however, who does not encounter bullying in some form or another, although he may call it by some other name. In fact, whenever a man is afraid, he will be bullied, because fear is the belief that there is some power in the world besides Love. If therefore a man believes in an illusion, he will suffer the effects of his belief; and as any belief as to the existence of a power opposed to God who is infinite Life, Truth, and Love, must be the opposite of these divine qualities, the effects of his belief must of necessity be very unpleasant. It may be said that the baneful results of entertaining these erroneous beliefs are the only good thing that can be said for them, as sooner or later they make one seek to rediscover what God, Principle, is. In other words, ceasing to be afraid of the bully, whether it is called ill health, business misfortune, unhappiness, to mention only a few of the ills which seem to cast their shadow across the path of mortal existence, gives one immediate freedom.

"But how can I get rid of my troubles?" is the question which is continually being asked. "I have tried to resist them bravely and to fight against them, but it is no use. Things only go from bad to worse." Now this is very like the position of the little boy at school who tries to fight the bully by using physical force. The bully only becomes infuriated and makes things very much worse for his victim. What is happening is simply this. The sufferer thinks that he is fighting against a reality instead of against an illusion. The result is that he only makes the lie seem more real, and consequently himself gives it the only power it could ever seem to have to harm him.

But once let a man begin to understand, through Christian Science, the truth, even a little of the facts of existence as they really are, and he will begin from that moment to free himself from the shackles of his own belief in the lie which has bound him with so many fetters and hindered his best endeavors. Gradually he begins to see that at the bottom of all his troubles is the belief that there is some power besides God, which seems to influence his actions and haunt his footsteps. Most people will admit that God is all-powerful and allwise and that His power cannot be challenged, but they do not realize that the "something" which seems to challenge this allness of Deity is only a counterfeit of the truth. Now this "something," which people call devil or evil, counterfeits infinite Life, Truth, and Love in every way possible. It is essentially a cheat and a deception, but so long as one goes on thinking that it is true, it will never let him alone or give him a moment's rest. It will seem to haunt him at every turn. He

will be just like the little fellow at school trying with his inferior strength to fight the bully; the task seems impossible. Sooner or later everybody will be forced to see that the only way to stop being bullied is to cease being afraid of the bully. Now this becomes easy once it is realized that there never was and never can be a power apart from God. The struggle at first may not seem an easy one, but that is only because one does not unravel all one's snarls of fear in a day. The path, however, is straight and direct, if one will keep going right ahead. The method of treating every problem in Christian Science is the same, and one has only to apply it faithfully. As Mrs. Eddy says on page 410 of the Christian Science textbook, "Science and Health with Key to the Scriptures," "Christian scientific practice begins with Christ's keynote of harmony, 'Be not afraid!'"

True Courage Established

MAY JOHNSTON HALE

THE foundation for true courage is a right understanding Tof God, which eliminates fear. In the history of all peoples we may discern the striving to worship some superior power, but mortals seem always to be attempting to deify something as near like themselves as possible, something that can be understood humanly, and so when Jesus gave his Christ-teaching with its wonderful proofs of the supremacy of Spirit, the people were disappointed in not finding him a material ruler. To them, as to most of the human race, the material world seemed to be the real, and the spiritual world appeared distant, vague, and shadowy. Human beings are in constant dread of something. Foremost is the fear of death, the belief that life is in matter and can be destroyed. And this great fear leads to many lesser fears,-of poverty, sin, disease, and accidents. Even the food eaten and the air breathed seem laden with dangers.

One of the first results of the study of Christian Science is the lessening of these fears in the thought of the student. When it is learned that instead of being a far-off deity seated upon an imaginary throne in the heavens, "God is incorporeal, divine, supreme, infinite Mind, Spirit, Soul, Principle, Life, Truth, Love," as Mrs. Eddy says in Science and Health (p. 465), and that this God is all-powerful, allknowing, and ever present with His expression, man and the universe, the foundation for true courage is established. Since God, good, is supreme, infinite, and omnipotent, there can be no other power; therefore evil has no place in reality. so there is nothing to fear. The study of the Christian Science textbook reveals also the "scientific statement of being" (Science and Health, p. 468), which to so many students is a veritable rock of salvation when they are tempted by fear: "There is no life, truth, intelligence, nor substance in matter. All is infinite Mind and its infinite manifestation, for God is All-in-all. Spirit is immortal Truth; matter is mortal error. Spirit is the real and eternal; matter is the unreal and temporal. Spirit is God, and man is His image and likeness. Therefore man is not material; he is spiritual." This statement is a direct deduction from the definition of God.

The most wonderful fact about the Christian Science definition of God and the "scientific statement of being" is that they can be proved true by any one sincerely seeking Truth. Little children often show their understanding and consequent courage more readily than their elders, and we remember that Jesus said we must become as little children to enter the kingdom of heaven. The simplest proof of the healing power of right thinking brings the assurance of the ever

presence of divine Mind, as in mathematics the successful solving of one problem encourages the student to have confidence in his ability to reason out another by the same rule. Again as in mathematics, one can advance in Christian Science only by working out problems. Gradually the many fears that hold mankind in bondage begin to yield to this better understanding of the divine Principle of the universe. The enlightened mother gives the necessary care to her children, but ceases to worry and be anxious about them, because she has learned that as she realizes that God's idea, spiritual, not material, guided and governed and protected by the loving Father-Mother God, is the reality of child, she is placing them in the kingdom of heaven. What wonderful encouragement is brought to the sufferer by the assurance that disease is unknown to God and comes not by His will, that the so-called disease is an unreality. For when we remember that God, good, creates and governs all, we know that the only reality there is, the idea of Truth, must be spiritual and good, incapable of producing inharmony and discord, and with this understanding there is nothing to fear. Dreaded poverty is the excuse for much discouragement. In Christian Science one learns that since God is the one creator He must be the one source of all supply, and, since God is infinite and ever present, supply must be like Him, infinite and ever present. By persistent application of this understanding to problems of seeming lack, many grateful students can testify that an abundant supply for all rightful needs is assured. To the man in large business enterprises come moments for great decisions. The human mind with its doubts and fears, thinking one way to-day and another to-morrow, often hesitates to take great responsibility, but as a man learns to submit all problems to that Mind which governs the whole universe, timidity and fear give place to courage equal to any right action.

Only the realization of perfect protection could have upheld Mary Baker Eddy, the author of the Christian Science textbook, in her efforts to give to the world the benefits of her discovery, for the teaching founded upon the truth as taught and lived by Jesus was so contrary to human beliefs that it aroused great opposition and resentment. She writes in "Retrospection and Introspection" (p. 30), "As the pioneer of Christian Science I stood alone in this conflict, endeavoring to smite error with the falchion of Truth." The remarkable courage and brave persistence of this noble woman have blessed all mankind. Many of the soldiers and others in the service during the recent war can bear witness to the protecting power of divine Love and have given grateful thanks for the courage born of their right understanding of God which enabled them, often under the most trying circumstances, to work out the many difficult problems which confronted them.

Just as in any other study we progress by earnest effort, so in the study of Christian Science, by persistent application and the proving of its rules, the foundation for true courage is established in our individual experience, for, no matter what the seeming difficulty may be, one has only to hold fast to his understanding of God and of man as His image and likeness to find the solution for every problem that may confront him, and to realize the truth of what our Leader has written on page 99 of Science and Health, "The calm, strong currents of true spirituality, the manifestations of which are health, purity, and self-immolation, must deepen human experience, until the beliefs of material existence are seen to be a bald imposition, and sin, disease, and death give everlasting place to the scientific demonstration of divine Spirit and to God's spiritual, perfect man."

Only One Right

THOMAS JOSEPH ABBOTT

IN Christian Science a plurality of rights is impossible. There is only one right. Outside of Christian Science there are as many rights as the suppositional human mind may suppose or opine. But the right or truth does not have its being in the human or carnal mind but in the divine and only real Mind, even that Mind "which was also in Christ Jesus." It is therefore passing strange that one should hear students of Christian Science, when there occurs a difference of human opinions, remark, "Both sides think they are right."

In Article VIII, Section 7, of the Manual of The Mother Church, Mrs. Eddy has placed a rule for Christian Scientists which reads, "In accordance with the Christian Science textbooks,—the Bible, and Science and Health with Key to THE SCRIPTURES,-and in accord with all of Mrs. Eddy's teachings, members of this Church shall neither entertain a belief nor signify a belief in more than one Christ, even that

Christ whereof the Scripture beareth testimony."

Christ Jesus said, "I am the way, the truth, and the life: no man cometh unto the Father, but by me." Now Christian Scientists understand this statement to mean that no scientific and correct conclusion can be arrived at or demonstrated unless the premise is based upon spiritual truth. The supposititious human mind, being made up of erroneous beliefs, vanities, pride, self-righteousness, and the like, becomes enraged and indignant at the simplicity of the plain, unvarnished statements of the truth. It is therefore obvious that if one is sincerely desirous of knowing what is right about any question or problem, this human mind with its beliefs and opinions must be put off or cast out in order that the verities of the divine Mind may be seen.

Christian Science does not admit of any human theories, contentions, speculations, or hypotheses, but this divine Science, being the unchanging law of God, good, Spirit, can only admit the omniscience, omnipotence, and omnipresence of Spirit. All questions or problems, therefore, which may come to the student of Christian Science should be placed under this spiritual microscope, and any false claim to power, presence, or knowledge, when detected, must be destroyed as a lie by the spiritual truth. A student may feel tempted to follow the reasoning of some teacher, practitioner, or older Scientist, without himself having given the question under consideration much individual metaphysical thought, or probably because he thinks these people should know more than he does. Our Leader saw the need of individual thinking, and on page 467 of Science and Health she shows how this may be accomplished when she gives the spiritual interpretation of the First Commandment as follows: "The first demand of this Science is, 'Thou shalt have no other gods before me.' This me is Spirit. Therefore the command means this: Thou shalt have no intelligence, no life, no substance, no truth, no love, but that which is spiritual." Christ Jesus also saw the need of individual thinking when he said, "Many shall come in my name, saying, I am Christ; and the time draweth near: go ye not therefore after This also justifies our Leader's rule, already quoted, with reference to the belief in one Christ, Truth.

It must be quite clear to all Christian Scientists that if we wish to know what is right or true we must follow Mrs. Eddy's advice, given on page 129 of Science and Health, where she says, "If you wish to know the spiritual fact, you can discover it by reversing the material fable, be the fable pro or con,-be it in accord with your preconceptions or utterly contrary to them." This will reveal to each one the only right.

A Beatitude

CHARLOTTE WOOLLINGS

WHEN Jesus said, "Blessed are the pure in heart: for they shall see God," he was calling the world to Christian Science, to the understanding of pure metaphysics. As the student of Mrs. Eddy's inspired writings gains even a glimpse of the grandeur and joy of knowing God as ever present good, he begins to see God; and to see or know God is to demonstrate and prove His allness. It is scientifically impossible to think of the flesh or matter as real and God-created and at the same time to be "pure in heart." In reality there is only one consciousness, and that necessarily must be pure and perfect, because it is our Father-Mother God.

Harmonious consciousness is manifest as the law of harmony. Paul's confident assertion to the Romans that "the law of the Spirit of life in Christ Jesus hath made me free from the law of sin and death" is a bulwark of inspiring strength to every student of Christian Science, and as certainly "a stone of stumbling, and a rock of offence" to any one clinging to the belief of mind in matter. Let us, therefore, with willing and joyful humility pray earnestly and unceasingly for that Mind to be in us "which was also in Christ Jesus." No other mind knows anything of true, scientific, Christian healing. There is in reality no mind but the divine Mind. To be pure in heart we must make it our first desire and duty willingly to put away all our educated, intrenched beliefs of a human mind of one's own, in order that we may be able to begin to comprehend the Mind of Christ.

Mortal mind, or the belief that brain controls man, can always be overcome and destroyed by facing courageously all its falsities and wickedness with the steadfast understanding of the real or spiritual man's absolute dominion. And this is indeed our birthright. Let us not sell it for a mess of pottage! These words of Mrs. Eddy on page 192 of "Science and Health with Key to the Scriptures" are most helpful: "The belief that a pulpy substance under the skull is mind is a mockery of intelligence, a mimicry of Mind." It is the One "altogether lovely" who has given man the right and ability to speak with authority to all manner of sin and disease.

Every healing in Christian Science proves that the asserted evidence of physical sense is not true, and must never be accepted as true, otherwise purity of vision is at once clouded and mystified. The aim of every earnest student of Mrs. Eddy's writings is to prove the utter unreality of matter. To do this successfully by healing all manner of disease and sin, one must prayerfully heed these vitally important words of the great Way-shower, "The flesh profiteth nothing." This truth was the basis of all Jesus' healing work. In Science and Health (p. 241) Mrs. Eddy says, "We should strive to reach the Horeb height where God is revealed; and the corner-stone of all spiritual building is purity." The flesh, or the Adam-man, is never anything but a dream of life and intelligence in matter. Can we conceive of Jesus, whose sayings were always, "Verily, verily," calling any God-created thing of no profit? What God made is imperishable and eternal, therefore the only logical conclusion even for one unacquainted with the teachings of Christian Science is that the flesh is not of God. Students of the Bible and Science and Health and the other writings of Mrs. Eddy know that the belief in a material creation is an attempted infringement by the human mind of God's perfect and absolutely pure creation of Spirit.

A mental attitude of full and joyful surrender to Spirit will reflect the truth and love which alone heal the sick. When it is really our chief desire to know the true purity of consciousness, or divine Love, we shall certainly see God, or good, in all the minutiæ of daily living, thus proving the absolute supremacy of Spirit, "who healeth all thy diseases." Let us therefore sing and rejoice that our great Master knew so well the immortality of his words and that he so perfectly demonstrated the truth of the beatitude, "Blessed are the pure in heart: for they shall see God."

Are You Rejoicing?

FRED W. JANVRIN

O the extent that we rejoice in understanding Principle, I we are delivered from the harrowing beliefs of envy, jealousy, resentment, anger, self-pity, and the torment that always accompanies these false concepts of God's creation, as by rejoicing we approach in some degree the true vision of man seen by Jesus, which enabled him and his disciples to heal sickness and sin and raise the dead. What was it but rejoicing when, at Lazarus' tomb, Jesus spoke these wonderful words: "Father, I thank thee that thou hast heard me. And I knew that thou hearest me always," before Lazarus appeared to the material sense of those present? He proved his understanding of the allness and ever presence of God, Life, Truth, Love. We can always rejoice if we are faithful to our Leader's teachings, for we can know at all times, under all conditions, in every place, that God, divine Love. surrounds, sustains, protects, governs, and directs us, and is just as available to us as He was to Jesus when he said, "Lazarus, come forth," and the Bible record states that "he that was dead came forth."

Jesus was enabled to make that demonstration by rejoicing in the understanding that omnipresent God is man's Life and that there is only one place where man can be, and that is with God; only one place to go and that is to God. What problem can we have that will appear more real, or more difficult to demonstrate than raising Lazarus? In the Sermon on the Mount Jesus said: "Blessed are they which are persecuted for righteousness' sake: for their's is the kingdom of heaven. Blessed are ye, when men shall revile you, and persecute you, and shall say all manner of evil against you falsely, for my sake. Rejoice, and be exceeding glad: for great is your reward in heaven."

Mrs. Eddy, closely following Jesus' example, has given us many proofs that she rejoiced at all times, and perhaps nowhere more clearly than in "Mother's Evening Prayer" (Poems, p. 4), which begins:—

O gentle presence, peace and joy and power; O Life divine, that owns each waiting hour, Thou Love that guards the nestling's faltering flight! Keep Thou my child on upward wing tonight.

When we realize the gentle presence of divine Love we are sure to be at peace, and this feeling is one of joy; we are rejoicing, and surely no one can reasonably doubt that one who realizes God's gentle presence, which is always accompanied with peace and joy, is able also to understand the power of divine Principle which heals all manner of sickness and blots out sin.

This realization, which results from a consecrated study of the Bible and Mrs. Eddy's writings, helps us to understand these divinely inspired messages. Jesus made many clear statements for our guidance, and none were more unmistakable than his promise, "Ask, and it shall be given you." And James' statement, "Ye ask, and receive not, be-

RIV

cause ye ask amiss, that ye may consume it upon your lusts," explains why prayer at times appears to be unanswered. There can be no failure, however, if we pray understandingly, not to bring God's standard down to ours but to elevate our desires nearer the divine by declaring: Never mind what I may think I want to gratify pride, selfishness, or physical comfort, "Thy will be done;" and to just the extent that we honestly put away personal sense in our endeavor to measure up to the divine will, do we experience an ever increasing cause for rejoicing.

How well are we doing this? Every problem is to each one a stumblingblock or a stepping-stone to a higher spiritual understanding, and it becomes an individual problem, Which shall it be? If we grumble, criticize, condemn, or in any way attempt to avoid doing our full duty, we make the problem a stumblingblock, but if we accept the problem as another opportunity to prove that God can and does overcome all claims of evil, we shall always find cause for rejoicing.

Many hours have been devoted by me to the study of the poems written by our beloved Leader, and none has received more consideration than "Satisfied" (p. 79), and this has never failed to be a cause for rejoicing. Some part of this poem can be applied in connection with any problem, and if our desire is to know more of God and to follow more closely in the footsteps of the Master, then we prove our claim that we have qualified to be included in Jesus' saying, "If ye continue in my word, then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free." When this is accomplished, it will be unnecessary for any one to ask us, Are you rejoicing? for this fact will be apparent to all who come in contact with us. What is there to fear if we really rejoice?

On page 185 of "The First Church of Christ, Scientist, and Miscellany" Mrs. Eddy gives us great cause for rejoicing in the following statement: "Truth, Life, and Love are formidable, wherever thought, felt, spoken, or written,-in the pulpit, in the court-room, by the wayside, or in our homes. They are the victors never to be vanquished." This clear statement contains no such words as "but," "if," "sometimes," "perhaps." It leaves no room for belief in or fear of the power of animal magnetism, mental malpractice, mortal minds, unfairness, dishonesty, or any other evil. Every student of Christian Science has unlimited cause for rejoicing that our Leader blazed the trail for us so clearly that none may lose the way if faithful. When discouragement attempts to talk to us, we can think that a little over fifty years ago Mrs. Eddy stood alone with God, facing a jeering and abusive world, but how different our condition, thanks to Mrs. Eddy, who, as God's messenger, through her inspired vision, in addition to her writings, established the Christian Science Sunday services, Sunday school, Wednesday evening meetings, Christian Science lectures, the reading rooms, The Christian Science Journal, Sentinel, Monitor, Der Herold der Christian Science, and The Christian Science Quarterly Bible Lessons.

Every word written by Mrs. Eddy and left as a part of her divine mission was inspired and controlled by divine authority. In other words, every word is divinely authorized. Let us rejoice that we have so many ways to gain a clearer understanding of Principle and that we can apply this understanding to our everyday problems, until we can realize the truthfulness of Whittier's statement:—

Henceforth my heart shall sigh no more For olden time and holier shore: God's love and blessing, then and there, Are now and here and everywhere.

Getting Away from Things

E. R. BARAGER

T is sometimes a matter of wonderment that there are so many people who fail to realize how much of their lives is utterly wasted in trying to "get away from things." Men and women who, both in business and social life, are even more than ordinarily successful, still carry with them daily this undefined sense of doubt as to the result of this or that venture, and plans are made that comprehend and provide for a chance to "get away," should certain, or uncertain, contingencies arise. That this unfortunate mental proclivity is not new, the result of environment or development, is plainly apparent, for you will remember that Job, in his extremity, complained, "The thing which I greatly feared is come upon me, and that which I was afraid of is come unto me." The fact of the matter, however, is that this concept of life has no justification in the Scriptures and is wholly without evidence to show that it should have a place in our experience. That the fears of mortal man can have effect upon the real man is absurd, however much those who have not yet attained to that measure of understanding which is their right and inheritance may accept and put their faith in such erroneous belief. The real man is spiritual and, as Mrs. Eddy has said in the Christian Science textbook, "Science and Health with Key to the Scriptures" (p. 276), "Material beliefs and spiritual understanding never mingle. The latter destroys the former."

This idea of material escape also implies the getting away from, or the evading of, responsibility. It does not alone mean that one may put away, or escape from, all thoughts or elements of harm, but it opens, as well, the door through which may be admitted the errors of procrastination, neglect, as the and perhaps willful wrongdoing. To "get away," term is ordinarily used, will never accomplish the destruction of error any more than to flee from material danger will remove the danger. We may, to be sure, put ourselves for a time beyond the immediate influence or effect of some particular error or danger, but the elements of those conditions still remain. Nothing but the rejecting of error and the obliteration of fear from our thought through the unfoldment of divine Love and spiritual understanding will ever really bring us to that point where we can say with Paul, "I have fought a good fight."

The bookkeeper may force a balance in his accounts and delude himself, even for several months, with the thought that the error will not be revealed, but at last the discovery comes, bringing with it humiliation and punishment. So it is with the student of Christian Science who tries, even though it be unwittingly, by evasion or flight to escape from the consequences of error and sin rather than to meet discouragement and doubt fairly and openly upon the broad battle ground of righteousness and Christian endeavor. What, then, is the remedy? Shall we cower helplessly behind the ineffectual barrage of mortal thought and material delusion, or shall we advance step by step to where our every desire, being spiritual and holy, shall have its highest fruition, no matter how simple or how complex it may be? There is no chance for quibbling, no room for doubt, no getting away. In the words of Paul and John, "Now is the accepted time;" and, "Now are we the sons of God." It naturally follows, then, that since we may not avoid the consequences of error, we are entitled to rewards of right thought and Christlike As sorrow and pain inevitably come after disregard of divine law, so do satisfaction and joy follow perfect trust in and complete obedience to infinite Principle.

Editorial

The Oil and the Wine

THE great difficulty with the ordinary commentary on the Book of Revelation is that it will take a material instead of a spiritual view of the meaning of the writer. It is perfectly true that the material view usually taken is one which the commentator would describe as a spiritual view, but it is rather more material than less for this very reason. The church typified by the writer of the book is the church universal, precisely what Mrs. Eddy means when she defines Church, on page 583 of Science and Health, as "The structure of Truth and Love; whatever rests upon and proceeds from divine Principle." For this reason the history of this church is something apart from time, it dwells in the eternal now. Thus the great allegory, with which the Bible closes, is applicable to the conditions of the Christian church of all countries and in all ages. When, therefore, any commentator tries to confine the meaning of the book to a certain epoch or to a particular episode, he reduces the church universal to a local conception of a church, and takes the whole meaning out of the text for the enlightenment and direction of all men in every age.

Thus the episode of the opening of the seals and of the appearance of the horsemen is one the significance of which has been perceived, again and again, by the Christian church fighting its way upward to a clearer perception of Principle. The riders on the red, the black, and the pale horses guided their steeds across Europe in the days of the Reformation and the Thirty Years' War as certainly as they have in the twentieth century; whilst the rider on the white horse has always been in the van, going forth, like the church militant, conquering and to conquer. What is true of the sixteenth century and of the twentieth has been true in all times of acute chemicalization; and what Mrs. Eddy means by chemicalization she has pointed out carefully on page 401 of Science and Health, where she says: "What I term chemicalization is the upheaval produced when immortal Truth is destroying erroneous mortal belief. Mental chemicalization brings sin and sickness to the surface, forcing impurities to pass away, as is the case with a fermenting fluid." At such periods the violence of the chemicalization is in proportion to the dynamic force of the truth realized. It is then that men's passions explode in war; it is then that human hatred finds its expression in famine and pestilence; and it is then that fear makes death seem victor for the moment. Yet all the time the rider on the white horse is in the very van of the fight, and the victory is never in danger for a moment. "Marvels, calamities, and sin will much more abound," Mrs. Eddy writes, on page 223 of Science and Health, "as truth urges upon mortals its resisted claims; but the awful daring of sin destroys sin, and foreshadows the triumph of truth. God will overturn, until 'He come whose right it is.''

It is in the interval between the opening of the third seal and the fourth seal, when the rider on the black horse is already scattering famine broadcast, but before the rider on the pale horse has come with the additional terror of death,

that the writer inserts the remarkable passage, "A measure of wheat for a penny, and three measures of barley for a penny; and see thou hurt not the oil and the wine." The meaning of the passage is, of course, quite simple, and it has come to encourage the Christian church fighting its battle against evil, in a seemingly hopeless minority, in every period of history. The Roman denarius was, of course, not the equivalent of the English penny, nor was the penny of King James the equivalent of the penny of the twentieth century. What the writer was insisting upon, but what the translation scarcely impresses on the reader, was the tremendous scarcity when food was offered to the world at many hundred per cent above its normal cost. The prices, in short, were virtually famine prices, since famine, on his black horse, was abroad in the land. And yet immediately following this announcement comes the command that the oil and the wine, the oil of gladness and consecration, and the wine of inspiration, the food of the church, are not to be hurt.

No matter how terrible the conditions about it, the Church, "the structure of Truth and Love," will remain unaffected. While the great majority, relying on its strength to overwhelm the little minority, was rushing upon its doom, the minority, the oil and the wine, was to remain unharmed. "On one side," as Mrs. Eddy says, on page 96 of Science and Health, "there will be discord and dismay; on the other side there will be Science and peace." This is the record of every chemicalization the world has ever seen. It was so in the days of the fiery furnace of Nebuchadnezzar, and of the den of lions of Darius, and it has been so ever since when men have trusted to Principle instead of to policy, to Truth instead of to lies, and have not halted between two opinions. War, famine and pestilence, and death, are only phases of the belief in material appetites and passions, which are stirred into violent commotion whenever truth is spoken with sufficient incisiveness and understanding to threaten the existence of these appetites and passions. The true church is the understanding of Principle which rouses error into moral chemicalization, and so causes it to pass away in destruction, and not, as the writer of Revelation very well knew, the human beings who crowded into the church in Sardis, but who nevertheless had defiled their garments, nor those who in the church at Laodicea were so wise and politic that they were neither hot nor cold, nor those who held to the doctrine of Balaam in the church at Pergamos. In other words, the oil and the wine were not those who attended the church and who, while seeming to be living, were really spiritually dead. but those who understood Truth, and lived in obedience to Truth sufficiently to be able to demonstrate Truth.

The great barrier to the acceptance of Truth is always fear and sensuality, fear in the shape of pure physical timidity, and sensuality in the unwillingness to break away from convention and all that convention means. The majority remains a majority just so long as this fear and sensuality combine to keep mankind from thinking for themselves, and then rising to the courage of their conviction, for it must be remembered that the church has always been a very slender minority in the world. To keep the world from thinking for itself, such instruments as the "index" have been established, and to chain the world with its own sensuality everything has been done to induce it to make what are termed its human footsteps the size of Gargantua's. Ultimately, of course, physical fear itself is seen as a phase of sensuality, so that eventually the struggle narrows down, as always, to the perpetual conflict between the lusts of the flesh and the fruits of the Spirit. Out of this comes the necessity, so insistently dwelt on by Mrs. Eddy, for realizing the powerlessness of

evil and the nothingness of matter, through an abiding sense of the allness of Principle. It was the necessity for this which Jesus made so clear to Nicodemus, when the Pharisee came to him, by night, in Jerusalem. It is the distinction drawn in the two stories of creation with which the Bible opens, and it is continued down to the closing words of the Book of Revelation. And in all that period the oil and the wine have never been hurt.

FREDERICK DIXON.

The Unlimited Idea

People sometimes seem afraid to give up their limitations for the unlimited truth. Their main fear is that they will lose something. Christian Science, however, takes nothing real away from any one, but always gives the fullness of true good. Actual good is divine Principle expressed. It is infinite in vigor and variety, for it proceeds from infinite Mind. Once a man perceives this, he cannot be afraid of it nor be reluctant to accept it as the only experience to be desired. The goodness which consists in manifesting Principle is not a drab and dreary existence of repressed activity. To be genuinely good, living must be glad with the spiritual animation of the divine consciousness. The real vitality is controlled in perfect order by one intelligence. This is the unlimited

Christian Science shows that immortality, which is the only real living now and always, is entirely spiritual. Immortal man lives as idea in the divine Mind, altogether untouched by any dream of materiality. If a man will but stop to think what is most worth while, he must recognize that it is divine intelligence itself, which is far more than human intellect. The quality of intelligence is what constitutes spirituality. Existence as idea manifesting intelligence is not illusive or visionary. Idea is the reality of living. Idea is wholly spiritual and quite unlike any human concepts. The unlimited is necessarily altogether different from a limited mortal sense of things, even though mortal belief in all its aspects counterfeits the truth. Immortal idea, in order to be unlimited, must be the unified expression of infinite Mind. This unified idea is what must replace any supposition of discord, whether physical, moral, or of any other sort. The divine Mind, being infinite, must be spiritually expressed in just the right way to give the true idea in place of any seeming human conditions whatever.

This reasoning is fundamental in Christian Science. Yet it need not be stated in just these words, for the proper statement and interpretation of the truth are boundless. When one turns to the truth and finds that it heals the inharmony from which he has seemed to be suffering, he is not concerned mainly with words. He need not, however, be afraid of any words that may be used to express the truth. The practice of Christian Science is entirely unlike speculative philosophy. The understanding that divine Principle governs man and maintains joyous order is the knowing of divine Love. This understanding is tangible, practical, and energetic. It actually heals. All sorts of words, both short and long, simple or conveying careful distinctions, may be used for the explanation of the healing truth. The basis of the explanation must be so plain that even a child can grasp it and use it. One divine Mind, Principle, or Love, is the sole cause and causes only good. This is the fact which all must sooner or later accept and prove for themselves.

To give the name "idea" to the goodness caused by the one Mind is a way of making the explanation clear to the one who wishes actually to reason out the truth for himself. Idea is the boundless activity which the divine Mind knows.

It is the conscious experience of Life, not vague nor abstract but spiritually definite and complete. Any one's human interpretation of the divine idea, however, is by no means all there is to the spiritual manifestation of divine Love. The true activity cannot be humanly outlined. It is to be experienced without limit. It is the living truth which, with all the vigor and loving-kindness of Principle, replaces human beliefs with the unlimited reality.

On page 160 of "The First Church of Christ, Scientist, and Miscellany," Mrs. Eddy says: "Most of us willingly accept dead truisms which can be buried at will; but a live truth, even though it be a sapling within rich soil and with blossoms on its branches, frightens people. The trenchant truth that cuts its way through iron and sod, most men avoid until compelled to glance at it. Then they open their hearts to it for actual being, health, holiness, and immortality." People who have seemed afraid to consider the absolute Principle of Christian Science will find, as they put aside their prejudices and their fears, that it is the fulfillment of all their real hopes and desires. The unlimited idea of Truth is, indeed, the remedy for all human limitations.

When one considers the infinity of Principle and its application to all living, the task of demonstrating this infinity may seem tremendous. Yet the fact is that the spiritual idea, harmonious activity, has been and is throughout eternity the only real manifestation, in spite of mortal illusions. Many in all times have caught glimpses of this truth, and each glimpse has meant just so much freedom from the supposedly confining concept of matter as reality. Meanwhile, the true man has ever remained unconfined, as immortal idea, untouched by the delusion of matter. As Mrs. Eddy writes on page 323 of Science and Health, "Beholding the infinite tasks of truth, we pause,-wait on God. Then we push onward, until boundless thought walks enraptured, and conception unconfined is winged to reach the divine glory."

The work for students of Christian Science is always to "push onward" together in the proving of the truth that one infinite Mind infinitely manifest is the only reality. There is one true aim, one true motive, one true purpose. The way for the achievement of the one right desire is not filled with human suspicion, fear, or dismay. The Christ, to-day as always, is one unlimited idea, replacing every mortal sense of things with right activity. To the Christ we all have to open our hearts for "actual being, health, holiness, and immortality." As we do so, we follow the appeal of Paul to the Ephesians, "Let all bitterness, and wrath, and anger, and clamour, and evil speaking, be put away from you, with all malice," for the true Love expressed casts out all fear.

GUSTAVUS S. PAINE.

[Written for the Sentinel]

I Thank Thee

JOHN HOWARD RUSSELL

I THANK Thee, Father-Mother God: I know Thou always hearest me. All praise to Thee, for Thine the power, The glory, and the majesty.

When I resigned what mortal sense Proclaimed was pleasant, I began To know the joy of seeing Thee; To learn the truth of Love's pure man.

What I know of Thee, O God, Is all that's real, or true, of me. Earth's shadows slowly melt away Before my consciousness of Thee.

Testimonies of Healing

About five years ago my son was thrown from a motor truck, falling face downward on the track some fifteen or twenty feet away, and was seriously injured. The right side of his face struck the rail with such force that the upper jaw was crushed and the lower jaw was broken in two places. His shoulder, hand, arm, and foot were also injured. They brought him home, saying he would last only a few hours. The First Reader of our little church worked for him until the railroad company, for which he worked, sent him to a hospital in another town, where we engaged a practitioner.

I went to the hospital and nursed my son from early morning until late in the evening, knowing that God is all Life, Truth, and Love. While he seemed to understand all I said to him, he could not remember anything until the following Friday afternoon, and then for nearly three weeks he was rational only at intervals. No one gave us any hope for his recovery, but our faith in God did not waver. Nine days from the time he was injured the doctors set his jaws and put his head in a cast, the upper jaw being so badly crushed they feared it would never knit, and still gave us no hope for his recovery. We are so thankful to God that he lived and suffered none of the many ills which were predicted for him. The hospital records show that he took no medicine, had no fever, and slept well. He did not suffer pain at any time, at which the attendants expressed surprise. When I told them we were Christian Scientists they seemed to understand and were encouraging. The surgeon who did the surgical work was a kind, good man, but God healed the boy, and the cast could have been removed in a short time, but we were willing to obey the doctor's orders, although my son could use his jaws in two weeks from the time the cast was put on. He has his sight, is clear mentally, and is not disfigured, although it was said the opposite would be the result.

About four months afterwards he moved his little family to another state and began work for an express company. No one expected him to be able to work for at least a year. Words cannot express what this wonderful manifestation of God's love meant to us, as well as other beautiful demonstrations which we have experienced.

My daughter's little girl, not two years old, was taken sick quite suddenly and seemed to lose the use of her body from her waist down and could not sit up. She seemed to be in great pain and her temperature was very high. With the help of a Christian Scientist she was able to walk at the end of a week and by the following Sunday she was well. My life was not worth living before I found the truth as taught in Christian Science. I thank God for the peace it has brought and for the strength it gives us to meet every problem.

(Mrs.) Anna Muthart Baker, Fairview, Oklahoma.

 \boldsymbol{I} am happy to affirm the attached statement, as \boldsymbol{I} am the person referred to.

WILLIAM C. BAKER, Omaha, Nebraska.

4

It is five years since I took up the study of Christian Science, not for physical healing, but through the recommendation of a friend. After studying "Science and Health with Key to the Scriptures" by Mrs. Eddy for a few months I caught the first gleam of truth, which made me very happy. I had read the Bible since childhood, but did not comprehend the spiritual meaning of it. I watched the progress of the wonderful healings of two friends which proved to me that the teachings of Christ Jesus were not lost and that what I read in Science and Health could really be demonstrated,

which seemed the greatest wonder of all, as I did not know anything of the great works of Christian Science.

After studying for some time I was seized with a severe attack of heart trouble, from which I had suffered for some years, and I had been told by a physician that it could not be cured. The attack was so severe that I could not move or make any sound, and my body seemed to get stiff. After overcoming the great fear which came over me I repeated the "scientific statement of being" (Science and Health, p. 468) and after what seemed a long time I was able to move again. I went to the telephone and called for the help of a practitioner. On returning to bed I slept the rest of the night, and after six treatments I was entirely cured of the condition which I had been told was incurable. I thank God for this and many other healings, both for myself and my son, who has the privilege of attending the Christian Science Sunday school, which is a great blessing. I am also grateful for the harmony in my home life, and for the many proofs I have had that God is the source of supply, for many of my needs have been met through complete reliance on Him.

I thank God for Christian Science, and I am grateful to Mary Baker Eddy, our revered Leader, whose life work is blessing humanity. I am also grateful for the loving help of a practitioner.

MRS. A. E. BARDELLI, New York City, New York.

4

I have often felt that I ought to make more widely known the first physical healing which we had in our home through Christian Science. When about four years old our little boy sustained a fractured skull. I had not long known of Christian Science and thought this would be a splendid opportunity for testing it, and it was proved to be indeed the same truth our Master practiced.

Half an hour after the practitioner was asked to take his case, the suffering ceased entirely, and the wound disappeared within twenty-four hours. The doctor who had been called was very much surprised to find the boy dressed and playing the morning following the accident, and the next morning he examined the skull very carefully and said the diagnosis had been correct, the child had had a compound fracture of the skull, and it was then healed, and he also said it had no business to heal so quickly, and if the child showed certain symptoms he must be notified immediately; but there were no after effects. Nine years have elapsed since this healing and the boy is exceptionally alert and intelligent. We shall always remember the relief from fear which we experienced on this occasion.

In "Science and Health with Key to the Scriptures" (p. 494) Mrs. Eddy says, "It is not well to imagine that Jesus demonstrated the divine power to heal only for a select number or for a limited period of time, since to all mankind and in every hour, divine Love supplies all good." We are very grateful for the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, for help received through the testimonies in the Christian Science Sentinel and Journal, and for the patience and love shown to us by Christian Scientists on many occasions.

THOMAS BROWN, Eccles, Lancashire, England.

4

Inspired by a deep sense of gratitude for many and varied benefits received, first through the acceptance of Christian Science and later through the study and application of the truth gleaned, I am writing this testimony. In this way, I am in some measure paying a debt I owe to Christian Science, expressed by two living testimonies of

*

physical healing that came to my attention. Though inclined to disbelieve current rumors of Christian Science healing, these two cases were proved works.

Several years later, following a series of difficult situations in the school in which I held a responsible position, I found my usual recourse to will power of no avail, when the long nervous strain began to make inroads on my health. I made every human effort to win in this, as I had in other school situations, but instead there was a rapid decline that put me and my will power in complete bondage to what materia medica terms multiple neuritis. After many months of suffering, in a hospital, I was given no hope of complete recovery and the best offered was a wheel chair experience, with no active work whatever. The hours that followed this sentence were so dark and storm tossed that the proverbial drowning man clutching at a straw seemed again to be exemplified. This straw came as a sweet memory of a friend who had been healed through Christian Science of tuberculosis of the spine after seven years in bed; then of another friend who had been released from perforation of the bowels, both of whom I knew to be well and about their Father's business.

My trouble seemed slight in comparison with theirs, and Mind again spoke, when these words came to me, "God is no respecter of persons." That included me. Such a wonderful sense of peace seemed to envelop me that I knew the straw had become a raft and with that wonderful sense of peace I was being guided by the Christ, Truth, into the haven of health. Through the study of Christian Science, this sense of peace was enlarged, and though the way at times seemed hard, God provided the means whereby I was uplifted spiritually when I seemed to need it most. Needless to say my recovery was rapid, enabling me to leave the hospital in one month, fully dressed, and to walk to the carriage that took me back to the school which I had left so many months before. Christian Science became a daily study, and with the loving help of the one Christian Scientist in the school, I was enabled to resume my work in two weeks after my return, completing that year satisfactorily and teaching for seven years afterwards without loss of an hour from duty on account of sickness. I am grateful for the two loving friends who were such true expressions of the power of Truth that I was forced to know, and I am grateful for the experience that brought that knowledge into fruition. I am deeply grateful for class instruction, which has cleared away many false concepts and for the knowledge that I am being guided lovingly, safely, and surely into a complete realization of harmony .- (Miss) Bonnie Bunnelle, Pasadena, California.

The unfoldment of good through the study of Christian Science, both as to better morals and better health, has indeed been a source of great blessing to me. I found that as I became more conscious of the government of divine Mind I had a much clearer thought as to decision for right action, and unconsciously the physical disorders, which included indigestion and constipation, a yearly attack of grip, and frequent severe colds, vanished. For all these blessings I am deeply grateful. The overcoming of extreme sensitiveness as to the attitude of others toward me is a source of joy. Then, too, the added courage and joy resulting from the study of the truth found in the Bible together with the writings of Mrs. Eddy, the revelator of the truth to this age, and the Christian Science literature have been cause for continual thankfulness.

I am indeed thankful to God for His wondrous works to

the children of men, and as man demonstrates the allness of God by overcoming seeming obstructions, dominion is his, and he becomes harmonious and is a more useful citizen, a more valued friend, a wiser counselor, and a more loving neighbor. I trust that this little message of gratitude may encourage others who are looking for spiritual light on life's journey.—(Mrs.) Helen R. Carpenter, Cleveland, Ohio.

My attention was first called to Christian Science when my wife and daughter received benefit from it. Although I did not object to their studying it, I thought there was nothing in it for me, and did not read any of the literature. About two years later, however, man's extremity was indeed proved to be God's opportunity. I was seized with a violent attack of rheumatism. The pain was almost unbearable and at times I could scarcely move. After applying many material remedies, but to no avail, divine Love led me to Christian Science. I wished to read and, not being able to move far enough to get anything else, picked up a copy of the Scatinel, which was within reach. After reading the testimonies of healing I felt that there must be something in Christian Science worth seeking and began to read "Science and Health with Key to the Scriptures" by Mary Baker Eddy. I read and read, I do not know how long, but before I had finished the book I was up and walking, free from pain and without the need of material support. This was over three years ago, and although I had been subject to rheumatism for a number of years, the healing has been permanent.

I have read Science and Health through several times, and have been freed from bowel trouble, headaches, and boils. Last summer, with the aid of a practitioner I was healed in a short time of serious injury resulting from a fall. I enjoy reading the Bible and all the Christian Science literature. We study the Lesson-Sermon daily in our home and attend Christian Science services. I am very thankful for all these privileges and for the many blessings received.

JONATHAN O. EASTMAN, Owatonna, Minnesota.

While suffering from nervous prostration my mother persuaded me to have Christian Science treatment. I had no faith in it at the time, but doctors had said they could do no more for me, so I decided that Christian Science would at least do no harm. The night following the first treatment. I slept well, the first natural sleep I had had for a long time. This encouraged me to keep on. In two days the nurse was allowed to go. The healing was slow, but I am thankful even for that, as it gave me an opportunity to study and learn more of the truth. The final struggle came last year. It was met and conquered through the loving work of a practitioner. I have resumed teaching, although it had been said that I would never be able to teach again. Christian Science is an ever present help in solving the problems of the schoolroom. Many times just what is needed, especially in history, geography, and current events, is found in The Christian Science Monitor.

Before studying Christian Science I spent many sleepless nights and weary days each summer on account of hay fever. It usually began in June and lasted until late in the fall. Last year I had but the slightest touch of it on one or two days. A periodic cough has disappeared and other discordant conditions, including catarrh, abscesses, headaches, and the tendency to take cold easily, are being overcome by an understanding of the truth which makes man free. Two years ago I was healed of influenza. The fever left almost instantly through the application of Christian Science. Al-

等 不通出的 在 然 三 在 初

though the statement had been made that the fever would be high the next day, there was none whatever.

I have also witnessed many other healings, including that of sprained ankle, severe stomach trouble, boils, warts, burns, and croup. Glasses have been laid aside after being worn for eight years. I am very thankful for all the physical healings, but more so for the spiritual uplift and the better understanding of the Bible gained through the study of the Lesson-Sermons. I am thankful for all the Christian Science literature, the reading rooms, lectures, and practitioners, and especially to our Leader, who worked so faithfully to give to mankind an understanding of this beautiful new-old religion.

(Miss) ELIZABETH M. EASTMAN.

I wish to verify the testimonies of my husband and my daughter. Both were healed as stated. Christian Science has indeed been a great blessing to us. We have all been helped in many ways, not only physically and mentally, but spiritually, as well as morally and financially, proving that "Divine Love always has met and always will meet every human need" (Science and Health, p. 494). We are thankful that we are members of The Mother Church and of a Christian Science society and are glad to do all we can to help others who may be as greatly in need of the truth. I am very thankful for all the good that has come to us through Christian Science.—(Mrs.) Anna C. Eastman.

"Man's extremity is God's opportunity." The extremity did indeed seem great, but God is even greater. Some seven years ago, when all medical treatment proved in vain and I was nearly desperate, a friend told me of Christian Science, of which I had never before heard. This was the only way left for me, as I had for three years sought relief from physicians and had submitted to an operation, but my condition became constantly worse. Late one night my husband went to a neighboring city to look up a practitioner, for I desired to give Christian Science a trial. He had, however, firmly decided to consult a noted physician, but was unable to see him that night, and was very downcast. He prayed silently to God, asking Him for guidance, and then looked up a practitioner whose address he had. He still frequently mentions the wonderful sense of freedom which he received after his first visit. He was so filled with hope and faith in God. The practitioner consented to treat me, and when my husband returned home late that night he found me asleep, something which had not occurred for many a night. In a short time I was healed of a trouble which the physicians had pronounced incurable. After having worn glasses, prescribed by a specialist, for three years, I was able to lay them aside and I am now able to do the finest work without them and am indeed grateful for this. Some years later I was healed of a severe case of blood poisoning. In the family we have experienced the healing of grip, measles, pneumonia, and asthma. Part of a finger which had been torn off adhered again, and with the help of a practitioner the fear of its resulting in a stiffened joint was overcome. The finger is normal and one is unable to tell which finger was injured.

One morning I was unable to use the right arm as usual, and required help in dressing. I endeavored to apply my understanding of Christian Science, but experienced excruciating pain. As it was imperative that I should go to the village, the children helped me to dress. I recalled and pondered the countless proofs of divine power which we had demonstrated during the past few years in this new-old religion, and completely forgot self and the symptoms of lameness. On the way home I was able to use my right hand and

was completely freed from pain. I was filled with a deep sense of gratitude for having found in Christian Science a God who verily heals all the ills to which the flesh is heir. As stated in "Science and Health with Key to the Scriptures" by Mary Baker Eddy, in the chapter entitled, "Prayer" (p. 3), "Gratitude is much more than a verbal expression of thanks."

No one who has not himself passed through a similar experience can realize my deep sense of gratitude to our Leader, Mrs. Eddy. When I commenced reading the periodicals I thought I hated the noble woman, although I had never seen her, and felt a great repugnance toward her name. To-day, however, I am unable to find words to express my love to this splendid woman, who revealed to us the Christ, through her tireless work for humanity. I thank God and all those who stood by us in these dreary hours, and daily think of the sunshine that has come into our home, and am daily endeavoring to live a life of deeds, not words.

(Mrs.) IDA ZAHLER, Antwerp, New York.

I herewith corroborate my wife's statements. All the blessings which have come to us through the application of Christian Science cannot be enumerated here. They have been many, and I wish to mention that I was freed from the smoke and drink habits, as well as of the use of profane language. Since our acquaintance with Christian Science no medicine has been used in our family of four children. Words are inadequate to express our gratitude. "If such are the present fruits, what will the harvest be, when this Science is more generally understood?" (Science and Health, p. 348).

Gottleb Zahler.

I wish to express my thankfulness to God and gratitude to Mrs. Eddy and to those who have so lovingly helped me in Christian Science. I have studied Christian Science since I was a very small child, and I have had many beautiful demonstrations and proofs of the divine Mind to heal all manner of diseases. At one time my hands were covered with warts, which were very annoying. This condition was beautifully healed through Christian Science. While I was away at school last year, homesickness was met by the realization that my home is in Mind, God, and God is ever present Love. I am gaining more each day in the right direction, and as each claim of a power apart from God is met, I am more grateful than words can express.

I am very grateful for all the Christian Science literature. I am also grateful for the loving thought which constantly surrounds me, and for the realization of the power and ever presence of divine Love.—(Miss) CARRIE ELIZABETH FRANKLIN, Denver, Colorado.

Christian Science has brought to me great blessings both physical and spiritual, and I am indeed thankful to God and grateful to Mrs. Eddy, who again revealed the truth to a needy world.

A few years ago I had a very serious attack of iritis. I had a practitioner treat me and I was healed, my eyes being as strong as before having the trouble, although the case was considered very serious. At the same time I was entirely healed of constipation, from which I had suffered all my life, and I am most grateful to the practitioner who has so patiently and lovingly helped me through so many seeming trials. Love does supply our every need. My daily prayer is that I may gain a better understanding of this wonderful truth and so live as to be worthy to be called a Christian Scientist.—(Mrs.) E. A. Fogg, Manchester, New Hampshire.

Signs of the Times

["Friends"-The Christian Science Monitor, Boston, U.S.A., Feb. 15, 1921]

If there is any one thing that has been a greater conundrum than all others in the general worldly experience of men it is this: "What is a friend?" Philosophers, sages, poets, and theologians have all busied themselves trying to solve this now-you-have-it-and-now-you-don't idea of the friendship of men, but they have made human friendship no more substantial nor true friendship more visible. Any individual who wonders at the vastness of this subject which has monopolized much time since time began, needs only to turn the light within and see if he is really immune from dependence upon earthly friends or if he has simply failed to recognize his subtle leaning and weakness in this direction. It is a point well worth uncovering and handling for all time.

There is the truth about friendship just as there is about everything else and the truth about anything is as stable, as real and eternal as Truth itself; consequently there can be nothing elusive, fickle, or unsubstantial about true friendship; it exists whenever and wherever Truth exists, now and always, here and everywhere. Does earthly friendship measure up to this standard? Then what friendship does? Truth is a synonym for God, Life, Love,—and, as necessarily as effect follows cause, so everything true is a direct reflection of God, Life, and Love. The truth about anything is the spiritual fact in divine Mind. Then who dares to refer to true friendship as less than something immortal, ever present, and divinely inherited? Napoleon must have had some conception of this when he said, "A faithful friend is the true image of the Deity."

Broken in health from a sense standpoint, financially embarrassed, separated from family, business, or churchmen have been known under all of these human experiences humbly to proclaim the healing balm of friends' compassion, clinging at these times above all others to the undependable comfort of the claim to earthly friends. Sympathetic unity of thought is what they seem to want, -some one who is in sympathy with their troubles, their views,-some one who thinks as they do, who agrees with them, and they claim to find solace in banding themselves together with the faithful friends, finding, as they believe, warmth and protection by the contact of their seemingly harmonious views; in the final analysis, simply the human insistence on having a support that can be seen with the eyes, heard with the ears, and felt with the hands. If they but knew that from their plane of shallow dependence, it is but the distance of a changed viewpoint to the protecting and satisfying realm of Truth's kingdom, they would then rest serenely in the knowledge of the presence of the power of Love, of God, the omnipotence of the only real friendship, and the consequent inactivity or nothingness of all seeming opponents. True friendship is the indissoluble, satisfying substance of God's being expressed eternally,—the ever present and supporting influence of the only real and everlasting Love. Every right idea, every compassionate thought, every kind deed and helping smile or remark is proof of the presence of those qualities which are true friends of man, and every one is a clear example of God expressed.

A man can no more be deprived of his friends than he can be of any other quality of God's being. True friends are not personal, and numbers mean nothing if you are counting friends as two-legged material objects with family names. Mary Baker Eddy, the Discoverer and Founder of Christian Science, says in the textbook, "Science and Health with Key to the Scriptures" (p. 248): "Love never loses sight of love-

liness. Its halo rests upon its object. One marvels that a friend can ever seem less than beautiful." To the degree that we see in our earthly associates only the qualities of good, images of God, to this extent, and only to this extent, are we demonstrating our knowledge of real friendship, and as long as we hold such thoughts of men we will never relinquish our claim to their friendship, regardless of their attitude or actions toward us. Friendship is immortal, and a man's temporal relinquishment of it is a human dishonoring of God in that it is a charge that God's ideas can express aught else than Love and be unfit for association with each other.

Friendship is the undaunted recognition of good, the good that man knows to exist regardless of what lips say or hands do. No man can make a reality of evil in another without admitting the same in himself. Men subscribe to evil's claims whenever they believe evil to be real any time or anywhere, and a right idea of true friendship totally precludes the possibility of such a course, directing as it does every thought to the contemplation of Love's constant reflection. The test of a man's conception of genuine friendship lies in his ability to prove his complete contentment and satisfaction in present communion with God, good—his desires for holiness and naught else; his willingness to bear, if it should be necessary, even persecution; and his appreciation of the sweet and tangible reward, his consciousness of Truth's encircling arm upholding him in all his ways.

Mrs. Eddy asks on page 266 of Science and Health: "Would existence without personal friends be to you a blank? Then the time will come when you will be solitary, left without sympathy; but this seeming vacuum is already filled with divine Love. When this hour of development comes, even if you cling to a sense of personal joys, spiritual Love will force you to accept what best promotes your growth. Friends will betray and enemies will slander, until the lesson is sufficient to exalt you; for 'man's extremity is God's opportunity.' The author has experienced the foregoing prophecy and its blessings. Thus He teaches mortals to lay down their fleshliness and gain spirituality. This is done through self-abnegation. Universal Love is the divine way in Christian Science." "Universal Love" is as wide in its scope as eternity, and when you stop to think that the problems confronting the world to-day are not the specific problems of this day and generation but of eternity, then and only then does the impersonality appear and the outline of their seeming reality disappear. With this new vision man will struggle less for the touch of an earthly friend's hand and turn more and more to the "still small voice" which really comforts, directs, and surrounds us with the warmth of God's care and dominion. A true concept of friendship heals, and heals instantaneously, banishing every iota of belief in the claims of evil and manifesting only the perfect, the good, and the true.

[From an Editorial in The Buffalo (New York) Times]

Recognized prominently as among the powerful, respected, and meritorious parts of our national life is the membership of the Christian Science churches. Whether we agree with them or not, we all realize that they form one of the finest and purest elements in our civic as well as in our religious activities.

[From Santa Ana (California) Bulletin]

We hold no brief for the Christian Scientists, and we may not believe all of their teachings, and yet there is no disguising the fact that they are growing at a wonderful rate in our country, and many of the best people of the orthodox churches are joining them. When the people of our city are turned away from a Christian Science lecture in one of our largest auditoriums, there is every evidence that Christian Science is growing.

[William T. Ellis in The Saturday Evening Post]

There never before was a greater interest in religion in America than to-day-or a smaller interest in the churches. This is the paradox of our times. Church attendance is confessedly on the decline everywhere. Nevertheless, let any man arise professing to have a message concerning things eternal and no auditorium is big enough to hold the multitudes that throng to hear him. Theater meetings of unorthodox preachers get crowds, while neighboring churches remain empty. Divine healers draw multitudes and provoke discussion. Unconventional books upon religion are bought avidly. Newspaper and magazine articles dealing with the churches and spiritual topics secure a continuing attention. . . . Novelists who know little of theology or of historic religion find readers responsive to even the superficial treatment of the perpetual question of man's relation to the unseen and the eternal. Statesmen, soldiers, business men, economists, editors, and publicists of every sort, from the Sultan of Turkey to Herbert Hoover, are insisting that only religion can untangle our times. . .

Recently I was riding through Virginia, and on the Pullman I found two men deep in a discussion of the possibility of the church's rising to the present emergency, since they agreed that nothing short of religion can effect the profound changes needed to stabilize the present social order of the world. I was admitted to the conversation, and learned that the men, chance met fellow travelers, were not churchmen, but that one was a physician and the other a banker. Their talk was not idle, superficial criticism of religion or the churches, but the thoughtful, reverent, spacious consideration of a grave topic by intelligent men. They were representative of the highest type of democracy. . . . A short time before this incident I had been sitting, at an annual trade dinner, between two business men who are nationally known for their products. In the course of the evening both of these men, who have no identity as churchmen-at least not beyond their possible local church affiliations-opened up to me separately upon the subject of religion. They had what the Quakers call a "concern" for the world's present condition, and a clear perception of the relation of religion thereto. . . . Humanity cannot be driven to church; it can only be drawn there. So deep and ineradicable is the spiritual questing of the race that it delights to be attracted to living expressions of faith. Do the churches themselves realize how alluring is the priceless treasure they possess? Or do they discern the present eagerness after spiritual satisfaction?

[Sir John Foster Fraser, British Journalist, After Visiting the United States, Gives His Impression as to Prohibition—From The Pioneer]

Sir John Foster Fraser, who is described by Lord Burnham as "one of the most distinguished and widely traveled journalists of to-day, who always holds the highest standards of honor and veracity," addressed the members of the English Speaking Union in Æolian Hall, London, on October 21 last. Touching on his observation of prohibition in the United States, he said: "I am not a rabid, bigoted teetotaler. When I went over the United States in 1918 I found, of course, that some states had been dry for a number of years, while others were wet. Personally I preferred the wet states. When I went back last year, the whole of America was going dry. Of course, there were damp spots, especially in New

York, and I rather gravitated to where there was less aridity than in other regions. I went on a four months' tour in the Middle West, and found nothing but dry states. I did not like it. I did not like cold water with my meals, but I had to get used to drinking cold water. . . . I was not happy when I had to drink near beer, grape juice, root beer, or other concoctions. But the curious thing is that ultimately I began to like them. I began to feel better in health. I began to get rid of pessimism and take an optimistic view of life. I believe my figure improved. Yet there were times when I felt I would be glad to get home and have a real drink. Last year I was invited by a friend to go back to New York and spend Christmas with him. When I arrived the first thing he said was, 'Fraser, what will you have?' 'Whisky,' I said; but when I started to drink it I did not like it.

"Whilst I was over there I found there was very much interest in the prohibition question. They talk more about prohibition than about the League of Nations. I found in the states where they were dry there was a lot of contentment. In the industrial districts, whilst of course there was a great deal of objection, people were getting used to going without liquor. Manufacturers told me that the men were working better. I talked to many workingmen; they resented being deprived of their liberty, they thought they ought to be allowed to decide for themselves. Then they generally added something like this: 'Well, we have got used to it by now, and if we had to vote again, I would vote that we remain dry.' . . . Many Americans who live in New York, Boston, and other big cities will tell you that America does not like what is taking place. They are referring to the class whom they mix with. They say America is going back to light wines and light beer. I may be wrong, I am not a prejudiced teetotaler, but I wandered all over the country from the Atlantic to the Pacific, and from the Canadian border down to the Mexican, and the conclusion I came to was that, right or wrong, America has become dry and she is going to remain dry.

"Again and again, wandering about the country, not only in agricultural districts, but in the industrial districts, I saw how healthy the people looked, how well the men, and particularly the women, carried themselves, how bonny the children were. . . . I have not been particularly happy since I have been back."

Church Notices

Admission to Membership in The Mother Church

The next admission of candidates will take place on June 3, 1921, as provided in Article XIII, Section 2, of the By-laws of The Mother Church. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Friday, May 20, 1921. Consideration of any applications received after that date will be deferred until the November 4, 1921, admission.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to November 5, 1920, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

Charles E. Jarvis, Clerk,

236 Huntington Avenue, Back Bay, Boston 17; Mass.

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to Edward L. Ripley, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society-

Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in *The Christian Science Monitor*, were run off at the time of their publication in the *Monitor*.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 8½" x 10¾". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for *The Christian Science Monitor*, *Journal*, *Scntinel*, *Quarterly*, and *Heralds*, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and immediate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming: Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlet in Russian

There is now on sale a new Russian translation of "Christian Science: Its Advantage to Mankind" by Edward A. Kimball, with alternate pages in English. Price 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind ' In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U. S. A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S. A.

♦ ♦ ♦ Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U.S.A.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder

of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large Type (18-point) on Warren's heavy India Bible paper, bound in leather. Size 8 by 1034 inches. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

German Translation. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

111 12

The People's Idea of God. A sermon delivered in Boston.

Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

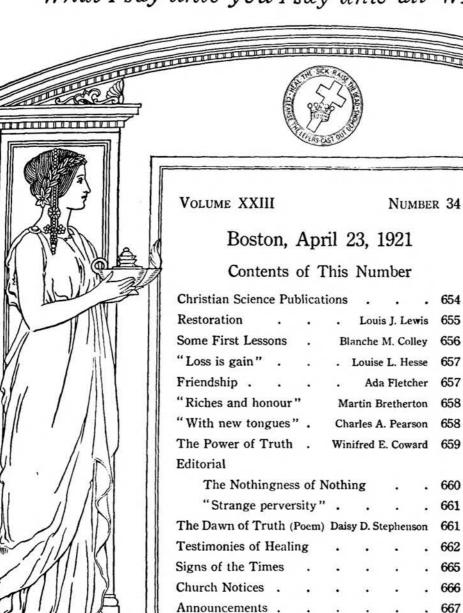

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY ·BOSTON · U·S·A·

Works on Christian Science by Mary Baker Eddy

A-LADY-WITH-A-LAMP-SHALL STAND IN THE GREAT HISTORY OF THE LAND

Christian Science Literature

"Science and Health with Key to the Scriptures" and all other published writings of Mary Baker Eddy are listed on the outside back cover page of this Sentinel.

Christian Science Sentinel

Established, 1808, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. Subscription price, payable in advance, postpaid, to all countries. One year, \$3.00; six months, \$1.50; three months are required countries. three months, 75 cents; single copy, 7 cents.

The Christian Science Journal

Founded, 1883, by Mary Baker Eddy. This monthly magazine is an official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, Contains articles, editorials, and testimonies of healing, a directory of Christian Science Churches, Societies, and Reading Rooms; also in the January, April, July, and October issues a fist of Christian Science Practitioners and Nurses, Subscription prices preside in editorial contents. Subscription price, payable in advance, postpaid to all countries: One year, \$3.00; six months, \$1.50; three months, 75 cents; single copy, 30 cents.

The Christian Science Quarterly

Founded, 1890, by Mary Baker Eddy. Published January, April, July, and October. Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size. Subscription price, payable in advance, postpaid, to all countries: One year, \$1.00; single copy, 25 cents.

The Christian Science Monitor

An International Daily Newspaper. Founded, 1908, by Mary Baker Eddy. Daily, except Sundays. Its own world-wide news service is supplemented by the service of the Associated Press and of the United Press Association. Complete in its departments; unique in its Home Forum page. Full page of editorials dealing truthfully and fearlessly with vital questions of the day. Subscription price, payable in advance, postpaid to all countries: One year. \$9.00; six months, \$4.50; three months, \$2.25; one month, 75 cents; single cony. 5 cents. copy, 5 cents.

Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance postpaid to all countries: One year, \$2.00; six months, \$1.00; three months 50 cents; single copy, 20 cents.

Der Herold der Christian Science

Authorized, 1903, by Mary Baker Eddy. A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$100; three months, 50 cents; single copy, 20 cents.

Subscriptions will begin with the next issue after the receipt of the order. Information regarding bound volumes of the weekly and monthly periodicals will be given upon request.

NUMBER 34

Restoration

LOUIS J. LEWIS

HRISTIAN SCIENTISTS are Bible students. With the Clight that is thrown upon the Scriptures through the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, a clearer interpretation of its meaning is given to every earnest seeker for the truth. This book has been found by many spiritual thinkers to be the greatest commentary on the Bible. It reveals God as perfect Principle, the only intelligence and power of the universe, and as absolute good. As the great first and only cause and creator, this divine Principle never made a mistake. It is unchanging good, and is another word for Mind, Truth, or Spirit. Those who have received and accepted this viewpoint of God have demonstrated in some measure by actual proof that the author of this textbook has given the human race the correct idea of God as well as the Science of Life.

Many have proved the nothingness of disease by its disappearance through this understanding of God, while great numbers have lost desire for sin after the nothingness of sin has been exposed in this Science. By clearly establishing in the thought of its students and followers that a good and kind Father-Mother God never sent either sin or disease, Christian Science has enabled multitudes to discern that sin and disease are merely false human concepts, without a real creator. Many cases are known where money, valuables, animals, and even human beings were reported to have been lost, and through Christian Science what seemed to have been lost was found and restored. These were added proofs that Principle alone controls the universe and is unerring. When our false human concept is changed from the belief in loss to the understanding of God and His unchanging law, that which seems to be lost or missing is located or found and so restored to its rightful place or condition. Not by an admission of loss is such a demonstration brought about, but rather by realizing that in reality nothing is lost in God's

Christian Scientists are of course deeply concerned about world affairs to-day. They are altruists in the truest sense. They are thinking in terms higher than personal problems and pray for all mankind. They desire to feed the human race with the word of Truth that will establish the kingdom of heaven on earth. They realize, however, that Christ Jesus, the Way-shower, taught and demonstrated the nothingness of matter, its beliefs of limitation and loss. Our false human concepts of matter, time, and place must therefore give way to the spiritual truth about these beliefs. Principle and its idea recognizes neither earthly time, space, limits, nor losses, and our thinking, to be scientific and correct, must be conformable to this Principle. When Christian Scientists have realized sufficiently clearly the allness of Spirit and the nothingness of material existence, they will understand how impossible has been the error of believing that anything that is spiritual ever has been or ever could be lost. This is as certain, according to Christian metaphysics, as is the restoration of an individual to health from the illusion of sickness, to wholeness from sin, and as certain as the restoration of any article or person supposedly lost, when scientific metaphysics has been applied.

The method employed by the Master in restoring Lazarus to life is made so manifest by Mrs. Eddy on page 75 of her textbook that it inspires the student with hope and resolve to attain the Mind of the Christ and imitate his mighty works. She explains: "Jesus restored Lazarus by the understanding that Lazarus had never died, not by an admission that his body had died and then lived again. Had Jesus believed that Lazarus had lived or died in his body, the Master would have stood on the same plane of belief as those who buried the body, and he could not have resuscitated it."

We, therefore, are not standing on the same plane of thinking as those who would bury the body. They who would restore all things must be constructive and consistent thinkers. Christian Science calls for constructive thinking as well as for the human footsteps that are consistent with such thinking. Principle does not resort to destructive methods in order to establish harmony, and the spiritually minded man conforms his thinking and actions to Principle. Such a man does not believe that "the end justifies the means" unless the means are Godlike. He realizes that God is governing the universe and he is willing to let Him do it. Even while the wind shrieks and dust flies, the cannons roar and the smoke is thick, we find the true student of Christian Science knowing how to restore harmony. He is found reasoning thus: "Because divine Love governs all, there can be no hatred, loss, separation, division, or misunderstanding," and his actions prove that he understands this to be true. He is not a "quitter," but continues his activities, duties, and privileges in God's vineyard, reflecting divine Love along the way. He is the one who knows how to greet a fellow laborer in the vineyard of our Lord, whose viewpoint may differ from his. Thinking students of Christian Science realize how much more they have to unite them than the error that would divide them. Having one Mind, how can there exist a real difference of opinion? Spirit being All, how can there be a real division or loss? Spirit cannot lose or be divided. When the entireness of God is understood it is readily discerned why no erroneous conditions can exist. The profound teaching of the Hebrew lawgiver, which has been generally accepted by religionists, "Hear, O Israel: the Lord our God is one Lord," may be better appreciated in the original Hebrew, which may be translated, "Hear, O Israel: the Lord our God the Lord is One." It brings out more clearly the entireness or oneness of God as understood by Mrs. Eddy when she wrote (Science and Health, p. 267): "God is one. The allness of Deity is His oneness." For this reason, there is in reality nothing to restore. There is only one power, action, law, substance, presence. It is God.

The human mind first argues for fear, discouragement, jealousy, revenge, hatred, limitation, destruction, and loss, just as it insists upon the reality of disease before it attempts

Copyright, 1921, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as second-class matter. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of October 3, 1917, authorized on July 11, 1918.

its work of restoration, and then the discovery is made that its efforts are in vain because of its false premise. On the other hand, Christian Science maintains with absolute assurance that the all-knowing Mind knows this moment that His idea exists and moves in accord with Truth's unchanging law. Our adorable God, whose majesty, beauty, and love are but faintly discerned by us, is conscious only of His harmonious creation, and knows not the discord which mortals can only believe. Let us then reassure ourselves with the true idea of God, man, and the universe, or divine Love preserving its spiritual idea, and "the redeemed of the Lord shall return, and come with singing unto Zion; and everlasting joy shall be upon their head: they shall obtain gladness and joy; and sorrow and mourning shall flee away." On page 133 of Miscellany Mrs. Eddy says, "So shall all earth's children at last come to acknowledge God, and be one; inhabit His holy hill, the God-crowned summit of divine Science; the church militant rise to the church triumphant, and Zion be glorified."

Some First Lessons

BLANCHE M. COLLEY

WITH what joyous expectancy the average normal child looks forward to his first days of school! How happily he strives to learn the simple facts and rules put before him, and how confidently he applies himself to the problems given by his teacher, whereby he is to prove the rules already mastered! Can we not find in this happy, serene, and confident obedience of the little child a quality necessary to our own success in meeting life's problems? Is it not the key by which one enters the blessed kingdom of reality and harmony and finds the very "secret place of the most High"? In one of the classes of younger children in Sunday school the teacher asked, "If we are to be good, true Christian Scientists, what must we learn, first of all?" "To obey God," was the reply of the youngest pupil. "What does it mean to obey God?" "It means to trust Him all the time, in every place, for everything," was the prompt answer.

Mary Baker Eddy, the Discoverer and Founder of Christian Science, devoted her life to proving and demonstrating the truth revealed to her. She has given to the world, in "Science and Health with Key to the Scriptures," the result of the revelation and demonstration in a form any one can understand. On page 462 of Science and Health Mrs. Eddy says: "Whoever would demonstrate the healing of Christian Science must abide strictly by its rules, heed every statement, and advance from the rudiments laid down. There is nothing difficult nor toilsome in this task, when the way is pointed out; but self-denial, sincerity, Christianity, and persistence alone win the prize, as they usually do in every department of life." Are these statements cause for discouragement and lagging zeal? Rather are they cause for rejoicing in the vast infinitude of good to be made one's own. The first grade pupil who, looking with awe and bewilderment into a college textbook, refused to work out his own simple problems, would certainly never progress far.

Not one thing more is demanded of the individual than he is able to fulfill. One must learn and prove the fundamentals of mathematics before he advances to more complex problems. Our Leader herself tells us many times, in varied ways, that one must demonstrate or prove the truth, step by step. "To stop eating, drinking, or being clothed materially before the spiritual facts of existence are gained step by step, is not legitimate" (Science and Health, p. 254). To prove the power and presence of divine Principle, in what the world might call a small way, is having a part in the es-

tablishment of Christ's kingdom, just as surely as if one were doing what the world might term greater things. Every good thought, word, and deed is potent with Christ, Truth, and aids in the healing work. One can prove the truth that he at present understands. The thing any one can do is to obey God, in acknowledging Him as the one God and only power. This turning to God in simple, childlike confidence, is, to the human thought, as a light suddenly flashed on in a room which has been dark. Just as the light reveals all the dust and disorder, so Truth reveals false concepts and material thoughts. The individual must take, one by one, his false concepts of God and life and man, apply his rule, and lo! he finds beauty and harmony, joy and infinite possibilities, where human, mortal, or carnal mind had said there were only ugliness, hopelessness, and limited opportunity. Who could find such a task toilsome? What could be more joyful?

To be sure, one cannot reach the summit of complete and perfect demonstration at one bound. Neither does the first grade pupil suddenly become an expert accountant, nor the beginner in music become at once the finished artist. There is nothing in any way abnormal or unnatural about Christian Science or its unfoldment. On the contrary, it is simple and divinely natural. No one can say for another how rapid or how slow the progress and unfoldment shall be. That depends entirely upon the individual's consecration to Principle.

There is one thing only necessary to open up the way to heaven, harmony, and that is an honest, sincere desire for good, a heartfelt longing to know God. Born of the acknowledged need for a practical, helpful understanding of God, is a childlike willingness to test for one's self His promises, which, Christian Science teaches, are every one true and capable of proof, here and now. These two qualities, honest desire and willing obedience, combine as one, forming the prayer which the Father sees in secret and rewards openly. Thus one seeks first the kingdom of God, good, and his longing and striving are ceaseless prayer which brings the harvest of peace, joy, confidence, and certainty of God's presence and power, manifested in the healing of every phase of human discord and disease.

"Willingness to become as a little child and to leave the old for the new, renders thought receptive of the advanced idea. Gladness to leave the false landmarks and joy to see them disappear,-this disposition helps to precipitate the ultimate harmony" (Science and Health, p. 323). Is there a man or woman in the world to-day who has not at some time longed to cease being "grown up," to be free from care and worry and responsibilities and be once more happy, joyful, and unfettered as the little child? Yet the simple fact is and always has been that we are all children-children of the one Father; and He has given us authority to claim absolute joy and freedom and dominion in our daily living. Such freedom and joy and gladness become ours to just the degree that we keep the First Commandment, have one God, deny whole-heartedly and actively every claim of any power save the God-power, or power of good, and so claim our heritage as His children. Only in this way do we demonstrate the truth, step by step, and prove the promises to be ours right here and now in the most practical, helpful way.

On page 467 of Science and Health Mrs. Eddy says: "The first demand of this Science is, 'Thou shalt have no other gods before me.' This me is Spirit. Therefore the command means this: Thou shalt have no intelligence, no life, no substance, no truth, no love, but that which is spiritual." Could there be a clearer, more enlightening rule to apply to daily problems, applicable alike to the greatest mountain of error ever built up by so-called mortal mind laws or to the

most subtle temptation advanced by human reasoning? Nothing is too great, nothing is too small to be tried and tested by this revealed allness of God. That which is Godlike, spiritual, stands—pure, perfect, harmonious, and unchanging as He is. That which is unlike Him is destroyed by the allness of His presence and power. "Wherefore we receiving a kingdom which cannot be moved, let us have grace, whereby we may serve God acceptably with reverence and godly fear: for our God is a consuming fire."

"Loss is gain"

LOUISE L. HESSE

IN the ordinary sense of the word, the expression "loss is gain" seems self-contradictory and even absurd. When studied carefully in the light of metaphysics, however, it becomes beautifully clear and altogether natural. Metaphysically speaking, there can be no loss of anything that is real, while whatever is unreal must be lost before the true idea of being can be understood. So long as one clings to a belief of life in matter, one cannot experience completely the fact of life as the spiritual reality of being. In other words, the sense of materiality must be lost in order that the understanding of spiritual life may be gained.

To one who is in the habit of believing sense testimony, this seems very difficult of accomplishment, for he cannot realize at once the utter falsity of the material senses. He clings to what he thinks is true, and yields his beliefs only as he becomes spiritually minded, gaining to a certain extent an understanding of what it means to "let this mind be in you, which was also in Christ Jesus." The gradual unfoldment of spiritual facts replaces surely and completely the old beliefs, which, when they cease to have any claim upon the one who once held them, vanish altogether. Then, indeed, it is perfectly evident to the seeker for truth that loss is gain, for as he loses his once cherished beliefs about God and man, he finds that he is gaining what nothing can ever take from him, the true understanding of life.

Jesus once said, "For whosoever will save his life shall lose it: and whosoever will lose his life for my sake shall find it." All who make a desperate effort to cling to life in matter will ultimately be forced to lose this belief; but whosoever will give up all belief of life as resident in matter, life as belonging to aught save God and His idea, will find, instead of mere beliefs about life, the realization of facts concerning it. He finds God, the one and only cause, and man in His image and likeness. Jesus knew that death was not the gateway to life, and therefore he could not have told his disciples that they must pass through such a gateway before they could find life. He simply meant that they must lose all sense of life as material, and then they would gain an understanding of life as spiritual.

In truth, the gain of spiritual understanding is the only real gain that there can be. In human affairs, however, there is a belief that one person has more of material possessions than another, that he has gained more whereby to make a living. In so far as true possession is seen as the gift from God for obeying the command, "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you," one is understanding the spiritual significance of gain. But of material wealth Jesus said, "For what is a man profited, if he shall gain the whole world, and lose his own soul"—his sense of God as Spirit, Life, and Love? Such gain presupposes a loss of spirituality, and the belief in its ability to confer good upon mankind must be reversed before the true idea of possession can be proved.

The claim that material possessions bring true happiness is an entirely false one. As we study more closely the word of God in the Bible, and its interpretation as given by Mrs. Eddy in "Science and Health with Key to the Scriptures," we shall lose all desire for those things which have heretofore seemed so very desirable. We see our neighbors striving to gain more and more of worldly wealth, but should that cause us to do likewise? No! We have heard and understood Jesus' forceful command: "Labour not for the meat which perisheth, but for that meat which endureth unto everlasting life, which the Son of man shall give unto you." We have begun to know the joy of turning to Principle with our daily needs, sure that they will always be cared for, when we have done our part, and have taken our human plans out of the way.

Our concept of life will be a happy, joyous one if we steadfastly hold to the purpose of turning to Principle with every problem that presents itself. At first this turning may be but a halting, stumbling effort to set our thoughts in new channels, for it is not easy to "put off the old man;" but this must be done before the "new man" can be put on. To become discouraged in the effort to complete this change is to misunderstand the problem which must be solved by each of us, the overcoming of self. Mrs. Eddy says in "Miscellaneous Writings" (p. 118), "Be of good cheer; the warfare with one's self is grand; it gives one plenty of employment, and the divine Principle worketh with you,-and obedience crowns persistent effort with everlasting victory." Then let us press on, and as we continue in the path to righteousness, we shall become aware of difficulties overcome, of a happier outlook upon life, and of increasing desire to learn more of the infallible Principle which heals and saves. God blesses our desires when we trust them confidently to Him, and if we turn to Principle for their fulfillment, we shall know no disappointment. If what we consider a sincere desire is left to God for remolding, we shall be conscious of happiness even though what we ask is granted in a totally unexpected way. Mrs. Eddy tells us on page 1 of Science and Health, "Desire is prayer; and no loss can occur from trusting God with our desires, that they may be moulded and exalted before they take form in words and in deeds."

As we learn how to turn to Principle with our every care, confidently expecting that in proportion to our sincerity and understanding will be our reward, we shall realize how it was possible for our Leader to write on page 4 of her "Poems":—

O make me glad for every scalding tear, For hope deferred, ingratitude, disdain! Wait, and love more for every hate, and fear No ill,—since God is good, and loss is gain.

It was her unselfish, untiring desire to do God's will which found expression in these beautiful lines, and they stand as a reminder to us that we can prove for ourselves and others, through consecrated living, that loss of materiality brings into our lives a corresponding gain of spirituality.

Friendship

ADA FLETCHER

THOUGHTS of friendship and companionship begin early to occupy the minds of children; tiny children have a great affection for their pets and little playmates. A child's companions also have a big influence on his life; hence the necessity of his being taught early how to choose the right friends and to know the truth about friendship.

Many boys and girls go through a phase of hero worship. Sometimes these heroes and heroines are charac-

ters in the books they read, sometimes personalities they come across in their daily lives. This phase should be watched by parents and teachers and the child guided aright, the noblest characteristics pointed out; in fact, he should be taught that Principle alone is worthy of his love and admiration. Later friendships of a more serious nature are formed, persons are idolized, and the highest form of happiness appears to be in having the companionship and being in the presence of a dearly loved friend. These ideals ofttimes bring disillusionment and disappointment. Mrs. Eddy tells us in "Miscellaneous Writings" (p. 9): "Whom we call friends seem to sweeten life's cup and to fill it with the nectar of the gods. We lift this cup to our lips; but it slips from our grasp, to fall in fragments before our eyes. Perchance, having tasted its tempting wine, we become intoxicated; become lethargic, dreamy objects of self-satisfaction; else, the contents of this cup of selfish human enjoyment having lost its flavor, we voluntarily set it aside as tasteless and unworthy of human aims. And wherefore our failure longer to relish this fleeting sense, with its delicious forms of friendship, wherewith mortals become educated to gratification in personal pleasure and trained in treacherous peace? cause it is the great and only danger in the path that winds upward."

This search for personal friendship and companionship, with its false sense of what constitutes happiness, many times brings with it weariness, sorrow, and bitterness, and the journey from a personal to a spiritual sense of love may be a dreary one, because the human mind persists in trying to attain things in its own way.

Sometimes this false sense of human companionship and love appears about to be realized, when suddenly every hope of its attainment vanishes, leaving loneliness and desolation in its place. It seems a hard lesson for the human mind to learn that divine Love and its idea is the only real companionship, but when this lesson is learned the truth satisfies the craving for companionship, loneliness begins to be a thing of the past, for the angels of Mind's presence are always at hand and the companionship of purity, honesty, and joy becomes more real than mere personal companionship could ever be. When friendship is seen to be a divine idea, into which nothing can enter to defile or to make a lie, all fear of misunderstanding between friends ceases to exist, and even separation cannot cause sorrow, even though great distances seem to separate one from another.

Those who have striven to attain this spiritual idea of friendship gain real happiness and joy, contentment and peace, and this independently of material environment or human conditions. The sense of man's oneness with God brings a realization of the universality of divine Love, a greater love for mankind in general, more patience and kindly consideration, a love for those who seem unlovely, and, greatest of all, the compassionate Love that heals the sick and the sinning. There is only one real friendship, that of Principle, the highest ideal of which is to be, as Abraham was, "the friend of God."

"Riches and honour"

MARTIN BRETHERTON

CHRISTIAN SCIENCE is a matter of demonstration. "If we live in the Spirit, let us also walk in the Spirit," says Paul. In proportion as we can demonstrate in human experience that God is true supply, our needs are met. Beyond that there is neither supply nor need. It is sometimes objected that students of Christian Science do not obey the

Scriptural instruction, "Sell all that thou hast, and distribute unto the poor." Now all earnest students of Christian Science are trying daily to obey this command, not, as some one once said, by providing work for the auctioneer, but by detaching ourselves more and more from dependence on material possessions, so as to give the bread of heaven and the water of life to every thirsty one that asks for them. The mere parting with material possessions was not what Jesus implied, nor was it ever taught by Christianity or Christian Science. It does not necessarily advance us spiritually from the claims of materialism at all; nor has it any bearing on the divine supply for human needs in Christian Science, since what God bestows cannot be given away, lost, or vitiated. Man in reality can no more want than he can sin, suffer, or die, for there can be no imperfection in the idea of the one perfect Mind. Poverty, injustice, greed, or mismanagement of riches must cease as we demonstrate this great fact of Christian Science. On page 223 of "Science and Health with Key to the Scriptures" Mrs. Eddy says, "Sooner or later we shall learn that the fetters of man's finite capacity are forged by the illusion that he lives in body instead of in Soul, in matter instead of in Spirit."

Want, or superabundance, of material riches cannot affect man's spiritual growth. As we grasp the true status of man we must similarly fail to judge him by the inaccurate scale of "class" universally obtaining in mortal mind. On no other basis than this can man's equality be demonstrated, since on no other grounds are men equal; but on a spiritual basis equality can and must be demonstrated, in the strictest accordance with that which is most elementary in Christian teaching. Nothing but the recognition of the true, spiritual birthright of man can constitute worth, position, and power. A man is great, therefore, only as he realizes that he is no greater than his neighbor; well-born only as he acknowledges the one Father-Mother, Love, as his parent; wise only as he reflects the one Mind; and rich and mighty only as he wields the "charmed rod" that breaks the chains of error that seemed to keep him from exercising his "dominion over all." Thus, as Mrs. Eddy says on page 490 of Science and Health, "The scientifically Christian explanations of the nature and origin of man destroy all material sense with immortal testimony. This immortal testimony ushers in the spiritual sense of being, which can be obtained in no other way." Man cannot make himself respected, powerful, or rich. Jesus did not say, "Ye shall become powerful," but, "Ye shall receive power." David sang, "Both riches and honour come of thee," and the four and twenty elders of the Revelation, worshiping before the throne, said, "Thou hast created all things, and for thy pleasure they are and were created."

"With new tongues"

CHARLES A. PEARSON

RECENTLY at a Wednesday evening meeting of a branch church, very convincing testimonies of physical healing were given with a promptness, earnestness, and clearness that elicited favorable comment from a lady who was making her first visit to a Christian Science church. Coming to this service with the traditions and practices of her denomination fresh in her thought, she expressed surprise at the spontaneity of the testimonies, mingled with a regret that they should have taken on such a material aspect—the healing of the body. She thought that more should have been said about bringing the sinner to repentance.

When Jesus commanded his disciples, "Go ye into all the world, and preach the gospel to every creature," his

promise was: "And these signs shall follow them that believe; In my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover." When a stranger goes into these Wednesday evening meetings he hears the new tongue spoken and does not at once understand, but becomes very much interested. This results in earnest study of the Bible and "Science and Health with Key to the Scriptures" by Mary Baker Eddy. With the light thus thrown upon the Bible a comprehension is rapidly gained of the new tongue, what the healing power is and from whence it comes. When one is expressing gratitude to the Discoverer and Founder of Christian Science, and declaring that he has been healed through her teachings, he is in effect declaring that this healing has come about because of his or some one else's awakened understanding of God and man's relation to God. This healing can only occur because of correct reasoning, the realization of spiritual existence, and is a natural consequence. As Mrs. Eddy says, "Man is the expression of God's being" (Science and Health, p. 470). To understand this statement we must know what the being of God is, and this we find fully set forth in the definition of God on page 587 of the same book and in the definition of man on page 591. Studying these we begin to see the duty or function of man, and that in proportion as we are expressing, reflecting, acting, voicing those qualities which define God, just in that proportion are we proving man.

As it seemed necessary for Thomas to examine personally the wounds in order that he might be convinced that it was the same Jesus, so do the Thomases of to-day need to have the evidence presented—the "signs following." For this purpose these testimony meetings have been established, and thousands each week gladly acknowledge that they have been relieved of their sins and their sufferings by one and the same process—the uplifting of thought, the realization of man's unity with God. Mrs. Eddy in Science and Health (p. 31) emphasizes the importance of these healings, and declares of Jesus, "First in the list of Christian duties, he taught his followers the healing power of Truth and Love." Christian Science teaches the ever presence and potency of this "healing power," an understanding of which excludes the belief in evil; that eternity is now, and that we have now this eternity in which to express and reflect God, good; to be healthy and happy.

The Power of Truth

WINIFRED E. COWARD

ONE of the most glorious promises in the Bible is that contained in Jesus' saying, "If ye continue in my word, then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free." Most people are aware of some bond or bonds from which they would be free, and so, like Pilate of old they ask: "What is truth? What is this, a knowledge of which would set me free?" Jesus of Nazareth set forth the truth about God and man, explaining the Christ, by word of mouth, through a selfless life, and most powerfully by his demonstrations of the healing of the sick, the uplifting of the sinner, and the raising of the dead.

In the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, there occurs this passage (p. 319): "The divine Science taught in the original language of the Bible came through inspiration, and needs inspiration to be understood. Hence the misapprehension of the spiritual meaning of the Bible, and the misinter-

pretation of the Word in some instances by uninspired writers, who only wrote down what an inspired teacher had said." Through her clear spiritual insight, Mrs. Eddy has perfectly discerned the scientific meaning of the teachings of Jesus, and thus, through her textbook and other writings, she has been able to give to this age, in unmistakable language, the answer to the question, "What is truth?" As in the case of Jesus, Mrs. Eddy's irrefutable answer and undeniable proof are expressed in the healing of sin, disease, and death. So to-day, the only sure test a Christian Scientist has of his understanding of Truth is his experience of healing in himself and those who seek his help.

Jesus put the fact clearly that it is the truth which heals. In the eleventh chapter of John's gospel it is related how Jesus, before calling to Lazarus to come forth from the tomb, lifted up his eyes, his understanding, and said: "Father, I thank thee that thou hast heard me. And I knew that thou hearest me always: but because of the people which stand by I said it, that they may believe that thou hast sent me." It would seem that on this occasion Iesus asserted that it was the Truth which healed, because of his knowledge of it. Considered by itself, the sentence, "Father, I thank thee that thou hast heard me," might be taken to imply that God had acted in obedience to an appeal from Jesus. On page 2 of Science and Health Mrs. Eddy says, "Prayer cannot change the Science of being, but it tends to bring us into harmony with it," and this idea is expressed in Jesus' statement, "And I knew that thou hearest me always." In other words, man always has existed and always will exist as the perfect reflection of God. It was Jesus' understanding of the truth about man's real being that enabled him to call Lazarus forth from the tomb.

In treatment, one remembers the truth about God and man, and so displaces any erroneous concepts that had been temporarily entertained by himself or by another. As the false beliefs disappear, the wrong condition is healed; the truth, which was present all the time, is demonstrated in the overcoming of sickness, sin, or discord of any kind. In reality there is nothing to heal; there is only an imaginary something to be lost. In the overcoming of false beliefs, it is often necessary to deny them, to reverse their statement, to unsay them, but it is the understanding of the truth which heals. Whenever one's vision of God and man becomes clear and true, and thought is uplifted to understand more of the Christ, healing takes place. A practitioner knows this from experience, and it is for this reason that he endeavors to remove the patient's thought from the consideration of his woes to the joyous truth about God and man.

The reading of Science and Health, the hearing of a Christian Science lecture, the expression of truth in the conversation of friends have many times healed diseases, though the conversation or the lecture may not have seemed to deal specifically with the problem concerned. An understanding of the fact that God is Love will heal everything that needs healing, and in Science and Health Mrs. Eddy reiterates this truth from cover to cover.

+ + +

Lo, the Christ is present with thee;
Be not thou afraid;
Nay, be bold, and ever bolder,
Claim the promise made!
Speak the word that conquers error,
Know that Truth is power,
Win the guerdon of the faithful—
Freedom, from this hour.

The Nothingness of Nothing

WHEN Mrs. Eddy realized the nothingness of evil, she found the way to its destruction. For centuries the world had been fighting evil, or rather the instinct of good in the world had been fighting evil, as a tremendous reality. The human being, animated by some dim realization of Principle, went into the battle with evil, not regarding his true self as the image and likeness of Principle and so as its master, but regarding it rather as described in the old folk tales, and himself as a frail and sensuous man, engaged in a more or less unequal contest with it. He forgot that if the writer of Revelation pictured this evil as a great red dragon for the purpose of symbolizing its pretended might, he later endowed it with the other names for evil, "that old serpent, called the Devil, and Satan," with the intention of insisting upon the oneness of its claims to counterfeit reality, before consigning them to oblivion and nothingness. Thus when Mrs. Eddy, in Science and Health, first drew attention to the obvious fact that if God, Principle, was good and was infinite, there was no room for evil as a reality, scholasticism roused itself into a veritable passion of argument, in the course of which it rejected every one of its own axioms, and behaved more like the demoniac amidst the tombs than anything else.

Now it must not be imagined for one moment that the repudiation of evil as a reality even predicates any encouragement to sin. It does the very reverse. It makes sin deliberate, beyond the advancement of any excuse, and so exposes the impossibility of sin unrepented of escaping punishment. The Calvinist or the fatalist may plead the inevitability of sin, when sin is foreordained, but the Christian Scientist knows that sin is a mesmerism which must, sooner or later, be awakened from, since good, because it is Principle, must also be the reality. Nothing, that is to say, outside of Principle can have any actuality. As a theory such a statement is easy enough to comprehend. But Christian Science is not satisfied with theories. James declared that faith without works, theory without demonstration, was a dead thing. Mrs. Eddy has gone as far, or further than James. "In Science," she writes, on page 329 of Science and Health, "we can use only what we understand. We must prove our faith by demonstration." In this way the emotionality of religion is put out of court. Religion is proclaimed as precisely what it is defined as in the Greek of the New Testament, the scientific knowledge of God, Principle. And the student is forced to take his stand on those wonderful opening sentences of the First Epistle of John, read no longer as a mystical utterance, but as a plain scientific statement: "That which was from the beginning, which we have heard, which we have seen with our eyes, which we have looked upon, and our hands have handled, of the Word of life; (for the life was manifested, and we have seen it, and bear witness, and shew unto you that eternal life, which was with the Father, and was manifested unto us;) that which we have seen and heard declare we unto you."

The effort of Christian Science, then, is not merely to preach the gospel, the good news, or the truth, but, as well, to heal the sick, to prove to the sick that what heals is a knowledge of Truth, and the sick, be it said, are all those believing anything except the truth, and so being deceived by the arch-liar, the great red dragon, with all his subtleties and suggestions. Of course, the dragon is too clever, if the terms of the metaphor are to be accepted, to represent what the human mind defines as evil as being good. As good, he offers the good of the tree of knowledge of good and evil,carnal appetite, vainglory, power, the very things Christ Jesus trampled underfoot in his own struggle with evil in the wilderness. Human joy and physical pleasure, that is the dragon's summing up of good: physical suffering and human sorrow represent the sum of evil. But no man can have one without the other. Physical life must end in death, yet life is eternal: human joy must finish in sorrow, yet men are as the angels in heaven. Between the inherited scholastic teaching as to evil and the teaching of Christian Science there is evidently a great gulf fixed, and Mrs. Eddy plumbed it in the exposure of evil as unreal.

"And the great dragon was cast out, that old serpent, called the Devil, and Satan, which deceiveth the whole world: he was cast out into the earth, and his angels were cast out with him." So wrote the author of Revelation in the first century, and eighteen centuries later Mrs. Eddy wrote, on page 563 of Science and Health: "The great red dragon symbolizes a lie,—the belief that substance, life, and intelligence can be material. This dragon stands for the sum total of human error. The ten horns of the dragon typify the belief that matter has power of its own, and that by means of an evil mind in matter the Ten Commandments can be broken." If matter were real, if evil were power, this would unquestionably be the case, and not only the present case but the eternal case. Fortunately, however, matter is not real, and evil is not power, and this is proved in Christian Science every time, through a knowledge of their unreality and powerlessness, a case of sickness is healed or a sin overcome. Men still believe that the horns of the dragon can break the Ten Commandments, because they first give power to the dragon out of human fear, and then constitute him real out of human sensuousness. But to merely say that matter is unreal amounts to almost nothing. The metaphysical reason for its unreality must be grasped and understood. In just the same way, to say there is no power in evil is merely futile for any one behaving all the time as if there were. None the less the letter and the spirit must go hand in hand, and the letter never is fully grasped until the spirit is assimilated, any more than the spirit can be fully assimilated until the letter is grasped. When this occurs nothing can withstand the Science and might of Principle; "ye shall know the truth, and the truth shall make you free."

In the knowledge of this truth, the unreality and powerlessness of evil, lies the secret of the peace of God which passeth all understanding. The distraughtness, the restlessness, the trouble that pursue the individual, exist in the exact ratio of the individual's belief in evil, and vanish in the exact ratio in which the individual, through his knowledge of Principle, reduces evil to nothing. A belief in the power of evil is an inevitable expression of materiality. Greater love, says the Greek of the New Testament, hath no man than this, that a man lay down his materiality for his friends. So long as the human being believes in materiality, he must believe in sin, sickness, and death; in other words, in the reality of matter and the power of evil. When he begins to lay down his materiality it can only be because he has gained

his first glimpse of spiritual reality, and so of life eternal. This is the very foundation of Christian Science teaching. "There is," Mrs. Eddy writes, on page 468 of Science and Health, "no life, truth, intelligence, nor substance in matter. All is infinite Mind and its infinite manifestation, for God is All-in-all."

FREDERICK DIXON.

"Strange perversity"

Because divine Love is infinite, it must be infinitely expressed. No limited human concept can exemplify the totality of good. Each one is entitled to turn to Principle, divine Love, from his own standpoint, and to demonstrate its infinity for himself. A man must recognize that his sense of truth is, at the best, but his sense of good, and not all there is to the infinite goodness of God. Others have right to their sense of truth likewise. No one has discerned and demonstrated the truth so exclusively as to have a monopoly of understanding. Charity, cooperation, and real fellowship are requisite to the exemplification of divine Love in daily experience. As Mrs. Eddy says in "Miscellaneous Writings" (p. 293), "The sum total of Love reflected is exemplified, and includes the whole duty of man: Truth perverted, in belief, becomes the creator of the claim of error."

To think that human hatred and brutality are love or can ever be evidence of love is to pervert the truth. Mortal mind, from its very nature, tries to distort and reverse; but, fortunately, mortal mind is nothing merely supposing itself to be something. In a little article called "Love" (Miscellaneous Writings, pp. 249-250) Mrs. Eddy writes: "What a word! I am in awe before it. Over what worlds on worlds it hath range and is sovereign! the underived, the incomparable, the infinite All of good, the alone God, is Love." There can be nothing more than the allness of good, divine intelligence spiritually manifest as harmonious action. Supposititious mortal mind's belief that the love of divine Mind can be turned into hate is illusion without any real basis. The all-inclusive divine consciousness produces and maintains only its spiritual manifestation. That is why it is loving. Its all-inclusiveness precludes any suppositional opposite from substituting itself for or successfully attacking the reality. The truth remains forever untouched by mortal beliefs.

In the passage just quoted Mrs. Eddy continues: "By what strange perversity is the best become the most abused, -either as a quality or as an entity? Mortals misrepresent and miscall affection; they make it what it is not, and doubt what it is. The so-called affection pursuing its victim is a butcher fattening the lamb to slay it. What the lower propensities express, should be repressed by the sentiments. No word is more misconstrued; no sentiment less understood. The divine significance of Love is distorted into human qualities, which in their human abandon become jealousy and hate." Each student of Christian Science needs, then, to distinguish clearly between infinite Love, which is Principle and invariably expresses itself as constructive action, and the so-called human love which soon degenerates into malice. Only by accepting the ever loving divine Mind as the sole producing and governing power, can one reject and prove the nothingness of the illusory supposition that would try to present itself throughout experience. The healing process is the replacement of suppositional perversity, whether physical, mental, or moral, with the calm and orderly expression of

The activity of Truth, or divine Love, is always constructive, not destructive. It destroys only the belief in de-

struction, if one may phrase a paradox, and the belief in destruction never has been real. One difference between good and evil is that good is constructive and evil is suppositionally destructive. The constructive action of good is the unfoldment of infinity. It is idea endlessly emanating from its inexhaustible source. The psalmist declares: "He sent his word, and healed them, and delivered them from their destructions." The work of each one turning to Christian Science is to accept divine intelligence and its word, or spiritual expression, as the reality. By living and acting intelligently, one is loving God and reflecting divine Love. Right reasoning finds the reality of all living, loving, and cooperation in Mind, and not in any material sense of things. This true understanding can never degenerate into human enmity, but actually replaces a belief in hostility, disorder, or limitation with the vital goodness of Principle.

Readjustment in these years after the world conflict must involve the understanding of this truth in order to be permanent. Each one must first of all prove for himself in some measure that the orderly expression of Principle, or divine Love, is the reality of man. What is necessary for the demonstration of intelligent order as present is humble and consecrated dependence on infinite Mind. As a man knows the reality, the sense of disease or discord disappears and the established harmony of Truth appears. When matter is looked upon as the remedy for material disease, what ensues is merely more bondage of materialism. If evil is avenged with evil, there remains fresh evil to be avenged. Any such perverse round of materiality can be healed only by vigorous practice in accord with divine Love. The understanding of Principle alone can overcome "strange perversity."

Since the true remedy is spiritual, it can never be humanly forced on any one. The force of divine Love is sufficient to prove healing in all circumstances as spiritual unfoldment. Ruthlessness, that is the very opposite of divine Love, leads to mortal chaos. Political, medical, or religious intolerance, to mention only a few forms of evil, must give way to the actual demonstration of Principle. The lovingkindness of divine intelligence is energetic and healing. In "The Shortest Way with Dissenters," Daniel Defoe, himself a dissenter, wrote: "If one severe law were made and punctually executed, that whoever was found at a conventicle should be banished the nation, and the preacher be hanged, we should soon see an end of the tale. They would all come to church, and one age would make us all one again." Thus by satire he showed the absurdity of intolerance. Every sort of human intolerance is a "strange perversity," for the true way of progress is the patient replacement of evil with the demonstration of good. In this work each one has infinite opportunity to express the divine Mind as the supreme and sole governing power. GUSTAVUS S. PAINE.

Testimonies of Healing

For almost five years I was obsessed with the belief that it was impossible for me ever to stand before an audience and give a testimony; but I have been healed, and fear and timidity no longer hold me in bondage. I am now able to give and do give testimonies without experiencing any difficulty whatsoever, and now wish to write one for publication, with the hope that some one will be benefited, as I have been by reading the testimonies of others. The truth as taught in Christian Science has shown me how to become a better man mentally, morally, spiritually, and consequently a better man physically. I have received many healings and blessings, but will not attempt to enumerate them all. My first healing was of a seeming estrangement between my daughter and me. I thought that she should be the first to make an effort to bring about harmony, but I had not been reading Christian Science so very long before I was very plainly shown that it was I and not she who should be the first to make the effort to straighten out this unhappy condition; and in just the time that was required for a letter to travel some twelve hundred miles, and for the answer to come back, was the proof given that there never had been any estrangement, except in my erring thoughts.

Through the teachings of Christian Science I have been healed of as bad a case of alcoholism as it is perhaps possible for a human being to be afflicted with. I was a drunkard for over twenty years. I was also healed of the excessive use of tobacco, both chewing and smoking, to which I had been a slave for over thirty years. A little over a year ago I was confined to my bed by an attack of Spanish influenza, but with my limited knowledge of Christian Science I was able to overcome it in about three days and a half. I was out of the house and about my business on the fourth morning.

About three weeks later my landlord came to my room and found me in a semiconscious condition. He sent for a doctor instead of a Christian Science practitioner. I made no remonstrance, but allowed the doctor to go ahead with his diagnosis. He told me that I was a very sick man and that I had valvular leakage of the heart, and insisted that I be sent to a hospital, which I absolutely refused to consent to. I will have to admit, however, that he did arouse some fear, as I did not know what valvular leakage of the heart meant. On the morning of the fourth day I was sufficiently aroused to realize that I was far, far away from the teachings of Christian Science. I wanted to read, and reaching over to the table by my bedside I picked up a Christian Science pamphlet, read it, and applied the truth contained in it, had all the medicine removed, and requested the nurse to give me some more substantial food than that she had been giving me. She reluctantly obeyed and said that I should continue to take the medicine, and was disturbed over what she thought would be the consequence. I was now able to begin to think rightly, to think health thoughts instead of sick thoughts, to think as Christian Science has taught me to think, the result being that I was able to be out of bed, out of the room, and out of the house in three days more,-all this in spite of the death sentence that the doctor had pronounced upon me; for he had told the landlord and his wife, also the nurse, that he did not expect me to live. Is it any wonder that we are so grateful to our Leader, Mary Baker Eddy, for giving us "Science and Health with Key to the Scriptures," and that we are more than thankful to God and His Christ for these healings, and for all the blessings that come to every honest and sincere student of Christian Science?—Leslie L. Lee, San Francisco, California.

I have so many reasons for praising and thanking God for His loving guidance and help that I must tell of His great loving-kindness in healing me of a seemingly incurable disease. Before this problem confronted me I had known but little of the truth which Jesus said would make us free,free from sin, sickness, and death through the understanding of the truth as taught in Christian Science by our revered Leader, Mrs. Eddy. Like a doubting Thomas I was looking for a proof that I was in the right way to learn of the great "I AM." Soon I became seriously ill with blood poisoning, which began with the eyes and quickly spread over the whole body. My suffering was intense and my eyesight failed me, but I was not afraid and trusted firmly in God. I was alone, and friends came to urge me to consult a doctor as my position as professional nurse demanded I should. "I have my doctor; He is always with me and He will help me," was my reply. Remaining alone I was compelled to attend to my daily needs without any help but that of the divine Mind, and I was helped wonderfully. A Christian Science practitioner happened to look in, took up the work according to the rules of Christian Science, and two days later my eyesight returned. After another week I could take a short walk with the help of a cane, and after three more weeks I was again quite normal and able to attend to my duties. Since then God has been my only Healer, and Christian Science has become my salvation.

Human language but feebly expresses my thankfulness to divine Love and my gratitude to our revered Leader, Mrs. Eddy, for again revealing this truth, of which we can avail ourselves in every emergency. I am also grateful to all the kind friends who have helped me on the way from materiality to spirituality.

(Miss) Elisabeth Hoffmann, Coblenz, Germany.

٠

Having had many healings through Christian Science, I feel I should like to tell some of them, with the hope that they will help some one else-especially some one whose healing seems slow, as mine was. I have been healed of a weak heart from which I had suffered for at least four years, of a nervous breakdown, and many other ills. The healing of the weak heart was very wonderful to me, as I was in great dread of becoming a mother, and while looking forward to the coming of the baby I never expected to come through alive, as the sense of shortness of breath and the rapidity of the heart beats were alarming. I worked as earnestly as I knew how in Science, and not seeming to improve I went to a practitioner, to whom I can never be grateful enough for her loving patience and help. I can honestly say it is owing to Christian Science that I am alive. My husband is not a Scientist, so I had to have a doctor, who at the last was called away to another patient, and did not get back until after the baby was born.

I am most grateful for these healings. Only those who have suffered from a nervous breakdown can appreciate the gratitude one feels to God for Christian Science. I am very grateful for the physical healings but I am still more grateful for the spiritual uplift, and hope to grow in grace and be able to help other sufferers as I have been helped.

(Mrs.) EDITH H. HEATON, Southsea, Hants, England.

4

As evidence of my gratitude for the help received from the testimonies of those who have received healings and blessing through the study of Christian Science, I wish to add mine. I took up the study of Christian Science at a time when I was very much in need of physical healing. I

had entertained fear of disease until it began to be manifested in various physical ills, and was followed by the fear of death, either for myself or for some of my family. We had consulted a number of the best physicians on the Pacific coast and they had said there were numerous things wrong with me which would never be healed until I was operated upon. I was afraid of an operation, but went so far as to have my roommate order a cab to take me to the hospital to be operated upon for what was pronounced to be a chronic attack of appendicitis. As it was the day before Thanksgiving, however, I decided to wait awhile, and for the next month I was very miserable.

During this time some of my friends asked me just to try Christian Science, saying that if I did not receive the healing, it would not do me any harm. As a last resort, I asked for help, and was told to read the twelfth verse of the fourth chapter of Hebrews: "For the word of God is quick, and powerful, and sharper than any twoedged sword, piercing even to the dividing asunder of soul and spirit, and of the joints and marrow, and is a discerner of the thoughts and intents of the heart," and also "Science and Health with Key to the Scriptures" by Mrs. Eddy. Not having a copy of Science and Health, I sat down to read the Bible, but was in such pain that I put the Bible aside and went to the telephone and called the physician whom I had employed, and was told that he was out of the city for ten days or two weeks. There was nothing for me to do but to follow the practitioner's instructions. In a short time a dear friend came in with a copy of Science and Health, and asked me to go with her to the Wednesday evening meeting that evening, which I did.

I improved steadily and was very soon healed. I put aside glasses which the oculist had told me I could never see without, especially for sewing and reading, and many other inharmonious conditions were overcome. I was not willing to stop there, as I knew there was something to understand, and I knew I did not understand this something. I continued to read and study the Lesson-Sermons and tried to gain some understanding of Christian Science. Feeling that I was not doing so, I was almost ready to give up the search when I met one who proved to be the "good Samaritan" to me. I have now had class instruction and am learning to know more certainly that Christian Science teaches mankind to know God, the divine Principle of all being. Christ Jesus, the Way-shower, said: "If ye continue in my word, then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free." After many seemingly hard experiences and through much study and prayerful, conscientious effort, a glimpse of this truth has been gained.

We have had many wonderful healings in our home, of both business and physical difficulties, and we are learning that each experience is only another opportunity to prove that God is All, and that there is none besides Him. This is what I am most grateful for. I am grateful to all who have so patiently and kindly helped me, and I am deeply grateful to our beloved Leader, Mary Baker Eddy, whose spiritual understanding gave to the world "Science and Health with Key to the Scriptures." My daily prayer is to gain a better understanding of God and man's relation to Him as taught in the textbook of Christian Science.

(Mrs.) ETHEL S. SHAW, Seattle, Washington.

I am exceedingly grateful for Christian Science. Every day I love and praise it more. Thirteen years ago the Christian Science textbook was placed in my hand, just when despair was depriving me of health and a mother's natural

joy in her children. It seemed that everything the world considers necessary to normal living had been taken from us, and the phantom failure was continually holding a hopeless future before me. Fortunately, "man's extremity is God's opportunity," for it was at this crisis that the inevitable friend gave me a copy of "Science and Health with Key to the Scriptures" by Mary Baker Eddy. As I read page after page of that prophesied book of redemption, there awakened in my thought a new sense of hope and strength, with an intense desire to live and progress according to God's law.

One of the first things I did was to put the children in the Christian Science Sunday school. The next was to throw all of our medicines into the ash barrel. Several health books were consigned to the furnace, and then I settled down to the study of this Christ Science with an eagerness and determination of purpose which bore immediate fruits. I was not satisfied, however, until I had purchased and read all of Mrs. Eddy's writings and had subscribed for all the Christian Science periodicals; consequently, during the past thirteen years we have learned how to overcome every phase of sickness which has presented itself to us, including grip, influenza, heart trouble, astigmatism, measles, sore throat, and various attacks of sickness which we made no attempt to name. During these years we have never been tempted to resort to the use of material medicine or drugs of any name or nature; we did, however, apply our understanding of Christian Science, and received the promise of health every time, followed by a greater sense of harmony and freedom than we had ever experienced under other modes of treatment.

Bringing up a family in Christian Science has been an illuminating unfoldment, wonderfully progressive for the children, and with a wonderful degree of freedom for the mother, freedom from superstition, fear, heredity, and socalled material laws of limitation. During a period of about four years, in which I was obliged to be separated from my family through the day, the only housekeeper and homemaker I was able to give them were the Bible and the Christian Science textbook. Instead of this separation being an affliction, the trying circumstances connected with it were overcome with the aid of the study of the daily Lesson-Sermon, which gave us many valuable proofs of the protecting power and ever presence of good in every case of emergency. I cannot help looking back with a heart overflowing with gratitude to the steps that have been taken since our rebirth in Christian Science, and this gratitude increases as I realize that our human footsteps were guided and guarded by the divine Mind through the ever active ministry of the Christian Science periodicals, which in their universality have also proved to be the individual stepping-stones to the Bible and Science and Health.

I thank God for our efficient Leader and for her stead-fastness in establishing the complete circle of Christian Science activities, none of which I can afford to be deprived of, since I have recognized in our Leader's demonstrations the promised gift from our heavenly Father. My earnest prayer and expectation is to gain a larger and broader vision of Christian Science, for I know that in proportion to my vision, and particularly in proportion to my utilization and expression of that vision and its activity, I shall come into my birthright as "an heir of God," coworking and cooperating in the kingdom of Christ, which is the debt I owe to the revelator of Christian Science, and to the great Way-shower, Jesus the Christ.

(Mrs.) FLORA F. GOOCH, Boston, Massachusetts.

I wish to testify to the protection and healing I have received through Christian Science. One morning while engaged in some electrochemistry, a tube containing hydrogen caught fire and burst over a sulphuric acid bath, and the acid flew into my face. I do not remember what happened immediately afterwards but when I regained my composure I was bending forward holding my handkerchief up to my eyes and repeating aloud our daily prayer from the Manual (Art. VIII, Sect. 4). I knew that divine Love governs the universe harmoniously, in infinite wisdom, and that man being the expression of Mind is subject only to its rule. I knew, too, that sight is a spiritual faculty, not at the mercy of matter, and realized that the so-called forces of matter were but the counterfeits of the real forces of Spirit, and that matter has no inherent ability to think or suffer.

Presently a friend came in and questioned me about the occurrence. I explained that some acid had splashed into my face. I tried to open my eyes but could not do so. When my friend saw the condition he was very much alarmed and wanted to know what he could do for me, and whether he should put some oil in my eyes. I silently thanked God for the teachings of Christian Science whereby I realized that the real remedy was ever present, immediately available, and operative. I informed him that I did not wish him to help in the direction indicated, whereupon he said he would have no more nonsense, and that he was going to telephone for a doctor at once. I suggested that we had better go along to the doctor, and on the way I knew that all God's ideas, dwelling in Mind, are harmonious, and could not know opposition to Truth, since Love governed.

After an examination, the doctor said he could do nothing for me just then, owing to the condition of the eyes. He took some pieces of the glass tube out of them, and gave me some lotion to put in later on, some colored glasses to wear, and advised me to go home and rest. I disposed of the lotion, but decided to wear the glasses to cover up the little abnormal appearance remaining. While we were waiting for a train, my friend remarked that the burns on my face had nearly all gone.

My parents not being students of Christian Science, I worked all the way home to know that man's real Father-Mother is God, who protects and guides with loving care. When I got off the train I could open my eyes for a few seconds at a time to enable me to find the way home. There being no one at home, I went to my room and fell asleep. When I awoke at three o'clock in the afternoon, I found that I could open my eyes and keep them open quite comfortably, and I was grateful to be able to go to the testimony meeting at our church in the evening. When anything discordant assails us, we as Christian Scientists turn to our textbooks and read, and, as I could not read, the service supplied fresh food for thought and helped me considerably. The next day I was so far recovered as to be able to go about my work as usual and without inconvenience, and in two days there was hardly a trace of the accident left. There were many minor demonstrations tributary to what I have written, but it would take too long to mention them all. One was that I suffered very little pain, and another was the overcoming of fear for my mother, and opposition from other members of my family who are not in sympathy with Christian Science. Nevertheless, each demonstration brought with it a deep sense of thankfulness to God, and gratitude to Mrs. Eddy, who enabled us to avail ourselves of the healing truth, and a feeling of security in the knowledge of the ever presence of divine Love.-WILLIAM DUNSTAN, Krugersdorp, Transvaal, South Africa.

The writer has many times blessed Christian Science for deliverance from many discordant conditions, including sickness, sorrow, and lack. Although I had known of Christian Science for some time, it was not until about seven years ago that I felt I wanted to learn more of it. I had reached the stage of utter discouragement, doctors having told me that it would be but a short time before I would be absolutely helpless and that they had done all they could for me. I then began to study Christian Science. In a very short time I was healed of chronic headaches and other ills, and I soon began to realize that the so-called incurable disease was disappearing into its native nothingness; it is now entirely The other conditions were met through the loving healed. help of practitioners. I am happy to say that Christian Science has been the only physician in our home for the past three years, my husband and mother both relying upon it There are no words that can express the gratitude I feel for the peace and comfort that have come into our home since applying our understanding of this great truth. I only hope that I may prove to be worthy of the name Christian Scientist.—(Mrs.) MABLE E. LARA, Portland, Oregon.

During the month of December, 1915, I had become reconciled to the belief that I would pass away. For some time I had been suffering from what the doctors called inflammation of the bowels, and I had got to the point where I could not eat anything; food, and even medicine resulted in severe pain. Some friends called, and Christian Science was mentioned. The next day I told my mother I wanted to be a Christian Scientist, little realizing what it meant, My mother called a Christian Science friend and asked her if she knew of a practitioner. A practitioner lovingly came to our home that day, and that night I ate, with no ill effects. The next day I sat up; the following day I went to the practitioner's office, and in a week I was back at work. I gained in weight gradually, and to-day all who used to know me say how well I look. Christian Science means everything to me; it is my only physician, and in the business world I find it an effectual help. It has made me a willing reader of the Bible, and I thank God for it.

My gratitude goes out to Mrs. Eddy for discovering and revealing this demonstrable Science to the world. I also wish to express gratitude for the loving and patient practitioners who have helped and are helping me to know that man is the perfect child of a perfect God.

(Mrs.) G. Homer Brothers, Los Angeles, California.

When I first heard of Christian Science, some fifteen years ago, I had undergone two operations for hemorrhoids, and was taking a great deal of medicine. "Science and Health with Key to the Scriptures" by Mrs. Eddy was given to me to read and in about three weeks I was healed, since which time I have not taken medicine of any kind. This healing made a deep impression on me, as many weary years had been spent in following the advice of doctors, taking medicine, and dieting. I did not at first understand what I read, but knew from my experience of healing that this book, Science and Health, contained the truth, and I persevered in reading the Bible and Mrs. Eddy's other writings. Many discordant conditions have gone from my life, and the enlightened understanding of God as Principle has removed many doubts and fears which I had held. This testimony expresses only some few of the enormous blessings I have realized through reading the Bible, Science and Health, and The Christian Science Journal, and other literature.—(Mrs.) MARGARET AMPHLETT, West Drayton, Middlesex, England.

Signs of the Times

["Look Not Behind Thee"—The Christian Science Monitor, Boston, U.S.A., Feb. 21, 1921]

With that deep, indwelling, divinely inspired vision which characterizes all of the Pauline writings, "the apostle of the Gentiles" admonished the Philippians to seek the kingdom of God and His righteousness, even as he was constantly doing, by saving unto them, "Brethren, I count not myself to have apprehended: but this one thing I do, forgetting those things which are behind, and reaching forth unto those things which are before, I press toward the mark for the prize of the high calling of God in Christ Jesus." Here is a clearly defined statement as to how we can best progress toward the full spiritualization of thought, toward that final understanding which accepts only that which really is. This is accomplished in the proportion that we put into practice what has already been learned of Truth, never looking backward into the veil of matter, but rather onward and upward, scientifically destroying every finite concept which is presented for acceptance, with the actual, spiritual law, the law which makes for ceaseless unfoldment, which neither tarries, waits, nor honors lapse, interval, or reversal.

The human mind, because of its purely suppositional nature, is always theorizing just how this or that condition, which takes place in its hypothetical realm, is to be accounted for through what it chooses to call laws of matter. For this reason, it is forever, as it were, looking back at some prior experience, asking the why and wherefore of it, and trying to judge the outcome of some present happening by some past event. To this mind there seems to be one endless repetition of material circumstances, each more or less dependent on the other. In the realm of Mind, the one and only consciousness, it is at once seen that Spirit, God, is All-in-all, that whatever actually transpires bears a definite and established relationship to Spirit, God; that each and every right action is the effect of this one and only Mind, the one cause; that there is but the one infinite idea of unfoldment, which is taking place, at every moment, and in every place, and that nothing which is so taking place can be actuated, impelled, influenced, or controlled by any theory of the so-called mind of mortals, which Mrs. Eddy has termed mortal mind. Such reasoning as this immediately turns the thought of the seeker after truth to Mind, God, and away from the seeming happenings in the realm of matter. It furthermore demands that we look forward toward God, and not backward into the byways of belief.

After the Master's sojourn in the wilderness, during which the arguments of evil were presented, one after another, in every possible guise, evil made a final effort to get his attention, promising in return the so-called riches of this world, namely, matter, if he would but accept the finite and limited universe or creation as real and true. What answer did Jesus make to all this temptation? "Get thee behind me, Satan: for it is written, Thou shalt worship the Lord thy God, and him only shalt thou serve." Jesus of course knew that to get behind meant to be removed from the mental orbit, so that the alluring promises, which evil never can and never does keep, will cease to be offered. It was the way of the East of saying: When the temptations of evil are no longer in evidence, when the lusts of the flesh are subjugated by means of spiritual understanding, when every carnal belief is crucified with the love of God, good, evil can no longer affect one's experience, be it what it may.

Still another illustration for the purpose of teaching us to look before, and not behind, is given in the nineteenth chapter of Genesis. Here we find Lot being warned of God to leave Sodom prior to its destruction by fire and brimstone. As the Scripture tells us, Lot was evidently unwilling to carry out, save in part, what was required of him. This unwillingness of his resulted in punishment, just as disobedience to the demands of Principle always does. The woman must likewise have been affected by this moral contagion, for, as they were leaving Sodom, to flee to Zoar, instead of to the high mountain, where they had been asked to go, she looked back, and became a pillar of salt. Here, it is quite evident, the writer meant to depict a fitting lesson of just how it is that men are made to suffer for resisting the loving demands of Life, Truth, and Love.

Christian Science, with its message of healing, points always to God and His idea, man. It urges us onward on our journey out of sense, into the land of Soul, where Love reigns supreme over all. It bids us seek the one and only Mind by demonstrating the ever presence of all that really is, and the nothingness of that which presents itself as being, but which never did and never can actually exist. Mrs. Eddy's constant injunction, like that of the Master, was, and is, Look to Mind, God, good. This means as well, Do not look to mortal mind for anything. Look up, not down. Look to the ideal, and keep it steadfastly before you. Look before, and not behind. Let no experience be either more or less to you than the one and only Mind knows. Cast all else behind you. Destroy every false sense with the law of Christ, which fulfills the absolute demands of Principle, honoring only what conforms absolutely to perfection.

In her illustrated poem, entitled "Christ and Christmas," Mrs. Eddy fittingly depicts the nature of evil as a serpent just behind the seeker who is finding Truth from the inspired pages of the Bible. In a wonderful article entitled "An Allegory," in "Miscellaneous Writings" (p. 328), she points out the path that each and every one must take to reach the land of Christian Science, asking, "Hast thou been driven by suffering to the foot of the mount, but earth-bound, burdened by pride, sin, and self, hast thou turned back, stumbled, and wandered away? Or hast thou tarried in the habitation of the senses, pleased and stupefied, until wakened through the baptism of fire?" This she answers, by saying, "He alone ascends the hill of Christian Science who follows the Wayshower, the spiritual presence and idea of God. Whatever obstructs the way,—causing to stumble, fall, or faint, those mortals who are striving to enter the path,-divine Love will remove; and uplift the fallen and strengthen the weak. Therefore, give up thy earth-weights; and observe the apostle's admonition, 'Forgetting those things which are behind, and reaching forth unto those things which are before. Then, loving God supremely and thy neighbor as thyself, thou wilt safely bear thy cross up to the throne of everlasting glory."

> [The Dean of St. Paul's, London, in the Evening Standard, London, England]

The clerical profession has fallen on evil days. In almost all other callings there are more applicants for admission than there is room for; some selection can be exercised; the fittest are chosen, the less fit are rejected. But for the ministry little or no sifting is possible; the bishops have to take what they can get, and the standard of admission is in consequence deplorably low. The social level of the clergy has fallen steadily since it reached its highest point at the time of Anthony Trollope's novels. The old clerical families, who belonged to a kind of professional aristocracy, have either disappeared or no longer furnish recruits for the ministry. And now that the war is crushing the parish priest,

with others of his class, under the load of taxation and high prices, the average parish shows its indifference to the parson by leaving him to starve. There are at present thousands of clergymen who cannot buy food to keep them in health.

If we consider calmly the causes of the decadence of clericalism, we shall find them in circumstances which are inevitable, and not discreditable to any one. In the first place, the whole system of public worship was designed for a state of society when very few persons read and very many were unable to read. Now we have become a reading nation. We absorb our intellectual food through the eye more than through the ear. The inveterate reader becomes obtuse to speeches, lectures, and sermons; he would rather perform his devotions at home, and improve his mind by taking down a book from the shelf. We all have access to the best that has been thought and said on the spiritual life without troubling the parson; he is no longer better instructed than his congregation; the metaphor of a shepherd and his sheep has become absurd.

In the second place, Christianity is an historical creed with a long past. It is like a river which has received affluents from all sides. Some of its rites and dogmas come from the Jewish synagogue, others from Greek philosophy, others from Roman imperialism. It has its roots far back in antiquity. This continuity with the past, which gives it an additional charm and interest to those who have been educated on the old lines, is a pure disadvantage to its acceptance with the large and increasing class who have had an education without traditions.

Thirdly, our industrial civilization has produced an overwhelming prevalence of that anti-Christian spirit which is sometimes called materialism, but which I prefer to call secularity. It is the one enemy with which Christianity can make no terms. I cannot state the antithesis more succinctly than in the words of Mr. Belfort Bax, the well-known Socialist leader, who here speaks for the whole movement: "According to Christianity, regeneration must come from within. The ethics and religion of modern socialism, on the contrary, look for regeneration from without, from material conditions."

What, then, is the remedy? It appears that modern civilization no longer needs a clerical profession, and that we can bid for popularity only by allying ourselves with those who reject the fundamental principles and methods of Christianity. This is intolerable, and is, in fact, flat treason. Is there any reason why we should not return to the example of Paul, the missionary who earned his living by tent making? Why should not we have in every parish several men and women who are licensed to read services in church, to administer the sacraments, and to do all that the clergy now do? And why should not these men and women be the parish doctor, the schoolmaster and schoolmistress, the parish nurse, and other members of the little community, without respect of class or sex? Such persons would wear a badge, like the little cross of the Church of England Men's Society, but no distinctive costume; and they would earn their living by their secular work, not by their spiritual ministrations.

There would be several advantages in this change. The church would be set free from the endless anxieties and humiliations of begging for money. We should be rid of the clerical professionalism which is fostered in the theological colleges, and which erects a barrier between clergy and laity. The ministers, being engaged in secular callings, would have the layman's point of view, though they would of course be chosen as being earnestly religious persons. The rivalries

of various denominations would vanish, and the sects themselves would quickly and spontaneously fuse. The public would feel, as they do not at present, that religion was their own business, not the business of those who make their living out of it.

[A New Kind of Religious Leadership]

In an article entitled "College Students and Organized Religion," in the current issue of The Journal of Religion, Albert Parker Fitch writes: "It is conceded that very few of the abler men in college to-day, either the students of distinguished intellectual or creative capacity, are turning toward the Christian ministry. . . . It is not because these men are devoid of religious capacity or of ethical loyalties. Quite the contrary; they are the men who are going to be the leaders of the higher life of their generation. But modern life offers many new professions and occupations into which imaginative spirits and keen minds may enter. The new engineering professions, the opportunities of big business, give scope for the work of the constructive imagination and the analysis of the keen mind, which an earlier and simpler age denied. Political and economic reform calls for the highest moral and mental qualities. Hence it is not altogether consonant with the genius of our day that it should produce such conventionally religious spirits as medieval civilization gave birth to."

In the same issue of The Journal of Religion Gerald Birney Smith writes: "In the development of Christianity we are in the process of transition from a religion of authority to a more democratic type of religion. . . . Instead of speaking of the religious breakdown of the ministry [title of an article by Professor Coe in an earlier issuel would it not be truer to speak of the beginnings of a new kind of religious leadership? As we all struggle together for better light, gifted individuals here and there will appear who with peculiar insight voice ideals and values toward which we are all groping. But in a democratic society, it is not to be expected that these leaders will all come from the ministry. . . . Let me ask again, Are we not really facing the beginnings of a new kind of religious ministry? And its day will be hastened if we frankly accept the 'breakdown' of an impossible pretension instead of suggesting that we ought by some frantic means to reinstate it."

Church Notices

Admission to Membership in The Mother Church

The next admission of candidates will take place on June 3, 1921, as provided in Article XIII, Section 2, of the By-laws of The Mother Church. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Friday, May 20, 1921. Consideration of any applications received after that date will be deferred until the November 4, 1921, admission.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to November 5, 1920, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

CHARLES E. JARVIS, Clerk,

236 Huntington Avenue, Back Bay, Boston 17, Mass.

From the Clerk of The Mother Church

Church Tenets.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to Edward L. Ripley, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society

Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in *The Christian Science Monitor*, were run off at the time of their publication in the *Monitor*.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 8¼" x 10¾". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for *The Christian Science Monitor*, *Journal*, Scntinel, Quarterly, and Heralds, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and immediate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlet in Russian

There is now on sale a new Russian translation of "Christian Science: Its Advantage to Mankind" by Edward A. Kimball, with alternate pages in English. Price 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U. S. A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U. S. A.

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, BOSTON 17, U.S.A.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder

of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large Type (18-point) on Warren's heavy India Bible paper, bound in leather. Size 8 by 1034 inches. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in The Christian Science Journal from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in The Christian Science Journal and Sentinel, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes. Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco. limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German.

Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording inval-uable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges,

single copy 50 cents; six or more, each 35 cents.

Printed in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

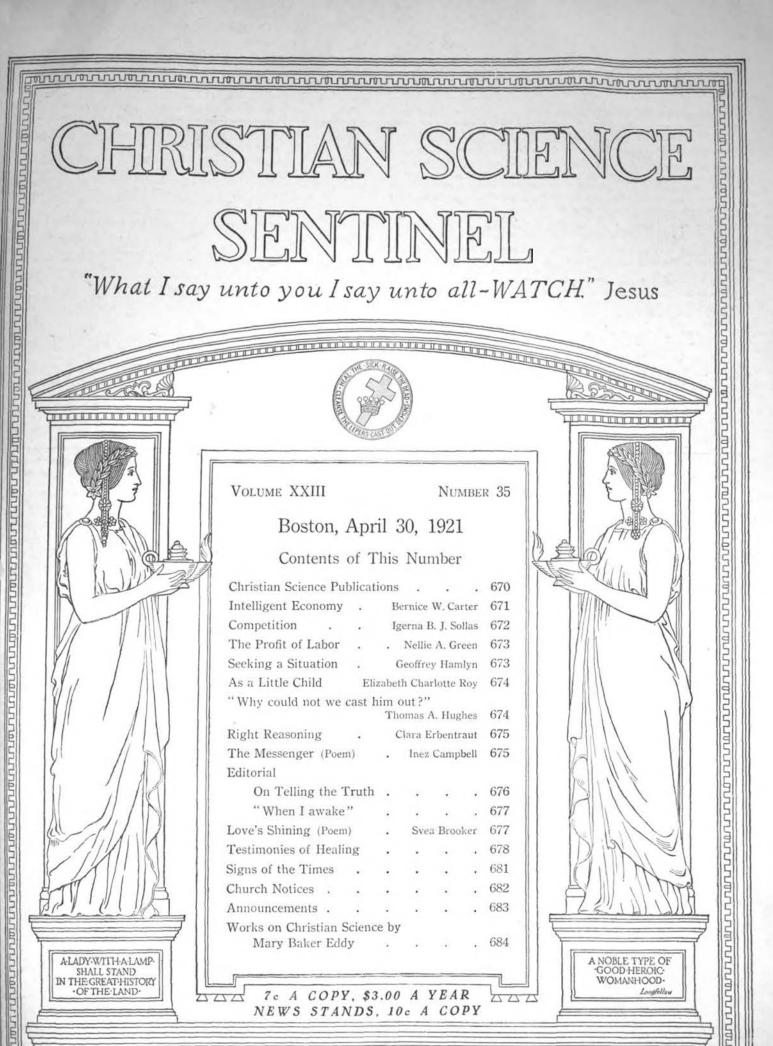

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

NUMBER 35

Intelligent Economy

BERNICE W. CARTER

MANKIND have agreed that there is only one source of wisdom, and they have accepted, at least in theory, the apostle James' advice, "If any of you lack wisdom, let him ask of God, that giveth to all men liberally, and upbraideth not; and it shall be given him." Economy, on the contrary, has been looked upon as the result, more or less, of human planning, whether the careful thrift of the housewife is referred to or the systematic arrangement of an organization. And yet so closely connected in thought are true economy and true wisdom that the conclusion is easily reached that the one is simply a result of the other. Without wisdom it is impossible to practice true economy, for that which calls itself economy in human affairs may be merely human limitation and an expression of fear, which in personal matters easily degenerates into parsimony or penuriousness.

The first step, then, in the practice of economy is to follow the advice of the apostle and pray God for wisdom. Now Christian Scientists are blessed beyond measure in having formed the habit of daily study of the Bible and "Science and Health with Key to the Scriptures," for such study is in itself a most important step in the acquiring of wisdom and is therefore the beginning of the practice of true economy. Every one who has had any measure of experience in the affairs of the world knows that ignorance is tremendously expensive. How common is the expression, "If I had only known!" How much time, energy, money, or what not one might have saved if he had only known beforehand the truth about some circumstance or condition. Now to know the truth about anything in Christian Science is to realize that the wisdom of divine Mind, the creator of the universe, is forever expressed and reflected by man. To rely fully on this wisdom and trust it to make its presence manifest results in an uncovering of all that is unwise as well as in revealing the wise and right thing to do under any circumstances. It gives the true forewarning that makes one forearmed.

In "Miscellaneous Writings," on page 117, Mrs. Eddy says: "God is the fountain of light, and He illumines one's way when one is obedient. The disobedient make their moves before God makes His, or make them too late to follow Him. Be sure that God directs your way; then, hasten to follow under every circumstance." The chief difference between the teachings of Christian Science and that of other denominations is that in Christian Science God is found to be not a magnified human being with a throne somewhere beyond the blue that vaults the sky, but is Mind, incorporeal and everywhere present as intelligence. To be sure, then, that intelligence directs one's way one must utilize reasoning power, in accord with all that he understands about God, about what is good. The one who is endeavoring to practice economy intelligently will begin his reasoning with a realization of the truth about substance, for after all, economy is, to the human sense, the conservation of substance. But here again the student of Christian Science finds himself deep in the study of what God is. Sooner or later, according to his sincerity, he reaches the conclusion that there is no economy except that which deals with thoughts. "The verity of Mind," Mrs. Eddy says on page 123 of Science and Health, "shows conclusively how it is that matter seems to be, but is not. Divine Science, rising above physical theories, excludes matter, resolves things into thoughts, and replaces the objects of material sense with spiritual ideas."

One learns, eventually, to guard one's thoughts rather than to concentrate attention upon the conservation of things or the careful expenditure of money. The result of this will sometimes be the very opposite of mortal mind's estimate of economy, for when the mortal says, "I cannot afford that," the one listening for the voice of wisdom may declare, "I cannot afford to be without it," because to admit that one cannot afford something that seems necessary and is good is to admit limitation, to aver that God's image and likeness lacks something of good, does not reflect the wholeness, the allness, of God. Just here we find that wisdom and economy join hands with brotherly love, forming an indissoluble union. One cannot, for instance, realize for his own benefit the truth that man reflects the whole of good without recognizing that what is true for him is also true for every individual; therefore he is careful to exclude from his thinking anything that savors of selfishness or envy. This is indeed true economy; for elimination is the very essence of economy, especially the elimination of waste. Now of all wasteful thoughts envy is perhaps the worst, and it plunges the one who indulges in it into an abyss from which he emerges only when he has in humility learned that the goodness of God is available to all alike and that all he lacks is understanding of the spiritual nature of creation.

When Jesus, through the richness of his comprehension of the ever presence of spiritual abundance, fed the five thousand from what seemed such a scanty store, five barley loaves and two small fishes, he not only gave a demonstration of the power of spiritual understanding to supply all human needs, but he gave an illustration of true economy. He not only eliminated all thought of matter as substance, but he commanded that the fragments of the spiritual feast be gathered up, that nothing be wasted. To those who had been fed, those fragments took the form of bread and fish, twelve basketfuls of which were collected. No doubt those bits of bread and fish were distributed again among them as they journeyed back to their homes, just as the real bread which Jesus had given them, the truth which he taught, was recalled and meditated upon.

The student of to-day, who is learning the lesson of true economy, will also see that nothing is wasted. Wisdom advises preparedness to meet the fresh opportunities that arise with every passing hour, opportunities to prove the facts of spiritual being and to test one's understanding of the truth. Therefore he is diligent in his study of the writings of Mrs. Eddy and of the Lesson-Sermon and stores up and carries with him the fragments of truth gleaned, that he may be sustained and strengthened continually. Economy, too,

- (4)

demands this storing up of reserve supply, which, regarded in another sense, may be called our income. But income must be expended. We must use our understanding. It is absolutely essential that we apply to each situation that arises all that we have learned of the truth of being in regard to that particular situation or problem. Any penuriousness in regard to this expenditure is a sin of omission against one's own self and individual progress. To be afraid that one has not sufficient understanding to use to advantage, whether it is a sick business or a sick person or any other inharmonious condition which requires attention, is to admit that one is still clinging to a sense of mortal selfhood and mortal ability and has not yet learned to trust the ever presence and allpower of Truth and Love. Brotherly love, too, depends for its expression upon such accumulation and expenditure, for it is only thus that one can truly obey the command of Christ Jesus, "Give to him that asketh thee, and from him that would borrow of thee turn not thou away."

All this may seem far from practical to the one who is turning to Christian Science for the first time and is struggling, perhaps, with the problem of making both ends of a slender income meet around what may seem to be multitudinous needs; and there is no way for him to learn how eminently practical it really is except to get down to earnest study himself and learn how divine Mind is the only governing and controlling power, and how to rely on and avail himself of this all-power and dominion at all times. At the very first moment, however, that he grasps the import of some statement of truth and makes practical application of it he will see the wisdom of the Scriptural injunction, "With all thy getting, get understanding." As his study progresses and his habits of thinking improve, he will find his personal and business affairs falling into line, reflecting the orderliness and constructiveness, the economy, of his thinking, until he finally proves in his own experience the truth of the Master's promise to those who live in the spiritual rather than the material sense of things, "All these things shall be added unto you."

In Article XXIV, Section 5, of the Manual, under the heading "God's Requirement," Mrs. Eddy says, "God requires wisdom, economy, and brotherly love to characterize all the proceedings of the members of The Mother Church, The First Church of Christ, Scientist." Since, then, one cannot be obedient to God or even be a true member of The Mother Church unless he is expressing these three attributes continually in his daily living, it behooves each one to examine carefully and see if in all things he is acting wisely, practicing economy, and reflecting brotherly love.

Competition

IGERNA B. J. SOLLAS

The obstacles encountered by the young student of Christian Science are, of course, as varied in kind as they are in seriousness. Some more fortunate beginners indeed see no difficulties at all but rather feel that they have found an answer to all their lifelong problems at once. Others again, while easily accepting the doctrine of Christian Science as the truth, are reluctant to make the sacrifice of some affection which they imagine the new teaching demands of them. Lovers of nature in particular may be heard to lament that they may no longer love the trees and flowers and other beauties of nature, because these are mere counterfeits. But that is a great mistake. Christian Science never takes away anything without putting something better in its

place. And if one has prized the trees while having had a material sense of them, a more spiritual sense will only intensify the true value to him. The beauty of all reality will be as apparent as ever, but, as there dawns on one's thought a clearer sense of what the spiritual reality is, the truth will continually gain in significance.

Any lover of nature and its beauties cannot avoid being brought face to face with its ugly side also. The incessant strife, the struggle for existence, the survival of the fittest, are always asserting themselves, though a healthy seeker may turn away to consider happier things. This thought of competition enters equally into human life and is with us from early school days, but Christian Science beautifully transforms it. The one examined, instead of thinking of himself as struggling against his friends and classmates in competition for a place or prize, finds that they are all striving together, each to reflect as much as possible of the divine intelligence. And if each could realize this, each would win a prize in comparison with which the material prize, whatever it is, is in itself a mere toy, for the fruit of each one's efforts would be a gain in understanding and that is a nearer approach to God. Paul gave the injunction, "Know ye not that they which run in a race run all, but one receiveth the prize? So run, that ye may obtain." This was addressed to all; it implies that all should obtain the spiritual prize, which is Christ. Christina Rossetti in those wellknown quaint lines, "And does the road run uphill all the way? Yes, to the very end," gives comforting assurance that at the top it will be found that there are "beds for all" -for all, that is, who persevere in the climb.

A struggle is never with one's neighbors, but always with one's false sense of self, one's wrong thoughts, which are the only enemies there are to contend with. The result Mrs. Eddy has described very tersely in "No and Yes" (p. 25), "Man outlives finite mortal definitions of himself, according to a law of 'the survival of the fittest.'" Thus the horrible contemplation of the survival of one individual at the expense of another is replaced by the calm assurance of the triumph of the spiritual and the elimination of the unessential. It has recently been asserted in the English papers that on account of trades-union rules, a British workman lays three hundred to four hundred bricks a day, while a Belgian lays from three thousand to four thousand in the same time. The statement may be an exaggeration but it contains truth enough to draw attention to the blind folly of making laws to prevent a man from doing his best. Human nature, being what it is, needs the stimulus of honest competition. Mrs. Eddy emphasizes this in a paragraph in "The First Church of Christ, Scientist, and Miscellany" (p. 266) entitled "Insufficient Freedom." No one will benefit by rules which are in direct opposition to Principle, but all concerned will suffer from

There is a by-law in the Manual of The Mother Church, the wisdom of which is clearly manifold, called "No Monopoly" (Art. VIII, Sect. 30). It reads: "A Scientist shall not endeavor to monopolize the healing work in any church or locality, to the exclusion of others, but all who understand the teachings of Christian Science are privileged to enter into this holy work, and 'by their fruits ye shall know them.'" One aspect of this wise provision is that it secures wholesome, honest endeavor through which the fittest—that is, the most spiritual—element expressed by each student of Christian Science will survive and all will benefit together. Right work necessarily results in fellow workers existing side by side with the Christian Scientist, for every person healed should become a worker endeavoring to lift

up the Christ, and, in proportion as he succeeds in this, drawing men to the truth to receive the same help by which he himself has been benefited. The more each one succeeds, the more all the others will rejoice, if they are truly seeking to lessen evil in the world. Jesus said, "Ask, and it shall be given you; seek, and ye shall find; knock, and it shall be opened unto you: for every one that asketh receiveth; and he that seeketh findeth; and to him that knocketh it shall be opened." One does not receive to the exclusion of others, but every one receiveth.

A competition to which every individual would do well to be awake is that going on for the occupancy of our thoughts and the employment of our time. A thousand and one topics or occupations present themselves for choice, and the selection which is natural to the Christian Scientist is always the most spiritual. Mortal mind is arguing for ease. for doing some work lower than the highest of which the individual has demonstrated capacity, and again mortal mind argues for human wisdom, for human love, and human life, while Christian Science teaches that "No wisdom is wise but His wisdom; no truth is true, no love is lovely, no life is Life but the divine; no good is, but the good God bestows" (Science and Health, p. 275). Thus as one progresses, human love is gradually replaced by the divine, and there is no loss in the process but only gain, the substitution of a divine idea, infinitely satisfying, in place of a human concept.

The Profit of Labor

NELLIE A. GREEN

WE read in the Bible, "In all labour there is profit: but the talk of the lips tendeth only to penury." Before commencing to learn the true nature of God and His creation, one lives with the door of spiritual sense closed, laboring for matter to bring happiness, to accumulate the riches of this world, or to live longer for their enjoyment. Jesus taught the right way to labor, in all his experiences with the people. After he had fed the multitude with the loaves and fishes, some time was spent in searching for him, and finally he was found at Capernaum. He knew they sought him for the material gain, and told them so, admonishing them not to labor for the meat which perisheth, but for that meat which giveth everlasting life; and when they asked him how they might work the works of God, his reply was to believe him, whom God had sent.

When one, finding his business threatened with inactivity by reason of scant supply, lessened demand, and so on, causing loss to all connected, desires to work as Jesus taught, he finds the labor to be mental, and seeks to know what God has already given him. As Mrs. Eddy says, "Both Science and consciousness are now at work in the economy of being according to the law of Mind, which ultimately asserts its absolute supremacy" (Science and Health, p. 423), and the profit of this labor is recognized as the proving of the one consciousness as God, and by the expression of it in daily activities. The price of this unlimited and inexhaustible knowledge is paid by giving up or casting out "the talk of the lips," or what the physical senses may say. Thus fear of lack and loss, worry, and idleness disappear, and if any of these false beliefs reappear it means more earnest and honest effort to uncover and uproot them, that the abundance of good and the activity of divine Love may appear. Solomon says, "A faithful man shall abound with blessings." This labor is joyous as the release from the bondage of this world's disturbances is realized and it is perceived that material sense is not of the kingdom of God.

There can be no bluffing out of wrong conditions nor anything gained by only denying their reality, for the effects of these conditions are present until corrected with spiritual understanding. Since God or Mind is the only true consciousness or intelligence, all opportunities must be known to God; and man in His image and likeness, reflecting this intelligence, is enabled to see and grasp these opportunities as substance. Mrs. Eddy writes, on page 468 of Science and Health, "Substance is that which is eternal and incapable of discord and decay." We need not labor for more opportunities but for more of the Mind of the Christ, to see the ever present opportunities. Our work is the same to-day as yesterday, and as it will be forever, and this constant turning to God lessens mistakes and losses and we understand God to be the only employer. Thus the suggestive appeal for work and the fallacy of waiting for adjustment is silenced, not with the "No help wanted" sign but with the understanding that all work is God's work, and man, the result, is continuously expressing God, and as God's work is perfect and eternal, it requires no adjusting.

Being alert when the suggestions of inactivity, idleness, and loss threaten, gives the opportunity to prove the power of right labor, with the possession of the one consciousness, God, and the fruits of profit gained by seeking first the kingdom of God. The things added appear as men and women at work producing and improving needed supply and receiving just compensation. The parable of the ten virgins teaches the wisdom of keeping our thought filled with the truth so that when midnight (the hour of need) comes we shall be found ready with wisdom to dispel the darkness.

Seeking a Situation

GEOFFREY HAMLYN

ONE of the first things we learn in Christian Science in seeking a situation is, paradoxical as it may seem, not to seek one; that is to say, one particular situation. By this it is not meant that we should not seek employment; what is meant is that we should be careful lest we outline exactly what the employment is to be. God has the proper place, the proper work for all; too often, however, mortals are unwilling to seek the divine guidance, but first decide what they want, then find fault with God if they do not get it. This is merely another way of saying that they let selfwill take charge of them and that they count on self-will to do what they feel that God is unwilling or unable to do. What, then, is the way to seek a situation? In the first place let us put aside all self-will and be ready to do what divine Love may require of us. It is the teaching of Christian Science that man is Mind's idea, one with Mind, reflecting Mind, reflecting the divine will. Self-will, the will that believes it knows what it wants and means to get it, is merely an expression of the carnal mind, and when it claims to hold sway the divine guidance which brings harmony seems lost. The belief in self-will is the mistaken claim of a will apart from the one omnipotent will, and as Mrs. Eddy says in "Science and Health with Key to the Scriptures" (p. 537), "Error excludes itself from harmony." Only as the individual puts aside human will and seeks the divine guidance can harmony result. This, then, is the first step, and the most important one. In fact, one might almost say it is the only step necessary, were it not for the general belief in limitation.

In these days of widespread unemployment there are many, no doubt, who would be willing to undertake any work that might be offered them, but to whom no offer of

work is made. Here Christian Science comes to remind us that God is indeed "our refuge and strength, a very present help in trouble." Limitation is based on belief in the reality of matter, on unwillingness to accept the testimony of the senses at any other than its face value, and as long as the individual persists in this attitude the chances of his seeing the true opening for him are small. It is well to remember, however, that what are known as the miracles of Jesus of Nazareth constituted one long series of reversals of the testimony of the physical senses, and we have his assurance that those who believe on him, understand him, shall do the works that he did. We see, therefore, that we cannot accept this testimony and that instead we must know that our loving Father-Mother, the divine, omniscient, and omnipresent Mind, has just the proper place, the proper work for each of us, and that the knowing of this fact will dispel the false evidence of the material senses; for Jesus said, "If ye continue in my word, then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free." Free from what? Obviously from that which is false-from a mistaken sense of things. "The kingdom of heaven is at hand." That was the burden of the Master's gospel or good news, and we may be sure that there is no lack in the kingdom of heaven, any more than there is sin or sickness or death. The fact is that the world has been mesmerized by the testimony of the material senses, and Christian Science has come to free it from their thralldom and to reveal the harmony of God's kingdom, present here and now.

As a Little Child

ELIZABETH CHARLOTTE ROY

THE beautiful meaning of the words spoken by our Master, "Suffer the little children to come unto me, and forbid them not: for of such is the kingdom of God," has been realized recently by the writer with the joy that ever accompanies true demonstration. The privilege of teaching an infant class in the Sunday school for one and one half years has revealed such receptivity and natural love of Truth that these qualities, so spontaneously manifested, indeed form helpful examples for older students. The way these little ones put their knowledge into practice is sometimes astounding and the simple, childlike faith they show and the way they try to help each other is beautiful to behold.

A small boy who knew nothing of Christian Science was placed in a class and from the first was keenly interested in the readings from the Bible. If there was a word that he did not know the meaning of he always stopped the class and said, "Please, teacher, I don't know what that means." This boy aroused the whole class and made them take the keenest interest in what they were learning. One Sunday, just as the children began to repeat the commandments, he said, "I feel as if I could not speak; something is hurting my throat." The other children were then asked what was to be done. They immediately replied, "Turn out error and put in the truth; he is a child of God and cannot be sick." One little boy looked up and said, "Yes, turn out error and hammer, hammer, hammer, till it's gone," beating time on his knee to make his statement more emphatic. After repeating in unison the "scientific statement of being" (Science and Health, p. 468) the lesson was continued and in a few minutes a little bright face looked up and said, "It is gone now;

On another occasion a small boy and his sister, who had been attending the Sunday school for a short period only, went to stay in the country with their grandmother. Soon after their arrival, a tiny bird flew with great force against the windowpane and fell into the garden apparently dead. Their grandmother, who was not a Christian Scientist, told the children to pick it up and give it to the gardener to take away, but the children carried it very carefully down into the garden and as they sat under a tree, the little boy holding the bird in his tiny hands, they sang the first stanza of Mrs. Eddy's much loved hymn (Poems, p. 4):—

O gentle presence, peace and joy and power; O Life divine, that owns each waiting hour, Thou Love that guards the nestling's faltering flight! Keep Thou my child on upward wing tonight.

This he repeated two or three times, then opening his hands said, "Fly away, little bird, you are not hurt," and away it flew. Then turning naturally to their play, both children forgot all about the incident. Some little while later, being questioned by their mother as to what they did with the bird, the little boy replied, "We just sang 'O gentle presence' two or three times,—only a little bit of it, because we did not know any more."

Surely these children's simple faith should inspire older students to greater efforts. Jesus said, "Whosoever shall not receive the kingdom of God as a little child, he shall not enter therein," and again, "Out of the mouth of babes and sucklings thou hast perfected praise." Surely praise is being perfected by these little ones, and with what earnest desire can we therefore pray for the fulfillment of Mrs. Eddy's words in "Miscellaneous Writings" (p. 110): "Beloved children, the world has need of you,—and more as children than as men and women: it needs your innocence, unselfishness, faithful affection, uncontaminated lives. You need also to watch, and pray that you preserve these virtues unstained, and lose them not through contact with the world. What grander ambition is there than to maintain in yourselves what Jesus loved, and to know that your example, more than words, makes morals for mankind!"

"Why could not we cast him out?"

THOMAS A. HUGHES

*HE incident of the healing of the demoniac child by Jesus, which is recorded by Matthew, Mark, and Luke, is one that attracts even more than the usual attention, because each writer testifies that the aid of the disciples had been requested previously, and that their efforts had not resulted in the healing of the case. Matthew records that the disciples asked Jesus, "Why could not we cast him out?" and that he attributed their failure chiefly to lack of faith. Mark's account—the most complete of the three—implies a great element of doubt and want of faith in the child's father, for in his request to Jesus that his son be healed he says, in part, "If thou canst do anything . . . help us," to which Jesus answers with the conditional reply, explaining the state of consciousness requisite to heal, "If thou canst believe, all things are possible to him that believeth." This record gives Jesus' reply to the disciples' question as to why they had failed, as follows, "This kind can come forth by nothing, but by prayer and fasting." Luke's account of Jesus' censure of the disciples for their failure is given in these words, "O faithless and perverse generation, how long shall I be with you, and suffer you?"

The words belief and faith in these records can justifiably be regarded as synonymous terms, and so the difficulty as far as it concerned the child's father and the disciples seems to have been due to a lack of faith, which militated against the results ordinarily expected in answer to prayer, and may in fact have prevented them from being able to pray aright. There are few of us who have not at some time or other

been disappointed at the failure on our own part, or that of others, so to apply the truth in Christian Science as to bring about the desirable result, and thoughtful consideration of the incident under notice seems to point out that it is, to-day still, an adjustment with regard to faith that is called for to enable more progress to be shown.

What, then, is the rightful prayer of rightful faith? As Mrs. Eddy has explained in the first sentence of the first chapter of the textbook, "Science and Health with Key to the Scriptures," "The prayer that reforms the sinner and heals the sick is an absolute faith that all things are possible to God,—a spiritual understanding of Him, an unselfed love." First, then, to have faith in God, "a spiritual understanding of Him," we must understand God as Spirit, lose all personal sense of God, and realize His attributes of omniscience, omnipotence, and omnipresence, and this spiritual understanding will raise us above the earthly senses of finite human conceptions to the heavenly apprehension of Truth, with the divine attributes, and to a realization of the realities of being. Spiritual understanding is complete harmony, and it annihilates all sense of discord.

Secondly, to have the right understanding of God, we must understand God as Mind, and man as the individual idea in Mind. Mind creates all, and is the only substance and intelligence of all. All right thoughts are emanations from Mind, and as Mind and its ideas are inseparable, all are emanations from Mind, and appear in greater degree as mortal sense testimony is refuted through the growth of spiritual understanding, by which the claims of the material senses are proved to be naught. Such thoughts are not conscious of opposition. It was Jesus' faith in Principle which enabled him to express the Christ, and the extent of his faith in Principle was the measure of the extent of his demonstration, his eternal coexistence as a son of God. And it was the extent of his reflection of God which entitled him to the appellation Master.

The remarkable synopsis on page 115 of our textbook, giving the "Scientific Translation of Mortal Mind," serves well to direct our studies in the endeavor to demonstrate our individuality in Mind, and it marks the necessary stages out of materiality. On page 116 of Science and Health we read, "A correct view of Christian Science and of its adaptation to healing includes vastly more than is at first seen," but the eventual triumph, the appearing of man as God's image, is assured because the eventual triumph of Truth over error is assured, for "they shall all know me, from the least of them unto the greatest of them, saith the Lord."

Finally, to be able to pray aright, we have to dissociate ourselves from all thoughts which suggest limitation of any kind,-everything that would seek to negative the eternal truth of God's omnipotence, omniscience, and omnipresence. We must shoulder the cross, which means fighting the world's opposition to Truth and Love. "Love," as Mrs. Eddy has written on page 96 of Science and Health, "will finally mark the hour of harmony, and spiritualization will follow, for Love is Spirit." The eventual triumph of Love is additionally assured because of the infinitude of Love's patience, which must finally wear out all so-called opposition, and compel the recognition of God's allness. This compulsion, however, is a compulsion of compassion, through the very nature of Love's quality, and though the way seems sometimes dark and dreary, the darkest hour precedes the dawn; we can know that there must be proved such a state of spiritual consciousness, with its consequent spiritual power, to every individual, that there will be no more need to repeat the question, "Why could not we cast him out?"

Right Reasoning

CLARA ERBENTRAUT

JESUS once said, "Go ye into all the world, and preach the gospel," and again, "Heal the sick." Mrs. Eddy says, in "Science and Health with Key to the Scriptures" (p. 418), "Speak the truth to every form of error." Now that is what Christian Science is doing to-day; it heals the sick by correcting their false view of life in matter, showing through demonstration that right thinking about God and His idea is what heals. God never made disease. All that God made is good, active, and intelligent. Disease does not possess these qualities. Thus it is proved to be false. That which has no life or intelligence cannot exist. As soon as a man sees he has been snared by mere illusion, he awakens to the true fact of being, the sense dream vanishes, and he is free.

In Science and Health (p. 252) Mrs. Eddy says, "When false human beliefs learn even a little of their own falsity, they begin to disappear." Man's birthright is dominion and he must prove his dominion by demonstration just as he proves a problem in mathematics. He does not understand how to work the problem unless he can prove why he puts down the figures, knowing as he does there is a rule to apply. He carefully reasons it out by this rule and by so doing gains the right solution and therefore obtains the correct answer. Just so is it in Christian Science. Every problem is worked out through right reasoning. To reason correctly we must begin by knowing God as infinite Mind, and all that is included in that Mind as infinite idea. Since Mind, governing all, must be the source of action, and all that Mind created is good, activity must be harmonious. The understanding of this would wipe out the delusion that disease has place, space, or power.

A man proves the sonship through right reasoning, and by so doing intelligence is unfolding as the absolute right to be free. It has often been said that sin, disease, and poverty seem real, but because discord is their very nature Christian Science classifies them at once as false and, because they are false and discordant, proves them unreal.

In the fifteenth chapter of Matthew we read, "Not that which goeth into the mouth defileth a man; but that which cometh out of the mouth, this defileth a man." From this it is seen that it is wrong thinking that drags one down. To correct this it is necessary to think aright, to speak the truth about all things. The truth that there is but one Mind gives man an opportunity to work out his salvation, for, as the Bible says, it is to this end that God works with us; therefore "let us not be weary in well doing: for in due season we shall reap, if we faint not."

[Written for the Sentinel]

The Messenger

INEZ CAMPBELL

On a bare gray bough as gray as my heart,
A little bird did sing.
What is the message you impart?
I begged of the tiny thing.

How can you be so blithe and gay, When all my world seems wrong? Even the leaves have fallen away, And yet you sing your song.

Then a note sublime reached my sad thought, Joy's meaning to reveal: This mortal sense God hath not wrought; Eternal peace is real.

On Telling the Truth

It was a great spiritual insight which led the Quakers to insist upon a strict adherence to the truth. Unfortunately, it was an inspiration unsupported by metaphysical understanding, with the result that its effects were largely frittered away in objections to the use of "we" for "I," or the social amenities implied in such a phrase as "Good day." At the same time the instinct which guided George Fox in his insistence on absolute veracity was divine. The Roman was as sure of this as the Hebrew who wrote Esdras, and the conclusion has come down to our own time in a whole bundle of proverbs. Yet, in spite of it all, absolute truthfulness was regarded by the ancients, and has been regarded ever since, rather as a counsel of perfection than as a workaday possibility. Not until Christ Jesus came preaching on the Jordan was the metaphysical aspect of the matter ever put fairly and squarely before the people, and even then, in the dark centuries which followed, human philosophy once more accepted the ideal of the counsel of perfection, nor was it until Mrs. Eddy gave Science and Health to the world that the full scientific significance of Christ Jesus' teaching was made plain, once more, to humanity.

Christ Jesus defined what may be termed both the absolute and the negative side of the matter quite clearly in this teaching. To those Jews who would have been his followers, he said, in the temple, "If ye continue in my word, then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free." The metaphysical meaning of this is, of course, perfectly clear. The truth, Jesus was saying, to his audience, is absolute. If you abide in it mentally, everything that is untrue, and so out of Principle, must be excluded from your consciousness. This will make you free from the influence of evil in the exact degree in which you maintain your position, and so harmony will be gradually substituted for inharmony in your lives.

In order, however, that there might be no mistake as to the omnipotence of Truth, Principle, Jesus, almost in the next breath, proceeded to dispose of evil as anything beyond a mere negation. "Ye," he said, ye who represent the carnal mind, "are of your father the devil, and the lusts of your father ye will do. He was a murderer from the beginning, and abode not in the truth, because there is no truth in him. When he speaketh a lie, he speaketh of his own: for he is a liar, and the father of it. And because I tell you the truth, ye believe me not." This explanation of the negative, as simply nothing, is as direct and clear as his explanation of the absoluteness of the truth. The devil is the personification of evil, and evil is a lie, and a lie abides not in the truth, or, in other words, has no actual existence. In reality, when metaphysically understood that is to say, the lie has never existed. By a simple process of deduction, then, a man's subjection to evil is in the precise ratio of his fear of and belief in it. But this fear and this belief must begin to be destroyed as his knowledge of the truth increases. It is the fact, then, of the existence of Truth that frees him, and in freeing him, heals him.

All this would have been clear enough to the world if the world had not persistently yielded to the mesmerism of its old beliefs, and kept reverting to its fear of the powers of evil deities. There was something more than mere fable in the story which the Duchess of Orleans used to tell of the good and malignant fairies who attended the birth of her son. There was in it that solid conviction to which Mrs. Eddy refers when she writes, on page 460 of Science and Health: "Sickness is neither imaginary nor unreal,-that is, to the frightened, false sense of the patient. Sickness is more than fancy; it is solid conviction. It is therefore to be dealt with through right apprehension of the truth of being." That is what Jesus strove to make clear, in the temple, "to those Jews which believed on him." It is, indeed, what he persistently insisted upon, and it is what Mrs. Eddy equally persistently insisted upon, in the passage just quoted, and from one end of her writings to the other. Referring to the words of Jesus, already quoted, she says, on page 357 of Science and Health: "Jesus said of personified evil, that it was 'a liar, and the father of it.' Truth creates neither a lie, a capacity to lie, nor a liar;" whilst of Truth she writes, on page 287: "Truth and error are unlike. In Science, Truth is divine, and the infinite God can have no unlikeness. Did God, Truth, create error? No! 'Doth a fountain send forth at the same place sweet water and bitter?' God being everywhere and all-inclusive, how can He be absent or suggest the absence of omnipresence and omnipotence? How can there be more than all?"

It must be clear from this how entirely right the Quaker instinct for absolute veracity was. If George Fox could only have grasped the metaphysical ultimate of what he was saying he would have placed humanity under even a greater debt to him. For George Fox was unconsciously insisting on the fact that every departure from Truth is a scientific danger, and that just as the engineer cannot with impunity miscalculate the strain upon a bridge, so, to the man insisting that truth is of God, every departure from truth, however slight, is a repudiation of God, Principle. Just, then, as a mistake in the engineer's calculations would have the effect of wrecking his bridge, so every departure of the Christian from absolute veracity must have the effect of endangering his knowledge of the truth which he is professedly looking to to free him from the false arguments of evil.

A famous engineer once explained to the directors of his company how the collapse of a small bridge had revealed a miscalculation which might otherwise have entailed incalculable disaster. But that disaster is sought and welcomed by the man who proceeds from one lie to another. Every fresh deviation from the truth brings him more completely under the sway of evil, and renders it increasingly difficult for him to gain that knowledge of the truth which, ultimately, can alone free him. The liar, indeed, finds scant comfort in the Bible. In Revelation his lot is the lake that burneth with fire and brimstone, which is, of course, only the writer's metaphorical way of saying hell. But the doom is inevitable, for if a knowledge of the truth is rewarded with freedom from the lies which constitute evil, then a surrender to evil must mean submergence in its lies. To any one, consequently, who understands metaphysics, even in a slight degree, strict veracity is a necessity rather than a virtue. And

. . . .

veracity does not begin and end in words, it begins and ends in thought, for a man who thinks truly is incapable of false words. Shakespeare with his wonderful genius for stating metaphysical facts, has put this quite perfectly,

> This above all: to thine own self be true, And it must follow, as the night the day, Thou canst not then be false to any man.

> > FREDERICK DIXON.

"When I awake"

Those who seem satisfied to continue their wonted modes of thinking and acting may question as to whether it is really desirable to comply with disturbing demands for greater awakeness. Human complacency dislikes to be aroused. Indeed, how is one to know that some one else's concept of alertness and vigor is worth making any effort for? The student of Christian Science has no right, of course, to impose his sense of energetic animation on others against their wish. Demonstration, rather than precept, is the effective arousal for a world of seeming inertia. Only in proportion as Christian Science proves to humanity that its expression of Principle actually means health, harmony, and happiness for those who rely on it, can it attract people to its ideals and thus lessen the ills of mortality.

When people see that Christian Science has genuine good to offer, they turn to it with gladness. Even those who may have been attacking what they have mistakenly supposed Christian Science to be, have at least been active in their thinking. In some way inaction or misdirected action must be aroused from its futility. When stubborn resistance to the truth is turned into steadfastness for the truth, as Saul was turned into Paul, it is proved that the divine Mind makes use of every positive quality. The quality of Principle is, in fact, the only quality that ever has been real.

Many who accept the general proposition that it is desirable to be awake are rightly reluctant to accept unquestioningly some one else's interpretation of what it means to be awake. Each one is entitled to prove for himself the interpretation that is true for him, for the alertness of divine intelligence is without human limitations. A sense of independence, when the truth of it is found to be based wholly on Principle, is excellent. Indeed, the very independence which may have seemed to keep one aloof from Christian Science for a time is a quality to be cherished in proportion as it is understood in its genuine meaning. Yet each one must recognize that his old human belief about independence is by no means all there is to the true idea. The free reliance on Principle is immensely broader than any human sense of independent thinking.

On page 358 of "Miscellaneous Writings" Mrs. Eddy says: "All men shall be satisfied when they 'awake in His likeness,' and they never should be until then. Human pride is human weakness. Self-knowledge, humility, and love are divine strength." The awakening to the actuality of Principle and its likeness or expression is a constant joy. Through the daily happiness that is virile, not sentimental, the student of Christian Science can best prove that he has something of inestimable value to himself, and thus help to overcome the world's disdain of the truth. The whole world is looking for joy. Of course the attempts to find a good time n materiality are pitiful. As the many find that real, tangile joy, day in and day out, is to be experienced through the ractice of Christian Science, they turn to Principle with

eagerness. This is the awakening which subdues human pride.

It is one thing to be obviously happy when everything is going smoothly. It is more important, however, to be truly happy in the face of the worst attacks of evil. Yet the real rejoicing does not consist merely in a patent smile that hides a sense of inner turmoil and despair. A superficial lightness of manner is not convincing. A smirk of self-conceit is of no benefit either to one's self or to the rest of the world. The example of glad practice strictly in accordance with Principle is an awakening influence far more effective than any amount of persuasive statement of theory. That Christian Science does operate to improve daily living, each one can ascertain for himself. As this proof unfolds, one learns how solid the happiness of the divine Mind is.

Christian Science is winning its way to general acceptance throughout the world, in spite of any seeming shortcomings of those who have been studying it. As Mrs. Eddy says on page 2 of the Message for 1902, "Absolute certainty in the practice of divine metaphysics constitutes its utility, since it has a divine and demonstrable Principle and rule-if some fall short of Truth, others will attain it, and these are they who will adhere to it." When one is tempted to condemn those who stand before the world as Christian Scientists, it is well to remember that what Christian Science claims is that, because it is based on absolute Principle, it has succeeded in improving the experience of those who have sincerely relied on it. If some seem far from perfect still, it is possible that they may have been even worse when they first began to study. Christian Science improves a man's thinking and living from the very point at which he begins to turn to Principle, and of course this point may seem to be different for every different seeker.

Sooner or later every one must awaken to the spiritual fact that man lives in Mind, not in matter. This is the awakening to the conscious activity of divine intelligence which is the experience of man in the divine likeness. On page 4 of "Pulpit and Press" Mrs. Eddy writes: "Who lives in good, lives also in God,-lives in all Life, through all space. His is an individual kingdom, his diadem a crown of crowns. His existence is deathless, forever unfolding its eternal Principle. Wait patiently on illimitable Love, the lord and giver of Life. Reflect this Life, and with it cometh the full power of being." So each one must learn for himself that the only satisfaction lies in alert living as the expression of the divine consciousness, quite apart from any belief in matter. Thus one learns to rejoice with all humility that the words of David are true: "As for me, I will behold thy face in righteousness: I shall be satisfied, when I awake, with thy likeness." The time for this awakening is ever now.

GUSTAVUS S. PAINE.

[Written for the Sentinel]

Love's Shining

SVEA BROOKER

As a flower its perfume sheds for all, So let thy love in blessed radiance fall, To cheer a heart bowed down with grief and care; "Let thy light shine,"—this is unceasing prayer.

As ice and snow melt 'neath the sun's warm ray, So in Love's light all fear doth melt away. In word and deed God's ever presence prove; His kingdom now is here, the realm of Love.

Testimonies of Healing

I did not take up Christian Science for physical healing. Having lost my only son in the war and finding nothing helpful in the teachings of the denominational church of which I was then a member, I was searching for help and reading everything offered to me as comforting or helpful. Among the books offered was the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy. As my grief would not let me sleep I read it almost entirely through in the nighttime, and then returned it, but parts of it kept recurring to me, until I was impelled to sit down and write for a copy. When I got it I again read it night after night, and its truths kept unfolding to me, little by little, and while this process was going on I discovered that I was healed of goiter of twenty years' standing; then when I realized that God is the only Physician, rupture and several minor ailments disappeared into their native nothingness. Being by this time quite convinced that I had at last found the truth, I went to a London church and was most lovingly helped by a member there, and later enjoyed the privilege of class instruction and became a member of that church, also of The Mother Church.

A little over a year ago a few of us who had become interested in Christian Science started reading the Lesson-Sermon together, and this has developed into a gathering of thirty-two people. Every discordant condition is yielding to Truth and I am finding myself free to give all my time to the work of Christian Science. My heart is full of gratitude to God and also to our beloved Leader, Mrs. Eddy, whose untiring effort has made this understanding of the Scriptures available to all.—(Mrs.) Eveline A. Ellis, Rosherville, Kent, England.

I first heard of Christian Science a little less than four years ago, at which time I was a nervous wreck. I had tried different curative methods, including osteopathy and chiropractic treatment, and had had an operation for appendicitis. After several weeks in a sanatorium I made a trip to the mountains thinking the change of climate would help me, but returned disappointed and then went through a clinic, and finally returned to my home worse than ever. My head and eyes pained me every minute, day and night, my stomach was in bad condition, and fear was so great that I thought I would lose my reason. I told my wife that I would not leave home any more, as I had positively finished with doctoring. I had gone to church and Sunday school some and had prayed, to the best of my ability, that I might be healed, and different ministers who came to see me prayed for my recovery, but I did not get any better.

I then heard of Christian Science through a man staying at our place who said that he had heard of people being healed by it. I had never heard of Christian Science before, and did not know what it was, but in a few days another man came along and told about the same story and said he knew of people being healed through Christian Science. In another week, a third man told me that some time previously he had received help from Christian Science. When he left I told my wife the good news. She went over to one of the neighbors that same evening and they happened to have a copy of the Sentinel that had been sent to them, and she brought it home and read it to me. It certainly was the best reading I had ever heard. When she read the testimonies the thought came to me that I could be healed if I could only read. I sent for more literature and one day as I lay in bed thought I would test my eyes, so picked up the Sentinel and

started to read, and my eyes have never failed me since. The healing of headache and stomach trouble was slow, it being about two years before I was healed.

Sometimes the argument of discouragement would come with the thought of giving up, but the following encouraging words from Isaiah were always with me: "They that wait upon the Lord shall renew their strength; they shall mount up with wings as eagles; they shall run, and not be weary; and they shall walk, and not faint."

There is not a church near us, but we take the Journal, Sentinel, and Monitor, and enjoy the Lesson-Sermons, and have nearly all of Mrs. Eddy's works. I like the testimonies and usually read them first, and often wonder how we got along without Christian Science. It has taught me that God is the source of health, whereas before I thought that God made me sick. With thankfulness to God, and gratitude to Christ Jesus and to Mary Baker Eddy, the messenger of Truth to this age, and for Christian Science, I offer this testimony as one who has sought God and never found Him wanting.—W. S. Wilhite, Kanawha, Iowa.

I can testify that the above healing has been permanent, and trust my husband's experience may prove a help to many. Our little son and daughter and I have all received help through Christian Science, and while at one time entertaining a sense of antagonism toward Mrs. Eddy I am now grateful to her; also to the loving practitioner who so willingly helped us all.—(Mrs.) VERNA B. WILHITE.

About twenty-five years ago I was led to Christian Science for the healing of chronic neuralgia of the head and face. Owing to the severity of these attacks my face would be distorted while they lasted. Materia medica in many countries had failed to give me even temporary relief. Because of the overwhelming fear of the suffering, the healing of this condition through Christian Science extended over several years, but never once during the slow but sure emergence was I tempted to have recourse to materia medica. Had I not proved through long experience that drugs were powerless? One by one the attendant conditions left me until I knew that fear was eliminated and health restored.

Words fail me to relate all the healings that have come to me and mine during these years. I am especially thankful for the overcoming of an unpleasant disposition, and for the peace and harmony that now reign in my home. I have seen, among my circle of acquaintances, so-called incurable diseases destroyed and health reestablished, the effects of accidents overcome, and children's ailments relegated to their native nothingness.

Great as have been the physical, financial, and material blessings, however, nothing can compare with the continuous inward joy, peace, and unfailing happiness that come to us in proportion as we realize the ever presence of infinite, all-embracing Life, Truth, and Love—God, our Father-Mother.

(Mrs.) Annie Pennebaker, Modesto, California.

My interest in Christian Science was first aroused when a friend turned to it for healing. The interest, however, was prompted by the desire to dissuade that one from pursuing the study of Christian Science, and arguing that this Science was but another false doctrine, and not in accord with the Scriptures. But as my prejudices and preconceived opinions had been formed entirely from remarks made by people antagonistic to Christian Science, I determined at least to be fair and to investigate the matter for my own satisfaction. About that time an invitation to a Christian Science lecture

was received. At this lecture, it was made clear to me for the first time that the real man is not made up of matter, blood, bones, et cetera, but that he is spiritual, the image and likeness of God, divine Principle, and that as God is spiritual, His image or reflection must likewise be spiritual. The understanding, also, that Jesus was the human concept and Christ the divine idea set at naught the old denominational belief that Jesus was God. A copy of the Sentinel which was given to me was read eagerly from cover to cover. The sections which made the deepest impression at the time were that devoted to testimonies, which seemed so sincere, and the one then called "Selected Articles." The arguments refuting false accusations were so clearly and logically set forth that it left no room for further questioning as far as I was concerned and only created the desire to know more of the healing power of this Science and how the healing was accomplished. "Science and Health with Key to the Scriptures" by Mary Baker Eddy was procured, and, as in the case of so many others, it was found to be the truth,—the truth. indeed, whereof Pilate inquired of Jesus.

Not many months after this an occasion arose for me to take a definite stand for Principle. Thus far the result of my reading and study had been more or less theory without any manifested proofs of the efficacy of the healing power of divine Science. I had been suffering from biliousness, and for several days had taken no food, not even water. I was told that something must be done. Either I must have help from a Christian Science practitioner, or call in medical aid. Evidently this was the valley of decision: should Principle be strictly adhered to, or should material methods still prevail? Sufficient understanding had been gleaned from Science and Health to make me doubt the efficacy of material means, and then the thought that God is all-power and all-presence helped me to decide. A Christian Science practitioner was telephoned to and absent treatment was given. Within half an hour food was asked for and was given to me, and the next morning I was up and made a trip downtown.

Shortly after this a healing was accomplished through reading Science and Health and the periodicals. For years prior to this time I had been subject to an attack of tonsillitis every winter. The condition lasted from ten days to possibly two weeks. When the symptoms were again manifested I took the textbook, a copy of the Journal, and a copy of the Sentinel and read practically all day, refusing to acknowledge any effort for recognition that the material senses seemed to make. The next morning I awoke refreshed and free and have never had a recurrence of that disease. This was truly marvelous to me, for I had had a glimpse of the truth that proved that man-made laws need no longer be feared and submitted to, for the real man is at all times subject only to the divine Mind and thus free from human will and domination. Mrs. Eddy says in Science and Health (p. 217): "When you have once conquered a diseased condition of the body through Mind, that condition never recurs, and you have won a point in Science." To me it was as though one had been under the hallucination that two and two equals five. Then when that incorrect answer was rectified and the true answer known to be four, the return to the belief of two plus two equals five would be an utter impossibility, for with exact knowledge it has been proved to be four.

An automobile trip of about five hundred miles over the hot desert roads of Nevada, in the summer time, was to me another interesting proof of the omnipotence of God and of the care afforded by divine Principle. Instances of protection were made manifest all along the way, but what I was particularly grateful for was the entire freedom from sun-

burn, as much fear had been entertained and the desire to use material means for protection had to be overcome. The trip was made in an open car and we were practically three full days on the road. It is, indeed, a constant cause for rejoicing to know that one's remedy is always at hand in the knowledge that God, divine Mind, is all-intelligence, all-power, and man as His image and likeness reflects intelligence and perfection. I am sincerely grateful for Christian Science.

(Mrs.) Eleanor M. Thomas, Boston, Massachusetts.

4

I have great cause for rejoicing, for the many blessings that have come to me through the study and application of Christian Science, the demonstrable truth as taught and demonstrated by its Discoverer and Founder, Mary Baker Eddy. Twenty-two years ago I was a very sick man and, having tried many material remedies, without result, knew not which way to turn for relief, when Christian Science was presented to me. I was a singer by profession, and when I could no longer depend upon my voice the future seemed very dark. A friend advised me to go to a practitioner, and in three treatments I was free, not only physically but in many ways. The change was so great that I was convinced that this must be the truth, the same healing truth that Jesus taught. I discarded all the medicines I had been using, and began an earnest study of Science and Health together with my Bible, which taught me to rely on God; and material remedies have never been resorted to since.

The way was very clearly pointed out to me, and I began the ascent. The trials have been many, but the mists have always cleared when I lived up to my highest understanding of the truth. The past eleven years have been more actively spent in the work of helping others, and one of the greatest blessings to me is the privilege of serving as Second Reader, voicing the Word of God to earnest seekers of the truth. No greater blessing could come to mankind than Christian Science, which teaches and demonstrates the omnipotence of God, good, and the nothingness of sin, sickness, and death. Jesus said, "If ye continue in my word, then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free." Christian Science is the truth as taught by Jesus and is free for all.

GEORGE BEE JACKSON, San Jose, California.

Through the study of Christian Science, the teachings of the Bible are daily becoming clearer to me and applicable to my daily needs. During the past seven years or so, members of my family have been healed, through Christian Science treatment, of muscular rheumatism, of severe burns, and of other ills, and in one instance a lacerated hand was healed. Not long ago, while repeating the Lord's Prayer and its spiritual interpretation as given by Mrs. Eddy on pages 16 and 17 of Science and Health, I paused to try to realize just what "Give us this day our daily bread; Give us grace for to-day; feed the famished affections" means, and then proceeded to investigate. In Webster's dictionary I found some of the synonyms for affection to be: tenderness, kindness, love, and good will. We need every one of these qualities in our daily experience, and if even one of them is impoverished or famished we certainly need to feed and nourish it, and with its rightful food, the bread of Life. How good to know that the source of supply is never depleted and that supply is ever available when we ask aright.

So important is the exercise of this daily faith or grace that Mrs. Eddy inserted practically the same petition in the Daily Prayer in the Manual of The Mother Church

(Art. VIII, Sect. 4), "It shall be the duty of every member of this Church to pray each day: 'Thy kingdom come;' let the reign of divine Truth, Life, and Love be established in me, and rule out of me all sin; and may Thy Word enrich the affections of all mankind, and govern them!" In this one prayer we have an ever present help. Searching the Scriptures daily will indeed "give us this day our daily bread" and "feed the famished affections."

(Mrs.) CORA B. THAYER, Phoenix, Arizona.

٠

When my baby was a year old we had a demonstration of the healing power of Christian Science, which is only one of many that we have had. He was playing around near me when I noticed that one of his hands was very badly swollen, and the skin between the fingers had turned very dark. My first thought was of infection, as the skin on one finger was scratched, and for a minute I was frightened. I immediately called a practitioner and asked her to treat the baby. This was about one o'clock in the afternoon. That same evening the hand was better and by the third day all trace of swelling and discoloration was gone. That which made the greatest impression on me at this time was that the baby did not at any time while the condition lasted manifest any sign that the hand pained or bothered him in any way.

My husband was also wonderfully healed of a severe attack of influenza, being well and strong and about his work in three weeks. Since that time he has enjoyed the best of health and weighs more than he ever did. We are both very grateful for the physical help we have had in Science, but a great deal more so for the understanding of God which we have gained through Mrs. Eddy's writings and the Christian Science periodicals.

MRS. B. H. SMITH, Chicago, Illinois.

4

I became interested in Christian Science about eight years ago and during this time it has been my only physician and helper. I have been healed of pneumonia, sore throat, constipation, and many other diseases, for which I am very grateful. One of the things I am most grateful for is that it is teaching me how to put off the old man and his deeds, and to know my true self. For a number of years I had been longing for this truth but did not know how or where to find it. Mrs. Eddy says, "Desire is prayer; and no loss can occur from trusting God with our desires, that they may be moulded and exalted before they take form in words and in deeds" (Science and Health, p. 1). I can truthfully say that Christian Science is the greatest blessing that can come to mankind.

(Mrs.) MATTIE SHERADEN, Long Beach, California.

4

With gratitude for all the good I have received from the testimonies in the Sentinel and with a desire to encourage some one else, I wish to tell some of the blessings Christian Science has brought to me. I began to study Christian Science in search of a practical religion, one that would enable me to help those around me as well as myself, in time of need. That Christian Science is such a religion has been proved to me many times through the overcoming of discord, sickness, and sin. Colds, neuralgia, toothache, kidney trouble, fatigue, and a great sense of loneliness have all been overcome by reading "Science and Health with Key to the Scriptures" and Mrs. Eddy's other writings.

By striving to follow in the footsteps of the Master some healing has been done for those ready for the truth, and more patience and charity are felt toward those who do not yet seem ready to leave the husks of materiality. It is a great comfort to know that each mortal will some day learn the nothingness of all error and the allness of God. This understanding, as revealed in "Science and Health with Key to the Scriptures" by Mrs. Eddy, has destroyed the fear of death and the old belief of eternal punishment, and has changed sorrow to joy. By works, rather than words, I am striving to express my gratitude and thus prove to others that Christian Science is the practical religion of Jesus the Christ. I am most grateful for some degree of regeneration, and to have proved these words of our Leader (Poems, p. 14):—

Thou wilt bind the stubborn will, Wound the callous breast, Make self-righteousness be still, Break earth's stupid rest.

(Mrs.) BERTHA L. HURLBURT, Black River Falls, Wisconsin.

Since God answered my prayers for a knowledge of the truth, I have had many healings, both physical and mental, but that which I am most grateful for is the peace that Christian Science has brought into my life. Since childhood I had been very religious, thinking much about God, and longing to feel that I was worshiping Him aright. I went from one church to another, studying the teachings of each, and trying to live up to them, but all the time I felt that I was far from knowing the truth about God, and my deep longing for something was never for one moment satisfied by the churches which I attended. I was then so bitter against what I thought Christian Science to be that I did not even look into it, but struggled on, praying, and searching in every direction but the right one for that something I felt a need of. Every day I had to tell myself over and over again that it was not right for me to attempt to judge God,-which I did when my thought was filled with indignation,-instead of being resigned to people's oft-repeated remarks about this being the will of God, and that being what our heavenly Father wished for us.

When I read and heard during the war of the horrors abroad, and when during the first epidemic of influenza so many, young and old, passed away, whose lives were good and useful, and when a great sorrow came into my own life, I felt my love for God weakening in spite of myself, and was utterly discouraged. Just when I felt the last bit of religious fervor dying in my heart, because all those to whom I turned for guidance and comfort in my sorrow could only tell me to be patient and resigned and not to question God's will, some one asked me to read "Science and Health with Key to the Scriptures" by Mrs. Eddy, that wonderful book which I had always scorned, and even disliked to see lying on my mother's table. I did so, and Mrs. Eddy's beautiful and correct idea of God as Love, who does not will anything but good, healed me, and I went to church the next morning loving God as I had never loved Him before, and so grateful to Him for having led me to the true fold, that when the services began with that wonderful hymn,

> In heav'nly Love abiding, No change my heart shall fear,

I could not keep back the tears that overflowed from a very full heart. I only wish all might know the truth as Christian Scientists are privileged to, and feel the gratitude to God and to Mrs. Eddy that I do.

(Miss) MARJORIE GREY, Bronxville, New York.

Signs of the Times

["Evidence"-The Christian Science Monitor, Boston, U.S.A., March 9, 1921]

Paul begins his remarkable treatise on faith in the letter to the Hebrews with the brief definition: "Now faith is the substance of things hoped for, the evidence of things not seen." Paul does not give a number of instances of persons who believed in God more or less firmly in the usual meaning of the word faith, but gives examples to illustrate his definition of it as that which furnishes proof of things not seen. Noah's faith in God as protection was made manifest in the construction and preservation of the ark. Moses' faith in divine metaphysics proved in the parting of the waters of the Red Sea the fallibility of physics. Abraham's faith in God as the only creator was evidenced in the birth of Isaac in defiance of human, so-called laws. The confidence that strength and power inhere in Spirit furnished proof in the sudden collapse of the walls of Jericho.

What was it that made possible the setting aside of every conceivable sort of visible difficulty in these and so many other instances that, as Paul says, "time would fail" to enumerate them? On page 29 of "Science and Health with Key to the Scriptures" Mrs. Eddy writes, "Man as the offspring of God, as the idea of Spirit, is the immortal evidence that Spirit is harmonious and man eternal." Then what personal sense interprets as a series of persons possessing unusual powers of some sort really is the steady unfoldment of man, of the immortal evidence, the eternal furnishing of proof of God's harmonious nature under all possible conditions. In reality, man is not searching for the proof that God exists and that He is good—he is himself that proof. A so-called human personality confronted by a lion's den, or the formidable task of successfully commanding the sun to stand still, might feel what he called his faith in God waver in these circumstances. But man, the offspring of God, Spirit, as apprehended by Daniel and Joshua and the others, does not believe or fear or doubt, he simply is the proof of God's power and is therefore conscious of no other power. This fact explains what occurred on the shores of the Red Sea as well as what occurred later on the shores of the Sea of Galilee.

On page 280 of Science and Health Mrs. Eddy writes: "Finite belief can never do justice to Truth in any direction," and later in the same paragraph, "Such belief can neither apprehend nor worship the infinite; and to accommodate its finite sense of the divisibility of Soul and substance, it seeks to divide the one Spirit into persons and souls." When finite belief presented itself to Jesus as five thousand bungry persons he made no attempt to accommodate himself to this so-called evidence. He knew that while it might seek to divide Spirit into souls, it never could, and therefore it never could change or limit or divide "the immortal evidence that Spirit is harmonious," that it is always at hand and infinitely bountiful. The correctness of his understanding of God and man, his accommodation of himself only to that which is true, was immediately manifest in the feeding of the multitude.

Mrs. Eddy also refused to accept the "finite sense of the divisibility of Soul and substance," and insisted upon the singleness and infinity of God and His idea, and she proved the correctness of her position, as have all students of Christian Science in the degree of their apprehension of it. When one finds himself confronted with something calling itself evidence of the existence of disease, starvation, or death, he needs only to know that, whatever may be believed about man, the fact of what he is excludes any such so-called evi-

dence. Denying the evidence of the senses is not a narrowly specific process to be indulged in frantically at moments of seeming distress; it is what man's very existence as the allinclusive evidence of God's harmony is doing unceasingly. Sometimes we hear it stated with resignation or despair that, while one can to a degree escape from particular circumstances, the one thing he cannot escape from is himself. This statement in reality indicates a very happy truth, which is that man indeed cannot escape, does not need or want to escape from being what he really is, the proof of God's goodness. The implications of this truth are infinite. One may, for instance, have reached a point where he rejects the pseudo-evidence that persons and events are responsible for suffering, but may be listening still to an argument which, when rightly considered, is equally invalid: that something calling itself "my own wrong thinking" or "the error in my own consciousness" can dog man's footsteps and control his actions. Thinly veiled in a new terminology, this is but the old theological doctrine that although God is good man is a "miserable sinner," and it bears the same fruits of weakness and discouragement that it always has.

One can experience the harmonious results which follow upon the correct practice of Christian Science, only by correctly practicing Christian Science, which involves understanding in a degree Mrs. Eddy's definition of man. She says again and again throughout her writings that God and man are one and inseparable as Mind and idea. She says on page 487 of Science and Health, "The believer and belief are one and are mortal." It is uncompromisingly clear, therefore, that man and belief or man and believer are never one-that that is an impossible combination. Neither wrong thinking nor a wrong thinker can be identified with man, in reality, any more than can sin, sickness, or death. It is our right, then, to repudiate any claim that man can be made to believe what is not true, our right to know that he is "not error's thrall," and that he cannot cease to show forth what he lives to show forth, the holiness of God.

[From "Keep God in American History," by Harry F. Atwood]

The proudest heritage of this country is that all through its history there has run, like a golden thread, a deeply religious strain. . . . The historic Mayflower Compact, signed in the cabin of the little vessel which brought the Pilgrim Fathers to America, begins: "In the name of God, Amen. And having undertaken for the glory of God and the advancement of the Christian faith ... Those are the opening words of the first state paper ever adopted for the government of a community on American soil. . . . In our Constitutional Convention were assembled the greatest body of men, from the standpoint of physical vigor, mental acumen, and moral courage, that ever met together for human achievement. . . . [They] met day after day for four weeks and had not agreed on a single sentence or a single word. On the last morning of the fifth week, in the midst of a very heated discussion, they were about to adjourn and abandon the great purpose for which they had met, when Benjamin Franklin, perhaps the wisest man in the convention, mature in years, ripe in wisdom, and consummate in tact, arose, and, addressing George Washington in the chair, spoke as follows:-

"Mr. President, the small progress we have made after four or five weeks' close attention and continual reasonings with each other, our different sentiments on almost every question, several of the last producing as many noes as ayes, is, methinks, a melancholy proof of the imperfection of the human understanding. We indeed seem to feel our own want of political wisdom, since we have been running all about in search of it. We have gone back to ancient history for models of government and examined the different forms of those republics which, having been formed with seeds of their own dissolution, now no longer exist; and we have viewed modern states all round Europe, but find none of their constitutions suitable in our circumstances. In this situation of this assembly, groping, as it were, in the dark to find political truth, and scarce able to distinguish it when presented to us, how has it happened, sir, that we have not hitherto once thought of humbly applying to the Father of Lights to illuminate our understandings? . . .

"I have lived, sir, a long time; and the longer I live the more convincing proofs I see of this truth, that God governs in the affairs of men. And if a sparrow cannot fall to the ground without His notice, is it probable that an empire can rise without His aid? We have been assured, sir, in the Sacred Writings, that 'except the Lord build the house, they labour in vain that build it.' I firmly believe this; and I also believe that without His concurring aid we shall succeed in this political building no better than the builders of Babel; we shall be divided by our little, partial, local interests, our project will be confounded, and we ourselves shall become a reproach and a byword down to future ages. And, what is worse, mankind may hereafter, from this unfortunate instance, despair of establishing governments by human wisdom and leave it to chance, war, conquest. I therefore beg leave to move: That hereafter prayers, imploring the assistance of heaven and its blessing on our deliberations, be held in this assembly every morning before we proceed to business, and that one or more of the clergy of this city be requested to officiate in that service."

And from that moment they began to make progress in the framing and adoption of that fame crowned document.

... We must have faith that America has neither abandoned God, nor been abandoned by God. The same divine Providence that watched over the founders of this republic, that guided them in the framing of our Constitution, is still with us to guide and strengthen us.

["Christian Science: Common Sense"—From an Editorial in the Anaheim (California) Herald]

Every time we hear of an attack upon a religious body, we feel just as we do when a parent slaps a child in the face, although we often wish, in the latter instance, that God had picked out those whom He desired as parents and let the others wither up and blow away. In the former instance, there is hope that the light of day will eventually sink into the minds of those who are so shortsighted as to attack any organization that is designed to make the world a better place in which to live.

Every once in a while, some preacher takes a fling at the Christian Science organization. In nine cases out of ten it is safe to say that the Christian Science church has accepted a number of his former parishioners as members. There is always a reason for smoke, and usually where there is smoke there has been or will be fire. The Anaheim Herald is not attempting to defend the Christian Science church. So far as we can see, it needs no defense. Its rapid growth speaks louder than anything the Anaheim Herald can say. This is a country of religious liberty, and whosoever desires to follow the teachings of Mary Baker Eddy may do so without fear.

Some time ago, a large group of Los Angeles clergymen banded together to look into the matter of healing by faith. The growth of the Christian Science church probably forced them to follow the crowd. If the teachings of Christ mean anything, healing by faith is possible. If the Bible is only half right, then the whole fabric of Christianity is in for a severe jolt if the generations to come hold to that belief. The Anaheim Herald belongs to every church that believes in God, but it leans to those organizations that lend their efforts to building up the kingdom of God instead of tearing down one of the pillars that support the structure of right-eousness. It matters not which knee we bend or how we seek divine guidance, so long as in doing so we do what is right by our neighbors. Faith is our greatest pilot in traveling the seas of life. When we abandon faith to sink the ship of faith of a neighbor, we are apt to be engulfed in a whirl-pool of unbelief.

[Viscount Astor's Views on America Under Prohibition-From The Pioneer]

Viscount Astor, who has just returned to England after a prolonged visit to the United States, says that he had been misled by the reports in English papers as to the condition of America under prohibition. He found homes happier, the people more prosperous, and a widespread feeling that the country had gained enormously under prohibition. It was true that many people, in places like New York, evaded the law, but over most of the country it was being obeyed, and he was struck by the fact that hardly any one wanted to repeal it.

[From The College News, of Bryn Mawr]

Optimism—a belief that the world can and is being made better-can come from two causes, Dr. Rufus Jones, president of the board of directors at Bryn Mawr, declared in chapel last Sunday evening. Nineteenth century optimism. expressed by poets like Browning and Wordsworth, came because people in that age could see the world progressing, Dr. Jones pointed out. "To-day we don't see the world moving as we want it to. Grounds for optimism must be our firm faith that the forces of the universe are operating toward a better world in spite of present appearances." There is a tendency to look at the present world situation as men and women would look on winter if they had no memory of spring, no confidence in the working of nature's eternal laws. If we are to transform the world in this hour of darkness and the disillusionment of conflict, it will be because we learn Christ's method. . . . The greatest thing for a person of any station is to know the power of love, not as theory, but as a force which will remake the world according to our

Church Notices

Admission to Membership in The Mother Church

The next admission of candidates will take place on June 3, 1921, as provided in Article XIII, Section 2, of the By-laws of The Mother Church. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Friday, May 20, 1921. Consideration of any applications received after that date will be deferred until the November 4, 1921, admission.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to November 5, 1920, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

CHARLES E. JARVIS, Clerk,

236 Huntington Avenue, Back Bay, Boston 17, Mass.

From the Clerk of The Mother Church

Church Tenets.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society

Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in *The Christian Science Monitor*, were run off at the time of their publication in the *Monitor*.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 81/4" x 103/4". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for *The Christian Science Monitor*, *Journal*, *Sentinel*, *Quarterly*, and *Heralds*, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and immediate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlet in Russian

There is now on sale a new Russian translation of "Christian Science: Its Advantage to Mankind" by Edward A. Kimball, with alternate pages in English. Price 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U. S. A.

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U.S.A.

WORKS ON CHRISTIAN SCIENCE

WHAT OUR LEADER SAYS—By Mary Baker Eddy. Vest pocket folder, 5 cents.

REPRINTS (not printed in English). Two-page leaflets, 17 subjects in German, 14 in Swedish, 9 in French. Ten copies, 10 cents.

THE MOTHER CHURCH—By Joseph Armstrong, A history of the building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Illustrated. Cloth, \$1.50.

CHRISTIAN SCIENCE: ITS LEGAL STATUS-By Judge Clifford P. Smith. Paper, 15 cents.

LAW AND WORK for the blind. Printed in New York point, American Braille or English Braille, \$1.00.

SHEET MUSIC. Poems written by Mary Baker Eddy and used by special permission have been set to music as follows: "The Mother's Evening Prayer," 75 cents.

"Christ, My Refuge," 75 cents.
"Love," 50 cents.

Communion Hymn-"Saw Ye My Saviour?" (Johnson), 50 cents. "Blest Christmas Morn," 37 cents

"O'er Waiting Harpstrings of the Mind," 37 cents,

"See Waiting Harpstrings of the Mind," 37 cents, "Shepherd, Show Me How to Go," 37 cents.
"Saw Ye my Saviour?" (Root), 37 cents.
The first three hymns are arranged for high and low voice in the same copy. The last five hymns are published separately in high and low keys. When ordering state key desired.

THE CHRISTIAN SCIENCE HYMNAL. half morocco, \$1.40; full morocco, \$4.50; levant, \$5.50; pocket edition, size 456x656, \$3.50.

PHOTOGRAVURE OF MRS. EDDY, printed in three sizes on India paper and mounted on heavy plate paper ready for framing, 8-inch (mount 12x16), \$1; 12-inch (mount 15x20), \$2; 16-inch (mount 21x29), \$3.59.

(mount 15x20), \$2; 16-inch (mount 21x29), \$3.59.

PICTURE OF THE FIRST CHURCH OF CHRIST, SCIENTIST, IN BOSTON, MASS., AND THE PUBLISHING HOUSE. Artist's proof with remarque on Japanese vellum, size 18x24 inches, \$5; on India paper without remarque, \$3.50. Smaller reproduction, size 11x14 inches, on Japanese vellum, \$1.25. Photogravure postcards of the Church Edifice and Publishing Ilouse, 5 cents.

BIBLES. 01483x. Clarendon Brevier, heavy-faced, distinct type; Turkey morocco, corresponding in size and binding to procket edition of Science and Health, \$1.50. 01440x. Brevier, light-faced type, self-pronouncing,

binding to pocket edition of Science and Health, \$1.50.

11440x. Brevier, light-faced type, self-pronouncing.

Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, \$7.25.

11683x. Large type Bible, 1044x8 inches, bound in Ala-ka seal. Specially adapted for use of second readers, \$16.50.

The improved index will be added to any Bible listed in our catalogue, excepting the vest pocket size, for an additional charge of 35 cents.

Price List of Bible Concordances and Dictionaries of the English Language supplied on request.

Items such as leather covers for the QUARTERLY, and cases, either closed or open, for books, Sunday school supplies and other accessories, will be found in the current catalogue in The Christian Science Journal.

NUMBER 36

Depending on God

LELA M. DARLINGTON

To become conscious of that peace and joy which is the rightful possession of all mankind, we must realize that we are dependent upon God alone. For the Christian Scientist who, each day and many times a day, is declaring mentally or audibly, "All is infinite Mind and its infinite manifestation, for God is All-in-all" (Science and Health, p. 468), the realization of his utter dependence upon God, Mind, would seem to follow as a matter of course; but the suppositional, material opposite of this one and only Mind has for so long been mistaken for reality that it takes earnest and persistent effort to overcome the habit of expecting to receive good from a material source.

Man, who is forever dependent on Spirit for health, happiness, and immortality, is seemingly counterfeited in socalled material man who is always looking to some material circumstances to improve his condition. Depending upon matter for health, a man can feel little security; for does not matter claim to give disease and death as well as health and ·life? Even when, through the study of Christian Science, thought has begun to turn to Mind for health, previous material health laws relating to food, air, exercise, and so on, may linger in human thought to prevent the realization of that perfect health which comes from dependence upon Spirit alone. It is well to remember that it is always error, not Truth, that tells a man he is dependent upon something besides Spirit for harmonious existence. God is not the author of material law and man is not in bondage to it. Man exists under the changeless law of Mind. We must know our way out of a false sense of law; and whatever can be done to-day had best be done to-day. There is no more convenient season. It is manifestly impossible to live beyond one's understanding; but Christian Science demands that we prove understanding as rapidly as possible and live up to it. Says Paul, "If we live in the Spirit, let us also walk in the Spirit."

The student of Christian Science should find it no more difficult to rely on God for his supply than for his health. His desire for enough is a righteous one. Failure to understand Jesus' teaching on this subject is doubtless responsible for a more or less general impression that a Christian should be satisfied with little. A world whose substance is matter reads the advice of the Master to the rich young man, "Sell that thou hast, and give to the poor," and goes on its way, sorrowing; but awakening spiritual thought grasps the vital import of the accompanying promise, "Thou shalt have treasure in heaven," and follows the spiritual idea with rejoicing. Jesus' life was devoted to showing mankind this treasure in heaven, this practical understanding of ever present Life, Truth, and Love, which healed the sick, raised the dead, stilled the tempest, and replaced lack with abundance. Is it possible to have this treasure and lack any good thing?

So long as a man depends on matter for supply he can never be free from a sense of limitation. So-called material wealth will not free him. Do not the material senses say there is both want and plenty? They would give us abundance to-day and take it all away to-morrow. "This night thy soul shall be required of thee: then whose shall those things be, which thou hast provided?" pictures the helpless poverty of the man who thinks he has found supply outside of Spirit. Since there is in reality no matter, but only a false sense of something besides Spirit, he who believes he has material wealth and depends on it for supply is after all only entertaining an erroneous sense which separates him from real riches just as completely as though he believed he had no supply and nothing to depend on because he had no money in the bank.

Here the query naturally arises: Are we depending on matter for supply and have we nothing that is real and permanent because we cannot yet multiply the loaves and take coin from the fish's mouth? On page 442 of "Science and Health with Key to the Scriptures" Mrs. Eddy answers this question thus: "Christ, Truth, gives mortals temporary food and clothing until the material, transformed with the ideal, disappears, and man is clothed and fed spiritually." How can this be true in our daily living? How can we know that it is Christ, Truth, that is giving us our food and clothing? How can we know that we are not depending on a false sense of supply that may fail us any moment? These questionings are profitable, for they compel us all to examine our thoughts, and there we shall find our answers. Each one can know for himself, and no one else can know, to what extent his sense of supply is based on the spiritual man's possession of all things because of his unfailing reflection of Mind. Every one can watch his own thought processes and learn for himself how much he is depending on uncertain material conditions and even more uncertain human personalities for his supply. Each one can likewise know which dependence brings him peace and joy, and which fills his days and often nights with fear and anxiety. Dependence upon Spirit sets a man free from any irksome sense of earning a living. The gift of God is eternal living. Each one's part is joyously to express the intelligent activity of Mind. He who is intelligently depending on Spirit learns that his supply is always the same; it is only his sense of supply that varies and that only in illusion or supposition. The true relationship between Mind and its idea, man, is presented by these words from one of Jesus' parables, "Son, thou art ever with me, and all that I have is thine." Can all change?

On page 60 of Science and Health Mrs. Eddy has written, "Soul has infinite resources with which to bless mankind, and happiness would be more readily attained and would be more secure in our keeping, if sought in Soul." How many hearts have overflowed with gratitude for this statement of revealed Truth! The human heart, though yearning for happiness, finds it difficult to part with those material habits of thought which continually rob it of happiness. Remembrance of past joys or past sorrows, discontent with the present, doubts and fears for the future, claim presence and activity as consciousness until conquered by the stead-fast purpose of the student to have one Mind. The argu-

Copyright, 1921, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as second-class matter. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of October 3, 1917, authorized on July 11, 1918.

ments that claim to separate a man from the happiness he craves claim also to be infinite in number and variety for the very simple reason that these arguments, having no real entity, exist only as suppositional opposites of the countless joy-bringing thoughts with which Mind is forever blessing its idea, man.

The belief that we are being unkindly or unjustly treated, that those who should love and encourage us are cold and critical or perhaps even skeptical of our sincerity, the temptation to yield to self-pity because of human selfishness and indifference, even these beliefs should not be difficult to take into the realm of pure Mind for healing. When the human mind has become sufficiently humble to admit its own nothingness and acknowledge the allness of divine Mind, it becomes clear that those errors which this mind claims to be supported by material facts have no more reality than those which this same mind classifies as purely imaginary. Then we shall no longer believe we can suffer for another's fault but shall rejoice in the understanding that, as Mrs. Eddy says (Science and Health, p. 57), "Happiness is spiritual, born of Truth and Love."

Gentleness

MARY H. CUMMINS

N page 592 of "Science and Health with Key to the Scriptures" Mrs. Eddy gives the definition of oil as follows: "Oil. Consecration; charity; gentleness; prayer; heavenly inspiration," and on page 485 she writes, "Emerge gently from matter into Spirit." The apostle Paul, in writing to the Galatians, speaks of gentleness as one of the fruits of the Spirit, and he commences the tenth chapter of his second epistle to the Corinthians with the words, "Now I Paul myself beseech you by the meekness and gentleness of Christ." We do not always realize what an important part gentleness plays in the demonstration of Christian Science. This no doubt is due to the fact that gentleness is the very last thing which the unenlightened human mind ever connects with the solving of any problem. Its first impulse is to "do something," to employ material means, to resort to human expediency; and it is only by slow degrees that one becomes aware of the power which lies in true gentleness. Sledge hammer methods, whether mental or physical, never have accomplished anything for mankind and they never will; neither do they glorify God. What is known as the psychology of the crowd, or "the gang instinct," goes hand in hand with belligerence. The human mind loves a battering ram, and the harder it batters the more it imagines that it is accomplishing something. How different are the methods of Christian Science, based upon the Sermon on the Mount! The student of Christian Science is beginning to learn that in quietness and confidence is his strength, that the "meekness and gentleness of Christ" are potent to heal and save where all other means have failed, and he daily prays for more of this grace of Christian character.

Many are the passages in the Bible which depict the gentleness of God toward man, and one of the most beautiful is in the fourteenth chapter of Hosea: "I will be as the dew unto Israel." No one ever saw or heard the dew fall, so gently does it descend, but one has only to look at a garden at the close of a warm summer day, and see it again the next morning after the dew has refreshed it, to realize how beneficent is this gentle ministration. What an exquisite simile to illustrate the way in which divine Love refreshes the upward aspiring thought! And if this be the Father's attitude toward man, ought it not be our attitude toward one another? We naturally speak of one who is kind and considerate as a

gentlewoman or a gentleman, and never did the world need this gentleness as it does to-day.

A beautiful lesson as to the potency of gentleness where harsher means have failed is to be learned from the oak tree. When summer is past and frost tinges the air, the oak does not shed its foliage as do other trees. All the winter long the dry rustling leaves cling to the branches, and neither autumn wind and rain nor winter blasts seem able to dislodge them; even the weight of snow and ice has little or no effect upon them, and one marvels how they can withstand the rigor of the elements and still remain where they are. But when spring comes and the fresh green shoots begin to put forth their tender tips, quietly and naturally the withered leaves fall to the ground. It is all accomplished so gently and silently that one scarcely notices it. One week the dried leaves are still there, the next they are gone. I have often looked at the oak tree in March or early April and found comfort and encouragement in the thought that although the leaves seemed to adhere to the branch just as tenaciously as they had done months before, yet all the time the sap was rising and in due season the fresh, green buds would do their work. So when physical conditions are apparently no different from what they were months ago, if we are obedient to the law of Love we can know of a surety that all the time spiritual understanding is unfolding, and that the true idea dislodges and replaces the old beliefs, no matter how persistently the latter may seem to hold to their position.

Surely "the meekness and gentleness of Christ" was the secret of Mrs. Eddy's life work and accomplishment. And how often to-day when for a moment we may seem to find ourselves battered and bruised from contact with worldly methods, does the opening line of "Mother's Evening Prayer" (Poems, p. 4) refresh and sustain us:—

O gentle presence, peace and joy and power; O Life divine, that owns each waiting hour, Thou Love that guards the nestling's faltering flight! Keep Thou my child on upward wing tonight.

There is no real power apart from gentleness, for true gentleness is the outgrowth of self-immolation, and perhaps more than any other grace of character, gives evidence of the fact that we are proving the Mind of Christ. Apparently one of the hardest lessons for us to learn is that effort, unless impelled and guided by divine Love, is useless. Indeed, it frequently frustrates its own object. On the other hand gentleness never implies inertia or lack of endeavor. It is the natural, spontaneous expression of Love, and as such is potent to heal and save.

Activity

HAZEL L. ZIMMERMAN

THE true idea of activity is of the utmost importance to I the individual who would achieve success. Whatever or wherever his work may be he will find it very profitable to him to acquire the one right idea of activity, as revealed through the teachings of Christian Science, and then adhere steadfastly to this truth until it is manifested in all his affairs. To be active is to be energetic, vigorous, alert, ready; and activity comprises the maintaining of vigorous, alert, and ready action. To the consistent thinker the ever readiness to put into practice vigorous and alert thinking means achievement, and right achievement means success. The student of Christian Science finds an ever broadening manifestation of activity in all his affairs as he comes to recognize God, divine Mind, as the one cause of all right activity, and understands that God's idea, man, as effect constantly reflects and expresses good in all his activity. Therefore it ...

TO STATE

becomes apparent that man, as idea, must be in reality always active, always reflecting and expressing good. On page 340 of "Miscellaneous Writings" Mrs. Eddy has said, "Be active, and, however slow, thy success is sure: toil is triumph; and—thou hast been faithful over a few things." To be rightly active, then, is to set about the task at hand with rejoicing because its perfect fulfillment is even now accomplished in Mind and is manifested to the one with the patient, persistent, and confident determination to carry out the direction of Principle as it unfolds. One must also steadfastly refuse to entertain as consciousness any false beliefs of sluggishness, laziness, disobedience, or inertness, which are the counterfeits and therefore the untrue opposites of true action as expressed in alertness, obedience, and faithfulness.

To be about the Father's business means to be constant and unremitting in our work of knowing, being, and doing good. It matters not if our progress seems slow, if the problem at hand seems difficult; it is only a seeming, and our success is assured as we rejoice in gaining a greater understanding of Principle, as we see every problem as opportunity for a sure victory for Truth. Surely this is what is meant by being faithful over a few things. It is our attitude toward the problems that are presented in our daily living, our activity in working them out, that decides just how much of Christian Science we are demonstrating, just how much of right activity we are expressing, and just how steady and sure our progress is.

On page 454 of "Science and Health with Key to the Scriptures" by Mary Baker Eddy, we read, "Right motives give pinions to thought, and strength and freedom to speech and action." It is necessary, then, to examine our motives, to make sure that they are absolutely in line with Principle before we allow them to take form in words and deeds. To be in line with Principle our conversation as well as our acts must carry the healing touch of divine Love, manifest as kindness, helpfulness, compassion. If the motives behind our speech and action are God-given, unselfish, and we are seeking the glory of the Father and expressing the perfection of God's creating, they will carry the blessing of greater freedom, greater service, and a greater unfolding of good to those with whom we come in contact, and will immeasurably bless us as well.

The apostle James makes plain the fact that rejoicing and patience are requisite in expressing right activity when he says: "My brethren, count it all joy when ye fall into divers temptations; knowing this, that the trying of your faith worketh patience. But let patience have her perfect work, that ye may be perfect and entire, wanting nothing." It is significant that he says, "Count it all joy," not, as mortal mind would dictate, by being moderately glad that you have this problem, or by rejoicing somewhat that the lion in your path is not a large lion, but at the same time regretting that there should be a lion in your path at all. James speaks with the earnest conviction gained from his own experience, "Count it all joy when ye fall into divers temptations,"-and why? Because temptation never leaves us where it overtook us. It teaches us patience and the real meaning of rejoicing. If we are honest and earnest students of Christian Science and follow this counsel in counting it all joy, temptation turns us ever back to Principle, toward the reality of good and away from the unreality of evil, and affords us greater growth through right mental activity, an increased joy in the operation of divine law, a further proof that Love never fails. At the close of the article entitled

"Divine Science" (Miscellaneous Writings, p. 338), Mrs. Eddy quotes two stanzas of a poem, the second of which is a statement of right activity available to all who will apply it to their daily living:—

"Think truly, and thy thoughts
Shall the world's famine feed;
Speak truly, and each word of thine
Shall be a fruitful seed;
Live truly, and thy life shall be
A great and noble creed."

Demonstration

LUY WELCH

THE word demonstrate is defined thus: "To establish so as to exclude possibility of doubt or denial," and demonstration: "Proof beyond possibility of doubt." A demonstration of Christian Science is proof of the will of God beyond possibility of doubt or denial. This absolutely shuts out human will, self-will, and egotism as a factor in Christian Science. In studying the works of Christ Jesus, with these definitions in thought, one will see that the Master never had a doubt of the result of his work, no matter what mortal mind seemed to say. To Lazarus he said, "Come forth," knowing beyond the possibility of a doubt that Lazarus must do so; and Lazarus came forth. To the man with the withered hand he said, "Stretch forth thine hand," and the man stretched it forth healed. To the disciples he said, speaking of the loaves and fishes, "Bring them hither to me," and with these he fed five thousand men, besides women and children. He never doubted or denied the omnipotence of God, and because he did not he demonstrated this omnipotence, as it was needed, because it is Mind's natural, normal law to be present.

Our revered Leader, Mary Baker Eddy, did the same thing in all her works. One example may be cited,—the building of The Mother Church. It made no difference what mortal mind said and tried to prove. She proved, beyond possibility of doubt or denial, that it was God's will that true building should go on. She did not doubt, she did not give way one inch to mortal mind, but she knew that the true unfoldment is irresistible. With these examples before us, how can we fail in our demonstration? What difference does it make if the enemy tries to make us believe it has power? Has it any power? No! and the only power it can seem to have is what we accord to it, in our own experience, by accepting it as real. What we accept cannot affect our neighbors, it matters not how close they may be to us. Has error the elements of power? Has nothing the elements of some-Ask yourself these questions; then think out the thing? answer.

When we really understand what the will of God means, we shall see that it is not human will, and that we cannot, must not, use our personal or human will or desire, but must meekly and humbly follow the leading of Truth, without outlining what we want or how we want God to work out our problem. Principle is perfect, and for that very reason cannot know or know of imperfection, or a problem. Our problem, so called, is the expression of our human, false, imperfect thinking. The healing of an erroneous condition, whatever it claims to be, is the healing of our wrong thinking. All problems are mental, not material, and must be worked out according to Principle. In so far as the work is done according to Principle does one meet and master any false belief which presents itself.

An engineer, building a railroad, does not sit down and worry about the problems which come to him. As he pushes

.1

'n

p

55 . IS 1. IS

:

his railroad across the mountains he sees each obstacle, or problem, as another opportunity to prove his mastery over it; he applies the rules scientifically in order to obtain the right result. So we, if we apply the rules of Christian Science rightly, shall overcome whatever mortal mind puts up to us as real by proving it unreal.

Our Mother

LOUISE FANNY BODMER

T a competition among students at one of the universi-A ties, to determine fifty of the most beautiful words, it was found that every one of the competitors had mentioned the words mother and motherhood. Now of course a word becomes beautiful only through the meaning it conveys to us. Then can there be any words that equal the terms mother and motherhood? From a child's very infancy it is its mother that is the nearest and dearest; it is its mother that knows and supplies best its needs; it is its mother that consoles and cheers, that, if need be, sacrifices everything for its sake. Through precept and education a wise mother guides her child to the good, teaches self-discipline, and is ever seeking to lead the budding thought in what she considers the wisest and best way to happiness. The memory of a sweet, good mother has helped many a young man or woman to resist the temptation to sin, and many who have seemed to wander on the broad road of evil have been led to find their way back to God through remembrance of perhaps the first prayer she taught them or some of the wise stories she told them during their childhood.

In Christian Science we learn that every material thing is a counterfeit of the spiritual idea. On page 16 of "Science and Health with Key to the Scriptures" Mrs. Eddy gives the interpretation of the Lord's Prayer, beginning thus: "Our Father which art in heaven, Our Father-Mother God, all-harmonious, Hallowed be thy name, Adorable One." Through this revelation of our divine Parent, God is brought very near to every one. When we consider human motherhood at its very best, it is but a shadow of that which the divine Father-Mother is to man. All the tenderness, the care, the love, and good wishes with which the human mother surrounds her child are but faint expressions of the divine motherhood of God. In her very love a human mother may fail; in her desire to ward off every disagreeable experience, she may rob the child of the great opportunities of strengthening character through battling with temptation and learning the joys of victory over self; in her jealous love she is apt to forget that loving others does not make her love her own child less. A mistaken sense of the duties of motherhood may tempt her to outline and plan away into the far future, thus interfering with the right of self-government and free development of her child. Her love may make her weak or unduly severe; and how greatly such a mother suffers when, to sense, separated from her loved one.

How different is our Father-Mother God. Divine Mind, eternal wisdom, is never for a minute absent from its reflection. Divine Love is infinite and includes all; it never fails and never mistakes. Jealous to have us love none more than good, according to the First Commandment, "Thou shalt have no other gods before me," divine Mind is always patient, and in infinite tenderness and compassion gives us the needed opportunities to strengthen our understanding. A very helpful illustration of this was given to a student of Christian Science some years ago. A little baby was brought to the home of her grandmother. The little one had never been absent from her mother for any length of time and

much fear was expressed about her missing her mother, & pecially during the night. As anticipated, so it happened. When the baby awakened and found herself in strange surroundings, and most of all, heard a voice that was not her mother's, she cried most pitifully and would not be consoled by any one or any thing. A student of Christian Science asked to be left alone with the little one. "Now Christian Science might be all right for some things, but you do not expect to quiet this child with it!" was the answer, excitedly given; but seeing the utter fruitlessness of her efforts, the grandmother left the room. The Scientist quietly thought over the situation, confident that Love is ever availing, that there is no condition where its law of harmony cannot be demonstrated. The child wanted the love of her mother; she had a right to that. Who was her or is any one's Mother but God? The beautiful definition of Mother as found in the Glossary of the Christian Science textbook, "Science and Health with Key to the Scriptures" (p. 592), was pondered over: "MOTHER. God; divine and eternal Principle; Life, Truth, and Love." Then a clear realization of the fact that Life and Love and Mother are synonymous was gained. It was seen that the very fact of being alive was the proof of our Father-Mother Love with us. What then could this child lack, when in reality the children of God can lack nothing? Needless to say that the baby found her rest and awakened in the morning sweet and bright. This was some years ago, but the healing was permanent; without loving her human mother any less she learned to appreciate love wherever she met it, expressing Love herself.

Thus we learn, through the teachings of Christian Science, how at all times we may avail ourselves of that great motherhood, divine Love. Our human relationships are changed; a mother, through overcoming the human sense of love and learning to express divine Love, becomes wiser, more truly loving. She ceases to interfere with the free unfolding of the child thought through enveloping it in her thought with fear and material law, and the child learns to know that one great Mother and finds that in obeying the Fifth Commandment it is honoring God, and in honoring God it honors its human father and mother.

Giving a Lecture

WILFRED TEARE LEWIS

NOT the least of the activities of a Church of Christ, Scientist, is the giving of a lecture. It is an activity provided for by the wisdom of our Leader, Mary Baker Eddy, and may be said to incorporate some of the missionary work of Christian Science churches. The giving of a lecture proves to be a way by which one may prove the truth contained in the statement made in "Science and Health with Key to the Scriptures" (p. 79), "Giving does not impoverish us in the service of our Maker, neither does withholding enrich us." It also fulfills the Scriptures, for this free gift to humanity is being offered throughout the world. It is the open door which no mortal can close, for we have this assurance from the prophecy of Isaiah, when only the truth about God and man is expressed at a Christian Science lecture: "As the rain cometh down, and the snow from heaven, and returneth not thither, but watereth the earth, and maketh it bring forth and bud, that it may give seed to the sower, and bread to the eater: so shall my word be that goeth forth out of my mouth: it shall not return unto me void, but it shall accomplish that which I please, and it shall prosper in the thing whereto I sent it." A lecture is to tell of God, good, hence good will result to both giver and receiver.

The writer recently accepted a duty as usher at a lecture, and his first direct activity with a view to the lecture was to realize that it expressed Life, Truth, and Love, for this quotation from John's gospel, referring to the Christ, came into his thought: "And I, if I be lifted up from the earth, will draw all men unto me." All activity which followed seemed to center round these words, and a passage from Science and Health (p. 102) brought light upon the lifting up of the Christ, and the "draw" of the divine Principle, Love: "There is but one real attraction, that of Spirit. The pointing of the needle to the pole symbolizes this all-embracing power or the attraction of God, divine Mind." Truth never goes unchallenged by seeming evil; but Truth alone is true, for it is forever a part of that tri-unity, Life, Truth, and Love, and is omnipotent. In the chapter on the Apocalypse in Science and Health Mrs. Eddy says (p. 564): "The serpent is perpetually close upon the heel of harmony. From the beginning to the end, the serpent pursues with hatred the spiritual idea." Then again on page 234 she says, "If mortals would keep proper ward over mortal mind, the brood of evils which infest it would be cleared out." The fact that the true lecture is the divine idea and therefore holy, having emanated from divine intelligence, God, must be understood.

Having contended at every step with the evil suggestion, it was seen that the true occasion is planned by divine Love; that the gift of love is expressed; that all true advertising is a silent welcome, and indicates the compelling influence of the Christ, the only real attraction. As the Scripture says, "Go out into the highways and hedges, and compel them to come in, that my house may be filled." Then the gift within a gift, the distribution of our literature, the Journal, Sentinel, and Monitor at the close of the lecture can be interpreted as the cup of cold water given in Christ's name. In this connection it was seen that our beloved Leader, Mary Baker Eddy, had had part in the giving of our lecture, through the establishment of the Board of Lectureship.

What is the harvest? This we cannot determine, but we know the Bible says that the word shall not return void. The writer's harvest is a fuller understanding of the love of our Leader in bequeathing to us The First Church of Christ, Scientist, its Manual, its literature,—the food for the day, the week, the month, and for all time, its Board of Lectureship, its reading rooms, and everything for our continuous progress.

"Arise up quickly"

CONSTANCE STEVENS

ON page 271 of "Miscellaneous Writings" Mrs. Eddy says of students of Christian Science, "They should take our magazine, work for it, write for it, and read it." The writer has gained so much benefit from reading our literature and through the daily study of the Lesson-Sermon that she would like to express the thoughts which unfolded in the study of Peter's deliverance from prison, with the hope that they may prove a help to some one struggling to overcome

Herod, symbolic of hatred and malice, stretched forth his bands to vex and harass those who were preaching and teaching the Christ-principle, and so greatly was error stirred that, after killing one of the disciples, he proceeded to take Peter also and imprison him. Peter, who had become mesmerized temporarily by this belief in evil with its seeming power, was sleeping between two soldiers and bound with chains. Error seemingly had him fast, determined not to let him go, but an angel came unto him, surely that sweetest messenger of all, of whom Mrs. Eddy writes in "Science and

Health with Key to the Scriptures" (p. 567), "Gabriel has the more quiet task of imparting a sense of the ever-presence of ministering Love." This angel, illuming the prison with light, bade Peter, "Arise up quickly." Awakening somewhat from the mesmeric dream, he rose up mentally, and with the mental uprising the chains fell from his hands, and he regained his mental poise and ability to handle the situation with power. The next step required was that he gird himself and bind on his sandals. Peter, listening intently, was ready to obey, without questioning or doubt, this angel visitant. Then came the injunction: "Cast thy garment about thee, and follow me." When the Christly garment of righteousness was put on, Peter was ready for the journey. This mental preparation had taken place within the prison; this work faithfully performed enabled Peter to prove when they reached the iron gate "that leadeth unto the city" that, in the words of Mrs. Eddy (Science and Health, p. 224), "No power can withstand divine Love," for it "opened to them of his own accord" and they passed out. Peter had earned his freedom, and what a wonderful vision must have met his gaze. Even in that exalted state of consciousness, however, the angel did not leave him until they "passed on through one street."

The lessons to be learned from this story are many and beautiful. It matters not how dark the night nor how deep the sleep, nor in what environment, divine Love is able to penetrate with its clear-cut command: "Let there be light," and in the presence of light there is no darkness nor sleep. How often would one be saved many hours of work and tears if one obeyed as Peter the "Arise up quickly," instead of leaving things until a more convenient season. The chains would fall from his hands and he would be in a position to gird up his loins with truth and bind on his sandals and cast about him his garment. As each step is faithfully taken in our journey the next one unfolds, until at last the prison is left far behind, and we can walk forth in glorious freedom, obeying only the behests of the divine Principle, Love, to "heal the sick, cleanse the lepers, raise the dead, cast out devils," and remembering every moment that we are cared for and always protected by our loving Father-Mother God.

[Written for the Sentinel]

A Prayer

S. EMMA KLEBSATTEL

I po not ask to love Thee more,-I dwell in Love, Supreme, beyond what I implore; I ask Thee but to make me know This infinite love Thou dost bestow.

I ask not that Thou show the way, For Thou hast shown. Keep me therein from day to day, Nor let the scenes of sense detain, For I the priceless prize would gain.

I do not ask to hear Thy voice, For I have heard, And still shall hear and shall rejoice. Make me within its call to stay, To listen for its dictates and obey

Nor do I ask for what Thou 'st given -Blessings untold, As yet unseen in earth and heaven. One thing I ask o'er every other, To know one Mind, one Father-Mother.

Walking by Faith

THE word faith is what might be termed one of the difficult words in the Bible. The human mind, that is to say, has given to it almost as many shades of meaning as there are of human temperament. Yet its true definition is surely, from a metaphysical point of view at any rate, to be found in that famous sentence in the Epistle to the Hebrews, "Now faith is the substance of things hoped for, the evidence of things not seen." A great bishop of the third century was fond of insisting that there was no faith in accepting anything of which you had proof. He may, or he may not, have been the originator of the doctrine of blind faith, but it is certain that he had no concord with the point of view of the writer of the Epistle, for evidence, or what the Revision calls proof, is the very word by which the Greek is rendered in the English Bible. And this Mrs. Eddy very clearly saw, when she wrote, on page 297 of Science and Health: "Mortal testimony can be shaken. Until belief becomes faith, and faith becomes spiritual understanding, human thought has little relation to the actual or divine."

Belief is the first stage in a man's grasp of any subject. It is a wavering conviction based on some prima facic evidence. When this evidence is subjected successfully to a fuller examination, the belief gradually develops into faith. Because one or two tests have proved satisfactory, that is to say, the student's faith in his original conviction gradually strengthens into a much deeper conviction that he is dealing with some phase of truth. Only, however, as the evidence accumulates, does the element of uncertainty which separates faith from understanding disappear. Then there comes the complete certainty of knowledge. This is the exact process which is gone through by every student of Christian Science. He is told or reads something about Christian Science, and as he listens or reads he finds himself beginning to believe in the theory. But this, of course, is not enough. He sets to work to accumulate evidence of the reliability of his belief, and as this evidence grows he discovers that his belief has been changed into a faith which assures him that the evidence he has secured is itself sufficient to give him assurance of a complete description. This assurance, which is the very word used in the definition of faith, by the translators of Hebrews in the Revision, has to be gained by his own personal demonstration. He sets to work, if he is wise, to prove the healing power of Christian Science for himself by a process of induction. For, as Mrs. Eddy writes, on page 461 of Science and Health: "Christian Science must be accepted at this period by induction. We admit the whole, because a part is proved and that part illustrates and proves the entire Principle." As his proofs accumulate, his faith disappears in understanding, with the result that no matter what the clamor of controversy or the vehemence of criticism, he finds himself suddenly grasping the full intention of Paul's saying to the elders of the church at Ephesus, at his meeting with them in Miletus, "None of these things move me."

If, then, a man has faith, he has the substance of things hoped for. Now substance is the reality, and so a man who walks in faith pursues his way with the realization of realities. These realities constitute all that is eternal, as Mrs Eddy points out on page 468 of Science and Health, where she says: "Substance is that which is eternal and incapable of discord and decay. Truth, Life, and Love are substance, as the Scriptures use this word in Hebrews: 'The substance of things hoped for, the evidence of things not seen.'" Such faith will, of course, move mountains, that is to say it will brush away the intangible material counterfeits of substance, and leave a man face to face with reality. Thus he finds in his faith the evidence or proof of things unseen by the material senses, but existing all the time for those with eyes to see.

It is obvious from all this that faith as understood in Christian Science is something very different from the blind belief gloried in by a Gregory. It is more in the nature of the faith of the student of mathematics, who, as he sees the problems submitted to him solved, finds in these solutions a faith in his ability to solve those further problems which his knowledge is not yet equal to. That is why, when the storms of malice and persecution begin to howl round him, he is able to remain utterly unmoved. He does not feel that he has got to be busily engaged in all sorts of human arguments and material contendings in order to prove himself to be in the right. He knows that all he has to do is to be unmoved by the storm, and to go on finding further proofs of Principle, each of which will bring him nearer to that scientific knowledge of God or Truth which will in turn free him from all the false suggestions of evil. In other words, it is his own faith which he has to strengthen, and not that of his neighbors. The world always imagines that the way to strengthen its own position is to persuade others that it is right. But the fact is that the others are not persuaded by much speaking, but by their observation of the faith of those who are proving their faith by their works. That surely is why James declared, "Yea, a man may say, Thou hast faith, and I have works: shew me thy faith without thy works, and I will shew thee my faith by my works."

Clearly, from James' point of view, faith was the evidence or proof of things unseen, since the demonstration of faith was to be the proof of those unseen things. When a man has seen sickness healed by reliance on the fact that the unseen or spiritual is the real, and the material or seen is the counterfeit, he has obtained that proof by induction which Mrs. Eddy says is to assure him of the reality of Principle. His faith, in other words, is the assurance of all of that which he hopes, and which it has become the object of his faith to prove. He is not in the least likely, therefore, to be worried by the hurly-burly of human contentions. He sets all these things aside and goes forward unmoved, from day to day, in demonstrating Principle for himself, knowing quite well that that is the only way in which Principle can be demonstrated for his neighbors. In this way he lays down his materiality for his friends, and so proves his understanding of love, for love is no sensuous attraction of the human mind or of sex; it is the substance of that understanding of Principle for which a man hopes, and the evidence of his faith in the omnipotence of Spirit. The man who understands this is not compelled to take away his neighbor's character in order to prove himself to be in the right, much less to indulge in slander and gossip for the purpose of discrediting somebody to whom he imagines himself to be opposed. All these things are the glaring evidence of want of faith. They are the product of the uncertainty and turmoil of the human mind, which never imagines it is doing anything unless it is doing

nothing by giving proof of its own materiality. The exact reverse is, of course, the truth. "The peace of God, which passeth all understanding" is not acquired by petty human efforts to steady the ark, and to fashion Truth in a preconceived pattern, but by the calm certainty bred of faith that God, good, governs, and that Truth must prevail.

FREDERICK DIXON.

Personal Magnetism

Personal magnetism has often been considered so desirable that schools and courses, established for its development and exploitation, have used various mesmeric forms of advertising to persuade people that what they offer is necessary for success. Speakers, writers, social leaders, politicians, physicians, lawyers, ministers, actors, and, in fact, all those especially who appear before or deal with the public directly are often told that they need to cultivate personality. In the armies and navies during the war and afterwards, and likewise in industries, psychological tests have been used for the measuring of personal qualities, supposed to be inherent in matter and to vary in different material bodies. Thus there seem to be multitudinous phases of the belief that man is a mere animal, living in a material body and constituted of material actions and reactions, some of them more animated and effective than others.

The belief that a material body is alive, and that its vitality and energy may vary, is, of course, a belief of limitation. The true living which expresses infinite Life must be unlimited, indestructible, and indivisible. Human personality, with its supposed limitations and subdivisions, only counterfeits the undivided wholeness of activity which is the real man manifesting the one divine Mind. Freedom from limitations comes not through a development of human characteristics, calculated to attract human attention, but through the understanding of Principle, divine Mind, as infinitely and harmoniously manifest. Perfect, divine Mind is God, the creator and preserver of spiritual wholeness throughout true living. As we read on pages 336 and 337 of "Science and Health with Key to the Scriptures" by Mary Baker Eddy, "God is individual and personal in a scientific sense, but not in any anthropomorphic sense. Therefore man, reflecting God, cannot lose his individuality; but as material sensation, or a soul in the body, blind mortals do lose sight of spiritual individuality. Material personality is not realism; it is not the reflection or likeness of Spirit, the perfect God."

To-day, as always, it is important to understand what Christ Jesus said to the young man who inquired how he might have eternal life: "Why callest thou me good? there is none good but one, that is, God." In the practice of Christian Science, so-called personal magnetism can accomplish nothing, since reliance on infinite intelligence as the source of wholeness and continuity in true living alone is beneficial. What are called, in Christian Science, practitioner and patient or teacher and student, for instance, are simply states of human thought turning together to Principle for healing and guidance. When one praises or blames personality for any seeming, and looks upon mere physicality as attractive or unattractive, he is, to that extent, ignorant of spiritual reality, and needs to be reminded vigorously of the truth that only divine intelligence has ever produced good and that there is really nothing else to produce anything, good or bad.

Yet the more one understands of Christian Science, the less is one disturbed by any sense of human personality,

whether supposedly attractive or repellent. Since there is but one true attraction, one force, which is Principle manifest as spiritual idea, the real man, who is this spiritual idea, is dealing wholly with Principle and not with human personalities. God, Principle, divine intelligence, is the only genuine Person. In her Message for 1901 Mrs. Eddy gives one division of a number of paragraphs (pp. 3 to 7) to the explanation of the truth that "God is the infinite PERSON." To accept infinite intelligence expressed as all that one can really deal with is to reject any belief in personal or physical magnetism as a substitute for the true influence which produces only happiness. Thus regardless of any mortal sense of things, which is utterly supposititious, one must go forward fearlessly and joyously, proving that the divine Mind expressing itself as unlimited activity is all there is to actual being now and always.

On pages 73 and 74 of "Retrospection and Introspection" Mrs. Eddy says: "He who clings to personality, or perpetually warns you of 'personality,' wrongs it, or terrifies people over it, and is the sure victim of his own corporeality. Constantly to scrutinize physical personality, or accuse people of being unduly personal, is like the sick talking sickness. Such errancy betrays a violent and egotistical personality, increases one's sense of corporeality, and begets a fear of the senses and a perpetually egotistical sensibility." Any phase of the belief that matter is animated is not to be feared but to be gladly replaced with the sureness that Principle is the only animating power and animates only spiritual idea, which is altogether separate from any supposition of materiality. In proportion as one knows and proves that the consciousness of spiritual good is the present actuality, one remains undisturbed by either physical glamour or physical unpleasantness, for any such illusions are reduced to the nothingness which they really always have been, by the allness of the one Life.

The leadership of Principle is the only dependable leadership now and forever. What speakers, writers, lawyers, and all others need to recognize is this absolute fact. As they do so, they will find any belief in personal magnetism as necessary or desirable giving way to the simple humility of Christ Jesus, which was ever successful. "Why callest thou me good?" he exclaimed; and again he said, "I can of mine own self do nothing: as I hear, I judge: and my judgment is just; because I seek not mine own will, but the will of the Father which hath sent me." Psychological tests can never measure the amount of divine inspiration that is unfolding in any one's experience, and this inspiration is all that constitutes real ability. The leadership of Principle must be manifest as orderly spiritual activity, replacing beliefs of limitation with the infinity of divine energy. This spiritual action is inspired and sustained by infinite Mind, quite apart from any supposed influence of material personalities. There is no halfway position between the true leadership and the counterfeit. As Mrs. Eddy says emphatically on page 310 of "Miscellaneous Writings": "Even the teachings of Jesus would be misused by substituting personality for the Christ, or the impersonal form of Truth, amplified in this age by the discovery of Christian Science. To impersonalize scientifically the material sense of existence-rather than cling to personality-is the lesson of to-day." Thus Christian Science and the belief in material personality as magnetic are exact opposites, and fortunately Christian Science is the expression of demonstrable Principle, whereas the supposition of an opposite is utter nothingness with no power to substitute itself for the spiritual reality.

GUSTAVUS S. PAINE.

Testimonies of Healing

About twenty-one years ago a friend wrote to me asking me to go and visit her and to try Christian Science, as she had received such wonderful benefits from it. I was a sick and discouraged woman and willing to try almost anything, but had never heard of Christian Science before. With the loving help of a practitioner I was instantly healed of an organic and a functional disease. Two years ago, in order to have some legal papers made out, I was obliged to have a physical examination and the doctor pronounced those organs perfect—nineteen years after the one treatment.

A hereditary disease from which I had suffered all my life did not yield at that time. I had several practitioners, at different times, and the pain became very much less but the trouble kept returning at regular intervals, and it was shown to me very plainly that I must work it out myself. I went at my study with renewed diligence, and after eight years the difficulty was overcome. At first, like many beginners, I tried to control my body with my thought instead of guarding my thought so as "to be absent from the body, and to be present with the Lord." I also found myself watching the body and looking for results. Finally, one day I asked myself this question: "Do you want physical healing that you may enjoy more the so-called pleasures of the senses, or do you want the Christ?" I decided to choose the Christ, and I discovered one of the greatest blessings that has ever come into my life,—the lever that will lift the whole lump of error, the greatest asset the Christian Scientist has,-gratitude. By this time my thought was so uplifted I almost wished the trouble would return that I might prove its nothingness. I did not have to wait long, for in two days it presented itself, in the early morning as usual. I sprang from my bed, realizing that this was no time for argument, and as I declared, "Now is come salvation, and strength, and the kingdom of our God, and the power of his Christ," the pain left me. It has never returned, and that was thirteen years ago.

That Christian Science does heal I have had abundant All my relatives, both on my father's and my mother's side that I know of, suffered from this disease and they all took drugs, had doctors and operations, and not one of them was healed, or even helped. I am the only member of the family who turned to Christian Science, and the only one who has been healed. For the physical healing I am grateful, but most grateful that Christian Science has taught me to do my own thinking. It has taught me that the only place to seek dominion is in my own thought, that it is in my own thought that I fight my battles with evil, and it is there the victories are won. The most helpful thought to me along this line is one which our inspired Leader gives us in "Pulpit and Press" (p. 3): "Know, then, that you possess sovereign power to think and act rightly, and that nothing can dispossess you of this heritage and trespass on Love. If you maintain this position, who or what can cause you to sin or suffer?"

(Mrs.) Marion C. Pearsall, Seattle, Washington.

After many years of material thinking and living, in which I indulged in all of the so-called material pleasures to the full and was in bondage to false appetites, I found myself debarred by my own thought and that of others from following my calling, that of an accountant. Two reasons were urged for my not doing so; namely, age and eyesight. It was impressed upon me in season and out that I was past the age where I could be used, and when I discovered a failure of eye-

sight I felt I was surely done for. In discouragement I sought other ways of making a livelihood for myself and family. The struggle grew harder and more bitter, but I felt that nothing could or would stop me from providing for my loved ones. What the consequences to me might be, I did not know or care.

A year previously Christian Science had been offered to me, but I was not ready to accept it, and even though the struggle just to live became more hideous and cruel I still did not feel ready. It seemed necessary for me to be "beaten with many stripes" before I would awake, but I am grateful now for the experience, for it taught me many valuable lessons. At last I turned wholly to God. When everything was gone and I had no work nor prospect of any I made my appeal to "our Father." As soon as this appeal was humbly and rightly made, while I was "yet a great way off," He who is ever present good had compassion on me. What a blessed and hallowed day that was. I was led to where I secured congenial work and in pleasant surroundings. Feeling, in a blind way, an immeasurable sense of gratitude, I sought to find a way whereby I might know God. Christian Science kept recurring to my thought, but I did not seem to want it. At last, however, through some impulse I could not define, I turned completely to it, without any reservation whatever, for I wanted to find God and to know Him aright. I sought and have found what means more than all material things, "the peace of God, which passeth all understanding." My turning to Christian Science was not for physical but for mental healing. I had studied many religions in an effort to find the truth, including Mohammedanism and Buddhism, but they were all as "a reed shaken with the wind." Since turning to God, as we are taught to through Christian Science, my every need has been met.

Mrs. Eddy writes on page 340 of "Science and Health with Key to the Scriptures," "The First Commandment is my favorite text." Having no other but the one true God makes it impossible to entertain in thought anything that is opposed to God or infinite good, and the realization of this instantly healed me of the smoking habit of thirty-three years' duration. Failing eyesight yielded when I awakened to the fact that I was allowing the belief of it to usurp God's omnipotence in my thought. My sight was so defective that I frequently had to call some one to read things for me, as I seemed unable to distinguish letters or figures. I am a bookkeeper, and while at work one day one of these occasions arose. I took off my glasses and declared the truth, and have never had occasion or need for them since, and I can read finer print now than when I was supposed to have good sight. A lame back of many years' standing, supposed to have resulted from overindulgence in liquor, yielded to the truth and in three months I stood erect and free, praising Colds, catarrh, constipation, headaches, toothache, rheumatism, ingrowing toenails, carbuncles, and an extremely mean disposition, have all yielded to the truth.

Recently while away working in the mines for a while, I was helping to load heavy logs on a car, when one of them fell, hitting me squarely on top of the head. My knees sagged and I nearly consented to the argument of injury by saying, "I am hurt," but it was never said, and instead came the instant denial, followed by the affirmation of the allness of God and of man's relation to Him. On looking about me I saw the men who were working with me looking at me in horror, and then incredulity followed. I quietly resumed my work and did not experience any discordant results. A sense of lack has also been overcome. All the good that has come to me through Christian Science has resulted from the appli-

cation of my understanding of the truth gained through the study of the Bible and Science and Health.

Who, then, can wonder that there is an ever increasing song in my heart of gratitude to God? It has also been my privilege to help others. For the privilege of membership in The Mother Church I am deeply thankful. For the periodicals, those springs of living waters, I hardly know how to express my love and appreciation. For church attendance and all of the patient, kind, and loving ones who have and are helping me I am truly and lovingly grateful. I pray that I may be found worthy of the name Christian Scientist.

WALTER S. WHEATON, Mill Valley, California.

It gives me pleasure to verify my husband's testimony. His healing of the tobacco habit was particularly gratifying. I have received many healings of the so-called little things, and the study of Christian Science has made a great change in my life. I cannot express enough appreciation for the Christian Science literature; it has been a great help to me, and I am truly grateful for many blessings received from church activities and the study of Mrs. Eddy's works.

(Mrs.) MINNIE F. WHEATON.

4

I am glad to add my testimony to the efficacy of Christian Science. In particular, it is a joy to be free from resentment, due to a lack of opportunity and curtailing environment. Now I can see and in some measure prove that "with God all things are possible," and this knowledge is a continual incentive to work out my own salvation, because I know it is God which worketh in us "both to will and to do of his good pleasure."

Christian Science came into my experience, after some disappointing experiences in socialism and communism, and just when I had reached the stage of doubt and disbelief in God and man. Now I can see what equality of opportunity means, and that "God is no respecter of persons." I am glad to have learned to be more tolerant and forgiving, and also to look for and expect more of good in all things, and in my relations with my fellow man. Christian Science has helped in the solution of a great many financial and business problems, and I have occasion to be truly grateful for this. It has also helped me to overcome colds, headaches, and other physical troubles almost instantaneously, and through the goodness of God I have had no need for any other than the great Physician for the last twenty years.

We are also grateful for the confidence in good which an understanding of Christian Science gives, which is such a help in bringing up children. This responsibility has been seen to some extent in its right aspect, and consequent freedom from fear, worry, and the like, realized. I will conclude with an acknowledgment of my indebtedness to Mrs. Eddy for her works, for the Christian Science periodicals, and for The Christian Science Monitor with its sane and right understanding of world affairs, which is a never-failing incentive to trust in good, God.

RICHARD HAWORTH, Letchworth, England.

I am most grateful for the truth Christian Science has brought to me. Several years ago I became interested in the textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy. Since that time there has been a constant unfoldment of good. We have had many, many beautiful demonstrations of the omnipresence of God, and the omniaction of His law.

When our baby came I was where the law did not require a doctor to be in attendance, and we had the help of a nurse and a Christian Science practitioner. This experience was a most beautiful one and practically painless. Every experience is a joyous, happy unfoldment of infinite Truth. I rejoice to say that in the past few months much wrong thinking and many hidden sins have been uncovered and destroyed by the truth which makes free. I am so grateful to our dear Leader, who, although condemned and persecuted, clung to the truth, that its divine Principle might be revealed to mankind. I am thankful for all of Mrs. Eddy's writings and for the periodicals which she founded, also for membership in The Mother Church and for class instruction. To let my daily living attest my sincerity is the only way I can prove my gratitude.

(Mrs.) Esther I. Leach, Yerington, Nevada.

4

It is with loving gratitude that I write my testimony for the Sentinel. Three years ago, after returning from a hospital, having had two operations in less than two months, during one of which one kidney was removed, I was certainly sick physically and mentally. For seven months I was unable to work to amount to anything or to walk any distance without a great deal of pain and discomfort. It just seemed that I must have relief, so I asked for help through Christian Science. The work was lovingly taken up, and at the end of four weeks the condition was overcome. Since that time I have been able to walk anywhere without the slightest sense of discomfort. While I was having treatment, glasses which had been worn for twenty-three years were laid aside.

Since then I have been healed of influenza; also of an attack of kidney trouble, as the result of which I was suffering great pain and had a very high temperature and was unable to move myself about in bed. When the practitioner had been with me only a very few minutes the pain stopped, and I went to sleep as soon as she had gone. I was in bed less than a week; the soreness did not leave my side for three days after the pain stopped, but at the end of that time I got up and went right to work and have never worked harder in my life than I have since I had this healing. If it had not been for Christian Science I should have felt very frightened but I did not have any fear because I knew the need would be met.

I am very grateful for the loving work of the practitioner and more grateful every day to Mrs. Eddy for giving us "Science and Health with Key to the Scriptures," and for all she has done to make mankind better, healthier, and happier.

(Mrs.) INEZ CARPENTER, Milo, Maine.

٠

In Psalms we read that the children of Israel "spake against God" and asked, "Can God furnish a table in the wilderness?" I have for many years been able to prove that God has furnished a table in the wilderness, through our textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy. Christian Science gives us an understanding of divine Principle, and the rule whereby to work out the problem of being, and when we demonstrate our understanding according to rule, the result must be correct. Many years ago, after the birth of a son, I did not regain my usual health. A practitioner was called, and after four treatments I was able to ride across the city on the street car, with comfort. I was healed. My little son, who was taking diphtheria remedies every half hour, was healed at the same time.

This proof of the healing power of God, through Christian Science, has been a beacon light along my path during these many years. I was left with a family of eight children

to care for and educate, which to-day I can say has been accomplished. I had to say many times, "Therefore have I set my face like a flint, and I know that I shall not be ashamed." The many temptations, trials, and victories have given me the opportunity to demonstrate a clearer understanding of God and of the nothingness of evil. I can only express my gratitude for Christian Science and for the privilege of class instruction and the many blessings that have been mine, by obedience to Principle.

(Mrs.) MINNIE KATE STODDARD, Sioux City, Iowa.

I want to add my testimony of gratitude for Christian Science. When I first tried to read "Science and Health with Key to the Scriptures" by Mrs. Eddy, I could hardly understand it at all and could read only a few lines at a time, but I felt it to be the truth through which Christ Jesus healed. From that time I have hardly been troubled with sore throats and indigestion, from both of which I had suffered greatly all my life, and I am beginning to find now that I can overcome them if they do try to appear real. Science and Health was first given to my mother by her grandson after his beautiful healing of lameness, and soon after this we came to live almost next door to a Christian Scientist.

For over eleven years I suffered during the winter from a very painful form of rheumatism; this was overcome in two days through Christian Science treatment. Formerly I had always had to have three weeks' treatment at a health resort, which made me feel weak and miserable. Treatment in Christian Science made me feel just the reverse. Through the patient, loving help of a Christian Scientist I was able, the year before last, to perform the duties of a nurse day and night single-handed, for nearly a year, besides attending to all the other duties of the home. I had worn glasses for over seven years, but do not now use them for working or reading, although I had been told I should need stronger ones every two years.

Christian Science came to me at a time when I greatly needed it, and I should be very unhappy without it. I am very thankful to God for all good, and my desire is for a better understanding of Truth and to express more gratitude. I am very grateful to Christ Jesus the Way-shower, to our revered Leader, Mrs. Eddy, and for the literature.—(Miss) ALICE HARCOURT, Windlesham, Surrey, England.

4

One day I was desperately ill with every symptom of tonsillitis, including a badly ulcerated sore throat. I saw a practitioner once and had one absent treatment, and by the following day I was healed. Words but faintly express my sincere gratitude for Christian Science.

MRS. WALTER CLIFFORD, New York, New York.

4

I am very grateful for the many blessings that have come to me through the study and application of Christian Science as taught in the textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy. When I read an article or testimony in the Christian Science periodicals and am helped and uplifted in thought I think I would like to write and tell of some of the beautiful and helpful thoughts that come to me and perhaps thus help some one else. When I think what my life experience was before I read Science and Health and was healed, I am grateful, for I was like the rosebush in winter: I seemed dead to all that is beautiful and helpful. I had the desire to do right, but I was sick and bound by the belief of poverty, and when I read the precious promises in the Bible I wished that I could make them my own.

After being miserable for years and having failed to receive relief through medicine or material means I took Science and Health, which a neighbor had given to me, and thought that I would just glance through it. I did not think of reading it, as my eyes were troubling me and I had such severe headaches when I tried to read. But I did read, and read all forenoon and did not have on my glasses, which I had thought I could not see without. I had been reading with comfort, and found I was healed of eye trouble and of stomach and heart trouble, also of a cough that I had always been troubled with. Jesus said, "I and my Father are one," and we too can say it if we really love as Jesus loved and demonstrate that love in healing the sick and comforting the sorrowing.

(Mrs.) OLIVE A. SPENCER, Kansas City, Missouri.

4

I was healed several years ago of internal trouble and have had a number of healings since then. Some of them were of neuralgia, sick headaches, and corns. I have done lots of hard work since I was healed. I thank God for His protection and care, and I am grateful to Mrs. Eddy for "Science and Health with Key to the Scriptures." It is a great work.—(Mrs.) MAY DERR, Reading, Michigan.

4

I am thankful to God for what Christian Science has done for me since I began to study my Bible and "Science and Health with Key to the Scriptures" by Mrs. Eddy, about four years ago. Very soon after I began studying I was healed of stomach trouble of many years' standing by reading Science and Health. I had tried many kinds of medicine without avail, and about one week after I began reading Science and Health I threw all medicine away, and was healed. My two children and I have had so many healings that I cannot enumerate them all. When my son was five months old he was healed of stomach trouble and a bad cough, and my baby daughter has been healed of several different ailments. I am grateful to Mrs. Eddy for Christian Science. My one prayer is for a better understanding of God.—(Mrs.) Mary Williams, Dinuba, California.

In reading the testimonies of healing in the Sentinel and Journal, it was brought home to me that I had long neglected to express my appreciation of benefits received through the study and application of Christian Science. I did not take up the study for any special physical healing but because it appealed to me as the truth as taught and demonstrated by Christ Jesus.

Shortly after reading "Science and Health with Key to the Scriptures" by Mrs. Eddy, and attending church services, many ailments, such as constipation, liver trouble, and headaches of long standing were overcome and disappeared as darkness before the light, and that without any special effort on my part. It was the result of the truth unfolding to my thought and replacing error with good. I am so glad that we learn not only how to help ourselves but others also, and to bring them into some understanding of this wonderful newold truth. I am grateful for all the periodicals, for the Hymnal, and especially for Science and Health, for through the study of this book the Bible has been illumined for me.

It is my great desire to show my thankfulness to God. and my gratitude to Christ Jesus the Way-shower, and to Mrs. Eddy, by my daily living, and that by daily demonstrating the truth others may desire to know and inquire the way.—(Mrs.) Jennie Messenger, Whitehall, Montana.

Signs of the Times

["Belief and Believer"—The Christian Science Monitor, Boston, U.S.A., March 23, 1921]

"The believer and belief are one and are mortal," declares Mrs. Eddy on page 487 of "Science and Health with Key to the Scriptures." The finity, mortality, of a belief is not difficult of comprehension to any one who has had even a glimpse of reality in Christian Science, and of the power of an understanding of Truth. The mortality, the actual nullity, of the believer is, however, not often comprehended so speedily. It is generally supposed that man is free to believe whatsoever he will. This is partly due to a misconception of man's true identity, and partly to some confusion regarding the word "belief." In the course of her answer to the question "Who or what is it that believes?" from which we have quoted above, Mrs. Eddy explains that, in the Bible, the words "believe" and "belief" often have a deeper meaning than that which ordinarily attaches to them in the speech of to-day; but as generally understood in Christian Science and as employed in this quotation, "belief" signifies credence that has been given to an erroneous argument, a credence not based on understanding but on ignorance and fear. The supposition that man can believe what is suggested by ignorance or fear, by animality or hatred, by selfishness or immorality, is false. For man can do no less nor more than God has formed him to do, and these suggestions and the beliefs they breed are no part of Mind or of its idea, man. Man, then, is not the believer, and the student reaching this point of enlightenment echoes the question that Mrs. Eddy has answered: "Who or what is it that believes?"

If the believer is neither Mind nor its idea, it can be only a supposititious intelligence, a fleeting, finite mentality. Mind and Truth are synonymous terms for Deity, and there is no part of Truth that is not in Mind; therefore the believer is not cognizant of Truth. It must be, and is, indeed, "a liar, and the father of it." It is that perversion of divine Mind that Mrs. Eddy has termed "mortal mind." This mortal mind and the mortal body are one, as Mrs. Eddy has definitely stated in many instances, and that one, since it partakes in no sense of omnipotence, omnipresence, or omniscience, is without power, without place, and truly without the ability to know anything.

This conception of the believer can be of inestimable service to one who is faced by a belief in error which assumes tenacity, power, or subtlety. In that case, not only is the belief attempting to seem real, but the further attempt is being made to substantiate a believer, to make him a reality and to identify him with man. Both attempts can be instantaneously frustrated by a clear and calm understanding that man is not the believer and never can be: that not only does this claim of error have no existence, but, more than that, the power to believe in it or to be convinced of its verity is without existence. No such power can belong to or influence man. The lie in this case can be banished by a definite alignment with Principle on the part of the supposed sufferer. If believer and belief are one, and if Principle and idea are one, then the individual facing a claim of illness, lack, temptation of any kind, has only to align himself definitely with one or the other. If he will face the alternative squarely, the first thing indubitably apparent to him is that there is no alternative. To align himself with believer and belief would be to say of himself, in the words of Jesus to the Pharisees, "Ye are of your father the devil, and the lusts of your father ye will do," and this he cannot admit. He must admit his identity as man, and therefore his identity with God.

With each such repudiation of the believer, and with each assertion and proof of man's unity, through understanding, with the one Mind, the thinker becomes more thoroughly convinced of the necessity for substituting every moment of the day knowledge for belief, understanding for ignorance. He begins to see the impossibility of recognizing mortal mind as mentality, unless he wishes to be fettered and cursed by every false belief, every erroneous argument and lie of matter to which truth has been perverted in human history. He sees mortal mind in its true light, as "a murderer from the beginning," who "abode not in the truth, because there is no truth in him." He meets every claim of mortal mind to intelligence, prestige, or power with the certainty of its nothingness. He will at this stage be strongly liable to meet the temptation which Matthew describes as the third temptation which Jesus met, when he had accepted the baptism of John and had gone into the wilderness. "The devil taketh him up into an exceeding high mountain, and sheweth him all the kingdoms of the world, and the glory of them; and saith unto him, All these things will I give thee, if thou wilt fall down and worship me." In other words, Devote your thinking to earthly objects and purposes. The answer is written for us, an effective denial of the believer: "Thou shalt worship the Lord thy God, and him only shalt thou serve." The thinker must serve Mind and never the believer, the so-called mortal mind.

In the chapter entitled "Animal Magnetism Unmasked," of Science and Health (p. 103), Mrs. Eddy identifies animal magnetism with mortal mind and contrasts its claims with the omnipotence of Mind in these words: "As named in Christian Science, animal magnetism or hypnotism is the specific term for error, or mortal mind. It is the false belief that mind is in matter, and is both evil and good; that evil is as real as good and more powerful. This belief has not one quality of Truth. It is either ignorant or malicious. The malicious form of hypnotism ultimates in moral idiocy. The truths of immortal Mind sustain man, and they annihilate the fables of mortal mind, whose flimsy and gaudy pretensions, like silly moths, singe their own wings and fall into dust."

[From a Remarkable Address on the Religious Outlook Given at the University of Cambridge, by Rev. Charles E. Raven, B.D., as reported in *Public Opinion*, London, England]

"It may seem to some that this note of urgency is an exaggeration; that I am speaking in an unbalanced or sensational fashion. I wish to God I were," said Mr. Raven. "I envy with all my heart those who can comfort themselves in these difficult days with the belief that the storm will soon pass, and that the ark of the Church of England is unsinkable. Christ will not fail-that is sure; and if one cared nothing for the Church that would be all that mattered. But for those who, like myself, love the Church and cannot be content with an undogmatic and uninstitutional religion, the knowledge that we are even now being weighed in the balances of God, weighed and found wanting, is full of bitter-We have had so splendid a past: we have stood so truly for a reasonable and ordered liberty, for a right relation of the outward to the inward: we have or might have so bright and precious a future: that it is doubly tragic to see us losing our opportunity, and refusing to adapt ourselves to the new light of a new age.

"And yet, unless we willfully blind ourselves to the signs of the times, that is what we are doing. No one can live for many weeks in a place like this without realizing that a fresh outpouring of the Spirit has taken place, that at last Christianity has got over the perplexities and adjustments of the

past century, and that a new and reasonable faith is stirring in the minds and lives of the younger generation. . . . But these young men and women are seldom or never returning to the Church; they are deliberately, and in most cases with regret, turning away from a society whose life and doctrine they could only accept at the cost of sacrificing what no one of them dare sacrifice, intellectual honesty.

"Quite conclusive is the case of the candidates for Holy Orders. In spite of the revival of Christianity in the student world, the Church is getting too few ordinands—and those not the best. Our apologists may try to comfort us by alleging the poverty of the clergy as the reason. That is false. Those who believe it must have a curious idea of vocation and of the heroism of the young. They will not take Orders because they do not feel anxious for official connection with a body whose methods are notoriously inefficient, and because they cannot assent to propositions which are universally regarded even by the clergy as antiquated and untrue. A prayer book redolent of bygone superstitions, creeds which proclaim with the arrogance of ultimate incrrancy facts in some cases unbelievable, and unbelieved sacraments for which claims are made which can only be paralleled in the records of white magic, preaching which dare not speak its mind even if it has a mind to speak, a spirit which is exactly and ruthlessly described in the New Testament denunciations of the Pharisees,—that is how the Church strikes the less friendly of them; and with that picture of it, we can hardly wonder that they stand aloof. The picture may be one-sided and overdrawn; I should, of course, not be here if I thought it fair: but my business is not so much to comment upon their criticisms as to note them and to ask if they are wholly unjust; to note them and to urge that they are symptomatic of our almost total failure to meet the needs of the time. . . .

"Christians are visibly confronted with an immediate alternative—the alternative crudely, but not untruthfully presented as 'Christ or chaos.' They see everywhere a vast yearning for a better order, a growing conviction that in the service of the world-wide kingdom of God is alone to be found both the ideal and the inspiration which will nerve them to face the future. Everywhere there are signs that the opportunity is of unparalleled grandeur. Men and women of all denominations are sharing in that hope, yielding themselves to the cause, and in so doing are finding a union and a fellowship such as they have never previously experienced. The old divisions, the old quarrels, none of them less than a century distant from our time, have shrunk into the meanest insignificance in face of that great call for united action; their perpetuation has become a veritable sin against the light, a deliberate act of apostasy and of betrayal. And yet when these new crusaders, pledged to a holier war than any past crusade, demand that they shall share together the bread and wine which their Master chose as the appointed sacrament of brotherhood, their request is rejected with calumny as an act of rebellion. In the sacred name of tradition and for fear their acts should compromise the legal status of their denomination-a status already precarious enough—they are forbidden to go forward; they are asked to deny their experience, to consent to what they know to be sin. Little wonder if they turn from the churches in disgust.

"I have tried to sketch the position as faithfully and as frankly as I can. The times seem to me far too critical, the issues far too grave for soft speech or compromising half-truths. We stand, I believe, at a point where movement is essential. We must either go forward speedily and fearlessly, or as a Church we perish," said Mr. Raven.

"There was a moment in the history of the Reformation when it might have been possible, or so it seemed, for the Church of England, and with it perhaps the whole of Westtern Christendom, to have reformed itself from within to have absorbed the new knowledge and readjusted the old traditions without a breach of historic continuity. So at least Erasmus and More and Colet dreamed. It is possible for us also to reform ourselves: God's grace may yet restore to the old wine skins their pliancy and make them fit to contain His new wine. But the season for such a peaceful change is passing fast. Many of us will wait and work and watch in the hope that the change may yet come in time. Only our hope grows fainter. Only there may come a moment—and sometimes it seems at hand-when we can wait no longer. when action at whatever cost will have to be taken, when to be still would be to sin not against man but against God. And if that call comes, that call which no man dare disobey, thousands will rise to answer it."

[From an Editorial in The Bristol (Connecticut) Press]

We trust that the action of the House yesterday in rejecting certain alleged "health bills" is a true indication of its attitude toward the indefensible centralization schemes that have so offensively come to the front. Connecticut has in the past suffered from political bosses and it does not yearn for imitators, for those who aspire to wear educational, medical, or other crowns, symbols of autocratic and largely irresponsible authority.

Church Notices

Boston, Mass.—The First Church of Christ, Scientist. Sunday services, 10:45 a.m. and 7:30 p.m.; Sunday school, 10.45 a.m.; Wednesday evening meeting, 7:30 p.m., in the church editice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading rooms: Little Building, corner of Tremont and Boylston Streets (fourth floor); open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. National Union Bank Building (seventh floor), 209 Washington Street, opposite old State House; open daily, except Sunday, from 9 a.m. to 5.30 p.m. Massachusetts Trust Company Building, 236 Huntington Avenue; open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 7 p.m.

Admission to Membership in The Mother Church

The next admission of candidates will take place on June 3, 1921, as provided in Article XIII, Section 2, of the By-laws of The Mother Church. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Friday, May 20, 1921. Consideration of any applications received after that date will be deferred until the November 4, 1921, admission.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to November 5, 1920, and have not received notice of election. may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

Charles E. Jarvis, Clerk,

236 Huntington Avenue, Back Bay, Boston 17, Mass.

From the Clerk of The Mother Church

Church Tenets.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to Edward L. Ripley, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society

Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in *The Christian Science Monitor*, were run off at the time of their publication in the *Monitor*.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 8¼" x 10¾". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel-before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount. Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for *The Christian Science Monitor*, *Journal*, *Sentinel*, *Quarterly*, and *Heralds*, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and immediate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming: Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlet in Russian

There is now on sale a new Russian translation of "Christian Science: Its Advantage to Mankind" by Edward A. Kimball, with alternate pages in English. Price 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U. S. A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U. S. A.

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U.S.A.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder

of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large Type (18-point) on Warren's heavy India Bible paper, bound in leather. Size 8 by 1034 inches. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

German Translation. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good. Rudimental Divine Science, No and Yes. Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900. 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mothe Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Biblipaper, single copy \$2.00; six or more, each \$1.75.

paper, single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German.

Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1805, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages. Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

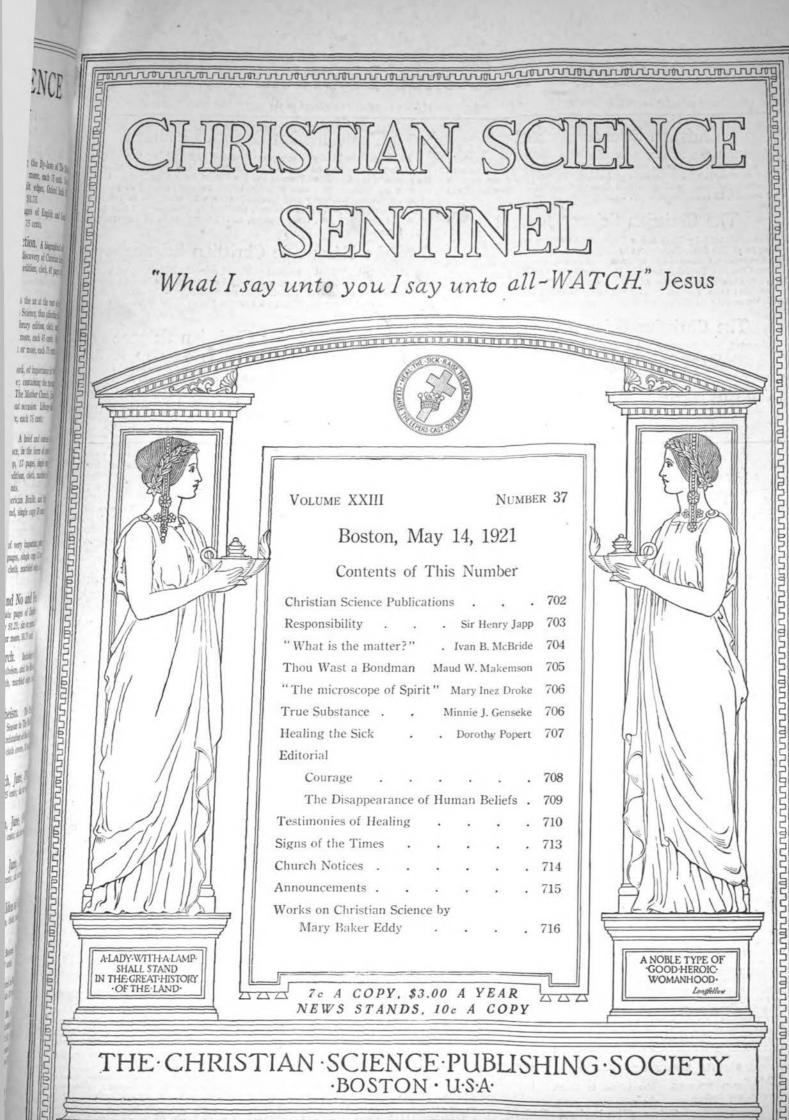

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, cilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

Sole Publishers of All Authorized Christian Science Literature

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY ·BOSTON · U·S·A·

Christian Science Literature

"Science and Health with Key to the Scriptures" and all other published writings of Mary Baker Eddy are listed on the outside back cover page of this Sentiael.

Christian Science Sentinel

Established, 1898, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. Subscription price, payable in advance, postpaid, to all countries: One year, \$3.00; six months, \$1.50; three months, 75 cents; single copy, 7 cents.

The Christian Science Journal

Founded, 1883, by Mary Baker Eddy. This monthly magazine is an official organ of The First Church of Christ, Scientist, in Boston, Massachusetts. Contains articles, editorials, and testimonics of healing, a directory of Christian Science Churches, Societies, and Reading Rooms; also in the January, April, July, and October issues a list of Christian Science Practitioners and Nurses. Subscription price, payable in advance, postpaid to all countries: One year, \$3.00; six months, \$1.50; three months, 75 cents; single copy, 30 cents.

The Christian Science Quarterly

Founded, 1890, by Mary Baker Eddy. Published January, Aprik July, and October. Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size. Subscription price, payable in advance, postpaid, to all countries: One year, \$1.00; single copy, 25 cents.

copy, 5 cents. Le Héraut de Christian Science

An International Daily Newspaper. Founded, 1908, by Mary Baker Eddy. Daily, except Sundays. Its own world-wide news service is supplemented by the service of the Associated Press and of the United Press Association. Complete in its departments; unique in its Home Forum page. Full page of editorials dealing truthfully and fearlessly with vital questions of the day. Subscription price, payable in advance, postpaid to all countries: One year, \$9.00; six months, \$4.50; three months, \$2.25; one month, 75 cents; single copy. 5 cents.

The Christian Science Monitor

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months 50 cents; single copy, 20 cents.

Der Herold der Christian Science

Authorized, 1903, by Mary Baker Eddy. A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months, 50 cents; single copy, 20 cents.

Subscriptions will begin with the next issue after the receipt of the order. · Information regarding bound volumes of the weekly and monthly periodicals will be given upon request.

NUMBER 37

Responsibility

SIR HENRY JAPP

"To those leaning on the sustaining infinite, to-day is big with blessings," is how Mrs. Eddy opens the Preface to the Christian Science textbook, "Science and Health with Key to the Scriptures." To how many receptive hearts have these inspired words not been as a cup of cold water in a dry and weary land, that land of mortal mind, where the burden of responsibility seems more than can be borne? This mortal burden may assume many forms for different individuals, ranging from that of the schoolboy's responsibility for the daily task or the approaching examinations, to that of the captain of industry with his responsibility for financing and operating a great industrial plant; or as depicted in the Bible, from the cares of Martha "cumbered about much serving," to the widow of Zarephath, who answered the prophet's request for a morsel of bread, "As the Lord thy God liveth, I have not a cake, but an handful of meal in a barrel, and a little oil in a cruse: and, behold, I am gathering two sticks, that I may go in and dress it for me and my son, that we may eat it, and die."

No matter how great the seeming burden or how difficult the task, these opening words by Mrs. Eddy, if spiritually understood and scientifically applied, will solve the problem, and this can be proved to-day, as it was centuries ago. What a wonderful promise these words convey of all that is within the covers of Science and Health, and of the perfect healing which results from the unfoldment of divine Science to the human consciousness. As one reads the Christian Science textbook for the first time with a receptive heart, the immediate effect is to increase one's faith in God, to make one feel that an ever present helper is at hand to relieve one of the crushing sense of responsibility of daily life. But the young student finds that a new responsibility arises; for as the irresistible conviction that Christian Science is the absolute truth about God, man, and the universe, grips the human thought, one is immediately compelled to take an honest stand before the world for Truth, for Christian Science.

To the beginner in Christian Science it seems easy, so far as he himself is concerned, to take this important step, involving in the first instance the giving up of material medicine and looking to God only as the great Physician. It may be, however, that although the student is young in his study of Science he is nevertheless the head of a family of young children. Then the question arises, and one's relatives are not slow to put it plainly: "What! are you going to sacrifice your children to this new fad you have taken up? Are you going to deprive them of medical aid when they are sick?" That is a serious question: Is the student of Christian Science going to sacrifice his children on the altar of Christian Science? Will he do as Abraham made ready to do with his beloved and only son Isaac? Now it is just here that the student, in debating this matter with himself, finds an answer to his problem; for a study of this incident in Abraham's life is most helpful. It will be remembered that Abraham had given up the gods of his father's people and had through his purity of thought discerned that God was not a graven image, neither was He the sun, nor the moon, but infinite, invisible Mind.

This great discovery naturally led Abraham away from his father's idolatrous country, and when "he went out, not knowing whither he went," he had not lost entirely his early teaching in old theology, with its sacrifices offered to his father's gods. This false sense of God as demanding the sacrifice of something held dear still persisted, and to Abraham's higher sense of God it seemed that a higher sense of sacrifice must be due. His only son, Isaac, presented to Abraham his most cherished possession and it was with an intense self-abnegation that he prepared to respond to his highest sense of duty to what he considered as God's demand. Abraham's very willingness to sacrifice self and his obedience to this demand brought divine Love nearer in that hour of trial and dissolved the clouds of sense or ignorance of God, thus revealing the nothingness of matter. He was then able to perceive something of the unreality of human parentage, as well as of the great and joyous fact that Isaac was not his to give up, because he perceived man to be the son or idea of infinite, divine Mind.

Abraham then found that all he had to give up or sacrifice was his false sense of human parenthood. This he saw never belonged to him, was actually never part of the real man, but only a false belief in mortal mind, "a ram caught in a thicket by his horns." This was no sacrifice at all but a joyous giving up of a lie believed in, but now recognized as a lie; a purely mental process, a letting in of the light followed by the disappearance of darkness or ignorance. And now where is the responsibility of the Christian Science student for his children, and what is the result of accepting the truth for which Abraham stood, which Mrs. Eddy defines on page 579 of Science and Health as follows: "ABRAHAM. Fidelity; faith in the divine Life and in the eternal Principle of being. This patriarch illustrated the purpose of Love to create trust in good, and showed the life-preserving power of spiritual understanding." The false sense of responsibility for children and the fear that accompanies it vanish in a home where such understanding of the truth holds sway, and the children responding to it manifest health, not sickness. In place of the false sense comes a joyful trust in God, a new sense of His ever presence.

What, then, is the responsibility of a Christian Scientist? Can it be that he is freed entirely from the burden? Undoubtedly he is freed from what the world calls responsibility if he regards each problem metaphysically, for Mrs. Eddy writes on page 269 of Science and Health, "Metaphysics resolves things into thoughts, and exchanges the objects of sense for the ideas of Soul." The process, it will be seen, can be applied to all conditions and to every problem, from the burdens of housekeeping or of business, the overcoming of lack of supply, to the healing of sickness and sin. So that the responsibility of the Christian Science student

is to resolve things into thoughts, to be ever alert to reject the material lie and to replace it with the spiritual fact, and this is to reflect divine Love in joyous, right activity.

This is the responsibility of the Christian Science student, and as he grows in grace still higher duties await him. Mrs. Eddy realized to the full this responsibility and all that it entails. Every leader has made demands on his followers. Jesus said, "Heal the sick, cleanse the lepers, raise the dead, cast out devils: freely ye have received, freely give." These demands hold good, and are for the Master's followers today as surely as for those who heard him first utter them. The world is indeed under a deep debt of gratitude to Mrs. Eddy for having shown it through Christian Science how these demands may be complied with, and every loyal Christian Scientist is endeavoring through spiritual understanding to obey them.

Just as the demands of Jesus are for all time, so are those of Mrs. Eddy. Her demands are always applicable and always seem to have been formulated for the immediate present. What student of Christian Science can read her appeal on pages 176 and 177 of "Miscellaneous Writings" without feeling the need for a more consecrated effort to live the life of a loyal Christian Scientist. "But what of ourselves, and our times and obligations? Are we duly aware of our own great opportunities and responsibilities?" is how she opens the remarkable passage referred to, and after showing how the enemy is at work, she concludes: "Will you give yourselves wholly and irrevocably to the great work of establishing the truth, the gospel, and the Science which are necessary to the salvation of the world from error, sin, disease, and death? Answer at once and practically, and answer aright!"

"What is the matter?"

IVAN B. MC BRIDE

PHRASE frequently used by the average man when A some seeming discord comes within the range of his physical senses, is the question, "What is the matter?" What, of course, the finite human mind means to ask is, "What is the trouble?" or rather, "What is the nature of the discord so evident to my sense of sight?" In using the above phrase the average man associates his troubles with matter, and he is right in so doing, even though perhaps unthinkingly; for it is impossible to imagine any form of evil, whether of sin, sickness, or death, without linking it with matter. Poverty is a belief in a lack of matter; sin a belief of pleasure in matter; sickness a belief of pain in matter; and death is, in one sense. a belief in the disintegration of matter. Humanity could with much profit to itself, and should out of duty to God and man, look beyond the frail evidences of the personal senses and discern the true nature of its enemy, the belief in the reality of matter with its attendant discords. It would then be seen that matter is only a belief.

Absolutely, the only evidence a mortal has of matter is through the avenues of the material senses, which are supposed to be material organizations. The unsubstantial nature of not only the evidence of the physical senses but also the possibility of their presenting such, may be shown by several lines of reasoning, of which the following is one. Take the sense of sight, which, perhaps more than any other, with the possible exception of the sense of touch or feeling, supposedly presents the evidence which makes material objects and discord seem so real. According to the latest theories, the light passing through the Ienses of the eye forms on the retina an image of the specific object seen. The optic nerve, through excitation or some other unexplained process,

is said to transmit the image-message to the brain, the socalled seat of human consciousness. Then from this assumed information there is formed in the human mind that which is commonly called an impression, which is merely a concept of the object in question, whether it be a molehill or a mountain. It is extremely difficult, however, to see how a nerve, a thread of flesh, possessing no more intelligence than a linen thread and acting in the supposed capacity of a messenger boy, can transmit a message to an equally nonintelligent brain. Certainly, if a linen thread or a nerve were attached to a piece of paper or any material organization of matter, arranged in any manner whatsoever at the base of a telescope so that an image were thrown upon it, neither the thread nor the nerve could transmit the image to the brain of a mortal. Indeed, the only reasonable view to take is that the material object, eye, nerve, and brain exist solely in human thought, of which the material senses are the instruments and products. Thus matter is seen to be no more than a mental picture or an image of human thought.

Human thought, the sum of which comprises the whole of mortal existence, possesses nearly all the characteristics of the so-called sleeping dream. Mortal existence, like a dream, is purely a mental state. It is concerned wholly with finite images, products of its own formation, which flit across the stage of mortal mind to-day and are gone to-morrow, and all this in crude counterfeit of the divinely real and wholly harmonious experiences of the ideal man. The dream has a beginning and an ending and thus is not eternal. Neither a dream nor the experiences one seems to have while under its influence are real or actual. Furthermore, the images one sees are not presented by the material eye, even though they may seem to be so. As Mrs. Eddy writes on page 250 of the Christian Science textbook, "Science and Health with Key to the Scriptures": "Now I ask, Is there any more reality in the waking dream of mortal existence than in the sleeping dream? There cannot be, since whatever appears to be a mortal man is a mortal dream." Thus in order to cure any discordant condition which the dream seemingly causes one to be conscious of, it is seen that one must deal wholly with thought and not with its imaginary objectifications. The instant one awakes from a dream it ceases to be, and it then no longer even appears real. It certainly is true that dream and dreamer are one, for without the dream the dreamer could not be, and without the dreamer the dream could not even seem to exist. Thus the tempter and tempted are one, and the real man pursues the even tenor of his way unyielding to and untempted by the physical senses.

Matter, then, being unreal, the question, "What is the matter?" must deal with unreality, a procedure which mankind is gradually learning is unwise. If one reverses the above question, however, by asking, "What is the Spirit, or the nature of true harmony?" he is then concerned with reality. Furthermore, if he strives to gain a correct answer to this question he discovers something-yea, one thing-which cannot be explained away, and something which becomes more and more of a reality to the thinker. He learns to reason that because man is conscious, and this wholly apart from any sense testimony, he is thus spiritual, and that because an effect always proceeds from a cause and is like that cause, he, a conscious, spiritual effect, must have proceeded from a conscious, spiritual cause. This spiritual cause, or causative Spirit, must by its very nature be the direct opposite of matter, or finiteness, and so it is seen that God is infinite.

There are three things which the average man is all too willing to admit concerning his troubles, his seeming material discords: first, that they have power; second, that they have

:-

1

::

1

presence; and third, that he has a knowledge of them. He admits that they have more power than he has when he concedes them power to make him unhappy; he admits that their presence prevents his evading them all or perhaps any; and lastly, that since they have power to be present he has a knowledge of them, knowledge which he would willingly relinquish for a knowledge of harmonious conditions. The solution for his troubles, however, lies in his gaining an understanding of the answer to the question, "What is the nature of Spirit?"

Mrs. Eddy, in a wonderfully complete sentence in the Christian Science textbook, answers any and all questions concerning the nature of Spirit when she writes, beginning on page 109, "The three great verities of Spirit, omnipotence, omnipresence, omniscience,—Spirit possessing all power, filling all space, constituting all Science,—contradict forever the belief that matter can be actual." Spirit, being infinite, is all-inclusive and thus possesses absolutely all power. Then the supposition that troubles or their causes have any power at all is no more or less than an ignorance of Spirit. Thus matter, or rather the belief in it, does not even have the power to claim attention, to say nothing of causing man, the expression of God, any discomfort.

Do troubles have presence or does God have presence? The question cannot present any doubt to the thinker. Being infinite. Spirit now and forever occupies every conceivable portion of space, whether large or small, in the boundless realm of true thought; and so Spirit, God, with His attributes, is all that can be present. Then in the exact portion of space where some discordant form of matter seems to be, truly harmonious being, Spirit, is. Thus where mortal man seems to experience trouble,-namely, in a dream,-the real man, in actuality, is experiencing the harmonious unfoldment of Truth. Matter, then, having no power, has no power to be present, and not being present cannot include itself in real consciousness, and thus man, the reflection of this spiritual consciousness, does not have a knowledge of matter or its discords, but is wholly concerned with God. Spirit, knowing all, knows that there is no possibility of the existence of another mind or minds. And so God is the law of banishment to both matter and that which seemingly believes in it,-the human mind.

Thou Wast a Bondman

MAUD W. MAKEMSON

K NOWING the tendency of the human mind to forget all the disagreeable events that attended its journey through the wilderness the moment it finds itself safely ensconced in the prosperity of the promised land, Moses gave the children of Israel a command in Deuteronomy that is well worth the attention of those who to-day are finding a realization of harmony in Christian Science. It is, "And thou shalt remember that thou wast a bondman in the land of Egypt, and the Lord thy God redeemed thee." Moses realized that to forget the mighty struggles of the past, its tenacious temptations and the struggle for conquest over them, would leave room for self-will, doubt, unfaithfulness, and materiality, if the void were not already filled with gratitude and spiritual exaltation.

Redemption in some degree from bondage to material socalled laws of limitation, fear, sickness, and sin attends the progress of every one who earnestly studies the Bible in the light of Christian Science and strives to apply its teachings to his daily experiences. This progress out of bondage to materiality is typified in the history of the Israelites who were roused from ease under the Egyptian yoke and were subsequently led, not without backward yearnings, across the Red Sea, through the wilderness, and into the promised land. It was the ingratitude of the Israelites which made their sojourn in the wilderness doubly long and delayed them in the demonstration that an abundance of all good was their true birthright from their heavenly Father. It was this same lack of loving receptivity in the Israelites which led Moses in his wisdom to warn them against the day of prosperity, lest they again forget the gratitude they owed to God for the good attained. Later events proved that Moses' commandment against forgetting was needed, and that had it been heeded, the children of Israel might have spared themselves much suffering.

To-day students of Christian Science are proving gratitude to be one of the most powerful antidotes for human ills that can be found. Gratitude proves that the way for healing is open. It disperses the mists that would seem to shut out the vision of God as perfect Principle and man and the universe as His perfect idea. It brings with it inspiration, courage, peace, harmony, the kingdom of heaven. Gratitude turns thought completely away from self and lifts it to the contemplation of divine Love as the source of all supply, to infinite Mind as the creator of all activity. He who turns to God with a heart filled with gratitude for ever present good, experiences an expansion of thought, an elevation of ideals, and a sense of freedom from limitation that makes possible an immediate widening of the circle of his mental horizon. Thus gratitude makes him receptive to the good that supplies his need, whether that need be for physical healing, right activity, friends, or daily food. As Mrs. Eddy says, in "Science and Health with Key to the Scriptures" (p. 4), "What we most need is the prayer of fervent desire for growth in grace, expressed in patience, meekness, love, and good deeds."

Again, gratitude involves loving, since it would be impossible to be truly and deeply grateful, even toward an individual, without an attendant sense of love, and such spiritual affection closes the door to envy or covetousness. Gratitude to the Father-Mother as the source of all good, unfolds the beautiful truth that God loves His idea tenderly and continuously, and that none can be deprived of the divine heritage of infinite good. Gratitude antidotes any sense of intolerance or impatience among those who do not agree on various subjects, since to remember one's former bondage to ignorance and apathy would surely render him pitifully patient with another's erroneous way of thinking.

That healing from disease and sin is not always followed by the deep and lasting thanksgiving which the event justifies was seen in the case of the ten lepers who were healed by Christ Jesus, as related in the seventeenth chapter of Luke's gospel. The ten lepers, seeing Jesus, stood afar off and cried for mercy. In obedience to the Master's command, they went to show themselves to the priest and were healed of what they had always believed an incurable ailment. Only one of the ten, a Samaritan, turned back to thank his benefactor. "And Jesus answering said," the gospel continues the brief recital, "Were there not ten cleansed? but where are the nine?"

Christian Scientists have infinite opportunity for expressing in word and act their gratitude toward God for redemption from bondage. Mrs. Eddy has provided the Wednesday evening meetings for the giving of verbal testimonies of healing, as well as a place in the Christian Science periodicals for written expressions of gratitude for Christian

Science. Other opportunities for proving gratitude are illimitable, and unfold to the earnest seeker in a way undreamed of. Material sense can no more hinder the unfoldment of these higher, spiritual ideals than it can prevent the petals of the bud from opening into a perfect flower.

"The microscope of Spirit"

MARY INEZ DROKE

As the student of Christian Science becomes better acquainted with the writings of its Discoverer and Founder, Mary Baker Eddy, he is constantly struck by her remarkable insight and originality in the choice of words and in the use of metaphors. Often a sentence or even a phrase will open up to the reader a vast field of thought. This originality, however, is never attained at the sacrifice of accuracy. A business man of keen reasoning powers once said that the Christian Science textbook, "Science and Health with Key to the Scriptures," appealed to him because throughout the work Mrs. Eddy does not vary by one hair's breadth from her original proposition that God, good, is All, hence evil is nothing. To-day a vast number of people are realizing that for spiritual truth, accurate reasoning, and energizing vocabulary this work has never, with the exception of the Bible, been equaled.

All three of these elements are found in a sentence of but seven words occurring on page 264 of Science and Health, where we read, "Matter disappears under the microscope of Spirit." Now, as all know, a microscope is an instrument equipped with a lens of such a quality that an object examined through this lens appears many times enlarged. Hence if matter possessed a single enduring element, were in any way real, inspected through the instrument of Spirit it would appear magnified, its features and characteristics standing out more vividly. But if when thus examined matter disappears entirely, then we have the so-called material universe and material forces presented in their true light, —as nothing, occupying no place, possessing not a single real property, without entity or identity.

What, then, is made manifest through this lens of Spirit? In "Miscellaneous Writings" (p. 194) Mrs. Eddy says, "The lens of Science magnifies the divine power to human sight; and we then see the supremacy of Spirit and the nothingness of matter." Through the spiritual lens God's power and presence are magnified to the human understanding and there is presented in a clearer light and more commanding form His ability and readiness to destroy all seeming beliefs in any other power or presence. Again, in our Leader's work, "The First Church of Christ, Scientist, and Miscellany" (p. 129), we read: "And how is man, seen through the lens of Spirit, enlarged, and how counterpoised his origin from dust, and how he presses to his original, never severed from Spirit!" This lens of Mind is so purely spiritual that through it the mortal cannot be seen even as a false concept, but the whole material belief disappears entirely; and in place of the false, the spiritual image and likeness becomes apparent as real and unique.

The point of departure for the student is to decide what instrument he will endeavor to use in his daily life,—the material, supposititious apparatus by which a carnal thought thinks it beholds its own picture and which presents such inharmonies as contrarieties of temperament, love of material pleasure and gain, misfortune, physical infirmities; or the spiritual instrument, which so enlarges to him God's power and the real man that he can perceive nothing but

good and its varied reflections. Are we failing to view our brother through this spiritual lens? Do we persist in trying to hold him under our faulty material glass which distorts and uglifies, offering to us only a mortal, erroneous concept? This concept has, to be sure, no more reality than has a mirage, but so long as we gaze through a faulty lens we certainly shall perceive a distorted image. Do we dissect this erroneous belief, expatiating on its incongruities, its unlovely features, its weak spots, remarking that here is an absolute lack, there a decided deformity? If so, let us hasten to discard this blurred, distorting lens for the only true one, earnestly trying henceforth to view our brother, and the whole universe, through the microscope of Spirit. What a transformation of scene is wrought! That sorry, grotesque, sinful, mortal concept that we called mortal man has disappeared, and instead to our spiritual vision, keen with humility and love, appears our brother as we would have him, reflecting every quality of the One "altogether lovely." Does this seem difficult? But it is as we would have God see us. and as indeed He does see us, since He is of "purer eyes than to behold evil."

If the task seems impossible of accomplishment there is need for greater meekness and deeper love, and the realization that no good thing can be difficult to accomplish, "for it is God which worketh in you both to will and to do of his good pleasure." Does our brother seem still to manifest these unlovely qualities even after our efforts to unsee them? Then let us patiently persist, knowing that it is our own fault if we give place to undesirable thoughts, thus setting up an image of our own creating. If the temptation comes to us to see this brother as selfish, let us be careful that we ourselves manifest always unselfishness; if he appears worldly, let us strive to be more spiritual, thus to be better able to help him discard these false traits. In this way can we fulfill our obligation to our fellow men. Such a method does bring results, as surely as laying one stone on another in the proper way will at last construct a building. It cannot possibly fail.

If in our daily living we constantly endeavor to see thus spiritually, with singleness of purpose, with steadfast gaze viewing all through the microscope of Spirit, we shall no more perceive as real "any thing that defileth, neither whatsoever worketh abomination, or maketh a lie," but shall with increasing clearness realize somewhat of the infinite scope of Mrs. Eddy's words on the page of Science and Health already quoted, where she gives the promise of spiritual recognition in these words: "When we learn the way in Christian Science and recognize man's spiritual being, we shall behold and understand God's creation,—all the glories of earth and heaven and man."

True Substance

MINNIE J. GENSEKE

JESUS said at the close of that wonderful Sermon on the Mount after he had expounded to his followers the truths of spiritual law, "Take no thought for your life, what ye shall eat, or what ye shall drink; nor yet for your body, what ye shall put on. . . . Behold the fowls of the air . . . your heavenly Father feedeth them. . . . Consider the lilies of the field, how they grow."

The writer had for many years been in great bondage to a limited sense of supply and in striving to understand more of God's abundance of all good she received great help from the above quoted Scriptural passages. Though she had read

35

0

13.17

15

2

them many times during many years, yet the question came: Had she ever truly considered the things Jesus had given there for consideration? Upon referring to a dictionary she found the following definitions of consider: "To ponder; to study; examine the subject with the view to truth, to think carefully, to reflect." Then the unfoldment came. The fowls of the air manifest free, joyful activity. Their expression of joy is not destroyed because they have a nest to build or little ones to feed. Do we not sometimes let ourselves become so absorbed in the material needs that we overshadow our reflection of spiritual joy? In considering the lilies the writer thought of their wonderful beauty and purity manifest regardless of the ugliness of their surroundings. A lily is a lily wherever you find it. Are we not, however, sometimes seemingly affected by the ugliness of our surroundings rather than the beauty and purity of the individual perfect man, God's idea?

The writer had always felt she was not in the least extravagant, having always made her expenditures with much care. Nevertheless, in delving further, in self-examination to uncover and destroy the false belief of lack, she looked up the word extravagant and found it defined in part as, "a going beyond the limits of strict truth." How many times she had let her thought go beyond the limits of strict truth! How often her thought had expressed limitation in the consideration of her fellow man! Many times she had even expressed the very opposite of strict truth by thinking of a brother as in bondage to a belief of sin or sickness, unkindness or dishonesty. Then it was seen how much time and thought were extravagantly wasted every day. And we do not often find an expression of abundance where there is great waste. Finding she had exercised much more care in the disbursement of money than in the disbursement of thoughts, thereby giving more heed to the material than the spiritual reflection, she experienced an earnest desire to reject every limited or unprofitable thought. The question of considering the lilies of the field and the fowls of the air was put in these words: Is your reflection always as joyously active as the bird, and as beautiful and pure as the lily? Do we always reflect the same beauty and purity of thought to every one we come in contact with? The lily does not close its blossom of beauty when some certain person passes by, but do we not sometimes lessen our reflection of love toward some particular person of whom we have had a limited and false concept?

Then came a greater appreciation and a deeper understanding of Jesus' words, "Seek ye first the kingdom of God, and his righteousness." A belief of lack can only remain because we do not seek the kingdom of God and reflect His righteousness. Mrs. Eddy says in "Miscellaneous Writings" (p. 307), "God gives you His spiritual ideas, and in turn, they give you daily supplies." God has through Christian Science given every one the opportunity to learn daily to be blessed by ideas. Mrs. Eddy says in "Science and Health with Key to the Scriptures" (p. 3): "Are we really grateful for the good already received? Then we shall avail ourselves of the blessings we have, and thus be fitted to receive more." Then let us be ever faithful in bringing "every thought to the obedience of Christ," and not let a single thought of fear, limitation, or lack be expressed. Let us be grateful for the blessing already bestowed on us, the opportunity of learning to prove that the perfect spiritual man is the only man. Just in proportion as we learn to reflect Principle will all things be added. Then we shall sing with the psalmist, "The Lord is my shepherd; I shall not want."

Healing the Sick

DOROTHY POPERT

THE writer is most grateful for a broader understanding I of what "healing the sick" constitutes and would like to share this blessing with others. Some months after taking up the study of Christian Science, and having been uplifted and healed of many ills, she was inspired with a keen desire to help others. A great wish to be always about the "Father's business" possessed her. Some months followed, during which there was an apparent lack of patients. Disappointment and ingratitude often tried to creep into her thought and suggest that she was not doing God's work. Her time was certainly not taken up with the healing work as she had hoped it might be. A little self-examination was then found necessary, which revealed that she had been rigidly planning for herself to enter at once upon the healing work instead of letting divine Love point the way. Her eyes were then opened to see many little unsolved problems close at hand. More self-examination revealed a lack of humility, unselfed love, and willingness to be faithful over the few things of home life.

In the period of struggle that followed in destroying the error which Truth had uncovered, much help was received from "Miscellaneous Writings." On page 118 she read, "Be of good cheer; the warfare with one's self is grand; it gives one plenty of employment, and the divine Principle worketh with you,-and obedience crowns persistent effort with everlasting victory." Healing the sick was thus seen to be not merely healing what are known as "patients," but a constant, individual striving to reflect those spiritual qualities which will melt away all shadows and reveal the glory of His presence. Joy and gratitude then became magnified in the writer's thought, and all the small or big tasks which she found to do took on a new aspect. Then inspired with Love, cleaning her brother's bicycle or doing the shopping became a joy, and every task an opportunity for reflecting more love. In these simple and homely lessons it was made plain that manifesting divine Love, whether in thought or deed, is certainly being about the Father's business. Error will sometimes suggest to us that after we have demonstrated a little of the healing power of Christian Science we are quite ready to branch off at once and give our time to more advanced and spiritual work. Then is the time to be still and examine ourselves, and see if it is not perhaps a desire for self-glorification that prompts us, instead of the honest desire to serve God. Does it not often appear that where our loving help and services are most needed is right where we are? Remember the words of the poet Milton, "They also serve who only stand and wait."

The childlike meekness and willingness to follow God which characterized the life of Mrs. Eddy should be a constant inspiration to Christian Scientists. This simple and Christlike attitude is indispensable to those entering this sacred task of healing the sick. Every expression of Scientific truth, whether mental or oral, is certainly obedience to this command of our Master. It is helping to destroy the belief in evil. What a privilege for us all as Christian Scientists to reflect such purity and love that all may be drawn to the Christ, Truth, to be healed. Then will the words of Isaiah be fulfilled, "The earth shall be full of the knowledge of the Lord, as the waters cover the sea." On page 17 of "Rudimental Divine Science" we read: "The ways of Christianity have not changed. Meekness, selflessness, and love are the paths of His testimony and the footsteps of His flock."

Courage

Ar ten of the clock, on the morning of Tuesday, the sixteenth of April, exactly four hundred years ago, Luther, with three companions, rode into Worms, in a covered wagon protected by eight horsemen. Just a fortnight before, he had left Wittenberg, under a safe-conduct of the Emperor which he hardly believed to be worth the value of the wax in the seal. He knew precisely what had happened, in Constance, to Huss under almost similar circumstances. "Even if they kindled a fire as high as heaven from Wittenberg to Worms," Myconius reports him as saying, "I would appear, in the name of the Lord, in obedience to the imperial summons, and would walk into behemoth's mouth, between his great teeth, and confess Christ."

All those fourteen days, in the covered wagon, must have been crowded with the images of fear and torment. Still, he remained absolutely undismayed. A year later, he wrote to the Elector, "Had I known as many devils would set upon me as there were tiles on the roofs, I should have sprung into the midst of them with joy." When he came to Worms there were devils enough in the streets, but there were more angels. A huge concourse had gathered, in hope and fear, in interest and sheer curiosity, to see what was going to happen. There were Lutherans and Papists, monks and soldiers, nobles and mighty ecclesiastics, all intent on witnessing the defiance of Emperor and Pope by the town preacher of Wittenberg. But would it be a defiance? Next afternoon, as Luther pressed through the throng, into the great hall of the bishop's palace, a huge mailclad baron caught him by the shoulder in his steel hand. "Pluck up thy spirit, little monk," he said, "some of us here have seen warm work, in our time, but, by my troth, nor I nor any knight, in this company, ever needed a stout heart more than thou needest it now. If thou hast faith in these doctrines of thine, little monk, go on, in the name of God." Luther threw back his head. "Yes," he answered, "in the name of God, forward!"

There, in very truth, is the note of courage, the courage of a man facing the world, and defying its powers and numbers, in the name of Principle. Paradoxically, he did not realize his danger, because he saw the full extent of it. It was so vast he was compelled to take refuge in his understanding of the power of the Christ. One day, long years after, he explained this in his own peculiar way. "I was undismayed and feared nothing," he said, with an obvious reference to the first letter to the Corinthians, "so foolish can God make a man": for says the apostle, in a certain great translation, "The foolishness of God transcends man's wisdom, the weakness of God man's strength." Luther himself had, however, not fully mastered the meaning of the writer. Had he done so the story of the Reformation would have been more far-reaching even than it was. He walked by faith in Worms, but not fully by understanding. Evil to him was still the great red dragon, and a dragon very great and real at that. "The great red dragon," Mrs. Eddy writes, on page 563 of Science and Health, "symbolizes a lie,—the belief that substance, life, and intelligence can be material. This dragon stands for the sum total of human error." In Worms, in 1521, this was not so clear as it had been in Corinth fifteen centuries earlier, nor so manifest as it was to become in Boston some four hundred years later. Nevertheless Luther's challenge to fear represented a great victory in the name of Principle.

What, it has to be asked, is fear? It is not just being afraid. That sort of fear is a mere symptom of fear. The fear which produces fear is something far more fundamental. It is the great red dragon itself, the belief that "substance, life, and intelligence can be material." Beyond this belief there is nothing for any one to fear. For if substance, life, and intelligence are spiritual, what actually is there for any one to fear? Matter, death, and ignorance are banished from the realm of reality, and what is there left for a man to make a bogy of? Courage, conversely, is Principle, and is rooted in the fact of the unreality of matter. It must be manifested in the exact ratio of the individual's perception of the unreality of matter. In its higher sense it is, of course, moral, for its animal expression is in the nature of a control or defiance of fear rather than of any understanding of Principle. "Moral courage," Mrs. Eddy says, on page 514 of Science and Health, "is 'the lion of the tribe of Juda,' the king of the mental realm," whilst on pages 28 and 29 she makes her fuller meaning abundantly clear, "There is too much animal courage in society and not sufficient moral courage. Christians must take up arms against error at home and abroad. They must grapple with sin in themselves and in others, and continue this warfare until they have finished their course. If they keep the faith, they will have the crown of rejoicing.'

There, really, is the alpha and omega of the whole business. Fear is sin, the sensuous belief in matter; courage is purity manifested in the degree in which the carnal mind gives place to the Mind of Christ. The key to the door of this realm of purity is given by Mrs. Eddy to her students, in a brief passage, on page 418 of Science and Health, which illuminates the whole question. "Show them," she writes, with reference to the sick, "that the conquest over sickness, as well as over sin, depends on mentally destroying all belief in material pleasure or pain." The world is eager enough to deny the reality of pain, but it is loath beyond words to repudiate pleasure. Yet if there is anything logically irrefutable it is that both or neither are real or unreal, whilst it is metaphysically beyond question that they are unreal. The full scientific expression of courage was given to the world for its example when Christ Jesus, waking from his sleep, in the storm on Galilee, issued his command to the wind and waves, "Peace, be still," or when, in the triumph of the cross, he exclaimed, "It is finished." Only a man who had actually proved the nothingness of matter could have silenced the tempest with a word, a word that showed his knowledge of its nothingness to be so overwhelming as to be beyond fear. Only out of a certainty of the powerlessness of evil could there have come the calm assurance of victory, which proclaimed the absence of any fear of evil reasserting

In order, however, to attain a courage capable of completely obliterating fear, it is obvious that a man must first overcome his belief in materiality, which is fear, and overcome this belief in materiality he cannot so long as he believes that there is any pleasure to be extracted from it. It is, obviously, this belief in pleasure in matter that constitutes its entire supposititious strength. Once this is broken its power is gone. Therefore a man's battle with fear narrows itself to a struggle with his own sensuality, and as he rises victorious from that he becomes aware of a courage he never experienced before, a courage greater than that which brought Luther from Wittenberg to Worms, the courage which comes from dependence upon Principle alone.

FREDERICK DIXON.

The Disappearance of Human Beliefs

THE work of Christian Science is not to make over a weak, diseased, or unhappy mortal into an immortal enjoying a state of bliss. The real redemption from sin, disease, and death is a process by which mortality disappears in the presence of the spiritual immortality which always has been going on even while illusory human experiences may have been supposed to obscure it. Salvation means, of course, saving, and what is saved or preserved eternally, both now and throughout the true past and true future, is the spiritual idea which is the real man. Because mortal belief is wholly bad, it never can be saved; nor can there be a halfway stage, partly good and partly bad, to be saved or redeemed. That which alone is actual is already saved, with the everlasting salvation of which Mrs. Eddy speaks, on page 261 of "Miscellaneous Writings," where she says: "Jesus said, 'I came not to destroy the law,' -the divine requirements typified in the law of Moses,-'but to fulfil it' in righteousness, by Truth's destroying error. No greater type of divine Love can be presented than effecting so glorious a purpose. This spirit of sacrifice always has saved, and still saves mankind; but by mankind I mean mortals, or a kind of men after man's own making. Man as God's idea is already saved with an everlasting salvation." Thus the suppositional mortal is saved just in proportion as his mortality gives way to the actuality of Principle, God, ever manifest as spiritual order.

Improved belief in mortality is, then, that which is disappearing, because its unreality is turning to the divine Mind and the true manifestation. If darkness or a mirage could be thought of as turning to and subsiding before omnipresent light, this might give a hint of the process going on through Christian Science practice; but any such material illustration is faulty just because it is material and hypothetical. Since the entire belief in matter and mortality is hypothetical in the same way, it is difficult to discuss, for the discussion of utter nothingness is in truth an impossibility. Real analysis eliminates the whole false belief and finds instead the true idea, intact, harmonious, forever untouched by suppositional illusions.

For each one, therefore, the right way of working in Christian Science is not to cling to the belief that he is still mortal and imperfect but to declare and prove for himself man's present immortality, for only in this way can he rejoice in the disappearance of false beliefs. As long as a man stoutly maintains that he is still human or mortal, with the various limitations of such a state of thinking, he will seem so, because his every argument is a struggle to perpetuate the illusion. Yet all the while the only real man is immortal, perfect, free, quite apart from any condition of false belief. It is, in fact, merely a classification of supposititious mortal mind that considers some states of human thinking better than others, since whatever is not wholly good must yield to the divine harmony.

*

In what Mrs. Eddy calls "Scientific Translation of MORTAL MIND" on page 115 of Science and Health, we find under the head of "Second Degree: Evil beliefs disappearing," the following qualities given: "Moral. Humanity, honesty, affection, compassion, hope, faith, meekness, temperance." The marginal heading speaks of these as "Transitional qualities." Of course what the so-called mortal mind often thinks of as affection, hope, or temperance, is not the spiritual reality, which must be far beyond the scope of any finite concept. In so far as the finite mortal sense of even supposedly good qualities gives way to the truth, what remains is not human but divine; and this has always been the absolute fact of being, regardless of what mortal mind may have thought. Thus the true improvement comes about, not through any satisfaction with mortal concepts, no matter what they may seem to be, but through the understanding and demonstration of the divine goodness. Even transitional qualities must be replaced by immortal perfection in order that the "old man" may be completely put off.

Certainly the demonstration of Christian Science does not allow for the doing of wrong in the expectation that good may result from it. The outlining of some human end as desirable in itself and the using of any and all means, good or bad, to attain this end can never be truly expedient in Christian Science. The difference between good and evil, to phrase it in one way, is that good is constructive, whereas evil is suppositionally destructive. Whatever is truly constructive, because it is unfolding action in accord with divine Principle, is right; and whatever would claim to destroy is wrong, for the truth, instead of destroying anything real, gives the immortal idea in place of any seeming imperfections. This process of spiritual replacement is the means by which human conditions are improved; but in the process there can be no attempt at ruthless destruction nor any resort to reprehensible methods. In Christian Science the highest ethical standards must be maintained, for only what is nearest right in any circumstances, only what demonstrably expresses intelligence, can succeed.

The genuine process of Christian Science is applicable equally to business difficulties, to disease, and to all the other seeming discords of people either separately or in their relationships one with another. In a case of sickness the Christian Science practitioner does not set out to destroy something, for error is not an entity to be destroyed, nor does he try to make over an imperfect body into a perfect one. Instead, he knows that infinite Principle is manifest as right spiritual action in spite of any human sense testimony, and knowing this, he goes calmly ahead with his work, rejoicing in the indivisible and indestructible truth, as Mrs. Eddy has shown us the way through her discovery and founding of Christian Science. To go forward steadily each one needs to take advantage of all that she has provided for our progress, for it is the complete truth that heals. In giving up erroneous predilections and being willing to see false beliefs disappearing in other ways than might have been ignorantly outlined, each one must recognize that infinite Principle has an infinity of manifestation which can never be limited by beliefs of human expediency or impatience. The divine expedient is always the limitless understanding which is sure of the omnipresent goodness of God, despite seemingly distressing symptoms. When a man persistently knows the truth, he invariably proves the disappearance of error, the vanishing of just so much human or mortal belief, in the presence of the spiritual immortality which was before Abraham. GUSTAVUS S. PAINE.

Testimonies of Healing

I did not take up the study of Christian Science because I really wanted to, but because I was absolutely compelled to, as materia medica held out no hope to me. About five years ago I had what the doctors considered a very serious disease, although after being under treatment for about nine months the physician treating me pronounced me cured, but in a couple of months I was seemingly in a worse condition than ever. When I went to the doctor again, he made a careful diagnosis and pronounced the trouble to be sugar diabetes. Being a personal friend, he told me kindly but firmly that medicine could not cure me and advised me not to doctor any more as it would result in failure and loss of time and money, and recommended a diet. Not being exactly satisfied with the diagnosis I went to a clinic of seven doctors in quite a large city, and this first diagnosis was confirmed. My mental suffering was very great and I was in constant dread lest I should eat something that would not agree with me, and the following year found me almost a mental and physical wreck.

A loving sister seeing my condition advised and helped me to see a practitioner, who explained to me something of the teachings of Christian Science. At first I had but a faint ray of hope, but that little ray of light has grown until Christian Science is more to me than any other thing, and I am a well man to-day, and have been for some time. The healing which at one time I thought would be so great seems small now when compared with the love which Christian Science has unfolded to me, for God and my fellow man. The desire for tobacco and whisky, and the use of profanity have vanished into their native nothingness, and the greatest desire of my life is to reflect love to all mankind.

One day while I was on my way home my little dog, a mere puppy, was run over by an automobile, two wheels going over him. He commenced to struggle to regain his feet, but couldn't. I immediately declared the truth, and picked him up and held him in my arms, where he soon became quiet. One leg was apparently broken and he was hurt inwardly. I denied the injury and declared the truth as we are taught to do in Christian Science, and then put him down. Quite a crowd had gathered and many were the sympathizing remarks. The man whose car ran over him also came back, begging my forgiveness, which I freely gave. He looked at the pup and remarked, "It were better he were dead." I clung steadfastly to God and upon arriving home I laid the dog down and picked up Science and Health, opening the page at random. I do not know just what I read but something seemed to grip my heart, and the greatest love crept in and I knew God had answered my prayer and that the puppy would live. In less than twenty minutes, he walked out in the yard with me and at eleven o'clock that night when I started to my work he came along. As he trotted along looking up at me I was very happy and my thoughts dwelt on the time when the seventy came back to Jesus and told him, "Even the devils are subject unto us through thy name." For this wonderful healing I thank God. I am grateful for the periodicals and for membership in The Mother Church.

THOMAS JOEL GLENN, Casper, Wyoming.

I feel it my duty to tell the world what Christian Science has done for me. About five years ago I underwent a very serious operation in which a tumor was removed from my side. About two years later I was in such a weakened condi-

tion I could scarcely walk across the room without help. The doctors diagnosed my case as subnormal temperature. All medicines failed to have any effect, and I was growing weaker each day. As a last resort (and it should have been the first) I went to a Christian Science practitioner, but she was too busy to take my case. We could not get a copy of Science and Health in town, so she ordered one for me and as I had to wait several days for it she kindly gave me a copy of the Journal and of the Sentinel, which proved to be spiritual food. I read and reread them, with the result that at the close of one week I was healed and was like a new woman. I performed all my household duties, which are many, without the least exertion on my part. Only those who have experienced some wonderful healing can realize the happiness of being free from bondage. This was several years ago and the healing has been permanent.

I am more thankful than words can express for the physical healing and for the spiritual uplift which I have received from the study of Christian Science, and the great desire of my heart is to help others as I have been helped. I am very grateful to our Leader, Mrs. Eddy, who revealed this demonstrable truth to the world.

MRS. I. C. CARTER, Lake Charles, Louisiana.

4

Christian Science has proved in every way, in our home, to be the great physician that heals all of our diseases. It has healed me of tonsillitis, of a stiff wrist, of headaches, and other ills. Two winters ago my mother manifested symptoms of influenza and was healed in three days through Christian Science treatment. A pet dog was healed of what is called black mouth through the loving help of a Christian Science practitioner. Christian Science is changing my understanding of substance from matter to Spirit, and I am learning to depend upon God as the source of supply. Through the understanding that Christian Science has given me that the eternal now is the only time there is and that "Man in Science is neither young nor old" (Science and Health, p. 244) I felt free to take a desired course of study at a university and have been much benefited thereby.

I am grateful to Mrs. Eddy for Christian Science and for all the activities for good that she has provided in the Christian Science movement; for church membership, and for class instruction. Christian Science is teaching me to know God and to love Him.

(Miss) BERTHA KIRKLAND, Los Angeles, California.

4

For more than seven years I have daily seen the unfoldment of good through an increasing understanding of its source. The Christian Science textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, has opened up for me the vast treasure-house of the living truth contained in the Bible. When I first read Science and Health it was with no expectation of what it would do for me, for I simply bought it as I would any other book because it was highly recommended to me by one whose good judgment I greatly respected. I was in great need of the physical healing, which came to me before I had half finished the book, and since then regeneration has been taking place in my own thought as well as that of all members of our family. I cannot, in one short testimony, more than touch upon the many healings we have had. Angina pectoris, pyorrhea, lumbago, headaches, colds, ptomaine poisonings, burns, have all been overcome by the truth. The history of one student of Christian Science is the history of all, with a few variations, so I will pass over the many physical healings to tell

of what seemed a much more marvelous healing which helped us all to overcome the seeming reality of the last enemy.

We are a very united family because we have learned to know that our real abiding place is in Mind; this has taught us in some measure the unreality of death. At the beginning of the war it was shown to us clearly, through reading the editorials in The Christian Science Journal, Sentinel, and the Monitor, that the conflict was between good and evil, so that upon the entry of the United States into the war I was given the amazing grace to rejoice when my two sons volunteered at once. In the spring of 1918 these two brothers were working together in a field, one in a trench mortar battery and one with the British air forces, and the one was taken and the other was left. When the news first came that our aviator was "killed in action," I knew that it could not be true in the absolute sense, and I was unwilling to believe it could even seem to be true, although the information received was authentic. After some days of mental conflict, the still, small voice whispered: "Do you wish that that boy were some other mother's boy,-and perhaps the son of a mother who does not know his life is God?" I remembered the boy's own words before he went away: "Remember, mother dear, that I can't lose anything in this war but a false or mortal concept." This mantle of courage and light-heartedness was bequeathed to the rest of us, and the belief in the reality of death is a ghost which has been laid for all time. Our boy is more alive to us than he ever was, in the degree that we are living in obedience to Love. The only separation I ever feel is when I am disobedient to that still, small voice of Truth which says, "This is the way, walk ye in it."

I am thankful to God for every good and perfect gift and lovingly grateful to Mrs. Eddy for all the channels which she has provided, through which the truth unfolds to us. I am grateful for the *Monitor* and all the Christian Science periodicals, which have meant much to me during these times.

(Mrs.) Lela Willson Barrett, Atlanta, Georgia.

I can truly testify to all my wife has said, and will add that no one could overestimate the work which has been done for us through Christian Science. I myself have been healed of a disease which the doctors pronounced incurable, angina pectoris, for which I had the best medical treatment for many months. I was healed in three weeks' treatment and during that period I received an understanding of the truth which has carried me through many hard places. My gratitude is inexpressible.—R. A. BARRETT.

4

The first healing I experienced through Christian Science was at a time of bereavement, when my thought was lifted above all sense of separation and loss. This was the greatest proof of the healing power of Christian Science that I could have had at that time, because I had passed through the same experience many times and had suffered keenly. After the passing on of my mother people told me that time would heal, but as time went on the sense of loss seemed greater. When my little daughter passed on I had treatment from a practitioner and was entirely healed of all sense of separation. This healing made me desire to gain some understanding of Christian Science, so that I might take this wonderful message of comfort to others who were passing through the same experience.

Whilst studying "Science and Health with Key to the Scriptures" by Mrs. Eddy I was healed of curvature of the spine, from which I had suffered for fifteen years. I was

very noticeably deformed, and scarcely ever had a day free from pain. The pain disappeared at once, and after a few weeks of study the spine went into place and I have been free for more than ten years. I have had much physical healing and am very grateful for every experience, and for the understanding of God and man that Christian Science has given to me. I also wish to express my gratitude for the Christian Science periodicals. It was through reading the testimonies in the Christian Science Sentinel that I first desired to have a copy of Science and Health.—(Mrs.) ELIZABETH WROE, Eccles, Lancashire, England.

4

What has Christian Science done for me? Perhaps the best way to answer that question will be to show the contrast between conditions now and what they were when I was a schoolboy at a large boarding school. What brought about ill health in those days does not matter, but I always seemed to be suffering from minor complaints which forced me to be sent to the sick house with great regularity. This continued after I left school and until I heard of Christian Science, but from that time on I have not had to spend a single day in bed—and this is many years now—or take any material remedy, or consult a doctor.

When the war broke out in August, 1914, I was in the British army and served until some months after the armistice was signed. During all that period the only times I had to go to the medical officer were for inspection for active service, and then I was each time passed as "A." Although I had volunteered for active service overseas and was always ready to go if required I was retained on coast defense work on island stations off the east coast of Scotland. There was a general belief that one could not spend more than two winters at these stations without its affecting one's health, but I was able to spend over four years-including five winterswithout a break, and with only seven days' leave each year, without any ill effects at all. It was only the understanding I had obtained through Christian Science that man is the emanation of divine Life, Truth, and Love which enabled me to rise above the suggestions that monotonous and confined surroundings, easterly gales, coupled with a sense of responsibility and overwork could affect man-the image and likeness of God. I am specially grateful for this, as it has often seemed much easier to meet physical danger and acute ailments than chronic ones. In reality it is not, because one is as much a fiction as the other, and neither have any more power than moonbeams have to melt a frozen stream.

During all this period the Christian Science periodicals were a great help and joy to me and on one occasion I had a striking proof of the value of studying the Manual of The Mother Church. I had been sent to a new station where I knew very few of the other officers. I was hoping some of them might be interested in Christian Science but I discovered after a few days that several of them, including the doctor, were interested in hypnotism and kindred subjects. My first thought was that if these subjects were discussed with me I would soon be able to expose any of that nonsense.

Shortly after this I had a very bad attack of toothache, which I seemed unable to overcome. This was not improved by the medical officer telling me one day that he had been watching me very closely and had noticed that I had a certain difficulty and recommended me to take medical treatment. This rather frightened me, because I knew that he had been using hypnotism on some of his patients. Some hours later, on picking up the Manual I came across the sentence in Article VIII, Section 3, where Mrs. Eddy says:

:. 7:

部をおりま

"When it is necessary to show the great gulf between Christian Science and theosophy, hypnotism, or spiritualism, do it, but without hard words. The wise man saith, 'A soft answer turneth away wrath.'" I saw immediately what was wrong. I had been trying to combat the fear of hypnotism with human weapons and had thus given it all the power and reality it ever seemed to possess.

The following day when sitting in the mess room the doctor came across and told me he wished to apologize for what he had said the previous day, as he had since learned that I was a Christian Scientist. He told me he was interested in hypnotism, and asked me if I could lend him some textbook on Christian Science. This I afterwards gladly did. When we finished talking, I realized that the toothache was healed. My gratitude is great for the lesson I had been taught.

With the study of Christian Science came an ever increasing freedom from the baggage of material limitations which I had been clinging to and which had hampered me at every step of the way. I did not become interested in Christian Science primarily for physical healing but because I found in Mrs. Eddy's writings the answer to questions which some of the teachings of the church in which I had been brought up had called forth, especially the doctrine of predestination. Mrs. Eddy's experience over this same doctrine, as she relates it in the chapter "Theological Reminiscence," in "Retrospection and Introspection," has greatly interested me. Though at first I felt a considerable revulsion from the teachings of the denominational church, I now see that we owe a debt of gratitude to the churches which, through some understanding of the truth, have been able, in sunshine and storm, to preserve the teachings of the Bible for mankind, until Mrs. Eddy rediscovered, through its inspired word, the guide to eternal Life.

Of the many blessings that have come to me through Christian Science I am most grateful, I think, for the overcoming of fear. What a difference it makes when the realization comes that not only are we released from the bonds of sickness, limitation, and the dictates of material environment but that in reality there is no evil and not even any fear to fear. What a joy to realize that a scientific knowledge of the truth will not only make us free, but will free all humanity as each individual turns to Christian Science. A knowledge of this gives us a feeling of compassion and a desire to help our neighbors. We have indeed cause to be grateful to our Leader, Mrs. Eddy, for rediscovering the healing truth contained in the Bible, which she has given to the world in "Science and Health with Key to the Scriptures."

ALEXANDER F. PRIMROSE, Boston, Massachusetts.

4

I should like to express my deep gratitude for all the blessings I have experienced since I became interested in Christian Science, just sixteen years ago. I have been helped through many troubles, and my needs, of every kind, have always been met. Sickness has been overcome both for myself and my sons.

I had a wonderful proof of the omnipresence and healing power of divine Love late last year. I had been suffering for about three weeks from what was supposed to be sciatica and did not seem to be able to overcome it alone, so I wrote to a practitioner one morning for help. Early that afternoon, about six hours before the letter could reach her, I was reading a copy of the Sentinel, and some words in it made me suddenly realize the all-presence of divine Love, and therefore the impossibility of there being any room for discord. I immediately became conscious of freedom from pain. I did not dare to move, but sat reading for about ten minutes

longer. When I got up, however, I found I was really free, and have not had any return of the pain since. I was also cured of indigestion as soon as I applied for help, and before the treatment was given, which proves, in the words of Isaiah, that "before they call, I will answer; and while they are yet speaking, I will hear."—(Mrs.) BLANCHE D. CRAVEN PHILLIPS, Whitfield, Dover, England.

4

I wish to express my gratitude for the numerous rich blessings received through the teachings of our revered Leader, Mary Baker Eddy, who revealed to us this great healing and saving truth, Christian Science. Prostration, heart failure, weak eyes, deafness, quick temper, self-pity, sensitiveness, severe spinal trouble, and other discordant conditions have in my case been swept away. I had been told by a doctor that I could never again be without glasses, yet for the past twelve years I have felt no need of them. My vision is perfect and I can read for hours, day or night. These ailments were overcome through the sincere study of Mrs. Eddy's work, "Science and Health with Key to the Scriptures," together with the help of a loving practitioner. Christian Science has also enabled me to overcome sorrow and separation from loved ones, as well as lack. Day by day the "Key to the Scriptures" is unfolding the beauty of spiritual creation and God as the only power, as are all of Mrs. Eddy's works.

I am grateful for the literature. The testimonies have been a great help to me. I am very grateful for the privilege of being a member of The Mother Church, also of a branch church. All I am and all I have I owe to Christian Science. My greatest desire is to strive to live this truth and to be a true helper to my fellow man.—(Mrs.) Luise Wilhelmine O'Connor, Moneta, Wyoming.

4

For the many blessings that have come to me and mine since taking up the study of Christian Science I am very grateful. My little son has never tasted medicine. One night last November he had quite a fever and in the morning we asked a practitioner for help. He had two treatments and got up perfectly well. In the evening I noticed a rash on his body and told the practitioner about it. She said the right thing to do was to report the case. I did not like the proposal but she pointed out to me what Mrs. Eddy says about reporting contagious diseases, and I wished to be obedient. The physician came the next morning and pronounced the case scarlet fever. After he left the boy was up and on roller skates, and was perfectly well during the entire quarantine period of one month.

Some time ago the boy fell from a high board fence, striking his nose. It looked as if the bones were broken, so we asked for treatment, and the nose is just as straight as ever. Another healing was of bowel trouble that seemed slow in yielding but by clinging to the truth as taught in the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and not listening to the suggestions of error, that trouble has been overcome. My mother was told by doctors she would have to be operated on for tumor, but that has dissolved into its native nothingness just by reading Science and Health. I am very grateful for the literature. I received a healing through reading an article in the Sentinel. I am thankful to God, and grateful to our beloved Leader, Mary Baker Eddy, and can only show my gratitude by living what we are taught in the Christian Science textbook.

(Mrs.) Eva Johnson, Palo Alto, California.

Signs of the Times

[" 'Cease from such utterances' "-The Christian Science Monitor, Boston, U.S.A., March 31, 1921]

Beginning on page 204 of "Science and Health with Key to the Scriptures" by Mary Baker Eddy, we read: "The belief that God lives in matter is pantheistic. The error, which says that Soul is in body, Mind is in matter, and good is in evil, must unsay it and cease from such utterances; else God will continue to be hidden from humanity, and mortals will sin without knowing that they are sinning, will lean on matter instead of Spirit, stumble with lameness, drop with drunkenness, consume with disease,—all because of their blindness, their false sense concerning God and man."

Here is a definite, specific statement to the effect that in order to destroy the error which claims that evil is a real entity, it is essential not only that we must "cease from such utterances," or cease from acknowledging the reality of evil, but we must go farther than that and unsay it and repudiate any statement of, or belief in, the reality of evil.

To the young student of Christian Science who may be endeavoring to overcome one of the myriad forms of belief in disease, this may seem a difficult task, but obedience to this injunction becomes easier as one progresses in the understanding of the teaching of Christian Science, or the Science of true being. After all, it is only natural that in order to experience the benefit of true health, the truth about God and man should be acknowledged in face of any seeming evidence to the contrary produced by the material senses. Whatever discordant condition the material senses may be manifesting, to turn right away from this false evidence and "unsay it" is not so difficult as it might seem, in face of the altogether unreliable nature of the evidence of these senses.

In thus turning away from the false, material evidence, are we not simply obeying the admonition contained in the Scriptures, "In all thy ways acknowledge him"? It is evident that to talk of disease as a real power to be feared or submitted to, is not acknowledging God, and when it is seen that it is that which cometh out of a man, not that which entereth in, that defileth, it will be realized that it is absolutely necessary to set a guard on our thoughts, and to see that every false claim or belief in a power apart from God is promptly denied a resting place, and instead the truth about God and man is uttered.

Should any one be struggling with a belief of sickness, one of the first and most important steps to take toward eliminating the discordant condition, therefore, is mentally to unsee it, or to see and acknowledge only what is really true about man. This may mean that, though apparently bound by the painful beliefs of material sense, one must turn away from the error, and declare the unchangeable perfection of the image and likeness of God, the man of God's creating, "the same yesterday, and to day, and for ever," and this whole-hearted acknowledgment of God as revealed in man, will, if persistently adhered to, prove the utter powerlessness of evil.

The story of Daniel in the den of lions illustrates very powerfully the result of the faithful acknowledgment of God in every circumstance. Daniel was forbidden to pray to his God, the penalty for disobedience to this law being what was considered to be certain death in the lions' den. Had Daniel obeyed this law and abstained from his usual custom of praying to God, he would not have been obeying the injunction to acknowledge God in all his ways, and would have given power to the belief that good is in evil, by obeying an evil law to achieve what he considered a good end—his own

protection. From the time Daniel first heard of this unjust law it is evident that he must persistently have declared that there was no other power but God, good, and he must have silenced any utterance of the error which would have tried to persuade him that by acknowledging God in all his ways he would lose his life. The result of his steadfast understanding that God was his Life, and that nothing could make him acknowledge evil instead of good, was that he was able to come unscathed out of the den of lions, proving triumphantly the freedom from danger which accompanies right thinking and right acting.

So also in the many cases on record in the Bible, of the healing of sin and sickness and the raising of the dead, the first step toward the destruction of the particular phase of error that had to be overcome was the mental denial of the reality of evil and the joyful affirmation of the allness of God, good. The raising of Lazarus from the belief of death would not have been accomplished had the Master not refused to admit that Lazarus had died, and in this way ceased from uttering the belief that life is in matter, and he showed further the necessity of doing more than this, and of literally unsaying it in declaring the truth that Lazarus was not dead. Then followed his prayer of grateful thanks to the Father, which may be taken as a joyous recognition of the eternal fact that in acknowledging God in all his ways, in ceasing to utter the lies of material sense, and in unsaying those lies, Jesus was proving for all time the oneness of God and man, proving, that is to say, that Principle and its idea cannot be separated by any belief of death.

Jesus never found it necessary to acknowledge evil as a power before he proceeded to destroy it, and his wonderful work was accomplished only by steadfastly acknowledging God in all his ways, and in giving utterance to truth in every instance where evil was claiming to exist. In this he was the Way-shower for all humanity, and in "Unity of Good" (p. 17) Mrs. Eddy writes, "A right apprehension of the wonderful utterances of him who 'spake as never man spake,' would despoil error of its borrowed plumes, and transform the universe into a home of marvelous light,—'a consummation devoutly to be wished.'"

4

[From "A Philosophy of Social Progress," by E. J. Urwick]

We will modify the very gloomy account given of the present unharmonized, disordered, and sectional activities of society by asserting that they represent a temporary stage, natural and inevitable for any society which has so recently shaken itself free from the old trammels of authority in all departments of thought and activity. And we will assert further that this stage is really preparatory to a higher unity; and that society is bound to struggle after such a unity, and is even now struggling. . . . The essential freedom of industrial activities has been won, and will not now be lost; it remains for us, however, to realize that no activities can be free without being also orderly, not really orderly without being also free. Social control of industry may take some stupid forms; but definite and regular subordination of industrial aims and methods to social ends is a foregone conclusion.

The activities of science, again, both in the elaboration of theories and in the application of theories to practice, show similar signs of nearer approach to a general unity. Science no longer glories in its antagonism to religion; its best votaries are striving after some true reconciliation. But here again there is no question of a return to the submission of science to religious authority. That issue was fought to a finish many years ago. . . . Each is being impelled by the

common consciousness of a necessary dominating unity, to adjust differences in order that society may be saved.

It is hardly needful to trace the growing unity in civic and political activities. The opposition of party to party may be as strongly marked as ever; so it ought to be, if the underlying feelings and impulses are healthy and vigorous. And no party is yet free from sectional bias and a tendency to work for a part and not for the whole. But all parties alike aim more consciously at the common good, less consciously at the particular good of their supporters; and this impulse is felt in the increasing sameness of the progressive efforts of all civic authorities to improve the condition of the populations under their care. So too with voluntary reformers. Many-sidedness is-and must be-the rule, for ideas and ideals multiply as our thoughts and activities become more diverse. But what is vaguely called "cooperation of effort" is, verbally at least, the accepted watchword; association of all workers is becoming the fashion in every township and borough. And finally, the dawning recognition of a necessary unity appears in the universal tendency to draw together into a common camp rival theories or sects or sections-without necessary loss of individuality. Union of this kind is becoming the rule, from union of free churches to union of labor interests,—all very partisan, doubtless, but probably a step to the recognition of a wider union of interests in which the interests of the whole society will be the bond. . .

It is clear that the reformer of to-day is increasingly called upon to work through public opinion and the impulses of the people, leading to change of law and so to alteration of the social structure and the social mechanism. However far advanced he may be in wisdom or goodness, he cannot now claim authority to ordain this change or that for the good of his society. The day of the wise lawgiver has passed; our modern society can expect no Solon or Lycurgus to direct it, no Confucius or Manu or Moses to make its laws, no philosopher-king or priest-king to rule it. The true aristocrat, wherever he exists, must use a different method, for society is no longer in its childhood, moving unconsciously along lines laid down for its safety. Its units are beginning to be wide-awake, interested, alert, reflective, critical, living as free citizens, not merely functioning as custom-bound cells; living, too, as conscious cooperators in a social life whose moving complexity is in sharp contrast to the fixed simplicity of earlier days. . . . It is not merely that activities increase in all directions, covering a field so vast that no one mind can grasp it; but, even more important, the number of groups and individuals consciously competing and cooperating, struggling and desiring, willing and aspiring, becomes so vast as to turn the social process into a new thing, no longer to be regulated or controlled by any one or two individuals or groups. This is the unanswerable defense of democratic rule. We may hate it, if we please; but there is no alternative. Even a Solon would probably abdicate as soon as he grasped the conditions of social change to-day. . . . It is the people themselves who must "solve" the problem and live out the solution as best they can, each unit learning in the process the primary lessons of social responsibility, of citizen duty, of neighbor duty.

[From "The Historical Study of Religion," by Shirley Jackson Case in The Journal of Religion]

Whether a new social order is to be "good" or "bad" will depend entirely upon the degree to which it satisfies the vital needs of real people then living. At first glance the student of religion in particular may hesitate to accept this dictum of the historian, for religion has been accustomed to insist perhaps more strenuously than any other phase of our culture upon the authority of the past. Yet historical inquiry readily shows that even the rites and dogmas of religion have not been able to withstand permanently the imperious demands of pragmatic necessity. Once upon a time it could have been held—and in fact was so held—that to accept the Copernican astronomy would mean a rejection of authoritative Christian teaching. Nevertheless the views of Copernicus have triumphed, for they have come to be regarded by men in general as necessary to intelligent thinking about the heavenly bodies.

The mighty pressure of human needs, as they increase in extent and intensity, cannot be resisted for long even by the powerful conservatism of religions, and one who has read history wisely will not be found spending his energies in a futile effort to lay the dead hand of the past upon the spontaneous life of the future. . . . The laws of history are laws of the universe, and the laws of the universe are laws of God.

[From The Living Church]

Let it be observed that at the Cambridge [England] University Union was recently debated this question: "Resolved, that this House would welcome prohibition of the sale of alcoholic liquors in this country," and the affirmative, in a poll of 414, lost by only 8 votes. Significant, indeed! The chief proponent was an undergraduate of Emmanuel College, Harvard's intellectual ancestor.

[From Santa Rosa Republican, Santa Rosa, California]

A member of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts, delivered a splendid lecture on Christian Science at Woodman Hall last evening. . . . Christian Science is becoming increasingly popular as its beneficent effects are better known, and daily its adherents are becoming larger in number.

[From Our Dumb Animals]

In the well-known travel talks recently given in Boston, the lecturer stated that the United States Government would not allow him to show pictures of Spanish bull-fights, and that he would not show them if he could. We were glad to notice that this sentiment was greeted with applause.

Church Notices

Admission to Membership in The Mother Church

The next admission of candidates will take place on June 3, 1921, as provided in Article XIII, Section 2, of the By-laws of The Mother Church. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Friday, May 20, 1921. Consideration of any applications received after that date will be deferred until the November 4, 1921, admission.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to November 5, 1920, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

Charles E. Jarvis, Clerk,

236 Huntington Avenue, Back Bay, Boston 17, Mass.

From the Clerk of The Mother Church

Church Tenets.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to Edward L. Ripley, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society

Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in *The Christian Science Monitor*, were run off at the time of their publication in the *Monitor*.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 81/4" x 103/4". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for *The Christian Science Monitor*, *Journal*, *Sentinel*, *Quarterly*, and *Heralds*, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and immediate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlet in Russian

There is now on sale a new Russian translation of "Christian Science: Its Advantage to Mankind" by Edward A. Kimball, with alternate pages in English. Price 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Scatincl and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U.S.A.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in The Christian Science Journal from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each 83.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in The Christian Science Journal and Sentinel, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more; each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good. Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy 83.50; six or more, each 83.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper. single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German.

Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

Printed in the New York point, American Braille, and English

Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more,

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more. each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy. music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

MAY 21, 1921

NUMBER 38

Intolerance

JOHN M. DEAN

ALL reasonable thinking people will agree that intolerance is a blighting evil, yet there is a wide divergence of opinion as to just what constitutes intolerance. A comprehensive definition of the word would run the whole scale of error from mere impatience with the views of another to that superlative quality of bigoted persecution which inspired the crucifixion of Jesus the Christ, and has always followed with vindictive malevolence all those who dare to break away from "the tradition of the elders." Thus it is likely that many people are intolerant without knowing it, and it is no doubt true that few are entirely free from this evil in some one of its varied forms.

It is entirely possible for one to differ radically with an honest man, however wrong he may seem to be, and yet differ kindly and peaceably. Indeed, this is a plain Christian duty. It should be remembered that a man may be ever so wrong in one direction and at the same time right in other directions. It has been well said that no one can really know another and at the same time hate him. Some gem of character, however small, ofttimes sparkles in the life of the most degraded like the gleam of a tiny diamond in the mud. The pure metaphysics of Christian Science affords a safe guide in the forming of right estimates of our fellow man. When inclined to indulge in harsh criticism of others it is well to reflect if we ourselves would have done any better under all the circumstances of environment with which they have been surrounded. Charity and bigotry have nothing in common, and many who pride themselves on being "plain spoken" are merely unkind.

To be charitable in considering the faults of others does not mean that the faults themselves should be condoned, but the fact remains that unless we separate the error from the individual we are helping to fasten it upon him, and to that extent we become parties to his sin. True reform and forgiveness do not imply condonation of evil, and can only come with the destruction of evil. But in spite of any mortal seeming, however real and vivid it may appear, it must still be seen that man, made in God's image, is perfect in his nature, and to see imperfection as a part of this man, or to confuse him with the mortal counterfeit of man which is evolved through universal wrong thinking, is to assist in the perpetuation of a lie and thus to sin against both God and man.

Christian Scientists as well as others need to cultivate what, for want of a better name, may be called a judicial temperament. In other words, men need to learn to estimate spiritually all things at their right value, and thus to gain that sense of proportion which the world sadly needs and which is necessary if right is to prevail. The possession of this desirable quality will enable one to analyze all sides of every question, and thus avoid that jumping at conclusions which results from superficial thinking, and which usually involves the unwary in a hasty and unconsidered

stand from which it is difficult to recede without the exercise of a high degree of moral courage, a quality that is all too rare with many otherwise excellent people.

Christian Scientists frankly differ with the theories of their medical friends as well as with many of the teachings of other religions. If this were not true there would be no occasion for the existence of the Christian Science movement. But to differ with others does not justify intolerance of their beliefs. What if others are intolerant? Their intolerance should not provoke retaliation, and it can be destroyed only through the neutralizing effects of tolerance. A Christian Scientist cannot afford to become intolerant even of intolerance. He can and should boldly but meekly and in season advocate the tenets of his own religion, but this gives him no license to "steady the ark" for others. To interfere with the individual rights of others would be to do violence to those very tenets, a course which would justly subject one to the charge of preaching without practicing.

It may safely be said that most men desire to do right according to their light. It is also true that the average man is prone to magnify the faults of another in one respect while he himself is manifesting a perhaps more grievous fault in another direction. Few people willfully do wrong, and where all adhere to the same ideals they can differ only in extraneous things. Unless mutual care is exercised these minor differences may ripen into distrust. suspicion, intolerance, and even into hate. The motives of others cannot always properly be judged. More love and confidence of a mutual sort would destroy differences of opinion and bring men together on that basis of right understanding which inevitably comes with a recognition of divine Principle. Principle is the only thing that counts, and those who take their individual stand by their honest concept of Principle will ultimately get together regardless of how widely divergent their paths may have appeared at the outset. When both parties to a controversy desire the exaltation of right and right alone, nothing needs to be accomplished but the destruction of human will, human pride, and human opinion.

Intolerance is a species of fear and needs to be treated as such. Truth requires no violent methods for its propagation. Adherents of Truth can afford to be patient and tolerant, well knowing that all opposition to its teachings is misguided and must be shown as impotent. Intolerance is manifested only by those who are doubtful and uncertain of their position, or who fear that the things for which they contend will be superseded by the object of their venom. Thus some of the radical adherents of scholastic theology and material medicine sometimes show their intolerance of Christian Science. Those who are sure of their position are supremely confident, therefore they are never excited or disturbed; neither is it necessary for them to resort to argumentative, coercive, or persuasive methods to make converts. All should whole-heartedly desire the establishment of right for its own sake alone, giving no heed to any sacrifice of personal opinion which may be involved. Is it pos-

以外世界以下,

sible to believe that right can result in harm to any one? All must finally take their stand by Principle, and when this is done the pitiful pretensions of mere personal opinion and prejudice will be seen for what they really are,—no thing or power.

In spite of the inherent intolerance of majorities when swayed by persons and not by Principle, minorities can afford to wait patiently for the ultimate recognition of the right. It should also be remembered that a minority which does not spring from the demands of Principle may be in its degree as tyrannical as an unjust majority. Those who are right can even be patient under temporary injustice, revilings, and persecutions, knowing full well that the blood of martyrs when shed in a righteous cause is at one time the "seed of the church" and the cement of Christian civilization. Supine submission to error, however, is neither necessary nor right, and loving-kindness does not prevent the vigorous defense of a righteous position. Ignorance and intolerance are twins, and the one always waits on the other. When Mrs. Eddy wrote (Science and Health, p. 94), "Tyranny, intolerance, and bloodshed, wherever found, arise from the belief that the infinite is formed after the pattern of mortal personality, passion, and impulse," she unerringly exposed the origin of these errors and at the same time placed intolerance in its rightful company.

Christian Science has come to destroy intolerance and to substitute therefor that spiritual tolerance which bears the hallmark of Christianity and which will settle all differences between men and nations on the basis of the fatherhood of God and the brotherhood of man. Hear these words of Paul which have come ringing down the centuries, but which too often fall on unlistening ears: "Let all bitterness, and wrath, and anger, and clamour, and evil speaking, be put away from you, with all malice: and be ye kind one to another, tenderhearted, forgiving one another, even as God for Christ's sake hath forgiven you."

Jacob's Ladder ROBERT C. BRYANT

THE history of the Jewish people, from Abraham to Christ Jesus, is the record of the good influence of the spiritual idea upon individuals and the nation, as they dimly perceived this idea. In this history one may see revealed all the weakness and baseness of carnal human nature, but he may also catch glimpses of the great spiritual truth which had dawned upon many of the people; and the value of the record, and the secret of why it has lived through the centuries, lies not in the mere material history, but in the vision of reality which runs like a thread of gold through the narrative, rising at times to inspiring statements of truth, and again to wonderful demonstrations of the power of Mind over material belief.

The story of Jacob's ladder is an illustration of the way in which the spiritual idea came to one who was mesmerized by the worst forms of carnal belief. After his trickery and deceit, in an effort to gain some advantage by material means, Jacob was afraid of Esau his brother, and as he faced the future alone in a new land to which he was going, he must have been depressed by the remembrance of his dishonorable acts and with fear of the consequences of what he had done. As he lay on his stone pillow he dreamed of the ladder reaching from earth to heaven, on which the angels of God were ascending and descending.

Now all of the self-seeking and duplicity in Jacob's thought, as well as the fears which he entertained, were

forms of error, mental suggestions of some reality apart from God, good; but the angels, as Mrs. Eddy says, in "Science and Health with Key to the Scriptures" (p. 581), are "God's thoughts passing to man; spiritual intuitions, pure and perfect; the inspiration of goodness, purity, and immortality, counteracting all evil, sensuality, and mortality." The meaning of Jacob's vision, as made clear in Christian Science, was that the only ideas that can really come to man must be the angels, God's thoughts; that the suggestions seeming to come from any other source than from God, must be purely supposititious, and have no reality. No ideas can really come from any other source than from Mind, God, and there is nothing in man that can entertain ideas but God's intelligent reflection. How much Jacob perceived this great truth we do not know, but he must have had some conception of it, for the process of regeneration, or casting out of error, was going on with him, and in a later experience with an angel he was renamed Israel, or, a prince with God.

The truth contained in Jacob's vision of the ladder is most vital to mortals to-day. Sin, disease, and death, evil or trouble in any forms in which they may seem to come to mankind, are all mental suggestions, animal magnetism, pure and simple; that which seems to be but is not. Man's existence is really in the kingdom of God. There is no other place to live because there is no place where God is not supreme; and the kingdom of God must be the veritable garden of Eden where evil is unknown. But the serpent, mental suggestion, whispers that evil is as real as good, that good exists only as the opposite of evil. This suggestion, entertained, immediately takes the forms of fear, sin, sickness, mortality. Pain, for example, is not a reality, for matter has no intelligence to suffer and Mind cannot suffer. There is really no such thing as pain. Pain is mental suggestion, and the same is true of all evil.

But this suggestion is only supposititious. Neither the suggestion nor the suggester is real, for the only ideas that can come to man must come from Mind, must be the angels, God's thoughts, and, "From Love and from the light and harmony which are the abode of Spirit, only reflections of good can come" (Science and Health, p. 280). This is the great truth which Jacob saw, if dimly, in the vision of the ladder, and it began to destroy the power of suggestion and to heal and regenerate his human life, until he became a prince with God and the father of a great nation. And this truth is Christian Science. As it is understood and acknowledged to-day it destroys in human experience the suggestions of evil, manifest in beliefs of fear, sin, suffering, limitation, and death, and brings to mankind the freedom, peace, and health of knowing that "now are we the sons of God."

Regeneration

G. HAMILTON BERRY

WHEN Nicodemus came to Jesus by night to learn about the new teaching which was causing the people of Galilee astonishment, it is recorded that he marveled and could not grasp the fact of the imperative need for regeneration. Now Nicodemus was an educated man, albeit along the Pharisaic lines of material thinking, and he had evidently been stirred by the healing work done by our Master, for he said, "Rabbi, we know that thou art a teacher come from God: for no man can do these miracles that thou doest, except God be with him." Nevertheless, when Jesus declared the spiritual nature of the real man and the necessity of be-

.

•

ing born again, that is, of waking up to this fact, it was more than he could accept.

Similarly to-day many inquirers turn to Christian Science to find out more about this practical religion that proves its words by its works, and at first find it hard to understand the fact that "the flesh profiteth nothing." Christian Science is based entirely on the spiritual meaning of the Bible, and teaches that "the flesh" and "the carnal mind," or, as Mrs. Eddy defines it, "mortal mind," are all one and the same, namely, an error of statement or mere counterfeit of the divine Mind and its idea, spiritual man, and that this error of belief has to be obliterated by knowing the truth about Mind and its idea, perfect and eternal. Paul says: "For to be carnally minded is death; but to be spiritually minded is ·life and peace. Because the carnal mind is enmity against God: for it is not subject to the law of God, neither indeed can be." Nevertheless, for centuries mankind have been adulterating and obscuring the teachings of Jesus the Christ in the vain attempt to combine Spirit and its opposite, matter, and then have been faced with the need for regenerating this obvious failure of a man. It was not until the discovery of Christian Science by Mary Baker Eddy, in 1866, that the futility of this proceeding was shown and proved, and a logical, demonstrable explanation of Christianity was given to the world in a form suitable to this present age.

The carnal mind does not take kindly to the teachings of Christian Science, for it sees in this religion its own ultimate extinction, and therefore clings to its old belief of the reality of a fallen man who needs regeneration. As of old its cry is, "Let us alone; what have we to do with thee, thou Jesus of Nazareth? art thou come to destroy us?" Now Christian Science makes it abundantly clear that regeneration is not the attempt to turn a bad mortal into a good one. Rather does it reveal the necessity for wakening to the fact that man in the image and likeness of God is spiritual and perfect right now, and needs no regeneration, and that the mortal, material, so-called man is a base counterfeit, to be laid off as fast as practicable. This laying off process is one that concerns each one of us vitally as a student of Christian Science, inasmuch as the solution of the world's problems depends upon the aggregate demonstrations of individuals. A man really is not alive until he wakes up to the fact that man lives as the spiritual reflection of Principle, and this waking up is being born again, or rather becoming conscious of the all-inclusiveness of Life, God. We read in Corinthians, "And so it is written, The first man Adam was a living soul; the last Adam was made a quickening spirit." That is to say, the "first man" is a belief of life in matter, which we all seemingly start with, but which must be quickened into the understanding that man first, last, and all the time is spiritual and not material.

From the moment of accepting this new way of looking at everything, one's living becomes governed by an absorbing desire to know more of God, divine Mind, and to reflect that Mind "which was also in Christ Jesus," in all the minutiæ of daily living and thinking. To do this involves the careful watching of all our thoughts, and the instant rejection of whatever does not bear the hallmark of truth. Purification of all thought and desire and the willingness to give up the erroneous worship of self, expressed in self-love, self-will, and self-gratification, open the way for progress in Christian Science, and show what can be achieved when we wake to our birthright of dominion, and are willing to subordinate all else to the demonstration of this great fact. As Mrs. Eddy says on page 242 of "Science and Health with Key to the Scriptures": "Denial of the claims of matter is a great step

towards the joys of Spirit, towards human freedom and the final triumph over the body. There is but one way to heaven, harmony, and Christ in divine Science shows us this way. It is to know no other reality—to have no other consciousness of life—than good, God and His reflection, and to rise superior to the so-called pain and pleasure of the senses."

In proportion to our faithfulness in putting this into practice are we being born again. The carnal mind does not yield in a day, and the struggle to triumph over the human self seems at times almost more than we can stand up to. Though error tries to suggest itself in every way, we can always gain new courage to press on, in remembering that we are not called upon to fight a losing battle. Hear these words of our great Exemplar, Jesus the Christ, "Be of good cheer; I have overcome the world;" and again, "Lo, I am with you alway, even unto the end of the world." As a matter of positive fact, we are fighting the only winning battle there is. Once it is seen, even in the smallest degree, that the allness of God is demonstrable, it is obvious that the victory is inevitable, and this glorious hope should indeed be a perpetual confidence, whilst striking terror into the hosts of darkness. Let all take courage from this inspiring statement in Science and Health (p. 568): "For victory over a single sin, we give thanks and magnify the Lord of Hosts. What shall we say of the mighty conquest over all sin? A louder song, sweeter than has ever before reached high heaven, now rises clearer and nearer to the great heart of Christ; for the accuser is not there, and Love sends forth her primal and everlasting strain. Self-abnegation, by which we lay down all for Truth, or Christ, in our warfare against error, is a rule in Christian Science. This rule clearly interprets God as divine Principle, -as Life, represented by the Father; as Truth, represented by the Son; as Love, represented by the Mother. Every mortal at some period, here or hereafter, must grapple with and overcome the mortal belief in a power opposed to God." It is surely the paramount duty of all who have named the name of Christian Science to press on by overcoming our belief in "the lust of the flesh, and the lust of the eyes, and the pride of life."

Growth

KATHRINE JONES

IN order to grow, we must steady our purpose. Desire for spiritual growth must be guarded and nurtured until it loses all vacillation and is characterized by steadiness and reliability. So long as there is a motive not in accord with Christ, Truth, we cannot say that our desires are wholly pure, or that our purpose is wholly one. It may not seem an easy thing to have one's purpose always in line with the highest. One's intention can, however, be trained and corrected and purified and loved, until it begins instinctively to unite itself with good. After a certain stage of development is reached, it is not so much the avowedly evil influences that one must guard against as it is one's absorption in material things generally. A home, a business, a profession, a person, are normal interests in human life, in so far as they are given only their rightful proportion of attention, but the spiritual worker must be ever alert to keep his daily activities and interests alive to his main purpose, that of understanding God.

A simple aid to growth is to live in the present. We seem to be breathlessly pushing on to a future time that never comes, with our gaze fixed so far ahead that we fail to see the opportunities of to-day. We may say to ourselves, "Nothing important will happen to-day." But how do we know but that it is on this day that we shall specially need to pray to

3

21 62

.

Ċ.

:

17 - 17 - 17 - 17

be delivered from temptation, or but that it is on this day that a special blessing will unfold to us? If we can realize that to-day is just as important as any in our lives, that divine Love is even now unfolding His loving plan for us, we can begin at once to realize the heavenly peace and joy we have heretofore considered should be ours only in some elusive future time. Mrs. Eddy writes in Science and Health (Pref., p. vii), "To those leaning on the sustaining infinite, to-day is big with blessings."

To have a wholly right idea of the present we must learn to think metaphysically of the past also. In order to be perfectly free we must learn that whatever illness we may have been healed of was always false belief, and had no more divine cause at the time when we thought we had it than it has now. To illustrate: Suppose that at one time a person suffered from a fear of a specter, and that now the apparition troubles him no more. Well, if he still thinks it was ever real he is liable to have that specter bother him again, but if he realizes that it was always wholly unreal, even when the fear and suffering seemed most intense, he cannot possibly suffer from it again. The past is healed in regard to it, and he shows that he is healed by rejoicing in the light and by no longer insisting on the terrible nature of the specter. He begins to see that growth in Christian Science involves the understanding of the spiritual man's unbroken, continuous, absolute perfection.

We are apt to think of a character being built up in the way a building is, one thing added to another until something solid and imposing appears. But this is not the way of Christian Science. The human mind, after sufficient purging, recognizes that the only helpful thing it can do is to disappear. It is at this point that we become meek, and ready, therefore, in some measure, to receive holy understanding. Growth is then seen to be no humanly planned process, but a deep penetration of the infinity of God and the divinity of man. "This Science of God and man," says Mrs. Eddy in "Unity of Good" (p. 52), "is the Holy Ghost, which reveals and sustains the unbroken and eternal harmony of both God and the universe. It is the kingdom of heaven, the everpresent reign of harmony, already with us."

Declaring the Truth

HELEN E. BRIGGS

THE study of Christian Science adds to the store of each of its students a clarified knowledge of the truth which heals, and renews his courage to make a better fight to gain dominion over all evil. To have dominion is not to be in subjection to the errors which constantly tempt man. Beginning on page 517 of "Science and Health with Key to the Scriptures" by Mary Baker Eddy we read: "Man is not made to till the soil. His birthright is dominion, not subjection. He is lord of the belief in earth and heaven,-himself subordinate alone to his Maker." This truth is provable and is being understood and demonstrated by all who are adhering to and living in accord with Principle. Through its study a man finds God to be infinite Life, Mind, substance, intelligence; also, learning that good cannot be gained through the physical senses, one turns from matter to Spirit because he finds matter changing, not dependable, and temporal, while Spirit he finds to be substance, consequently eternal, immortal, and divine.

The law of Mind is unchanging, and when applied properly to any problem brings about healing and harmony. "If God had instituted material laws to govern man, disobedience to which would have made man ill, Jesus would not

have disregarded those laws by healing in direct opposition to them and in defiance of all material conditions" (Science and Health, p. 277). Through fear man limits himself continually, believing in some unknown power apart from God which might interfere or disturb the trend of his purpose and living. This fear or worry and its accompanying confusion seem to induce a mesmeric condition which depresses and depletes one's energy and interest, and consequently is a hindrance to his progress. By replacing these discordant beliefs with truth and harmony, which are indestructible and complete, one finds that the way opens for advancement and accomplishment, which is having dominion.

To be wholly satisfied with any human condition is not an indication of progress or working out our problems according to our highest understanding of Christian Science, for progress is right thinking expressed, and whatever seems to be our present condition, be it ever so pleasant to our sense, we find that with the understanding gained in Christian Science we are forced to relinquish material beliefs and go higher. True living is spiritual, and instead of looking to matter for the way out of troubles, if one looks to God, Spirit, he proves every supposed law of matter useless and powerless to disturb his harmony, for harmony is a quality of Mind, while inharmony is disorder and cannot invade his consciousness. God's way is always adequate to meet the needs of mankind, but one in ignorance of the truth of being struggles on, believing that living, at its best, must be a burden, instead of knowing that right now man is spiritual and perfect, and that the kingdom of heaven is here. In making this truth ours we cease to struggle and are at peace. With our progress we also find that much is required of us, for in Science and Health (p. 450) Mrs. Eddy says, "The Christian Scientist has enlisted to lessen evil, disease, and death; and he will overcome them by understanding their nothingness and the allness of God, or good."

Human theories, opinions, and beliefs, no matter how advanced they claim to be, do not promote spiritual progress. By constantly turning away from material beliefs and looking to Truth for guidance one proves that the task of overcoming is easy. Since Truth includes all good, it is by acquainting ourselves with Truth that we gain, or bring into our experience, all that is good. The knowledge of Truth heals us of the belief that man can be separated from God at any time. Paul said, "Neither death, nor life, nor angels, nor principalities, nor powers, nor things present, nor things to come, nor height, nor depth, nor any other creature, shall be able to separate us from the love of God." It matters not, then, in what predicament we may seem to find ourselves, the assurance of the truth of Paul's words must sustain and heal us. Every kind of thinking is externalized to us after its own kind; consequently we must be watchful and improve our thoughts so as to prove constructive activity, for we certainly reap the harvest of our thinking. When one willingly and confidently leaves all for God, who in His infinite intelligence governs all, he is saved many harassing experiences in his effort to demonstrate true dominion and life eternal.

In being receptive to the Christ, or word of Truth, a man is in harmony with God's law and naturally and without effort accepts the good which is already and always supplied. After really learning how to depend on Truth, which saves and regenerates, it would be impossible to turn again to material means for help; but with each temptation overcome we gain confidence and strength and accept the truth as found in Hebrews, "For the word of God is quick, and powerful, and sharper than any twoedged sword, piercing

77

even to the dividing asunder of soul and spirit, and of the joints and marrow, and is a discerner of the thoughts and intents of the heart."

It is always necessary to clothe our declaration of the truth with an illumined understanding of what the Christ is, in order to obtain the quick and powerful results spoken of by Paul; and this understanding is possible to all seekers of the truth. The question is often asked why students devote so much time to the study of Christian Science, and the answer is that after gaining a slight knowledge of Principle the seeker soon learns that without a higher understanding of Truth it would not be possible to have dominion over sin, disease, and death, the last enemy to be overcome. When the Sermon on the Mount is universally understood and practiced, then will men do unto others as they would be done by, and, following the Christ, will attain dominion, which is life eternal.

True Consecration

ELIZABETH MILLER HARDESTY

AND who then is willing to consecrate his service this day unto the Lord?" One of the perplexities which seem to present themselves to those striving to demonstrate the truth in connection with every problem, from the standpoint of Christian Science, is just how to be in this world but not of it. In other words, is it best to give up social life, club life, and active interest in public affairs? Can one do so without becoming narrow? Error seems to put forth many arguments against absolute consecration to God, but the simple fact is, that every minute taken from the proving of divine Science is a loss of time. Mrs. Eddy has made this plain again and again in her writings. On page 3 of "Science and Health with Key to the Scriptures" she writes, "The Divine Being must be reflected by man,-else man is not the image and likeness of the patient, tender, and true, the One 'altogether lovely;' but to understand God is the work of eternity, and demands absolute consecration of thought, energy, and desire."

Exactly to what extent the individual is capable of maintaining this consecration is his individual problem, and it is one he had best work out for himself, without any question of what is good or otherwise for his neighbor. What, then, is his true responsibility to his fellow man? His example is most helpful; his practical demonstration of the wonderful power of Truth in bringing harmony and happiness into his own life is more convincing than all else. The one important thing in all the world is for him to know and do God's will, and thus be in accord with Him, living close to Principle and obeying the Master's command, "Let your light so shine before men, that they may see your good works, and glorify your Father which is in heaven." Those ready for the great blessings which the understanding of Christian Science brings with it will be attracted by this shining light. There is always an assurance of the Father's loving guidance. He will make plain the pathway, so there is no necessity for being found anywhere where a blessing cannot be given or one received. Consequently, to be found where one is not in a position to "Stand porter at the door of thought" (Science and Health, p. 392) is simply to delay one's progress, and as such, to become obedient not to law but to the claim of procrastination, which, as Young so truly said, "is the thief of time."

To those whose pleasures are in matter, not understanding the real or absolute, the pathway of a Christian Scientist is seemingly a narrow one, since it means the renunciation of those things that constitute mortal mind's whole life and happiness. But it is indeed the broadest life that can be lived, because it is the most helpful, in that it blesses all mankind and helps to bring the kingdom of heaven to suffering and sinning humanity. The life of a Christian Scientist is an unselfed life, and an unselfish life can never be a narrow one. In fact, it is only through loving patience and a heart purified by self-sacrifice and humility that the work is done, and salvation ensues.

And what of the one who makes these sacrifices? There is a glorious rejoicing in a new-found world. There are gained the real pleasures of Life eternal, the happiness, peace, joy, and contentment that come with the knowledge that man is a part of God's wise plan, sustained in his rightful place, enjoying the harmony of a life devoted to the Father's business. One's true individuality is gained as reflection, and a higher freedom comes with this understanding. "Christians rejoice in secret beauty and bounty, hidden from the world, but known to God" (Science and Health, p. 15). These are strange and wonderful times in which we are living, and one needs to use all the understanding one has, adding continually thereto, in order that the truth may unfold, the truth which is at once eternal, infinite, practical, and always available. Never was there a time when it was more important than now for all Christian Scientists to heed Mrs. Eddy's call to duty, as given on page 177 of "Miscellaneous Writings": "Never was there a more solemn and imperious call than God makes to us all, right here, for fervent devotion and an absolute consecration to the greatest and holiest of all causes;" and in the following paragraph she asks: "Will you give yourselves wholly and irrevocably to the great work of establishing the truth, the gospel, and the Science which are necessary to the salvation of the world from error, sin, disease, and death? Answer at once and practically, and answer aright!"

[Written for the Sentinel]

The Ever Present

LULA KNOWLES FOSS

TALK not of the past
With its hopes and its fears,
Its joys and its sorrow,—
There are no vanished years,
The good still remaineth;
Though strange it may seem,
That which we call past
Is only a dream.

Talk not of the future
And what you will do;
The present alone
Is given to you.
There is no to-morrow,
It is always to-day;
A mirage is the future
Which we see in our way.

Though it may lure us
With dreams bright and fair,
Long, long e'er we reach it,
'Twill vanish in air.
The present alone
Is the real and the true;
And all of the present
Is given to you.

The Servant

THERE is in the collection of prophecies known as the Book of Isaiah, a cycle sometimes described as the Messianic prophecies, and sometimes as "the Servant." These represent the picture, drawn by the writer, of the conditions which would surround the man who should act in such obedience to Principle as to have earned the title of the servant of Jehovah. The author saw clearly that the course of the servant would be marked with righteousness. He saw that he would be a man of extraordinary gentleness and yet of extraordinary strength. In his presence the wolf would dwell with the lamb, and the leopard lie down with the kid, nevertheless he would smite the earth with the rod of his mouth, and with the breath of his lips slay the wicked. But the prophet saw much further than this. realized the terrific moral fermentation which the presence of such a teacher would arouse, and the inevitable chemicalization which would dog his footsteps. Therefore he pictured him as despised and rejected, as a man of sorrows, and acquainted with grief. He was to bear the transgressions of the world, and to be wounded for those transgressions. That was the view taken by the writer, presumably in the third century before the Christian era, of the man who should engage in the contest of good with evil. It was a natural view to a man writing midst the surroundings of the eastern world of those days. But it was very far from being the whole truth.

Some three centuries later the servant walked in the flesh in Palestine, and the story of his ministry is recorded The prophet in his eastern home had in the Gospels. not had Jesus of Nazareth in his mind's eye when he was writing, but his knowledge of Principle had enabled him to know, with unfailing sagacity, exactly what would happen, given the conditions he pictured. What, in the somber surroundings of his time, he failed to realize was that the sorrows of righteousness were coupled with the joys of righteousness, and that whilst the sorrows were for the unredeemed neighbors of the servant, the joys were for himself and for those who, like himself, understood Principle. Christ Jesus, also, drew his picture of the servant, but it was not set forth with the same unrelieved depression as that of the earlier prophet. He saw the servant in the good shepherd as opposed to the hireling; he saw him in the wise virgins as opposed to the foolish; and he saw him in the good steward who multiplied his talents in contradistinction to the wicked and slothful steward who was satisfied with burying his. The wise virgins and the good steward gained the reward of their obedience to Principle. The first went in to the marriage feast, whilst of the second it was said, "Well done, thou good and faithful servant: thou hast been faithful over a few things, I will make thee ruler over many things: enter thou into the joy of thy lord."

Nobody ever realized all this more clearly than Mrs. Eddy. On page 117 of "Miscellaneous Writings" she says,

"I agree with Rev. Dr. Talmage, that 'there are wit, humor, and enduring vivacity among God's people." The outcome of well-doing is joy not sorrow, though in the struggle to do well there may be dark hours enough. Not that there is not a tremendous joy in overcoming. But real joy, spiritual and indestructible, comes only as the individual succeeds in demonstrating the nothingness of matter and the emptiness of the pleasures of the flesh. "The 'man of sorrows," Mrs. Eddy writes, on page 52 of Science and Health, "best understood the nothingness of material life and intelligence and the mighty actuality of all-inclusive God, good." It was the struggle away from every vestige of the flesh, with its accompanying realization of the hideous mockery of human appetites and pleasures, which constituted him the man of sorrows. He saw a world rushing upon its doom, in its passionate hates and fears, and rejecting what alone could heal and save it, and in the bitterness of the sight he cried out, "O Jerusalem, Jerusalem, thou that killest the prophets, and stonest them which are sent unto thee, how often would I have gathered thy children together, even as a hen gathereth her chickens under her wings, and ye would not!" But he knew, as Mrs. Eddy has told us, on page 298 of Science and Health, out of her experience gained from studying his career, that "When the real is attained, which is announced by Science, joy is no longer a trembler, nor is hope a cheat." Therefore was he able to proclaim so positively that the king would one day say to those who had served him truly, "Come, ye blessed of my Father, inherit the kingdom prepared for you from the foundation of the world."

The truth of the matter is that the man who is obedient to Principle never suffers from that obedience. Perplexed, disturbed humanity, always taking thought for the morrow, how by this means or by that means it may avert some disaster or attain some desired end, wonders why the man about whom the thunderbolts of envy, hatred, and malice are exploding all the time is not entirely overwhelmed. Such people cannot realize that even a slight understanding of the nothingness of material life and intelligence constitutes the protection spoken of by the psalmist, when he said, "A thousand shall fall at thy side, and ten thousand at thy right hand; but it shall not come nigh thee." It is that open yet terrific secret of Christian Science, the unreality of matter, the nothingness of human pleasures and passions, which constitutes the protection of every man in proportion to his understanding. It is the divine Mind that governs, and not matter, and there is no spot in the material universe which is not embraced in this divine Mind. Spirit, it is true, knows nothing of matter. But the inextinguishable fact remains that man is the image and likeness of God, whether a man believes himself to have lived in the Near East, in the generation of Isaiah, or to be living anywhere else on the globe to-day. Therefore an understanding of divine Mind must bring with it all the protection that any man knows, whether his lot be cast on the sands of the desert or in the crowded traffic of the capitals of the world.

The nearest thing humanly to a true metaphysical understanding is the multiplication table. The fact that twice two is four remains unalterable, whether on a rock in the tropics or on the ice packs of the poles. Therefore, no matter where a man may be, or what circumstances surround him, the opportunity to demonstrate Principle is always open to him, and in the measure of his power of demonstration he finds the measure of his knowledge of the truth. "Then said Jesus to those Jews which believed on

him, If ye continue in my word, then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free." In the exact ratio of a man's knowledge of Truth is his stature as a servant of Principle. And the circumstances, and the times, and the countries, do not exist where he cannot rise to the demonstration of his understanding.

FREDERICK DIXON.

How to Read

In the study of Christian Science it is especially wise to follow Bacon's advice: "Read not to contradict and confute, nor to believe and take for granted, nor to find talk and discourse, but to weigh and consider." If a student clings to his prejudices and preconceptions while he thinks he is investigating the subject, he will advance less rapidly than if he gives really intelligent attention to the truth presented. If he skims through Mrs. Eddy's works with little reasoning on his own part, he can experience at the best but a superficial sense of satisfaction. As Mrs. Eddy says on page 147 of Science and Health, "Although this volume contains the complete Science of Mind-healing, never believe that you can absorb the whole meaning of the Science by a simple perusal of this book. The book needs to be studied, and the demonstration of the rules of scientific healing will plant you firmly on the spiritual groundwork of Christian Science." Christian Science is no fad to be taken up just as a diversion from boredom or as an easy subject for light social conversation; to prove it in practice one must be thorough and consecrated in the study.

Yet true consecration in the reading of Christian Science literature is neither an intense nor a dull and plodding process. As the student progresses, he learns something of what the real animation of Life is, his reading becomes a vital part of his living in accord with the divine Life, and he finds ever new and interesting education in the very reasoning as to the metaphysical nature of God and spiritual man. By giving eager attention to the truth unfolded through Christian Science, one gains the keenest enjoyment there could possibly be, as well as the healing which he is seeking. The right kind of study is an active, not a passive, experience, in that it requires not only receptivity but energetic devotion of thought to the subject. Each one who turns to his reading with real spiritual energy of desire is blessed beyond measure.

Early in his new work on "Modern Democracies" Lord Bryce remarks that "in these days of ours reading has become a substitute for thinking," and a few paragraphs later he declares that "reading is merely a gate leading into the field of knowledge. Or we may call it an implement which the hand can use for evil, or for good, or leave unused." Words, sentences, paragraphs, or articles that we read in the literature of Christian Science must give impulse to right reasoning on our part in order that we may benefit by them. There is no special virtue in the perusal of articles just in the hope that one may unconsciously absorb from them some unknown balm. The really beneficial study is a thoroughly conscious activity which involves the full vim of our most intelligent efforts. Whenever healing comes about through the presentation of Christian Science in effective language, it is because of just so much fresh spiritual comprehension on the part of the seeker. The whole purpose of reading is that one may comprehend and make use of essential meaning.

If a statement seems incorrect or unclear to the student of Christian Science, it is always possible that further consideration of it, in the light of his own understanding of Principle, will reveal more of the divine Mind's infinite meaning to him. It is what the divine Mind knows and means, not what any human person thinks he intends to say, that counts. Every word, rightly used, must be a term for either true cause or true effect. If it does not seem to signify either of these, it denotes only the nothingness of mortal mind and its beliefs which must be replaced with Truth manifest. Hence it is the privilege of the student to know the truth for himself in connection with whatever presents itself to his attention. As he does so, he will not only get more out of his reading but will aid in the general proving of the fact that divine intelligence is all that can really express itself.

Both writer and reader must simply bring their offerings together to God, the divine Mind, and rely upon infinite intelligence for unlimited comprehension. The writer offers his intelligent activity, what he has been working out in study and practice, and the reader must do likewise, even though in a seemingly different way. The reader's own study of Christian Science is cumulative, since all that he has truly understood hitherto shows him more of the genuine unfoldment now. Knowing this, he is, in his very reading, turning to God with his humble offering of understanding, just as actually as the writer. It is this turning together to the divine Mind for inspiration that brings about the healing through the Christian Science literature. Reading and writing on the basis of Principle must, therefore, be cooperative, in that man's understanding cooperates with God's wisdom.

On page 238 of "The First Church of Christ, Scientist, and Miscellany," Mrs. Eddy says: "Rightly to read and to practise the Scriptures, their spiritual sense must be discerned, understood, and demonstrated. God being Spirit, His language and meaning are wholly spiritual. Uninspired knowledge of the translations of the Scriptures has imparted little power to practise the Word. Hence the revelation, discovery, and presentation of Christian Science-the Christ Science, or 'new tongue' of which St. Mark prophesied-became requisite in the divine order." On the following page she continues: "The Science of the Scriptures coexists with God; and 'Science and Health with Key to the Scriptures' relegates Christianity to its primitive proof, wherein reason, revelation, the divine Principle, rules, and practice of Christianity acquaint the student with God." The most beneficial reading, or study, is that which depends most on divine inspiration, on the reasoning in accord with Principle which has as its basis the fact that infinite Mind with its infinite manifestation is the only present reality. One is learning how to read in proportion as he is understanding and applying this fundamental truth.

GUSTAVUS S. PAINE.

[Written for the Sentinel]

"Now are we the sons of God"

EVA HAMMOND CHURCHILL

THE power of God is all we know and all we need to know.

This fervent prayer meets every want and seeming call of woe.

And why? Because God's perfect plan

Includes the universe and man.

'Tis God who constitutes man's consciousness of right, And we, reflecting, show forth in the world this wondrous light. Immortal Life and Love are here, Resistless power—God everywhere.

Testimonies of Healing

It has long been my desire to express appreciation for what Christian Science has done to clear the clouds of doubt from my thought. To know God as Love is one of the richest blessings gained through the study of the textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy. The physical healings have been many. Goiter and sick headache, from which I had suffered for several years, vanished into their native nothingness, each in one treatment, while severe hemorrhages were overcome through the study of Science and Health alone. A great sense of fear has dissolved through the understanding of God's ever presence, and a sense of limitation has been overcome since we know that God is the source of all supply.

The Bible is an open book now, whereas it was sealed before I had the "Key to the Scriptures." I find it a torch to light each step as I study the promises therein given, and can realize the truth of the words of Paul, "God is faithful, who will not suffer you to be tempted above that ye are able; but will with the temptation also make a way to escape, that ve may be able to bear it."

The Christian Science literature has been our "manna" in localities where no church or society was found. I thank God for the helpful testimonies, and with loving gratitude for our dear Leader, Mrs. Eddy, who has made plain the way to heaven here and now, through Christ Jesus the Wayshower, I pray that I may give freely the cup of cold water in his name, even as I have received.

(Mrs.) GERTRUDE LYTTLE, Elgin, Oregon.

Christian Science has been my only physician for sixteen years. I have been healed of rheumatism, sick headaches, and many other ills. One healing, that of pneumonia, was particularly helpful to me. I found that I was not overcoming it and asked for help from a Christian Science practitioner, who lovingly enabled me to see it as a mental condition. As I examined my thought I found I was not thinking of a member of the family as kindly as I should, and being a student of Christian Science I knew that I was accountable for my thoughts, and wrong thoughts had resulted in the physical trouble. In a few days I found myself happy and perfectly well, and was grateful for the lesson learned and for the assurance that this healing has given to me that, as Mrs. Eddy says on page 66 of Science and Health, "Trials are proofs of God's care."-(Mrs.) EMMA BROWN SMITH,

Bridgeport, Connecticut.

When a very young girl, I joined a denominational church, in the hope that I would find there a religion that would teach me how to live aright, and for many years I took part in the activities of this church, without questioning its teachings. There came a time, however, when I did ask questions, which were not answered. I closed my Bible for years and wandered in the wilderness of doubt, looking into various isms, but finding nothing that satisfied. During this period Christian Science was brought to my notice more than once, but for various reasons I failed to investigate it. until a near relative was instantaneously healed, through Christian Science, of gallstones, when she seemed to be very near death. This healing caused me to put aside my prejudices and to begin the study of the textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy. From that day, fifteen years ago, I have continued to study and apply the teachings of Christian Science. Step by step

I have been lifted out of limitations of various kinds, and have been healed of dyspepsia, insomnia, bowel trouble, and many minor ailments. I have learned that my daily supply of good comes from God, and that it is not limited.

I am most grateful, however, for the understanding of God, which Christian Science gives to us, and for an explanation of the relation of Jesus to the Christ, which I had never understood, until studying the textbook. In gratitude for all the blessings which have come to me and to mine through Christian Science, I give this testimony.

(Mrs.) ALICE WARD ASHBROOK, Lanare, California.

Christian Science is the most beautiful thing that has ever come into my life and I am deeply grateful to Mrs. Eddy for that wonderful commentary on the Bible, "Science and Health with Key to the Scriptures," a commentary which is always bringing into a clearer light the eternal truths of the Bible, and the scientific teachings that Jesus

himself established. Jesus said, "Ye shall know the truth, and the truth shall make you free." He surely meant freedom not only from the bondage of sin but from the bondage of sickness also, and this has been proved to me over and

over again.

Five years ago our little son was run over by a motor car and very severely injured. He was picked up and carried to the nearest doctor, who shook his head in despair, called an ambulance, and sent him to a hospital. I had been studying Christian Science for only about three months when I experienced this severe test of my slight understanding. The injury was said to be internal and after an explorative operation the doctors said the bile duct was torn to ribbons and severed from the bowel. After some days I was told my son could not live twelve hours, and as a last resort the surgeons decided to attempt a more severe operation. But through the application of the truth as taught by Mrs. Eddy, and with the help of a faithful and loving practitioner, we were sustained, directed, and led through the tempest into still waters. A sudden improvement took place, the serious symptoms disappeared, the operation was abandoned, and the doctors said spontaneous healing had taken place within the last twenty-four hours. From this time onward the little boy made sure progress until he was restored to perfect health. At the end of thirteen weeks we took him away from the hospital. Three months later he was on his feet and running about, a year later he learned to swim, and two years later went away to a boarding school, as normal as any other boy, and played football and cricket with the rest. At the present time he is as healthy and rosy-faced as any one could wish.

I am deeply grateful to Christian Science for this beautiful healing, for I feel sure that without it our little boy would not be with us to-day. My sorrow was indeed turned into joy .- (Mrs.) MARIE HAWKIN, London, England.

I give my testimony with gratitude to God for His unfailing love and protection through all our human experiences. I began to read and study Christian Science about fourteen years ago, not because I felt the need of physical healing, but because I wanted a practical religion, a religion that would help one to be good. I married soon afterwards and came out to Egypt. My first child was stillborn and my sufferings were very great. My husband sent a cable to England asking for Christian Science treatment for me, and, but for that, I believe I should have passed away. As it was, I felt that Science had failed me, and I returned to England for an operation.

Later I learned that Christian Science is the true knowledge of God and can never fail, and that what seemed to be failure was simply my own lack of understanding. I went to a nursing home and underwent the operation, which proved an utter failure. I was in despair. My mother, a student of Christian Science, was with me at the time, and feeling in need of help and comfort, she went into the Christian Science reading room close by, where she met a lady who returned with her to see me. I told my mother that Christian Science had failed me and that I did not want to hear any more of it. This loving visitor so renewed my hope, however, that before she left I asked her to help me. In about a month I was completely healed and returned to Egypt.

My last two children were born without medical assistance and with practically no suffering whatever, and I was up and about within a few days. I have three children, and they are fine, healthy boys. We have been able to overcome all climatic conditions by remembering that, in the words of

one of our hymns (No. 81):-

In atmosphere of love divine, We live, and move, and breathe.

In all these years we have not had a doctor and have not touched a drop of medicine. Divine Love has met our every need. We have found the truth available during sea voyages, in finding a house to live in, and in sickness. We have been able to overcome dysentery, whooping cough, influenza, typhoid fever, and many other ailments, sometimes through our own understanding of the truth and sometimes through absent treatment. There is a great deal more that I could tell, but all I will say now is that I do not know how I could live without Christian Science, and my heart goes out in love and gratitude to our dear Leader, Mrs. Eddy, for her noble life work. I must not close without also expressing sincere gratitude for all of our periodicals. Whatever one's need of the moment, there is always something that answers that need, in the current Journal, Sentinel, or Monitor. "By their fruits ye shall know them."

(Mrs.) KATE I. MACLAREN, Sidi Gaber, Egypt.

Soon after I began to study Christian Science, treatment was recommended for a sprained leg, sustained while bowling at cricket. This difficulty recurred every summer, and had become so bad that I could bowl for only a short time. I had Christian Science treatment and the sprain absolutely disappeared, and many times since I have bowled for an hour and a half at a time without any ill effects. I was also healed of a badly sprained abdominal muscle, sustained while playing in a lawn tennis tournament a year or two later. I wrote to a practitioner for help, which was kindly given, and I was told that I could continue to play, but to remember that my strength came from God and not from muscles, and to have no fear. While I was playing tennis the following day the sprain passed away, and has not troubled me since. I am very grateful for these healings, and I should like to tell in contrast to the above how, years before I heard of Christian Science, I had a riding sprain and went to a doctor for treatment. He asked me how long I had had the sprain, and when I told him two years he replied that I had left it too long and that he could do nothing for me, except to recommend massage treatment, which I had, without receiving benefit therefrom.

Another beautiful healing I should like to tell of was a quick recovery from whooping cough. I was away on military service at the time and one night, never having whooped before, I was awakened by a very violent spasm, which lasted so long and left me so exhausted that a brother officer

who came to help me thought I had passed on; I too thought I was going, but I clung to the truth that God is my Life. I was sent to a hospital, but I wired for Christian Science help, and I felt that if only I could get home to the Christian Science atmosphere there I should soon recover. I was in hospital five days only, during which time I never whooped once, and the doctor, though I told him that I thought I had whooping cough, discharged me from the hospital with a recommendation for a week's light duty, to enable me to get leave to go home for a week. I had three or four spasms of whooping at home, my wife helping me all the time so that each spasm was less violent, and at the end of the week I returned to duty, and I am happy to say that I did not whoop again.

There are many blessings I could write about, but one in particular stands out, as the healing was instantaneous; I had a touch of influenza, and when I went to bed that night had a high fever and became delirious. My wife at once got Science and Health, and after a short treatment the fever left. I became perfectly cool and well, and fell peacefully asleep. Christian Science has been our rock these eleven years. It is not easy to express the comfort and peace derived from the knowledge that whatever discord may seem to be manifested, divine Love will meet the need, and the need has been met time and again. My wife and boys have been healed of severe illnesses, supply has been demonstrated, and my small knowledge of the truth is an ever present help in business.

I am very grateful to Mrs. Eddy for explaining to us the wonderful truths taught by Christ Jesus, also for the periodicals. I am grateful to all those who have helped us to a better knowledge of Principle.—John C. MacLaren.

4

I had been a daily Bible student for years, and taught a large class of girls in a denominational Sunday school, but it was not until I found "Science and Health with Key to the Scriptures" by Mary Baker Eddy, that I received daily bread for daily needs. I was ever a seeker for Truth and when endeavoring to explain to my Sunday school class the so-called miracles of Christ Jesus and his healing work, I was puzzled and unable to understand why no one was able to do the same works and even "greater works" which Jesus so plainly stated that those who believed on him should do.

For ten years I had been a constant sufferer from headache and nervous exhaustion, which at times seemed unendurable. Finally I spent several hours in bed each day, and was planning, when my daughter graduated from college, to spend all of the time in bed, as it was such a painful effort for me to hold my head up unsupported. It was at this point, when doctors could offer no relief, that I borrowed from a friend a copy of Science and Health and read it, together with my Bible, while I lay in bed for two weeks. I compared all familiar quotations with the Bible. At the end of two weeks, when I had finished reading Science and Health I realized that I was well. As Paul writes, I was transformed by the renewing of my mind. This was in the spring, and during the summer I gained twenty pounds in weight. The healing was complete and permanent and I am indeed a new creature. "Old things are passed away; behold, all things are become new."

I wonder if we realize the help there is, for every time of need, in the daily study of the Christian Science Bible Lessons. I am sure that I never fully realized this until one day when my need was very great. It was the day of an explosion at a munition plant, the month previous to the

signing of the armistice. During the evening, we had been hearing these explosions and much fear was manifested as to the cause. At night when awakened by the noise of repeated explosions I kept repeating the following verses from the ninety-first psalm: "He that dwelleth in the secret place of the most High shall abide under the shadow of the Almighty." "Thou shalt not be afraid for the terror by night; nor for the arrow that flieth by day." "There shall no evil befall thee, neither shall any plague come nigh thy dwelling. For he shall give his angels charge over thee, to keep thee in all thy ways." Mrs. Eddy says, on page 298 of Science and Health, "Angels are pure thoughts from God, winged with Truth and Love, no matter what their individualism may be," and on page 567 she says: "These angels deliver us from the depths. Truth and Love come nearer in the hour of woe, when strong faith or spiritual strength wrestles and prevails through the understanding of God."

In the morning, things having apparently quieted for the time, I decided to go on an errand to a neighboring city. When I returned home at noon the people were out in the yards or streets, and, although the day was cool, the doors and windows of the houses were opened. When I ran into the house my mother met me and said that a herald had passed through the streets warning all to leave their houses, as a fearful explosion would take place at one o'clock. It was stated that the explosions up to this had been one day's. output, but when the fire reached the great arsenal on the hill, thirty days' output would explode at once, and houses and buildings would fall in the towns in the vicinity, and many miles away. Upon hearing this, I was filled with fear and trembled so that I could scarcely walk. Then like a flash of light came the words from the ninety-first psalm which had helped me the night before. I went upstairs to my room, closed the door and window, and tried to think what to do. I must pray, I must know God's presence, but how could I quickly realize His presence? Then I thought of our daily help, the Christian Science Bible Lesson. I remember that I had that week spent much time on the Lesson, until I thought all help possible had been received. The subject was "Unreality," and I went over the entire Lesson again, and I seemed to see as never before the unreality of evil, of mortal man, of sin, disease, and death,—and the great reality of God, good, omnipotent and omnipresent. "He shall deliver thee in six troubles: yea, in seven there shall no evil touch thee." These words from Job in the responsive reading were comforting. When I had finished my study it was past one o'clock, and nothing further happened in the way of explosions. Later, word was given out that the wind changed, and a great calamity was thereby averted. But I knew that the power of God had been demonstrated, and that the omnipresence of divine Mind had been proved. "The Lord is nigh unto all them that call upon him, to all that call upon him in truth."—(Mrs.) ADA WHITING HARING, Elizabeth, New Jersey.

"To those leaning on the sustaining infinite, to-day is big with blessings" (Science and Health, Pref., p. vii). Fourteen years ago, when I was a great sufferer from rheumatism, "Science and Health with Key to the Scriptures" by Mary Baker Eddy was brought into my life, and now with a heart full of gratitude I am sending this testimony of what Christian Science has done for me. I am grateful for the illumination that has been thrown upon the Bible and for a fuller understanding of it; for the spiritual uplift; a brighter outlook on life; the realization that God is Life, and that health is a spiritual fact, for in Him "we live, and

move, and have our being;" for the knowledge of the truth that makes us free; and that, as Mrs. Eddy says in Science and Health (p. 228), "There is no power apart from God."

Christian Science has brought me many healings and blessings. Sciatica, lumbago, influenza, bronchitis, indigestion, croup, attacks of sore throat, heart trouble, and many other discordant conditions have yielded to divine Truth. Some of the healings were instantaneous, others slow, but as I accept the truth in obedience to the dear Master's teaching I am fully realizing that my demonstrations are with power. When we are willing to put aside our false beliefs and in the spirit of a little child trust to the unlimited power of Love, the day is indeed "big with blessings." No words can express my gratitude to our heavenly Father and to our beloved Leader for revealing the Christ, Truth, which brings to mankind the "peace of God, which passeth all understanding."

(Mrs.) L. C. HEDGES, Sydney, Australia.

About a year and a half ago I had an opportunity to experience the healing power of Christian Science. Upon awaking one morning I noticed that one of my cheeks was considerably swollen, resulting from an abscessed tooth. Instead of meeting the condition mentally, however, I took

Instead of meeting the condition mentally, however, I took notice of the increasing swelling on every possible occasion. During the following three days the pain became so severe that I requested help from a practitioner, which was kindly given. On the same evening the error vanished into its native nothingness. This experience has again proved to me how necessary it is to guard one's thoughts constantly and to destroy the first phases of error which may appear.

I am sincerely thankful to God that He led me to Christian Science; and I am grateful to our dear Leader, Mrs. Eddy, for having revealed this practical religion to us.—ROBERT SALZMANN, Zürich, Switzerland.

Life did not mean much to me before I found Christian Science, some fourteen years ago, but all this was changed when I began its study about one month after arriving in California, having left the eastern part of the United States to go to relatives who are Christian Scientists, and because it was thought a change of climate would be beneficial. This latter was soon proved not true, and I was induced to try Christian Science. A severe cough disappeared, to the astonishment of a lady in the house who was not a Christian Scientist. I was facing the necessity of putting on glasses, but through the understanding that sight is spiritual this was overcome.

Christian Science enabled me, an exceedingly timid, untrained woman, to enter the business world at an age when most people would not attempt it. My family had thought that I would always be dependent on some of them. I have supported myself for a number of years, and now that I am no longer in the business world my needs are met through pleasanter work. While I am grateful for all these blessings and to all who have helped me over the seemingly rough places I am most grateful for the spiritual awakening. I am grateful for the pure, unselfish life of the noble woman who could give this truth to us, her children in understanding, and that she established The Mother Church, its branches and all their activities, with the understanding that God is omnipotence, omnipresence, omniscience, and left us free to work out our problems under divine guidance.

(Miss) Adaline Monroe, Los Angeles, California.

Signs of the Times

["The Unit of Measure"—The Christian Science Monitor, Boston, U.S.A., April 5, 1921]

Eternity is the unit of measure of man's age. Nothing less will avail to determine the range of his existence, and since Mind unfolds eternity, unlimited Mind is the measure of man. A year, a decade, threescore and ten, and all the rest of earth's chosen rods for judging man's being must eventually be laid aside forever. These rods, which have a beginning in birth and an end in death, are impositions whose claims must dissolve before reality.

There is a simple Bible passage which is an inspiration to mankind, a passage in which Caleb tells Joshua: "Forty years old was I when Moses the servant of the Lord sent me from Kadesh-barnea to espy out the land. . . . I wholly followed the Lord my God. . . . and now, lo, I am this day fourscore and five years old. As yet I am as strong this day as I was in the day that Moses sent me: as my strength was then, even so is my strength now, for war, both to go out, and to come in." Men who follow the "Lord our God" in this time have Mind and its idea as all, and they have nothing else. The reward of having this ideal ever before them is instant and eternal: the life that knows no end, the strength that never ebbs, and the wholeness that is everything real.

The world revels in statistics. It compiles mortality tables, age tables, and all the rest of the paraphernalia of the untrue mortal mind. It requires to know the age of men and women for even the most trivial purposes, and it sometimes requires an act of a legislature or even a change in the constitution to abolish the rule. Having learned what it calls a man's age it immediately sets in operation the full force of the carnal mind's laws and conclusions arising in consequence of the figures it has learned. That is, it adjudges a man of this age must be and must accomplish so and so, and of that age so and so. There are many individuals who engage in this more than useless occupation who ought to know better. Mrs. Eddy has not minced matters in discussing this subject. She says, "Never record ages" (Science and Health, p. 246). Every person who discerns and profits by the spiritual understanding with which that and similar injunctions in Science and Health were written will reap its benefits. Those benefits are much greater than the average individual would reckon, for to the "natural man" it is often a matter of absurdity that any one should care whether or not ages are stated and discussed. In fact it seems to him the most natural thing in the world that they should be stated. This attitude reveals the deep ignorance of such an individual as to the hidden man-made laws that are set going in the human discussion of so-called time and age. It is important that man's real status should be recognized: that he has everlasting life and cannot retrograde from perfection, because he reflects eternal Mind. The world has need of the release that comes from such knowledge and is, in fact, enjoying some of the fruits of that release even now, though this is a matter not widely recognized as yet. Mary Baker Eddy writes (Miscellaneous Writings, p. 185): "The spiritualization of our sense of man opens the gates of paradise that the so-called material senses would close, and reveals man infinitely blessed, upright, pure, and free; having no need of statistics by which to learn his origin and age, or to measure his manhood, or to know how much of a man he ever has been: for, 'as many as received him, to them gave he power to become the sons of God."

True man is hoary with wisdom and fresh with youth.

He is at once young and old, in the sense of being all things good, and he is continuously active in the use of faculties and capacities seasoned with the experience of eternity and fresh with unblighted newness. The woeful workings of human laws and customs which require men and women to cease work at a certain age, and to retire from positions in business, in government, and other departments of life, have never touched the real man. He is a truly glorious idea before whom every human law has forever been unknown because there has in reality never been anything save Mind and the idea of Mind. "The measurement of life by solar years," says Mrs. Eddy, "robs youth and gives ugliness to age. The radiant sun of virtue and truth coexists with being. Manhood is its eternal noon, undimmed by a declining sun" (Science and Health, p. 246). So it is that man has no dawns and sunsets to measure the years of his life, for he lives on, intact, and his life is the "same yesterday, and to day and for ever"-wise, full of vigor, and holy. His is the manhood that God has given, a manhood that no one and no circumstance can take away. As men come to the comprehension of this, each one will be able to say with Caleb, "I am as strong this day as I was," and, "As my strength was then, even so is my strength now." Principle and Principle alone is the power that upholds and sustains being.

The helplessness of unreal mortal mind is almost ludicrous when it is attempting to judge without the aid of statistics as to age, education, personal appearance, and so forth. It is most amusing when faced with anonymity in authorship. When a man or woman has produced a composition, a book, or an essay, unsigned or under an assumed name, speculation is let loose as to what, who, and how it is, and all about it. Instances of this are many and the behavior of the world in such a case betrays how useless even in human affairs are personal statistics, for the flights of misjudgment and guesswork indulged in in these instances of anonymity disclose the inborn unsoundness of the mortal mind. Anonymity fools mortal mind thoroughly. Its treasured methods of judgment are balked. Any one can recall discussions as to the identity of unavowed writers.

All this, of course, simply uncovers the pretension of mortal mind in asserting itself able really to exercise any judgment at all. It emphasizes the fact that this mind bases its judgment on the evidence of the five physical senses. These senses are mythical counterfeits of the true discernment possessed by Mind and enjoyed by man who reflects that Mind. Mind and its expression is All-in-all. A hint of this, useful to mortals, is found in the fact that what really mattered in the writings of the anonymous authors was the quality of thought expressed and not the poor mortal who seemed to bring it forth. It hints that, basically, thought or activity is neither masculine, feminine, young, nor old, exclusively, but is all of these and more, and has nothing whatever to do with years, education, or mortal traits of any kind. It is the thought that is important and not the mortal whose name is attached to it. And in truth all there really is, is Mind and its expression, or thought.

["A Decline in Disease"-From The Times, London, England]

Recently published figures show that a steady decline is taking place in many of the diseases which we have been accustomed to regard as dangerous enemies. The decline is apparent not only in the case incidence, but in the case mortality. The afflictions are less deadly than they were even a decade ago, and almost every year there is a further declension of virulence. One of the most striking instances

is afforded by typhoid fever, an infection with an evil reputation. Another is tuberculosis, the apparent diminution of which in all civilized countries is engaging close attention, because diminution is accompanied by a lowered power of destruction. Many explanations and theories have been formulated to explain the facts; unfortunately none of them seem to be quite satisfactory, for this natural weakening of tuberculosis is taking place at a moment when considerable misgiving is being experienced over the efficacy of the campaigns waged against it. Some degree of mystery, too, surrounds the dramatic fall during the last few years in infant mortality, which is almost less by one half than it was in the eighties. We may, if we like, attribute our good fortune to sanitation, food inspection, and educational measures; and these agencies have no doubt played an important part; but, after due credit has been allowed to each, there remains some further factor, the nature of which is not yet clearly apprehended. Can it be a natural immunity, the product of an evolutionary struggle with infection? Attractive as such an idea may be, it leaves unexplained the central fact that the change for the better is-comparatively speaking-quite recent. The diseases, on the other hand, have vexed the human race for many centuries.

[From The New York Herald]

There might be nothing more unusual in a doctor advocating prayer than in any man of any calling. There is something unusual, however, in putting prayer on a scientific basis as a therapeutic agent. The proposition is that prayer has, or at any rate may have, a physiological effect upon the body as well as an influence upon the mind. . . . It is therefore a means at the disposal of the hygienist for preserving and restoring health.

In a book newly issued from the press, a doctor takes the ground that "the unquestionable trend of modern thought is monistic."... Without venturing into the controversial field of direct response to prayer, it is neither unscientific nor irreligious to accept at least as a basis for consideration the proposition of the present writer, "that prayer is helpful not so much as to the granting of specific personal requests; not so much in that the inherently benignant laws of nature could be disturbed in their working in behalf of any individual suppliant; but that prayer is helpful in bringing him who prays into comfortable, salutary, and restful relation with the First Cause." On this theory, training in the habit of prayer in childhood and its pursuit through life are urged as a duty ... upon the pulpit and the clinic alike.

[From an Editorial in San Jose (California) Mercury Herald]

The truths of the New Testament-all the eternal truths of God-must remain the same "yesterday, and to day, and for ever," but man's understanding and interpretation of them must constantly change with his education and development and the onward march of human research and achievement. Any religious organization of this day, Christian or otherwise, which persistently shuts its eyes to new truth and insists upon the acceptance by its members of hoary superstitions, creeds, and dogmas not in harmony with the new truth will as certainly be swept away by the onward sweep of human progress as were the sun worshipers of Egypt. All such must ultimately yield to other religious organizations that will recognize that the creator is constantly revealing Himself and His truth more and more clearly and perfectly just as surely as He has revealed Himself in Holy Writ, though in a different way.

Bible, of course, must not be changed, but new and more enlightened interpretations of it must be sought in order that the revelations of the Scriptures shall be understood in the light of to-day.

[From The Boston Herald]

The Rev. Dr. Howard N. Brown, pastor of King's Chapel, in his sermon yesterday morning declared that it is not enough for churches to be handsome in architecture and decoration, but they must also be places where the truth is spoken. "There has been a time-honored alliance of religion with art," he said, "which has too much persuaded a large part of the Christian world that it is quite enough to have our æsthetic sense gratified and cultivated in our houses of worship. It is high time now for a closer alliance of religion with the scientific spirit whose supreme passion is for a knowledge of truth. It must fare ill with the church in coming time unless it can feel its way to this alliance."

[From the Akhbar, a Native Paper, as Quoted by The Egyptian Gazette]

We were greatly pleased formerly when we saw the government directing its attention to fighting bad practices and disgraceful deeds which are against the commandments of the faith. People were beginning to follow its orders in many directions, and we began to entertain the hope that the army of evil would be defeated, and the bright light of the Sheri law would spread over Egypt. Then we read that the government itself will remove the restrictions already imposed upon wines. Every Egyptian who loves his country regrets this curious decision which tends to encourage many people of inferior classes to indulge in vanity and vice, and do all that disturbs the happiness of the public. Viewed from the social standpoint, wine is a thing that demolishes the structure of the progress of mankind, for it encourages men to commit adultery, murder, and theft, and these are the principal diseases of society. . . . In brief, we ask the government to impose the strictest restrictions upon the use of drinks.

Notice

SHORT TERM SUBSCRIPTION AND ORDER RATES

Attention is called to the new rates now in effect on short term subscriptions for *The Christian Science Monitor*, Christian Science Sentinel, and The Christian Science Journal; also on single copies of the Sentinel and the Journal. These rates are stated in the advertisements found on the inside front cover page of the Sentinel and on page "iv" of the Journal.

Attention is also called to the rates scheduled below, now effective on all quantity orders for any one issue of any of the Christian Science periodicals:

Monitor\$.03	a copy
Sentinel	"
Journal	"
Der Herold	"
Le Héraut	"
Quarterly	"

1

7 7 Tu

These rates are net and take the place of the former 10% discount on periodical orders.

The uniform retail price on the Sentinel is now 10 cents a copy, and on the Journal 35 cents a copy. The Monitor single copy price remains at 5 cents.

Discounts to reading rooms on subscriptions and on orders for general publications remain as before. 0

Church Notices

From the Clerk of The Mother Church

Church Tenets.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to Edward L. Ripley, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in *The Christian Science Monitor*, were run off at the time of their publication in the *Monitor*.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 81/4" x 103/4". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for *The Christian Science Monitor*, *Journal*, *Sentincl*, *Quarterly*, and *Heralds*, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and imme-

diate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlet in Russian

There is now on sale a new Russian translation of "Christian Science: Its Advantage to Mankind" by Edward A. Kimball, with alternate pages in English. Price 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U. S. A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S. A.

♦ ♦ ♦ Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U.S.A.

One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

German Translation. Alternate pages of English and German.

Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges,

single copy 50 cents; six or more, each 35 cents.

Printed in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

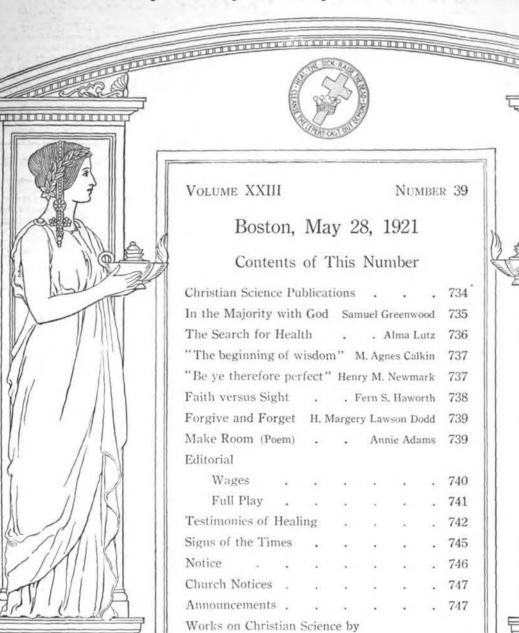

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

Mary Baker Eddy

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY BOSTON · U·S·A

A NOBLE TYPE OF GOOD HEROIC WOMANHOOD

Christian Science Literature

"Science and Health with Key to the Scriptures" and all other published writings of Mary Baker Eddy are listed on the outside back cover page of this Sentinel.

The Christian Science Journal

Founded, 1883, by Mary Baker Eddy. This monthly magazine is an official organ of The First Church of Christ, Scientist, in Boston, Massachusetts. Contains articles, editorials, and testimonies of healing, a directory of Christian Science Churches, Societies, and Reading Rooms; also in the January, April, July, and October issues a list of Christian Science Practitioners and Nurses. Subscription price, payable in advance, postpaid to all countries: One year, \$3.00; six months, \$1.75; three months, \$1.00; single copy, 35 cents.

The Christian Science Quarterly

Founded, 1890, by Mary Baker Eddy. Published January, April, July, and October. Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size. Subscription price, payable in advance, postpaid, to all countries: One year, \$1.00; single copy, 25 cents.

Christian Science Sentinel

Established, 1898, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. Subscription price, payable in advance, postpaid, to all countries: One year, \$3.00; six months, \$1.75; three months, \$1.00; single copy, 10 cents.

Der Herold der Christian Science

Authorized, 1903, by Mary Baker Eddy. A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months, 50 cents; single copy, 20 cents.

Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months 50 cents; single copy, 20 cents.

The Christian Science Monitor

An International Daily Newspaper. Founded, 1908, by Mary Baker Eddy. Daily, except Sundays. Its own world-wide news service is supplemented by the service of the Associated Press and of the United Press Association. Complete in its departments; unique in its Home Forum page. Full page of editorials dealing truthfully and fearlessly with vital questions of the day. Subscription price, payable in advance, postpaid to all countries: One year, \$9.00; six months, \$5.00; three months, \$3.00; one month, \$1.10; single conv. 5 cents.

Subscriptions will begin with the next issue after the receipt of the order. Information regarding bound volumes of the weekly and monthly periodicals will be given upon request.

LAW AND WORK for the blind. Printed in New York point, American Braille or English Braille, \$1.00.

SHEET MUSIC. Poems written by Mary Baker Eddy and used by special permission have been set to music as follows:

follows:
"The Mother's Evening Prayer," 75 cents.
"Christ, My Refuge," 75 cents.
"Love," 50 cents.
Communion Hymn—"Saw Ye My Saviour?" (Johnson), 50 cents.
"Blest Christmas Morn," 37 cents.
"Blest Christmas Morn," 37 cents.

"Blest Christmas Morn," 37 cents.
"O'er Waiting Harpstrings of the Mind," 37 cents.
"Shepherd, Show Me How to Go," 37 cents.
"Saw Ye my Saviour?" (Root), 37 cents.
The first three hymns are arranged for high and low voice in the same copy. The last five hymns are published separately in high and low keys. When ordering state key desired. key desired

THE CHRISTIAN SCIENCE HYMNAL. Cloth, \$1.15; half morocco, \$1.40; full morocco, \$4.50; levant, \$5.50; pocket edition, size 45%x65%, \$3.50.

PHOTOGRAVURE OF MRS. EDDY, printed in three sizes on India paper and mounted on heavy plate paper ready for framing, 8-inch (mount 12x16), \$1; 12-inch (mount 15x20), \$2; 16-inch (mount 21x29), \$3.50.

mount 15x20), \$2; 10-inch (mount 21x29), \$3.50.

PICTURE OF THE FIRST CHURCH OF CHRIST, SCIENTIST, IN BOSTON, MASS., AND THE PUB-LISHING HOUSE. Artist's proof with remarque on Japanese vellum, size 18x24 inches, \$5; on India paper without remarque, \$3.50. Smaller reproduction, size 11x14 inches, on Japanese vellum, \$1.25. Photogravue postcards of the Church Edifice and Publishing House, 5 cents.

BLFS. 01483x. Clarendon Brevier, heavy-faced, dis-tinct type: Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, \$7.50. 01440x. Brevier, light-faced type, self-pronouncing, Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, \$7.25.

01683x. Large type Bible, 1044x8 inches, bound in Alaska seal. Specially adapted for use of second readers, \$16.50.

The improved index will be added to any Bible listed in our catalogue, excepting the vest pocket size, for an additional charge of 35 cents.

Price List of Bible Concordances and Dictionaries of the English Language supplied on request.

Items such as leather covers for the QUARTERLY, and cases, either closed or open, for books, Sunday school supplies and other accessories, will be found in the current catalogue in THE CHRISTIAN SCIENCE JOURNAL.

NUMBER 39

In the Majority with God

SAMUEL GREENWOOD

THE decree had gone forth in Babylon that for thirty days the king was to be the only God of the nation, and any one found going contrary thereto would be given to the lions. The subtle effort to substitute human personality for divine Principle has marked the trail of the serpent from the beginning, although not always so boldly stated as in the present instance. Did Daniel, at whom the decree was directed, falter in his choice? Did he weakly compromise with his conscience by believing he could be loyal to God in his heart until the thirty days were ended, while he outwardly conformed to the conditions of the decree? Not for one moment, nor did he attempt to conceal his allegiance to the God of Israel.

The grand old prophet did not court the experience that was threatening him, but from his more spiritual standpoint a den of lions was immeasurably preferable to a palace, if the latter had to be won at the price of his conscience. To him there was but one God, but one supreme authority, and the person and position of even the king could not take the precedence in his thought and conduct. He was about to prove the truth which Wendell Phillips has so finely stated in one of his speeches, that "one on God's side is a majority," or as it is sometimes rendered, "one with God is a majority." To all human appearance Daniel was in a hopeless minority of one, unless he betrayed his fealty to Principle for the sake of homage to person; but the majority of numbers failed in this instance, as it always fails in the end, to prevail over the one who stood with God and withstood the persecution of evil.

History is enriched with the record of those who have stood unmoved in the face of overwhelming opposition, preferring the sacrifice of their sense of human life rather than their sense of right. The world's reformers have ever been in the minority with men, but they were in the majority with God, therefore their cause could not be overthrown. Christ Jesus, who is to-day the beloved of millions, once stood utterly alone so far as human eye could see; but he had told his disciples that he was not alone, for the Father was with him. Could he have been in a greater majority? Had the Master yielded to the seductions of the tempter and sought to be king of men, and to have carnal dominion over all the earth, what could he have accomplished more than others who have attempted to tread the way of pomp and worldly glory? He would have failed as signally as others have failed who laid their all upon the altar of selfish ambition and became engulfed in the strife to be accounted greatest. He knew, better than any one else, that unless God were with him, although all the hosts of earth were in his train he would be in the losing minority.

And in our own day, standing alone in a world of materialists, Mrs. Eddy, as the Discoverer of Christian Science, sent out her challenge of the allness of Mind, to all appearance in a hopeless minority. But she never faltered. Al-

though friends betrayed and enemies opposed at every turn, she preserved her sublime faith that God was with her. She once said to her students, and it was characteristic of her own unflinching fidelity, "Go, if you must, to the dungeon or the scaffold, but take not back the words of Truth" (Miscellaneous Writings, p. 99). The materialistic majority wielded the persecuting lash, but she never moved from her position or altered her course. She was indeed in earth's minority, but she was in heaven's majority, and the God of Israel who had protected His prophet from the lions was her defense.

If one is enduring persecution for conscience' sake, let him remember the glorious line of God's loyalists which has preceded him. The important question is not whether we are in a human minority or majority, but whether we are in the right. It matters little if we are or are not receiving the plaudits of the crowd, or if our opinions do or do not coincide with theirs, but it matters much whether our inmost thoughts can stand unrebuked in the presence of the First Commandment. Many are ready to decide for others, but no personal judgment can be safely substituted for the privilege of seeking divine guidance. The still, small voice of spiritual intuition is not heard in the multitude of contending opinions and emotions, but in the quiet sanctuary of one's own conscience, in the individual's highest realization of good.

Neither majorities nor minorities, on account of their number, are necessarily in the right. There is no assurance of safety in merely being with the multitude. The tendency of the human throng is to follow unthinkingly, like a flock of sheep, those who chance to be in the lead, rather than work out intelligent conclusions for themselves. As Mrs. Eddy has well said, in her Preface to Science and Health, "The time for thinkers has come." The true and scientific thinker is not led by impulse or superstitious sentiment in reaching his conclusions, nor does he look to other human beings to mold his opinions, but he turns to Principle alone for the correct solution of his problems. It is the weakness of mortals that they respond more readily to appeals to their emotions than to their reason, hence the danger of accepting superiority of numbers as a proof of rightness. Ever since human history began, right has been in the minority, not because majorities are wrong, but because it is the nature of human sense to oppose everything in the line of spiritual progress.

How, then, shall we know if we are in the right, be it minority or majority? How else than by the spirit we manifest and the things we do? If we are truly on the side of good, this fact will be apparent to all with whom we have to do, whether they are friends or enemies, for the Golden Rule will then characterize all our activities. If the spirit of Christ is in our hearts it will come out in our lives, for the inspiration of its presence is as irrepressible as being itself. In the Christian warfare,—that is, in the effort to be loyal to Christ,—we are not called upon to strive with men, for neither good nor its opposite supposition of evil is a person,

NH SERBITER STREET

but we are called upon to conquer every sense of ungodliness, and in this struggle one with God is always a majority.

The problem confronting Christian Scientists to-day is not one of standing for this or that body of persons, or of espousing one personal claim as against another, but of being loyal to the teachings of Christian Science. Any cause that is confessedly dependent upon human personality, and that can in consequence be held within its grasp, is confessedly independent of Principle, and for that reason would be unworthy of being maintained. If we feel assured of being on God's side, we shall trust in Him for its defense, for when has God forsaken His own? On the other hand, the employment of questionable means to support or to justify one's position, means that will not stand the test of Truth, is an unfailing sign that one is not sure of being on God's side.

After all, the only proof of being right is doing right, for every right-thinking person knows that no exigency can arise in a righteous cause that cannot be cared for in a righteous way. It is certain that God has never sanctioned the violation of human rights for the purpose of establishing or maintaining His kingdom upon the earth. Divine Love does not inspire men to be unjust, to resort to acts of intolerance, or to deny to others the freedom of demonstration which they ask for themselves. If we are in the majority that stands with God, our motives and acts will bear the divine impress, and we shall be content to leave the issues with Him. Our Leader reminds us, on page 2 of Science and Health, that "God is 'the same yesterday, and to-day, and forever;' and He who is immutably right will do right without being reminded of His province." Shall Christian Scientists, with the instruction of their textbook, ever think of God as less than infinite, or of the true man and woman as other than His likeness?

Both human progress and divine justice demand that, in matters of conscience, men shall be free. Minorities are too often in the right to justify their persecution or coercion. When men are honestly striving to be true to their highest sense of good, and to express the best that they are, it is sacrilege for human authority to attempt the administration of their moral sense. The events which called forth Lowell's stirring Stanzas on Freedom, from which the following familiar lines are taken, will be repeated in varying forms until human sense gives up struggling against the divine, and the majority with God becomes the majority with men:—

"They are slaves who will not choose Hatred, scoffing, and abuse, Rather than, in silence, shrink From the truth they needs must think.

They are slaves, who dare not be In the right with two or three."

The Search for Health

ALMA LUTZ

"I AM come," said Jesus, "that they might have life, and that they might have it more abundantly." Truly, abundant life is what we need to-day, and not life hedged about by unjust, terrifying physical laws, nor dependent upon physical organs, not life threatened, blighted, and overcome by a multitude of ever increasing diseases. The great need of mankind is Truth. In innumerable ways everywhere men are searching for health and life which can only be found through a knowledge of Truth. We find compulsory health laws, medical inspection of school children and factory employees, health crusades among the children to teach

them what hygienic rules to follow in order to be well. Newspapers have their daily health columns. Colleges have introduced compulsory health courses. In spite of all this, recent inspectors have pronounced fifty per cent of the school children abnormal. Army tests showed appalling physical defects among the soldiers. With this as an excuse an ever increasing health program is being urged upon the public, and men's thoughts are being turned continually toward disease and fear instead of health and dominion.

Have not men been looking in the wrong direction for health and life? In looking to the body for health and life they have found only pain, disease, imperfection, and death. Indeed it would be well if men would turn from the study of the human body, of diseases, of material remedies and precautions to the greatest healer of all time, Christ Jesus, and learn of him. Jesus paid no attention to the mechanism of the human body; he never diagnosed disease, never laid down health laws, never in the slightest degree gave heed to material laws. In fact, he set aside material laws in a most startling manner. Christian Science brings men back to Jesus' method of healing. It teaches them to believe his promises and to do the works that he did, to find in the Bible not only spiritual regeneration, but physical as well.

"With Christ, Life was not merely a sense of existence, but a sense of might and ability to subdue material conditions," wrote Mrs. Eddy, the Discoverer and Founder of Christian Science, on page 42 of "Unity of Good." How was it that Jesus was able to obtain this power over material conditions? It was not because he was familiar with the symptoms of palsy, leprosy, insanity, and so on, that he was able to heal these diseases. It was not because he knew in minute detail the structure of the eye, the ear, or throat, that he was able to heal the blind, the deaf, and the dumb. It was because he knew God, His power and perfection, and understood that man is His image and likeness.

Mrs. Eddy explains Jesus' method of healing very clearly, in these words, beginning on page 476 of "Science and Health with Key to the Scriptures": "Jesus beheld in Science the perfect man, who appeared to him where sinning mortal man appears to mortals. In this perfect man the Saviour saw God's own likeness, and this correct view of man healed the sick." You may ask where in Jesus' teachings can one find a single reference to man in the image and likeness of God. Could Jesus have stated it more concretely than this: "Verily, verily, I say unto you, The Son can do nothing of himself, but what he seeth the Father do: for what things soever he doeth, these also doeth the Son likewise. For the Father loveth the Son, and sheweth him all things that himself doeth"?

There is nothing in Jesus' entire record that gives us any excuse for thinking that these mighty works were possible only to him. In fact he persistently pointed out that these works would follow them that believed. The requisite was to believe—to understand; and this demanded spiritualization of thought. This is a thing that cannot be bought, as is brought out in Peter's rebuke to Simon, the sorcerer, as related in the eighth chapter of Acts. Neither is it something that comes as a special gift to a chosen few without any effort on their part. On the other hand, spiritualization of thought was and is attainable only through consecration, through turning to God and refusing to give power to matter or sense testimony.

Jesus' teachings fall on many dull and doubting ears to-day as they did in the first century. To many they are nothing more than words or records of remarkable, unexplainable things that happened long ago. To some they

bring a vague comfort, while to others they bring life, health, and hope, for they know that these teachings can be practically applied to-day. They know this because they have proved it through the understanding of the Bible gained through Christian Science. To Christian Scientists this statement of Jesus' means more for their health, happiness, and life, than all the physiology, medical research, and medical knowledge in the world: "And this is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent."

The first requisite for life and health, then, is to know We naturally turn to the Bible to learn about God, because the Bible is for the most part a record of men who were earnestly seeking to know God, and whose experiences proved their knowledge of God. The Bible tells us that He is Love, Spirit, Life, too pure to behold evil, and describes Him as all-wise, all-powerful, perfect, just, steadfast, and eternal, the lawgiver, the creator, the Father of Consequently, the image and likeness of God, as the Bible defines man, must reflect all these qualities, and hence be harmonious, perfect, loving, honest, strong, intelligent, and eternal. There is no disease in reality nor imperfection of any kind. Thus seeking to know God, we begin to find the real man and realize as the psalmist did that "it is he that hath made us, and not we ourselves." Jesus explains further that to gain life eternal we must also know Jesus Christ whom God sent. To do this we must understand Jesus' mission; we must realize that the work which he did was to show us how to do ours, and that it is our privilege throughout all time to overcome sin, sickness, and death by following his teachings.

The question may be asked, How can just knowing the truth about God and man heal organic disease? The human mind desires a more complicated, more spectacular, and even more painful or terrifying process. Undoubtedly this was very much the way Naaman felt when he came to Elisha to be healed of his leprosy. Naaman had his own belief about how he was to be healed. It was to be a spectacular method, befitting his station and the seriousness of his malady. To go and wash in Jordan seven times, in the muddy, insignificant, little stream Jordan in order to be healed of leprosy seemed absurd and ridiculous, and he was duly enraged. Naaman's servants, however, detected the flaw in his thinking and pointed out to him that he would gladly have obeyed had the prophet demanded some great thing, and then showed him how much easier and more natural it would be to do the simple thing that Elisha asked. So it was that when Naaman's mental state had changed, when he was willing to lay aside his pride and his opinions as to how he was to be healed, and was obedient, and humbled himself as a little child, then the leprosy left him. It was not the water of the Jordan that healed him. That water never before or never again has healed leprosy. It was Elisha's understanding of God and Naaman's willingness to turn unreservedly for help, that opened the way for the operation of God's law of healing. Even Naaman gave all credit to the God in Israel.

Knowing the truth about God and man does heal organic disease and every kind of disease or inharmony. The cause of all disease is mental, and therefore the cure of disease must come through Mind, through the action of the divine Mind destroying the human fear of disease, and hence acting beneficially upon the health. This is not mere theory. It has been proved countless times in cases pronounced incurable by the medical profession, and reveals the wonderful possibilities of growth Christward.

"The beginning of wisdom"

M. AGNES CALKIN

HOW many of us in the early study of Christian Science have been puzzled by the apparently disquieting statement in the ninth chapter of Proverbs, "The fear of the Lord is the beginning of wisdom"? Are we really to fear the Lord—the Lord whom we are just beginning to love and trust and to understand as that perfect Love which casteth out fear? Our dawning understanding seems to rebel against it. Taken literally, such a statement is inconsistent and contradictory, and so we must search for its inner meaning.

Solomon was probably the first to utter these words. The quotation also occurs in the one hundred and eleventh psalm, but this psalm is generally attributed to a much later period than David, and so the author was probably simply quoting Solomon's own words. However that may be, we are justified in taking for granted that he who "was wiser than all men" should be able to guide our footsteps into the path of wisdom; and the first step, he says, is to fear the Lord. The divine wisdom with which he was so richly endowed, however, had guided him to explain his meaning before making this statement, for in the previous chapter we have his explanation in the clearest possible terms. Wisdom herself is supposed to be speaking, calling upon all to hear the truth, and comparing the joys of real knowledge with worldly wisdom. In the thirteenth verse she proclaims, "The fear of the Lord is to hate evil." Thus we may now read, To hate evil is the beginning of wisdom! What a simple explanation, and what a mist is thereby cleared away!

The hating of evil, therefore, is the first footstep on the upward path, and we cannot take the second before the first is accomplished. Mrs. Eddy says in "Science and Health with Key to the Scriptures" (p. 253), "The divine demand, 'Be ye therefore perfect,' is scientific, and the human footsteps leading to perfection are indispensable." It will be found that the justifiable substitution of the few words above referred to, throws light on many passages difficult to the beginner, and the time occupied in studying and transposing similar passages with the aid of a concordance will be found full of interest and enlightenment. This little contribution -the first offered by the writer for publication in a Christian Science periodical—goes forth with an intense longing that it may prove helpful to some one, as a little token of loving gratitude for the many, many benefits she has received through Christian Science, and in fulfillment of her earnest desire to be able to give as well as to receive.

"Be ye therefore perfect"

HENRY M. NEWMARK

To the neophyte in Christian Science, it is naturally difficult to accept the verity of its insistent declaration that all that is real is perfect and eternal. But this is not surprising when one recognizes that the entire trend of his training and education, having been attained through the acceptance of sense testimony, supports his belief in the reality of an imperfect and wholly transitory existence. From the time of his earliest recollections, life has seemed to be made up of a succession of countless experiences emphasizing humanity's imperfections. Scarcely anything that he observes from day to day seems to offer the slightest justification in concluding that the attainment of perfection can rightly be regarded as a present possibility. But, on the contrary, the imperfections and frailties of the human race beset him on every hand. Whither, in these circumstances, is he to look for a perfect

...

3 76

ある 万里 正 戸る

state except, perchance, through a vague belief that it may await him beyond the grave?

It is little wonder, therefore, when he is confronted with the teachings of Christian Science, declaring uncompromisingly that the entire universe, including man, is spiritual and not material, here and now perfect, that the beginner should find himself somewhat perplexed and confused. Is he truly prepared to relinquish his preconceptions concerning a so-called material existence with its imperfections and limitations? Realizing that these beliefs and the attending suggestions of imperfection have brought much pain and sorrow, he finds himself quite ready to turn his serious attention to a contemplation of Christian Science in the hope that it may point the way of deliverance to him. He asks himself if, after all, as Mrs. Eddy teaches, so-called material existence, subject to change and dissolution, is but the misconception of that which is actual and real. Can it be true that the belief of life in matter is, in truth, no part of God's plan, and that man, the infinite reflection or idea in divine Mind, has always been perfect and will so continue throughout eternity, as Christian Science insists? The answer brings hope and confidence, for it declares in the words of John, "Now are we the sons of God." This being so, evil and every form of human imperfection are no part of the divine inheritance. There can be no other. The consciousness of this truth destroys his doubts and fears, while the floodgates of joy and encouragement open wide before him.

Now Christ Jesus commanded his followers to be perfect. This injunction was certainly not intended merely for those who were within the range of his voice. It was addressed to all his followers, both at that particular time and for all time to come. For he declared, on another occasion, that heaven and earth would pass away but that his words would not pass away. Can any one doubt that Jesus of Nazareth knew, beyond question, that his command to be perfect could be obeyed? An admission of anything less than this would convert his immortal words into a mere mockery. Obviously, the Master did not demand perfection of his disciples without a full knowledge that perfection was attainable, practically and demonstrably. Every instance of healing, then and now, must, of necessity, elevate thought, in a degree, out of the ignorant beliefs of imperfection into a definite knowledge of the perfection of man, abiding forever in the infinitude of perfect Mind.

In this connection it is particularly significant to note that Mrs. Eddy classifies three commands of the Master as "imperative commands" in the following terms, in "Science and Health with Key to the Scriptures" (p. 37): "Hear these imperative commands: 'Be ye therefore perfect, even as your Father which is in heaven is perfect!' 'Go ye into all the world, and preach the gospel to every creature!' 'Heal the sick!'" And then, as if further to awaken humanity to the vital importance of what precedes she adds: "Why has this Christian demand so little inspiration to stir mankind to Christian effort? Because men are assured that this command was intended only for a particular period and for a select number of followers. This teaching is even more pernicious than the old doctrine of foreordination,-the election of a few to be saved, while the rest are damned; and so it will be considered, when the lethargy of mortals, produced by man-made doctrines, is broken by the demands of divine

Progress toward a complete realization of man's perfection must come, therefore, by means of preaching and healing. The perfection of man is being brought to light according to the measure of harmony attained by the eradication of sin, disease, and death. It will then be seen that the man born of woman, of a few days and full of trouble, could have neither place nor identity in the perfection of true creation which is wholly spiritual. For all must eventually emerge from the false belief of life and intelligence in matter into the full understanding of man's perfection because of his sonship with God, who is infinite Mind and perfect Love. "The divine demand, 'Be ye therefore perfect,' is scientific," declares Mrs. Eddy on page 253 of Science and Health, adding this, however, "and the human footsteps leading to perfection are indispensable. Individuals are consistent who, watching and praying, can 'run, and not be weary; . . . walk, and not faint,' who gain good rapidly and hold their position, or attain slowly and yield not to discouragement. God requires perfection, but not until the battle between Spirit and flesh is fought and the victory won."

It behooves every earnest worker in God's vineyard, therefore, to be mindful of the necessity of actively and joyously taking his place in this struggle between Spirit and flesh. Such a one has his eye single upon the perfection of God and man, in His image, not afar off but an ever present divine idea dwelling eternally in the divine Mind, while yet taking the footsteps which Mrs. Eddy describes as indispensable. In the face of the suggestion of the human mind and corporeal sense, persisting in declaring the dream of human existence as real, the Christian Scientist calmly and resolutely maintains the truth of being in his own consciousness. He is truly rejecting every suggestion of imperfection and limitation and replacing these with the God-given consciousness that is ever proclaiming the perfection of all creation. This understanding is, in truth, the stone which the builders rejected which has become the head of the corner. For nothing less than this underlying realization of man's perfection heals. This is the basis of Christian Science healing, as it was demonstrated during the ministry of the Galilean Prophet. For thus we read in the Christian Science textbook, beginning on page 476: "Jesus beheld in Science the perfect man, who appeared to him where sinning mortal man appears to mortals. In this perfect man the Saviour saw God's own likeness, and this correct view of man healed the sick. Thus Jesus taught that the kingdom of God is intact, universal, and that man is pure and holy. Man is not a material habitation for Soul; he is himself spiritual."

Faith versus Sight

FERN S. HAWORTH

IN human experience one often finds to-day, as did the patriarch Abraham, that the call comes to go out to a land that "I will shew thee," that we know not of. The tendency of the human mind is to wish first to see the result of any particular action; but God requires that we act in obedience to divine direction, before the promise of blessing can be fulfilled, and "sufficient unto the day" is confirmed in the quiet words of Jesus of Nazareth: "Peace I leave with you, my peace I give unto you: not as the world giveth, give I unto you. Let not your heart be troubled, neither let it be afraid." How can we know when a step is ordered by the Lord? The nature of Truth is to bring peace and joy, and when the false arguments of doubt which disturbs, and selfwill which resists, are silenced, we find that the light "which lighteth every man that cometh into the world" is with us; for, as Mrs. Eddy so well expresses it in "Miscellaneous Writings" (p. 117), "God is the fountain of light, and He illumines one's way when one is obedient."

It is worthy of note that Abraham, the representative of fidelity to Principle, rendered willing response to the divine requirement and obediently left his own country and kindred, literally walking by faith rather than by sight. The first thing he did on arriving at the appointed place was to build an altar unto the Lord, and to call upon the name of the Lord, typifying the sacrificing of the material self and acknowledging the supremacy of God, good, thus making life sacred, as the word denotes. With this selfless attitude and full allegiance to Principle, it was inevitable that the result could only be an increase of spiritual understanding on each occasion, which appeared humanly as plentiful supply, for we read that "Abram was very rich" and "their substance was great." Having done his part, paying his tithes, fulfilling God's will and purpose for him, he experienced the confirmation of the promise, "Prove me now herewith, saith the Lord of hosts, if I will not open you the windows of heaven, and pour you out a blessing, that there shall not be room enough to receive it." If Abraham had hesitated, through fear or through desire to know the outcome, he could not have experienced these results, because doubt, hesitancy, and fear are qualities of the carnal mind, which produce want and stagnation, and cannot cognize good.

One beautiful proof of selflessness in Abraham was evident when there arose a dispute between his herdsmen and Lot's herdsmen, and the decision was made to go in different directions; for he said to his nephew, "If thou wilt take the left hand, then I will go to the right; or if thou depart to the right hand, then I will go to the left." A whole-hearted desire to do the will of God, and let His purpose be fulfilled in us can always well afford to leave a decision to those who deem it important to choose, and accept the other course whenever such occasions arise. As God, Principle, remains eternally the same, we need have no fear, for He is to us, as to Abraham, our shield and "exceeding great reward."

Forgive and Forget

H. MARGERY LAWSON DODD

ON page 12 of "Miscellaneous Writings" in an article entitled "Love Your Enemies" Mrs. Eddy says, "If you have been badly wronged, forgive and forget." Through all Christian times we have been taught to pray, "Forgive us our debts, as we forgive our debtors," and it may perhaps happen that, having been wronged, with these words on our lips we have thought it sufficient to ignore the matter; so with a pat on our own backs for our charity, we have taken no further trouble. But have we really done our part? If error presents itself to us in any form it is our duty to destroy it, not to ignore it, and we must set to work. It may therefore be well to consider what rules we have to guide us. The first surely is that we cast error out of our thinking, as we are taught in Christian Science. This is not a process of self-condemnation, as mortal thought would so often have us believe, nor do we need to say, "Perhaps it was my fault; I must not be too hard on so-and-so," and thus reach a frame of mind of sham humility. We must find true humility and understand clearly that we can do nothing of ourselves, that we have no righteousness whatever belonging to us as mortals, and that "there is none good but one, that is, God." Then we need to know that the child of God, divine Principle, is incapable of feeling hatred or revenge and can only reflect divine Love. This done we are ready to see more clearly how to apply the Golden Rule, to do unto others as we would have them do unto us, and to separate the tares of mere condoning from the wheat of true forgiving.

Unless one is a coward, one does not wish one's faults watered by a false kindness and allowed to grow. One has no right to do so to another. To excuse error is to believe that there is a real something to excuse. If we were asked to treat a patient for sickness, we should not say, "Poor body; it cannot help feeling sick and having pain; it is made like that, and moreover it was not considered and was left in a draught." We should declare right away that in place of the seeming material body there is really only man, expressing Principle. In the same way we must uncover the error and face it for what it is-an erring mortal trying to make us accept him as God's child, hatred pretending to be power, when all power belongs to Love, a lie asserting itself as the truth. When faced in this way, the utter unreality of the whole distortion that tried to gain admission becomes obvious and is not only forgiven but forgotten; for how can we remember that which never was? There is, however, one more step to complete the work; namely, to put the true idea in the place of the false, to see not mortal man but the Christ-man as the only reality, and therefore all we ever need to take cognizance of. In "Science and Health with Key to the Scriptures" Mrs. Eddy tells us (p. 476): "Jesus beheld in Science the perfect man, who appeared to him where sinning mortal man appears to mortals. In this perfect man the Saviour saw God's own likeness, and this correct view of man healed the sick." In the process of our work we shall be guided as to whether it is wise and helpful to point out the fault in love, or whether it is our work silently to bear fruit. Nor need we be disturbed at any seeming upheaval following upon our activity. If a seeming chemicalization occurs we need only rejoice that error is being destroyed. On page 296 of Science and Health we read, "Either here or hereafter, suffering or Science must destroy all illusions regarding life and mind, and regenerate material sense and self."

We often think of the Master's love for John but we may forget he also loved Judas. His love for John was manifest in the most beautiful, spiritual friendship the world has ever seen. But the sharing of spiritual joys was of no use to Judas, and only after the betrayal did error destroy itself, through his unspeakable remorse and ultimate suicide. So we see that the most unloving thing we can do is to condone sin, should an offense dare to show itself to us either in our capacity as parents, friends, or citizens; and the most loving thing we can do is to "Rise in the strength of Spirit to resist all that is unlike good" (Science and Health, p. 393). Divine Love takes care of the consequences, for we have obeyed the Golden Rule, and in this way only can we truly forgive and forget.

[Written for the Sentinel]

Make Room

ANNIE ADAMS

Make room for Love;
With tenderness and might
It comes to shed on all
Its everlasting light.

Make room for Truth,
Our blessed heaven-sent bread;
To feed earth's hungry ones,—
A bounteous table's spread.

Make room for Life;
Sin, suffering, death, give place.
Sad, weary ones look up—
Life fills all space!

Wages

Wages are the payment every man receives for whatever he may accomplish. It is, as it were, his requital. Metaphysically there is no escaping them, whether they are the wages of sin, which Paul told the Romans is death, or the wages of Principle, which is eternal life. To the world this is something of an enigma, yet it takes very little metaphysical knowledge to understand its inevitability. Sin is grounded in materiality, and the very fact of material existence predicates death. Human life has been the subject of a thousand similes, but there is no avoiding the appropriateness of the simile that it is a straight line drawn between the two points of birth and death. Birth is the requital or wage of the belief in material generation, and death is the ultimate penalty or wage of that belief. Scholasticism has represented death as the gateway to eternal life, whether in heaven or in hell. The idea is, of course, hopelessly illogical. "Death," Mrs. Eddy writes, on page 203 of Science and Health, "is not a stepping-stone to Life, immortality, and bliss. The so-called sinner is a suicide. Sin kills the sinner and will continue to kill him so long as he sins. The foam and fury of illegitimate living and of fearful and doleful dying should disappear on the shore of time: then the waves of sin, sorrow, and death beat in vain."

The belief in materiality is sin. The sin of omission, possibly, to the man educated into a belief in the reality of matter, rather than the sin of commission, but nevertheless sin. If to this sin of omission he adds the sin of commission, that is to say if he indulges in some expression of animality which society has agreed upon describing as sin, he may hurry the ultimate penalty, but the requital will come in any case. To avoid this requital is quite impossible, by any means save those which Jesus preached, namely, the gaining of that knowledge of Truth which is itself the wages of spiritual well-doing. "This is life eternal," Jesus said to his disciples, on the road to Gethsemane, "that they might know thee the only true God, and Jesus Christ whom thou hast sent." Tradition has pictured him standing before the great golden vine, in the temple, and making aloud his great prayer. Whether tradition is accurate or not is entirely immaterial, there is in any case no mistaking what he intended by the true vine. The lesson he was engaged in teaching was the lesson he was always engaged in teaching, namely, that the knowledge of Principle, that is to say of the allness of Spirit and the consequent nothingness of matter, was in itself eternal life. It is no wonder, then, that Mrs. Eddy has made this the cardinal point in her metaphysical system, and has expressed it in that passage, on pages 9 and 10 of "Unity of Good," where she writes: "What is the cardinal point of the difference in my metaphysical system? This: that by knowing the unreality of disease, sin, and death, you demonstrate the allness of God. This difference

wholly separates my system from all others. The reality of these so-called existences I deny, because they are not to be found in God, and this system is built on Him as the sole cause. It would be difficult to name any previous teachers, save Jesus and his apostles, who have thus taught."

What, then, the whole matter comes to is this, that as a man sows so shall he reap. His wages are simply the crop he rears, and his seed is simply his thoughts. The guarding of his thoughts, then, must constitute his daily work, and his success in keeping his thoughts pure sums up the measure of protection which he affords himself. As surely as his thoughts stray into the pleasant fields of matter, so surely is he earning the wages of sin. As steadfastly as he passes them under the rod into the spiritual sheepfold must he attain that security which is protection upon earth, and ultimately acquire that fuller knowledge of Principle, the wages of which are eternal life. The whole battle of physical existence is seen, then, to be an individual battle. Temptation to go astray in myriads of ways may seem to come from without, but if the individual is steadfastly guarding his thoughts, his protection against this temptation is secure. The temptation may come in untold ways, but it will come in its most deadly form in proportion to the pleasure which it offers. No human being wishes to believe in sorrow or sickness. He may yield to them out of ignorance, but never with satisfaction. In the case of pleasure this is perfectly different. Here he goes out to meet sin halfway, or a good deal more than halfway, and yields to it with satisfaction. The ultimate wages of death he may know are inevitable, but he forgets this in the pleasant orgy of temporary sensuous enjoyment.

Human life is the vestibule to some further stage of existence on a road which never ends until sin is finally conquered. The wise man, therefore, will employ it in getting rid of as much of his materiality as possible. He will forsake the way of Balaam the son of Bosor, who received the wages of unrighteousness, and will strive more and more determinedly for the wages of righteousness. The writer of Revelation has explained to him exactly what is before him. "He that overcometh," he writes, "shall not be hurt of the second death." This overcoming can only be achieved by a never failing adherence to Principle in word and in deed. It means that a man shall set to work to overcome the flesh at every point. It is a mockery for him to put off doing this, for the wages of sin is death, and these wages will be paid to him whilst he is still waiting to reform. Then the second death will assuredly await him. Reformation is not achieved by intending some day to do better. It is achieved by that hourly watchfulness which prevents the image of anything impure or untrue from forming in the human consciousness. Thus the enemy is always a man's own material consciousness, for in the degree in which this is attuned to matter will it take in and harbor all those material suggestions which are being perpetually given utterance to by mortal mind.

The devil, in other words this mortal mind, is always assuring mankind that sin is the breach of a certain code of morals humanly manufactured. This is the mesmerism that prevents the world from freeing itself from sin by grasping the fact that theft, drunkenness, slander, hatred, sensuality in any of its innumerable phases, are one and all expressions of a belief in the reality of matter and of all that proceeds therefrom. Thus the world is seen indulging in its perpetual shadow pantomime; indulging, even in its saner

and better moods, in the effort to stamp out effects whilst leaving the cause of these effects untouched. The writer of Revelation knew perfectly well what he was saying when he explained that peace could not come to the human consciousness until the great red dragon, mortal mind, had been cast into the bottomless pit. It was not the major or the minor sins of physical existence which had to be got rid of, but the belief of life in matter itself. When that was accomplished, the sea itself would pass away. From the beginning to the end of the Bible the sea is the symbol of evil. "In the beginning God created the heaven and the earth. And the earth was without form, and void; and darkness was upon the face of the deep." The deep, the sea, or evil, was brooded over by the darkness of ignorance, until the light of Truth first began to dawn in the human consciousness. Gradually, as the record goes on, this dawn of Truth spreads into day, until the Revelator writes, "And I saw a new heaven and a new earth: for the first heaven and the first earth were passed away; and there was no more sea." The disappearance of the sea is the disappearance of sin, and with sin of the wages thereof.

FREDERICK DIXON.

Full Play

THAT infinite power may have full play of orderly action is the purpose of man's living, for cause, in order to be cause, requires effect or manifestation. In "Reverie," one of his last poems, Robert Browning mused about the time and circumstances when "power comes full in play;" but because he was thinking of materiality as more or less necessary, he could not see the real spiritual meaning of the term he was using. The absolute fact is that infinite power, the divine Mind, requires unlimited effect for its expression, and this unlimited effect must manifest all true vigor, variety, concord, and every other good quality there could possibly be. The full play proceeding from omnipotence is the immortal happiness which all people are seeking but which they can find only as they drop their mortal sense of living for the spirituality of the true consciousness. Since omnipotence manifest is certainly enough to satisfy anyone, it suffices to fulfill every right desire and to replace any wrong desire with the true idea.

What is a child or a dog at play actually doing? Of course, to use the word "play" in this sense is to deal with a somewhat different meaning from that involved in the phrase "full play;" but the two meanings are, after all, closely related. Whatever is either at play or in full play is in some way in motion. The true play, in both meanings of the word, is the true motion that expresses infinite Mind; whereas the human sense of play, even of free or full play, is but the counterfeit, the suppositional opposite, of the divine action. The division of human living into work and play is merely a classification of the so-called mortal mind. Because what is one man's play is very often another man's work, we need to see that the true full play of Mind, which is both useful and satisfying to Mind, and which any human sense of doing counterfeits, is spiritual action, quite apart from the belief in matter. Immortal motion is far more than a sense of physical exertion, in that it is the vital expression of infinite Life as idea, not materiality.

On page 224 of "Miscellaneous Writings" Mrs. Eddy declares, "We should remember that the world is wide; that there are a thousand million different human wills, opinions, ambitions, tastes, and loves; that each person has a different history, constitution, culture, character, from all the rest;

that human life is the work, the play, the ceaseless action and reaction upon each other of these different atoms." Since human living exhibits all this variety, how much more varied and truly satisfactory must be the true idea which it counterfeits. The full play which manifests the divine Life must be free, unlimited action of Mind, for only in the realm of infinite Mind can there be genuine freedom. Immortal Life now, with all its action, is Mind, not matter.

In no way can the true doing be listless or purposeless. Because Mind is infinite, Mind requires infinite unfoldment of action, though what this spiritually constructive unfoldment is no man can humanly outline. To live in eternity now is to make the most of every opportunity for proving Mind as the only producing, governing, and sustaining power, to do with all one's might whatever one finds to do that is essentially constructive, and to rejoice in the indestructible harmony of the divine action to-day. Such living involves neither waste nor inefficiency. As Mrs. Eddy remarks on page 230 of "Miscellaneous Writings": "Three ways of wasting time, one of which is contemptible, are gossiping mischief, making lingering calls, and mere motion when at work, thinking of nothing or planning for some amusement,-travel of limb more than mind. Rushing around smartly is no proof of accomplishing much." Accomplishment is the expression of actual intelligence, and this constitutes the full play of divine power which alone means happiness.

If one sees a fish swimming idly, as it seems, in a pond, one may think of that sense of existence as dull and of lesser value than the affairs of humanity. Yet it is only mortal mind that interprets that form of activity as lower and less important than other seeming forms. From the fish to the human being, the earthly seeming is mere counterfeit of the spiritual reality. In the true living which God, the divine Mind, knows, there is no unimportant experience, for all true action in boundless variety is requisite for the full manifestation of divine intelligence. Real action, however, is spiritual and not material, for the full vigor of God, self-existent Life, shown through all true quality, by whatever name it may be called, is much more than a play of material muscles and nerves. The reality, whether it be called man or fish, is spiritual idea expressing as full play of spiritual action the one Life which alone is causative.

Job was reasoning out for himself something of this truth that full play of true action is necessary for the expression of omnipotence when he said: "But ask now the beasts, and they shall teach thee; and the fowls of the air, and they shall tell thee: or speak to the earth, and it shall teach thee: and the fishes of the sea shall declare unto thee. Who knoweth not in all these that the hand of the Lord hath wrought this? in whose hand is the soul of every living thing, and the breath of all mankind." It was because Job was able thus to reason out the infinite freedom of true creation, of the spiritual idea expressing Soul altogether apart from the belief in matter, that he could prove through the very midst of all sorts of suggestions the immortality of his own freedom. That the divine power is indeed unlimited and is manifest as full play for man throughout true living is the lesson for all to learn. The learning of this lesson requires the relinquishment of all sorts of false beliefs, both seemingly pleasurable and seemingly painful; but the whole process of proving Mind's infinity is a joy, for it is the realization of true power as "full in play" now, without possibility of interference. GUSTAVUS S. PAINE.

Testimonies of Healing

It is with a deep sense of gratitude and love that I testify to God's wonderful healing power as demonstrated through Christian Science. Some years ago I was suffering with what two physicians diagnosed as gastric ulceration of the stomach accompanied by profuse hemorrhages. I was restricted as to diet, and was told that a recurrence of the trouble might result in something more serious. During the years that followed I had several other bad attacks, and was helped each time by my physician, in whom I had the utmost confidence; but I did wish that I might be cured so that I would not have any recurrence of the trouble or be in fear of what I ate. A little more than four years ago I had a very severe attack. All of the doctor's skill failed to give me the relief experienced on former occasions. I could retain nothing in my stomach, not even the liquid taken three times a day as my only nourishment, and I was given rectal feedings to keep up my strength. The physician said that a chemical analysis indicated cancer of the stomach, and he could do no more for me except to give me morphine to ease my suffering.

As I did not like the effects of the drug and was opposed to its use, at my husband's suggestion I began to read "Science and Health with Key to the Scriptures" by Mary Baker Eddy, and when I did not feel like reading, some member of the family would read to me. I also formed the habit of repeating silently the twenty-third psalm, and through the light of Christian Science it had a newer and sweeter meaning for me. My husband made arrangements for absent treatment to be given me by a practitioner, and shortly after this the thought suddenly came to me that I was healed and that I might as well get up and stay up; but fear whispered that it would be better to say nothing about it, for it might not be so. I not only had to combat my own fear but that of my family, who were afraid to have me walk around much or to eat anything but the lightest of food. My progress, I feel satisfied, was slower on account of this fear, but I finally determined to discontinue the unnatural manner of taking nourishment and began to eat heartier food and it was not very long before I was eating whatever the family did, and gaining in strength and weight. The doctor who had previously attended me could hardly believe my husband when he told him I was up helping with the housework and eating anything I wanted. When told that I had taken Christian Science treatment, he said he did not blame us; and that he would have done the same under the circumstances had it been his mother. On the day of this writing I have been spading up and planting in my garden, besides helping with the work in the house, and I have repeatedly eaten food that had been forbidden me by the medical practitioners, without fear or any evil results.

In reading certain passages of Scripture I had often wondered if the sick could not be healed now as they were in the time of Christ Jesus. Now I know they can. My husband and I are both studying Christian Science and we are not only very thankful for physical healing but more so for the spiritual uplift and understanding, for the knowledge that God is All-in-all.

MRS. G. W. HILTON, Amarillo, Texas.

I wish to add to the statement of my wife's that two tests of stomach contents came from the laboratory labeled cancer of stomach, and the doctor does not even now repudiate his diagnosis. He told me no case had ever been cured and medical science could do no more, and he quit coming, saying that it was only a question of how many days her vitality would last,—that there was absolutely no hope as no power on earth could save her.—G. W. HILTON.

4

With a grateful heart I wish to tell how my family and I have been blessed through the teachings of Christian Science. During the war we had many apparently serious problems to meet. Providing for a large family and experiencing sickness and various difficulties often rendered my husband and myself nearly desperate. When I went to others for comfort I was often, even by pastors, told: "Yes, it is really hard to pass through all this, but you must bear it for it is a proof that God loves and therefore chastens you." I could not be satisfied with this consolation any longer and preferred not to know anything more about God. Then in the time of greatest need I learned of Christian Science. It was explained to me that God is omnipotent good, that want, poverty, and sickness are unknown in His kingdom, and that He does not cause His children to suffer.

I remember well asking the one who had told me of Christian Science for an explanation of material needs. I was at that time without any means and knew not how I was to provide dinner for my family; nine hungry ones were waiting for food. The student of Christian Science explained to me the words of the psalmist: "Thou preparest a table before me in the presence of mine enemies," and showed me that my sorrowful thoughts full of anxiety and care were my greatest enemies, but that, if I could replace those thoughts of poverty by right thoughts and realize that God is the source of supply, I would find that all our needs were met. I returned home comforted and endeavored as well as I could to destroy the evil beliefs. When the time to prepare the meal arrived, I placed a kettle of water on the fire as though I had something to cook. My eldest child exclaimed in amazement: "But mother, what are you going to cook? You have nothing." I explained to him God's ever presence and that He supplies our needs. Soon afterwards the bell rang, and a man came to pay a bill. He said he was obliged to pass our house and wished to settle the matter at this time. But I was filled with praise and thanks to God who always has ways to help us. We were able to leave the table satisfied, for God had prepared the table in the presence of our enemies. I could relate many similar experiences. I can honestly say that Christian Science with its beautiful teachings has delivered us from want, sickness, and mental darkness. Our eight children as well as my husband and I cannot be grateful enough that this way, which leads out of darkness into the light of Truth and faith in God, was pointed out to us.—(Mrs.) IDA WENGER, Bern, Switzerland.

4

In gratitude for the healing and blessings I have received through Christian Science I send my testimony for publication. Many years ago I was healed of bronchial asthma of years' standing. In three weeks the healing was complete and since that healing I have been perfectly free. Recently a serious attack of influenza disabled me and for some hours I suffered a great deal of pain. At the same time I was troubled with suppuration of both ears, which lasted for some days. Through the loving help and work of a member of our church I was greatly benefited and in a week was quite well. After the first day I had no suffering, and was quite able to read or write or do anything necessary, and my recovery was quick and wonderful. For this and numerous other blessings and healings in my fam-

::

ily, spiritual, physical, and financial, I cannot be too grateful, and I thank God for what He has done for me and mine. I am grateful also to our dear Leader, Mrs. Eddy, for giving us "Science and Health with Key to the Scriptures." I wish to express thanks for all the comfort and help I have received from the literature, from the Journal, Sentinel, and Monitor; each one always contains a comforting, helpful message.

(Mrs.) Constance Nutting, London, England.

I want to express my gratitude for the many healings I have had through Christian Science. My first healing was of enlarged glands. This led me to begin the study of Christian Science, which I kept up for about three months; then I dropped it, thinking it was not doing me any good. Finally, in great distress, I got out my copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy and began to study it again. Never before had I found so much joy as I did when I knew that God is the only cause and creator. I am very grateful that I can belong to the Christian Science Sunday school. It is so comforting to know that God is always with us in time of need. I am indeed grateful to God and hope many others will find the way as I have.

(Miss) THELMA REINKE, Detroit, Michigan.

A little less than six years ago our little daughter was treated for appendicitis, as we believed her to be passing away. We had a doctor diagnose the case and his verdict was that she had tubercular enteritis; that all her joints were tubercular and one lung was affected. He tried to convince us that the child would pass away if we relied on Christian Science for healing, but I told him I believed all things were possible with God. The next day she complained of her knees and each day some new manifestation of discord came up for destruction, until all were destroyed by Truth. The healing was slow, and there was much for us to learn.

In three months' time the child was up, one month later she started to school, and in another three months was completely healed. During this time we had three present treatments-all the rest being absent. I am grateful to the practitioner who was so patient and loving during all these months; also to the nurse and to all who helped us, and for the truth that unfolded. I am grateful to Mrs. Eddy for her writings and for all the Christian Science literature.

(Mrs.) Nellie Campbell, Oakland, California.

I wish to express my sincere gratitude for the good that has come to me through the study of the Bible and Mrs. Eddy's works. For many years I was a sufferer from rheumatism, and I was in despair of ever being freed from it. While in this condition I read an article in The Christian Science Journal. The truth suddenly dawned upon me and I realized that in reality I had permanent and everlasting freedom from sickness of every description. From that moment I began to experience the healing power of Principle and in a short time the healing was complete, and it has been permanent. Since that demonstration I have been an earnest student of the truth, as revealed through Christian Science.

There had also been the experience of a seeming loss of all earthly possessions and a loss of friends, several of whom I had held dear in a seeming affection for attractive personality. These things were restored when they were seen in the new light which came from the study of Christian Science, and I learned that all true good is in the realm of Mind, and is forever intact. Now I have real friends who are with me in the study of Christian Science; and my various human needs are met through the understanding that Spirit is substance. As Mrs. Eddy writes on page 468 of Science and Health: "Spirit, the synonym of Mind, Soul, or God, is the only real substance. The spiritual universe, including individual man, is a compound idea, reflecting the divine substance of Spirit."

For these manifold blessings, I cannot be too thankful to God. How much I am indebted to Mrs. Eddy for the happiness and contentment that have come to me through the revelation of Christian Science I do not feel capable of expressing in words.

LAWRENCE F. VAN DEVENTER, Great Lakes, Illinois.

When I was given up by skilled physicians, several years ago, a dear friend urged me to try Christian Science, which I did as a last resort, and found it most comforting from the first, and the best healing balm to mankind since Jesus was among men. My ills were great in number. I have been healed of pneumonia, nervousness, sick headaches, the grip, cancer, fever, and a tendency to take cold easily. I had always had someone else do my washing and hard work; now I can do it all and clean house and sew for a family of four. I never had such perfect health as now, and life is worth living, for which I give thanks to God and my gratitude goes out to Mrs. Eddy. In closing I wish to express my gratitude to those who have so faithfully shown me the way in Christian Science. That God's wisdom may ever sustain them, is my sincere wish.

(Mrs.) May L. Hayes Wheelock, Dryden, New York.

My introduction to Christian Science was through a copy of the Sentinel which a kind friend handed to me as something good to read. I found his words so true that now I hardly want to read anything other than Christian Science literature and the Bible, of which I knew very little before coming into Science. For about ten years I had worn glasses at my work for nearsightedness. One day as I was in the act of putting them on I was impelled to put them away, and have not worn them since. I was fond of intoxicating beverages, and had been addicted to the use of tobacco in different forms and to profanity for thirty or forty years. These habits left me without any apparent effort on my part. I have been able to overcome many minor complaints through the understanding of divine Mind, or Love and Truth, and of God as All-power. I have had some remarkable healings, with help from kind practitioners, to whom I am thankful. I am grateful also to Mrs. Eddy, the noble woman who made it possible for all people of all nations to realize the one perfect Principle, divine Mind or God, as ever available to all mankind in overcoming sin, sickness, and death. I am thankful to God "from whom all blessings flow."

WILLIAM C. ALLEN, Memphis, Tennessee.

Christian Science has been a great protection to me in overcoming the effects of accidents. I wish to tell of one which without Christian Science would no doubt have either proved fatal or left me a cripple. A few months ago I fell backward down a steep stairway with a sharp turn in it, and when I reached the bottom I seemed hurt from head to foot. I immediately declared the truth, however,

knowing that there are no accidents in Mind, and I certainly felt a wonderful sense of protection, despite the fact that I could not bear to have my husband move me. He was very frightened and called a Christian Scientist close by. I held fast to the truth, refusing to let fear gain dominion over me. The next morning, although my ankle was very much swollen and discolored it did not pain me. My neck seemed stiff and my back somewhat sore, but I put on slippers and went to church. A few weeks afterwards a swelling formed on my collar bone, and a friend of mine who looked at it said I had either broken the collar bone or had torn the ligaments. In a few days the swelling left and the healing was complete.

I am very grateful for Christian Science, and especially for the literature. It means so much to me. The more I read it the more I love it, and the more grateful I feel toward our Leader, Mary Baker Eddy, for giving us this practical religion, which certainly meets our every need, and acquaints us with God.

(Mrs.) Blanche Ward, Fairview, Oklahoma.

4

About five years ago I had my first Christian Science treatment, which resulted in a wonderful instantaneous healing of an ugly growth on my face, which I had given up hope of getting rid of as it had been removed several times and had reappeared. Christian Science was brought to my attention when my mother was healed, in one treatment, of a complication of troubles that five doctors said would require an operation. I asked the practitioner to help me in regard to that growth. The next morning it was entirely gone and has never returned. I have had other healings for which I am very grateful. While at work recently my husband's right hand was crushed in a machine. His employer sent him home, telling him to stay off as long as necessary. He called up a practitioner for treatment, and went to work the next day. The swelling gradually disappeared and in a few days his hand was normal. Several of the employees said they did not expect him to return for at least a week.

Of course one would be grateful for physical healings, but I am also very grateful for the wonderful spiritual teachings of Christian Science. I am grateful for the literature and for the lectures and to the loving practitioners for their work.—(Mrs.) Edna H. Simpson, Washington, District of Columbia.

A year after my father passed on, great financial losses occurred in our family, which brought me into an entirely new, unfamiliar life, a life of the most severe privations. It was my nature to take everything earnestly and seriously. I did not suffer from material want, but I made the trials of the whole family mine, and I was constantly depressed. It was at this time, about ten years ago, that dear friends told me of Christian Science. From that day on I stood under the protection of Truth. Adversities brought about in business life never again had the power to make me unhappy or suffer, as had constantly been the case. My thoughts brightened and I again found joy in living. My position constantly improved and I always had desirable results in business.

At one time a sum of money was required that, in addition to other valuables, would enable us to obtain some family possessions which had been tied up for years. I had witnessed several failures in this respect. Then I took our textbook, "Science and Health with Key to the Scriptures"

by Mary Baker Eddy, and read several passages from the chapter entitled "Footsteps of Truth," which begins on page 201. I clung steadfastly to the thought that God would show me the way. Without my worrying in the least or giving any further thought to the matter, the day passed. The following afternoon I received a larger sum than was required, and this from a source of which no one had thought, but where I had related the situation. I received further assistance from the same source, so that within a very short time the whole way had become clear and all difficulties had been adjusted. Through the guidance of divine Principle I had been shown the correct way, where all had been in readiness for me.

After my marriage new difficulties presented themselves, and it often seemed to me that I did not know which way to turn. During all these battles I trusted in God's guidance, and in Mrs. Eddy's explanations of the harmony of being I found strength. When I expected my baby Science and Health was my only reading matter. I was under great mental strain, and had to combat the general acute lack of food, but I was under the protection of Truth. I am unable to find adequate words with which to express how Christian Science gave me everything and was everything to me in this trying time. It was my food and my strength. In due time my child came into the world. He flourished rapidly and to-day he is a loving, thriving boy.

I am thankful to God for all the blessings which have come into my life, and I think with gratitude and joy of our Leader, Mrs. Eddy, who proved to us that "There is but one way to heaven, harmony, and Christ in divine Science shows us this way" (Science and Health, p. 242). I am grateful also to my dear friends who first acquainted me with this wonderful teaching, which brought this bright light into my life. I am constantly endeavoring to grasp the truth which Mrs. Eddy has revealed to us and to follow her example.

(Mrs.) CLARA MARTHA MÜLLER, Wiesbaden, Germany.

+

While waiting for a friend in the library of a downtown hotel recently, I noticed a *Christian Science Journal* on the table. Reading some of the testimonies brought back an instantaneous healing that came to me in that same room some time ago.

After a very busy day in the shops there seemed to be a sense of physical weariness, confusion, and headache. It was my intention to go home and return later to the Wednesday evening meeting, but I was unable to do so, and went to the hotel where I knew Christian Science literature could be had. After reading Science and Health for a few minutes, I opened to page 494 and my eyes fell upon these words: "It is not well to imagine that Jesus demonstrated the divine power to heal only for a select number or for a limited period of time, since to all mankind and in every hour, divine Love supplies all good." The realization of the truth of that statement brought instantaneous healing, the inharmonious condition was entirely met, and I went on my way rejoicing.

This is only one of many healings that have come to me through the teachings of Mrs. Eddy. The physical healings, beautiful as they are, seem small compared with the wonderful happiness, security, confidence, and joy that a better understanding of God brings. There have been many testing times, but the mantle of divine Love was always thrown about me, and Truth, the strong deliverer, protected and saved. I am beginning to realize that there is only one Father-Mother God, one Shepherd, and one flock.

(Mrs.) Frances Sauter, Boston, Massachusetts.

Signs of the Times

["Reconstruction"—The Christian Science Monitor, Boston, U.S. A., April 19, 1921]

Since the great war, the world has been going through a process of reconstruction and readjustment, and from even a cursory glance at world affairs, upheaval and disorder of many kinds seem to be present. This process is apparent in the unsettled business conditions and radical changes taking place in the government of the nations. There has been a thorough stirring up of evil, and its ways and hidden methods are constantly being uncovered and brought to light. Mrs. Eddy, the Discoverer and Founder of Christian Science, in speaking of healing in her article, "The Way," in "Miscellaneous Writings" (p. 355), and after stating that mortal mind would have to pass through three stages of growth, says: "First, self-knowledge. The physician must know himself and understand the mental state of his patient. Error found out is two-thirds destroyed, and the last third pierces itself, for the remainder only stimulates and gives scope to higher demonstration." So instead of becoming alarmed or depressed or fearing the tremendous upheaval that is seemingly taking place in the process of the readjustment of things, it should be a time of great rejoicing in knowing that error is uncovering itself and nearing its own destruction. All that is actually taking place is the unfoldment of God's infinite being, which is good and perfect. It gives every one an opportunity to prove that evil has no activity, no intelligence, and no power.

In the first chapter of Genesis it is stated: "And God saw every thing that he had made, and, behold, it was very good." In God's kingdom, then, no so-called reconstruction is necessary, since the entire universe, including man, is already created good. Nothing can be added to nor taken away from good, or Truth. This verity is for all to assimilate. In replacing every false sense of affairs with the truth about what God truly made and what He knows about His idea, the spiritual creation appears. Principle is all-knowing, and man cannot reflect more than Principle knows. God recognizes no evil, so man made in His image and likeness, good and perfect, can reflect no error. If God, good, were conscious for an instant of any evil whatever, He would not be infinite.

Scientifically speaking, the only reconstruction or reorganization taking place is the endless activity of Principle forever expressing limitless Mind. It is the modeling of men's thinking and actions after the pattern of divine consciousness according to "the pattern" that was shown "in the mount." It is the replacing of what the five physical senses claim to know with the spiritual fact of what really is. Mrs. Eddy says in "Science and Health with Key to the Scriptures" (p. 260): "The conceptions of mortal, erring thought must give way to the ideal of all that is perfect and eternal. Through many generations human beliefs will be attaining diviner conceptions, and the immortal and perfect model of God's creation will finally be seen as the only true conception of being." It is the privilege and should be the desire of every one to prove here and now the omnipotence and allness of Principle, the cause of man's being. Man and God are inseparable and forever one. It develops, then, that all that really needs reconstructing is our mortal sense of thinking and the human, erroneous judging of affairs. For surely, God, good, who is immutable, has not lapsed from good, and therefore is not in need of reconstruction. Divine Principle is forever unfolding its infinite idea perfect and wholly spiritual.

It is indeed a time for every one to demand of himself what Elisha requested of the woman when she inquired of him what should be done in her case, for she feared that the creditor would take her two sons to be bondmen, and he said: "Tell me, what hast thou in the house?" That is a searching question when applied to one's self: "What hast thou in the house?" What has each one stored up for himself in his thinking? Is it material and consequently temporal, or spiritual and everlasting? The time surely is right now for mortals to adjust their way of thinking to God's infinite plan, and to model their living after divine consciousness.

The vision of men must enlarge. Men and women are learning to serve instead of seeking petty, material fame, popularity, and power. After all, what do these will-o'-thewisps amount to? What gain or true happiness do they truly procure? Prosperity in material wealth, power, or place can never bring any one an iota nearer the kingdom of heaven. To quote again from Science and Health, Mrs. Eddy says (p. 248): "We must form perfect models in thought and look at them continually, or we shall never carve them out in grand and noble lives. Let unselfishness, goodness, mercy, justice, health, holiness, love—the kingdom of heaven-reign within us, and sin, disease, and death will diminish until they finally disappear." In serving Principle, God, and obeying His precepts, is the true work of the individual found. It matters not what form this activity assumes, lowly or great, provided that whatever is undertaken is done for the glory of God. A better sense of things is continually unfolding and the selfishness of mankind will give way, so that God's kingdom, of a certainty, will be made manifest in earth as well as in heaven.

As has so often been stated, man's work is to be about the Father's business. As the understanding of Principle, divine cause, unfolds and man is revealed as inseparable from this one and only cause, the fear, manifesting itself in affairs of business, home, or state, in the form of evil, sickness, or death, will be known for its nothingness and God's law will be seen to operate in all circumstances. Man's real work of reconstruction, then, is to model his thinking in accordance with divine Principle at all times. It is to know more of God, and man as the reflection of Mind. This spiritual understanding will heal the sick, revolutionize the world, and overcome all error. It may be necessary for mortal mind to receive many jolts and thorough shakings before it is willing to leave the false beliefs that are imbedded in matter and turn the whole of the way to Spirit. Nevertheless, even while this seeming process of reconstruction is going on, mankind can rejoice in the fact that God, divine consciousness, and its infinite idea, is all there is, and is right now perfect, whole, and complete.

[From "Religion and the Concept of Progress," by Clarence Marsh Case in The Journal of Religion]

The fact that "more eminent" psychologists discount more fully the belief in God and immortality may simply register the fact that eminence in psychology demands more and more a temperament and intellect which find their natural medium in quantitative measurement of physical phenomena rather than in the philosophical interpretation and evaluation of the less tangible and more elusive, yet even more significant aspects of human experience. . . .

This hypothesis is borne out by the well recognized fact that psychology has steadily drifted away from its original mother, which is philosophy and metaphysics, and has moved toward physics, biology, and physiology. An examination of the subjects developed in leading psychological monographs and articles for the last ten years will impress on any observer the astonishing preponderance of physical measurements, especially as applied to minute studies of the more strictly individualistic and materialistic aspects of the various sensations, perceptions, and higher intellectual processes. . . .

The significant suggestion from the situation seems to be that the supreme task of the present century will have to be the construction of a spiritual view of life, a task for which physical science, including most of current psychology, is entirely disqualified, but which will have to be the work of a truly *scientific* philosophy and metaphysics. The course of evolution has maneuvered mankind into an exceedingly dark blind alley in these later days.

[From "The Church and Science," by Sir Francis Beaman. in The Nineteenth Century and After]

Psychology, the Cinderella of the sciences, has of late been regarded as a possible common meeting ground, a No Man's Land between the old camps of physics and metaphysics, but closer scrutiny shows that all psychology which is popular to-day is misnamed. . . . Handled by orthodox biologists, physiologists, physicians, alienists, and pathologists, psychology soon comes to be founded on and exclusively referred to material mechanism and the interplay of its parts.

[From "What Is the Good of Knowledge?" by A. D. Ritchie in The Hibbert Journal]

However much counsels of despair and defiance of ineluctable fate may impress us for the moment, it never holds our imaginations for long. Cheerfulness keeps breaking in. The note of despair and defiance rings false when we listen carefully; it is hysterical and not sane. The City of Dreadful Night is a city of nightmare, and we are not its citizens in our waking hours. Why is this? If we honestly face the facts of this wearisome condition of humanity, we have to confess that so long as we keep within purely material and earthly bounds there is no logical escape from complete pessimism; and yet pessimism never really grips hold of any sane man's imagination; it never really convinces him. In spite of all appearances to the contrary, every man believes there is hope for humanity, somehow. There comes from somewhere a light to lighten our darkness. We may use the formulæ of religion and the name of God to speak about it; we may wrap it up in the obscurities of a metaphysical creed; or we may be as silent as the Pythagoreans: but it is there, whether we look for it or not. . . . If there is no avenue of experience besides the five senses of our bodies, then all is vanity, and the knowledge based on those five senses is the vanity of vanities.

[From The Nation, of New York City]

Mail brought in thirty-three and one-third hours from San Francisco to New York? It staggers the imagination, but there the fact is. Seven fifty-pound pouches of mail left San Francisco and arrived at Mineola, Long Island, New York, the next afternoon, being brought at an average speed of eighty-one miles an hour, including stops. Were we not a people dulled to the marvels of science, so extraordinary a feat must have thrilled the country. It was only a short time ago that the transcontinental pony express seemed to Americans an amazing achievement when it carried the mail from ocean to ocean within three weeks. Then came the seven-day trains, cut gradually to four and a half, and now the aeroplane in thirty-three

hours, which will indubitably soon be a round twenty-four hours. How remote now seems Jules Verne's hero who struggled across the continent by train, by balloon, by snow-boat, by horse, to accomplish his trip around the world in eighty days! The government is building or purchasing several great Zeppelins which are counted on to carry passengers from New York to San Francisco in a trifle over two days and one of them may be in service next summer—and this is after all but the beginning of the development of aviation.

[Our Dumb Animals, as Quoted in The Universalist Leader]

[The state of Washington] has been celebrated for its wild west shows. Bulldogging, steer roping, and other cruel sports have characterized these rodeos, or round-ups, as they are called. One has been planned for at Spokane for next July fourth. Governor Hart has just notified the people arranging this exhibition that the law relative to cruelty to animals must be rigidly enforced. The law of that state expressly forbids the causing of suffering to any animals for the purposes of amusement.

[From The Woman Citizen]

In Bombay, India, recently, at a meeting of the Bombay Municipal Corporation, a resolution was passed requesting the government to remove from the municipal act the sex bar placed against women, which disqualified them from becoming municipal councilors. Almost fifty women, Parsees, Hindus, and European, were present to listen to the debate, but the debating was of course done by men and the passing of the resolution was the act of men, and Indian men at that. The opening up of opportunity to Indian women may be nearer than occidentals have guessed. An argument of one of the speakers was: "What is the use of saying the country was out for democratic institutions if they themselves wanted to exclude women, who formed half the population, from participating in public affairs?"

Notice

SHORT TERM SUBSCRIPTION AND ORDER RATES

Attention is called to the new rates now in effect on short term-subscriptions for *The Christian Science Monitor*, Christian Science Sentinel, and The Christian Science Journal; also on single copies of the Sentinel and the Journal. These rates are stated in the advertisements found on the inside front cover page of the Sentinel and on page "iv" of the Journal.

Attention is also called to the rates scheduled below, now effective on all quantity orders for any one issue of any of the Christian Science periodicals:

Monitor\$.03	a	copy
Sentinel		"
Journal		"
Der Herold		"
Le Héraut		"
Quarterly		"

These rates are net and take the place of the former 10% discount on periodical orders.

The uniform retail price on the Sentinel is now 10 cents a copy, and on the Journal 35 cents a copy. The Monitor single copy price remains at 5 cents.

Discounts to reading rooms on subscriptions and on orders for general publications remain as before. 1

Church Notices

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,-The Mother Church,-printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to CHARLES E. JARVIS, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX .- The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

+ + + Announcements

From The Christian Science Publishing Society Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in The Christian Science Monitor, were run off at the time of their publication in the Monitor.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 81/4" x 103/4". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each. and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount. Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific . Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for The Christian Science Monitor, Journal, Sentinel. Quarterly, and Heralds, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and imme-

diate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

There will be placed on sale about June 20, 1921, six new pamphlets, containing articles reprinted from the Christian Science periodicals, as follows: "Government," "Employment," "Work and Play," "Progress," "Occupation." "Relationship." Orders for these pamphlets may be sent at once, to be filled on the date of issue. Price 5 cents a copy. Reading Room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S. A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S. A.

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUB-LISHING SOCIETY, Boston 17, U.S.A.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large Type (18-point) on Warren's heavy India Bible paper, bound in leather. Size 8 by 1034 inches. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCIT TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco. one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

German Translation. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good. Rudimental Divine Science, No and Yes. Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

Printed in the New York point, American Braille, and English

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

10c A COPY, \$3.00 A YEAR

ALADY-WITH-A-LAMP-SHALL STAND IN THE GREAT-HISTORY OF THE-LAND-

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY BOSTON USA

Christian Science Literature

"Science and Health with Key to the Scriptures" and all other published writings of Mary Baker Eddy are listed on the outside back cover page of this Sentinel.

The Christian Science Journal

Founded, 1883, by Mary Baker Eddy. This monthly magazine is an official organ of The First Church of Christ, Scientist, in Boston. Massachusetts. Contains articles, editorials, and testimonies of healing, a directory of Christian Science Churches, Societies, and Reading Rooms; also in the January, April, July, and October issues a list of Christian Science Practitioners and Nurses. Subscription price, payable in advance, postpaid to all countries: One year, \$3.00; six months, \$1.75; three months, \$1.00; single copy, 35 cents.

The Christian Science Quarterly

Founded, 1890, by Mary Baker Eddy. Published January, April, July, and October. Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size. Subscription price, payable in advance, postpaid, to all countries: One year, \$1.00; single copy, 25 cents.

Christian Science Sentinel

Established, 1898, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. Subscription price, payable in advance, postpaid, to all countries: One year, \$3.00; six months, \$1.75; three months, \$1.00; single copy, 10 cents.

Der Herold der Christian Science

Authorized, 1903, by Mary Baker Eddy. A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months, 50 cents; single copy, 20 cents.

Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months 50 cents; single copy, 20 cents.

The Christian Science Monitor

An International Daily Newspaper. Founded, 1908, by Mary Baker Eddy. Daily, except Sundays. Its own world-wide news service is supplemented by the service of the Associated Press and of the United Press Association. Complete in its departments; unique in its Home Forum page. Full page of editorials dealing truthfully and fearlessly with vital questions of the day. Subscription price, payable in advance, postpaid to all countries: One year, \$9.00; six months, \$5.00; three months, \$3.00; one month, \$1.10; single copy, 5 cents.

Subscriptions will begin with the next issue after the receipt of the order. Information regarding bound volumes of the weekly and monthly periodicals will be given upon request.

THE LIFE OF MARY BAKER EDDY—By Sibyl Wilbur, Cloth, \$2.50; edition de luxe, \$5.00.

EDITORIAL COMMENTS ON THE LIFE AND WORK OF MARY BAKER EDDY. Paper, 15 cents.

PERSONAL CONTAGION, also WHAT OUR LEADER SAYS—By Mary Baker Eddy. Special pampblet, 10 cents.

WHAT OUR LEADER SAYS—By Mary Baker Eddy. Vest pocket folder, 5 cents.

THE MOTHER CHURCH—By Joseph Armstrong. A history of the building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Illustrated. Cloth, \$1.50.

CHRISTIAN SCIENCE: ITS LEGAL STATUS-By Judge Clifford P. Smith. Paper, 15 cents.

LAW AND WORK for the blind. Printed in New York point, American Braille or English Braille, \$1.00.

SHEET MUSIC. Poems written by Mary Baker Eddy and used by special permission have been set to music as follows:

as follows:

"The Mother's Evening Prayer," 75 cents.

"Christ, My Refuge," 75 cents.

"Love," 50 cents.

Communion Hymn—"Saw Ye My Saviour?" (Johnson), 50 cents.

"Blest Christmas Morn," 37 cents.

"O'er Waiting Harpstrings of the Mind," 37 cents.

"Saw Ye my Saviour?" (Root), 37 cents.

The first three hymns are arranged for bigh and low voice in the same copy. The last five hymns are published separately in high and low keys. When ordering state key desired.

THE CHRISTIAN SCIENCE HYMNAT.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, \$1.15; half morocco, \$1.40; full morocco, \$4.50; levant, \$5.50; pocket edition, size 456x656, \$3.50.

pocket edition, size 45\$x65\$, \$3.50.

PHOTOGRAVURE OF MRS. EDDY, printed in three sizes on India paper and mounted on heavy plate paper rearly for framing, 8-inch (mount 12x16), \$1; 12-inch (mount 15x20), \$2; 16-inch (mount 21x29), \$3.50.

PICTURE OF THE FIRST CHURCH OF CHRIST, SCIENTIST, IN BOSTON, MASS, AND THE PUBLISHING HOUSE. Artist's proof with remarque on Japanese vellum, size 18x24 inches, \$5; on India paper without remarque, \$3.50. Smaller reproduction, size 11x14 inches, on Japanese vellum, \$1.25. Photogravure postcards of the Church Editice and Publishing House, 5 cents.

BIBLES, 01483x. Clarendon Brevier, heavy-faced disc

BIBLES. 01483x. Clarendon Brevier, heavy-faced, distinct type; Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, \$7.50.

01440x. Brevier, light-faced type, self-pronouncing, Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, \$7.25.

01683x. Large type Bible, 1034x8 inches, bound in Alaska seal. Specially adapted for use of second readers, \$16.50.

The improved index will be added to any Bible listed in our catalogue, excepting the vest pocket size, for an additional charge of 35 cents.

Price List of Bible Concordances and Dictionaries

of the English Language supplied on request.

Items such as leather covers for the Quarterly, and cases, either closed or open, for books, Sunday school supplies and other accessories, will be found in the current catalogue in The Christian Science Journal.

Government

HELEN ANDREWS NIXON

BECAUSE of unmistakable glimpses of the Science of being, the perception of an actual existence here and now of that which is nonexistent to mere bodily sense, Christian Scientists are Christian Scientists. Their spiritual perception takes in a perfect spiritual universe, including spiritual man under the sole government of perfect and eternal Mind. Thenceforth their sense of government, be it in state, church, or family, is based on this fixed revelation of Christian Science and they know that in the administration of any form of government neither human will nor reliance on material means can truly avail. Rather do they seek spiritual ways and means, which the contemplation of and devotion to the idea of God's government will surely furnish. This is by the law of reflection.

All Christian Scientists have proved that denying ungodliness and unqualifiedly and lovingly acknowledging the supreme government of God has brought spiritual illumination, patience, peace, wisdom, long-suffering, and love into their experience. The exercise of these qualities constitutes good will to all mankind and produces a confidence in divine Principle before which no fortress of error will finally prove impregnable. The Christian warrior's assurance rests on the spiritual fact that God, good, does indeed govern all, is All, and that what seems an assault is the illusion of evil, which, resisting to its utmost the advancing spiritual era, will vanish with the new birth of the best and greatest. As Mrs. Eddy says on page 10 of the Message for 1900: Evil is illusion, that after a fight vanisheth with the new birth of the greatest and best. Conflict and persecution are the truest signs that can be given of the greatness of a cause or of an individual, provided this warfare is honest and a world-imposed struggle. Such conflict never ends till unconquerable right is begun anew, and hath gained fresh energy and final victory." In other words, the divine law in forcing latent, hidden error to the surface into human view lays bare error's false foundation, even the lie which would present God as changeable and man as mortal. When viewed through the lens of Christian Science the persecution of a righteous cause is a true sign of the nearness of Truth and its spiritual activity manifest in error's tormented cry: "Let us alone." Unconquerable right will end the conflict in Truth's final victory.

Since individual man, as Mrs. Eddy teaches, is a unit and as important as multitudes in knowing and doing right, he must accept the responsibility of self-government. Through obedience he simultaneously discovers the government by divine Mind of all right ideas or units and the consequent falsity of the claim of evil that man dominates man and that mankind's interests are divided. Jesus' words, "The kingdom of God is within you," point to individual self-government. The revelation of God's government in Christian Science meets its response in this true inward

nature of man, hence the true activity is from the inward to the outward. This reasoning shows clearly that not through outward circumstance or influence is man governed, but rather through honestly and joyfully following his own upward individual conviction. Thereby to others is also willingly accorded their God-given right to self-government, and "to live and let live" becomes the natural, scientific rule of a life.

Prior to issuing the Church Manual our Leader, Mrs. Eddy, had embodied in the textbook of Christian Science, "Science and Health with Key to the Scriptures," six tenets of Christian Science. Had the moral and spiritual growth in the lives of Christian Scientists attained to the code of righteousness contained in these tenets, "laws of limitation for a Christian Scientist" would not have followed them. "Heaps upon heaps of praise confront me," she says in "The First Church of Christ, Scientist, and Miscellany" (p. 229), "and for what? That which I said in my heart would never be needed,-namely, laws of limitation for a Christian Scientist." To the writer the heart and soul of the Manual has always been the chapter on "Discipline," especially the first by-law of the chapter, which we needs must have read to us once a month. The defense of our cause can be maintained only through the utilization of the qualities of God, for in them alone is the divine government reflected.

In "Pulpit and Press" (p. 20) we read, "From first to last The Mother Church seemed type and shadow of the warfare between the flesh and Spirit, even that shadow whose substance is the divine Spirit, imperatively propelling the greatest moral, physical, civil, and religious reform ever known on earth." Christian Scientists understand that the material structure which men call The Mother Church is but the outward sign of our Leader's victory over the flesh; that the true Mother Church is the mental concept, the result brought forth by our Leader's understanding of God's omnipotent government, and that it is being sustained through her followers by loyal, steadfast obedience to the true idea of God's government and all that term includes.

Might not this recognized fact that The Mother Church is spiritually sustained indicate our Leader's ideal that The Mother Church, in its self-government, is intended to approach a theocracy? Church government in Christian Science branch churches has reached, or should have reached, the democratic stage. A monarchy is a state or people ruled over by one person. An oligarchy is a government by a small, exclusive class. A democracy is a form of government in which the supreme power is vested in the people collectively, and is administered by them or by officers appointed by them. Highest of all is a theocracy, defined in the dictionary as, "A form of government in which the Almighty is regarded as the sole sovereign, and the laws of the realm as divine commands rather than human ordinances." Does not our wise Leader imply that in its unique self-government The Mother Church is to be demonstrated a true democracy in which all depend together on God as the one governing power in the true theocracy?

Manna

THEOPHILUS ALLEN

[UMAN experiences are apparently similar throughout Hall human history. In emergence at any time from bondage to freedom, one encounters difficulties, and unless the search for liberty is founded upon right motives, mortals are apt to take backward glances and regret positions left for what seems uncertain and precarious in a forward movement. To-day, as in the past, mortals are just as apt to be grumbling and discontented in their wanderings through the wilderness of beliefs as were the children of Israel, crying out for the cucumbers, melons, and fleshpots of Egypt. Deliverance nevertheless is ever nigh. As Moses pointed out the omnipotence of Mind, and proved God's presence and power to the discontented children in the wilderness of Sin, and they received "the bread from heaven," so to-day the infinite supply of divine Principle is ever present and capable of proof by right apprehension and application.

The Scripture narrative in regard to the supply of manna is thus related in the book of Exodus. When the children of Israel beheld the strange white substance on the ground, they exclaimed, "What is this?" "for they wist not what it was." Unaware of the proper term for this strange gift, which had rained down from heaven, the wondering people cried out, "What is it?" There was nothing ambiguous in Moses' reply. It was direct and plain enough for all to comprehend. "This is the bread which the Lord hath given you to eat." Certain instructions followed as to how this food should be gathered, in a manner exactly suited to all. Full assurance was given of an ample provision for all, "every man according to his eating." The Sabbath supply had to be gathered the previous day with the promise of its freshness for sabbatical use; on any other day the attempt made to preserve a supply for the morrow would prove futile, as any surplus would be found unfit for use. It is plain that the clear and comprehensive directions given meant of necessity strict obedience to Mind and Mind's mandates. Here was Moses, proclaiming God's message, that the supply was always equal to the demand. The assimilation of the truth would clearly mean the elimination of all error. No one could assimilate more than the allotted daily portion. In the measure of his obedience he realized the sufficiency of his supply. It came as daily supply, not to be hoarded, but as positive proof of Mind's omnipotence and ever readiness to supply all needs each day.

It is not strange to find the same question voiced to-day. Men and women who in the midst of trials, in a wilderness teeming with human beliefs, turn to Christian Science, usually approach the subject with the same undetermined query, "What is it?" later to decide that the answer is just as directly given, and Christian Science is indeed "the bread of heaven." In the measure the fact is apprehended, that "bread of heaven" is the equivalent of "bread of life," in that ratio do we assimilate the truth of being. Christ Jesus in his ministry pointed out clearly to the Jews the distinction between the manna of the wilderness and the true bread from heaven, for it is recorded in the gospel according to John, "For the bread of God is he which cometh down from heaven, and giveth life unto the world." Christ Jesus sums up his whole discourse with the final statement, "It is the spirit that quickeneth; the flesh profiteth nothing: the words that I speak unto you, they are spirit, and they are life." The writer of the Apocalypse determines this fact when he refers to "the hidden manna," which the Spirit provides as sustenance "to him that overcometh."

When this question "What is it?" arises in the experience of the investigator in Christian Science, the hypothetical theorizing of the human mind must be laid aside. The backward look at matter should only be regarded in the light of a position outgrown, with no possibility of retrogression. In the realm of divine Mind all that exists is positive and real, and is, because of its infinite cause, the one and only consciousness-Spirit. It naturally follows that all who reason rightly, from spiritual existence, are maintaining this one fact in thought, "the thing which the Lord hath commanded," the demand to look forward, not backward. Marching forward toward the goal of Truth, human sense of limitation is lessened, in the expectation of the goal of spiritual attainment. Fear of lack and poverty are minimized in proportion to our grasp of the infinity of good, for the right sense of substance replaces scarcity, and plenty is manifested where famine seemed to be. The standard bearer of Truth carries abundant riches with him, for bearing in mind the allness of God, the Father which "giveth you the true bread from heaven," each individual learns that he is "taught of God," and receives the understanding of eternal life.

In a well-known hymn (Hymnal, No. 163) Josiah Conder voices humanity's needs: "Day by day the manna fell," and, "Take the manna of to-day," presenting in clear terms the wisdom of daily living as fashioned and molded to the divine will. The "manna of to-day" is steadfast obedience to divine Principle, patiently resisting all that is unlike good and putting into practice just what we know of Christian Science. We can demonstrate only that which we know, and as trust in divine Principle is actively practiced, we find our daily tasks appointed by Principle, with power to work out the spiritual in our experiences, by the complete abandonment of the material. When Principle gives the word, there is no need of hesitation, the opportunity for good is present. To grasp this as substance is to understand God or Mind to be the only true consciousness or intelligence, and man in His image and likeness as reflecting this intelligence. We go forward in this way with more of the Mind of the Christ and are on the alert, when material ways and means threaten, promptly to correct with spiritual understanding every human concept of conditions and things.

In our daily experiences sometimes the visibility on the horizon of our vision appears low, dimmed by the mists of belief, and shadows of doubt. Yet in this complex situation the testing time arrives, when, turning to divine Principle for guidance, the opportunity is presented to exercise more faith in God and find abiding safety in Him who is ever present Love. The employment of our faculties in working with divine Principle is always a cheering occupation. The persistent effort to keep the spiritual idea as our standard ever before us lights our path. Human will is conquered, as God's spiritual means are discerned and material methods are abandoned. Waiting on God we are receiving our full measure of daily food. The promise given to Moses is for all. "My presence shall go with thee, and I will give thee rest." Resting in the activity of Truth, we are confident of God's guidance through the wilderness, the desert becomes gladdened, our manna is daily supplied, rocks become fountains, waves and billows part and afford a safe passage, and moreover we are joyfully looking forward to the land of promise. On page 307 of "Miscellaneous Writings" Mrs. Eddy has very beautifully stated: "God gives you His spiritual ideas, and in turn, they give you daily supplies. Never ask for to-morrow: it is enough that

古书自即及告知其书的与法述:

divine Love is an ever-present help; and if you wait, never doubting, you will have all you need every moment. What a glorious inheritance is given to us through the understanding of omnipresent Love! More we cannot ask: more we do not want: more we cannot have. This sweet assurance is the 'Peace, be still' to all human fears, to suffering of every sort."

In the correctness of our understanding of God and man, and our insistence upon the infinity of God and His idea, we can as students of Christian Science prove the evidence of our manna and its sufficiency, by replacing the disturbing elements of human fear with confidence in the fact of

of our manna and its sufficiency, by replacing the disturbing elements of human fear with confidence in the fact of spiritual evidence, in implicit obedience to divine Principle, God and His idea. In the measure of our apprehension are we fed with "the hidden manna." The unfoldment of infinite activity is overcoming the material at every point and our daily sustenance is always the recognition of the quickening of Spirit. How true and emphatic are Mrs. Eddy's words on page vii of the Preface to Science and Health, "The only guarantee of obedience is a right apprehension of Him whom to know aright is Life eternal." Truly this is "the manna of to-day," "daily strength for daily needs."

"Without seam or rent"

JAMES B. MERRITT

THE habitual reader of the literature of Christian Science or the regular attendant on its services hears the omnipotence and the immanence of God so constantly reiterated and becomes so thoroughly familiar with the teaching, whether he puts the clear understanding of it into practice at all times or not, that he may sometimes forget that the vast majority of people in the world know little or nothing of a God who is Love, a God who, as the psalmist says, "forgiveth all thine iniquities; who healeth all thy diseases."

Since God is the Principle upon which the whole superstructure of spiritual understanding and therefore of real and harmonious existence is based, it is manifest that a better apprehension of the power, the wisdom, and the goodness of God as the great artificer of the universe and the preserver of everything that He has created in this spiritual universe must be attained by the thought of the world in general before world salvation and the true brotherhood of man can be consummated. This can be accomplished only by persistent knowing of the facts about God and man in His likeness, thought upon thought, word upon word, "line upon line, precept upon precept," wherever a vulnerable point may be found in the armor that mortal mind is ceaselessly shaping to shelter its hideous brood of false beliefs and counterfeit creations. The need is apparent, then, of understanding the truth, dwelling upon the perfection of God and the consequent perfection of His work, and pointing out His work in contradistinction to the spurious claims of human invention.

So much has been written on this subject that it may seem there is nothing more to be said, that further attempts at its exposition can only repeat what has gone before, but as a correct knowledge of God embraces an understanding of His spiritual creation including man, and its relation to Him, the subject is as exhaustless as the fountain of His love, as deep as the very wells of salvation. That which has been the theme of prophet and apostle from Moses to Paul, and of hundreds of other writers and teachers down through the succeeding centuries, whose inspiration was none the less genuine because they are not canonized by church councils or their writings recognized as Scriptural authority,

will continue to interest future generations so long as limitations of time and sense enthrall humanity and men seek for release from this bondage. Mary Baker Eddy writes in "Science and Health with Key to the Scriptures" (p. 323), "The true idea of God gives the true understanding of Life and Love, robs the grave of victory, takes away all sin and the delusion that there are other minds, and destroys mortality," and students of Christian Science are learning that nothing else can give this understanding.

The doleful experiences of the world might be expected to have long ago taught mankind that no surcease of sorrow, pain, sickness, or death is to be found in a mistaken and unscientific belief about God, but mortal mind is ignorant of its own limitations, ignorant of the fact that what it conceives to be the truth about God and man is a lie leading it on to its own destruction and that of its counterpart, the mortal material body. But mortal mind has no intelligence, no ability to learn anything. Neither can anything be learned from negatives only. Our mistakes and their consequences may show us that we are on the wrong track, but perceiving this, we shall still be in the wilderness and more hopelessly bewildered than ever if we do not find at the next fork of the road the guidepost of truth pointing us to the right way. So it is the duty of those who have found the true way in Christian Science to place guideposts of truth so effectively that whenever any weary and sin-sick traveler, scourged by the taskmasters of evil and ready to throw off its bondage, comes seeking the way to rest and harmony he will find one close at hand. He will find the aid that he needs, the guidance to the understanding of himself and his oneness with the loving Father whom, perhaps, he has before regarded with fear and dread as standing ready to punish the least infraction of some cruel and unjust law, instead of as infinite good, ever present as law to save and bless.

Any human being with the capacity to do any thinking whatever holds a belief in some creative power higher than himself, in other words, in a God. The very fact of his belief in his own existence compels him to account in some manner for that existence, and in spite of his attempts to trace being to a material cause he has never been able to find in matter life or anything that will produce or support life. His material body cannot hold even his human sense of life when mortal mind agrees to the dissolution. How important, therefore, that the thought which has come to this point should find ready and waiting it the true and simple rule for the solution of the problem. Our beloved Leader, Mary Baker Eddy, has worked out anew for the world the problem of being, according to the rules laid down by the great Teacher of Galilee, and has demonstrated the way so plainly that no seeker who is sincere can fail to understand it.

If we would follow our Leader as she followed the Christ, we must make use of the means she established to disseminate a knowledge of the truth she taught and practiced. Her priceless writings, the church services, the reading rooms, the lectures, the periodicals, are all coordinate parts of her plan, each equally important in its place in that plan. Failure on our part to recognize and uphold any of the agencies that constitute this complete whole cannot but reflect upon the wisdom of the Founder of it. In her every thought and act in the demonstration of what she has named Christian Science, and in providing the means by which her teachings should be perpetuated and disseminated, she followed faithfully and consistently the leadings of Truth as practiced and taught by Christ Jesus, and we as her fol-

lowers certainly cannot do less than maintain and support in its entirety, without seam or rent, what she refers to on page 242 of Science and Health as "the Christly garment of righteousness." The entire passage reads: "The divine Science of man is woven into one web of consistency without seam or rent. Mere speculation or superstition appropriates no part of the divine vesture, while inspiration restores every part of the Christly garment of righteousness."

The keystone of the spiritual temple which it was our Leader's life work to build, all will agree is "Science and Health with Key to the Scriptures," which must be regarded in conjunction with the great corner stone of the structure, the Bible. Like the angels of Scripture, each of the other stones in the temple has its office, and the periodicals certainly were meant by their Founder to be the means for bringing the truth to many who would not find their way into a Christian Science service or even into a reading room. They are Truth's messengers, and as they go forth to the remotest corners of the earth the message they carry must be of love and peace and harmony, heralding the goodness of God and the fellowship of man. God speed the day when all who name the name of Christian Science will demonstrate the brotherhood of man in their own thought and among themselves and never again take in vain the name of God, His Christ, or of her who has voiced their fullness to such as will hear.

No Failure in Mind

MABEL BLANCH

To many of us the Bible was a sealed book before it was read in conjunction with the textbook of Christian Science, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, but to-day thousands are able to share in the treasure which has been waiting to be given to the world for generations. It is true that many men and women have toiled long to recapture the spirit of Christianity which was evident in the world for three hundred years after the crucifixion, but not until Mrs. Eddy found the truth which was to rend asunder the veil covering the teachings of our Master was humanity able to appreciate to the full the vast storehouse made available to every individual through the teachings of Christ Jesus.

One of the things which an earnest study of the Bible teaches us, however, is that we are not to keep this treasure to ourselves. The gospels are full of the commands and promises given by Jesus to his disciples and to as many as believe on his word. Could anything be more imperative or emphatic than that uttered to the eleven on the occasion of his appearance after the three days spent in the tomb, "Go ye into all the world, and preach the gospel to every creature"? This can be done by each one of us in so far as we are faithful to Jesus' teachings and strive to overcome the "old man" in ourselves. To many of us, perhaps, this may seem at first to be a hard task, especially when error tries to have us believe that we are not progressing toward the goal of Spirit, when we have to take, sometimes, many halting footsteps, but here again we can turn to the Bible for guidance and read what Jesus says on the subject of apparent failure. It is recorded in the seventeenth chapter of Matthew's gospel that a certain man brought his son to Jesus for healing, with the words, "And I brought him to thy disciples, and they could not cure him." When the boy had received his health the disciples questioned their Master as to their failure: "Why could not we cast him out?" to which Jesus made this memorable reply, a reply which

was to indicate for all ages how to combat the erroneous claim of lack of understanding: "Because of your unbelief: for verily I say unto you, If ye have faith as a grain of mustard seed, ye shall say unto this mountain, Remove hence to yonder place; and it shall remove; and nothing shall be impossible unto you."

Let us consider that last clause, "And nothing shall be impossible unto you." What is it, then, that tries to convince us sometimes that we are not progressing so rapidly as we would like, or that we are unable to put into practice Jesus' command and take the good tidings to others? Jesus told his disciples that it was their unbelief—and is not this the reason with all of us? It is our inaptitude to know that the truth is available here and now in the same degree for all. Because the problems which we have to confront are seemingly a little bigger as we progress toward Truth, we may begin to listen to the voice of error which says, "You have not enough understanding to deal with this problem," or, "It is more difficult than others and will therefore take longer to heal," not discerning that this temptation must be grappled with as definitely as the problem. It is on these occasions that we shall derive great help from the study of our Leader's words on page 183 of "Miscellaneous Writings," where she states: "Man is God's image and likeness; whatever is possible to God, is possible to man as God's reflection. Through the transparency of Science we learn this, and receive it: learn that man can fulfil the Scriptures in every instance; that if he open his mouth it shall be filled-not by reason of the schools, or learning, but by the natural ability, that reflection already has bestowed on him, to give utterance to Truth." There can be no failure in Mind, and when error would fain have us believe that we have suffered defeat, then is the time to obey the injunction on page 393 of Science and Health: "Rise in the strength of Spirit to resist all that is unlike good." For us to admit that we are unable to overcome any discordant condition is the greatest error of all, for we are then submitting to the claim that man lacks understanding, we are forgetting that God gave man dominion over all things.

It is reported that when the Allied troops suffered reverses in the great war, they fought all the more doggedly and refused to give one inch of ground to the enemy. So should it be with us. We should seek the help of divine Love all the more persistently, and all the more courageously refuse to listen to the tempter so that we can eventually use that seeming reversal as a means to overcoming more error for ourselves, and therefore for the whole world. To all who have to pass through such an experience, the occasion of Peter's denial of the Christ, and his recovery, affords a valuable help, and it is possible for each one, with the aid of Science and Health, to learn the lesson contained therein for us all.

In the gospel according to Luke we read how on three occasions Peter denied that he had had any connection with Jesus, and, in the two verses which end this temptation, we can understand the despair with which Peter must have felt himself enveloped: "And the Lord turned, and looked upon Peter. And Peter remembered the word of the Lord, how he had said unto him, Before the cock crow, thou shalt deny me thrice. And Peter went out, and wept bitterly." But do we read that Peter ceased to be a disciple of Christ, or that he gave way to that despair and let it conquer him? Are we told that he felt that never again would he be able to preach the gospel, that gospel which his beloved Master had been expounding to him and the other disciples for

three years? No! Neither are we told that Jesus treated him as if he had failed, for John records that when Jesus had partaken of the morning meal eaten with the eleven, he asked Peter three times if he loved him and as many times gave Peter a command: "Feed my lambs," and, "Feed my sheep."

Jesus knew, as also did Peter, that the circumstance of the denial was an error which had to be destroyed, that it had no power to overcome the man of God's creating. Peter understood that he had the power to prove all that his Master had taught him and that he could make a stepping-stone of this apparent failure by showing a higher and more glorified discipleship. That he accomplished this is evidenced from his own epistles and all that is recorded of him in The Acts of the Apostles. When we think of Peter's bitter experience, added significance is attached to the words in his first epistle, "Beloved, think it not strange concerning the fiery trial which is to try you, as though some strange thing happened unto you: but rejoice, inasmuch as ye are partakers of Christ's sufferings; that, when his glory shall be revealed, ye may be glad also with exceeding joy." Let us all, then, rejoice when trials beset us and tread the upward path with a glad confidence that the claims of error come to us only to be destroyed, to give each one the opportunity of proving again and again the allness of God. Like Peter we must obey the command, "Feed my sheep."

Weather

WANDA WHITMAN

THE general opinion is that nothing has been done about 1 the weather because nothing can be done about it. It is true enough that very little has been accomplished, in the sense that there are few instances in which a record has been made of man's dominion in this respect. It happens, however, that those few instances are of the greatest importance, for they occur in the Scriptures, and stand, therefore, as object lessons to all who accept the truths of the Bible. Both in the Old and in the New Testament are examples of control of the weather by man working in harmony with Principle. In the eighteenth chapter of I Kings there is the familiar instance of Elijah's rewarded faith, when his servant's seventh observation brought the report, "There ariseth a little cloud out of the sea, like a man's hand." In this case "there was a great rain," because rain was needed. In the New Testament we have the supreme example in an opposite case, when Jesus stilled the tempest and "there was a great calm." Here it is recorded in almost identical phrase by Matthew, Mark, and Luke that "the men marvelled, saying, What manner of man is this, that even the winds and the sea obey him!"

The astonishment of these men was without cause, since, as Mrs. Eddy writes on page 134 of Science and Health, "A miracle fulfils God's law, but does not violate that law." It will be seen that we have the best of examples not for discussing the weather in terms of fear, as did those in the ship, nor even for complaint, but for invoking God's law of harmony regarding it. Thus we realize that a subject considered worthy of so much discussion should have occasioned more action. One difficulty has always been, of course, the belief that all weather, good or bad, comes directly from God. Destructive storms, lightning, and tempests are still termed in legal phraseology "acts of God." In support of this belief orthodoxy was apt to quote the Scripture, "He maketh his sun to rise on the evil and on the good, and sendeth rain on the just and on the unjust," quite overlooking the fact that both sun and rain here typify the unfailing mercies of divine Love in comparison with the frail judgments of man.

Modern so-called science naturally does not share the view of a manlike God who capriciously assigns rain and drouth, heat and cold. Material knowledge substitutes for this idea of Deity laws of physics just as arbitrary and wholly uninfluenced by Mind. This substitute belief is no better in its results. Weather bureaus, after much labor, are able to predict with some accuracy what weather we may expect for a very short time ahead, but beyond wholly negligible experiments with the use of explosives in producing rainfall, material science, like orthodox theology, has effected nothing in the way of controlling the weather.

There is no discordant condition in the world for which the power of Truth as revealed in Christian Science is not available. Here, too, then, is a phase of existence to which it can well be applied. It is not merely a matter of mud and umbrellas when it rains, or of fans and ice during excessive heat. There are acute destructive phases of storm; there is the constant belief that crops are affected by freezing or drouth or moisture, so that local, national, or even world prosperity may depend upon the variations of heat and rainfall. It is clearly time for mankind to realize that in this, as in all other things which seem to affect daily living, the weather is a product of mortal thought.

In this regard an important fact to remember is that the strength of right thought lies not in number but in rightness. The effort of one person in any community, therefore, who thinks in accordance with Principle in this matter is sufficient to bring about harmony. Mrs. Eddy says in "Pulpit and Press" (p. 4): "You have simply to preserve a scientific, positive sense of unity with your divine source, and daily demonstrate this. Then you will find that one is as important a factor as duodecillions in being and doing right, and thus demonstrating deific Principle. A dewdrop reflects the sun. Each of Christ's little ones reflects the infinite One. and therefore is the seer's declaration true, that 'one on

God's side is a majority."

Thinking rightly about the weather obviously does not mean outlining for the benefit of personal desires. If a country needs rain, it is worse than useiess to seek to avert it because one prefers sunshine, though it may be entirely right to realize that the needed moisture may be supplied without accompaniments of destructive lightning and wind. At all times, however, it must be understood that no matter what the weather may be, man is never subject to it, and barometric variations can never interfere with right activity. Dominion over any material condition comes after, not before, we have freed ourselves from fear of it and belief in its reality. It is reasonable to suppose that a cessation of complaining talk and adverse thought about the weather would alone bring about great improvement. Such complaint could readily be dispensed with as a topic of conversation, as could pessimistic prophecies about "the face of the sky."

Another trouble is that with its usual inconsistency the carnal so-called mind is disposed to quarrel at times even with what it regards as good fortune. Thus this mind often speaks slightingly of the uncertainties of what in other moments it regards as one of the delights of the year, "spring weather." If weather is worth thinking about for a moment, it is worth thinking about rightly. Such thought cannot fail to bring results in accordance with the Love which is, in the words of Isaiah, "a refuge from the storm, a shadow from the heat, when the blast of the terrible ones is as a storm against the wall."

Peace

THE world's idea of peace is too often a mere sensuous rest. At the best, it may probably be said to represent some form or another of ease in the senses. This is because the ordinary man, believing intensely in the reality of matter, naturally measures everything by a material standard. That was the cry of the demoniac among the tombs, "Art thou come hither to torment us before the time?" The demoniac, like the owners of the swine, wanted peace in the name of the material senses. But he, like most other people who seek peace on such a basis, sooner or later awakens, like Abou Ben Adhem, to discover that such peace is a dream.

There is no such idea of peace to be found in the pages of the Bible. Peace there is always the result of spiritual understanding. Christ Jesus explained this, with marvelous emphasis, on his way to Gethsemane. "Peace I leave with you," he said to his disciples, "my peace I give unto you: not as the world giveth, give I unto you. Let not your heart be troubled, neither let it be afraid." What he meant, surely, was that the world's idea of peace was a false idea, and that the peace he was offering was not peace as the world gives it. If his disciples were not to wake up to discover their peace to be a dream, they would have to find his peace, in the only place in which it could not be destroyed, in spiritual realization. The peace Jesus had offered them had been perilously near what the world would have termed war. It was, indeed, war with themselves. It meant the daily struggle with their own carnality, the destruction of which alone could bring them the spiritual perception which constitutes the peace of God which passeth all understanding.

In Jesus' company, under his guidance, they had gone out to fight the world, the flesh, and the devil. He had taken from them their homes, and sent them to fight the world without money in their purses. He had subjected them to all the passions of orthodox anger and contempt, and before he left them finally he was to tell them that the preaching of the gospel was to endanger their very lives. No wonder that, on another occasion, he had told them that he came not to bring peace but a sword, and to show the world that a man's foes would be those of his own household. The sword of the Spirit could produce nothing but war to the human senses. Its only use could be to destroy all that was sensuous and material in the human consciousness. This was the peace, unlike the peace of the world, which Jesus had given to the disciples. And yet only as the holy war was fought, and sensuality overcome, could the individual hope to gain that spiritual peace which can never

Yet Christ Jesus was the way, and he declared that all who climbed up into the sheepfold, and found safety there, would have to climb in his footsteps. It is useless for anybody to imagine he can find spiritual peace whilst attaining the lusts of the flesh. The peace of this world is beset

with danger upon every side, and if a man's peace can be upset, it proves that he has not reached the place where he understands what peace really means. The man, on the other hand, who really does understand how peace is attained, can find peace though the world about him is experiencing hell. This was what Mrs. Eddy was referring to when, on page 96 of Science and Health, she wrote, "This material world is even now becoming the arena for conflicting forces. On one side there will be discord and dismay; on the other side there will be Science and peace." As Isaiah very clearly saw, the sword of the Spirit, from the point of view of the material senses, creates evil. Therefore he wrote, "I form the light, and create darkness: I make peace, and create evil: I the Lord do all these things." Any person with any metaphysical knowledge is aware that infinite good knows nothing of evil, therefore Isaiah did not mean that peace created war. What he did mean was that a clear understanding of spiritual Truth, in surroundings sufficiently material, would produce a chemicalization which was nothing short of war. For, as Mrs. Eddy writes, on page 401 of Science and Health, "What I term chemicalization is the upheaval produced when immortal Truth is destroying erroneous mortal belief. Mental chemicalization brings sin and sickness to the surface, forcing impurities to pass away, as is the case with a fermenting fluid."

There is absolutely no hope of any material individual escaping this conflict with the senses. The question is how much or how little he is going to suffer during its continuation. The answer lies entirely with himself. Every time he says a good word for materiality, it is because he is thinking well of matter, and so is establishing it more firmly in his own consciousness. Yet, before he can experience spiritual peace, this materiality must be destroyed, and the strength of its hold upon him may be gathered by its ability to destroy his peace. Suffering is not caused by Spirit, but by resistance to Spirit. The man whose peace can be taken from him can calculate, not inaccurately, the hold of materiality upon him. There is no satisfaction to be got from pointing out that Jesus suffered from the sins of the world. Jesus suffered for the sins of the world, because he was without sin himself. Therefore the suffering he endured was entirely different from any suffering induced by personal sin. Peace, Paul told the Galatians, is a fruit of the Spirit, and it will be permanent or fitful just in the proportion in which the individual walks steadfastly in the footsteps of the Christ, or allows himself to stray from them.

The whole question to the individual is an intensely practical one. Every day and every hour of his material existence, he enjoys the opportunity of testing his hold upon Truth by a sense of the peace which surrounds him. To what degree this sense of peace may rest in the senses he is perfectly well able to judge by the hold of the senses upon him, just as he is perfectly able to tell when this peace is the fruit of the Spirit. All this Jesus was saying, all the time, to his disciples, and that was why he could say to them, "Let not your heart be troubled, neither let it be afraid." He knew perfectly well that fear was the very first symptom of materiality, and that a man's heart was troubled just in the proportion in which he let material things weigh in the balance with him. The way out of fear, then, the way to avoid trouble, is to deny determinedly the lusts of the flesh, and strive to let that Mind be in you which was also in Christ Jesus. It is this, and this alone, which can produce the peace of God which passeth all human understanding. FREDERICK DIXON.

10-17

With Cleanness of Heart

WHAT a man rightly desires above all else, that he must work for until he proves that it is his. If, then, one has not seemed to find all the healing he had hoped for through Christian Science, his need is to set to work more than ever with the real spirit of prayer that shows itself in sincere desire and steadfast right living. Even when a man says to others that he does not see why he has not yet been healed, because he has done his best in Christian Science and is guilty of no serious faults, he knows within his heart that he could do still better if he were really to practice being perfect, even as the Father which is in heaven is perfect. Each one must be fully honest with himself in order to prove the fullness of healing in Christian Science. As Mrs. Eddy says on page 8 of Science and Health, "We confess to having a very wicked heart and ask that it may be laid bare before us, but do we not already know more of this heart than we are willing to have our neighbor see?"

"Create in me a clean heart, O God; and renew a right spirit within me," is the sincere prayer of many a man or woman who seems bound and depressed by some belief in matter. The very asking thus for cleanness of purpose and effort must be, at the same time, in order to succeed, a humble knowing that there is the one supreme Mind at hand to rely on. In Christian Science the student must seek simply the source of all real good, whether to himself he phrases the turning to God in the form of a prayer of asking or a prayer of knowing. The prayer of asking may well be a start, for it may be the only way of seeking that the troubled one is aware of. Yet he who asks rightly always receives rightly, and proceeds to find out how to know the truth with perfect sureness, for the sincere desire for the cleanness which is wholeness of Spirit, not matter, is what counts. A man could not even really ask goodness of God without knowing in some measure that there is indeed God to ask it of, and the instant one accepts this basic fact, and to the extent that he accepts it, he finds the goodness of the divine Mind and its idea taking the place of the evil of human beliefs.

A prayer of the Navajo Indians that has lately been published phrases something of the same sincere desire that we find expressed in the Psalms. "Lord of the Mountain," it begins, and then goes on,

Hear a young man's prayer!
Hear a prayer for cleanness.
Keeper of the strong rain,
Drumming on the mountain;
Lord of the small rain,
That restores the earth in newness;
Keeper of the clean rain,
Hear a prayer for wholeness.

The poetic figure of the rain, used to mean the cleansing action that comes from the divine source alone, appears likewise in many passages in the Bible. By rain or dew from heaven, the Scriptures often show how sure in effect is the actual baptism of Spirit, for the cleansing action of Truth can never be void but always succeeds in taking the place of any form of error. The right desire, which is pureness of heart, is the yearning for the wholeness of Spirit, divine Mind, with all the free order of true living, and in Mind, not matter, this yearning is fulfilled.

On page 185 of "Miscellaneous Writings" Mrs. Eddy says: "None but the pure in heart shall see God,—shall be able to discern fully and demonstrate fairly the divine Principle of Christian Science. The will of God, or power of Spirit, is made manifest as Truth, and through righteous-

ness,—not as or through matter,—and it strips matter of all claims, abilities or disabilities, pains or pleasures. Self-renunciation of all that constitutes a so-called material man, and the acknowledgment and achievement of his spiritual identity as the child of God, is Science that opens the very flood-gates of heaven; whence good flows into every avenue of being, cleansing mortals of all uncleanness, destroying all suffering, and demonstrating the true image and likeness." The cleansing process, which is the wholeness of the one Mind and its action taking the place of the seeming limits and defects of human living and doing, goes on for each one who seeks the true cause of being with all his heart.

For man to rely on God wholly is, of course, far more than for a person merely to seek Truth in any human sense. In fact the real man, quite apart from any human seeming, does rely on the one Mind with all his heart, and in all his living shows forth the motive power of Spirit, not matter. Really, the divine Mind always maintains right, whole, and clean action as the truth of man, and sooner or later every false sense of things, every false belief calling itself wrong desire, every claim of disease or mortal limits of any sort, must give way to this truth. Since this is so, there is no reason for delay; now is the time for healing. The cleanness of motive and effort which finds the true healing is God-given now, in that the one Mind, divine Love, is ever expressed as pure action. It is a joy for each one to prove in his daily practice that the idea in Mind is now, and always has been, untouched by any false desire, any sense of pretense and sham. No matter what may have seemed to suggest itself as real, whether disease or lack or any belief in matter, the turning now to the divine goodness avails to annul what really always has been nothing. Thus each one can learn and rejoice in the truth that God does indeed give cleanness of heart instead of any dream of pleasure or pain in matter, for to-day, as always, the Christ, the idea in Mind that is ever active to bless, is healing with the word of divine Love: "Now ye are clean through the word which I have spoken unto you." GUSTAVUS S. PAINE.

[Written for the Sentinel]

Rest

MARY BLOMFIELD

And what of rest—
Whence is it?
In the secret place of the Most High,
In the quiet of unsoiled humility,
Recognitive of the inner peace
That lieth foursquare
Where that which comes and goes
Disturbs it not,
There true peace is found,
Asking not nor seeking,
But quiescent unto eternal things.

Within are treasures of effulgent light
By that light revealed,
Emanating from the hidden mine
Whence wisdom and perpetual beauty shine.
Aye, deep in consciousness there glows
A living flame.
Its being none may question;
Its habitat always the same
Forever is free born.
And when the clamor dies
Which through the senses seems to rise,
Its pure and perfect light shines forth,
Restfully proclaiming
Man's true birth.

Testimonies of Healing

About sixteen years ago, after a search of several years for a satisfactory explanation of life and a way of solving its apparently many inharmonious conditions, I had become confronted with problems which I knew would require more than human means to solve. Periods of mental depression from which I had been suffering for some time were becoming more intense and more frequent, a growing habit in the use of alcohol filled me with dread of the future, and astigmatism and indigestion had become trouble-some fetters, although the latter seemed insignificant when compared with the mental problems, as I found later that the physical discord was but the effect of the mental state.

Many genuine attempts had been made to obtain the needed help from religious denominations, but with no lasting benefit. Specialists in materia medica were tried, and also various philosophies which seemed promising, but nothing was found sufficiently substantial with which to meet the conditions in their persistent expression of discord. One evening, when it seemed as though the entire brood of human fears and passions had passed my power of resistance, I suddenly came face to face with the terrible conviction that everything worth trying had been tried and had failed.

That "man's extremity is God's opportunity" was again demonstrated, for as a last resort I turned to God in prayer. Thinking that I had no faith in God, prayer at first seemed very difficult, but gradually it came clearly to me that good is power and that if I could become conscious of enough good, it would outweigh the evil tendencies; that I must desire good and persist in the desire. Then came to me an indefinite but comforting hope that there was a form of good applicable to my case and that if I earnestly desired and sought for it, I would find it.

Several days later, having decided to visit a near-by city, with the hope of finding employment, I met a Christian Science practitioner at the railway station. The instant I saw her coming toward the station, I associated her expression with this new hope which I had been striving to entertain; and a few moments later, during a conversation on the train, the healing truth of Christian Science had dawned upon me. Vital questions were answered with such wisdom and love that the dark illusions of mortal bondage began at once to pass out of my thought, and by the time we had reached our destination there was nothing left for me to doubt as to the absolute truth of the statements made, and nothing comparable with the wonder of them. Mental depression and the desire for alcohol and tobacco were instantly and completely healed, when it was revealed to me that the only Mind is good, that evil is not Mind, and that man is really the image and likeness of God, good. A few days later the right position came to me, glasses were dispensed with, stomach trouble was healed, and a wholesome, progressive activity established.

Since that time, Christian Science has been my daily help and guide and though long periods of earnest striving have been required for the overcoming of some of the subtler phases of error, and at times stern lessons had to be learned from the failure to follow the leadings of Principle, still I am finding all experiences in the light of spiritual understanding to be steadily leading me on to higher demonstrations of the omnipresence of divine Love, to greater helpfulness, happiness, and harmony.

I thank God for the blessings that have come to the

world through the teachings of Christ Jesus, and for the life work of our revered Leader, Mary Baker Eddy, through whose inspiration, obedience, and unselfed love, has come the revelation of the Christ, Truth, in Christian Science.

J. Donald Hinds, New York, New York.

4

With heartfelt gratitude I give my testimony of healings received through Christian Science. Since my sixteenth year I was greatly troubled with constipation. In spite of the various material remedies used, as well as treatment from several physicians, including specialists, the condition became more serious, and I was to submit to an operation. The thought of this completely robbed me of my courage, and during these desperate days a dear acquaintance who had received blessings through Christian Science called my attention to and guided me in this teach-The first visit to a Wednesday evening meeting left the impression that here I had found the right physician, and a few days of diligent study of "Science and Health with Key to the Scriptures" by Mrs. Eddy, as well as of several copies of Der Herold der Christian Science, brought about a change in my condition. The much dreaded operation did not have to be undergone, and within a short time all my organs functioned properly. Six years have elapsed since this healing. During this time I have not resorted to medical aid; also all ills which have presented themselves in our family have been invariably taken care of without material aid, through the knowledge of God's omnipotence, as taught by Christ Jesus.

I am most grateful for these proofs of God's omnipotence and help, and hope that this testimony may lead many others to this divine teaching. I can now thank God understandingly and rightly for the blessings of life, truth, and love, and am also very grateful to our dear Leader, Mrs. Eddy, for giving us this wonderful truth, which when understood and rightly applied brings freedom to all.— (Mrs.) HILDA MATTER-HOSTETTLER, Winterthur, Switzerland.

I am able to vouch for my wife's testimony, for I did not know the meaning of health and harmony before Christian Science came into our home. I, too, have received many healings through Christian Science during the last few years.—Adolf Matter-Hostettler.

4

I wish to express my gratitude for Christian Science, for through the understanding of this truth I have experienced many beautiful healings, some of them being the healing of sorrow, of burns, and of the results of accidents. Through the realization of what man's real strength is and the source of it I was instantaneously healed of an injury to the spine. I am most grateful for Mrs. Eddy's writings, for through the study of these I have learned to love the Bible. I am also grateful for the Christian Science literature, so full of inspiration and timely help.—(Mrs.) Marie Thomas Espeset, Los Angeles, California.

I wish to express my gratitude for what Christian Science has done and is still doing for me. When I was but a small child I was considered delicate, and as I grew to womanhood I became even more so, until my only hope was a critical operation. Arrangements were being made to take me to the hospital, when an aunt who was interested in Christian Science asked me to give Christian Science a trial before submitting to an operation. I took her advice

[758]

·

and, through the aid of a Christian Science practitioner, in one week's time I was so much better than I had been for years that I decided not to go to the hospital and to continue Christian Science treatment. In less than three months I was well for the first time in my life. I have never had any return of my past illness and have depended entirely on Christian Science since that time, which was several years ago.

My trouble was organic; and I also suffered from indigestion, throat trouble, and defective eyes. From the time I was quite a small child my eyes were very weak and I had to wear glasses. They were healed instantaneously with the first treatment. I am especially grateful to our revered Leader, Mary Baker Eddy, for revealing the truth to us, for all the Christian Science literature, including the periodicals, which have meant so much to me.

(Mrs.) CLARA E. SULLIVAN, Omaha, Nebraska.

4

When Christian Science found me it seemed as though I was the most discordant mortal on earth. I had suffered from rheumatism for ten years and could scarcely walk, also from a difficulty with my back which had resulted in intense pain for ten years, and stomach trouble for which the doctor said there was no cure. Just through reading the textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, I was healed of the stomach trouble in one night. Rheumatism disappeared gradually and was all gone in about two weeks. I had several bad habits, such as drinking, swearing, and tobacco using, all of which have disappeared. Now I am trying to show my love and thankfulness to God, and gratitude to Christ Jesus, and to Mrs. Eddy for the knowledge I have gained through reading the Bible and Science and Health and Mrs. Eddy's other writings.

W. P. HANCOCK, Florida City, Florida.

٠

I wish to express my gratitude for God's love and protection at all times. I have been restored to health after twenty-one years of sickness, most of which time I was under doctors' treatment or taking medicine. I underwent several operations, and then went into a decline and was finally pronounced an invalid for as long as I might live. It seemed that only will power kept me alive during all those years of suffering despite the kind efforts of physicians who tried to the best of their ability to relieve the conditions. I had never heard of Christian Science until a dear sister decided to take up the study and asked me to take it up with her. Through the efforts of the kind and loving practitioner and friends to whom we were guided. I seemingly gained the right understanding, for my faith was as a little child's, ready for the truth which makes us free, and I was healed, one claim after another dissolving into its native nothingness. For all this I am indeed grateful, and for the many trials and claims that I have had to meet and have risen above since that time I am also grateful; they have all been opportunities to prove God's love and care, through which I have gained an understanding of Him. While some experiences seemed very hard and I became disheartened at times, I always received the needed help from a dear friend or practitioner, or from an article in our literature, which lifted my thought above the material evidence, and I would see light.

For all these blessings I am indeed grateful, and for the spiritual uplift gained through the study of "Science and Health with Key to the Scriptures" by Mrs. Eddy I cannot

fully express in words my gratitude but can only try to live it and express it in deeds. I hope this testimony may help some one coming through deep waters to know that God is ever present Love, an ever present help in time of trouble.

(Mrs.) JENNIE BATTEN, Philadelphia, Pennsylvania.

4

Several years ago I was taken to the hospital on account of a broken limb resulting from a fall, and I remained there over three months. As my improvement was very slow I became very much discouraged and despondent. Smiles and gifts of friends had no power to lift this feeling of discouragement. Previously I had no understanding of Christian Science. I had heard many adverse criticisms of it and also some rumors of good concerning its practice; yet I was not sufficiently awakened to study it for myself. One day a friend, a Christian Scientist, brought me some extracts from Christian Science literature and some Christian Science pamphlets. I was faithful in reading all that she gave to me and in a short time the clouds of despondency vanished and I was again cheerful, happy, and hopeful, realizing I had nothing to fear, for God in His great love would take care of me. I have not had that feeling of discouragement and despondency since. I read Christian Science literature every day during the remainder of my stay in the hospital, and have had many wonderful proofs of God's protection and care. Through the understanding of the teachings of Christian Science I have been healed of bowel trouble of long standing, and of sleeplessness and nervousness.

For a number of years I had been a member of a denominational church, but I never applied the teachings of Christ Jesus as I am now able to do with results following. I have discovered that all I ever heard against Christian Science is false, as my understanding and practice have brought nothing but good in the way of better health, contentment, peace, more love for humanity, and a larger knowledge of God and of man's relation to Him. I can now say with Job, "I have heard of thee by the hearing of the ear: but now mine eye seeth thee," and can echo the truth that "every good gift and every perfect gift is from above, and cometh down from the Father of lights, with whom is no variableness, neither shadow of turning."

(Miss) Eva L. Dunning, Columbus, Ohio.

٠

I feel that I must express my gratitude for the knowledge of divine Principle, or God, which Christian Science has given me. It came to me in days of great need and healed me of many serious physical ills. My first healing through the application of Christian Science was that of a severe throat and lung trouble, the after effects of pneumonia, which had left me practically voiceless. This yielded easily to the truth. From childhood I had been under the care of physicians constantly and was always in a debilitated and nervous condition from a painful trouble with my back, due to an injury received when a little child, for which many specialists had treated me but without results. This was beautifully met through Christian Science treatment, and I am each day gaining more dominion. Since my first healing I have tried conscientiously to apply Christian Science not only to the solving of problems, but to avoiding problems,-healing thought before it is manifested as inharmony. In "A Rule for Motives and Acts" (Manual, Art. VIII, Sect. 1) the following warning is given: "Neither animosity nor mere personal attachment should impel the motives or acts of the members of The Mother Church."

If we are sincere in searching, we will discover that all or nearly all of our acts that are making for inharmony have as their root either animosity or personal attachment or both.

Let us as Christian Scientists put the finger on the lips, still all thought or expression of error, and quietly alone with God, ask for guidance, with the receptivity of a little child, "endeavoring to keep the unity of the Spirit in the bond of peace," so that all may come "in the unity of the faith, and of the knowledge of the Son of God, unto a perfect man, unto the measure of the stature of the fulness of Christ." I am deeply grateful to Mrs. Eddy for the teaching which she has given us, enabling us to overcome every phase of error.

(Miss) GERTRUDE R. FAY, New York, New York.

Having been helped so much myself through the testimonies of others I send mine for publication that it, too, may encourage some one. I was completely healed of constipation of the bowels a number of years ago just by studying "Science and Health with Key to the Scriptures" by Mary Baker Eddy, and have never had any return of the trouble. I want to tell of another healing which I experienced four years ago by realizing that God is All, and that "the flesh profiteth nothing," as Jesus said. I was taken with a peculiar pain in the ribs under my left arm. In two days the pain became almost unbearable at times and continued three or four days more without any seeming change. I was very nearly unconscious but held to the truth that God is all there is, and my wife was declaring the truth for me. Then the pain began to give way, and in three or four days I was out of the house, and after four or five days more I went to heavy rock work. It was a proof that the truth reaches every part of the body and is a very present help in time of trouble. I can say to those in need of help, Press on, for discord is not what it seems to be; it is not real. The world can never be too grateful to Mrs. Eddy for what she has done for mankind.

TANDY KEY, Belton, Texas.

I can vouch for all my husband has said in the foregoing testimony of his healing, and the half is not told as to his suffering. I did not know what the seeming trouble was but one thing I did know—it was not of God. Words can never express the gratitude we have for Mrs. Eddy for showing us the way out of discord into harmony.

(Mrs.) KATE KEY.

As far back as I can remember I had a most proud and disagreeable disposition, which I am glad to say has been displaced by love. My highest ambition now is to help all mankind on their journey to the realization of peace and harmony.

My first experience in Christian Science was the healing of a boil. I tried to overcome it but, being only a beginner in the study, I did not know how to meet it and had help, which I am glad to say was with most satisfactory results. Another wonderful healing was of eczema which had been pronounced incurable by physicians, and as a result of which I had hardly any hair left on my head and no eyelashes or eyebrows. The entire surface of the body was affected, and I was asked to stay away from school, but later through Christian Science I made up a whole year's work in a month's time. The healing was slow but it taught me patience and obedience, and when the demonstration was made my hair grew twice as thick and beautiful, and now I am a healthy girl.

For these and numerous other wonderful healings I am indeed grateful, but most of all I am grateful for the truth which if applied rightly meets all human needs. All I am and all I have I owe to Christian Science.

(Miss) VERNA GROSKLAUS, Chicago, Illinois.

4

My first visit to a Christian Science practitioner's office resulted in an instantaneous healing of tuberculosis, testimony of which has been previously given in The Christian Science Journal. Gratitude for this remarkable healing was the light that shone in the darkness as I struggled through seven years of mental and physical depression in the effort to overcome a supposedly inherited nervous temperament, with its accompanying physical prostration and a tendency to frequent and violent headaches. Several months prior to my healing of this condition, when the pain and weariness seemed unendurable, the thought came, "If this belief has such obduracy that nothing but death can change it, then I will pass through that experience to find my freedom," and I began, in my thought, to prepare for that eventuality, quite unconcernedly, but as being one step in the right direction. But the very fact that I had surrendered all sense of struggle brought immediate relaxation, and the crisis was again past.

Some time later, in a moment of intense struggle, an incident occurred which marked the turning point in my study, and eventually in my healing. I was battling with labored breathing due to an acute cold on the lungs. As the breath came with a groan, the words that were frequently used to comfort others, came in address to the lungs: "You need not struggle so; Love loves you," to be instantly followed by a startled, "Love does not love the flesh," and then the unmistakable and never to be doubted utterance of Truth, "Love loves everything that is!" and, as Mrs. Eddy says in Science and Health (p. 123), "The verity of Mind shows conclusively how it is that matter seems to be, but is not." The light had dawned, and I immediately stood on my feet, entirely forgetful of my body.

Up to this point I had interpreted the destruction of matter to mean the annihilation of those objects of which I was conscious, and consequently looked upon my body as an enemy, against which I ever contended, and ever feared. My thought had been surprised into a statement of the truth, and the realization of entity, where I had attempted annihilation, dawned with irresistible conviction. There was no attempt, nor is it possible, to outline the nature of this present reality. It was enough that it was real, and I could patiently await the further elucidations of this fact. Our Leader's writings were sought eagerly, and read as for the first time, and they gave instant and abundant corroborative evidence of the correctness of this logic. Notable among these references was the answer to the question at the bottom of page 60 of "Miscellaneous Writings," in which Mrs. Eddy says, "Every material belief hints the existence of spiritual reality; and if mortals are instructed in spiritual things, it will be seen that material belief, in all its manifestations, reversed, will be found the type and representative of verities priceless, eternal, and just at hand." The joy, freedom, and radiant health that followed this discovery were unspeakable. The desert of human belief had been made to blossom as the rose of metaphysical understanding. Ten years of reasoning from this basis have been rich in demonstration, and in an increasingly clearer consciousness of "Emmanuel" or "God with us."

(Miss) Adelaide Stites, Berkeley, California.

Signs of the Times

["Play"-The Christian Science Monitor, Boston, U.S.A., April 13, 1921]

One of the great blessings, as well as safeguards, that can come to the adult human being is to regain the mental attitude of play. It is wholly a condition of consciousness and has nothing whatever to do with what is commonly known as recreation, entertainment, or amusement. It is unworldliness, the unworldliness to which Christ Jesus referred when he said, "Except ye be converted, and become as little children, ye shall not enter into the kingdom of heaven."

To the extent that an individual becomes absorbed in worldliness he loses the ability to play, and it is just this unworldliness, this childlike attitude of thought, which Christian Science is restoring to countless men and women. Many who have thought that the sweet, unburdened consciousness of childhood was gone forever have found that as they learned the truth about God, the tender Father-Mother, and their relationship to Him, the joyousness and freedom of childhood is being restored to them. The harsh, calculating sense of things begins to drop away as one realizes that God encircles each and every child with His love. The struggle for "What shall we eat? or, What shall we drink? or, Wherewithal shall we be clothed?" yields to a quiet sense of trustful dependence upon the Father's care. It makes all the difference in the world whether a man eats bread in the sweat of his brow, the belief that substance exists in matter and that therefore he must struggle and strive in order to get his share of it, or whether he eats it through the understanding that, as Mrs. Eddy, the Discoverer and Founder of Christian Science, says on page 507 of "Science and Health with Key to the Scriptures," the Christian Science textbook, "Spirit duly feeds and clothes every object, as it appears in the line of spiritual creation, thus tenderly expressing the fatherhood and motherhood of God." It is the apprehension of this fact which turns work into play. A man no longer works for so many dollars and cents, but because he rejoices that he is able to have his part in the activity of his day and is able to render some service to his fellow man.

Not infrequently one who was earning a mere subsistence by work which was so uncongenial as to be practically drudgery has found that when he has gained some understanding of God as Principle, and of man's relationship to Him, he was able to earn a competency by the exercise of some gift or talent which heretofore he had regarded merely as a pastime, and which he had never thought of as having any commercial value. Others have found that while their occupation did not change, their own attitude toward it became so different that work seemed transformed into play. All the former sense of drudgery was eliminated because it was now performed in a spirit of unselfishness and so freed from the clamp of worldliness. To begin to unlearn the world's ways, methods, and practices because one has begun to learn the ways, methods, and practices of Spirit is to begin to enter the kingdom of heaven and to experience in large measure release from anxiety and fear.

On page 110 of her book, "Miscellaneous Writings," Mrs. Eddy writes, "Beloved children, the world has need of you,—and more as children than as men and women: it needs your innocence, unselfishness, faithful affection, uncontaminated lives." All that is artificial in life must of necessity begin to disappear as men and women learn once more how to play by the roadside of life, as it were, and to accord to each other the sweet confidence of childhood. A

Christian Scientist once said that, as a boy at school, whenever he had an unusually hard problem in mathematics to work out he always found himself unconsciously whistling a tune, and many another Christian Scientist has found that the more complicated the problem which seemed to confront him the more clearly did the "song of songs," the melody of Spirit, sing itself over in his heart until all sense of burden was lifted and he could pursue his way with childlike confidence and trust. Directly one learns that man already possesses all these things spiritually as a son of God, existence loses a great deal of its strenuousness and one is conscious of a return in large degree to the free, happy attitude of childhood.

No one, however, can become as a child and know the healthful spiritual attitude of unworldliness who has not realized in some degree his true sonship with God. In the words of the Master to Nicodemus, he "must be born again." This rebirth consists in the recognition that as God, Spirit, is the only creator, and that all that He has created must partake of the divine nature, man is now at this moment the beloved child of God, momentarily kept, protected, and provided for by infinite Love, and that the mortal testimony with regard to man is wholly false. This fact spiritually apprehended begins to usher the individual into the kingdom of heaven here and now, and is the panacea for all the fear, limitation, and ill health which worldly knowledge brings with it.

A man can play, therefore, whether he is in his office, his shop, riding in the street car, or walking by the roadside, for in all of these circumstances he can be unworldly. Not infrequently has one word of disinterested confidence and trust cleared up in a few moments an apparently discordant situation, for to Love and its reflection belongs all power, and to know that divine Love is ever present is certainly to accomplish healing in human affairs. There is nothing which humanity so much needs to-day as an understanding of the Christ, or Truth. The contagion of good is the only contagion, and there is nothing so contagious as the glad, happy atmosphere of childhood. On page 400 of the book, "Miscellaneous Writings," previously mentioned, Mrs. Eddy gives a prayer entitled, "To the Big Children," which in its exquisite simplicity expresses the aspiration of every childlike heart, and which cannot fail to purify and bless those who pray it:-

Father-Mother good, lovingly
Thee I seek,—
Patient, meek,
In the way Thou hast,—
Be it slow or fast,
Up to Thee.

4

[From a letter in The Citizen, Letchworth, England]

In an article in the "Diocesan Gazette," the Bishop of St. Albans bewails the leakage from the Church's ranks to Christian Science and other [so-called] heresies. So do many church members, whose loyalty is sadly overstrained by the impossible conditions with which their shepherds and pastors confront them. By their support of vivisection these authorities call upon their bewildered flocks to worship and serve a God without power, without justice, and without mercy. These attributes are unaccountably ascribed to Him, as articles of faith, but faith accompanied by such works as are inseparable from vivisection is, it must be admitted, more than poor humanity can honestly receive.

The torture of the helpless and unwilling, repudiated in any decent society, is upheld, and a conference of bishops

thank God for its successful exploitation and can offer no better extenuation for their conduct than the mere assertion (without a shadow of proof) that by its means the followers of our blessed Lord may continue to prolong their stay in a world which "knew him not" and "hated him," and which they are all the time exhorted to "love not," but to despise, and use merely as a battle field for eternity and as the gateway to the world to come. Is there any heresy afloat so distracting and inexplicable as a church which presents such stones as these to its starving, bread-seeking children?

[From "The New Education," by Hanford Henderson in The North American Review]

Education, happily, is unavoidable; it comes in a natural form to children and adults alike. To live is to become educated, and the more fully and eagerly and disinterestedly we live, the more divinely do we become educated. We have here, I think, an indication of what all human attempts to further education ought to be; they ought to be very clever, very subtle, very carefully devised attempts to lead children out of the narrow, restricted world to which their inexperience and ignorance confine them, into the immense and luminous world of those who intelligently seek perfection.

[Dr. Frank Crane in The American Magazine]

Life is measured by the sum of its resources. Life is not existence. It is ability to use and enjoy one's environment, and that ability may be great or less. . . . Real riches consist in well developed and hearty capacities to enjoy. There are plenty of things for everybody. The town, the woods, the sea, the sky, the whole universe is crowded with them. But of capacities, of fine and discriminating tastes, there is great lack. What you really mean when you say you want to be rich, is that you want largeness of life. And you don't know how to get it any other way than the child's way and the fool's way of piling up a mass of things. Most people are swamped, not starved. They eat too much, wear too much, read too much, go too much, live in too big a house, hear too much, talk too much. Life's fullness is measured by its resources. The vividness and strength of life depends upon its reserves. Now suppose you examine your own house of life and see how many rooms it has. Instead of worrying about how long you are going to live, suppose you see how much you are living.

[From The New York Mail]

In recalling from the trade at considerable monetary loss a book containing passages justly offensive to Christian Scientists, the publishers have not only taken a step commendable in itself, but one which well recognizes the judgment of public opinion that abusive writing upon religious subjects ought not to be tolerated. Publications of the sort have been hitherto vulgarly frequent. In the past year every one of them has come in for instant popular protest, save only in the narrow circles of prejudice in the mean atmosphere in which they had their origin.

Sincere criticism and argument are always proper. But what common civility will not permit in speech—ill-tempered tirade and hateful ridicule—becomes even more reprehensible when indulged in broadcast print, spreading its hurtful insinuations beyond the reach of ready counteraction. It is difficult to enact laws which can draw a right line between what is reasonable and what is vicious in written controversy, but the spirit of fair play and regard for the rights of others can touch no such obstacle. Religious

liberty will have no actuality in this country unless protected in all points of privilege. Our times seem righteously determined that freedom from sheerly malicious invective shall be one of them.

[Dr. Edward T. Devine, Associate Editor of *The Survey*, as Quoted in Star-News, of Pasadena, California]

Disease cannot be permanently cured with drugs or medicines. In saying this I am not preaching Christian Science. Neither am I inveighing against the physician. . . . If the normal activities of the world were functioning properly there would be less need for social service. If the church did all that it should, if the newspapers and the magazines printed all the news and gave all the information the people should have, if the courts gave justice to rich and poor alike, the social worker would find little to do.

Notice

SHORT TERM SUBSCRIPTION AND ORDER RATES

Attention is called to the new rates now in effect on short term subscriptions for *The Christian Science Monitor*, *Christian Science Sentinel*, and *The Christian Science Journal*; also on single copies of the *Sentinel* and the *Journal*. These rates are stated in the advertisements found on the inside front cover page of the *Sentinel* and on page "iv" of the *Journal*.

Attention is also called to the rates scheduled below, now effective on all quantity orders for any one issue of any of the Christian Science periodicals:

Monitor\$.03	a copy
Sentinel	
Journal	"
Der Herold	"
Le Héraut	"
Quarterly	"

These rates are net and take the place of the former 10% discount on periodical orders.

The uniform retail price on the Sentinel is now 10 cents a copy, and on the Journal 35 cents a copy. The Monitor single copy price remains at 5 cents.

Discounts to reading rooms on subscriptions and on orders for general publications remain as before.

Church Notices

Boston, Mass.—The First Church of Christ, Scientist. Sunday services, 10:45 a.m. and 7:30 p.m.; Sunday school, 10.45 a.m.; Wednesday evening meeting, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading rooms: Little Building, corner of Tremont and Boylston Streets (fourth floor); open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. National Union Bank Building (seventh floor), 209 Washington Street, opposite old State House; open daily, except Sunday, from 9 a.m. to 5.30 p.m. Massachusetts Trust Company Building, 236 Huntington Avenue; open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 7 p.m.

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,-The Mother Church,-printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to CHARLES E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society

Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in The Christian Science Monitor, were run off at the time of their publication in the Monitor.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 81/4" x 103/4". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for The Christian Science Monitor, Journal, Sentinel, Quarterly, and Heralds, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and imme-

diate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

There will be placed on sale about June 20, 1921, six new pamphlets, containing articles reprinted from the Christian Science periodicals, as follows: "Government," "Employment," "Work and Play," "Progress," "Occupation," "Relationship." Orders for these pamphlets may be sent at once, to be filled on the date of issue. Price 5 cents a copy. Reading Room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the and the orders will be entered for future delivery in the order . EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUB-LISHING SOCIETY, Boston 17, U.S.A.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. ers. Large Type (18-point) on Warren's heavy India Bible paper, bound

in leather. Size 8 by 1034 inches. Single copy 87.30, with a discount of 25

cents each when included in an order for twelve or more copies of Science

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume. containing Unity of Good. Rudimental Divine Science, No and Yes. Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp. round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, git top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

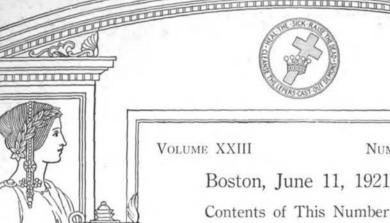

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY BOSTON · U·S·A

Christian Science Literature

"Science and Health with Key to the Scriptures" and all other published writings of Mary Baker Eddy are listed on the outside back cover page of this Sentinel.

The Christian Science Journal

Founded, 1883, by Mary Baker Eddy. This monthly magazine is an official organ of The First Church of Christ, Scientist, in Boston, Massachusetts. Contains articles, editorials, and testimonies of healing, a directory of Christian Science Churches, Societies, and Reading Rooms; also in the January, April, July, and October issues a list of Christian Science Practitioners and Nurses. Subscription price, payable in advance, postpaid to all countries: One year, \$3.00; six months, \$1.75; three months, \$1.00; single copy, 35 cents.

The Christian Science Quarterly

Founded, 1890, by Mary Baker Eddy. Published January, April, July, and October. Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size. Subscription price, payable in advance, postpaid, to all countries: One year, \$1.00; single copy, 25 cents.

Christian Science Sentinel

Established, 1898, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. Subscription price, payable in advance, postpaid, to all countries: One year, \$3.00; six months, \$1.75; three months \$1.00; single countries. three months, \$1.00; single copy, 10 cents.

Der Herold der Christian Science

Authorized, 1903, by Mary Baker Eddy. A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months, 50 cents; single copy, 20 cents.

Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months 50 cents; single copy, 20 cents.

The Christian Science Monitor

An International Daily Newspaper. Founded, 1908, by Mary Baker Eddy. Daily, except Sundays. Its own world-wide news service is supplemented by the service of the Associated Press and of the United Press Association. Complete in its departments; unique in its Home Forum page. Full page of editorials dealing truthfully and fearlessly with vital questions of the day. Subscription price, payable in advance, postpaid to all countries: One year, \$9.00; six months, \$5.00; three months, \$3.00; one month, \$1.10; single copy, 5 cents.

Subscriptions will begin with the next issue after the receipt of the order. Information regarding bound volumes of the weekly and monthly periodicals will be given upon request.

"A church without creeds"

ELSIE M. SHAW

WE read in the Historical Sketch at the beginning of the Church Manual (p. 17): "In the spring of 1879, a little band of earnest seekers after Truth went into deliberations over forming a church without creeds, to be called the 'Church of Christ, Scientist.'" Mrs. Eddy, the Discoverer and Founder of Christian Science, was wise enough to know that true Christianity is entirely spiritual, and as such should be unhampered by creeds or doctrines. and she therefore endeavored to keep Christian Science free from man-made fetters of all kinds. It was for this reason that she instituted the Lesson-Sermons, of which she says in the Explanatory Note in The Christian Science Quarterly, "The canonical writings, together with the word of our textbook, corroborating and explaining the Bible texts in their spiritual import and application to all ages, past, present, and future, constitute a sermon undivorced from truth, uncontaminated and unfettered by human hypotheses, and divinely authorized."

In studying the history of Christianity one finds that as soon as the professing Christian substitutes fair seeming for a life lived in accordance with the example set by Iesus of Nazareth, human opinions begin to hold sway and codes of laws are drawn up to which men may pay outward observance while giving no definite proof of their Christianity by the only result as demanded by Jesus from his disciples, namely, their fruits. As soon as a definite creed is formulated, therefore, and all that is asked of a man is that he conform strictly to the letter of it, the spirit of it tends to become lost, because the letter can be interpreted in as many varying ways as there are human opinions. The inevitable outcome is the formation of numerous sects of religion, differing from one another in some minute particular. Another danger arising from strict adherence to the letter alone is that it tends to encourage hypocrisy, to lay stress on the tithes of mint, anise, and cummin rather than on judgment, mercy, and faith, as was the case with the Pharisees in Jesus' time.

It is well known that Christianity as demonstrated and lived by Jesus was in its turn shown forth in all its purity by the early Christians for about three hundred years, in fact, until the Emperor Constantine embraced Christianity and it became the State and therefore the popular religion. This was the signal for the adoption of the outward form of Christianity by many who were not prepared to sacrifice their belief in the reality of matter, or to endeavor to conform their lives in every particular to following in the footsteps of Christ Jesus. To these superficial converts it was an absolute impossibility to produce the fruits of the Spirit, to heal the sick and raise the dead. They desired a religion of which they might appear to be the shining lights without having to make the tremendous sacrifice of materiality which is demanded of a true follower of the Christ. It was but natural, therefore, that gradually outward observances took

the place of those signs which follow them that believe, and creeds were formulated to which men gave their adherence, but which did not affect their daily living in any particular. Religion became stereotyped, a thing of the tongue rather than the heart. Material healing followed in natural sequence until belief in an ever present God "who healeth all thy diseases" became more and more remote, and materialism gained sway over the general thought in ever increasing ascendancy.

There followed that period of ecclesiastical despotism known as the Dark Ages, when the monopoly of a future world salvation was kept strictly within the hands of the church dignitaries, and the Bible was withheld from the people. Then came that mighty wave of revolt called the Reformation, for which John Wycliffe paved the way by his translation of the Bible into English and his circulating it through the homes of the common people. Martin Luther did for the world what Wycliffe did for England, until the light of Truth began to break through the dark clouds; but still it was only in fitful gleams, for the world, though with a clearer idea of God, still had an intense belief in matter, and it was not until Mrs. Eddy, in the year 1866, rediscovered the spiritual law of healing which Jesus practiced, that the entire gospel, the seamless robe of the Christ, was restored in all its original purity.

Mrs. Eddy, with her spiritual insight, saw the danger to the world should the Science of Christianity, or Christian Science, as she named it, be in the course of time once more swamped by creeds and doctrines, and in "The First Church of Christ, Scientist, and Miscellany," on page 266, she warns her followers of this peril in these words: "To my sense, the most imminent dangers confronting the coming century are: the robbing of people of life and liberty under the warrant of the Scriptures; the claims of politics and of human power, industrial slavery, and insufficient freedom of honest competition; and ritual, creed, and trusts in place of the Golden Rule, 'Whatsoever ye would that men should do to you, do ye even so to them.'"

There is a tremendous tendency in mortal mind to cling to the letter and lose the spirit, whereas a true Christian needs both the letter and the spirit. At the present time the world is not sufficiently advanced spiritually to be able to progress without organization. At first Mrs. Eddy hoped to establish Christian Science without any definite laws, but the time was not ripe, and therefore under divine guidance she compiled the Manual of The Mother Church, which sets forth the rules for guidance governing the organization of the Church of Christ, Scientist. About this Manual she writes (Miscellany, p. 229): "Heaps upon heaps of praise confront me, and for what? That which I said in my heart would never be needed,-namely, laws of limitation for a Christian Scientist." Mrs. Eddy intended that the Manual should be interpreted through spiritual understanding. It sets a standard for each individual Christian Scientist as high as that which Jesus set for his disciples throughout all ages, namely, perfection. "Be ye therefore perfect, even

Copyright, 1921, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as second-class matter. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of October 3, 1917, authorized on July 11, 1918.

as your Father which is in heaven is perfect." The Manual is not intended to be a creed, to be interpreted in devious ways according to varying human opinions. Any one who really lived according to the laws indicated in the Manual would have no time or inclination for bickering over the interpretation of the wording of each by-law, for he would be demonstrating more and more each day the one Mind, in which there is no belief of minds many, and therefore no strife.

Unless the Manual is interpreted spiritually, the paradoxical situation will arise of individuals insisting on their own interpretation of one by-law while acting in direct opposition to another; whereas, interpreted in its spiritual meaning, which can only be discovered in the exact ratio of the spiritual perception of the individual, each by-law will be found to fit into the perfect whole, each fulfilling its part in harmonious cooperation. In this way will come into operation in all its perfection that "church without creeds" which Mrs. Eddy intended when she organized The Mother Church, The First Church of Christ, Scientist, until each student of this wonderful teaching will be found demonstrating in his own life the true meaning of "Church" as given in the Glossary of Science and Health (p. 583), namely, "The structure of Truth and Love; whatever rests upon and proceeds from divine Principle.'

Creation

MARK THAYER

THE earnest student of Christian Science is impressed with the simplicity of Truth as revealed by Mary Baker Eddy in her textbook, "Science and Health with Key to the Scriptures," as well as her other writings. Truth must answer all questions, from the most insignificant to the most profound, and Christian Science, the revelation of spiritual truth to this age, meets the needs of all states and stages of thought, from that of the innocent child to the bewildered adult steeped in the false education of materiality. Brilliant physical scientists of to-day are searching in and examining matter in all its phases, seeking information as to what constitutes life, but Mrs. Eddy has attacked the problem from a very different standpoint, and the world is fast discovering that her statement that God is Life is not only accurate but demonstrable. Mrs. Eddy begins with incorporeal God, Spirit, supreme, infinite intelligence, and finds man and the universe His spiritual image and likeness, in accord with Scriptural authority. Material scientists begin with a material universe and material man and seek to find their cause. The minute examination of matter, however, discloses nothing from which to account for life or its greatest jewels: love, mercy, goodness, morality, and the other limitless attributes of God, good.

Mrs. Eddy tells us in her writings, and verifies her statements with Scriptural authority, that creation is complete. God's work is done. But this material world is not that spiritual creation which God called good. Even physical scientists admit that there is no surety that that which is comprehended by the five physical senses is real. Mrs. Eddy says decidedly that it is not real. The material universe, including the human body, is counterfeit of the spiritual reality, a manifestation of an erroneous mental concept. What, then, of the real universe and real man? Of these we can know no more than we know of God. It is therefore a question of understanding, consequently a mental problem. In "Miscellaneous Writings" (p. 67) in answer to the question "Do you believe in translation?" Mrs. Eddy says: "If

your question refers to language, whereby one expresses the sense of words in one language by equivalent words in another, I do. If you refer to the removal of a person to heaven, without his subjection to death, I modify my affirmative answer. I believe in this removal being possible after all the footsteps requisite have been taken up to the very throne, up to the spiritual sense and fact of divine substance, intelligence, Life, and Love. This translation is not the work of moments; it requires both time and eternity. It means more than mere disappearance to the human sense; it must include also man's changed appearance and diviner form visible to those beholding him here."

A common error of human existence has been to associate knowledge of God with the experience called death, a general belief being that a clearer knowledge of God is obtained after death. In the light of Mrs. Eddy's statement as quoted above, it is clear that death will not necessarily affect one's knowledge of God or His creation. Such knowledge is clearly a matter of spiritual comprehension, to begin here and now and to continue progressively without regard to the belief called death. All that really exists is already intact and spiritually complete. Creation consists therefore of the revelation of the reality of spiritual things. A man, seemingly having accepted as true an erroneous concept of creation, including himself, must drop these beliefs through enlightened thinking, reflection of Truth, and spiritual revelation, to a point where the spiritual reality of all things becomes apparent and natural. Comprehension of Spirit, God, to the extent that all error disappears as consciousness, destroys belief in matter, sin, sickness, and death. To the student of Christian Science, creation is the constant revelation of spiritual Life, Truth, substance, and intelligence, God, in the exact proportion that he individually comprehends and makes use of the truth. Thus creation continues forever, God being infinite and consequently never fully comprehended. It will be seen, too, that earthly time enters into creation only to the extent that the belief of matter or error exists. Hence Mrs. Eddy's reference, in the paragraph quoted, to the fact that this change which "means more than mere disappearance to the human sense" requires "both time and eternity." Our problem, therefore, is not with matter but with the spiritual understanding of those Godlike qualities which constitute the real creation, man and the universe in the image and likeness of divine, infinite Love.

Scientific Testimony

..

Toe

11

CLARISSE HALE

WHEN the question of scientific testimony is considered, the angle from which the person unacquainted with Christian Science views the subject is the exact reverse of that of the student of divine metaphysics. All will agree that scientific testimony cannot be based on empiricism or mere quackery but must of necessity be accurate and reliable, a systematic deduction which to be effective must be provably true. To the average individual unversed in Christian Science, the assertion that the testimony of Spirit is scientific presents a paradox, for he lives in what appears a world of matter, sufficiently satisfied therewith to keep on accepting the testimony of the five physical senses without challenging its validity. Although familiar with the timeworn illusions of material medicine, false theology, physics, and psychology, all testifying to the human mind or matter, it is ordinarily not until forced through the failure of material means to remedy some discordant condition that a man is willing to turn from sense testimony to inquire

3

into the meaning and availability of spiritual testimony. The beginner may at first find it difficult to admit that the testimony of material sense because of its relativity is constantly changing and therefore not scientific and to change his basis of reasoning from the material to the spiritual, but any one can satisfy himself even from a study of the history of the sciences that many deductions once accepted as inviolable truth are no longer susceptible of the slightest proof.

Now if the student wishes to prove for himself the exactness of spiritual testimony he has simply to put in practice knowing the facts of Spirit, which are a complete refutation of the claims of matter. If, for instance, one is confronted with some apparently inharmonious condition which to material sense testimony is insistently claiming reality one has but calmly and quietly to listen to the still, small voice of Spirit testifying to the fact that at this present moment man is the perfect expression of Soul manifesting the right activity of infinite Mind, free from the so-called laws of material medicine, whether of time, place, or heredity, because he is governed only by the law of Spirit. What does the student who listens to the testimony of Spirit instead of the testimony of matter find? That spiritual testimony is scientific, it is accurate, it is reliable, it is demonstrably true; for accepting it thus he finds that the seemingly discordant condition vanishes, leaving the proposed testimony of matter and the claims of materia medica without the scientific foundation which alone grants reality and permanence. On page 120 of "Science and Health with Key to the Scriptures" Mrs. Eddy differentiates between scientific and untrue testimony when she says: "Science reverses the false testimony of the physical senses, and by this reversal mortals arrive at the fundamental facts of being," and later on the same page, "Health is not a condition of matter, but of Mind; nor can the material senses bear reliable testimony on the subject of health. The Science of Mind-healing shows it to be impossible for aught but Mind to testify truly or to exhibit the real status of man."

Man is always testifying to the perfectibility of Mind. One hears frequent reference to the counsel of Jesus to be perfect, that God demands perfection, but the expectation of expressing this perfection is generally put off for a more convenient season. It is even affirmed that perfection is not required of us immediately. Analysis of such a statement reveals the survival of the old theological teaching that at some future time heavenly perfection will be attained, though it is beyond realization in the present. Such an attitude of thought disregards the fact that the demand of Principle is immediate, that man is really now at the standpoint of perfection, a living testimony to Spirit. What else is there for man to testify to since Spirit is infinite? The suggestion that perfection is to be attained some years bence instead of proved to be here and now is an argument based on the relative and changing standards of the human mind. Man is the evidence that Spirit is, and as the proof or testimony of God's being he must now and here express the perfectness of God.

The history of Elijah shows with conclusive clarity how Elijah's acceptance of the word of God in place of the evidence of matter enabled him to offer scientific testimony of the omnipotence of God, good. This perception of Spirit led Elijah to reject any possible material means of protection in favor of the protection of Spirit at the brook Cherith; it enabled him to restore the widow's son; it proved the claims of the four hundred and fifty prophets of Baal null and void when confronted with the single-mindedness of

true understanding. Elijah's entire experience proved the testimony of Spirit to be a scientific and dependable certainty. Mrs. Eddy defines Elias thus in the Glossary to Science and Health (p. 585): "Prophecy; spiritual evidence opposed to material sense; Christian Science, with which can be discerned the spiritual fact of whatever the material senses behold; the basis of immortality."

The student of Christian Science needs to be vigilant, ready to weigh testimony to determine whether or not it be the evidence of Spirit. By constantly choosing to accept the actual and real testimony of intelligence in contradistinction to that of supposititious mortal mind, one fortifies himself in the truth. The wisdom of the old proverb, "Testimonies are to be weighed, not counted," is undeniable, for though mortal man is disposed to count and recount the difficulties of material sense, if one listens only to true testimony he will find that it cannot be counted because it testifies to limitless and continuous good. Any symptoms of evil should be instantly rejected, for their claim to reality is based on the ephemeral testimony of matter. The only symptoms the true Christian Scientist listens to are the symptoms of Mind, which are inevitably right and perfect. As an individual forms the habit of depending absolutely on the scientific testimony of Spirit, he finds that such testimony, by replacing false belief with the true idea, is manifested in harmonious living.

Thus every right-minded worker in Christian Science is continually testifying to the unity and perfection of Mind. Throughout his daily experience, the alert thinker of necessity rejects the false for the true evidence. God's true testimony is the infinite expression of Principle variously manifested. Heeding this testimony one does not find it difficult to overcome the human sense of self-consciousness and fear of criticism to give audible expression to the testimony of Spirit at the Wednesday evening services; the same spiritual perception conquers procrastination and apathy so that one is glad to testify in the Christian Science periodicals to the joyous present salvation of Truth. Spiritual testimony finds expression in every activity of daily living; it never deviates from Principle though infinite in variety. Scientific testimony is in fact the eternally available proof that God is Love.

"With all your heart"

TRVIN DE R. MILLER

*HROUGH the prophet Jeremiah, the word of God comes I to us with the loving assurance, "Ye shall seek me, and find me, when ye shall search for me with all your heart." When we have taken up the study of Christian Science, which is only another way of saying when we have intelligently commenced the quest after God, there are urgent reasons why we should keep this promise always before us, remembering that for our search to be successful it must be pursued wholeheartedly. As our labors begin to be rewarded with a growing knowledge of Truth, or God, we become the possessors of something for which every man yearns, however unconsciously, and some who are ready to be similarly blessed will turn to those who know the truth; therefore our thinking should be so clear that what we know we shall be able to share with the hungry ones who come to us for it. God's favors are also responsibilities, and He never gives us anything for selfish hoarding. We must give; getting is only half of our obligation.

Again, early in our study, we begin to recognize upon what false and uncertain bases rest those material means of healing in which most of the world places its hope. As we

-11

3

į į

i j

11

i li

perceive that the seeming cures effected by such systems result not from any intelligence or virtue in drug or manipulation but from the ever shifting human belief in their efficacy, we lose our faith in such means and they cease to be helpful to us. Then it is necessary that we quickly replace this lost trust with that knowledge of God's love and law which is truly able to protect and heal. As we do this we may face with increasing joy and assurance any physical or other claim of error which may present itself, knowing that reliance on Principle gives us the sure victory, and that the command to work out our own salvation is not given us without the ability to obey it. Although placing full reliance upon those glorious promises of deliverance with which the Bible is filled, we should go on to forestall evil, to obtain the peace and protection which are the result of our abiding in Truth, in the consciousness of the ever presence and tender care of God. We must know something of Truth before we can abide in it, and we must perceive something of the nothingness of those false beliefs of good and power apart from God which otherwise may frighten or entice us. Let us, therefore, never look upon Christian Science as an interesting novelty to be dabbled in, since it holds for us the issues of life and death, and deals with the subject of first importance to mankind, namely, God. While we can always seek His presence with gladness, we should also approach Him with earnest reverence.

On page 22 of "Science and Health with Key to the Scriptures" Mrs. Eddy gives us this admonition: "'Work out your own salvation,' is the demand of Life and Love, for to this end God worketh with you. 'Occupy till I come!' Wait for your reward, and 'be not weary in well doing.'" As we thus diligently search after Him, the perception grows that not only is God, divine Principle, the source of good, but He is the only source of good; that His plan for each of us is not only happiness, but the greatest possible happiness. We begin to see that matter is not partially good and partially bad, and the fruits of the Spirit only sometimes joyous, but that whatever real and enduring joy comes to us is always traceable to spiritual law, while every material belief holds within itself the seeds of inevitable pain and destruction. When we come to see these things and act upon them, we know from the results we obtain that the promise is true and we have found "Him whom to know aright is Life eternal," to use Mrs. Eddy's words on page vii of the Preface to Science and Health, where she says: "Ignorance of God is no longer the stepping-stone to faith. The only guarantee of obedience is a right apprehension of Him whom to know aright is Life eternal."

Reliance on God

ALICE JENNINGS

RELIANCE on God is intelligent and loving trust in Principle, not blind faith in an unknown power nor dependence on the human ways and means of personal sense. This confidence in the control of Love, the law of right, is requisite to spiritual sense and the demonstration of Truth for the supremacy of good. Based on the assured integrity of the universe, as coexistent, coeternal, and coextensive, with God, the spiritual and real manifestation of His presence and power, such trust in His infinite rightness and goodness is calm, strong, and unshaken. Divine cause and effect constitute the entire law of harmony for all existence. To repose all confidence in an absolutely good God, is to be elevated above the fear of any other cause or effect, and above the belief of good in any other than the one causation,

infinite Spirit, infinitely expressed. From all false beliefs and false trusts Truth calls mortals to escape: "Come out from among them, and be ye separate, saith the Lord, and touch not the unclean thing and I will receive you, and will be a Father unto you, and ye shall be my sons and daughters, saith the Lord Almighty."

In the oneness of God, having none other, the student of Christian Science finds the fatherhood of the almighty, eternal Mind, and therein man's sonship to the infinite, and has no apprehension of what mortals might do, for he knows that man is God's image or idea, manifesting only the character or likeness of his Maker. He knows that man has never for an instant been separated from the perfect Principle of his being, and never can be, but is forever in oneness with Truth, Life, and Love; hence there is no evil power that can sentence man to express other than the nature and Mind which is God.

Of all that God does for man, the fundamental blessing and privilege is the ability to think. This ability is to be cultivated gratefully and effectively. When the understanding of man's unity with Principle obtains, it works out every problem with the Science of the Christ-spirit. Relying on Principle, God's infinite individuality, one is not subject to mesmerism, lives above the trend of the unthinking crowd, rises beyond hereditary weaknesses, and is freed from whatever magnetic influences would drag one downward. Obeying Principle leads to the discernment of all Truth, all Life, all Love, and away from the opposite effects of mortal belief, which with its frailties and wrongs includes all wickedness, all sin, disease, and death, though it is altogether but mortal illusion. Yet that evil is what Christ came to destroy, and comes to-day to destroy, and will destroy, root and branch, that God may be understood as All-in-all.

The government of Principle, Christ's Science and Spirit, betokens a new age, the new, harmonious earth, fitting abode for God and His Christ, the omnipresence of divine Mind and idea, including man illumined. The light and harmony of Principle, infinite Mind, is heaven; its antipode, the darkness and discord of personal-sense will, with its hatred and destruction, is hell, the seeming void without God. Yet God is never absent, never diminished in quality or quantity. To know Him rightly is to know the infinitude of Life and good and blessedness. For the realization of this true status of man, it is necessary to think rightly. One can never be saved in wrong thinking, nor by it, nor work out any problem that way. Only actually resorting to Principle is sureness and safety. The true remedy for sickness, sin, and trouble, comes no other way. Right thought has the immediacy and power of right action.

Truth is true, and always provable by true thought, bringing good to man, and harming no one. Error is untrue, non-principled, unprovable, unanswered by God. Principle, the omnipotence of good, can be demonstrated by one alone with God, to annul the claims of evil. Being eternal Life, Principle, with its divine idea, is forever untouched by sin, disease, and death. Principle is its own protection, the wholeness—holiness—of indestructible being. Knowing life in Principle is man's celestial estate of bliss and glory. Who would exchange it for the mirages and the ravages of personal sense? In visionary mortal mind, matter presents a false sense of substance, in which man appears the power instead of God, and it openly or silently offers reward for allegiance to personal sense, but this is absolutely unreal. In Truth, it is provable that personal sense cannot be blinding, and cannot injure God, His cause, or man, and has no effect

either for good or evil anywhere on earth, for it but seems to be that which it is not. In the chapter on Prayer in Science and Health (p. 14), we find the correlative of Paul's reminder for relinquishment of mortal ways: "Entirely separate from the belief and dream of material living, is the Life divine, revealing spiritual understanding and the consciousness of man's dominion over the whole earth. This understanding casts out error and heals the sick, and with it you can speak 'as one having authority.'" Such authority was not the control of one person over another. Mrs. Eddy explains it elsewhere in the same book (p. 26): "Divine Truth, Life, and Love gave Jesus authority over sin, sickness, and death. His mission was to reveal the Science of celestial being, to prove what God is and what He does for man." This manner of mission and authority can never be lost sight of in Christian Science.

Love Bearing Witness

BABBETTE LEAVY

"IF Spirit or the power of divine Love bear witness to the truth, this is the ultimatum, the scientific way, and the healing is instantaneous," Mrs. Eddy tells us on page 411 of "Science and Health with Key to the Scriptures." Upon examining this interesting definition of how to heal instantaneously, the writer spent many hours seeking to understand that the only ambition any one has who wishes to help his fellow man is to see constantly successful results. The question arises, What does it mean for divine Love to "bear witness to the truth"? The following is given in heartfelt gratitude to the Giver of every good and perfect gift for revealing the longed for answer.

When coming into Christian Science the student often first considers "the scientific statement of being" (Science and Health, p. 468), and in the daily round of duties, a slight burn, a cut, or any seeming discordant condition begets the quickened denial and affirmation of the yet dimly conceived understanding of what he is voicing. Through constant study and application of the truth to one's problem, the mist of mortal mind begins to clear and our outlook takes in a wider scope of demonstration than the overcoming of mere physical ills. One seems to stand on a high mountain, as it were, and looking deep into space, seems to become conscious that he is at one with All and hears the voice that spoke to Abraham, "I am the Almighty God; walk before me, and be thou perfect." Herein is the basic commandment, "Be thou perfect." What a task! And yet, what a reward.

How are we to become perfect? We have perfect Principle, Spirit, to begin with, and in manifesting perfect Principle we learn that man is holy-whole, or spiritual. We must understand that man sees, hears, acts, knows, and loves in the way Spirit does, and then endeavoring to measure up to this standard, we can never miss the way. It is the constant reversal of every thought unlike God that comes to us, and the replacement of it with the true idea, which will bring us into all truth. Man sees as God sees, the eternal, imperishable glory of infinite existence; he hears as God hears, the perfect rhythm of exquisite harmony, the perpetual glorifying of God, the song of eternal joy; he acts as God acts, in beauty, in grace, in perfect poise; he works as God works, unceasingly, untiringly, energetically, and spontaneously; he loves as God loves, with an infinite love, seeing only the beauty, the purity, the divinity in all. It is living in the understanding of this every sixty seconds of every minute that demonstrates divine Love bearing witness to the truth. When at one with man's perfect Principle, we shall lose all sense of a mortal, and recognize the one and only presence in the universe. It is this love that Jesus came to be a witness of, the love that is divine and therefore instead of seeing sin beholds the glory; instead of sickness sees wholeness, beauty. Peter, at the gate of the temple which is called Beautiful, when wishing to heal the crippled man begging alms, "fastening his eyes upon him," steadfastly discerned the truth that right where mortals saw a helpless mortal, he, like Jesus his great Teacher, beheld perfect spiritual idea.

Our Leader's prayer was for this higher demonstration, and only as we, with singleness of purpose, steadfastly behold the perfect, sinless, deathless, immortal child of God, can we go from glory to glory. Mrs. Eddy says, on page 272 of Science and Health, "It is the spiritualization of thought and Christianization of daily life, in contrast with the results of the ghastly farce of material existence; it is chastity and purity, in contrast with the downward tendencies and earthward gravitation of sensualism and impurity, which really attest the divine origin and operation of Christian Science."

Man is the idea of God, the ministering, benefiting goodness, made manifest, and he is complete in the fullness of action, power, wisdom, health, strength, and abundance. In this capacity, he is at all times, in any place or condition able to fill his perfect position in life as the expression of Love. It is not condemnation that will enable a brother to go out of our office uplifted; it is not seeing "sore throat caused by sore thoughts" that heals, but it is the power of divine Love bearing witness to the truth that, because God is, man is the eternal proof of His all-presence.

[Written for the Sentinel]

Alone with God

LOUISE KING

Alone with God!
With Principle alone.
This recognition endless bliss unfolds;
Life's problems clear,
Man's being all complete
Is solved; his oneness he with good beholds.

Alone with Truth!
The Truth that sets men free
To worship and adore the least adored
Spirit of Truth,
The most adorable.
Man born of Spirit must with Truth accord.

Alone with Life!
Life everlastingly
To know, means one with Mind and Mind's idea.
Life leaves no void
For phantom death to fill.
There is no death; Love casteth out all fear.

Alone with Love
Divine, that fills all space,
Meeting each human need in every hour.
Love infinite,
Omniscient, and supreme;
The ever present and the only power.

Alone with Life,
Truth, Love, this Trinity
In unity called God—there is no loneness here!
Substance divine
Reflected everywhere.
Through Christian Science Mind's creation doth appear.

The First Commandment

The figure of Moses is one of the links in the chain of the Christ which extends through the Bible. The Christ is the spiritual reality of all things. Wherever, therefore, there has arisen a man who has given utterance to Truth, there the Christ has been manifested. Such a man was Abraham, the friend of God, the man who in the midst of the polytheism of Asia saw sufficiently clearly the unity of good to come out from among his own people, and proclaim monotheism to the world. Abraham, mentally alone, amongst the idol worshipers of Padan-aram, gained his vision of the Christ sufficiently clearly to be forced to cross the great river, the river Euphrates, and to go out, by faith in what he had realized of Principle, to found a new nation.

In the same way the vision of the Christ came to Moses. Moses was the first of the great figures in Bible history to see sufficiently through the mist of materialism to separate Spirit from matter. In the words of Mrs. Eddy, on page 200 of Science and Health, "Moses advanced a nation to the worship of God in Spirit instead of matter, and illustrated the grand human capacities of being bestowed by immortal Mind." To Moses has been credited the writing or editing of the books known as the Pentateuch. The Pentateuch is, of course, a collection of documents written by various scribes. It is immaterial whether Moses had any hand in these or not. But, if he had, he was presumably responsible for those sections of the Book of Genesis which are known amongst scholars to-day as the Elohistic document, the document which separates God as Mind from God as a tribal deity.

Moses, struggling, like all the great Biblical characters, toward a clearer sense of Principle, alternately caught and lost, no doubt, his vision of the Christ, like Abraham, Isaac, and Jacob before him, like the great prophets who succeeded him, of whom the last, before the coming of Jesus the Christ, was the Baptist. But probably never did he see Truth more clearly than the day in Sinai, when the voice of Principle spoke to him, and he recorded those commandments which were to be a sheet anchor, throughout the centuries, for those steering their ships, through the storms of the senses, toward a better understanding of Principle. There were but ten of these words, as they have been called, but they were fraught with an understanding of Truth which has been guiding men ever since. And of these ten there is none of vaster import than the first, "Thou shalt have no other gods before me." Of this commandment Mrs. Eddy has written, on page 340 of Science and Health, "The First Commandment is my favorite text. It demonstrates Christian Science. It inculcates the tri-unity of God, Spirit, Mind; it signifies that man shall have no other spirit or mind but God, eternal good, and that all men shall have one Mind."

What men term God is unquestionably divine Mind,

Principle. Nobody, presumably, would dispute this. What Moses saw, then, was that the world was not governed by an anthropomorphic deity, but by divine Mind, and, realizing this, he was able to contend with the magicians of Egypt, to bring the manna from the sky and the water from the rock, to part the waves of the Red Sea, and to lead the children of Israel, in other words, those who in the prevailing darkness had seen most of Principle, nearer to the promised land, which is the end of every human pilgrimage. He was the first, perhaps, to realize clearly what the author of the Book of Job meant by the saying, "In my flesh shall I see God," or as Mrs. Eddy puts it, in the sentence already quoted from, he "illustrated the grand human capacities of being bestowed by immortal Mind." He saw, that is to say, that in proportion as the carnal mind gave place to divine Mind, the human being was governed by Principle instead of the material senses. Thus he gave humanity the clue to one of the deep things of God, the meaning of that true humanhood to which Mrs. Eddy refers, on page 49 of "Unity of Good," where she writes, "The more I understand true humanhood, the more I see it to be sinless,-as ignorant of sin as is the perfect Maker."

The first step, however, in the working out of the whole problem, is the fact crushed, as it were, into the First Commandment, "Thou shalt have no other gods before me." This command really does include the whole of Christian teaching. Therefore, obedience to it would, as Mrs. Eddy says, demonstrate Christian Science. To have no other gods before Principle means to blot out one's consciousness of materiality, and materiality is the hypnotic suggestion which superinduces a belief in anything and everything opposed to Principle. Every time a man allows a sensuous image to rest in his thought, he sets up in a degree the image of the beast, just as Moses found the Israelites to have set it up when he came down from Sinai to deliver unto them the Commandments. Centuries later Christ Jesus told those who came to listen to him that to let a lustful desire lodge in the heart was to have already given way to that desire. He was, of course, alluding to the Commandments, and he alluded to these Commandments in order to accentuate them more acutely than the language even of the Book of Exodus. Moses, however, who knew perfectly well the power of Mind, realized the mentality of all causation, and how the understanding of the allness of divine Mind was the only healing for the hypnotic suggestions constantly seeming to be poured out by that counterfeit of Principle, the human mind.

When, consequently, a man first recognizes that the only reality is this divine Mind, Spirit, Principle, he must begin to see, even though in a glass darkly, the utter nothingness of all the promises, enticements, threats, and ultimate terrors, which make up material being, which is nothing but this mortal mind or hypnotic suggestion objectified. Accordingly, in the ratio of the clarity of his vision of the Christ, of his understanding of this First Commandment, he sees himself to possess that knowledge of the truth which Christ Jesus explained would free him from all hypnotic suggestion. "The divine Principle of the First Commandment," Mrs. Eddy writes, on page 340 of Science and Health, "bases the Science of being, by which man demonstrates health, holiness, and life eternal." "And this is life eternal," Christ Jesus declared, "that they might know thee the only true God, and Jesus Christ, whom thou hast sent." When men know Principle as the only true God, they find an indestructible argument on which to base all their demonstrations. When they understand that Jesus of Nazareth

3

was the man who had so fully walked in the footsteps of the Christ as to be able to demonstrate the Christ, Truth, even upon the cross, they understand the meaning of true humanhood, in the vision of the Christ. And the whole of this is possible because they have realized the meaning of the First Commandment.

FREDERICK DIXON.

"Settled in heaven"

Every question of what to do and how to progress must be settled in the heaven of Mind, which is truly here and now, and not in matter or by material means. The solution for every sense of difficulty, whether it be physical, social, commercial, or international, lies in Mind, in divine intelligence manifest as harmonious action. Each one, then, who relies on infinite Mind for himself, finds here his solution for any seeming discord, his heaven of spiritual order, which includes no element of destruction, for the true kingdom of heaven is Mind's government of man in perfect harmony. The understanding of Mind as the only producing and governing power, supervising all true living, is the realization that the word of God is forever present to heal, and this understanding is what constitutes the practice of Christian Science. As Mrs. Eddy says on page 267 of "The First Church of Christ, Scientist, and Miscellany," "Heaven is the reign of divine Science," and this Science, or demonstrable understanding of Principle, is indeed settled, steadfast, sure. "For ever, O Lord," the psalmist declares, "thy word is settled in heaven."

The genuine settlement for a seemingly physical difficulty is the healing which proceeds from the divine consciousness of spiritual good, spiritual action, as the reality of living. Until a false condition is healed by being replaced with the true idea expressing Principle, nothing is really settled, for the divinely settled order of spiritual health or wholeness is all that can be satisfactory to the seeker for the truth as the healer of all sense of disease. This healing, which displaces false beliefs with the genuine joy, peace, and vigor of spiritual idea, comes about inevitably through the consecrated practice of Christian Science. No human philosophy, no so-called natural science, no system of material medication, has ever brought about the all-pervasive spiritual healing which is the only real healing in every sense of the word. So the need for each one who seems disturbed, distressed, or harassed by suggestions of trouble of one kind or another is to rely patiently, without any mental reservations whatever, on infinite Principle as revealed and actually demonstrated through Christian Science.

On page 181 of the volume already quoted, Mrs. Eddy declares: "The specific quest of Christian Science is to settle all points beyond cavil, on the Biblical basis that God is All-in-all; whereas philosophy and so-called natural science, dealing with human hypotheses, or material cause and effect, are aided only at long intervals with elementary truths, and ultimate in unsolved problems and outgrown, proofless positions." There can, then, be no real loyalty to or reliance on anything less than God, divine Principle, as truly All-in-all, and the steadfast loyalty to divine intelligence alone is the basis for the one satisfactory settlement for every belief in inharmonious conditions. Man, the idea in Mind, has his secure place in Mind, quite apart from "unsolved problems and outgrown, proofless positions," and is, therefore, settled and impregnable in the heaven of divine Mind, no matter what suppositional mortal mind may believe about the illusion of human living with

all its seeming perplexities. To know this is to make use of the absolute remedy for any unsettled condition of mortal living and thinking.

It is the firm understanding of what it means to live in the eternal heaven of divine consciousness now that gives one the victory over the suggestions of disease, limitation, or inharmony of any sort. This understanding is the very presence of the one Christ, the ever available Comforter. As Paul wrote to the Corinthians, "But thanks be to God, which giveth us the victory through our Lord Jesus Christ. Therefore, my beloved brethren, be ye stedfast, unmoveable, always abounding in the work of the Lord, forasmuch as ye know that your labour is not in vain in the Lord." Righteous persistence in accepting only the divine Mind as cause always succeeds. The heaven of infinite Mind is the only place where anything real can be located, where true action can occur, or where actually settled harmony could possibly be. In this heaven, spiritual man in the divine image and likeness lives, moves, and has his being, and there is no other real existence to be experienced, for infinite Mind is necessarily all-inclusive.

What solves any problem, then, is the acceptance of the one Mind as the only power. Each one must prove for himself that the true idea is forever established in true consciousness, and in proportion as he does so, he finds the real basis of settlement for any erroneous condition. The word or idea which is settled in heaven, in Mind, is for the blessing of all through its displacement of false beliefs; but each one simply has to demonstrate this truth for himself in order to experience the perfect concord of spiritual reality. When one knows that idea is and always has been settled in heaven, intelligently and unassailably established as divine consciousness manifest, one is not disturbed in the slightest about any human sense of things. Mrs. Eddy makes this clear when she says on page 288 of Science and Health, "The suppositional warfare between truth and error is only the mental conflict between the evidence of the spiritual senses and the testimony of the material senses, and this warfare between the Spirit and flesh will settle all questions through faith in and the understanding of divine Love." Since divine Love is another name for immortal Mind immortally manifest, the sureness that immortal Mind is supreme is the fundamental truth which is the solution for every problem. The true happiness for each one lies in the knowing that what is right is indeed "settled in heaven," and that fortunately the only heaven there ever will be is here and now, because it is infinite Mind, or Life, spiritually expressed as actually good living.

GUSTAVUS S. PAINE.

[Written for the Sentinel]

Consecration

ANITA G. LITTLE

'Tis e'er the overflowing heart,
Too full for self-content,
That reaches out to save and bless
With love that heals, unspent.

'Tis e'er the understanding heart,
Too wise false self to spare,
That knows the truth for all mankind,
Now, here, and everywhere.

'Tis e'er the honest, humble heart,
Too meek to claim reward,
That strives the Christly path to tread,
Because it leads to God!

Testimonies of Healing

For years I suffered from hay fever. A little less than seven years ago I had a particularly bad attack of it and the physician advised me to try a change of climate. In care of a nurse I was placed on board the train at our little railway station and in due time was landed at a noted resort for hay fever patients. Contrary to expectations I did not improve at once. I was emaciated, nervous, had paroxysms of coughing, and breathed with difficulty. One evening while lying on a couch in the parlor of the hotel where we had taken up our quarters, the landlady came in with a book in her hand, and sitting down near me, inquired if I had ever read "Science and Health with Key to the Scriptures" by Mrs. Eddy. I answered that I had purchased a copy some time ago but could not understand it and had laid it aside without any further thought; that I had purchased it to satisfy my curiosity and since that was accomplished I had no further use for the book. "You did not go far enough," said the lady. "My experience would have been quite similar had I not persisted in my effort to find the meaning of the wonderful book; for it is wonderful, in every sense of the word. I myself put the book aside as you have done, but a good friend induced me to take it up again. I did so and bless the day that I followed her advice." Not wishing to appear discourteous, especially to one who was endeavoring to do me a kindness, I complied with her request to read the book again. I began at the first page and read until bedtime. I forgot my indisposition. I went to bed and slept like a healthy baby, something I had not done for years, and awoke next morning ready for my breakfast, of which I partook heartily. I again took up Science and Health, which I read and studied at intervals during the ensuing week, at the end of which time I had no symptoms of hay fever, and in company with my nurse, who had become a happy convert to Christian Science, returned home and gave my anxious family a great surprise, for I was not expected home for at least two months. I have not had hay fever since, and I am grateful for a knowledge of the truth.

WILLIAM A. DAVIS, San Jose, California.

4

One hears so many happy testimonies of quick and instantaneous healings that it may help somebody to read the experience of one, like myself, who has had a slow healing, both mentally and physically, and who thanks God for that very slowness because it has taught so many lessons and proved beyond the shadow of a doubt that Christian Science can never fail. It is only human beings who fail, and when the healing seems slow and difficult we need never look outside our own thinking for the cause. Eleven years ago I was so crippled with rheumatic inflammation of the joints that I thought I would never be able to walk again. I knew nothing whatever of Christian Science, but I had heard it laughed at, and I only turned to it for the relief of one very dear to me because it seemed absolutely the only thing left untried. I can thank God now that, perhaps because of all those years of suffering and disappointed hopes in doctors, when the true meaning of Christian Science was explained to us it struck us at once as the explanation of everything,-the truth about Life, God, and

We hear constantly of cases that are healed through simply reading the textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, but I remember, to my wonder, that when I read it for the first time it had no more meaning to me than if it had been a railroad guide, and yet I was so glad to have found a demonstrable teaching about God that in a few weeks I cast aside all my medicines and decided, with the help of an ever patient and kind practitioner, to trust my healing to God. Within the first six months I was healed of chronic insomnia, acute gouty inflammation of the eyes, and several minor troubles, one of which I had had all my life; but at the end of three years I seemed as lame as ever, and I only began to get over that when my own understanding of Science was clear enough for me to see that I was making a reality of the pain, as if God had made it; I was afraid of it, and I saw that if I was believing in evil I did not believe in God. From the day that I decided to resist evil by exercising the limb in spite of the pain and inflammation, I began to improve so steadily that to-day I have almost forgotten what rheumatism is like, and rejoice in renewed activity. I did not get through those three years without many tussles with discouragement, but one day I read in the Monitor that "discouragement is disappointed egotism," and the truth of that statement struck me so forcibly that I think it healed me of it then and there, and of its twin, self-pity. I think that was my first glimpse of what I have seen more and more clearly every year since: that it is only egotism, self-will, self-importance, self-righteousness, that can ever come between ourselves and our healing, or that can even seem to come between God and His image and likeness,the real self.

I remember being very much struck years ago by a story I read about Holman Hunt's picture entitled "The Light of the World." I think almost everybody knows it: the picture of the Savior standing with a lantern, beside a closed door. Somebody wrote to the artist to point out that he had made a mistake; there was no handle on the door. He wrote back to say there was no mistake; that door must be opened from the inside. I think that very few of us are willfully barring the door to the truth, the healing Christ, but I do think that with many of us it is so blocked inside with rubbish that it is difficult to get it open. In my own case I know the rubbish was just selfishness in all its forms and disguises; and I suppose our first bit of healing comes with the discovery that the false sense of self is rubbish and must be got rid of.

For about a year I had a series of small ailments that I could not seem to overcome: styes on the eyelids, gumboils, a stiff knee, a poisoned hand. At last it occurred to me that in days to come I would be sure to look back on that experience and thank God for what it had taught me, and that I might just as well begin by thanking Him beforehand for what it was going to teach me. It was wonderful, after that, how soon the healing came. I now know that exactly in proportion that I have been able to get selfwill, self-condemnation, desires, opinions, plans, outlinings, out of the way, and have been willing to let the government rest on God,—exactly in that proportion has the harmony of His presence come to bless and help me in every possible way. No years of struggle can seem long, or any healing slow, when once we begin to see clearly our own blind self-righteousness and the wonder of God's ever present love. I do not feel able to express in words the measure of my gratitude to God for His "unspeakable gift" of Christian Science and for Mrs. Eddy's life work. I think perhaps she herself has told us how best to do so when she says (Science and Health, p. 174): "Truth is revealed. It needs only to be practised."

(Mrs.) Rosalie Walkes, London, England.

When Christian Science was first mentioned to me, about twenty-five years ago, I was in fairly good health, and although I had never been considered very strong, I thought I had no need of Christian Science. Some years later, when my health failed, I took up the study of "Science and Health with Key to the Scriptures" by Mary Baker Eddy, not on account of my own condition but in search of healing for another. I went to see a practitioner two or three times a week and to my surprise I found my own condition constantly improving and I was healed slowly but surely. Then came the desire to have my friends and members of my family accept the truth, but I found it was necessary to let each one seek the truth in his own way, and that an effort on my part was in reality only hindering. One of the lessons I had to learn was patience, and patience has been beautifully rewarded. I am daily learning to cast out of my thought the sins of fear, hate, malice, self-love, selfishness, and resentment, and to have more of that Mind "which was also in Christ Jesus" and to see my brother man as I want to be seen.

When our son was a lad about eight years of age, while playing with other children in the top of the barn he made a misstep and fell headfirst to the cobblestone approach to the barn. The children came running to the house saying that he had been killed, and when my husband picked him up the child seemed to be unconscious. A great fear seized me, as there had been considerable opposition to Christian Science in the little town in which we then lived, and it was necessary for me first to cast fear out of my own thought. When that was done the child's eyelids began to quiver and he soon opened his eyes; then work was taken up for him. One of the things that came to my thought was this: Had it been a stick of wood that had fallen, no one would have given it a moment's thought, and in reality the body is as material as a stick of wood, and that being true there was nothing to cause fear in my own thought or in the thought of my neighbors; also the words of Mrs. Eddy, "Accidents are unknown to God, or immortal Mind, and we must leave the mortal basis of belief and unite with the one Mind, in order to change the notion of chance to the proper sense of God's unerring direction and thus bring out harmony" (Science and Health, p. 424). This occurred on a Saturday afternoon and the following Monday the boy went to school perfectly well and without the least discoloration of the flesh.

It is with a great sense of joy that I add this testimony of my gratitude for Christian Science to the many given weekly and monthly in our periodicals, which are carrying the message of Truth to all the world.

(Mrs.) ELIZABETH STEVENSON, Lakewood, Ohio.

4

I have great cause for rejoicing and wish to express through the Christian Science periodicals my deep and sincere gratitude for Christian Science. During four years of study I have received so many blessings that I could not enumerate them. I have been healed of organic and other diseases. In having some dental work done there was a nerve to be removed, which gave me an opportunity to prove absolutely that nerves have no intelligence of their own. When I was told that it had been removed without having been treated and without my experiencing any sense of pain, I could but give thanks to God for a degree of understanding which Christian Science has given me of the nothingness of mortal mind. I am grateful for the knowledge that Jesus' words, "If ye continue in my word

. . . ye shall know the truth, and the truth shall make you free," mean that we shall understand God and this understanding will destroy all false and sinful beliefs.

I am very thankful for the periodicals; they are indeed daily bread, giving us strength for daily needs and grace for each day. For the *Monitor* I have appreciation and love. It has given me a broader view and acquaintance with the world's affairs, and I feel that I could not do without it. The metaphysical message it brings daily is so helpful and encouraging. For the joy of teaching in the Sunday school and for membership in both The Mother Church and in a branch church I am very grateful, as well as for the many beautiful experiences which I have had in the free distribution of literature. I know it is only by being active that real growth comes to us. Words could never express my gratitude for these many blessings. My daily prayer is that I may so live that I may be worthy of the name Christian Scientist.

During the past year I have had many opportunities to prove both for myself and others God's tender, loving, protecting care and sustaining love, and the utter nothingness of that which God has not made and knows nothing of. I am also grateful to all those who have helped me on the road to happiness, freedom, joy, and the peace that passeth understanding.

(Mrs.) MARIE E. LUNDIN, Chicago, Illinois.

٠

Christian Science has been the one constant, dominant factor in my progress since childhood. At a very early age I was placed, by one of my parents who was interested in Christian Science, in a Christian Science Sunday school where, with only brief intervals, I remained a regular attendant until I left home for college. While I was still a child, the passing away of this parent left the rest of the family seemingly very antagonistic to Christian Science, but my own work and that most lovingly done for me by a practitioner was such that I clung naturally and ever more gratefully to Christian Science, without active interference from those about me. I can truthfully say that my understanding of Christian Science was my so-called "bringing up." When ready for college, I was released from the family experience and sent away in a manner so completely beyond what human planning could have outlined that I was enabled to see the certainty of the security expressed in the following verse of Hymn No. 163 of the Christian Science Hymnal:-

Lord, my times are in Thy hand: All my sanguine hopes have planned, To Thy wisdom I resign, And would mould my will to Thine.

Only once during the four years at college was it necessary to call for help from a practitioner, which resulted in almost immediate relief through absent treatment. I took the physical, medical, and oculist's examinations fearlessly every year, knowing gratefully that whatever the result it could only be added opportunity to prove more of the truth as taught in Christian Science. One such experience may help some other college student. The oculist's examination seemed to show the sight of one eye below normal. I was told to report the next week for further examination to determine whether glasses were to be prescribed. In the interval I held to what I knew of the truth about sight, and at the next examination I was classified as "normal." Though the rules of the college were rigid regarding the removal to the infirmary of those who were ill, I never had to be taken there. The understanding of Christian Science was always a preventive, and I went through periods of epidemics of pink eye,

grip, colds, and other ailments untouched. Once the symptoms of grip were manifested in a severe form, but after an evening's study of the Bible and the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, I slept through the night and rose the next morning entirely free.

In academic work, by clinging to the understanding that man manifests divine intelligence, and by performing my tasks honestly and fearlessly, I succeeded beyond the average and fully enjoyed all the work. Regular attendance at the college chapel, addressed by the most eminent divines, and a conscientious application to required courses in philosophy, psychology, and physics soon showed me that where human knowledge stops and founders, Christian Science establishes the truth of the Bible and goes on to eternal proof. Since leaving college and filling a responsible position, demanding active, progressive thinking, I have found that the understanding of God as taught in Christian Science is an ever present help. From thinking of Christian Science as an important study, I have come to know that it is the important study, since it reveals God as All, and as the starting point from which to advance to logical conclusion and thus prove the fact of real existence to replace human illusion. Through this study I have gained an understanding of God as Father-Mother and of home as the abiding consciousness of divine Love. I have been enabled to overcome all sense of grief in the presence of death, to replace a sense of loneliness with the joy of being alone with God, and the possible development of human ambition with the prayer, "Thy will be done," not resignedly but confidently, knowing that His will is always man's highest good.

I am especially grateful to be gaining a clearer view of the magnitude of Mrs. Eddy's discovery in its entirety, and of the activities of the Christian Science movement, all and individual. My prayer is the desire to seek Christian Science not for the "loaves and fishes" but in order to be about my Father's business and thus help to make manifest the little leaven that leavens the whole lump .- (Miss) HARRIET BRAD-FORD, Stanford University, California.

Christian Science is prophylactic as well as therapeutic, that is, preventive as well as curative. I know this to be true, for since I was six years old, when my mother became interested in Christian Science, I have never used medicine nor obeyed so-called material laws, and I have grown increasingly healthy and happy. This is not accidental, or, as some one once suggested to me, due to the fact that Christian Scientists are "just lucky." Rather, it is the result of a definite and certain law, the "law of the Spirit of life in Christ Jesus," which is made understandable through Mrs. Eddy's explanations.

Occasional illnesses, such as colds, headaches, acute indigestion, have been readily overcome, leaving only renewed confidence and thanksgiving in the proved realization that we can do all things through Christ who strengtheneth us. One night when a practitioner's help was asked for relief from intense internal pain, the agony stopped instantaneously as I was leaving the telephone. Such a sure and sudden result is not "coincidence," but instead a demonstration, a proof of the ever presence of God, who is Love. It exalts into that glorious freedom which the Bible tells us is promised to the sons of God. I am very glad that Mrs. Eddy has revealed to us that man is indeed the Son of God, and has shown us how simple it is for us to come into our birthright of peace and joy .- (Mrs.) ISABEL ABBOTT JUER-CENS, New York, New York.

For approximately thirty years I had been suffering from asthma, at first not intensely, but as the years passed it became so severe that I did not know what to do next. The quantity of medicines taken and the number of inhalations resorted to were tremendous and the condition became steadily worse. I was hardly able to lie in bed, and when an attack came I had to get up immediately in order to obtain some relief, which was of short duration. I also suffered so severely from colds that I dared not go to the door.

Suddenly divine help came to me. One of my nieces, upon hearing of my condition, sent me several copies of Der Herold der Christian Science, explaining that I would be able to find help therein. I read them all through but could not understand much of what I read. The testimonies gave me courage. I consulted my husband as to whether I should try this teaching. He consented and took me to a Christian Science practitioner, who lovingly explained the teachings of Christian Science to me and gave me treatment. After four weeks I was able to walk for two hours, something that had been impossible for a long time. My progress was slow, for thoughts of fear repeatedly endeavored to creep in, but when I relied completely upon the omnipotence of divine Love I suddenly became well. Now I am able to work out of doors in either east or south winds, something I had been unable to do formerly. A stomach cramp was also healed instantaneously through my own understanding. I thank God, and I am grateful to all those who helped me to attain these blessings .- (Mrs.) KAROLINA TEMPERLI, Hirzel, Zürich, Switzerland.

I gladly corroborate my mother-in-law's testimony, inasmuch as her healing awakened in me a desire to know more of the teachings of Christian Science. A few years ago, when I was near childbirth, I wrote for help to the practitioner who had treated my mother-in-law. When we believed the hour of birth to be near we telephoned to her, and although I knew but little of this teaching, two hours later a baby boy was born, the birth being painless. The joy was very great and we immediately exclaimed: "0 give thanks unto the Lord; for he is good: for his mercy endureth for ever," and I then turned to Christian Science completely.

I was healed of rheumatism and of an inflamed throat almost instantly through my own understanding; also of the fear of the return of the throat trouble each winter. I was also treated for a skin eruption which covered the entire body. The eruption left the face slowly, and it was only the fear of what others saw which hindered my healing. With the help of a practitioner, however, it became clear to me that God's child can only express purity and beauty, and that I had only to realize that I had been healed. When my husband became ill with the grip he was entirely healed in four days.

I have also learned to think more kindly of my fellow men and to guard my thought against anger. I was benefited by reading the interpretation of the twenty-third psalm in the textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, for it became apparent to me that if we reflect only love we receive only love. We are very grateful for having found the truth in Christian Science, and for the proof that it is applicable at all times and under all circumstances, to animals as well as mankind. We have proved that "man's extremity is God's opportunity." I wish to express deep thanks to God and gratitude to Mrs. Eddy, whose teachings have enabled us to know God.

(Mrs.) KLARA TEMPERLI.

.

...

Signs of the Times

["Custom"-The Christian Science Monitor, Boston, U.S.A., April 15, 1921]

It is fear that impels a man to follow custom rather than right. His grip on custom blinds him to the freedom of infinite Principle, God, whose unchanging custom is good and limitless. He is quite convinced that ruination will follow if he gets out of the rut of doing things in the usual manner. In spite of the adamant ignorance of what constitutes true unfoldment, the customary thing is having a hard siege in this day and the usual manner of thinking and doing is being shaken to its foundation. For instance, when the earth was found to be round and not flat it changed the custom of the then known world, and its thinking had to be adjusted to the new condition. The greatest blow to hydra-headed custom was when Jesus, after having been sealed in a rock tomb, demonstrated that matter, even as stone, had no substance. The Jews tried their best to keep the man who demonstrated Truth in the tomb; they sealed it tightly and placed their soldiers to guard it. Nevertheless Christ Jesus' knowledge of custom, substance, Life, pierced the claim of matter as substance, and he stepped forth from the tomb, much to the Jews' consternation and dismay. Jesus met great opposition when he insisted on healing the sick on the Sabbath; when he preached in the temple and converted people to the worship of one supreme God, instead of many gods. Certainly they did not want religion placarded in the money markets where men might see and understand and be healed of greed and lust and hate. Evil did not then and does not now want the true idea of commercialism where evil claims it has power as commerce, because it means destruction to dishonest commerce.

Christ Jesus proved that God is always with man, whether he be in the place of buying and selling or in the tabernacle. He took religion into the presence of the money changers. Jesus broke more customs than any man that ever lived. His business was breaking old, hidebound, ignorant methods of worshiping God. He preached a living God, or divine Principle, a supreme God, as powerful in the mart or on the street corner as in the synagogue. Men must awaken from the sleepy, indolent apathy that rocks them on and on into the belief of following custom, rather than intelligent, right reasoning. Resisting God will not keep His presence from being demonstrated, because there is no way that true, correct thinking can be barred even from the midst of the money markets, and God is Mind, always thinking.

Without a knowledge of this Principle, God, the infinite intelligence, Mind, which does govern and guide the affairs of men, one might be tempted to choose cudgels to break the dream of matter. The knowledge of Mind brings to one the assurance that the only cudgel one can use successfully in waking mortals to the unreality of matter, is the demonstration of the truth about every lie. This sort of cudgel is mightier than matter. It is strength. Mrs. Eddy says, "This strength is like the ocean, able to carry navies, yet yielding to the touch of a finger" (The First Church of Christ, Scientist, and Miscellany, p. 121). When one attempts with the cudgel of human will to interpret the manner in which a government should be formed; when he limits with his own narrow vision or understanding the unfoldment of true democracy, he is attempting to stand in the place of God, and although he may have behind him the arguments of custom, the hurrahs of numbers and popularity, these will avail him nothing. He must change his viewpoint and enlarge his understanding of custom, or he will go down with the destruction of the custom on which he stands.

Until one learns something about Christian Science and how to use the rules given in the textbook, it is customary to be afraid of sickness, sin, and disease. It is natural for one to be fearful until he learns better, because he has no idea that he can overcome the gripping suggestions of evil by spiritual understanding, which causes a complete reversal of his thinking. Custom leads one into strange ditches. When it becomes habit, even one's good deeds are done without thinking. Giving money to the church or to charity, dropping a coin into the hat of a street beggar, writing letters of condolence or greeting, or ushering in church on Sunday, seating people as one would put letters into a folder, all avail nothing unless there is thought back of these acts; they are nothing more or less than habits, rut, custom. When a man departs from conventional procedure he is usually adjudged eccentric or queer. Who knows but that he is striving with all his might to break down the old veil of custom, kicking against the habits and ruts imposed upon him by wellmeaning ancestors?

On page 11 of "Unity of Good," one of the several books which Mary Baker Eddy, the Discoverer of Christian Science, wrote, is this statement: "Jesus taught us to walk over, not into or with, the currents of matter, or mortal mind. His teachings beard the lions in their dens. He turned the water into wine, he commanded the winds, he healed the sick,—all in direct opposition to human philosophy and so-called natural science. He annulled the laws of matter, showing them to be laws of mortal mind, not of God. He showed the need of changing this mind and its abortive laws. He demanded a change of consciousness and evidence, and effected this change through the higher laws of God."

The truth about custom is infinite; it is not judging a man for doing things in a way that is different. Christian Science is unfolding with great rapidity and it must enter the innermost life of every individual. It must go into business and into pleasure. Joy, happiness, and honesty must be carried into the places of exchange; erroneous custom must be exchanged for righteous custom throughout the whole earth. Let Christian Science be understood in the streets, on the street corners; let divine Principle unfold the way and do the protecting. The ark does not need the protection of any mortal. Christian Science cannot be commercialized. It cannot be separated from God, or Principle, and there is no custom or commerce than that which is known of Principle.

[From "The Decline of Religion, a Protestant View," by DeWitt L. Pelton in The Forum]

A great deal of carping criticism of religion is due, strangely enough, to the idealism of the age. It is for this reason men are impatient of anything else but absolute perfection. Limping progress and conventional defects irritate to-day where perhaps they would have been mildly tolerated a half century ago.

*

["Health and Religion Linked in Sermon"—From Oakland (California)

Enquirer]

The pastor of Plymouth Congregational church in a sermon said:

"We are linking health and religion to-day as never before. . . . Christ never ran from the unclean, but he was immune because he was pure. God not only made a perfect system of laws, but provided penalties for transgression. Our lives are records of obedience or disobedience. We owe much to Christian Science . . . for bringing to the fore this healing power. I believe in the miracles of the

1.0

. :

New Testament, because I have seen in my own day miracles of healing that could not be doubted. Think disease and talk it and it will visit you. Think health and you'll get it."

[From an Editorial in Boston (Massachusetts) Sunday Advertiser]

Christian Science, of late years, has made such extraordinary progress in this country, far greater in its percentage than all other religions combined, because Mrs. Eddy, founder of that religion, concentrated attack on fear, and thus released for active service among her followers the unlimited energies that fear had repressed and kept down. Remove fear and you give confidence, and confidence is half of success.

[From "A Sunday Night at Park Street," by Allen Chesterfield, in The Congregationalist]

A popular evening feature introduced in recent years by the pastor [at Park Street church, Boston] has been a prelude in which he answers questions. . . . A question was: "I am an invalid. Can I get well and keep well through prayer?" To this the pastor said: "I am a great believer in prayer. God never sends pain or sickness. You can be marvelously helped through prayer. The church should do more healing than it does. I have seen scores of people raised up through prayer."

["Labor Endorses Prohibition"-From The Pioneer]

Hon. G. D. Robertson, Minister of Labor in the Dominion Cabinet, declared: "The prohibition legislation has, in my judgment, greatly increased the efficiency of our Canadian workmen, as well as their sobriety, and has brought untold happiness and comfort to their wives and dependent children. The economical and safe operation of our public utilities has been greatly enhanced."

John W. Bruce, general organizer for the United Association of Plumbers and Steamfitters of the United States and Canada, says: "I cannot speak too highly of the results which I have seen from the enactment of prohibition laws throughout this country, and can safely say that the workers of Canada to-day are socially and morally improved, and will reap a greater measure of success in their efforts to solve the great problems of the future than they have in the past, because of the abolition of the liquor traffic."

[From "Modern Democracies," by James Bryce (Viscount Bryce)]

Within the hundred years that now lie behind us, what changes have passed upon the world! Nearly all the monarchies of the Old World have been turned into democracies. The States of the American Union have grown from thirteen to forty-eight. While twenty new republics have sprung up in the Western hemisphere, five new democracies have been developed out of colonies within the British dominions. There are now more than one hundred representative assemblies at work all over the earth legislating for self-governing communities; and the proceedings of nearly all of these are recorded in the press. . . . A not less significant change has been the universal acceptance of democracy as the normal and natural form of government. Seventy years ago . . . the approaching rise of the masses to power was regarded by the educated classes of Europe as a menace to order and prosperity. Then the word Democracy awakened dislike and fear. Now it is a word of praise. . . .

Among the changes and tendencies characteristic of the democratic spirit in America, none has been better worth studying than the dying down of the old tendency to aggression abroad. The sentiment which favors peace and

respects the rights of neighboring States has grown slowly but steadily. . . . No Englishman who remembers American politics as they were half a century ago, and who, having lived in the United States, has formed an affection as well as an admiration for its people,-what Englishman who lives there can do otherwise?-will fail to rejoice at the many signs that the sense of public duty has grown stronger, that the standards of public life are steadily rising, that democracy is more and more showing itself a force making for ordered progress, true to the principles of liberty and equality from which it sprang. . . . The longer a man lives, the more is he surprised at the audacity of prophets, of the foretellers of evil no less than of the visionary enthusiasts of progress. I can well remember the gloomy forecasts in which not only European travelers but Americans themselves indulged in 1870 when they contemplated the politicial evils which then afflicted the United States, and which made municipal administration, and in some States the judicial bench itself a byword and reproach among the nations. Most of those evils have now disappeared.

[From The Living Church]

In a recent sermon published in the Transcript, a notable contribution has been made to the discussion which Massachusetts clergymen of all communions are making on the subject of Church Unity. The preacher said [in part]:—

First, there can be no church reunion that does not recognize to the fullest the [fundamental] of religious freedom. That is above all else what America, interpreted religiously, means. You can see the thought of mankind moving toward religious freedom like an Arctic iceberg drifting toward the great warm currents of the ocean. It is irresistible, this movement toward religious freedom. In that direction and in no other lies unity. The coming church must be a church of democracy, a church of the people, for the people, and by the people, and to the glory of God.

These rates are net and take the place of the former 10% discount on periodical orders.

The uniform retail price on the Sentinel is now 10 cents a copy, and on the Journal 35 cents a copy. The Monitor single copy price remains at 5 cents.

Discounts to reading rooms on subscriptions and on orders for general publications remain as before.

Christian Science Sentinel

Church Notices

From the Clerk of The Mother Church

Church Teners.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to Edward L. Ripley, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in *The Christian Science Monitor*, were run off at the time of their publication in the *Monitor*.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 81/4" x 103/4". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for *The Christian Science Monitor*, *Journal*, *Sentinel*, *Quarterly*, and *Heralds*, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and immediate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

There will be placed on sale about June 20, 1921, six new pamphlets, containing articles reprinted from the Christian Science periodicals, as follows: "Government," "Employment," "Work and Play," "Progress," "Occupation," "Relationship." Orders for these pamphlets may be sent at once, to be filled on the date of issue. Price 5 cents a copy. Reading Room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U. S. A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U. S. A.

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U.S.A.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder

of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large Type (18-point) on Warren's heavy India Bible paper, bound in leather. Size 8 by 1034 inches. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

German Translation. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900. 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

German Translation. Alternate pages of English and German. Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

VOLUME XXIII

JUNE 18, 1921

NUMBER 42

Annual Meeting of The Mother Church

THE meeting opened by singing Hymn 195, "Shepherd, Show Me How to Go," by Mary Baker Eddy. The President, Mr. Willard P. Emery of Detroit, read the following selections from the Bible and "Science and Health with Key to the Scriptures," by Mrs. Eddy:

Scripture: John 15:1-16. Science and Health: Pref. xi:9-24; 126:9-14; 323:28-5 (next page); 323:6-12; 495:27-8 (next page); 261:4-7.

The reading was followed by silent prayer, followed by the audible repetition of the Lord's Prayer. Hymn 153, "Missionary Hymn," was sung by the audience, after which the President announced the names of the officers for the ensuing year as follows: President, Rev. Irving C. Tomlinson, C.S.B., of Boston; Treasurer, Mr. Edward L. Ripley; Clerk, Mr. Charles E. Jarvis. The retiring President, Mr. Emery, made the following remarks:

Once again we are meeting from all parts of the field to hear of the growth and progress of our movement. It is a time of rejoicing and gives us the satisfaction that comes as a result of work conscientiously done, yet recognizing very clearly that our individual accomplishments, no matter how great, are but an evidence or proof of what is still to be done in fulfilling the admonitions of our Way-shower, Christ Jesus. The year just closing has given us a splendid opportunity to show our loyalty and to prove that the churches of the field are fruitful branches of The Mother Church vine. Not since the building of The Mother Church and its extension have we had such an awakening of its members to the opportunity of supporting it and its activities, as we have had during the past year. I am sure we have learned a lesson in appreciation that will never be allowed to slip from our consciousness. We have had required of us the need of greater fidelity, unity, and the fuller realization of our responsibility in upholding The Mother Church, through the recognition of its government by the Manual as given us by our revered Leader, Mary Baker Eddy.

During the past year we have been called upon to prove this by our steadfastness in standing for, knowing, and accepting the leadership of Truth. Arguments have come, many of them clothed in subtle forms, but a clearer insight and penetration of their purpose to weaken the fabric of our movement have shown us their error. We cannot cease from our efforts to carry on to still greater fruitage the demonstration of our Leader. Our experiences have taught us that we must be constantly alert and on guard that we do not feel that our work is done, when in reality it is just beginning. We are grateful—every one of us—that we have been given the opportunity to stand porter during these times when the singleness of our purpose and our sincerity are put to the test. From every side the reports come of growth in understanding and greater demonstration of the efficacy of Christian Science-proving that regardless of the temptations to turn aside, the loyal seekers for Truth are finding it, and finding through their understanding power to meet every need of the hour. Our trust in God and His power to meet these conditions has brought fruitful demonstrations of healing. Growth has come—progress that proves a greater understanding of Christian Science as expressed in the priceless writings of our Leader—and in its government by The Mother Church Manual which her prayerful demonstration has given us. Our individual growth during the past twelve months is giving us the strength to carry further the demonstration that we have been making—the regeneration of self. It has been rightly said that we grow when we have obstacles to overcome, and prove our true worth to a more certain degree when we are under great stress and responsibility. So through the stir of the past year the demand has been to forget self and find our identity in the defense of Truth.

I want again to express to you my keen appreciation of the privilege of serving The Mother Church as its President during the past year. It has been a joyful service and I am indeed grateful. It gives me great pleasure to introduce to you our President for the coming year, the Rev. Irving C. Tomlinson, C.S.B., of Boston, Massachusetts.

Mr. Tomlinson spoke as follows:-

I acknowledge with sincere gratitude this privilege of serving for the coming year as President of The First Church of Christ, Scientist, in Boston. The Manual of The Mother Church by Mary Baker Eddy makes this provision for the Annual Meeting (Art. XIII, Sect. 1): "The regular meetings of The Mother Church shall be held annually, on Monday following the first Sunday in June. No other than its officers are required to be present. These assemblies shall be for listening to the reports of Treasurer, Clerk, and Committees, and general reports from the Field." Never before in the history of Christian Science was its revered Leader so much beloved as at this hour. Never before was her church. "The Mother Church," so well understood and so profoundly appreciated. Never was its splendid record so full of spiritual victories by its members as in the past twelve months. It is therefore no surprise that this has been a year marked by great increase in visible membership and a still greater increase in spiritual achievement—in signal victories over sin and in an abundant harvest of healing.

Who is there that does not remember the first time he beheld this visible symbol of the invisible verity, the "house not made with hands, eternal in the heavens"? "Adding to its ranks and influence," as our beloved Leader says in "Retrospection and Introspection," "this spiritually organized Church of Christ, Scientist, in Boston, still goes on" (p. 44). Standing before the original Mother Church we are thrilled as we read that noble, loving inscription cut in the granite tablet of the tower and placed there with the approval of Mrs. Eddy. It reads as follows: "A testimonial to our beloved teacher, the Rev. Mary Baker Eddy, Discoverer and Founder of Christian Science; author of 'Science and Health with Key to the Scriptures;' president of the Massachusetts Metaphysical College, and the first pastor of this denomination" (Pulpit and Press, p. 24).

Copyright, 1921, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as second-class matter. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of October 3, 1917, authorized on July 11, 1918.

The

d_{ir}

Reviewing our progress Science-ward, we realize how very little we have understood the meaning of this historic inscription and those vital words, Testimonial, Teacher, Discoverer, Founder, Author, President, and Pastor, but we do know that as the membership rightly estimates the truth there inscribed, then does The Mother Church fulfill its healing and redemptive mission, for the beautiful outward structure is but the symbol of the living testimonial to our Leader's work. The illuminated deeds of its membership are the true testimonial and their certificate to her character.

The archives of The Mother Church, the history of its membership, the achievements of the Christian Science movement, these articulate the demonstration of our Leader's understanding, obedience, and self-abnegation. This Mother Church is indeed unique, as our Leader says, but it does not stand alone and apart from the great historic procession of Christ's Christianity. It is a link in "the chain of scientific being reappearing in all ages, maintaining its obvious correspondence with the Scriptures and uniting all periods in the design of God" (Science and Health, p. 271).

The spiritual idea which Christian Science reveals, and which The Mother Church symbolizes was measurably seen by Abraham; the fundamental laws for its human manifestation were given by Moses. Its appearance in the flesh was foretold by Isaiah: "A virgin shall conceive, and bear a son, and shall call his name Immanuel"—God with us, and this shall be his essential character, he shall "know to refuse the evil, and choose the good." This Christ-idea lived by Jesus of Nazareth, hidden from sight for sixteen centuries, which knows how "to refuse the evil, and choose the good," our revered Leader discovered, and this church is a testimonial to her discovery. It is the visible witness to the spiritual structure, the Church Triumphant.

There is a sweet picture of Mrs. Eddy as Discoverer, which comes before the eyes of those who were the members of her household. They see her, in the morning hours of each day, seated in her rocking-chair beside her writing table in the bay window of her study, with the Bible and the textbook in her lap. She would first read from the Scriptures and then from Science and Health. This was her "bread from heaven," her inspiration and revelation. We know that out of that light she had come forth as Discoverer and Founder. The religion which she founded then is Mrs. Eddy's legacy by which humanity is enabled to choose the good and refuse the evil. To reject the evil and accept the good is Christian Science itself; to deny the error and to affirm the truth is the very kernel of Christian Science work. Mrs. Eddy's gift to humanity is the organization which makes it possible for all mankind to come to the life-giving waters. The Mother Church is the human instrumentality by which the truth is made accessible through its activities, departments, safeguards, and by-laws.

What The Mother Church does is to give us the law of true Christianity, which unfolds to us in divine order. Theocracy, the human expression of Christ's kingdom, is defined in the dictionary as "a government among men recognizing the immediate sovereignty of God and receiving His revelations as its civil law." This is an exact description of The Mother Church under the Manual; a direct government by God. Such was the Hebrew state from Moses to monarchy. This people had a leader, revelator, inspired prophets, men of God, judges, but no king. The Mother Church is an organization the government and laws of which are God-derived, a theocracy in which, also, each

member who follows its teaching is truly self-governed—that is, he demonstrates that God alone governs him. The rules of this theocracy promote health, freedom, and dominion, which are attainable only by choosing good and rejecting evil. These are the rights and privileges disclosed by revelation and won by demonstration. Our beloved Leader's life is a living example of the rich harvests which ripen for toilers in this vineyard, and she is a witness of the support and protection which the Church Manual affords to the citizens of a true theocracy.

The writing of "Unity of Good" shows Mrs. Eddy's amazing capacity for work. It was written in one of her most busy periods. She was then living at the college on Columbus Avenue. In the midst of her labors her husband passed on; she was engaged in buying her residence on Commonwealth Avenue, doing her largest class teaching, writing for The Christian Science Journal. Yet she had time to dictate in the morning hours that wonderful work on metaphysics, "Unity of Good." When the first edition of Science and Health was published Mrs. Eddy had reached the age at which one of the most powerful business men in America retired from his business activity, yet she was only at the beginning of her "Father's business." She had passed threescore years and ten when she wrote "Rudimental Divine Science," "No and Yes," "Retrospection and Introspection," "Pulpit and Press," "Christian Science versus Pantheism," Messages for 1900, 1901, 1902, most of "Miscellaneous Writings," the Church Manual, and "The First Church of Christ, Scientist, and Miscellany."

I first met Mrs. Eddy when she was 76 years of age. It was after this that she gave us the Christian Science Sentincl, Der Herold, The Christian Science Monitor, and the topics of the present "Christian Science Bible Lessons." It was after this that she also founded the Board of Lectureship, the Committee on Publication, and the Board of Education, built the church in Concord, New Hampshire, and this extension of The Mother Church. How clear it is that our beloved Leader's life testifies to the blessings which flow from loyal service to The Mother Church, whose members know how "to refuse the evil, and choose the good." Our Leader's activity enables us to prove that membership in The Mother Church and whole-hearted obedience to the Church Manual do not narrow but rather broaden our service to our fellows. A Boston daily newspaper once requested that she comment upon her favorite text, and through its pages she taught the world the science of being as it now appears on page 340 of the textbook, beginning, "The First Commandment is my favorite text." He who refuses the evil and chooses the good in full accord with the Church Manual will find the pathway unobstructed before him, the valleys filled and the mountains brought low.

To tend and water the vineyard means labor, not ease. Mrs. Eddy knew no hours nor seasons for her labors. A copy of the textbook was at her bedside, and often in the midnight watches she was at work upon its pages. Since Mrs. Eddy gave so much care and labor to present her revelation rightly, we likewise should give unceasing care to the consecrated study of her writings, in order that we may truly understand her own illumined statements about that revelation. There is especial need for a correct appreciation of the spirit as well as of the letter, that we may imbibe her own interpretations of her teachings and admonitions. Frequent obstacles to progress are faulty interpretations or failures to obey Mrs. Eddy's instructions.

There is need on the part of all of us for greater love for

ç

our revered Leader. There should be more intelligent appreciation not only for her revelation, but for her untiring devotion and sacrifice. A proper sense of love for her will bring us nearer to her work. Knowing her rightly, we can know her revelation rightly. It is not for me to presume to praise Mary Baker Eddy. Let the army of regenerated sinners, rescued invalids, lightened hearts, enriched thinkers, speak her worth. "As you work, the ages win," says our Leader in Miscellany (p. 188). Mary Baker Eddy's record is written in the progress of a world. Truly do the words of Isaiah describe her: "How beautiful upon the mountains are the feet of him that bringeth good tidings . . . that publisheth salvation; that saith unto Zion, Thy God reigneth!"

REPORT OF THE TREASURER

Report of the Treasurer showed the finances of the church to be in good condition, free from debt and a substantial surplus on hand.

General Fund.—Expenditures for the year, \$558,896.30; balance on hand May 31, 1921, \$271,110.05.

Real Estate Fund.—Expenditures for the year, \$60,030.54; balance on hand \$5965.81. As a result, the property acquired in the vicinity of The Mother Church is now entirely free from debt and is available for use in the future as additional facilities are needed. The Mother Church has no financial indebtedness of any kind except for current bills.

Special Funds.—On hand May 31, 1921: Unrestricted bequests to The Mother Church, \$70,271.14; special bequests to be used for the purposes specified by the donors, \$10,252.32.

Christian Science War Relief Fund.—Expenditures for the year, \$64,627.16; balance on hand, \$139,910.64. Appropriations were made to Great Britain, France, Germany, Switzerland, Holland, Italy, Russia, and elsewhere. Included therein was the sum of \$10,000 to the European Child Feeding Fund, which was augmented by contributions from branch churches and individuals aggregating \$6417.60, making a total of \$16,417.60.

Children's Busy Bee Trust Fund.—Expenditures for the year, \$30; balance on hand, \$2750.29. In order that the balance still available may be disbursed as our Leader desired, the Treasurer will be glad to receive, directly or through friends, the present addresses of contributors to this fund who have not yet received their share in reimbursement.

Christian Science Benevolent Association Current Fund.

-Expenditures for the year, \$506,533.63; balance on hand, \$14,275.51. In addition, United States Liberty bonds are owned in amount of \$110,000 par value.

Construction of buildings, improvement of grounds, and additional furniture and equipment called for the sum of \$38,630.09. Cancellation of the indebtedness of the Association at the bank \$239,955.83, and the immediate necessity of maintaining and conducting a working fund \$227,947.71, which included provision for non-paying and part-paying guests to the extent that the funds of the Association permitted.

The Benevolent Association has no financial obligations other than for current bills.

Permanent Fund of the Benevolent Association.—Expenditures for the year from this fund, \$481.76; balance on hand, \$33,965.57.

AUDITORS' REPORT TO THE TREASURER

We have audited the various cash and security balances entering into your report as of May 31, 1921, and find them to be as stated therein.

Very respectfully,

HARVEY S. CHASE & COMPANY, Certified Public Accountants.

REPORT OF THE CLERK OF THE MOTHER CHURCH

We are grateful for the privilege of announcing that the affairs of The Mother Church are in a prosperous condition. The adjacent property, held in the name of the Shawmut Real Estate Trust for The Mother Church, is now entirely paid for. The Christian Science Benevolent Association is free from debt and there is a substantial balance in the General Fund of The Mother Church, upon which heavy demands are likely to be made during the coming year.

From July 1, 1920, to May 31, 1921, 2560 lectures on Christian Science have been delivered by members of The Christian Science Board of Lectureship to audiences aggregating approximately 2,036,000 persons.

Since our last Annual Meeting fifty-five Christian Science societies, three university societies, one college society, and thirteen new churches have been recognized as branches of The Mother Church. Thirty Christian Science societies have changed their titles from society to church. This indicates a substantial growth in branch organizations in twelve months. The growth in membership of The Mother Church during the past year has been normal. It is interesting to note that since the beginning of our organization there has never been a year in which the growth in membership has shown a phenomenal variation, but the average numerical increase has been steadily advancing. Since the last Annual Meeting two circular letters have been sent to the field, one on November 3, 1920, announcing the need of funds by The Mother Church, the second letter on April 3, 1921, giving particulars regarding The Christian Science Benevolent Association and its immediate needs. The response to both of these letters has been most generous and gratifying. The demonstration which our branch churches have made of giving to our Mother Church emphasizes the unity between the branch and the parent vine, and this support of The Mother Church is reflected back to the branches through the increased vigor of our cause as a whole. In the words of our beloved Leader, "The Cause, our Cause, is highly prosperous, rapidly spreading over the globe; and the morrow will crown the effort of to-day with a diadem of gems from the New Jerusalem" (Retrospection and Introspection, p. 85). The Directors take this occasion to express their gratitude and appreciation for the many encouraging and helpful letters received expressing gratitude for Christian Science and loyalty to our beloved Leader, Mary Baker Eddy. In an article in The Christian Science Journal for November, 1888, Mrs. Eddy gives this definition of the phrase "Loyal Students": "I mean those who are loyal to God, to justice, to Truth and Love. Thus loyal, these students and myself are one in motive and aim,-united indissolubly in the bonds of Christian Science. This bond is not personality; it is Principle."

Benevolent Association.—Since the last Annual Meeting, The Christian Science Benevolent Association Sanatorium has completed its first full year of operation, and during even this brief period ample evidence has accumulated to justify our beloved Leader's wisdom and foresight in thus providing a place for those who are in need of the loving

care and assistance provided therein. In addition to the care of guests along lines which are wholly in accord with Christian Science methods, there has been put into operation a system of technical training for nurses which is expected to result in great benefit to the entire field, inasmuch as during the three-year period of service each nurse will have been given such practical instruction as is necessary for the sick room. It is the purpose of the Trustees to erect and equip, at the earliest possible date, an additional building to be used for housing the nurses and other employees, in order that the entire capacity of the three buildings already in operation may be available for guests. The Trustees deem it important that those who are serving our cause so efficiently and faithfully in this institution shall be most comfortably provided for in order that they may have the opportunity for quiet and study which is necessary to the performance of their duties. In the interest both of economy and convenience it is intended to equip the present laundry building with machinery such as is needful for handling the laundry work of the institution, and it is expected that this will be done within the next few months. Much has been done in beautifying the grounds on that part of the property occupied by the present buildings, and some further road work needs to be completed during the present year.

The field will be glad to know that there is no indebtedness against the Benevolent Association other than current bills for supplies, which are taken care of regularly and promptly. It may also be of interest to know that of the total number of guests accommodated, approximately one-third of the number have been assisted, either in whole or in part, in the matter of expense incident to their stay at the Sanatorium, and that more than twenty-five per cent of the entire expenditures for operation to date has been in the nature of benevolence extended to such guests. In order that the work of the Benevolent Association may be broadened through providing for the additions pointed out in this report, as well as for charitable assistance, a continuance of the liberal contributions which have enabled the carrying forward of the project to its present stage of usefulness is needful.

Trustees Under the Will of Mary Baker Eddy.—During the year ending May 31, 1921, the Trustees Under the Will of Mary Baker Eddy have expended "for the purpose of more effectually promoting and extending the religion of Christian Science as taught by" our revered Leader, Mrs. Eddy, the sum of \$187,061.50. This amount has been dispensed as follows:

Seventy-three new branch churches and societies have been given one hundred dollars each as assistance in paying the expenses incident to their first lectures, and sixteen Christian Science organizations at universities and colleges have been assisted in a like amount in paying the expenses of annual lectures. The Trustees have given further aid to branch organizations in their lecture work by assuming the excess traveling expenses of lecturers upon their tours to foreign fields, to the amount of \$11,272.31. of \$8198.77 has been spent in assisting branch organizations in the purchase of books and periodicals presented to public and other lending libraries. Six hundred and eightysix branch churches and societies whose reports for the year ending October 31, 1920, indicated that they were entitled to pro rata assistance in the free distribution of Christian Science literature, have been given \$25,467.55. Forty branches of The Mother Church, located in England, Scotland, South Africa, and twenty different states of the United States and Alaska have been paid \$133,222.87 to enable them to dedicate their edifices free of indebtedness.

Committee on Publication.—During the past year our Committees on Publication throughout the field of Christian Science have had about one thousand occasions for correcting misrepresentations of Christian Science or Christian Scientists in public print. This number is about the same as in other recent years. It is to be observed, however, that misrepresentation and misunderstanding of Christian Science continues to be expressed mainly and almost exclusively as the reiteration of impositions on the public by professional opponents. Otherwise, most writers, editors, and publishers manifest increasing appreciation for Christian Science and increasing respect for Christian Scientists. It is also to be observed that the most biased writers against Christian Science usually feel obliged to make admissions which virtually annul their criticisms. For instance, the author of the latest book rehearsing the timeworn contentions against Christian Science put in the following admissions: "Christian Science has proved that it must contain large elements of important truth, for it has laid hold of many minds and spread rapidly among men. The adherents of this faith are generally people of intelligence and culture and some of them are of marked ability. . . . Christian Science certainly meets some wide and deep need in our day. Its success indicates that it has either discovered some new truth, or else it has emphasized and utilized some old truth which other forms of religion have neglected and let fall into desuetude." Of course, such admissions are most significant when they are made by opponents.

One of the notable events of the past year was the consideration given to Christian Science by the bishops of the Anglican communion at their conference in London last September. The nature of their conclusion can be briefly indicated by the following excerpt from the encyclical letter issued for the bishops of his church and communion by the Archbishop of Canterbury: "There is much in Christian Science which ought to be found within the Church, where it would be supplemented by truths which in Christian Science are neglected." Of course the fact that this conclusion did not express entire agreement with Christian Science does not keep it from amounting to a significant change of attitude.

In the performance of their duty to guard the legal rights of Christian Scientists, our Committees on Publication have had a busy year. Most of the legislative bodies in this and other countries have convened during the past year, and many of them have been plied with measures calculated to restrict the rights of persons who cherish religious and medical freedom. Happily most members of legislative bodies are fair-minded, and will amend or reject a bill when it is shown to be oppressive in its purpose or effect. Thus, the immediate sponsors for certain important bills in Congress have shown the most praiseworthy desire to respect the rights of Christian Scientists, and of other citizens. So also the same respect for civil and religious liberty has been continually shown by state legislatures.

Among the notable legislative enactments of the past year, perhaps the most important from the viewpoint of Christian Scientists are the new acts regulating the practice of medicine in the State of Nebraska and the Province of Nova Scotia, in both of which clauses were inserted providing that such acts should not be construed to affect the practice of their religious tenets by members of any church. Similarly, the Legislature of the State of Iowa repealed a clause in the medical act of that State which might possibly have been construed as restricting the practice of Christian Science. In Florida in a case not involving Christian Science,

. .

. . .

*

5

3

出記 オウエ

1:

::

7

the state Supreme Court upheld the right of parents to rely on the practice of religion rather than the practice of medicine for their children. Notwithstanding these incidents and others which deserve to be mentioned, there never was a greater need than there is now for vigilantly maintaining medical and religious freedom against both the direct and the indirect uses of compulsion and restriction.

Reports of progress during the past year from various sections of the field were read by Mr. Frank Walter Gale, C.S.D., of San Francisco, and Mr. George Monroe Giffen, C.S., of Los Angeles, California.

These were followed by reports from the floor, and the meeting closed with the Doxology.

True Activity

4 4 4

ANITA REED

TWO students of Christian Science were discussing precious stones. One remarked that a diamond was her
favorite gem because it expressed purity; the other said
that, to her, a diamond expressed activity. Now it is only
because of its purity that a diamond can express activity,
for it is only the pureness and transparency of this gem
that enable it to reflect every ray of light. So it is with
man; the man who really manifests activity must be that
man who is least material. The purest man the world has
ever known was Jesus the Christ, and there is not the
slightest doubt that he was the most active. The activity
Jesus manifested was very different from the world's general conception of that word.

Activity is not merely physical exertion or emotion, doing something and letting everybody around know that it is being done. True activity is the reflection of God, of Life, Truth, and Love; it is right thinking. Just as the diamond could not reflect the light or express activity without purity, so man could not possibly manifest true activity were he not pure. Dense materialism cannot reflect the light of Truth. Materialism, sensualism, and egotism can know nothing of divine activity. On the other hand, Jesus knew the nothingness of materialism. Through his boundless purity he expressed activity, and that is why he was always about his Father's business, always at his post day and night. Every student of Christian Science knows that while his thoughts are clouded with materialism he cannot think actively; and he also knows that when materialism has given place to the activity of Principle he can heal through the purity of his understanding.

Man and the universe as created by God are forever in existence, forever active, and there never was a moment when that was not so. It is only materialism that prevents us from seeing this; it is only materialism that has to go; and it is only by constant striving and through persistent fighting with the supposititious carnal mind that we can clear away the veil hiding the divine activity of God's universe from us. The carnal mind is the opposite of good, but it does its best to pass itself off as good. It was the carnal mind, the devil, error (they all mean the same thing) that, through Herod, would have killed the child Jesus or the Christ-idea. It was the carnal mind that tried to kill Jesus at Calvary, and it is the suggestion of this supposititious carnal mind that would attempt to divide the Christian Science movement. But because this carnal mind is a negation-the absence of God-it was unable to kill the infant Jesus, it was impossible for it to kill the Christ, and it can never destroy Christian Science, nor hinder the divine activity of God's universe.

One little speck of dust in a watch might stop the wheels; dust or dirt allowed to accumulate on any machinery will eventually prevent it from working harmoniously, or possibly stop it altogether. The dust of materialism and loose thinking, unless detected and cleared away, will also accumulate and befog our understanding. Man and the universe, created by the Father-Mother God, is complete, harmonious, and eternal, and this is the only activity there ever can be. It is only ignorance that keeps us from seeing this all the time, but we do catch glimpses of the reality of being, and the more we lose our materiality or false sense of life, the more frequent will these glimpses of harmonious action be. But so long as we believe that we are going to get any pleasure out of criticizing our neighbors' actions, and so long as we spend undue thought on what we shall feed and clothe our bodies with, we are only adding dust to our mental machinery.

Mental laziness and inactivity, sometimes expressed by a disinclination to think or study, are the lie or reverse of spiritual activity. While occupied with thoughts tending toward the gratification of the material senses in any form, we can scarcely expect our thoughts to be filled at the same time with that pure spiritual understanding necessary to heal in the way that Jesus did. In her Message to The Mother Church for 1900 (p. 8) Mrs. Eddy said, "In this struggle remember that sensitiveness is sometimes selfishness, and that mental idleness or apathy is always egotism and animality."

Since God is eternal, there is no limit to divine activity, and yet a man is constantly limiting his actions. Perhaps one is asked to undertake a certain piece of work, and, although this might be a splendid opportunity for progress, he does not accept because of his great fear that he will not be able to carry it out satisfactorily. Now, if he recognized this as an opportunity for progress, and if he knew that man as the idea of God must have dominion over the situation, he would also know and prove that divine Principle is operating all the time, and therefore he could not fail to succeed. Activity belongs to man here and now, and, whatever the individual's work may be, the understanding of divine activity is going to enable him to demonstrate intelligence, alertness, and accuracy. He will learn that certain socalled laws that he has always believed in were only made by mortal mind, and that, having wakened to their unreality and nothingness he need no longer believe them or be held down by them. For instance, it is believed by many that the artist is often dreamy and unbusinesslike. Even with a slight understanding of divine intelligence a man must see the utter absurdity of such a so-called law. Because man's birthright is dominion, it is not necessary for one to be tied down by any belief of temperament, heredity, or nationality.

The Christian Science movement is essentially a movement of activity, and each student has his part to do in seeing that he really is active and not asleep; it is while a man sleeps, or, in other words, while he is befogged by materialism, that the enemy or mortal mind will creep in and sow the seeds of error. But if he is always awake, alert, and at his post the enemy will never stand a chance. Our international daily newspaper, The Christian Science Monitor, is like the "leaven, which a woman took, and hid in three measures of meal, till the whole was leavened." It is going out into the highways and byways of the world, and quietly but surely and steadily it is leavening the whole lump of materialism. Truly this is activity!

On Losing Your Way

THE Hebrew people, it is well known, used the historical books of the Old Testament as a means of instilling spiritual instruction. For this purpose it does not matter whether the incidents of the Hexateuch are historical or not; for this purpose it matters not at all whether Abraham existed in the flesh, or was a mere figment of some writer's imagination; and for this purpose it matters nothing whether the record of the forty years in the wilderness is history or allegory. What does matter is that the spiritual lessons founded on these stories, and intended to be drawn from them, should be scientific. "The one important interpretation of Scripture," Mrs. Eddy writes, on page 320 of Science and Health, "is the spiritual."

The story of the exodus and of the entry into Palestine is a perfect example of this teaching. The exodus typifies the beginning of the individual struggle out of the flesh toward spiritual realities. The Book of Exodus, with the other books of the Pentateuch, describes the struggle between material sense and spiritual perception, whilst the last book of the Hexateuch tells the story of the victory over the flesh by those who have come through the conflict. The forty years in the wilderness were to the children of Israel precisely what the forty days in the wilderness were in after years to the Christian Church. But whereas Christ Jesus came through gloriously triumphant, a whole generation of Israelites perished of their own materiality between the cities of Egypt and the banks of the Jordan.

The story itself is so well known that it is absolutely unnecessary to repeat it. Every reader of the Bible is familiar with the conflict of Moses, the man who understood Principle, with the magicians of Pharaoh whose efforts were based on a belief in the powers of the human mind. When the limitations of the magicians had been disposed of, and the Israelites had been permitted to depart, the passions of Pharaoh, the very king of materiality, were aroused to attempt their pursuit and recapture. And so, at the Red Sea, there was given to the Israelites that further proof of the power of Mind over matter, when they passed between the heaped up waters into the peninsula of Sinai, and witnessed the absolute destruction of materialism in its effort to harm them. What followed proved how little progress had been made by the people in the effort to lay aside materiality, and become obedient to Spirit. So far from having learned to trust the power of Spirit, they were already sighing for the fleshpots of Egypt. Not even the manna falling from the sky was sufficient to destroy their inveterate materiality. They murmured for water, with the result that Moses, wearied with their importunity, was infuriated into striking the rock in his own name, and so incurring his own punishment of failure to enter the promised land, owing to his having yielded to the belief that it was he and not Principle who had wrought the miracles of the journey.

But, of course, the greatest sin was the sin in which Aaron himself joined the people, the fashioning of the golden calf, at the very moment when Moses was receiving the instructions of Principle amongst the thunders of Mount Sinai. Here the overwhelming materiality of human nature was exposed. And just as the disciples slept at Gethsemane, and could not watch one hour, so the protracted absence of Moses in the mount proved an incentive to the dregs of the animality of the human consciousness to repudiate the impersonal leading of Spirit, and to seek something to worship in the molten image. Exactly in this way, in later years, did their descendants cry out to Samuel, "Nay; but we will have a king over us." Thus materiality labors always to put its neck under the yoke of a man, in order that it may be saved the trouble of thinking, and the responsibility of acting, on its own account. The instinct to be governed by something other than a realization of Principle has always been the individual's refuge from the demands of Principle so uncomfortable to the human senses. It represents the yielding of the human being to animal magnetism, and the seeming victory of hypnotism. And so, on page 442 of Science and Health, Mrs. Eddy has written, "Christian Scientists, be a law to yourselves that mental malpractice cannot harm you either when asleep or when awake." Hypnotism is the triumph of sleep, the sleep which inevitably ends in the belief of physical death.

It was just this physical death which the materiality of the Israelites brought upon themselves. They had accepted the monotheistic teaching of the patriarchs, with the result that in the midst of the gross blindness of the age they had become the people accepted of Principle. In this way the promised land lay before them, and they had but to press forward and to enter it. But between it and them lay the mental barrier of their own materiality, the craving for the fleshpots, the recurring desire for other gods. Even after crossing the Red Sea, and witnessing the mighty proof of the protecting power of Principle, they wandered in the wilderness of materiality, and could not take the step which would have redeemed them from their suffering. Moses himself failed to maintain his vision of Principle sufficiently to enter this promised land. From the top of Nebo he saw it, a land flowing with milk and honey, the land of Spirit, but the old Adam was too strong for him. The whole of the generation which had come out of Egypt passed away in the wilderness, and it was a new generation and a new leader which saw repeated at the Jordan the miracle of the Red Sea.

The Hebrew teacher knew very well, as Origen pointed out centuries ago, that the real meaning of the wandering in the wilderness was not whatever historical significance it might have. That the promised land was no land of material plenty, it was the consciousness of Principle. That Egypt, from which the tribes came out, was the passions and animality of the physical senses. That between Egypt and the land of promise lay the wilderness, the tangled mass of human beliefs and material suggestions, beckoning this way and that way, and perpetually offering ease in the senses as an offset against the stern labors of the demands of Principle. Egypt was the carnal mind, the promised land was heaven, the intervening wilderness the lusts of the flesh. Those who came out of Egypt had gained a sufficient vision of the Christ to set their hands to the plow. But as the heat and labor of the day continued, they gave in to the suggestions rained upon them by the human mind, and took their hands from the plow.

Everything comes to tempt those who have seen the Christ and who set out to walk in the footsteps of the Christ. Fears

[788]

15.

innumerable, fears of loss of friends, of the loss of position, of the loss of income; fears of the power of evil to overwhelm them; and these fears come because they have failed to acquaint themselves with Principle, and so are not able to judge for themselves, and therefore insist that they must have a king to think for them, to judge for them, to lead them down amongst the tombs of Gadara, when an obedience to Principle and an understanding of Truth would have led them to the promised land. That is the lesson of the wanderings of the children of Israel as recorded in the Old Testament. A story which has been paraphrased with marvelous spiritual insight by Mrs. Eddy, on page 566 of Science and Health: "As the children of Israel were guided triumphantly through the Red Sea, the dark ebbing and flowing tides of human fear,—as they were led through the wilderness, walking wearily through the great desert of human hopes, and anticipating the promised joy, -so shall the spiritual idea guide all right desires in their passage from sense to Soul, from a material sense of existence to the spiritual, up to the glory prepared for them who love God. Stately Science pauses not, but moves before them, a pillar of cloud by day and of fire by night, leading to divine heights."

FREDERICK DIXON.

Meeting in Unity

Suppose a man encounters on the street a person whom he has wished to avoid because of some fancied insult, slight, or injury of the past. Christian Science teaches that the right course in such a case is to be neither afraid, disturbed, angry, nor even indifferent, but to rejoice that the real man expresses divine intelligence and is dealing always and in all circumstances with divine intelligence and not with people. Instead of believing that one has unfortunately been brought into juxtaposition with a disagreeable person, the better way is to know instantly that one's own right thinking is associating only with its source, infinite Mind, and that throughout this true association there is continual reciprocation of good, since cause and effect, Mind and idea, are interdependent. As a man turns thus immediately to immortal Mind to know what this Mind is conscious of, the experience is proved to be a happy one.

To accept spiritual intelligence as all that man can really deal with and to reason faithfully as to the true quality through which infinite Mind is manifesting itself in the now, regardless of whatever may seem disagreeable, is to prove the immediacy of divine Love. If any circumstance, any old illusion of strife or enmity, could possibly be distressing, then there would be some other power than God, infinitely harmonious Life manifest as man's true living. Genuine freedom and joy abide in the knowing that there never has been any room for human strife in real living, and that what may have seemed strife has been all the while but counterfeit of energetic spiritual action unfolding in perfect concord with its cause, infinite Mind. Only the one who recognizes in some measure that this is the actual fact of being can sincerely pray in the words of the last stanza of Mrs. Eddy's poem called "Love" (Poems, page 7):-

Thou to whose power our hope we give,
Free us from human strife.
Fed by Thy love divine we live,
For Love alone is Life;
And life most sweet, as heart to heart
Speaks kindly when we meet and part.

In order to be truly inspiring, every meeting must be on this same basis of man's unity with God, idea's oneness with Mind, its divinely intelligent source. The coming together of those who are friends and cordial coworkers is freed from the false belief that there is any good in mortal personality when each one is steadfast in knowing that divine intelligence and its manifestation are all that can ever be together in Truth. Healing wholeness consists of the oneness of Mind and spiritual man. In proportion as a student of Christian Science understands that divine intelligence and its manifestation are inseparable and omnipresent, he is proving that the only meeting there is, the continuing together of Mind and idea, is boundless in its blessing. The knowing of this truth is healing in that it replaces the sense of limitation and discord with the consciousness of spiritual harmony.

Infinite Mind, or divine Love, supplies the real man with unlimited living and maintains it forever. All of immortal man's being and doing must forever be in conjunction with the creative Mind, since cause and effect are inseparable. The infinite oneness of Truth and its idea is the solution for every human problem, the healing for every human disorder, whether seemingly personal, or social, and the supply for every human sense of incompleteness. Thus Mrs. Eddy says, on page 494 of Science and Health, in a sentence that is familiar to every student of Christian Science, "Divine Love always has met and always will meet every human need." The meeting of need or true demand with the infinite supply of spiritual consciousness, forever conscious of orderly action, is here and now, no matter what conditions mortal mind may conjure up to deny this fact. That every need of living is met by Mind, not matter or material ways and means, is for each one to demonstrate to his own satisfaction.

When Mr. Pepys, who was not much given to proving spirituality in his own experience, exclaimed in his diary, "What an age is this, and what a world is this! that a man cannot live without playing the knave and dissimulation," he was simply voicing the common pessimism of those who believe in materialistic living. The utter unsatisfactoriness of human pretenses can give way only to the actual understanding and demonstration of divine Principle as revealed in Christian Science. Every Christian Science service, every business meeting in the Christian Science churches, every meeting of one student of Christian Science with another, in order to be worth while, must replace materialistic hopelessness with the surety that divine Principle does govern the real man now and always and sustain spiritual order of action. Each one must know for himself in Christian Science that man is dealing wholly with infinite intelligence and rejoicing that intelligence is manifest rightly in the present of both time and place. Let each one ask himself, therefore, the questions that Mrs. Eddy phrases on page 147 of "Miscellaneous Writings": "Another year has rolled on, another annual meeting has convened, another space of time has been given us, and has another duty been done and another victory won for time and eternity? Do you meet in unity, preferring one another, and demonstrating the divine Principle of Christian Science? Have you improved past hours, and ladened them with records worthy to be borne heavenward? Have you learned that sin is inadmissible, and indicates a small mind? Do you manifest love for those that hate you and despitefully use you?" The one who knows that man is meeting only divine intelligence in all his living, and who is proving his understanding in daily practice, can answer in the affirmative.

GUSTAVUS S. PAINE.

Testimonies of Healing

Christian Science has brought many blessings into my life, for which I am truly grateful. It is over five years since I have had a fit of depression, whereas before Christian Science healed me I was always more or less depressed. While under treatment for depression, rheumatism was completely healed, also varicose veins for which I had worn elastic stockings for some time. I have not had these stockings on for over eight years and know I shall never need them again. At one time my eyesight became very defective, but with the kind help of a practitioner this was very soon overcome. Also I have been perfectly healed of a seemingly serious internal trouble and of a bad attack of anæmia, besides other minor troubles.

For all these healings I am grateful, but feel more grateful every day for the better understanding of God that Christian Science is giving to me; it is slowly but surely replacing fear with joy, peace, and happiness. Christian Science is teaching me that there is only one plane of existence and that it is spiritual; that we live, move, and have our being in Spirit, in God, in Love.

I am grateful for all the Christian Science literature and for membership in The Mother Church. I am grateful to Mrs. Eddy for showing us the way to this wonderful truth and to the kind and faithful practitioner who has lovingly helped me in every time of need.

(Miss) Edith C. Follows, Manchester, England.

Many times have I expressed my gratitude in the Wednesday evening meetings for the many healings which I have experienced as the result of my slight understanding of the truth as taught in Christian Science, and it is a joy to express my gratitude again through our periodicals. Christian Science found me sick and broken-hearted, but all this vanished when I began to live according to its teachings and learned of man's true identity as the son of God. One experience I value very much was the overcoming of the effects of a severe fall, when I struck the back of my head while skating. I lay motionless and unconscious; in fact, my companion thought I would never rise again, but when he lifted my head and called my name most anxiously I said, "Think of God," because He was all I was conscious of, and in two or three minutes I got up and skated the same as ever, without fear or suffering. A slight soreness in my head left the next day. This was a positive proof to me that God had become my refuge, my All, to whom I could turn when in need.

Another beautiful healing was experienced when hot bacon fat poured on my foot. I declared the truth, and through the understanding of my spiritual selfhood I was freed from the suffering which mortal law would have impinged upon me. From childhood I was in great bondage to the fear of being left alone in the house or apartment, which was the result of a teaching full of superstition and belief in evil spirits. Though realizing the folly of it when grown up, I did not know how to rid myself of the belief and it caused me endless torture. But when the truth in Christian Science dawned on me, I knew I would be delivered from this bondage, and I was. As the right understanding of God became clearer to me and I knew that He filled all space, the belief of phantoms of the dark disappeared, leaving me happy and thankful. Now I rejoice in being alone with God. This healing brought a great deal more to me than can be said in a few words, since I gained from it such a clear realization that all evil, sickness, accidents, loss, and the like, are only superstitious beliefs, phantoms of unenlightened thought, and that they all flee when the ever presence of God is realized. This clearer understanding has been very helpful to me in solving any seeming problems.

My gratitude to God, who is proved so near and dear to us through the teachings of Christian Science, finds its expression in obedience to His laws and in loving service to all mankind according to my best understanding, and I rejoice daily in the truth that is expressed all over the world and brings deliverance from all false beliefs.

(Mrs.) Elsa F. Angle, East Orange, New Jersey.

4

As a result of the war, material limitation was manifested, and my family and I were obliged to vacate our residence. We had also incurred several debts. All attempts to raise money with which to hire another residence failed, and my wife and I were on the verge of desperation. In December, 1914, I became acquainted with an agent who was studying Christian Science. The following Sunday I attended church services and on Wednesday the testimony meeting. At the reading room I purchased some copies of Der Herold. Through reading these it became clear to me that help was available only through God and by applying the truth. A practitioner helped us, and within a week's time we had solved the problem. We found a beautiful residence and are still residing there. We became sincere seekers after Truth and our son has attended Sunday school since that time.

Being a business man, I solve all my problems through Christian Science, which is synonymous with "God with us." We are happy and contented people. For knowledge of the Christ, Truth, I owe heartfelt gratitude to God.

ALBERT RÖSSING, Berlin, Germany.

The value of Christian Science has been proved to me so many times that I desire to acknowledge my appreciation of it, with the hope that others may be encouraged to study and that they also may be helped by it. I became interested in Christian Science about seven years ago. I had a bronchial trouble, colds, headaches, indigestion, and suffered from repeated attacks of lumbago. The last attack I had was several years ago. At that time, after suffering for two weeks I went to a Christian Science practitioner, who gave me one treatment; the next morning I was well and have never had lumbago since. For years I had had severe headaches. The first time I went to a practitioner with an aching head it was cured within fifteen minutes. The last time I had a bad headache I seemed too ill to help myself, and sent for a Christian Science friend. I repeated the twentythird psalm over and over again and in half an hour or so, before the friend could reach me, I was almost wholly free. She gave me a treatment, however, and I have never had a bad headache since.

It is years since I have taken a dose of medicine. My general health has steadily improved. I am grateful for the beautiful truth which Mrs. Eddy has given to us, for the kindness shown me by practitioners and friends who are Christian Scientists, for church services and the literature. I am greatly comforted by the thought that divine Love governs, and I have been healed of many fears from which I formerly suffered, and, to a great extent, of what was once a continual sense of weariness.—(Mrs.) Lille T. Stutler, Washington, District of Columbia.

In gratitude for the many blessings that have come to me and to my home through the application of the teachings of Christian Science I give this testimony, that those who are struggling along in the dark, as I was, may see the light of Truth as I am trying to see it more clearly each day. Many discordant conditions have been healed, and many times has relief come in a very short time in some sudden distress. Last spring I was healed of a severe attack of influenza in four days, through absent treatment. The same disease tried to attack my little girl but was very quickly overcome. The latter part of the year this child, with several others, was sent home from school with the firm command to stay at home, as they were said to have diphtheria. I was told over the telephone that I would have to stay in quarantine with her. I called up a practitioner, who told me to do as I was instructed, and that God would take care of us. In three and a half days we walked out free and the signs were taken down, much to the surprise of the tenants of the apartment building in which we lived, especially as one family had been kept in quarantine for four weeks for the same reason.

I have found that this new-old religion can be applied to every need, and it has been proved in every need to be the truth, and if there is a failure it is not the fault of Christian Science, but of its application. I am convinced that Christian Science is the Comforter which Jesus said "the Father will send in my name." To say that I am grateful is not saying enough, for all I have or ever expect to have I owe to Christian Science. It is meeting my every need, and my constant desire is that I may be able to help others as I have been helped.

(Mrs.) Julia Taylor, Los Angeles, California.

About fifteen years ago I turned to Christian Science through the healing of a case of insanity. I had been a member of a denominational church since childhood but had become very much dissatisfied and disinterested, for the reason that when sorrow and discord came into our home my religion or church seemed to offer no remedy or comfort other than that it was God's will. After witnessing the above healing I decided that Christian Science is a demonstrable religion and wished to know more about it. Since taking up the study of Christian Science I have had many proofs of its healing power. I was healed in a very short time of rheumatism from which I had suffered for several years. I am grateful to Mrs. Eddy for a demonstrable understanding of the truth, and for the periodicals, which were divinely inspired .- (Mrs.) PHOEBE M. WILLIAMS, Minneapolis, Minnesota.

Words fail me when I attempt to express my gratitude for the many blessings I have received through reading and studying Christian Science. Before coming into Christian Science I taught a Sunday school class for fourteen years in a denominational church of which I was a member, but what I taught, since I did not then know God as found in the light of Christian Science, is beyond me now to explain. I found myself in a pitiable condition at this time, financially, physically, mentally, and spiritually. I was a nervous wreck, my credit was at a low ebb, and I was but a shadow of my normal self. The first year was a trying one to me and I found much opposition to my new way of thinking; people thought it wrong to reject the old teaching and especially to give up the church and the Sunday school class. The healing of a bowel trouble which I had had all my life,

also of a cough that came on every year during a portion of the winter, and of the financial trouble all took place during that year. When I recount the many victories I had that year, and have had since, I can truthfully say with the psalmist, "I will sing of mercy and judgment: unto thee, O Lord, will I sing." When the year since leaving my former home ended, I found that I had paid off my bills and had several liberty bonds and a good account to my credit in the bank. More, immeasurably more, I had found God, who healed my infirmities.

I am grateful to all the good people who have helped to show me the way, and especially to our revered Leader, Mrs. Eddy. Words fail to express the gratitude in my heart for all God has revealed to me of His love and for His ever present help in trouble. I have a new song to sing, a new tale to tell of a new heaven and a new earth. "And I saw a new heaven and a new earth: for the first heaven and the first earth were passed away; and there was no more sea."

GWILYM N. WILLIAMS, Bridgeport, Connecticut.

4

Having always enjoyed and been helped by reading the testimonies in the Christian Science periodicals, I feel the time has come for me to express my gratitude for the many blessings received through the study and application of the truth as taught in the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy.

When I was a child I fell and sprained my ankle. It was painful, and swelled so that I could not wear my shoe, nor could I go upstairs, excepting on my hands and knees. We knew nothing of Christian Science at that time, and, as I remember it, it was about three weeks before the sprain was healed. After I became interested in Christian Science, we were living where we had over a mile to walk to take the car, and as I started out, alone, for church one Wednesday evening, I stepped in a hole at the side of the road, turning my foot over in such a way that my ankle was sprained. At first the pain was intense, and the suggestion that I go home came to me, but instead I rested by a tree and quietly tried to realize the allness of God, and then called for a friend, who was going to church with me. We went on our way, walking quickly down the road. I was perfectly free, although at first it seemed as though I should go limping along.

On the first page of the Christian Science pamphlet, "Prayer and Healing," we read, "Because the spiritual presence of God is ever with us, here and now, there is nothing material or mortal with power to make or to mar our happiness." These words have helped to heal me of discontent, rebellion, and self-pity, and since I have put these discordant qualities out, and am keeping them out of my mental home (thought), and am seeing man, including the members of my own family, as the sons of God, reflecting all the qualities of God and nothing else,--peace, happiness, joy, love, and harmony beyond what I could ask or think are mine and nothing can rob me of my birthright. Each day I know there is only one Mind and man is receptive and obedient to the one Mind that harmoniously governs him and all his affairs and relationships. Instead of seeing faults I am knowing facts. Years ago I said to one who had studied Christian Science much longer than I, "When I see faults in any one I overlook them." She said, "No, do not do that; deny them." We learn in Christian Science that nothing is gained by ignoring so-called errors. "Meet every adverse circumstance as its master" (Science and Health, p. 419) is the teaching in our textbook. Let us remember that all error wants is to be

let alone, so it can flourish. I am surely grateful to be able to say that, while once our home was unhappy, now it is filled with peace, love, and harmony. Through a right understanding of God and man as taught in the Christian Science textbook and through the help of a faithful practitioner the healing work was accomplished. I must express gratitude for the Christian Science Hymnal, which is a daily help to me. I am most grateful for all of Mrs. Eddy's writings, and for our literature, which always brings just the help I need.

I have had many proofs of God's protection and guidance, and have seen many physical healings,—so I could go on and on telling of what this pearl of great price is to me. This is my prayer: "Search me, O God, and know my heart: try me, and know my thoughts: and see if there be any wicked way in me, and lead me in the way everlasting."

(Mrs.) ELSIE DUNHAM, Stevensville, Michigan.

٠

Paul said, "When I am weak, then am I strong," and I, too, can say that never have I been so weak and yet so strong, and never have I been so poor and yet so rich. This strength lies not in words but in the desire to solve the problem, and this desire came to me through the study of Mrs. Eddy's book, "Science and Health with Key to the Scriptures," in which I have found the key to happiness. My testimony is not one of physical healing alone but rather of mental healing, for physical freedom is the inevitable result. It was through trying to save my wife, who had been given up not only by one physician but by nine, that I found my own salvation.

I thank God for having crowned my faith by putting in my hands that blessed book, Science and Health. I am grateful to its author. I also owe a great debt of gratitude to the dear practitioner who by helping my wife also helped me and healed me of several physical ailments. Quite recently I was able through this teaching to heal myself in two days, practically without pain, of a boil which appeared in my nose every spring, causing me much suffering for about two weeks and for which I had been accustomed to resort to poultices, physician, and surgery. The operation this time was a purely mental process, and it is through this method that Christian Science to-day heals all disease, as it was healed at the beginning of the Christian era,—this of course in proportion to the understanding of the one applying it. It is on the understanding of the ever presence of Love that Mrs. Eddy has built up her discovery, the study and application of which heals every discordant condition.—ARTHUR Moro, Lausanne, Switzerland.

٠

After being in bondage for four years to a very serious condition of ulcerated stomach and bowels, I found myself in a hospital where I underwent a critical operation for another condition that had arisen. Many complications followed and I was in a more hopeless state than when I entered. The doctors held that another operation was imperative and I was sent to a "rest hospital" to build up. I did not get better there, but on the contrary conditions grew more hopeless.

I met a Christian Scientist one day and she held out such hope for my recovery that I decided to leave the hospital and return to my own home town. I had a talk with a Christian Science practitioner, who consented to give me absent treatment. Many discordant conditions were quickly overcome, but some problems remained to be solved, step by

step, for which I am grateful, for I realize now that that was a period of reconstruction very necessary to growth. I have learned to know God as the all-loving Father-Mother who tenderly cares for His children, and it is a great comfort to me to know that He holds the solution to all of our problems and that divine Love supplies our every need. My daughter has had many wonderful healings, one of which was of influenza. She appeared to be passing away, but was instantaneously healed through the absent help of a Christian Science practitioner. I have been healed of tonsillitis, ptomaine poisoning, and many other discords.

Much remains to be overcome, but I trust I may gain more understanding each day with which to overcome the claims of error, and that I may sometime be able to help others as I have been helped. I am thankful to God, and grateful to Christ Jesus the Way-shower, to our revered Leader, Mrs. Eddy, and to the kind practitioners and friends who have helped me. I feel my gratitude would be incomplete without some mention of the periodicals. I rejoice in the spiritual uplift I get through these channels for the truth, and for the Lesson-Sermons, which are so helpful. I hope this testimony may help some one as I have been helped by reading those of others.

(Mrs.) EDNA YOUNG, Sandpoint, Idaho.

4

I should like to tell of the many benefits that have unfolded to me through Christian Science. I was brought up in a denominational church and taught to believe in a Supreme Being, but "Thy will be done" in the Lord's Prayer was always a stumblingblock to my progress. When conditions were harmonious I was quite ready to admit that it was God's will, but when unhappy and unjust I had a reluctance in giving God the credit, as it seemed lacking in reverence. Finally conditions seemed so unjust that I said, "What is God's will, anyway? He will certainly do as He pleases and my prayers are useless!" But Love was leading all the time, and my extremity proved to be God's opportunity.

Hearing that Christian Science healed sickness I was led to ask help of a practitioner, who lived seventy-five miles away, and through absent treatment I was healed of neuralgia, which had troubled me for years. I visited the practitioner later and told her of my confusion in regard to this prayer. I shall never forget the kindness with which she replied, "God's will is always good." For this great truth I am truly grateful, as well as for the fact that there has never been a return of neuralgia, the healing of which took place several years ago.

I am most grateful for a knowledge of this healing truth for my children and I am indeed happy to have them in the Christian Science Sunday school. They have had many healings, some of which were of colds, burns, pneumonia, and the results of accidents. Knowing that they are always in God's loving care has relieved me of worry and made our home harmonious and happy. I am grateful for help obtained in business matters, through the work of a loving practitioner, also for the knowledge that man is always in his right place, in Mind. I am grateful for the periodicals, for the spiritual food that is dispensed through their columns; for the kindness of relatives and friends who have helped me on my way; to Mrs. Eddy for her unselfed goodness in giving to a hungry world that wonderful book, "Science and Health with Key to the Scriptures;" and thankful to God for His goodness. That I may help others as I have been helped is my earnest desire.

(Mrs.) FLORENCE C. WEBB, Watsonville, California.

Signs of the Times

[Dorothy Canfield on Disarmament, in The Woman Citizen]

Cast your eyes back, let us say, to the period of the feudal system; which was to stay forever, so thought the rulers of those times. We of to-day are used to the arguments of "impractical," "against human nature," "utterly impossible," which our rulers use against the idea of international disarmament. The same sort of thing was advanced with the same passion of conviction at the notion that public safety could be secured except by a baron in a castle to whom everybody in the region owed implicit obedience. Nor did the feudal system fall in a day, or a year. Slowly, as it encountered increasing intelligence and cooperation in mankind, it crumbled away to nothingness and oblivion. In the same way, if we all work hard for general intelligence and wider cooperation everywhere, the hideous idea of huge standing armies will crumble away to nothingness. But we must not be discouraged by the slowness of the process.

Or look back at the custom of dueling and going about armed. Two or three centuries ago every man was armed at all moments of the day,-and needed to be. Nobody could conceive the possibility of any police system which would make this unnecessary: "Men are quarrelsome creatures, made so by the Lord." Well, what happened to that idea? It gradually died, because right-minded people steadily, hopefully knew that things could be more sensibly arranged. Such people killed and buried that wrong idea, with their certainty that it was wrong. And we can kill standing armies in the same way. Once or twice history, for a change, shows us our brothers trying to do something of this sort in a hurry. At the time of the French Revolution, people like us, people who believed in the possibilities for good of our race, were as fired with sudden hope and enthusiasm as we were during the war. They struggled and hoped and rejoiced in the success of their right ideas, and told each other thankfully that now the black old notions of the inherent inequality by class were killed, that henceforth the right of every man to share in the government would be recognized, that the absurd, laughable, hypnotic delusion of the divine right of kings was destroyed forever. Just so did we fall on each other's necks on Armistice Day and cry out that those who hated war had conquered.

Well, they were right at the time of the French Revolution, and we were right on our great day. Our cynical rulers, watching us with their tongues in their cheeks, were wrong. Just you wait and see how they fooled themselves, when they laughed at our enthusiasm. For a generation after the French Revolution, how dark and desperate the world must have looked to those happy and faithful souls who had believed in the triumph of human equality. Never, never had kings seemed more firmly fixed on their thrones. A whole generation passed by in a mocking reaction, the ideas of the Revolution forbidden, laughed at, despised ... except by such people as we are, who steadily believed in their race. A new attempt at the promised freedom was made, partially succeeded, and failed. The night settled down blacker than ever over Europe, or so it must have seemed to the people who wept over these failures. They did not see that the ax had been laid to the root of the wrong ideas they were fighting, that the tree was slowly dying, here a branch withering, there another gone; till presently (as we have seen in our own time) the whole tree would come crashing to the ground of its own weight, a dead, rotten log. Our grandchildren will see the idea of huge standing armies lying just such a dead, inert wreck . . . if we do our part now! The friends of human freedom were right when they rejoiced at the end of the eighteenth century. But it took longer than they thought. We were right on Armistice Day, unless we thought our part was finished!

[From The New Bedford (Massachusetts) Standard]

Now the pew problem confronts First Church of Christ, Scientist, of New Bedford. But with this church it is not a question of vacant pews. For whatever may be the experiences in other churches, particularly the Protestant denominations, with a decreasing attendance, the talk that has arisen over pews in the Christian Science church is to provide facilities to accommodate the constantly increasing numbers who attend the services there.

Not that the need has become so immediate as to necessitate action by its Board of Directors. But it has become obvious enough to attract comment as something that will demand attention in the not very distant future. Moreover, this filling of the church week after week has occasioned comment from observers without regard to church affiliations. From the embryo curiosity as to what had caused such a steady growth of the movement in this city, as in other places, came the inquiry by a reporter of The Standard to members of the church as to facts and figures that would graphically tell the story. But here an unexpected obstacle arose. . . . Here was a church proud of the time when membership was confined to two persons, proud, too, of the advance that has marked its history, but unwilling that this progress should be utilized for any boastings. So further observation became necessary. . . .

When an observer notes such unusual strides, without making a display of force of its numbers, and the absence of dominant personalities within church affairs and administration, he wonders the more as to what accounts for its progress. This takes one into Christian Science teachings and organization. Within the teachings, the spiritual interpretations lie with the individual, the observer is informed. But where, one asks, is the motive power? The services are simple and the church activities are confined essentially to religious ends. While an effective benevolent program is carried on in an unobtrusive manner the dominant message of Christian Science is to heal the sick and overcome misfortune spiritually. Neither does the organization attract the attention of the public through appeals for financial assistance, drives, and building funds. Instead one is told that the most vital spark of Christian Science is furnished by the members themselves, each imbued with an earnest desire to present its teachings.

4

[From "The United States and Canada," by George M. Wrong]

In moments of gloom we are tempted to think that the forces of evil are more readily organized than those of good; but it is not really so. Since evil is selfish it carries with it the seeds of disintegration. Any system based upon the denial of fundamental human right is weak. Democracy with all its faults is stronger than despotism. Despotism means the power of one over the many and cannot be based on any human right, while democracy asserts the right on the part of the many to think and act for themselves. A democratic society, however drab and commonplace it may seem, rests nevertheless on a sound basis.

[Henry Ford in The Dearborn Independent]

We can break down the whimpering laziness of mind which resents the intrusion of new methods. We can acknowledge each day as a new day and not a mere repetition of yesterday. Life is not a "battle" except with our own tendency to sag under the downpull of the habit of "getting settled." . . . Society is always in danger from two classes, those who fear change, and those who crave it. The first class tends toward decay, the second toward destruction. Change is not to be sought for itself alone, but in following to best advantage the obvious beckoning of the times. There is always something outside ourselves that gives the signal; a motion of advance that comes over the earth like the coming of spring, and those that are alive respond to it; those who prefer to continue their hibernation in the old methods, fall out of step with the advance. They remain comfortable enough, no doubt, but they no longer count. It pays a man always to have ideas in advance of what he is doing; that is the only valuable capital. . . . Life ran placidly for our forefathers for long stretches at a time, and in the older countries a certain method of life became so fixed that it left century-long traces on city and countryside. But in these latter days the intervals of change become shorter and shorter. The pace is quickening. Period follows period out of all reckoning with the old calendars. We have seen an almost complete revolution in the past fifteen years, and now we are on the eve of another; and as soon as that will have come, another will be visible on the horizon. The world is moving with breathless, eager haste to some new position, and we cannot stop it. We can only stop ourselves from following along.

["Christianity and Investments"—From Information Service, as Quoted in The Living Church]

"I like to know how corporations use their employees, their customs in regard to the twelve-hour day, and so on, before I put any money in them, even my modest sums." Thus wrote a gentleman to a social service secretary of the Federal Council of Churches. He referred to a company which had advertised a big bond issue in the morning papers. A telephone call to their office brought the information that the person at the other end of the wire could not see what labor policy had to do with investment. He plainly showed irritation and presently declared that people had been calling up all the afternoon to know what the company's labor policy was. It was a new and incomprehensible experience. When Christian investors generally demand such facts industrial conditions will be very different.

["The Golden Rule"-From Manufacturers Record, Baltimore, Maryland]

Character, a magazine . . . published by a well-known advertising service of Boston, devotes its January-February issue almost wholly to a discussion of "the Golden Rule in modern business." Until the Golden Rule prevails in the business world, as well as in the social and religious world, there can be no universal advancement of mankind nor universal prosperity. Until it is lived to the fullest extent and put into operation in every business transaction, into every relation between employer and employee, the world will seek in vain for peace and happiness and prosperity. Without the Golden Rule as the direct guiding spirit of life, neither this country nor any other can make the material and moral advancement which is within its power when its operations are based on the Golden Rule. Because of these facts, it is interesting to see a business house devoting an entire issue of its publication to the Golden Rule.

[From an Editorial in The Saturday Review]

It is pleasing to find so strong a wave of sympathy with dumb animals as is evident at the present time. First, we have Commander Kenworthy's bill for the prohibition of public performances by animals. . . . Next the new Chancellor made his first reply in the House of Commons on the subject of horses exported to the continent for consumption as human food. . . . Then we have the sudden realization that pigeon shooting at Monte Carlo is a wanton piece of cruelty. It never was anything else. . . . Pigeon shooting is by no means confined to Monaco, but prevails in our country. Nor is it more cruel than coursing, the shooting of driven birds, or those mock heroic sports, tiger and lion hunting. . . . If therefore we object to pigeon shooting at Monte Carlo-and by all means let us denounce a loathsome business-we should be logical and revise many of our so-called sports.

[From The Pioneer]

On April 9, Congressman A. J. Volstead received a statement signed by over one hundred leading physicians, professors in medical colleges, and hospital heads, protesting against the use of beer as a medicine. The statement sets out the fact that beer has never been recognized as a medicine. The demand for "medicinal beer" appears to emanate solely from those who desire it for beverage purposes and from those who desire to make it and sell it for these purposes.

The officers of the National Retail Druggists Association have followed the lead of the physicians and have gone on record against beer as a medicine. General Counsel W. B. Wheeler, of the Anti-Saloon League, in commenting upon the significance of the druggists' action, says: "Under the law the druggist is the only one who can sell it for medicinal purposes, and these officers of the druggists' association realize the menace it is to a reputable trade."

Church Notices

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in *The Christian Science Monitor*, were run off at the time of their publication in the *Monitor*.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 81/4" x 103/4". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for *The Christian Science Monitor*, *Journal*, *Sentinel*, *Quarterly*, and *Heralds*, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and immediate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

There will be placed on sale about June 20, 1921, six new pamphlets, containing articles reprinted from the Christian Science periodicals, as follows: "Government," "Employment," "Work and Play," "Progress," "Occupation," "Relationship." Orders for these pamphlets may be sent at once, to be filled on the date of issue. Price 5 cents a copy. Reading Room discount 20 per cent.

"Rudimental Divine Science" for the Blind

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Scntincl and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U. S. A.

WORKS ON CHRISTIAN SCIENCE

Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

German Translation. Alternate pages of English and German.

Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges,

single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 cach.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

NUMBER 43

The Power of Resistance

THERE has never been a time in history when mankind 1 have been so assiduously exploited from a purely material or physical standpoint as to-day. Under the guise of seeking to maintain material health, the belief in disease is propagated, and the man who falls in line finds himself the helpless victim of constantly threatening disaster from which he must seek some escape. In consequence, much is said and more implied in regard to physical fitness or the power of resisting this sea of troubles which belief of life in matter engenders. The only scientific process lies in turning thought away from the erroneous drift of material suggestion to unerring immortal Principle, the sustaining cause and creator of all that is. This is the haven opened by Christian Science, the door through which a man finds his power of resistance equal to every emergency. The Christian Scientist finds that the Christ-teaching turns absolutely from matter to Principle to define man; and so he learns that the power that holds man intact, perfect, and whole is Spirit, the creator. He also arrives at the fact that there is one creator and one creation, and all that is true is immortal and perfect. Life, therefore, is not in creation. Life is God, the Principle of man, and so it follows that creation is not material but spiritual. Man is the expression of Truth; he cannot, then, deviate from the exact and pure, and he is infinitely sustained in expressing Mind.

Since man has no quality underived from God, and God is infinite good, every disease is a deviation from Principle. Thus defined, disease is reduced to a nonentity, for effect cannot deviate from its cause. Health is the expression of Principle and therefore of that which always is. It is never separated from true consciousness and can never lapse. An erroneous assumption is never actual and can never be fashioned into a fact, but is always purely suppositional. Only the right is real, and only the true finds its representation in fact. The student of geometry learns that every triangle contains 180 degrees in the sum of its angles, no matter what variation the triangle may assume in shape or size. Through erroneous reasoning, it might be supposed possible to form a triangle with less or more degrees. This belief, however, could have no actual representation or outline, for every possible triangle constructed would refute the supposition and be one with the truth, and any other outline would be nothing to the point. While this is easily seen to be true in respect to the triangle, it exemplifies all-inclusively and as unerringly the difference between the real and the unreal, good and evil, right down the line; the one is, the other is not.

The conclusion, therefore, is evident that disease, based as it is on the assumption of something specifically wrong, cannot be outlined, nor can it operate in experience. The belief in disease is purely hypothetical, and never could and never does interrupt the continuity of what is true.

Disease, like every other mistake in reasoning, having no origin in fact, can claim no symptoms or development. It must be an isolated, disconnected suggestion that in no way includes a next step, but reaches it in belief through ignorant and fearful association of thoughts. Disease, since it is avowedly a deviation from normal, or the standard of Principle, is a phenomenon of animal magnetism. Mrs. Eddy clearly defines this term when she says in "Science and Health with Key to the Scriptures" (p. 102), "Its basis being a belief and this belief animal, in Science animal magnetism, mesmerism, or hypnotism is a mere negation, possessing neither intelligence, power, nor reality, and in sense it is an unreal concept of the so-called mortal mind." No man, surely, is under a necessity to study or contemplate disease in order to avoid it. He must see it only for what it is, and let his obedience to Principle be, "Yea, yea; Nay, nay: for whatsoever is more than these cometh of evil." Man's power to resist evil lies in his absolute spiritual derivation, which precludes evil.

Fatigue, like disease, is not a phenomenon of man's be-Because every quality of man inheres in Mind, and not in matter, every quality is inexhaustible, and comes to man ceaselessly. Energy is the expression of man's constant relationship to God. The belief in the necessity of sleep would represent man as endlessly running down and being wound up, of endless change and instability. Christian Science is teaching man that he does not need to seek rest through inaction, but that harmonious action is scientific rest. It would seem absurd should we think that the rhythm of the universe must spasmodically collapse in order to resume again its rhythmic harmony, yet man, too, is governed by the same unfailing Providence, and receives his strength, as well as all else, just as the need arises. Ceaseless receiving is more easily understood through ceaseless expression, and action should bring with it a greater impression of rest than inaction, since it is the greater evidence of receiving.

A man resists sin through the consecrated knowing that, since Mind is All, Mind absolutely satisfies, and, in the all-inclusiveness of Truth, man is forever refreshed, while finding endless diversity and inspiration in purity and perfection. Mrs. Eddy has given us a wonderful declaration of man's spiritual heritage in a statement beginning on page 10 of "No and Yes": "Eternal harmony, perpetuity, and perfection, constitute the phenomena of being, governed by the immutable and eternal laws of God; whereas matter and human will, intellect, desire, and fear, are not the creators, controllers, nor destroyers of life or its harmonies. Man has an immortal Soul, a divine Principle, and an eternal being. Man has perpetual individuality; and God's laws, and their intelligent and harmonious action, constitute his individuality in the Science of Soul."

The exploitation of mankind from a physical standpoint, no matter how aggressively pursued, must finally expend itself in avowed failure, and be as outworn as the primitive theories of astronomy, since its arguments are based on the

utterly erroneous premise of a material universe. Then man's spiritual birthright of perfection will be universally conceded and demonstrated, and to this end the Christian Scientist has dedicated himself.

Some Thoughts on Gratitude

GEOFFREY HAMLYN

POINT that has often occurred to me in considering A the question of gratitude is that the real, the spiritual man in the image and likeness of God, infinite good, cannot be conceived of as experiencing the feeling of gratitude in the way that mortals commonly experience it, since the ordinary human sense of gratitude presupposes, whether we realize it or not, "the knowledge of good and evil," a "knowledge" that has no place in God's kingdom. When a man says he is grateful for something, the presumption is that he is grateful he has received it because it was quite possible that he might not have received it. This is tantamount to saying that good is limited, which is one of the false beliefs of mortals. "God," writes Mrs. Eddy, on page 2 of "Science and Health with Key to the Scriptures," is not moved by the breath of praise to do more than He has already done, nor can the infinite do less than bestow all good, since He is unchanging wisdom and Love."

It is evident, therefore, that the gratitude which the real, the spiritual man, made in the image and likeness of God, feels, is a different thing from our human sense of gratitude. The image and likeness of God is the recipient of naught but good, knows naught but good, and expects naught but good. Gratitude in his case must consequently be the eternal consciousness of the omnipresence of good, the joy of unbroken harmony and sufficiency. This aspect of gratitude gives to the word a higher, a more extended meaning, for it does not limit itself to gratitude for what has already been received, but extends itself to gratitude for the good which is ever available and demonstrable. "Father, I thank thee that thou hast heard me," said Jesus at the tomb of Lazarus. "And I knew that thou hearest me always."

It is for this reason that it has been said that there is no room for discouragement in the heart of a grateful man. Discouragement presupposes belief in the presence and power of evil; true gratitude is the realization of the ever presence and omnipotence of good, and it is well to remember that the realization of God's law is the enforcement of God's law. From this it is easy to understand why gratitude occupies so prominent a place in Christian Science, for it is a recognition of that presence and power of good which Christian Scientists are continually demonstrating. The person who forgets the many benefits he has received and complains because he does not seem to have received all the good he hopes for, is likely to have to wait for more until his sense of gratitude, his sense of the presence and availability of good, grows stronger. Referring to this attitude Mrs. Eddy reminds us, on page 372 of Science and Health, "If pride, superstition, or any error prevents the honest recognition of benefits received, this will be a hindrance to the recovery of the sick and the success of the student."

Ingratitude is a mesmeric belief in the reality and power of evil; gratitude is the recognition of the presence and power of good. But just as we can prove our perception of the unreality of evil only by proving evil unreal to ourselves, by the refusal to love it, or even think it, so we prove our perception of the power of good and therefore our gratitude by the extent to which we let good govern our thoughts and consequently our actions. It is for this reason that Mrs. Eddy says on page 3 of Science and Health: "Gratitude is much more than a verbal expression of thanks. Action expresses more gratitude than speech." "If ye love me," said Jesus, "keep my commandments." In the last analysis our gratitude will be measured, not by what we say but by what we do, and the man who exemplifies in his life the continuous activities of good, is carrying out Paul's admonition to the church at Thessalonica: "Rejoice evermore. Pray without ceasing."

Confidence

OSKAR SEITZ

WHEN I first found Christian Science and caught a glimpse of this glorious teaching, when I first began to realize that I was standing at the portal of infinity, I went through the experience Peter must have gone through when he saw his beloved Master walk over the waves. Enthusiasm, zeal, and blind faith lifted me up, and it seemed as if I walked over the waves of mortal mind. At this time I had many demonstrations which to-day are still a joy and an incentive. But soon there arose a storm, and from my lips too there came the cry: Save, Lord, or I perish. Then it became clear to me that the works which our Master had done could only be accomplished in a correct and scientific way, by gaining an understanding of the spiritual facts which Jesus revealed and which Mary Baker Eddy has explained in Christian Science to us so clearly that every one who honestly seeks can find. Patient study of the Lesson-Sermon and of Der Herold der Christian Science as well as a search in Mrs. Eddy's works brought good results. I realized for myself and others the effects of knowing the truth, but for a long time I felt very insecure in this new world of Spirit. Although I knew that Christian Science is applicable under every condition, I often doubted the result of my own work, and feared a relapse as soon as I would stop working. In the night I would sometimes get up and continue "treatment," thinking that I had not done my full duty. Then one day my eyes were opened. This was when I read the passage in Isaiah: "For my thoughts are not your thoughts, neither are your ways my ways, saith the Lord. For as the heavens are higher than the earth, so are my ways higher than your ways, and my thoughts than your thoughts. For as the rain cometh down, and the snow from heaven, and returneth not thither . . . so shall my word be that goeth forth out of my mouth: it shall not return unto me void, but it shall accomplish that which I please, and it shall prosper in the thing whereto

Even before I knew of Christian Science this beautiful Bible passage had always appealed to me, and I thought that no poet could speak in a more powerful and a more beautiful way than did this Jewish prophet. As I read those words with the understanding gained through Christian Science they became as a revelation. "God's thoughts," writes Mrs. Eddy on page 286 of our textbook, "Science and Health with Key to the Scriptures," "are perfect and eternal, are substance and Life." And on page 581 she defines angels thus: "God's thoughts passing to man; spiritual intuitions, pure and perfect; the inspiration of goodness, purity, and immortality, counteracting all evil, sensuality, and mortality." They are the "words" that come out of His mouth. What, then, were the declarations of Truth, if not divine thoughts, and therefore God's thoughts?

Were not the passages out of our textbook, with which I confronted mortal sense, angels? Are they not a divine prophecy? Indeed they are, for the whole of our textbook is the result of spiritual inspiration, "counteracting all evil, sensuality, and mortality." Every true thought is a divine thought and has divine power to deliver mankind from sin, disease, and death, and to annihilate all inharmony.

Then my mistake became clear to me. Those divine thoughts were not produced by me. Their healing and saving effect was not dependent upon my work. This ability is theirs through their divine origin and nothing can deprive them of it. Since God's idea is perfect, there is no halfway, but only perfect work. As idea is eternal, it is ever active, manifesting substance and Life. Idea is individual and cannot be destroyed or reversed. Spiritual idea thus defies death, the grave, and hell; and breaks all so-called laws of mortal mind, proving that the kingdom of heaven, the kingdom of God, is truly established despite all the protests of error. When I failed to reap the fruit of my work it was no fault of the declarations of truth, but of fear, unbelief, and ignorance. The divine idea of omnipotent Life bears success within itself. Did not I have in my own consciousness the assurance of the effect of my declarations? When they brought light into my own thought, when I had realized the omnipotence and omnipresence of good clearly and denied the claims of error, then the enemy was overcome and I could wait confidently for the result, which then must follow.

Strengthened by this recognition, I could adhere to Mrs. Eddy's counsel (Science and Health, p. 395), "Like the great Exemplar, the healer should speak to disease as one having authority over it, leaving Soul to master the false evidences of the corporeal senses and to assert its claims over mortality and disease." I could now work with assurance and be confident, await the results, and rest quietly in remembering the wonderful promise: "It shall not return unto me void, but it shall accomplish that which I please, and it shall prosper in the thing whereto I sent it."

"Time and medication"

E. MARION LOVE

ONE of the beliefs in materiality which often comes up to the Christian Science practitioner, as well as to others, is the belief in time as a healing agent. "I suppose it will take time for a thing like this to be healed," a patient may remark, and the practitioner has then to explain that time is not a factor in the process of healing any more than are material drugs and hygiene, but is a belief which has to be overcome, just as reliance on material medicine has to be overcome. The practitioner has continually to be on guard against this subtle belief in time, both for himself and for his patient. No matter what the nature of the disease may be, neither practitioner nor patient should expect that more than one treatment will be required to heal it. Many slow healings are the result of just this belief that a series of treatments may be necessary in order to cure the patient. If the belief is allowed to enter that it will take time for the disease to be destroyed, then the healing process has descended to the level of faith cure, and is not the effectual operation of an understanding of Principle.

Our Leader, Mrs. Eddy, on page 398 of "Science and Health with Key to the Scriptures," classes the belief in time with the belief in medication. She writes, "So also faith, cooperating with a belief in the healing effects of time and medication, will soothe fear and change the belief of disease

to a belief of health." Time, then, is as positively a material remedy as is ordinary medicine, and if either patient or practitioner is expressing a belief, or silently cherishing a belief, that time will help in the healing, then he is not relying upon the ever present power of Truth, but is removing his demonstration into a supposititious future. So treated, the disease is not cured on a scientific basis,—that is, through the understanding of absolute Truth, devoid of any faith in a material agency. Time, being a material concept, is not a healing agent, but is simply the measuring line of that which is mortal and finite. If every mortal and material concept were destroyed, time also would lapse, for there would be nothing finite left to measure or limit. Truth cannot be measured by time, for Truth, reality, is eternal. There are no periods to that which is true. So, also, Life is not subject to limitation; it is not terminated nor divided into periods of life, death, and eternity. Life is immortal, therefore measureless, because Life is God. Neither can Love be conceived of as being measured by time, for Love is not capable of being divided into periods of love and hate, but is eternally loving, for Love is God. Truth, Life, and Love, or God, being infinite and eternal, time is obviously excluded or eliminated.

Only unreal and temporal beliefs, then, can be measured by time, and this is easily illustrated by a simple example. Suppose a child in counting up a sum should make the mistake of believing that six and five equal twelve. Finding that he has got things wrong, he goes over the sum again and eventually learns that six and five equal eleven. The error is thus reduced to nothing, and terminates, while the indestructible fact that six and five are eleven is brought to light,not created, but made manifest as part of the child's correct knowledge. It is unfolded as a reflection of Mind, intelligence, which has always existed and always will exist. Being a fact, it can never cease to be, whereas the mistake which had seemed to exist to the child for a period of time, long or short according to his energy and application in discovering its falsity, stopped, terminated, or ceased to have an appearance of being, as soon as its nothingness was proved. same is true of all sickness, sin, sorrow, and death. Their end is inevitable, and so far from requiring a belief of time to heal them, it will be found that time has no more reality than they themselves possess.

A profound import attaches to the wonderful prophecy of the angel in the Apocalypse, who stood upon the sea and upon the earth, and lifted up his hand to heaven and "sware by him that liveth for ever and ever . . . that there should be time no longer." On page 558 of Science and Health Mrs. Eddy writes, "This angel or message which comes from God, clothed with a cloud, prefigures divine Science." It therefore follows that the teaching and demonstration of divine Science are to bring this prophecy to fulfillment, and a realization of its meaning is an integral part of every complete Christian Science treatment. The recorded demonstrations of Jesus were all, with one exception, instan-No one could imagine that Jesus would have taneous. condoned slow healings on the ground that the patient might benefit thereby in having to search harder for the truth. A quick, clean-cut demonstration of healing which heals sin as well as sickness is the greatest possible help and encouragement to a patient, and one which will aid his growth far more effectually than long and laborious striving to effect a cure could ever do. This undoubtedly was one of the reasons which impelled our Leader to lay special emphasis on the need for quick healing, by inserting a bylaw to this effect in the Manual of The Mother Church

(Art. XXX, Sect. 7) as follows: "Healing the sick and the sinner with Truth demonstrates what we affirm of Christian Science, and nothing can substitute this demonstration. I recommend that each member of this Church shall strive to demonstrate by his or her practice, that Christian Science heals the sick quickly and wholly, thus proving this Science to be all that we claim for it." It would be well, therefore, for every practitioner and patient to be quite sure that they are relying on Truth alone and not indulging a hidden and lingering faith in material means and modes of healing by believing that time will aid in solving the difficulty, or that any more time is needed in the solution of a problem than it takes to realize the nothingness of the error and the ever presence of God.

"To your tents, O Israel"

WILLIAM RUFUS SCOTT

In the history of Christian Science the year 1908 marks the beginning of an epoch. For it was then that Mary Baker Eddy founded The Christian Science Monitor and thereby challenged not only the world but Christian Scientists themselves to take a forward step in the realm of the real. We may be too close to the event to have a full perspective, but if we will examine metaphysically the chemicalization since that date, in mortal mind generally, as well as in the ranks of Christian Scientists, we may find the true explanation of much that has seemed to be distressing.

No greater mistake can be made by the working student of Christian Science, however long his experience may be, than to assume that he has so definitely arrived at the knowledge of the truth as to be able to stand apart and merely watch the ferment it is causing in mortal mind. Mrs. Eddy in the article "Watching versus Watching Out," beginning on page 232 of "The First Church of Christ, Scientist, and Miscellany," made this abundantly clear. Therefore to assume that the launching of the Monitor was just a challenge only to mortal mind unenlightened by Christian Science, and not a call for higher demonstration by Christian Scientists, is equivalent to assuming that students of Christian Science already have come to the "stature of the fulness of Christ." Mrs. Eddy says in the article mentioned (p. 233), "Ignorance of self is the most stubborn belief to overcome, for apathy, dishonesty, sin, follow in its train."

Have we thought that Mrs. Eddy waited twenty-five years to establish the Monitor because the world was not prepared for the demonstration of a newspaper of this kind? Was she not waiting not only for that, but more especially for the ripening of the understanding of her followers? And does not the year 1908 mark the beginning of an epoch in the history of Christian Science because it was then that Mrs. Eddy perceived that the growth of the truth had reached a sturdy manhood which justified her in sending forth Christian Science in a way more militant than she had done hitherto? If the extract from the first editorial in the Monitor, reprinted on page 353 of Miscellany, is studied with particular reference to the verbs she used in describing the functions of her various periodicals, it will be seen that the establishment of each one marked a new epoch in Christian Science, and the establishment of the Monitor was the "full grain in the ear" indeed. She says: "I have given the name to all the Christian Science periodicals. The first was The Christian Science Journal, designed to put on record the divine Science of Truth; the second I entitled Scatinel, intended to hold guard over Truth, Life, and Love; the third, Der Herold der Christian Science, to proclaim the universal activity and

availability of Truth; the next I named Monitor, to spread undivided the Science that operates unspent. The object of the Monitor is to injure no man, but to bless all mankind."

Notice that of The Christian Science Journal, her first periodical, she says that it was "designed to put on record;" that her second periodical, the Christian Science Sentinel, was "intended to hold guard;" that the third, Der Herold der Christian Science, was "to proclaim;" but the Monitor was "to spread undivided." Thus the functions of the first three periodicals were in a degree passive, or at least defensive, and expository. The world could take them or leave them as it saw fit. They stated the truth, guarded the truth, and thereby went as far as Christian Scientists then were prepared to go and hold their ground against error at bay. The Monitor, however, does not only that, but, abandoning the passive and defensive, assumes the active and offensive, with the consequence that mortal mind now fully appreciates that it "stands at Armageddon, and the battle is the Lord's."

At first the world saw in the Monitor simply a newspaper that did not print crime or scandal. Christian Scientists themselves have gained a progressive understanding of its real mission. The undivided garment of Truth is nothing less than the whole Christ-knowledge wedded to practice, Principle followed by demonstration. The Monitor is a daily demonstration of Christian Science in the eyes of all mankind. The Journal may state that Truth is mighty and will prevail, in metaphysical terms that inspire; the Monitor gets out in the market place and proves this by demonstration as conclusively as Paul proved it, or any of the earlier students of Christ Jesus. And we may rest assured that just as mortal mind rioted against Paul for breaking down the superstition of the people with regard to Diana of the Ephesians, so will mortal mind to-day riot against Christian Science for breaking down, through this paper, the popular idols of the day.

The Monitor, by the very nature of its conception by Mrs. Eddy, can never do less than stir mortal mind profoundly. The verb "spread" implies activity. It involves full participation in the routine of existence, and mingling with the people. This spreading, of course, must be according to Christian Science, which is to say that it must be in the spirit of the Sermon on the Mount. It must be loving and fearless. The Monitor has approximated this standard to a degree that is winning the somewhat grudging admiration of the world. The opposition which this newspaper encounters is mortal mind's hatred of the truth. If it had no editorial page and ventured no opinions on any subject, its news columns, by stating the truth, would still evoke violent human emotions. "For every one that doeth evil hateth the light."

As the lovers of darkness see their deeds uncovered by the light, they strike back. False theology, openly or surreptitiously, joins hands with materialism in all its forms, to put out the light. If a frontal attack does not succeed, they try a flank movement, endeavoring to set Christian Scientist against Christian Scientist, by throwing out suggestions that the *Monitor* is too aggressive, or by insinuating that a religious paper is meddling in worldly affairs, or that the motives of its news-gathering and editorial staff are questionable. Mrs. Eddy has warned us against carrying out the purposes of our worst enemies, and we need to keep constantly burnished in thought the by-law in Article VIII, Section 6, of the Manual, entitled "Alertness to Duty," to the end that we shall not turn and rend our very own.

With it all, we need to look inward, to see if our moral courage is equal to the demands placed upon it by Mrs. Eddy

in establishing the *Monitor*. We may be assured that so long as this newspaper is published, no matter how imperfectly it may seem to fulfill its mission, it must still reflect Truth. Mrs. Eddy was confronted by the suggestion of error that the truth should be sugar-coated if she desired mankind to swallow it, but she writes on page x of the Preface to "Science and Health with Key to the Scriptures": "The author has not compromised conscience to suit the general drift of thought, but has bluntly and honestly given the text of Truth." Any blunt statement of Truth produces chemicalization, but we have a further knowledge of the truth that will save us from the storm, if we are watching out.

From the beginning of its career, it has not been uncommon to see Christian Scientists bring the Monitor to literature distribution rooms without having themselves read it. Is not this proof of a feeling that this paper is for those outside the ranks? It is; and it is also proof that many have yet to understand what Mrs. Eddy accomplished in establishing our daily newspaper. A student of Christian Science who does not see in the Monitor that which makes him want to read it, who thinks that it is perhaps only a little different statement of news he already has read in his local paper, or that it is for so-called beginners and the public generally, should awake to the fact that his attitude means one of two things. Either his mentality shies off from the Monitor's standard of spiritual and intellectual conduct, or the Monitor is in fact a commonplace product. Manifestly we condemn either ourselves or the cause in having one or the other viewpoint. If we support our newspaper at all, we should support it by entering into its demonstration, and so helping to realize Mrs. Eddy's ideal of a newspaper which "is to injure no man, but to bless all mankind."

Christian Scientists cannot safely be ignorant of the Monitor. The stir in false theology, in material medicine, in secret diplomacy, in corrupt politics, in crooked business, in commercialized vice, that is created by its activities, we must be aware of, and know that it cannot deceive. Otherwise we shall find ourselves strangely moved, and perhaps assign the cause to the wrong thing. Mrs. Eddy intended her newspaper to make precisely such a stir in mortal mind. And above all, we need to ask ourselves: Did this last major effort by Mrs. Eddy in this phase of existence, find us off guard, a little cocksure of our metaphysical prowess, and so receptive to a charge into the breach by the cohorts of error, with a consequent upheaval in our own ranks, a tendency to blame other Scientists rather than take our share of the blame, a confused striking out at error, in which we often hit our fellows rather than the enemy? The answer to this question may give the key to harmony.

"As a man thinketh"

ALVA J. CUNNINGHAM

NO structure can be built and expected to stand securely unless the foundation is firm, built on something substantial. Likewise, in Christian Science, no demonstrable deductions can be evolved and expected to endure all tests unfailingly, unless the fundamental basis for reasoning is truth—an understanding of God, of man, and of their relationship. For centuries mankind have been yearning for this knowledge. Glimpses of the glory of God have been caught all along through history by prophets, disciples, and spiritually minded persons, but an all-inclusive, practical understanding of God was made possible in this age when, through her consecrated efforts, Mrs. Eddy found the explanation of the healing works of Christ Jesus and

gave it to the world in her textbook, "Science and Health with Key to the Scriptures." Therein we learn that God is Principle, the infinite, omnipotent force governing and controlling all, that God is substance, Spirit, Life, Truth, and Love, and that He is Mind. In the first chapter of Genesis we find that "God saw every thing that he had made, and, behold, it was very good;" creation was complete and all was good. This is another way of saying that evil is powerless, that nothing which really exists possesses qualities other than good, for there cannot possibly be room in infinite good, God, for His unlikeness. He is "of purer eyes than to behold evil." In the first chapter of Genesis we also read that "God created man in his own image," so we see that the real man possesses no qualities apart from God; he is spiritual, immortal, and eternal.

Since man is the image and likeness of God, the reflection or expression of Him, and since God is Mind, it follows that man is the reflection of Mind. In infinite Mind all is harmony, unlimited wisdom, intelligence, and perfect action, and there is no unconsciousness, no fatigue, no confusion. So also in the real man are these attributes expressed. When problems arise that seem to baffle us, when sickness tries to make itself seem real to us, when temptations block our path and we waver beneath the stress, we must stop and declare this truth about God and man. It will awaken us from the material senses, will clarify our thoughts, and if we believe the declaration, not with blind faith but with trust that "with God all things are possible," it will gain for us the victory in the struggle.

What truly exists is the expression of Mind. The things with which we surround ourselves express our thoughts, and whether our lives be joyful or miserable depends upon us. We must not forget what the real man is or that our real life is spiritual, for on page 269 of Science and Health Mrs. Eddy says: "Metaphysics resolves things into thoughts, and exchanges the objects of sense for the ideas of Soul." The educational systems in our everyday experience are intended to awaken and develop reasoning, and to equip us with better thoughts, to lead us higher. Our habits of thought determine our individual progress. Paul tells us that we must work out our own salvation and that we need not wait indefinitely but that "now is the accepted time." What is meant by salvation Christian Science explains as an awakening from materiality to a demonstrable understanding of God, divine Mind, as All-in-all. We cannot expect to arouse ourselves from our indulgence in so-called material pleasures or indifference if we entertain all the promiscuous thoughts that crowd upon us. We are warned to control our thoughts, not by will power, which is purely mortal mind attempting to assert authority, when in reality it is powerless, but by spiritual alertness. We must begin simply, without delay, and strive conscientiously. We must remember that another's thought has no control over us, for it is only mortal. Mrs. Eddy sums up the whole question of thinking in this loving counsel on page 210 of "The First Church of Christ, Scientist, and Miscellany": "Beloved Christian Scientists, keep your minds so filled with Truth and Love, that sin, disease, and death cannot enter them. It is plain that nothing can be added to the mind already full. There is no door through which evil can enter, and no space for evil to fill in a mind filled with goodness," and then in the following paragraph she adds: "The right thinker abides under the shadow of the Almighty. His thoughts can only reflect peace, good will towards men, health, and holiness."

Strong Reasons

THE world has not given up idolatry because it has grown too civilized to prostrate itself before graven images. The gods of to-day are not golden calves; are not Olympian deities, with more than the usual share of human vices; they are the vices taken from these deities, and held as images in thought. "Produce your cause, saith the Lord," so writes Isaiah; "bring forth your strong reasons, saith the King of Jacob," in a passage which has been better translated, bring forth your idols. Isaiah knew perfectly well that a man's idols were the desires he was clinging to, and that it was very immaterial whether they were molten calves, images of Dagon or Baal, or anything else. He knew that so long as they were clung to in thought, they were strong reasons. The plain truth is that anything which displaces the realization of Principle is an idol. "It is but a belief," Mrs. Eddy writes, on page 346 of "Miscellaneous Writings," "that there is an opposite intelligence to God. This belief is a species of idolatry, and is not more true or real than that an image graven on wood or stone is God."

The curious thing is that though the Bible is full of warnings on this subject, from one end to the other, its readers are generally content to believe that they have escaped from idols by not worshiping graven images. forget that their strong reasons are their idols, and that these strong reasons must be treated precisely as the prophets were always adjuring Israel to treat the graven images. That is to say, they must be thrust out of consciousness and utterly destroyed. It is very little good talking about Principle, and clinging to the image of the beast. Jesus made this extremely clear when he said, "Ye have heard that it was said by them of old time, Thou shalt not commit adultery: but I say unto you, That whosoever looketh on a woman to lust after her hath committed adultery with her already in his heart." It is only as the world learns gradually that all causation is mental, that it can begin to understand that evil is entirely mental, that it is nothing but a counterfeit of good, of divine Mind, that it is a hypnotic influence which endeavors to flood the human consciousness, and that it can only be overcome by the realization that its existence is purely supposititious, through the knowledge of the infinity of divine Mind.

The men and women of to-day read the stories of Olympus, and wonder how people brought up on the great Greek philosophers, dramatists, and historians, could have accepted so debased and childish a theology. Yet they have taken the Zeuses and Aphrodites, Ares and Hera, and all their company, and, whilst ridding themselves of their material personifications, retained their mental characteristics. The new Olympus is the catalogue of the lusts of the flesh, so faithfully recorded by Paul: "Adultery, fornication, un-

cleanness, lasciviousness, idolatry, witchcraft, hatred, variance, emulations, wrath, strife, seditions, heresies, envyings, murders, drunkenness, revellings, and such like." These are all to be found in the despised Olympus with the names of the gods attached to them, but they are also to be found in the human heart to-day, only that, as Isaiah says, they are called strong reasons instead of graven images.

Still, in spite of the warning of the Decalogue, that God is a jealous God, the world goes on bowing down to these passions and worshiping them, whilst congratulating itself that it is not breaking the Second Commandment. Now Principle is, of course, jealous in the only sense in which it is possible for infinite good to be jealous; that is to say, it does not leave room for anything outside itself. The man who gives way to the lusts of the flesh accepts a supposititious evil as a reality, and so comes as completely under the ban of good as if good was conscious of the existence of evil, which of course infinite good cannot be. So long, however, as the generations of evil appear to exist, so long is evil banned by good. It may be unto the third and fourth generation, but that depends exactly on how long it takes the victim of hypnotic evil to wake up to the fact that he is being imposed upon by false suggestion. The moment the victim begins to wake up, he discovers that the jealousy of good is so great that it knows nothing of evil, knows nothing of anything but itself, that this jealousy is the only refuge the individual has from the false claims of evil, and that it is a refuge which can never be invaded.

In just the same way, of course, divine Principle shows mercy to those who love it and keep its commandments. But in order to love Principle, it is necessary to understand that Principle itself is Love. In other words, that Love cannot be summed up in the lower propensities, but is itself only another name for God, good. "The divine significance of Love," Mrs. Eddy writes, on page 250 of "Miscellaneous Writings," "is distorted into human qualities, which in their human abandon become jealousy and hate." That is just what happened to the men who peopled Olympus and the other heavens with polytheism. They made the gods jealous, without understanding exactly what jealousy metaphysically meant; in other words, they distorted it into a human quality. But jealousy really is zealousness, so that the more zealous the individual is in his pursuit of goodness, the more jealous of goodness he becomes. The height of this zealousness, of this jealousy, is reached, in the infinity of good which knows no evil, and thus, while showering love on those that are obedient to its ideals, necessarily shuts out all those whose zeal has been given to the pursuit of evil.

The only way, then, to keep the Second Commandment is by a jealous determination to adhere to Principle. The stronger this zeal becomes, the more completely jealous must be the individual's love of Principle, with the result that the highest phase of jealousy is reached when the belief of evil gives place to an understanding of Principle so clear as to blot out all knowledge of evil. To the great writers of the past, human jealousy has always been the antithesis of Principle, a veritable zeal for evil. As such it is one of the lusts of the flesh, one of the deities of Olympus, in short a counterfeit of good. The jealousy of Principle must then be the very antithesis of all this, it must be the fruit of the Spirit. But the fruit of the Spirit is the very opposite of human jealousy. Therefore it is manifest that God's jealousy is the absolute opposite of a man's jealousy, that it is a zealousness for good so infinite as to have no knowledge

of evil. "They that are Christ's," Paul writes, after enumerating the fruits of the Spirit, "have crucified the flesh with the affections and lusts." The thinkers of centuries ago were willing enough to crucify the deities of Olympus, but they took their children to their hearts. As a result, all down those centuries Principle has visited its displeasure on the generations of those who have clung to the lusts of the flesh. It has been equally loving to those who have been obedient to its demands, and have taken up the cross daily to crucify the lusts of the flesh in the endeavor to walk in the footsteps of the Christ.

FREDERICK DIXON.

Redemption

SUPPOSITIONAL mortal consciousness, which psychologists and other people have believed to be mind or a phase of mind, capable of lapses into unconsciousness or semiconsciousness, and divisible into parts, one of which has been called subconsciousness, is not true Mind. Strictly speaking, it has none of the qualities of real consciousness, but is a mere hypothesis, supposing itself able to substitute itself for the divine reality. Yet that it should even seem to be shows that there must be the reality which it claims to imitate. In other words, true consciousness must exist, must be the one provable entity, quite apart from the evidence of the senses, and must continue to exist throughout all eternity. Spiritual consciousness is indestructible, because it includes no element of destruction, and because there is no power outside of it that could really even attack it.

The hypothesis of mortal consciousness and mortal living generally can be improved, then, only as it gives way to the indestructible and unlimited reality of being. Christian Science is to-day bringing to humanity the truly evangelical good news that mortality, with all its discords and limitations, can indeed give way to the true Mind and its omnipresent manifestation. Thus is the thought of mortals uplifted from the materialistic beliefs which they have found so unsatisfying, and turned to the real Life which is infinite with spiritual variety. The only redemption for mortality lies in the complete replacement of it with immortality, for no lingering trace of mere human belief can endure in the presence of the truth.

Human consciousness, with all its beliefs in suppression, depression, and repression, must be replaced by Truth fully expressed. As this vanishing of evil because of the unfoldment of good goes on, it is demonstrated that there is in reality now and always but the one real Mind, the divine Mind manifest as idea, and that this one never has been diminished, reversed, or divided into limited phases. To understand this fact is to understand the basis of Christian Science. Healing is proved just in proportion as the human sense of things subsides because of the acceptance of Principle, infinite Mind, and its orderly action as the present fact. On page xi of the Preface of Science and Health Mrs. Eddy writes: "The physical healing of Christian Science results now, as in Jesus' time, from the operation of divine Principle, before which sin and disease lose their reality in human consciousness and disappear as naturally and as necessarily as darkness gives place to light and sin to reformation. Now, as then, these mighty works are not supernatural, but supremely natural. They are the sign of Immanuel, or 'God with us,'-a divine influence ever present in human consciousness and repeating itself, coming now as was promised aforetime,

> To preach deliverance to the captives [of sense], And recovering of sight to the blind, To set at liberty them that are bruised."

It is no new thing for the human sense of pain and pleasure to lose its reality, for throughout the ages the mortal sense of things has proved so unsatisfactory in all its illusive phases that one belief of limitation after another has had to give way to the unlimited possibilities of the divine Mind. All the while, of course, divine intelligence manifest has been the actuality, and all the while the illusions of materiality have been ephemeral. In other words, infinite Principle, with its idea, has been the one presence and power even where suppositional mortal mind has conceived of a limited human experience. Through Christian Science, however, it is now possible to have the full advantage of all the righteousness there ever has been, and to prove in daily practice that the genuine righteousness of Mind, which consists of spiritual understanding and spiritual living, truly heals. What supposes itself to be a mortal mind, conscious of disorders and troubles, must be annihilated through the conscious practice of Principle; and yet this annihilation is not the destruction of anything real, for it is simply the reduction to nothingness of that which never has really existed. Christian Science is indeed the Comforter in that it replaces the illusions, which are thus reduced to nothingness, with the tangibility of divine intelligence and its idea or expression.

As Mrs. Eddy says on page 52 of "Unity of Good." "This Science of God and man is the Holy Ghost, which reveals and sustains the unbroken and eternal harmony of both God and the universe. It is the kingdom of heaven, the ever-present reign of harmony, already with us. Hence the need that human consciousness should become divine, in the coincidence of God and man, in contradistinction to the false consciousness of both good and evil, God and devil.-of man separated from his Maker. This is the precious redemption of soul, as mortal sense, through Christ's immortal sense of Truth, which presents Truth's spiritual idea, man and woman." For the understanding of this true Science, Christian Science, no humanly psychological analysis of suppositional consciousness, alias mortal mind, is necessary. So-called psycho-analysis, for instance, makes an altogether wrong approach to mortal problems. The searching for supposed human repressions as causes for abnormalities must be replaced with the finding of the divine Mind as the cause for all free expression. Analysis of human consciousness is analysis of a base counterfeit, whereas analysis of the divine Mind, discernment of its wholeness, and the practical understanding of its allness, must inevitably avail for the proving of what true experience is here and now.

Christian Science heals because it shows to all who study it with consecration how the complete expression of divine intelligence can be demonstrated. It is true religion, including no mere sanctimoniousness or smugness in its teaching. It supplants human emotionalism with the quietness and assurance forever which is inherent in the divine consciousness of immortal living. Through the practice of Christian Science, so-called human consciousness, with all that may seem to be taking place in it, must sooner or later be superseded by the infinite Mind infinitely manifest. The process by which it is being superseded or healed is even now continuously unfolding.

Testimonies of Healing

In the year 1913 we traveled from South America to our home, Zurich, Switzerland, where we opened a store. In December my wife became ill with abdominal cancer and was obliged to undergo a severe operation in a hospital. After approximately one and one half years symptoms of cancer again appeared, and the physician stated that if she wanted to live she must undergo a second operation. We could not decide to take this step again.

Late one Wednesday afternoon a customer came into our store, and upon leaving stated that she was going to a meeting. In order to divert my wife's thoughts I made arrangements that she too might attend, and it proved to be a Christian Science testimony meeting. From that time on my wife attended the Sunday services and Wednesday evening meetings regularly. Through her attendance she became acquainted with a practitioner and requested her help, which was lovingly given. In one treatment the cancer symptoms disappeared and my wife's appearance improved daily. Formerly when she attended church services she was excited for the remainder of the day, but when she returned from the Christian Science service there was a great sense of peace.

Through this transformation and the healing of the cancer I became inquisitive, and, although with conflicting thoughts, I too attended a service. I also wish to mention that for over thirty years I had not attended a church unless some special occasion demanded my presence. Gradually the Christian Science services became dear to me and later indispensable, so that I did not miss a single service, and I began to experience the blessings of Christian Science for myself. One day during the autumn of 1916 I fell down a long flight of stone steps in a business house and remained lying at the bottom. The people on the premises attempted to lift me, but it became clear to me that God is omnipresent, and I got up unassisted and commenced walking home. I had hardly walked ten minutes when I realized that I was free from pain, and a sense of peace reigned.

During a pleasure trip to the mountains I tore the ligament behind the joint of the right knee. I was able to go home alone and in a week was healed. About three years ago I became ill with dropsy and asthma, which errors vanished after one treatment from a practitioner. I then suffered from muscular tuberculosis, and the wound enlarged in spite of treatment. In my need I visited another Christian Scientist and complained to her regarding the seeming failure. She made it clear to me that this was due to my own thinking. On my way home I thought over the conversation and worked in Christian Science. Upon arriving home I was about to apply a dry bandage, when I discovered that a thin skin had formed over the entire wound. In a week I was completely healed, without even a scar remaining. My dear wife and I cannot be grateful enough to God and Christian Science for all the blessings that have come to us.-Otto SCHÄRER, Chatarina, South Brazil, South America.

My first healing through Christian Science occurred about fourteen years ago, and was accomplished in one treatment, after weeks of suffering under materia medica. Not only this ailment, abscess in the head, but also eye trouble, for which I had worn glasses for years, disappeared as a result of this one Christian Science treatment. Strange to say, I did not follow up the study of Christian Science, even

after such abundant proof of its healing efficacy until about three years later, after a very severe illness which left me in a much run down and very wretched physical condition; in fact one physician said at this time that I would not live six months. I once more turned to Christian Science for help, with the determination this time to stay with it. During the ten years that have followed I have witnessed, in my family of four, many healings, some of which were of nervousness, heart trouble, erysipelas, headaches, colds, ringworm, abscess in the ear, stomach trouble, effects of accidents, burns, and poison oak. My youngest child, seven years old, was born under Christian Science treatment and has never taken a drop of medicine. He is a very healthy, strong looking child, upon which many have commented. We have proved beyond all doubt that our supply is spiritual and continuous, hence entirely from God, and to say that we are grateful seems far from expressing our feelings. The way has often seemed dark and long, and discouragement so great that it was hard to press on, but His grace has always proved sufficient for every day's problem, and the way grows brighter as I press on, as it always will when we are willing to let Love lead us.

I feel my testimony would be incomplete if I did not mention what the patient, loving, faithful help given by practitioners during the dark hours has meant to me, also the study of the daily Lesson-Sermons and other Christian Science literature, so wisely established by our dear Leader, Mary Baker Eddy. My earnest desire is voiced in a stanza of one of her hymns (Poems, p. 13):—

My prayer, some daily good to do To Thine, for Thee; An offering pure of Love, whereto God leadeth me.

-- (Mrs.) Lucille Beaulieu, Mountain View, California.

4

It is many years since I first heard of Christian Science, my work having taken me into a part of the country where I met many students of it. For a long time I would have none of it, but by degrees I saw how it had changed these people and how much happier they looked. One case in particular impressed me, that of a young girl whom I knew, who had undergone two operations and was left a physical wreck. When I saw her later on restored to health and strength through Christian Science, I began to read the textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy. The first chapter, "Prayer," answered a question that had often puzzled me, though I had attended church and Sunday school from childhood, but when I had finished reading the book I laid it aside, for it seemed more than I could accept. I saw that it meant the uprooting of much that I had believed in, for forms and ceremonies had no place in Mrs. Eddy's teachings and I loved the ritual of my church.

I was advised by a student of Christian Science just to go on reading and to accept what I could, that it would continue to unfold as I was ready for it, and I found it to be so. Old beliefs gradually dropped away, and later on the difficulties were overcome. I began to love the Christian Science services and the hymns.

During this time I was quite unconsciously healed of a rupture of some years' standing; since which I have been able to lift and carry heavy weights. The healing has been complete and permanent. I had great terror of the air raids during the war. In this connection a testimony at church one Wednesday evening gave me a helpful thought from the

ninety-first psalm: "He shall cover thee with his feathers." I realized then that so protected was I that fear of any danger was impossible, and oh, how good it was to lose the terror. I have also been wonderfully helped in my work. Duties which had seemed like mountains were successfully and easily accomplished when I came to do them. I have had great help from the periodicals, and I feel I show so little gratitude to God in comparison with what I owe, for I have so very much to be grateful for.

(Miss) HARRIET ARCHIBALD, London, England.

I wish to express my gratitude for what Christian Science has done for me and for what it is doing day by day. About five years ago I was healed instantaneously, through the kind help of a Christian Science practitioner, of a longstanding organic trouble which physicians had pronounced chronic. Several doctors had treated me and had made every effort to restore health, but without avail. I had had electric treatments and had taken sea voyages and resorted to change of climate advised by physicians, but without results. I was not a little surprised, therefore, when I was healed through Christian Science in one treatment. Not having the slightest idea how this wonderful work had been accomplished, I wanted to know more about Christian Science. When I thanked the practitioner for her splendid work she replied, "Do not thank me, for God has healed you." Then, of course, I had a desire to learn to know who or what God is and how He heals, and I immediately took

up the study of Christian Science. The more I study it the more I rejoice and daily give thanks unto God, divine Love, for having led me to the truth. Jesus the Christ said, "I can of mine own self do nothing;" also, "It is your Father's good pleasure to give you the kingdom." I am indeed grateful for a glimpse of the kingdom, for the spiritual awakening, and for a right concept of God and His creation. I am grateful for having found the religion which teaches us how to pray aright and to demonstrate the truth,-a religion of Love. Through the application of Christian Science I have received a great many blessings. I have been able to overcome grief, knowing that there is no separation in Mind. I have learned how to overcome loneliness, impatience, and resentment. My sister and I were wonderfully protected in the midst of a terrible conflagration by putting into practice the little understanding we have gained of Christian Science. I realize more and more each day that the faith I thought I had in God before I came into Christian Science was nothing but a blind belief, for the apostle James tells us that "faith without works is dead." The Bible was a closed book to me until "Science and Health with Key to the Scriptures" by Mrs. Eddy revealed its truths to me.

For several years I have been traveling with my husband, and while years ago I used to take all kinds of material remedies with me, I now have only the Bible and Science and Health, for God is my only Physician. I know that God is a very present help in trouble. I am also most grateful for our periodicals, which are a great help to me. I am grateful to Christ Jesus the Way-shower, and to our dear Leader, Mary Baker Eddy, who has so unselfishly revealed this wonderful truth to the whole world.—(Mrs.) MATILDA GOTTHELF LEVY, Jacksonville, Florida.

I, also, rejoice in testifying to the many blessings which have come to me through Christian Science. When Christian Science found me I was not able to walk, either in the street or in the house, without a cane for support, and my mother and sister had to lift me into bed when I retired. Through the application of Christian Science I have learned that man in God's image and likeness expresses perfection and health and needs no other support than God, who is the only power. I can now walk without any material support and do not need any human help, for Jesus said when referring to the Christ, "Lo, I am with you alway, even unto the end of the world."

I also wish to express my gratitude for our periodicals, the gifts of our dear Leader, Mary Baker Eddy, which carry a healing message to the whole world. I am very thankful to God and grateful to Mrs. Eddy. My daily prayer is to have more of that Mind "which was also in Christ Jesus." (Miss) PAULA GOTTHELF.

Christian Science is the greatest blessing that has ever come into my life. This new-old religion was brought to my attention before I had become ingrounded in creeds and dogmas, and when I learned of its teachings it just seemed to me the natural thing that Christians should "heal the sick," as the Bible so clearly emphasizes. There were only a few Scientists in the little town where I was then living, but their joyousness, their many loving deeds for others, made me realize that they had found something that I wanted and needed. Through reading our Leader's writings and the periodicals I have been helped and healed in many ways.

While in training at one of our large army camps during the war, I was greatly helped during the vaccination and inoculation period, and when the influenza epidemic was raging through the camp I was able to go among my friends and companions without the slightest fear. The opening words of one of our familiar hymns (No. 81),

> In atmosphere of love divine, We live, and move, and breathe,

came to my thought many times during that experience. Although many physical ailments have been overcome, I am most grateful for the preventive power of Christian Science; for the knowledge of God as Principle, ever governing man in perfect harmony, destroying whatever is inharmonious in human thought, and bringing to light that which is true and perfect. I am grateful for the life of our Leader, Mary Baker Eddy, for her writings, for the church services, and for the periodicals, lectures, and reading rooms.

JULIAN ADDISON JENKINS, Brookline, Massachusetts.

I give thanks to God for many demonstrations of His healing power, and particularly for the healing of my mother. She suffered from liver trouble from the age of fourteen, when she had her first attack of jaundice, which was supposed to be hereditary and, according to the physicians, had become a chronic condition and was accompanied by all its attendant ills, including sick headaches and inaction of the digestive organs. With the third attack of this trouble there was evidence of gallstones, and as the result of great sorrow my mother was finally bedridden by an attack of albuminosis. This occurred ten years ago, and the physician who attended the case, taking me to one side. said, "You must be prepared to lose your mother. The steel has worn away the scabbard. Her mental depression has acted on a function of the body and there is nothing left to be done. It is only a question of time. Make her follow a stricter diet." Mother having somewhat recovered refused to have anything further to do with physicians and upon me fell the task of being on the lookout for all new

remedies, and of administering them to her. All these palliatives, together with a strict diet, had weakened her; she became subject to neurasthenia and life was a burden to her.

I had heard of Christian Science twelve years ago, but it was not rightly presented, and I felt no interest in it. It took many trials, and much physical and mental suffering before we accepted the cup of cold water which Christian Science held out to us two and a half years ago, and to-day we understand what Mrs. Eddy means when she writes on page 66 of Science and Health, "Trials are proofs of God's care." At that time, as an added privilege, there appeared the French translation of "Science and Health with Key to the Scriptures" by Mary Baker Eddy. How we quenched our thirst at this marvelous well of the teachings of divine Science! Help was asked of a practitioner and after a few days my mother could eat and digest anything; she had again taken courage and was getting enjoyment from life, and with each step taken in the way of Truth she was becoming happier. Pains in her legs also disappeared and she was able to lay off elastic stockings which she had worn for years. An attack of grip was overcome for her in a few days without having to keep her bed. A complete transformation has taken place in our lives, which have daily been improved through the teachings of Christian Science through the understanding that God is All-in-all. The proof of faith lies in the effort to gain each day in understanding and to apply it sincerely, thus to become an example for those who have not yet attained to it, in loving God with all our heart and in manifesting love for our neighbor. To-day this is my fervent prayer: My God, in calling Thee Father, may I live in the bonds of brotherhood with all Thy children, for Thou art our Father.

I give thanks to God for having given to the world such a wonderful light, through Mary Baker Eddy, to whom my gratitude goes out. I also thank the practitioner who has helped us in the way that leads to the life which is in God.—(Miss) IDA BOVET, Geneva, Switzerland.

I desire to confirm the testimony written by my daughter and to give thanks to God for His great goodness, convinced of the truth of these words of Mrs. Eddy given in her textbook: "To those leaning on the sustaining infinite, to-day is big with blessings."—(Mrs.) ELISABETH BOVET.

I have long wished to express my gratitude for what Christian Science has done for me. Each healing has been like a "chief corner stone" in my progress. No physical need could have touched me so deeply as to overcome my prejudice against what I thought Christian Science to be, but grief, inducing the most intense melancholy, closely touching upon insanity, rendered me ready to grasp at any straw for help. A kind relative took me to a practitioner, who instantly removed all prejudice against Christian Science. It required several years to overcome the whole of the error which had been the impelling cause of my turning to Christian Science and which has resulted in our present knowledge of the truth. I can truthfully state that I am absolutely healed of all melancholy and its every symptom. In the meantime I have had so many and varied proofs of the healing power of divine Science that it would not be possible to name them all.

In my family and in my work as a Christian Science nurse I have witnessed the healing of burns, sprains, dislocations, sick headaches, ptomaine and gas poisoning, chronic catarrh, and bronchitis. Twice I have been instantly healed of pleurisy; and a ruptured tendon, resulting in the loss of the use of one arm, was also made "every whit whole," as was a broken ankle bone, without loss of time from work. An injury to the neck, which was apparently broken, was healed instantly, calling forth from a physician the exclamation: "A miracle!" Christian Science gave absolute protection to my two sons during the war, and protected one of them from a terrible imprisonment. Every form of fear has been healed, family relations have been harmoniously adjusted, and the reign of love is acknowledged by each member. Positions have been obtained and I and my family have been protected repeatedly from business losses. Our Leader's complete works are my most treasured possessions.

I am most thankful to God and grateful to Mrs. Eddy for each one of our publications, which give us daily, weekly, and monthly food; for our reading rooms, in which I have spent many days in various cities. I am grateful for membership in The Mother Church, and in a branch church; also for church building experiences. I know that "Every trial of our faith in God makes us stronger" (Science and Health, p. 410), and that Truth is always victorious.

(Mrs.) FLORENCE ETHEL GILBERT, Adrian, Michigan.

٠

When opening either the *Journal* or the *Sentinel*, it is the natural thing for me to turn to the testimonies first. Perhaps this is the result of many months of struggle for help when I would anxiously hunt through the testimonies for the healing of cases similar to mine.

Christian Science was hard for me to understand, and at first any healing that came to me was the result of persistent effort. In giving testimonies, so many would tell of instantaneous healings, and to one who was struggling for health it was always a help to read of some one who had had to put forth an effort. When seeking help for the first time I was threatened with an abnormal growth—of which I was cured through the help of a practitioner and my own desire to know the truth.

Both of my children and I have been helped numerous times. During the influenza epidemic my son and I had what would be called severe attacks, but with the help of Science we were healed within a few days and had none of the after effects which so many suffered from. As a child I was reared according to a denominational religion and it was like finding a "pearl of great price" when the first gleam of Truth came to my consciousness. Now my desire is so to understand Christian Science that I shall constantly express the truth.

(Mrs.) MADGE MATTHEW, San Jose, California.

*

- TA

In love and gratitude for all that Christian Science is to me, I send this testimony, trusting it may prove helpful to others. I had two beautiful healings in my family, one of appendicitis and one of pneumonia. When the physician was called he said he would give me twenty-four hours to get the little girl to the hospital. I said I would rather have Christian Science treatment and called for the help of a Christian Science practitioner. In three days the little girl asked for her clothes and wanted to get up. She said, "Mamma, I am well." I got her clothes and she dressed. She was completely healed. I am so thankful for what Christian Science has done for me and for my family.

(Mrs.) Julia A. Perkins, Sterling, Colorado.

Signs of the Times

[Excerpts from "Modern Democracies," by James Bryce (Viscount Bryce)]

"Changes which it would have needed a century to effect may now come in three or four decades. Superstitions and all else that is rooted in religion hold out longest; but the habits of deference and obedience to earthly powers can crumble fast, and as they crumble self-reliance grows. Thus the capacity for self-government may be in our time more quickly acquired than the experience of the past would give ground for expecting."

"The right way to judge democracy is to try it by a concrete standard, setting it side by side with other governments. If we look back from the world of to-day to the world of the sixteenth century, comfort can be found in seeing how many sources of misery have been reduced under the rule of the people and the recognition of the equal rights of all. If it has not brought all the blessings that were expected, it has in some countries destroyed, in others materially diminished, many of the cruelties and terrors, injustices and oppressions."

"The question of the permanence of democracy resolves itself into the question of whether mankind is growing in wisdom and virtue, and with that comes the question of what religion will be in the future, since it has been for the finer and more sensitive spirits the motive power behind morality. Governments that have ruled by force and fear have been able to live without moral sanctions, or to make their subjects believe that those sanctions consecrated them, but no free government has ever yet so lived and thriven, for it is by a reverence for the Powers Unseen and Eternal which impose those sanctions, that the powers of evil have been, however imperfectly, kept at bay and the fabric of society held together. The future of democracy is therefore a part of two larger branches of enquiry, the future of religion and the prospects of human progress."

"Encouragement may be found in the reflection that such moral progress as history records has been made chiefly in the way of raising the sentiments and standards of the average man. Whereas in the realms of abstract thought and in those of science and of art it is to the great intellects that the world looks, popular government lives and prospers more by the self-restraint and good sense and good will of the bulk of the nation than by the creative power of great intellects; and whoever looks back three or six or nine centuries cannot doubt that in the civilized communities as a whole man's habits and moral standards have risen."

"The statesmen and philosophers of antiquity did not dream of a government in which all men of every grade should bear a part: democracy was for them a superstructure erected upon a substructure of slavery. Modern reformers, bolder and more sanguine, called the multitude to power with the hope and in the faith that the gift of freedom and responsibility would kindle the spirit self-government requires. For them, as for Christian theologians, hope was one of the cardinal virtues. Less has been achieved than they expected, but nothing has happened to destroy the belief that among the citizens of free countries the sense of duty and the love of peace will grow steadily stronger."

[Religion as a Subject of Daily Conversation and Concern]

Governor Cox of Massachusetts is quoted in *The Christian Register* as saying that "one of the encouraging signs of the times is the way in which people are talking about religion." He says: "Religion is no longer an affair confined to the sanctuary; people are no longer afraid to engage in religious discussion. Religion is what it should be, a subject

to talk over as one talks over any affair of daily concern."

... He thinks that men in official positions should not impose their religious opinions on the public, should not even proclaim that they are religious. "Let them prove by actual accomplishment," declared the Governor. "The public will soon discover whether or not the metal rings true. . . . Religion is getting into business, it is getting into legislation. Formerly people went off by themselves when they talked religion and discussed the subject as though they feared some one might overhear them. We are bringing religious discussion out in the open, and it is a good thing."

[From The Los Angeles (California) Voice]

From time to time some one starts up a daily paper which is to be a model in every way. We don't know of one that has ever succeeded—unless we except *The Christian Science Monitor*, published in Boston, which is admittedly a very high class paper.

[From "Value of Doctrines of the Atonement," by Shailer Matthews in The Journal of Religion |

As social custom lays less emphasis upon inhibitions to forgiveness, and under the inspiration of Jesus' own teaching theology emphasizes the necessity of forgiveness in immediate response to repentance it is clear that the doctrine of the atonement will continue to assume new forms. . . . Just what that sort of atonement doctrine will be I have not space to set forth, although the teaching of Jesus will be its heart and center. But functionally I am convinced that it will be the same as these former doctrines. It must satisfy the moral sense of our own day. . . . The beliefs that God needs a sacrifice of some sort to be propitious, that He is a sovereign with an honor that needs to be satisfied, that He is under a necessity to punish whether or not He chooses to be merciful, or that in some way it is possible to transfer merit and righteousness from Jesus to other individuals, reflect past ideas which have proposed moral impediments to the forgiveness of God. They have functioned; creative concepts must supplant them. Already God's forgiveness is beginning to be set forth from one or more of the social attitudes which determine our morality. As the total Christian movement becomes affected by the social readjustments. these formulas will naturally grow helpful. They will meet the need men feel of being convinced that God's love is moral.

[From Oxnard (California) Courier]

The sin of worry is an important factor in the spread of the crime wave now sweeping the country, according to Rev. Dr. Daniel F. Rittenhouse, pastor of the First Baptist church of Columbus, Ohio, discussing "The Great American Disease." "Worry is a dissipation and is farther reaching than the liquor traffic," he said. "Worry is regarded as the greatest contributing cause in breaking down our intellectual and moral life. Worry is a contagion which has afflicted all mankind. It flourishes in the king's palace and you will find it in the hovel. There is no nation on the earth that suffers from this disease as does America. Europeans say they can always tell an American. He is smartly dressed, but has such a haggard look.

"The greatest cause of worry is the fear of losing a job. Loss of health and fear of a dependent old age are next. All these involve food, drink, and shelter. The only reason we fear these things is our lack of faith. There is no worry in nature. The flocks of the field and the birds of the air never worry about their food. Worry is most prevalent in the middle and upper classes. They worry because civiliza-

tion as it advances becomes more complex, and the complexity of our life wears out our lives. I attribute the growth of Christian Science largely to this disease of worry. You may say what you like about the folly of it all, but folks follow it because the great big thing in its program is lack of worry."

["Jesus' Attitude Toward Wealth"—From an Essay submitted for the Hattie Elizabeth Lewis Prize for Essays on Applied Christianity, by Robert Henry Albach]

We may well wonder with what manner of consistency Jesus could commend wealth as an achievement and at the same time seem to condemn it as a peril. A closer study, however, discloses the fact that his attitude was entirely one of the individual. The person who masters his wealth and regards it as a stewardship, as a means to an end, the end being the attainment of a higher spiritual level, is held in high regard by Jesus, who terms his wealth an achievement. But the person to whom wealth is itself an end, who permits wealth to completely master him, to him Jesus directs his many words of warning in which wealth is regarded as a peril.

In his effort to create a true human society, Jesus found riches to be a strong divisive force which wedged society apart in horizontal strata between which fellow feeling was paralyzed. This condition was adverse to the spiritual progress of men and whenever he found men affected by it he condemned their wealth. This is the reason why he called upon the rich young ruler to give up his wealth. On the other hand, Nicodemus, although a wealthy man, was not requested to part with his riches, because Jesus saw that they were not standing in the way of his spiritual attainments.

[From a Letter in Zion's Herald, on a Recent Season of Revival in a Western City]

It has been interesting to note that with a considerable portion of the audiences the revivalist's gibes at modern Bible interpretation, at the spiritual value of scientific thought and educational methods, left them cold. They did not applaud his attack upon thinkers who have made great contributions to life even though they never made distinctive testimony to our faith. . . . Is it possible that we are coming to see that ridicule and abuse of our opponents get us nowhere? The thinker must be met with thought, and the church travels fastest when most aware of this fact.

[From Annual Report of Dr. Nicholas Murray Butler, President of Columbia University]

There is no man, there is no people, without a God. That God may be a visible idol, carved of wood or stone, to which sacrifice is offered in the forest, in the temple, or in the market place; or it may be an invisible idol, fashioned in a man's own image and worshiped ardently at his own personal shrine. Somewhere in the universe there is that in which each individual has firm faith, and on which he places steady reliance. The fool who says in his heart, "There is no God," really means there is no God but himself. His supreme egotism, his colossal vanity, have placed him at the center of the universe, which is thereafter to be measured and dealt with in terms of his personal satisfactions. So it has come to pass that after nearly two thousand years much of the world resembles the Athens of Paul's time, in that it is wholly given to idolatry; but in the modern case there are as many idols as idol worshipers, and every such idol worshiper finds his idol in the looking-glass. The time has come once again to repeat and to expound in thunderous tones the noble sermon of Paul on Mars' Hill, and to declare to these modern idolaters, "Whom therefore ye ignorantly worship, him declare I unto you."

There can be no cure for the world's ills and no abatement of the world's discontents until faith and the rule of everlasting Principle are again restored and made supreme in the life of men and of nations. . . . There can be no serious discussion of truth and no sincere attempt to answer the question of jesting Pilate, unless it be assumed that there is such a thing as truth to be pursued, and if possible, found. When found and demonstrated, truth is to be recognized and acted upon. It will not do for some one else to say that he has a wholly contrary conception of truth, or that truth for him means something quite other than truth for any one else. Some forms of this genially inconsequent doctrine are just now enjoying a certain short-lived popularity based upon a false psychology and a grievous travesty on philosophy, but their irrationality and the immorality of conduct based upon them are so obvious that their life is certain to be short.

[From The Living Church]

The Rev. —— declines to see any menace to the continuation of prohibition in the prevalence of home brewing. He is quoted as declaring: "Most drinkers like bright lights and excitement. Only the 'old soaks' will gather in the cellar for home brew sprees, and they will soon die out. Whisky running will pass just as did the smuggling craze, for before long its sporting element will cease to be recognized and its criminal aspect alone will remain."

Dr. — is right, undoubtedly. Grown-up men now play at being moonshiners in their own cellars in exactly the same spirit that they played at being pirates and Indian killers when small boys. When the novelty wears off, they will awaken to the realization (most of them) that they are merely unromantic law-breakers, and that their "home brew" is a menace to their health and sanity.

Church Notices

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,-The Mother Church,-printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to CHARLES E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

+ + + Announcements

From The Christian Science Publishing Society Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in The Christian Science Monitor, were run off at the time of their publication in the Monitor.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 8¼" x 10¾". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for The Christian Science Monitor, Journal, Sentinel, Quarterly, and Heralds, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and imme-

diate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

There will be placed on sale in a short time six new pamphlets, containing articles reprinted from the Christian Science periodicals, as follows: "Government," "Employment," "Work and Play," "Progress," "Occupation," "Relationship." Orders for these pamphlets may be sent at once, to be filled on the date of issue. Price 5 cents a Reading Room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

* * *

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUB-LISHING SOCIETY, Boston 17, U. S. A.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large Type (18-point) on Warren's heavy India Bible paper, bound in leather. Size 8 by 10% inches. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCH TRANSLATION. Alternate pages of English and French, Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, 85.50; six or more, each 85.25. Orders for the French translation in lots of six or more may include both bindings.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in The Christian Science Journal from 1883 to 1890, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. count will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Mis-A book of 366 pages, containing articles published in The Christian Science Journal and Sentinel, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good. Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

German Translation. Alternate pages of English and German.

Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges. 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 tents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages. Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY BOSTON USA

Christian Science Literature

"Science and Health with Key to the Scriptures" and all other published writings of Mary Baker Eddy are listed on the outside back cover page of this Sentinel.

The Christian Science Journal

Founded, 1883, by Mary Baker Eddy. This monthly magazine is an official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, Contains articles, editorials, and testimonies of healing, a directory of Christian Science Churches, Societies, and Reading Rooms; also in the January, April, July, and October issues a list of Christian Science Practitioners and Nurses. Subscription price, payable in advance, postpaid to all countries: One year, \$3.00; six months, \$1.75; three months, \$1.00; single copy, 35 cents.

The Christian Science Quarterly

Founded, 1890, by Mary Baker Eddy. Published January. April, July, and October. Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size. Subscription price, payable in advance, postpaid, to all countries: One year, \$1.00; single copy, 25 cents.

Christian Science Sentinel

Established, 1898, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. Subscription price, payable in advance, postpaid, to all countries: One year, \$3.00; six months, \$1.75; three months, \$1.00; single copy, 10 cents.

Der Herold der Christian Science

Authorized, 1903, by Mary Baker Eddy. A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months, 50 cents; single copy, 20 cents.

Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months 50 cents; single copy, 20 cents.

The Christian Science Monitor

An International Daily Newspaper. Founded, 1908, by Mary Baker Eddy. Daily, except Sundays. Its own world-wide news service is supplemented by the service of the Associated Press and of the United Press Association. Complete in its departments; unique in its Home Forum page. Full page of editorials dealing truthfully and fearlessly with vital questions of the day. Subscription price, payable in advance, postpaid to all countries: One year, \$9.00; six months, \$5.00; three months, \$3.00; one month, \$1.10; single copy, 5 cents.

Subscriptions will begin with the next issue after the receipt of the order. Information regarding bound volumes of the weekly and monthly periodicals will be given upon request.

Interference

FRANK BARNDOLLAR

HUMANITY has long been conscious of the fact that God is able to destroy as evidence all seeming conditions of inharmony; yet has it been prone to believe that God was afar off and oftentimes blind to its struggles and deaf to its appeal. Gradually it was believed that there was a possibility of something getting between God and the one in need of assistance, and later this something, or this false belief desiring recognition as a fact, obtained its desire and was believed to be the power of evil, a power apart from God. Now all this is contrary to the teachings of Christ Jesus. Not one bit of evidence obtained from the material senses, that seeming source of evidence apart from a spiritual source, was permitted by Jesus to go unchallenged; he proved that the material sense of sight, of hearing, or of feeling is not true; he proved blindness, deafness, and death itself to be merely false beliefs or so-called facts contrary to the true state of being.

In this particular period, however, it remained for Mary Baker Eddy to rediscover and give to humanity the rule of demonstration, that God might be seen near at hand and found to be ever present and omnipotent. It is because of these rules and true Principle as set forth in the Christian Science textbook, "Science and Health with Key to the Scriptures," that Mrs. Eddy will always be thought of with the deepest sense of love and gratitude. Conscious of the importance of the substance found in the very first chapter of the Holy Bible, where a clear concept of God as omnipotent and omnipresent is gained, Mrs. Eddy definitely informs all mankind, on the first page of the Preface to Science and Health, "Ignorance of God is no longer the stepping-stone to faith. The only guarantee of obedience is a right apprehension of Him whom to know aright is Life eternal." The following definition is an assistance in gaining this right apprehension (Science and Health, p. 587): "God. The great I AM; the all-knowing, all-seeing, allacting, all-wise, all-loving, and eternal; Principle; Mind; Soul; Spirit; Life; Truth; Love; all substance; intelligence."

Thus it becomes quite evident that there can be naught else in reality but the consciousness of joy, freedom, happiness, and harmony. The question is then asked, "What, then, is all this apparent evidence of jealousy, hate, malice, revenge, sin, sickness, disease, death, and numerous other conditions which seem to cause so much inharmony and distress, and seem to interfere so frequently with the realization of happiness?" Christian Science explains what these seeming conditions are and how they are to be disposed of. It is giving to humanity the true idea of God and His creation such as John had when he declared, "And I saw a new heaven and a new earth: for the first heaven and the first earth were passed away; and there was no more sea."

Through faith, "the evidence of things not seen," God is recognized as the only cause or creator, and through this recognition, harmony is seen to be the true state of con-

sciousness. Because harmony is the true state of consciousness, it becomes apparent that any other so-called consciousness is but an untrue belief or the acceptance as true of a so-called fact contrary to the truth. Mortal mind, or this so-called consciousness which accepts a lie and believes a lie to be true, is continually being accepted by humanity as a fact, and in the proportion that it is accepted as such is the effect either a diseased, a sinful, or a distressed manifestation of mankind. The result has been and will continue to be, under this belief, that the longer the lie is believed the more real it seems to be.

Humanity has long believed, in regard to the word interference, that there is some means or condition possible whereby progress or the right and natural course of events may be stopped or prevented from attaining their legitimate ends; or it might be otherwise stated, that the propaganda of mortal mind has been accepted as true, and God or good believed to be one of many powers rather than the one and only power. When the light of intelligence or Truth is brought to bear upon the subject it is vividly realized that inasmuch as God is the only power, there can in reality be no interference with the operation of anything that truly is. As Mrs. Eddy says on page 402 of Science and Health: "The time approaches when mortal mind will forsake its corporeal, structural, and material basis, when immortal Mind and its formations will be apprehended in Science, and material beliefs will not interfere with spiritual facts. Man is indestructible and eternal." It was continually demonstrated in Biblical times and is ever being demonstrated to-day, through prayer or correct understanding of God and His creation, regardless of what the material senses seem to testify, that in reality the only testimony is that of joy, happiness, Life, and Love.

Since man is the reflection of God, good, it follows that all manifestation of goodness, justness, charitableness, and power by man is proof positive that God is infinite and supreme. It is this eternal manifestation or advancement of the truth of man's at-one-ment with God, good, in the maintenance and sustenance of an "all-knowing, all-seeing, all-acting, all-wise, all-loving, and eternal" power, which tears off the mask of mortal mind and proves any concept of interference which would assume to prevent the complete manifestation of harmony to be but the supposititious opposite of the united cooperation of God and His idea in the maintenance of God's identity as power. It is this maintenance which appears to erring mortal sense as the destruction of sin, sickness, disease, and death, but which to spiritual or real sense is seen to be just another opportunity to manifest God's unlimited supply of justice, mercy, wisdom, and goodness. The realization of this great truth drives out the horde of imposters such as jealousy, envy, hate, revenge, intolerance, and uncharitableness, and unfolds instead charitableness, kindness, patience, and brotherly love; then the specific duty of man is realized, and, like him who was healed of the palsy, he departeth to his own house, glorifying God.

Judgment Laid to the Line

EDWARD NASH

THE writers of the Old Testament books were fond of referring to the art of building as a symbol for mental construction because it is one which could be easily understood, very simple but very permanent in its character, and one which requires accuracy of measurement and careful and correct judgment in its early stages. If the foundation is true the rest is not difficult. In Isaiah we read: "Therefore thus saith the Lord God, Behold, I lay in Zion for a foundation a stone, a tried stone, a precious corner stone, a sure foundation. . . . Judgment also will I lay to the line, and righteousness to the plummet." The method of building is exactly the same to-day as it was when Isaiah wrote. The corner stone, after being carefully squared, is well and truly laid, often with ceremony, and from this stone horizontal and vertical lines are stretched to which all other stones are adjusted. In metaphysical building of spiritual concepts the method is exactly similar. The builder begins with the true concept of man as the reflection or expression of God, the perfect man, the Christ. Jesus said, "Judge not according to the appearance, but judge righteous judgment." With this corner stone the mental builder can lay out his lines; and, as long as his judgment and his righteousness or right thinking are laid to these lines, his building is sure to be upright and true.

To-day, when the world seems to be convulsed with discord; when selfishness, intemperance, and injustice seem to abound; when human will power seeks to dominate and control, the student of Christian Science is glad to be able to turn to his Bible and to the loving words of Mrs. Eddy, whose gentle admonitions help him to stem the tide of division and unrest. On page 206 of "Science and Health with Key to the Scriptures" Mrs. Eddy writes, "The power of the human will should be exercised only in subordination to Truth; else it will misguide the judgment and free the lower propensities," and in the following paragraph she declares emphatically: "Will-power is capable of all evil." Now the Christian Scientist is called upon daily to exercise judgment, and in that way he is building. His building will be good and stable just so far as he takes direction and measurement from the "precious corner stone," lays his judgment "to the line," and his right thinking "to the plummet."

What Jesus taught above all things was reliance on Principle in every kind of difficulty. He did not pretend to exercise any power of his own. All his mighty works were ascribed to the Father, and he taught his disciples to do the same works in the same way. He disregarded material personality in which others saw sin and disease, and saw in place of the error which had to be destroyed, the true, spiritual idea. He disregarded all material laws and recognized nothing but the unceasing law of spiritual activity, Life, and the eternal law of sustenance and protection, Love. He proved the false law of limitation to be nothing to him when he fed the five thousand, and the universally accepted law of gravity to be nothing to him when he walked on the water. But he subjected himself to law and taught his followers obedience. If now we follow the Master and consider each problem in the way that he would have considered it we shall start with a sure foundation; then, recognizing that all intelligent action is the outcome of one Mind, God, we cannot fail in the exercise of judgment.

Putting aside all sense of personality and laying his right thinking to the plummet, the student of Christian

Science proves right judgment, that can be accepted joy-fully. In Mind the judgment is already made. All that the Christian Scientist has to do is to see the demonstration of divine justice by repudiating any other possible result, just as he does in dealing with apparent sickness. The judgment is not, then, the judgment of man but the judgment of God, and it is the only correct judgment there can be. The Christian Scientist then fulfills the admonition which Moses gave to the Israelites, "Ye shall not be afraid of the face of man; for the judgment is God's."

The idiosyncracies of mortal mind put a false picture of human conditions in the eyes of men. What they seem to see is a picture of tangled curves and zigzag lines crossing one another in inextricable confusion, whereas the true picture is one and infinite, representing the unswerving, unalterable power of divine Mind which no other supposed force can divert or distort, the representation of perfect, harmonious existence. What does that desirable attitude described as "keeping a level head" mean unless it means laying judgment to the line?

In a short article in "The First Church of Christ, Scientist, and Miscellany" entitled, "How Strife may be Stilled," Mrs. Eddy writes (p. 278), "Whatever brings into human thought or action an element opposed to Love, is never requisite, never a necessity, and is not sanctioned by the law of God, the law of Love." A human judgment of condemnation is always opposed to the law of Love, and a human judgment of approval is often just as harmful in that it introduces human personality and seldom escapes an implication of disapproval of the conduct of another. Only when there is a direct recognition of spiritual law can approval be rightly and safely bestowed.

When Peter recognized in the Christ the perfect expression of divine Love, the Master commended him in the words, "Flesh and blood hath not revealed it unto thee, but my Father which is in heaven." Commenting upon this passage Mrs. Eddy writes (Science and Health, p. 137): "Before this the impetuous disciple had been called only by his common names, Simon Bar-jona, or son of Jona; but now the Master gave him a spiritual name in these words: 'And I say also unto thee, That thou art Peter; and upon this rock [the meaning of the Greek word petros, or stone I will build my church; and the gates of hell [hades, the underworld, or the grave] shall not prevail against it.' In other words, Jesus proposed founding his society, not on the personal Peter as a mortal, but on the God-power which lay behind Peter's confession of the true Messiah." Thus the Master taught that the first step in judgment must always be the recognition of the Christ, the corner stone from which the building rises, square and erect, incapable of being overthrown by malice, pride of place, desire for domination, jealousy, or by any other error of mortal mind.

Demonstration

EDITH BOWERS

WHEN the Christian Scientist speaks of demonstration, just what does he mean? This is a very natural question, and if put with an earnest and sincere desire to know the truth, it is entitled to an answer. A dictionary defines the word demonstration thus: "Proof, or such evidence of facts and arguments as precludes denial or reasonable doubt," and this is exactly what it means in the practice of Christian Science. Demonstration, then, means the application of the rule to some life problem and the finding of the right solution, giving positive proof of its efficacy. Applying

the rule has absolutely nothing whatever to do with will power. It is most decidedly not outlining a certain result and then concentrating one's thought in the effort to bring this desired result to pass. This would be using the so-called power of human mind, and such a method is entirely foreign and antagonistic to Christian Science.

In reality every demonstration is an overcoming of some belief in a mortal selfhood, and not a looking for something specific to come to pass. Demonstrating the presence of health, for instance, is not the healing of a material body, but is the overcoming of all belief in materiality and the scientific understanding of what constitutes both man and health. Since God, divine Mind, is the only creator, the logical reasoning is that the only true man there is was created by Him. Health is an attribute of Mind, and the suppositional opposite calling itself ill health does not exist in Mind or man. Therefore the demonstration of health is not the effort to rid one's self of the beliefs of pain or disease and a looking for their disappearance, but is the lifting of thought to the contemplation of what God is and of man made in His image and likeness. Thus dawns the realization that health is man's inherent right, and spontaneously the dream of ill health, pain, or disease vanishes. This is demonstration. Such reasonable evidence or proof has been given as to preclude any denial or reasonable doubt. The looker-on who does not understand Christian Science wonders how the change has come about. How have the discordant conditions so miraculously disappeared? Of course what has happened is that a belief of mortal selfhood has been overcome and replaced by the understanding of what constitutes real selfhood.

So it is with every demonstration. It seems so much easier to look outside of self for cause of the discords which seemingly beset us than honestly to examine what present themselves as our own thoughts and to acknowledge that right there is the responsibility for every wrong condition. Nevertheless, this is what every individual must sooner or later in humility and honesty be willing to concede. This is what John saw so clearly when he wrote, "To him that overcometh will I grant to sit with me in my throne." Overcoming is the keynote of every demonstration. Every selfish or sensual desire overcome leaves one with a clearer vision to discern the spiritual reality of good, manifesting itself as health, abundance, ability, intelligence, or any other quality of Mind. The student of Christian Science should manifest here and now every good and perfect gift, but this manifestation is the inevitable consequence of right thinking and not because he has outlined some particular good which he considers should come his way. We are reminded again of Jesus' instructions, "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you."

On page 313 of "Science and Health with Key to the Scriptures" Mrs. Eddy says: "Jesus of Nazareth was the most scientific man that ever trod the globe. He plunged beneath the material surface of things, and found the spiritual cause." Before starting on his three years' ministry of healing and teaching, the Master went for forty days into the wilderness, where he spent his time in prayer and fasting. There he was tempted in every way just as we are. Appetite, possession, power, all these were presented to him by Satan, alias mortal mind, as desirable gifts within his reach. With his unparalleled understanding of Mind, it would have been easy for him to become a leader of men, to have great influence which he could turn to his own advantage, to become, in short, a ruler of this world. The lie might even insinuate

that with his high ideals he would make a very much better ruler than Herod, for instance, or Cæsar. The wolf in sheep's clothing is an old story, and the lie always seeks to cover its falsity by presenting its argument in alluring terms. More especially must it be sugar-coated when it would seek to turn aside one who stands for righteousness. Jesus grappled with and overcame every suggestion of evil and came out of the experience so purified, so uplifted, and imbued with spiritual strength and vision that he was ready for the great work which was before him. The result of his communion with divine Mind and his rejection of the lie which would have tempted him from the high goal whereunto he was called, was seen in his subsequent ability to heal all manner of diseases, to raise the dead, walk on the water, and to prove supply wherever it was needed. He had so clearly seen the unreality of evil and the allness of Spirit, Mind, that the suggestion of a sick or sinful mortal was instantly replaced by the consciousness of man as idea; the claim of death with the understanding that Life is; a belief of lack by knowing the abundance and availability of spiritual supply. His demonstrations or miracles, marvels, as they are spoken of, were simply the natural sequence of his clear thinking, and Jesus was our example and inspiration to go and do likewise. He gave us his promise that we should do even greater works, but in order to do so, we, too, must be willing to overcome the belief of a mortal selfhood with its suggestions and temptations.

Let us not blame Christian Science if we fail to demonstrate our right to dominion. The rule is infallible, and if we are not proving that this is so, it is time to make a rigid examination of our thoughts and desires. Are we striving for those things which are eternal or are we after all just dallying with Christian Science? Like the rich young man of Jesus' time, are we seeing materiality and material possessions as substantial? When one is alert, love of ease in the flesh, love of luxury and the vanities that material wealth can buy cannot really obscure the vision, so that the things which are really worth while seem vague and intangible. It is well to remember that with love of ease in the flesh comes the fear of disease, with love of luxury the fear of losing the means with which to purchase it, and that the end of all these vanities is death. Mrs. Eddy writes in Science and Health (p. 368), "Deny the existence of matter, and you can destroy the belief in material conditions." This statement clinches the whole argument. The destroying, or overcoming, of material conditions and the replacement by the spiritual reality is all there is to any demonstration.

Mind Your Own Business

GEORGE F. TIMPSON

What one's own business is was expressed by Jesus in his reply to the inquiring scribe: "The first of all the commandments is, Hear, O Israel; The Lord our God is one Lord: and thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind, and with all thy strength: this is the first commandment. And the second is like, namely this, Thou shalt love thy neighbour as thyself." Now clearly, if a man is devoting his whole thought, energy, and desire to loving Principle, he has no time left for interfering with his neighbor; he will love that neighbor best by doing his own work thoroughly and leaving his neighbor to do his. From one end to the other the New Testament is filled with warnings against minding other people's business, and Paul distinctly admonishes: "Work out your own salvation with fear and trembling. For it is

God which worketh in you." Such teaching is, however, singularly unpalatable to mortal mind. That curious supposition sways between a blind terror of doing its own thinking and a passionate desire to do other people's; and its fury beats fiercely on any one who challenges its cowardice or its despotism, so that autocracy in all its forms has ever found mankind an easy prey. Nevertheless, the only way out of the mesmerism of evil is to seek the straight and narrow road of individual understanding and demonstration, to establish one's faith, or proof of things not seen, and to test it by one's works.

If the student of Christian Science striving to achieve this finds his progress slow, he will probably find that he is giving way either to the temptation not to think or to the allurement of managing others' thinking. The writer, being a schoolmaster, has found himself peculiarly open to the latter line of suggestion, and wishes therefore to expose some of its methods. One of the commonest devices used in war is that of diverting the enemy's attention and inducing him to scatter his fire, if possible in such a way that it is expended only where it is ineffective. All kinds of means are used to persuade the enemy that the right marks are in the wrong places, and the main attack is then developed without difficulty. Now the writer has found this stratagem being continually employed by mortal mind, so that he was induced to give much time, thought, and care to explaining Science to those who were not ready to accept it. The work always seemed so necessary and so unselfish; but in fact, it was a very subtle form of self-aggrandizement. Regarding this Mrs. Eddy has written in "Science and Health with Key to the Scriptures" (p. 457): "Christian Science is not an exception to the general rule, that there is no excellence without labor in a direct line. One cannot scatter his fire, and at the same time hit the mark." Nevertheless, the temptation to scatter one's fire is sometimes intense, partly because so much dust is thus created, giving a pleasant sensation of achievement, and partly because mortal mind hates the discipline of steady endeavor.

The very next words of our Leader, on the page just quoted, illustrate another device of the supposititious serpent: "To pursue other vocations and advance rapidly in the demonstration of this Science, is not possible." One cannot, of course, sever one's connection with the world because one has bought a copy of Science and Health, and so the effort of evil is to engage one as deeply as possible in material work. It is the old, old ruse of William the Conqueror at Hastings, the mock attack and mock retreat, inducing the garrison to rush from their post in the flush of a fictitious victory. Within a short time of emerging from severe sickness the writer found himself involved in four branches of active work outside his vocation, all excellent in their way, and all demanding unselfish and therefore laudable effort. Now the lesson is being gradually learned that the first work required is the spiritualization of one's own thought. As this has been sought, and less importance attached to outward results, a very great clearance has taken place. Several of the outside pieces of work taken on have been transferred quite naturally to others, while for the one which seems his natural duty, helpers have been found. greater, perhaps, has been the clearance in the vocational work. As more and more attention has been given to pure Christian Science, it has been found that practically no trouble is experienced in discipline, the vigor of Truth supplying absorbing interest to the class. The way is thus being steadily cleared for the abandonment of other work, and the more rapid demonstration of Science; and one actually gives far more love to one's neighbor than before. The whole effort of mortal mind is directed at complicating a perfectly simple problem.

"When thou doest alms, let not thy left hand know what thy right hand doeth: that thine alms may be in secret: and thy Father which seeth in secret himself shall reward thee openly," said our Master. Wherever he is, however engaged, a student of Christian Science can be giving alms, pouring into the lives round him those "treasures in heaven" which our Leader has taught us how to "Beloved Christian Scientists, keep your minds so filled with Truth and Love, that sin, disease, and death cannot enter them," Mrs. Eddy admonishes us in "The First Church of Christ, Scientist, and Miscellany" (p. 210). and in the same paragraph she continues: "Good thoughts are an impervious armor; clad therewith you are completely shielded from the attacks of error of every sort. And not only yourselves are safe, but all whom your thoughts rest upon are thereby benefited." It is by giving all our thought to this that we can mind our own business; for our business is to do the will of our Father in heaven.

True Home Companionship

SARAH M. JAMES

EACH Christian Science church, although a branch of The Mother Church, is in itself individual and complete, and should be the church home of its members. It should demonstrate and manifest those qualities pervading every home governed by Principle, and set forth in "Science and Health with Key to the Scriptures" by Mrs. Eddy, in the words (p. 58), "Home is the dearest spot on earth, and it should be the centre, though not the boundary, of the affections," because as Paul, ever conclusive in statement and argument, reminds us, there is "one God and Father of all, who is above all, and through all, and in you all." Home is defined as "one's birthplace; the house in which one lives: the abiding place of the affections; a place of refuge and rest." Therefore man being spiritual and cognizant of his true selfhood as a child of God, realizes that the only real home or abiding place is in God, who fills all space. Throughout his earthly career Jesus proved that his Father's house, wherein "all things work together for good," is truly itself established, thus showing to all how they, too, might take part in the home-coming which he himself continuously realized in ever turning to Principle, and which is for each individual at all times and in all places. The view from this abiding place of Spirit is holy and unlimited, the vision gained is eternal, and the true spiritual idea is in the place prepared, where are many mansions. So a man is at home whenever he is engaged in activity derived from Spirit. through helping to establish on earth the brotherhood of man, by bringing to the understanding the facts of being the relationship of God and man, which is the only true relationship or affiliation or association there is, experienced through the unfolding of Truth.

In ancient times cities had as centers of activity forums, big open spaces where the people met, as it were, on common ground, for worship, business, or amusement, because about these out-of-door places were built temples, judicial buildings, and mercantile markets. At Athens, Corinth. Sparta, and Pompeii there were noted forums, the most celebrated being one located at Rome, where there were not less than nineteen. The fame of this, the forum Romanurum, has come down through history, recorded in one temple after another of architectural magnificence, in beauty of

embellishment, in colonnades and triumphal arches. There amidst these surroundings all important political questions were dealt with, great orations delivered, enlightening the people assembled for the solving of manifold problems, or again gathered with joy and happiness in friendly converse. To-day the world has its forums, the cities and towns, but its great forum is Christian Science, where through the triumphal arch of Truth all nations and peoples can meet and all problems be solved through the enlightenment which comes with the understanding of infinite Love. For the harmony and happiness of this the world's great forum are in its joyous activities, the chiefest of which is the building of the temple, that temple whose foundation is God, whose corner stone is Christ.

Jesus taught his disciples how to be at home and how to take part in the building of this temple, by sending them into all the world to preach the gospel, with the assurance that where two or three were understandingly gathered together in his name the Christ was present with them. Through years of earnest, consecrated devotion, Mrs. Eddy, too, followed the commandments, perpetuating and making possible under cover of the three periodicals, this gathering together of the disciples of Christian Science and their going into all the world to preach the gospel of Jesus the Christ, showing forth the brightness of the Father's glory. There is the Christ always in the midst of them, giving to them which do "hunger and thirst after righteousness," healing all who have eyes to see, ears to hear, and hearts to understand, thus enabling them to say, in the words of Mrs. Eddy's hymn (Poems, p. 12):-

And o'er earth's troubled, angry sea
I see Christ walk,
And come to me, and tenderly,
Divinely talk.

Proving Right Place

FRANCES D. WEBB

THE human or mortal mind is very apt to desire a change of surroundings when unpleasant conditions exist, conditions which call for patience and forbearance, either in the home or in business affairs. It may be that there is some one seemingly hard to get along with, or there may be dissatisfaction with the work to be done or with a thousand and one things in daily experience, which is the thorn. We very often hear it said that a new home or a different position or a certain thing which seems good is in the process of demonstration; that it is right to have such and such a thing; that, as a Christian Scientist one is entitled to this, or that, as the case may be. When outlining this place or that condition to be obtained, one is expressing just another phase of the carnal mind, which Paul tells us is enmity against God. When one is tempted to seek change from present surroundings, it would be well to stop and consider what is back of the desire. If it is belief in an adverse condition, or if there is a human sense of running away from one's surroundings, one may as well stop where he is and face the lion in the path. A position or condition is not changed except as thought is changed, no matter how often the change takes place in human experience. The fact is, man already has all; the only place or position there is or could possibly be, is already attained, and man, the idea of Mind, is sustained in consciousness, the dwelling place of all true creation. In God "we live, and move, and have our being," the Scriptures remind us.

Consciousness of good is all the true consciousness there

is, either in the home or in business, and where the error called unpleasant surroundings is claiming reality, right there the kingdom of God is, right there the true idea reigns, right there, then, it is man's privilege to prove that home or position is in consciousness and is harmoniously sustained by the one and only Mind. Unless the things left behind are seen in this light, one cannot hope to find the true sense of home or position expressed in the so-called change. In the very place where one finds himself to be, right there is the consciousness of all that there is. Mrs. Eddy says in "Science and Health with Key to the Scriptures" (p. 66), "Each successive stage of experience unfolds new views of divine goodness and love." She also says on page 454, "Love inspires, illumines, designates, and leads the way." When this is realized, change will not be sought because of problems to be solved, and which may prove to be angels entertained, but the adverse conditions will be seen for what they are and be overcome by the truth. We have no greater illustration of proving place than that furnished by Jesus when the news of Lazarus' death was brought to him. We read in the eleventh chapter of John that "he abode two days still in the same place where he was." That the place of abode to him was divine consciousness we have ample proof by what took place when he stood before the tomb and loosed Lazarus from the graveclothes of materiality. Progress is the law of Mind, and one who is expressing this Mind in his daily living need have no fear that he is standing still, for he can trust God to bring into his life that which is most needful for his progress. On page 266 of Science and Health Mrs. Eddy says, "When this hour of development comes, even if you cling to a sense of personal joys, spiritual Love will force you to accept what best promotes your growth."

When one has ceased planning which is futile, and when the sense testimony has been silenced, then and only then is he ready to leave all to Mind to be unfolded. Awakened thought unfolds in the light of Mind even as a rose unfolds in the spring rains and sunshine. So often in our Wednesday evening meetings we hear it said that man's extremity has been God's opportunity to prove the ever presence of Mind's care and loving-kindness, and to prove that the true kingdom, of which there is no end, is established.

[Written for the Sentinel]

Ever Presence

FLORA F. GOOCH

Understanding!
Dominion is your gift to man.
Then are you not synonymous
With God and His great plan?

Understanding!
The light of the world are you,
Ever present intelligence
That maketh all things new.

Understanding! Visions unfold each day, Ever revealing omnipotence To those that seek Truth's way.

Understanding! The Giver of all might; Your prophesied omniscience Forestalls chaos and night.

Understanding!
Blest Savior of mankind!
You are here throughout eternity,
Most wonderful, infinite Mind!

Matter

For twenty-three centuries the thinkers of the world have disputed as to the substance and origin of matter. From the days of Plato and Aristotle downward two great schools have contended, the one that matter was the subjective condition of mind, the expression of force or energy, and the other that it was the only substance existing. In late months the dispute has flared up again between the philosophers and the physicists. The philosophers declare that the Einstein theory confirms the whole claim of philosophic idealism throughout the centuries. The physicists on the other hand, insist that it does nothing of the sort, and that the argument of the school, which has been known in turn as realist and materialist, remains unshaken. To the Christian Scientist the whole dispute is very much on a par with the wrangle over the ass' shadow, and in that estimate he enjoys something very closely approaching the support of no less a man than Thomas Huxley. The denial of the reality of matter means in Christian Science something fundamentally different from anything it has ever meant to the philosophers. It may almost be said to begin where philosophic idealism leaves off. To Berkeley, for instance, matter was the subjective condition of mind, and, as such, a mere phenomenon produced by the mental noumenon.

Christian Science accepts Berkeley's theory so far as it goes. Matter, it says, is the subjective condition of mortal mind. But it goes on to dispose of this mortal mind much more thoroughly than Bishop Berkeley ever disposed of matter. "As named in Christian Science," Mrs. Eddy writes, on page 103 of Science and Health, "animal magnetism or hypnotism is the specific term for error, or mortal mind," and she goes on, a little later in the same paragraph, "This belief has not one quality of Truth." other words, this mortal mind, which gives rise to matter, is itself a mere counterfeit of the divine Mind, and as such as unreal as the matter it produces. This was put perfectly clearly by Jesus to the Jews, when he declared: "Ye are of your father the devil, and the lusts of your father ye will do. He was a murderer from the beginning, and abode not in the truth, because there is no truth in him." In unmetaphorical language, Christ Jesus was simply telling his opponents that matter was a lie which had never had any real existence, and that the father of that lie, the devil or evil, was equally a myth, inasmuch as he had never existed in truth, never had any real existence.

The struggle, then, of the Christian Scientist is to realize the unreality of matter, essentially to recognize the nothingness of its pleasures, for in the pleasures of matter, necessarily rather than in its pains, exists its attraction. But this attraction is purely mental, it is a condition of hypnotism which must be broken. The effort to deny the attraction of the senses to the pleasure of matter, without seeing that it depends for its existence on a mental falsity, has invariably led to the very worst description of materiality, and that is asceticism. The ascetic is so convinced of the reality of matter and the danger of this evil that he sets to work to control evil by evil, in other words to restrain materiality through its own cause, mortal mind. And mortal mind being, as Mrs. Eddy points out, in the passage already quoted from, "animal magnetism or hypnotism," the ascetic becomes the victim of a process of autosuggestion based on a belief in the reality of evil.

Now the truth of the whole matter is that the human body, with all its sensations, being nothing at all but the subjective condition of mortal mind, is just as unreal as the mind manifesting it. Mrs. Eddy makes this perfectly clear on page 416 of Science and Health, where she writes, "The material body, which you call me, is mortal mind, and this mind is material in sensation, even as the body, which has originated from this material sense and been developed according to it, is material." Therefore, in order to overcome a belief in material sensation and in physical pleasure, what is necessary is to see that they are purely mental and equally purely mesmeric. When this is done, the power of autosuggestion collapses. The student of Christian Science is found realizing the absolute truth, and so coming back once more to that saying of Christ Jesus, with its innumerable facets, "If ye continue in my word, then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free." It is always by knowing the truth that the omnipotence of Truth is demonstrated by the seeker.

These are the deep things of God, of Principle, which Paul says can only be spiritually discerned. This spiritual discernment comes in the exact degree in which the belief in the reality of matter and its pleasures is surrendered. When the effort is made to surrender it through fear or mere effort of will, the danger of matter is increased rather than diminished. For fear and will power are themselves ignorance of Truth, and so are formed from materiality. The knowledge of the truth, which Christ Jesus so insisted upon as a preliminary to demonstration, is a metaphysical knowledge of Principle, and is consequently a necessity of demonstration. Good intentions plus ignorance are a very dangerous basis of demonstration. Hell, says the proverb, is paved with them. "Ignorance of God," Mrs. Eddy writes, on page vii of the Preface to Science and Health, "is no longer the stepping-stone to faith. The only guarantee of obedience is a right apprehension of Him whom to know aright is Life eternal." A knowledge of the truth combined with the practice of the truth is an absolute necessity of any demonstration. The letter and the spirit must be combined before it is possible to assimilate and express that knowledge of the Christ which is Life eternal. The man who has begun to perceive, however faintly, that Life is eternal, must have gained a perception of the fact that pleasure is spiritual. Human pleasures contain in themselves the germs of discord. There is not one of them which can be indulged in with complete safety. This does not mean that a man is to give up eating and drinking because the one can develop into gluttony and the other into drunkenness. It does not mean that he is to give up clothes, because indulgence in them may lead to vanity. It does not mean that without any understanding of what he is doing he is to break away, in a moment, from all those pleasures which the world terms innocent. What it does mean is that he has got to begin to recognize that, as Mrs. Eddy says, "The material body, which you call me, is mortal mind," and that this mortal mind, as she

be

further explains, is animal magnetism or hypnotism. Therefore, if he desires to attain eternal Life, he must begin at once to protect himself against this hypnotism which assures him that there is pleasure in matter, and that matter is a reality. In the exact ratio of his success in doing this, will be his realization of the fact that there is no pleasure in any material thing. How slow or how rapid the process of mastering the truth may be will depend entirely on his own earnestness. If he takes holidays in error, if he regards his success as a thing to be attained in the distant future, his progress will be the progress which is always the result of half-hearted endeavor. The real way to success was laid down by the apostle Paul, in one of those metaphors he was so fond of drawing from the games of Greece: "Every man that striveth for the mastery is temperate in all things. Now they do it to obtain a corruptible crown; but we an incorruptible. I therefore so run, not as uncertainly; so fight I, not as one that beateth the air: but I keep under my body, and bring it into subjection: lest that by any means, when I have preached to others, I myself should be a castaway." FREDERICK DIXON.

Seven Days

In spite of the multiplication of interests and activities in the modern world, humanity is constantly seeking for novelty, never satisfied with the most exuberant forms of materiality. Hideous formlessness in art and literature, for instance, is but an evidence of this desire for escape from mortal conventions, without, however, any comprehension by those who revel in the grotesque of where the escape is to be found, in Spirit, Mind, not in earthly concepts. Savagery itself may seem attractive to those mortals who have become cloyed with what they have mistakenly conceived of as civilization, society, and culture. When Boswell remarked that "Lord Monboddo still maintains the superiority of the savage life," Dr. Johnson exclaimed, "What strange narrowness of mind now is that, to think the things we have not known are better than the things which we have known." Twentieth century restlessness, seeking "things we have not known" in such supposedly wild regions as the South Sea Islands, must find in the end that no mere things or human conditions, whether primitive or elaborate, can satisfy.

Of course the true civilization, society, and culture must be found in infinite Mind, where limitless spiritual action unfolds as genuine satisfaction and progress. When a man sees the unreality of material aims and accomplishments, he is ready to accept the actuality of Spirit and its substantial, though altogether spiritual, manifestation. Speaking of the compassing of Jericho by Joshua and his associates, Mrs. Eddy says on page 279 of "Miscellaneous Writings," "They went seven times around these walls, the seven times corresponding to the seven days of creation: the six days are to find out the nothingness of matter; the seventh is the day of rest, when it is found that evil is naught and good is all."

Now the spiritual fact is that there is, always has been, and always will be, in reality, only one infinite Mind conscious of its infinite spiritual manifestation, which is the idea suppositionally counterfeited by the human sense of things. The accounts of creation in Genesis are just human ways of stating this fact; for the first, or true, account shows in human language something of the unfoldment of infinite Mind that is ever going on, whereas the second, or false, account typifies the suppositional counterfeit, which never has been real. In one sense, what the divine Mind

knows and maintains is ever new, fresh, and spiritually animated; and yet, in another sense, there is nothing novel to God, divine Principle. As Mrs. Eddy points out on page 518 of Science and Health, explaining the end of the sixth day as depicted in the first chapter of Genesis, "The divine Principle, or Spirit, comprehends and expresses all, and all must therefore be as perfect as the divine Principle is perfect. Nothing is new to Spirit. Nothing can be novel to eternal Mind, the author of all things, who from all eternity knoweth His own ideas."

The seventh day, or continuous day of rest in right action that the one Mind is conscious of, is proved omnipresent and eternal in the experience of man in proportion as one recognizes and accepts it. Though one may seem to go through the six days of material illusion, in order to be so surfeited with nothingness as to demand the tangibility of Spirit, the Sabbath of harmony, vigor, and joy is all the while the reality known by the only Mind there is to know anything. The true art, for instance, the spiritual expression of Mind, is infinitely varied with the order of genuine beauty and delight, even while suppositional mortal mind conjures up eccentricities and distortions to play with for the moment. Absolute joy, not human emotionalism, is the experience of immortal man, which a mortal can find only in proportion as he drops his mortality. The process is simply that the mortal, in becoming dissatisfied with mortal mind and its beliefs in matter, turns away from all this illusion and gives way to the allness of immortal Mind manifest as spiritual idea. This is the realization of the true Sabbath, in which the incompleteness and unsatisfactoriness of the six days "to find out the nothingness of matter" are lost, swallowed up in the one true seventh day, as the supposition of mortality is "swallowed up of life."

On page 520 of Science and Health Mrs. Eddy explains this when she says: "The absolute ideal, man, is no more seen nor comprehended by mortals, than is his infinite Principle, Love. Principle and its idea, man, are coexistent and eternal. The numerals of infinity, called seven days. can never be reckoned according to the calendar of time. These days will appear as mortality disappears, and they will reveal eternity, newness of Life, in which all sense of error forever disappears and thought accepts the divine infinite calculus." Here, then, is what all the world is looking for. The escape from the limitations of material conventions and the dreariness of matter generally is through the understanding and demonstration of Life's infinity as Spirit, Mind, Principle. To know that real living, with boundless variety of conscious experience, is in Mind, not in matter, is to enjoy a constantly active rest in the very midst of the circumstances of to-day. This rest is found not through any mere flight to mountains or seashore, desert or land of barbarism, but through the overcoming of false conditions wherever one may be, with the realization of Truth's omnipresence.

Both the six days, "to find out the nothingness of matter," and the seventh "day of rest" are necessary; but in the last analysis they must coincide, for there is, in fact, but one continuous day of good in accord with "the divine infinite calculus." In art and living, all must sooner or later through Christian Science demonstrate the oneness of good of which it would be impossible to have either too little or too much. The completeness of spiritual good is all that can ever fulfill human yearning. That it does fully satisfy, increasing multitudes are proving everywhere through the consecrated practice of Christian Science.

GUSTAVUS S. PAINE.

Testimonies of Healing

When my little boy was still a baby I noticed that he was not thriving. He had bowel trouble which was persistent, so I called in the local doctor, who said the child was really very ill, suffering from colitis and chronic diarrhea. I followed the doctor's instructions carefully but the child grew steadily worse, and after six weeks' treatment was too weak to stand. We then put him in a children's hospital, but after a week were asked to take him away, as he was fretting and was worse than when he went in. From that time on for about two years he was under the care of one doctor or another, specialists and others, but without deriving any benefit. "The child study" people were keenly interested in him. He was so emaciated that they asked for his photograph to show what he was before their treatment began.

His illness continued, however, until at last it reached the final stage, according to the doctor who was then attending him; dropsy set in and he was swollen to a great size and was unable to walk. The doctor proposed tapping him to give temporary relief, but a friend who had derived great benefit from Christian Science advised us to try Christian Science treatment; so my mother sought out a practitioner, who promised to help him. The very next day, to my surprise, the child got off his couch and walked, and from that time the dropsy passed away and he commenced to get better. Since his healing he has not had one drop of medicine or any medical treatment, and he is now a fine, hardy, sturdy boy who will compare favorably with other boys of his age, and will shortly be going to school. We have received many other blessings through Christian Science, for which we are very grateful.—(Mrs.) AMY LOWN, Coogee, Sydney, New South Wales, Australia.

How fruitless it is for one to continue seeking greater riches in heaven and fail to share with others his present blessings. The Christian Science periodicals are channels which Mrs. Eddy has provided, through which each one may testify to his healing, and while enjoying the testimonies and articles of others it occurred to me what a selfish plan I had pursued in not adding mine. We have enjoyed Christian Science in the home for nearly twenty years. I was fortunate in having an early start in the Christian Science Sunday school, although for some time I was the only boy of my age attending and I tried in every way to get out of going, but thanks to my good mother I had to go regularly. As I grew older I gradually became more interested, and began sincere study before reaching the age limit. Perhaps much is accepted without the same appreciation felt by one learning of Christian Science in later years and after many hardships.

The opportunity to prove the healing power of Christian Science came while I was in the service. On account of a scarlet fever epidemic at a recruit camp we were lined up daily for medical inspection. I was the first in our company to show symptoms of the fever, and soon found myself in the isolation hospital for thirty days' confinement. Fortunately, I had both the Bible and "Science and Health with Key to the Scriptures" by Mrs. Eddy, and was able to read daily. The fever soon left and although at first quite weak I gradually regained strength. My ward sergeant said half jokingly, upon my leaving for the convalescent ward, that he wished all his patients were Christian Scientists. There was not any medicine prescribed for me at any time, and the sergeant's daily routine was that much lighter. Through

the understanding of a Christian Science practitioner who was called after my transfer as a convalescent, there were absolutely no after effects from this experience, and I later passed a very rigid physical examination for pilot in the air service. While flying, whether apparently lost in a low, dense fog and barely avoiding grain elevators, silos, farmhouses, and what not, or whether over strange hilly country at dusk seeking a landing spot,—no matter what the circumstance, I was confident of God's support and guidance and always had cause for gratitude.

It was near the end of a two weeks' zigzag voyage overseas, while I was congratulating myself on freedom from seasickness and was wandering from the straight and narrow path of watchfulness, that a sickness which I long afterwards learned was influenza seemed to overcome me; but again, as always, healing came through the understanding of the truth of being as taught in Christian Science. And when we received the rumors of pestilence in the States, how reassuring it was to realize that no disease could possibly prevent the home fires burning, and that this was but another opportunity to witness the absolute healing power revealed by Mary Baker Eddy, who on page 210 of "The First Church of Christ, Scientist, and Miscellany" says: "Good thoughts are an impervious armor; clad therewith you are completely shielded from the attacks of error of every sort. And not only yourselves are safe, but all whom your thoughts rest upon are thereby benefited."

HOWARD COMPTON, Palo Alto, California.

I want to express my thankfulness to God and my gratitude to Mary Baker Eddy for Christian Science and for all the spiritual help it has been to me and to mine these past six years. I was cured six years ago of a nervous trouble which followed the passing away of one of my sons. For just a year and a half I was a complete wreck and suffered from an irritation all over my body during that length of time. Doctors told me it was all due to the nerves. At last I gave up in despair and would not try anything more. I believed a little in Christian Science, but not much. I had been interested in mental science, but that did not help me. Finally, one day a friend came to see me and found me packing my trunk. I was living alone then, in a hotel. She asked where I was going. I said, "I really don't know, but when I get there I will write you." She laughed at this, which did not please me. At a second glance she saw that I did not seem to be quite myself and prevailed upon me then and there to go with her to see a practitioner. I told her I had no faith at all in Christian Science. I knew she had none, but she said, "Come, to please me, as a last resort." So I went with her.

The practitioner asked me if I would read "Science and Health with Key to the Scriptures" by Mrs. Eddy, and I said I would read it to please her but I did not care for it at all. Besides I did not want to get well; I wanted to go to the son whom I had lost. She said but little and then asked if I wanted treatment, and I said, "I suppose so. I came to please a friend, but that was all I came for." She smiled, gave me a book of Mrs. Eddy's to read and sat beside me for twenty minutes. On my way home I felt a spiritual uplift such as I had never felt before. That night I ate some dinner and slept soundly without any medicine. I looked at the bottle and thought, "I believe I will try to be master of this drug," and I was. Next day the rash was almost entirely gone from my face. The third day it was all gone from my face and body. I took no more medicine after that and was entirely healed in six

1

1 2

1.618

treatments. My family and friends said it was a miracle, and it certainly was. I have been a regular attendant of the Christian Science church since that time and have found this teaching to be the truth. I only hope this may help others as I have been helped.

(Mrs.) JENNIE W. CLARK, New York, New York.

4

The definition of "testimony" is given in Nuttall's dictionary as "a solemn declaration made for the purpose of proving some fact." It is in all sincerity and earnestness that I testify to the ability to prove in a degree that a knowledge of the truth does make for freedom, a fact stated by Jesus some nineteen hundred years ago. This statement I studied for many years without having the faintest conception of the nature of Truth, and now Christian Science has proved to me that the truth has been discovered and that this discovery has made freedom available for all who long to know God. Until the outbreak of the war in 1914 I found the teaching of the Church of England quite satisfactory, and then suddenly, when it was put to the test, I became conscious that my whole faith in that teaching and, in fact, in Deity itself depended on the proving of the fact that God does answer prayer. My two brothers joined the army within a few hours after the declaration of war and went almost at once to Belgium. Day and night I prayed that they might come back safely, but early in 1915 both were killed in action. One of the boys had been my constant companion, and when my prayers all proved fruitless it was as if the light of day had been blotted out and not only had I lost my best friend but I had also lost sight of God, for the conception I had depended on for so long had vanished, and I was left hopeless and drifting in a maze of doubts.

For two years I searched for God. I hunted for definite proof of His existence in the teachings and creeds of many denominations and sects, and among these was Christian Science. During those two years I suffered intensely from depression which was partly hereditary, though greatly aggravated by my trouble, and which eventually developed into a form of melancholia that would descend upon me like a cloud of helpless hopelessness and envelop me in darkness for weeks at a time. No doctor could help me. Life was a burden or a misery. I felt that there was only one means of relief from this agony of doubt and that was to know with certainty what my aim in life should be. I would go to clergymen and teachers and ask them definite questions: "What is God, and what am I, and what is my relation to God? What am I supposed to be aiming at and doing in this existence called life, and why am I here at all?" No one could ever give me a reply that satisfied, and I had to grope on in spiritual blindness.

Just four years ago a friend suggested that I go and see a Christian Science practitioner. I did so, and that very day the suffering from depression became less acute for a short time. The practitioner gave me what she called "treatment" and talked to me about God, and, because she asked me to do so, I read the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy and attended services at a Christian Science church. I went often to see the practitioner, but for many weeks I had no idea what she was talking about. Each treatment brought in its wake, however, a longer period of relief from depression, and that to me was sufficient proof that there was indeed "something in Christian Science."

The healing took about nine months, but at the end it was complete, and in addition to the blessing of health I had found entirely satisfactory answers to my questions. I had

found in Mrs. Eddy's teachings a clear exposition of the nature of God and my relation to Him. I had found instructions as to how the Christianity taught by Jesus might be put into practical operation, with the definite aim of gaining the results that he had obtained in his ministry, and having gained this definite object in life, peace and happiness returned to me in full measure. In place of haunting thoughts of death, destruction, sorrow, and loneliness, the certainty of the goodness and mercy of God has been revealed. In place of doubts and spiritual blindness I have found the joy of working to attain that "spiritual sense" which Mrs. Eddy defines on page 209 of Science and Health, where she says, "Spiritual sense is a conscious, constant capacity to understand God."

I thank God with all my heart that through the understanding of Him, which a study of Christian Science has given me, I have indeed begun to know the truth, and am, in consequence, able to prove something of the present possibility of "the glorious liberty of the children of God."

(Miss) D. Benningfield, London, England.

4

I have had many healings through Christian Science during the last eleven years. I became interested through kind neighbors who explained its teachings somewhat, recounted their blessings, and gave me pieces of our literature to read and ponder. A false concept of man had held me in bondage for many years, and not until fear and its satellites, discouragement, personality, self-consciousness, self-condemnation, and the like, were exposed and replaced by love and the right concept of man did I know peace and joy.

I learned in the working out of this problem that we need to be obedient and willing to follow the leadings of Principle because of our need of intelligent, consecrated guidance if we would not stumble about in the wilderness. I rejoice in knowing that the only crucifixion there is or can be is the putting off the old false sense of self-hood, with its sins, limitations, and fears, and that this must be done before an entrance can be had into the joy of the Lord, ere we can receive our rightful inheritance. The direct consequence of the activity of right knowing has been the working out of the problem of supply or remunerative employment, proving that inexperience and lack of training are no handicap to one who looks to God for his daily needs, nor do we need to be weary and heavy-laden when about the Father's business.

I am grateful for the privilege of church membership and for the opportunity of service in our Church, which Mrs. Eddy defines, in part, thus (Science and Health, p. 583): "Church. The structure of Truth and Love; whatever rests upon and proceeds from divine Principle." I also appreciate the privilege of class instruction and the greater opportunity for service which it brings.

(Miss) R. KATHRYNE GOETZ, Chicago, Illinois.

4

I am thankful for the opportunity to testify to the help I have had from Christian Science. It is about ten years since I first took up the study, for the healing of stomach trouble which the doctors had failed to relieve. Through the help of a Christian Science practitioner I was completely healed in one treatment. After this healing, I allowed worldly cares and ambition to keep me from studying and from doing my mental work as I should, and I also entertained a great sense of bitterness and resentment, as a result of which my health again failed me. For the past

. a

T.

对阿安,在四,所有不不

two years I have studied earnestly and with the help of a loving practitioner I am in the best of health. This second healing was slow, for which I am grateful, as it has been the means of my applying myself diligently to study. Words fail to express my gratitude for the help I receive daily from the Bible Lesson as given in The Christian Science Quarterly.

I have also been healed of chronic bronchitis and asthma; heretofore I would suffer from colds and shortness of breath at every little change in the weather. I am now free and I know that the weather or any other condition has no power over me, for in God I live and move and have my being. I am most grateful for the healing of all bitterness and resentment, for it has melted away in the knowledge that "God is love."

My husband is a veteran of the late war. He was in active service in five battles and we both know that it was Love that brought him safely through. Christian Science has helped him overcome a nervous condition resulting from shell shock. Words are inadequate to express our gratitude for Christian Science and for all it has done for us. I am thankful to God and grateful to Mrs. Eddy, the great and noble woman who revealed this truth to the world. My one great desire is to be a true Christian Scientist.

(Mrs.) RITA LOIS ANGELL, Portland, Oregon.

I wish to corroborate the testimony given by my wife, and would like to add a few lines about the comfort and good I have received from the study and application of Christian Science, and from one of the small pamphlets, entitled "The Law of Kindness." My wife mailed this pamphlet to me and I received it at Cunel Woods which is in the Argonne Forest. It was all the Christian Science literature I had. As it was small I could carry it in my pocket and it was my companion in many strange and trying ordeals. I used to take it out and read it when things seemed especially hopeless and I always gained spiritual comfort from it although at the time I could not have explained just what it was. Christian Science is making our home healthy and harmonious and we are both grateful for it.—Fred W. Angell.

Having received so much help from the testimonies which appear in the Journal and Sentinel, I am sending mine with the hope that it may help some one who is seeking the light as I was. Less than five years ago, when Christian Science was presented to me, I had been under the care of a specialist for six years. I seldom felt well, and very severe headaches were frequent; in fact, I was almost always tired and ailing and had been so all my life. I had always wanted to know more of God but had been taught that, although God is a God of love, He sent sorrow to us in order to draw us nearer to Him. As a consequence I felt that a mere earthly parent could and usually did express more of love and justice than God. I was often afraid to say, "Thy will be done," because of the belief that if I did God might demand further sacrifices of me.

Then came Christian Science. I shall never forget my first visit to a practitioner, because I was told that God knows nothing of evil and never sends pain, sickness, or death to His children; it was a revelation to me. To-day I am perfectly healthy, happier than I ever believed it possible to be, and so thankful for the better knowledge of God and of man's sonship as revealed in Christian Science. Love is solving all my problems, great and small, and I find daily that nothing is too good to be true. I am more

grateful than I can express, to God, to Christ Jesus the Way-shower, and to Mrs. Eddy for this glorious truth which is available to all.

(Mrs.) ELISABETH JACKSON, Dublin, Ireland.

4

Ever since I can remember, Christian Science has been the great force for good in my life. All the ills of childhood were overcome through the understanding of my mother and grandmother; and many demonstrations were made for me when I was quite young, but I am especially grateful for the healing of adenoids and croup, and the fear of typhoid. Later, I was able to work out some of my own problems. During an epidemic several years ago, Christian Science helped in a way that would be called by some miraculous, although students of this teaching know that it was simply natural. Still more recently, the countless problems incidental to beginning a college career were successfully met, all through the understanding of Truth. Eye trouble, supposedly brought on by too much reading, quickly retreated into its native nothingness. A sense of separation and a tendency toward limiting the ability to learn are among the phases of mortal thought which Christian Science has destroyed. Grave faults of character are disappearing as I awake to the realization that there is but one perfect Mind, God, and His perfect reflection, man. The knowledge of what time truly is has brought me more opportunity to study the truth. Day by day it becomes clearer to me that this religion is the one way to salvation, for all other systems are inconsistent in that they base their conclusions on the impossible assumption that good produces evil. Gratefully, then, I testify to the comforting and healing power of Christian Science, with its consistent, clear-cut, and fearless teachings. proved true by the Master's own standard of demonstration. EDWARD HARRIS, Lexington, Virginia.

*

Many years ago Christian Science was brought to my notice but as I had had very strict denominational teaching and much warning to beware of any new teaching, I took little notice of the subject. Six months passed by and I was in greater need of the help that only Christian Science can give and allowed a practitioner to talk to me, and upon a second interview to treat me. I soon realized that I had found the balm of Gilead. A real search of the Bible for proof that God does heal was begun, and there was soon established in thought the fact that God is a present help in time of need. Our financial condition was very bad but the thought came to me that the power that healed my physical condition could operate equally well to heal our limited sense of supply. For several years we continued to apply our understanding of Christian Science to the successful unwinding of our business snarls, and great was the reward, for several mortgages were paid in full. The largest mortgage seemed slow, and three times when it appeared as though we must meet it, and with no visible means at hand, it was sold and the purchaser did not want the money at that time, thus proving Mrs. Eddy's words in "Science and Health with Key to the Scriptures" (p. 326), "Working and praying with true motives, your Father will open the way."

We have had many proofs of God's presence in the healing of disease, including diphtheria, scarlet fever, neuralgia of the stomach, and many other ills. So many trials and tribulations and discords of various kinds have been corrected that words fail to express the gratitude I feel for the help Christian Science has been to me.

(Mrs.) CLARA C. SHOWERS, Los Angeles, California.

Signs of the Times

["Christian Science versus Nobody," an Editorial in the Pacific Record-Herald, Medford, Oregon]

From various observations we are led to believe that of all the targets which seekers after sensational notoriety aim at, probably Christian Science holds first place. Ancient history reveals the fact that there were certain people who always planned to make war on the Jews on their day of rest because they would not fight back on that day. Something along this line may be the reason for the apparently unwarranted attacks which are made by various people at various times on Christian Science. Now we know very little about Christian Science except in the way in which we are instructed in the Bible, which is explicitly set forth in a few words, that is, "By their fruits ye shall know

What are the fruits of Christian Science? We notice that most people who favor that particular creed are a smiling, happy lot, and as a rule they are very agreeable to associate with. They are not always complaining of a pain somewhere. They are not given to spending your time and theirs telling about the last time they were operated on. As a matter of fact we have met people who claimed to be much better than they, but who were not nearly so agreeable and happy. It is our humble opinion that all good comes from God, and in line with this belief we are compelled to admit, indeed we are glad to do so, that the fruits of this particular creed apparently carry the divine trademark to a degree not noticed in some others which are marketed under the "holier than thou" brand.

There are enough things in the world which are known to be bad, and about which there is no question as to their undesirability, to occupy all our time if we want to spend it in a constructive way, but if, on the other hand, our aim is destructive and we are only striving to drag ourselves up by pulling our brother down to the bottom and using his form for a stepping-stone, then we presume that the efforts of the self-appointed reformers of the world are running true to form in attacking anything and everything which happens to come within their narrow sphere. Like the blind rattler, they strike without knowledge and soon lose caste even among snakes. It has long been a custom among gang leaders in mob reform to pick out something or some one who for decent reasons will not strike back, and then vent their spleen on the humble unfortunate, to the disgust of all thinking people. The constitution of the United States guarantees religious freedom to all. And any person who will willingly and with malice in his heart, or in an effort to secure a little cheap notoriety at the expense of his brother, censor another's religious views and hold him up for criticism before the public, in this country, is violating the fundamental law of this great country and is a glaring example of the most poisonous of all the contemptible varieties of un-Americanism.

If we obey not the laws of the land in which we live and upon which our own liberty depends we are not worth the price that our forefathers paid for that liberty. These cheap notoriety chasers do not seek the good of any one; they are of no value to a community. . . . The very Godgiven liberty which makes their own progress possible is the liberty which guarantees religious liberty to all, regardless of belief, and yet they would seek to overthrow their brother and besmirch his name on account of their own lack of appreciation of what God could do for them if they were willing. It is impossible to love God and to hate our

brother at the same time. People who claim to do this are handling the truth in a very careless and awkward manner, which is generally known, described, designated, and set forth as telling lies. "From such turn away." "By their fruits ye shall know them."

["Prophet's Day Dawning," says Rev. R. Meiklejohn in The Challenge]

In these days practically all thoughtful men are religious; but comparatively few are convinced believers in the Christian tradition or professed members of any institutional embodiment of that tradition. The old antagonisms which the early progress of the scientific movement aroused and fostered have died away; the old mechanical philosophies have been succeeded by more spiritual, because more scientific and rational, conceptions of the universe. . . .

With the Tractarian movement the sacerdotal idea entered upon the latest, and we may hope the last, of its spasmodic semblances of vitality.

But now, in the twentieth century, ecclesiasticism and sacerdotalism have played their part in the history of Christendom. The day of the priest, as such, is over; the day of

the prophet is already dawning.

"The world asks of its Church in these times, more passionately than of any other institution, the question-Canst thou teach us or not?" Thus wrote Carlyle upwards of a century ago, and to-day the world is asking, yet with greater insistence, the same question. It is seeking a creative, prophetic religion, for it is utterly wearied with a conservative, priestly religion. It has no need of, and finds small comfort and less hope in, vain repetitions. It demands a new spirit, a new point of view. It looks for the emergence of a fresh and infinitely more vigorous life out of the dead ashes of the past. A new Reformation is already in being. Everywhere men are turning to God, but He is not necessarily the God of traditional orthodoxy. They are seeking a new fellowship, but it is a fellowship which they cannot identify with the limited and partial fellowships of existing churches. Above all else, they are seeking for leaders of prophetic quality and power. demand is no less real because it is not always audibly expressed.

[From an Editorial in The Bellingham (Washington) Herald]

The Herald believes that the "Back to the Bible" movement is worthy the most loyal and conscientious support. To emphasize the spiritual and moral influence of the Good Book, to stress its beauty as a masterpiece of literature, to call attention to its stabilizing and unifying effect on humanity, would be superfluous. Beginning to-day, a Bible text will be printed in the hope that it will contribute to the success of the movement to "inculcate in the minds of thoughtful readers greater recognition and reverence for the Supreme Ruler and a desire for better things in government."

[From "The Creative Impulse in Industry," by B. L. Hutchins in The Contemporary Review]

The only really hopeful feature in the gloom and discouragement of the present industrial situation is, that in spite of class division and much hatred and bitterness, there are nevertheless signs that we are feeling after a society built on cooperation rather than on domination. We could see it in the wonderful unanimity with which our young men rushed to fight for a great idea in August, 1914. We can see it now, if we care, in all sorts of inconspicuous places, as, for instance, in the adherence of brain workers to the Labor

Party, a process still only in its infancy but likely to have great results in the future. We can see it in the mental and spiritual awakening of the working classes evidenced by their spontaneous demand for adult education-quite irrespective of technical advance-and, remembering the difficulties of those working at heavy and exhausting tasks, in the almost superhuman efforts for thought and study made by some among them. Or we can see it in that very agitation we have been considering—the agitation for industrial control, for the opportunity to exercise thought and judgment in work, to find expression for the higher faculties. If we as a nation were as entirely materialistic in our aims as some would assert, the manual workers would have organized themselves solely for the largest possible production and the largest possible share for themselves. That they are instead preoccupied about nationalization, about supply as public service, about control, about self-expression, may seem to raise cross issues, may make their organization less effective for their own economic betterment. But it is a sign of life, a sign of spiritual impulse, striving to create some better social form, to substitute cooperation for the waste and folly of competition, or the deadening tyranny of the

[Dry Movement in Japan-From The Pioneer]

The amalgamation of all the organizations in Japan formed to fight alcohol is reported by the Japanese papers. Several years of discussion and negotiations have resulted finally in the formation of the Japan National Prohibition League. The inaugural meeting of the new combination of anti-liquor forces of the empire will be held as soon as the drawing up of a set of rules is completed. Reviewing the prohibitionist movement in Japan, the Jiji says that the first organized movement against the use of alcohol was started by Mr. Taro Ando and his friends thirty-five years ago. Those who participated in the inauguration of the movement were almost all Christians. Three or four years ago a broader section of the people became interested in the dry movement and the first non-Christian anti-alcohol campaign was launched in Osaka by the national prohibition association. The association soon extended its field of activity to Kyoto and Tokyo.

At present there are in Tokyo two different movements aiming to drive "demon rum" out of the empire. One is directed by the Nippon prohibition union, with Mr. Ando as its leader, and the other by the Tokyo branch of the national prohibition association, with headquarters in Osaka. Although several attempts have been made to bring about the union of the two organizations, various circumstances have heretofore prevented the plan from materializing. According to the Jiji, the incorporation of these associations into what is called the Japan National Prohibition League was inspired by the united front which the prohibitionists are presenting in the United States.

[From "Invisible Assets of Industry," by Lucius H. Bugbee in Methodist Review]

Some of us believe with increasing conviction that the most valuable assets of life are in the realm of the invisible and that the next progressive step which humanity is likely to take will be the intelligent mastery of the laws of mental and spiritual action. . . . What contributes in the largest degree to the permanence and success of great industries? Is it the physical properties which have been accumulated? Is it the capital involved? These are certainly very necessary. But something else is necessary also. It is an in-

visible element. We are accustomed to call it credit or confidence or reputation or good will. Without it permanence and stability will be lacking. Without it physical plants and equipment may even become liabilities rather than assets. . . .

There is no mechanical way out of the present difficulties which beset our ways in society, in industry, and in government. No new or fantastic order of society, no matter by whom conceived, can bring us permanent relief. Of schemes and plans we have too many now. Changes and readjustments in the social and political and industrial order may be necessary, but the final way out is along the lines which are here indicated. It is a new inward attitude toward one another, a new spirit in industry and in public life, a new emphasis upon the invisible and eternal values of existence.

Notice

SHORT TERM SUBSCRIPTION AND ORDER RATES

Attention is called to the new rates now in effect on short term subscriptions for *The Christian Science Monitor*, Christian Science Sentinel, and The Christian Science Journal; also on single copies of the Sentinel and the Journal. These rates are stated in the advertisements found on the inside front cover page of the Sentinel and on page "iv" of the Journal.

Attention is also called to the rates scheduled below, now effective on all quantity orders for any one issue of any of the Christian Science periodicals:

Monitor\$.03	a	copy
Sentinel		"
Journal		"
Der Herold		"
Le Héraut		"
Ouarterly		"

These rates are net and take the place of the former 10% discount on periodical orders.

The uniform retail price on the Sentinel is now 10 cents a copy, and on the Journal 35 cents a copy. The Monitor single copy price remains at 5 cents.

Discounts to reading rooms on subscriptions and on orders for general publications remain as before.

Church Notices

+ + +

Boston, Mass.—The First Church of Christ, Scientist. Sunday service (during July and August), 10:45 a.m.; Sunday school, 10:45 a.m.; Wednesday evening meeting, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading rooms: Little Building, corner of Tremont and Boylston Streets (fourth floor); open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. National Union Bank Building (seventh floor), 209 Washington Street, opposite old State House; open daily, except Sunday, from 9 a.m. to 5.30 p.m. Massachusetts Trust Company Building, 236 Huntington Avenue; open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 7 p.m.

From the Clerk of The Mother Church

Church Tenets.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

+ + +

From The Christian Science Publishing Society Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in *The Christian Science Monitor*, were run off at the time of their publication in the *Monitor*.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 81/4" x 103/4". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for *The Christian Science Monitor*, *Journal*, *Scntinel*, *Quarterly*, and *Heralds*, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and immediate vicinity

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

There will be placed on sale in a short time six new pamphlets, containing articles reprinted from the Christian Science periodicals, as follows: "Government," "Employment," "Work and Play," "Progress," "Occupation," "Relationship." Orders for these pamphlets may be sent at once, to be filled on the date of issue. Price 5 cents a copy. Reading Room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U. S. A.

* * *

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U. S. A.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cioth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy 85.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large Type (18-point) on Warren's heavy India Bible paper, bound in leather. Size 8 by 10½ inches. Single copy 87.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in The Christian Science Journal from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in The Christian Science Journal and Sentinel, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good. Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

German Translation. Alternate pages of English and German.

Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents. No and Yes.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more. each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

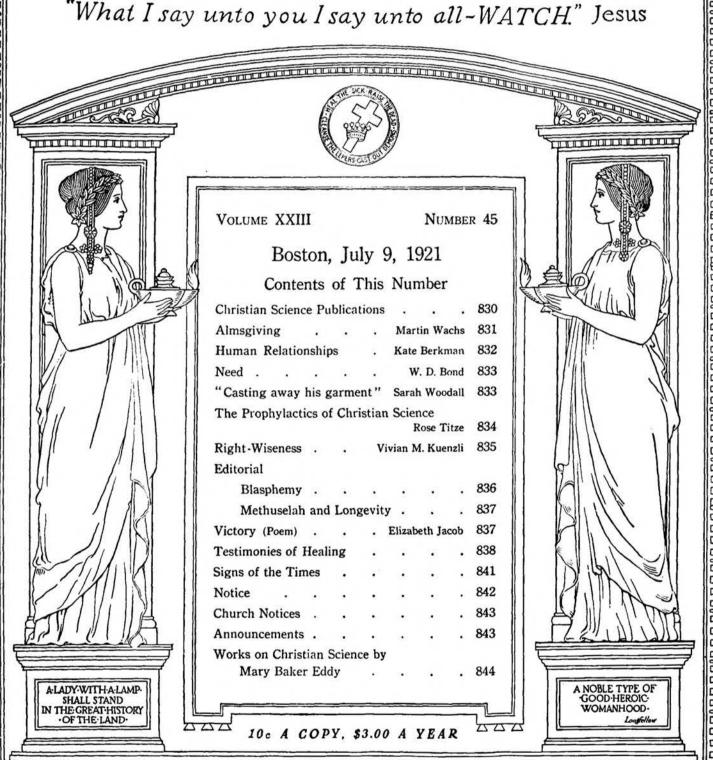

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

Sole Publishers of All Authorized Christian Science Literature

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY ·BOSTON · U·S·A·

Christian Science Literature

"Science and Health with Key to the Scriptures" and all other published writings of Mary Baker Eddy are listed on the outside back cover page of this Sentmel.

The Christian Science Journal

Founded, 1883, by Mary Baker Eddy. This monthly magazine is an official organ of The First Church of Christ. Scientist, in Boston, Massachusetts, Contains articles, editorials, and testimonies of healing, a directory of Christian Science Churches, Societies, and Reading Rooms; also in the January, April, July, and October issues a list of Christian Science Practitioners and Nurses. Subscription price, payable in advance, postpaid to all countries: One year, \$3.00; six months, \$1.75; three months, \$1.00; single copy, 35 cents.

The Christian Science Quarterly

Founded, 1890. by Mary Baker Eddy. Published January, April, July, and October. Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size. Subscription price, payable in advance, postpaid, to all countries: One year, \$1.00; single copy, 25 cents.

Christian Science Sentinel

Established, 1898, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. Subscription price, payable in advance, postpaid, to all countries: One year, 83.00; six months, \$1.75; three months, \$1.00; single copy, 10 cents.

Der Herold der Christian Science

Authorized, 1903, by Mary Baker Eddy. A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months, 50 cents; single copy, 20 cents.

Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months 50 cents; single conv. 20 cents. single copy, 20 cents.

The Christian Science Monitor

An International Daily Newspaper. Founded, 1908. by Mary Baker Eddy. Daily, except Sundays. Its own world-wide news service is supplemented by the service of the Associated Press and of the United Press Association. Complete in its departments; unique in its Home Forum page. Full page of editorials dealing truthfully and fearlessly with vital questions of the day. Subscription price, payable in advance, postpaid to all countries: One year, \$9.00; six months, \$5.00; three months, \$3.00; one month, \$1.10; single courts 5 cents. copy, 5 cents.

Subscriptions will begin with the next issue after the receipt of the order. Information regarding bound volumes of the weekly and monthly periodicals will be given upon request.

"What I say unto you I say unto all, WATCH." Jesus

VOLUME XXIII

JULY 9, 1921

NUMBER 45

Almsgiving MARTIN WACHS

SOONER or later all men must come to know just what constitutes the spirit of true almsgiving. If they would hasten the day when the brotherhood of man is to be realized on earth, as it already is in the realm of reality, the one Mind, the sooner they learn this the better. Just how this is to be accomplished is lovingly pointed out in all the writings of the Discoverer and Founder of Christian Science, Mary Baker Eddy. It is by so illumining the pages of the Bible that all who are seeking the truth may find therein lessons literally teeming with gems of incomparable brilliancy, that this is brought about. One of these passages is to be found in the third chapter of Acts. Here there is brought to our attention, in a simple way, which, however, Christian Science makes still more evident, what is commonly thought to be almsgiving and what it really is.

We are told of how Peter and John were making their way to the temple "at the hour of prayer." There was daily placed at "the gate of the temple which is called Beautiful" one who was not only a helpless cripple but poor and in want. On this occasion Peter and John passed by him and were asked for whatever pittance they were willing to bestow. This, to the beggar and to those about him was thought to be almsgiving, or getting alms. When, therefore, he asked alms of Peter and John he was unquestionably expecting to receive money, for we read that when Peter said to him, "Look on us," "he gave heed unto them, expecting to receive something of them." Then it was that that which was unexpected came into his experience. Peter, filled with Christly compassion, thinking only of the nature of man as Mind made him, realizing the nothingness of materiality, gave out what was indeed alms, when he said, with that authority which comes only to the spiritually inspired, "In the name of Jesus Christ of Nazareth rise up and walk." That was why, when Peter took him by the hand, he stood as upright as any man.

Mrs. Eddy must have realized, just as had Peter and John on this occasion, that the mesmerism of lack and helplessness could only be overcome by means of a spiritual understanding of God and His idea, man. She tells us quite simply in the Preface of her "Miscellaneous Writings" just what charity is, when she writes, "A certain apothegm of a Talmudical philosopher suits my sense of doing good. It reads thus: 'The noblest charity is to prevent a man from accepting charity; and the best alms are to show and to enable a man to dispense with alms." This, of course, is true of not only what is called charity and alms but of all material conditions as well. Mrs. Eddy saw that it was the false sense of charity, in contradistinction to the true reflection of Love which has seemed to keep man fettered with all sorts of diabolical limitations and to make the beliefs of want and woe seem so very real to the unillumined mortal mind.

The correct sense of anything not only enables one to

detect the false sense as false, but to prove its falsity. Thus it is that the right sense of almsgiving, the giving out of more of the spirit of Truth, more charity, more of the love that is the reflection of God, good, does effectively banish and obliterate the false claim of poverty and indigence. It furthermore plants in the hearts of men a desire for and a means of attaining to that simple abundance of good with which divine Love has supplied man for eternity, but which matter can never satisfy. It also aids in bringing to fruition the brotherhood of man on earth, because it insists that men must look to God for all that is to be had, and so reveals boundless freedom, joy, peace, and true happiness as omnipresent.

It is a remarkable fact that nowhere in the pages of the Old Testament is there mention made of the word alms. The Israelites must have known that to be in want savored of disobedience to divine Principle, and so have provided for such as might become temporarily embarrassed. This custom still prevails to-day. It was not until the return from the captivity that we find any mention of what in the New Testament is termed almsgiving. Even there, when careful search is made, alms is oftentimes found to mean righteousness. It is so translated in the first verse of the sixth chapter of Matthew (Revised Version). When viewed from this standpoint, the answer of Jesus to the Pharisee with whom he dined, as recorded in the eleventh chapter of Luke, is readily understood. The Pharisee thought it strange that Jesus did not wash his hands before partaking of food, and the Master said to him, "Rather give alms of such things as ye have; and behold, all things are clean unto you. But woe unto you, Pharisees! for ye tithe mint and rue and all manner of herbs, and pass over judgment and the love of God: these ought ye to have done, and not to leave the other undone." Is this not sufficient evidence to prove that Jesus perceived only the right sense of what constitutes almsgiving? Not rites and ceremonies, not mere perfunctory giving, such as was indulged in by the Pharisees, to be seen of men, but rather the offering up of one's understanding of the deep things of God, such as peace, righteousness, and unbounded gratitude.

It is indeed this higher sense of what is right and true. of that which teaches us our duty toward both God and man, which enables those who seem to be in bondage to the beliefs of lack, helplessness, idleness, and old age to be freed from the mesmeric suggestions of the carnal mind. Man must be seen as immortal, not mortal; as spiritual, not material; as perfect, needing nothing, and not as imperfect and subject to limitation and dire need; as the complete embodiment of God's infinite goodness, and not as the human, mortal mind would have the world believe him to be. Christian Science gives us a ready means to discover at once and demonstrate that God's man, the Christ-idea, is here and now ever about the Father's business; that there never was and never can be a single moment when the love of God is not ever ready to supply the ability and opportunity to gain a victory over the delusive prompting of the human

WREE CONTRACTOR

mind; that the understanding and practice of true almsgiving will effectively obliterate every trace of want and woe, make all men loving and kind to each other and truly willing to serve the one and only God. This is what the Master taught his followers; it is what Mrs. Eddy insists upon throughout all her writings; it is what must be practiced if the brotherhood of man is to be established on earth, and what men must learn to love, if they would abolish temporary makeshifts, which never heal. They must learn to give alms in the way that Mind knows, with the desire to lift up, and not keep down. In that day, almsgiving as it is now commonly known will be seen no more, for men will see it as it is, the idea of Life, Truth, and Love, blessing the race by illustrating a higher sense of humanity, a nobler sense of charity.

Human Relationships

KATE BERKMAN

JNLESS human relationships pattern the divine, they are wholly mortal and temporal, as opposed to the immortal, eternal substance of that spiritual relationship, or unity, which exists between God and His idea, man, this spiritual relationship being the standard by which to judge the soundness of the relations between individuals. Intelligence, love, and fidelity, divine qualities which promote friendship and companionship, are infinitely reflected, but if we are looking to one person, place, or thing in the belief or hope that through that one source only can our need for congenial, satisfying intercourse and helpfulness be supplied, we close the door upon ourselves to the immeasurable good which a loving Father has already created for all His offspring, the sons and daughters of God, good which is being expressed, without interruption or limit, through a countless variety of avenues. It remains for us only to be willing to accept the will of God.

Certain activities and interests may bring us in touch with others similarly interested for the time, and we should be grateful that whatever good or progress may have been accomplished during the period of such relationship is for the benefit of mankind, not merely the persons directly concerned. Or if the experience has been a trying one and we have risen above it so that it has no disturbing effect whatsoever upon us, we indeed have cause for rejoicing and can look back with thanksgiving over the road we have trav-Then we should hold ourselves ready for fresh opportunities to cooperate in the expression of God's will, not retarding our further development by clinging to that which gave us the opportunity for the progress it afforded. As we mentally work loose from and then abandon altogether the old beliefs or duties outgrown, we are more alert to the guidance of divine intelligence, knowing positively that this guidance is unerring and that we can perform whatever task is presented to us as the result of our following the divine directing. The ability and capacity bestowed upon man by infinite intelligence must be made manifest in continued and greater usefulness in the way of His appointing.

As one human prop after another collapses, we perceive the wisdom and necessity for loving the Lord our God with our whole heart and soul and strength and mind. Recognizing man as idea and not as person, looking continually to God in every need, we are spared the disappointment and sorrow which the severance of human friendships and relationships brings. Realizing the unity of God and His idea, we perceive the true unity maintained in absolute harmony and in the proper relationship, just as the ray of the

sun is inseparable from its source, constituting a perfect, harmonious whole. Others may supplant us in the affection, confidence, or association of our erstwhile friends or helpers. Mortal man and mortal conditions may prove fickle and changing, but we have the Scriptural assurance that God is unchanging wisdom and Love. He is constant, and we know that man, His image, must reflect constancy and appreciation. When we are continually about the Father's business, serving Him, not endeavoring to serve or please persons; praising Him, not seeking praise or glory; representing Him, not courting recognition, there is no opportunity for the suggestion of desertion, neglect, separation, failure, to present itself to us.

From the history of Jesus' experiences we have learned that he was not satisfied with having proved the operation of divine law or Principle in one instance. He was continually obliged to do greater works, and even though there were many ungrateful ones among those whom he helped and healed, he recognized his mission in necessarily performing the work he was sent to do. In some places "he did not many mighty works" because of the unbelief of the people there, their lack of understanding or receptiveness of the Christ, Truth, and so his followers must continue to prove the truth for themselves and others, although their efforts are unappreciated and their motives misunderstood. We must be willing to forgo the gratification of the praises of men and do all to the glory of God. The idea of God is always in its established place and nothing else can or desires to fill or usurp that place. And here we may consider for a moment the human conception of importance. Importance implies necessity. Then it is obvious that the importance or necessity for being is to reflect our creator. Spiritual idea could not consider itself unimportant, regardless of the activity by means of which it may be functioning, for it is necessary that Mind be reflected continually and it requires the unlimited idea to express the wholeness of perfection. While in human affairs there seem to be degrees of importance, in reality, which is all that concerns us, this is not the case. Man is the child of God, with the power, ability, and opportunity to reflect infinite intelligence and substance.

Our work is to handle our own problem, from our own standpoint. All there is to existence, to us, is that of which we are conscious. As we behold in thought the actual fact concerning a condition instead of believing as true the inharmony which the human mind tells us exists, the erroneous condition necessarily vanishes. We have nothing to do with the mentality of others who may seem to be involved in our problem or even to have caused it. When we have clearly realized the spiritual fact about the situation ourselves, the healing must be made manifest. Neither need we expect that our particular problem is affiliated with any specific place; that we can leave the place, and the problem in it. The erroneous belief must be eradicated, and it might as well be done right now in the place where we are. The will of God is good, it is omnipotent, it is always operative in our behalf, and it is our right always to know what that will is. Let us endeavor in every circumstance to let His will be done, and confidently pray the affirmative prayer in the last stanza of Hymn 163 in the Christian Science Hymnal:-

> Thou my daily task shalt give; Day by day to Thee I live; So shall added years fulfill Not my own, my Father's will.

Need

W. D. BOND

WHILE it is true that there is direction in the Bible which if used or applied will solve every human problem, yet we have no record in modern times where any individual was able to apply the Bible teachings to his problems with sufficient thoroughness to enable him to formulate a method whereby any one might demonstrate the truth, until Mrs. Eddy wrote the textbook of Christian Science, "Science and Health with Key to the Scriptures." This book may therefore be considered as the response to the great need of mankind for that which would open the treasures of the Bible and permit us to use the instruction contained therein, that our needs may be supplied.

The word "need" is frequently used in the Bible and also in Science and Health. On page 16 of the textbook, speaking of the Lord's Prayer Mrs. Eddy says, "Our Master said, 'After this manner therefore pray ye,' and then he gave that prayer which covers all human needs." This prayer begins, "Our Father;" therefore the need is that we may address God with our petition. All the way this prayer defines God as the self-containing allness of good, and our daily need is to know this. Mrs. Eddy gives further light on this on page 490 of Science and Health, where she says: "Human theories are helpless to make man harmonious or immortal, since he is so already, according to Christian Science. Our only need is to know this and reduce to practice the real man's divine Principle, Love." We are thus shown that a man needs to know God. The natural inquiry then is, How is this to be done?

Mortal mind argues insistently that we need to know matter, that we need more of it, and should keep all we can But this so-called mortal mind has in reality no argument and cannot keep telling us this if we stop and realize that the divine Mind is all that can have real intelligence. If we refuse to listen to the error, it will soon quit trying to argue with us. Here again our need is so to watch our own thinking that we allow only spiritual good to find lodgment there. Thus we are shown that, as Mrs. Eddy says on page 4 of Science and Health, "What we most need is the prayer of fervent desire for growth in grace, expressed in patience, meekness, love, and good deeds." The story of the good Samaritan well illustrates this. The need was met when the ministration of divine Love took place not only for one but for both individuals connected with the transaction. The Samaritan had need to apply his love and the other the need to receive. As we open the thought to give, we unlock the closed door and are thereby able to receive, because the more love we give out the more we are enabled to receive, and vice versa.

Then we must use what we receive; we must reflect Truth in every thought and deed. We must live our prayer; in other words, in order to receive the answer to our prayer we must continually know that all good has already been bestowed on man. Jesus made it clear when he said, "What things soever ye desire, when ye pray, believe that ye receive them, and ye shall have them." At another time he said to his disciples, "I have meat to eat that ye know not of." At this time the disciples were pressing him to eat materially, as they had not yet realized the great feast of good the Master was refreshing himself with by going about and bringing love and gratitude to those he healed. As we gain spirituality we must proportionately lose materiality; so material loss is real gain. Our need is met the instant we recognize it as spiritual, and we are filled with right desire.

Because matter is a belief of mortal mind only, by gaining the substance of Spirit we replace the belief of matter with spirituality, by seeing belief more for what it is, error or nothing. But some one may ask, How is this to supply a home and shelter, clothing and food? This is the problem of many when first they take up the study of Christian Science, and this is the one that probably the senses, trying to put up an argument against such a demonstration, make us linger over.

Clothing, food, and shelter to the senses seem material, whereas the reality is spiritual and must be so understood. The material sense corrected by spiritual sense, or destroyed by it, reflects in human belief a better sense of supply. The human belief or sense of supply being mental, or matter being merely a belief itself, we can see how our human surroundings can be bettered by our steadfast adherence in thought to the real spiritual man, forever clothed, housed, and fed by divine Love, thus seeing our surroundings in their true light, as spiritual and not material. The externalized condition which seems to be matter is really mental, and this mental belief is subject to correction in thought by the spiritual truth of the allness of good. The whole solution of the problem lies in our gaining the truth that all is spiritual, including the true environment, and that only one Mind exists, and that is good, God. Then as we know that man reflects the one Mind or true intelligence which knows only abundance in every direction, our present belief of living will manifest abundance.

"Casting away his garment"

SARAH WOODALL

THE story of the healing of blind Bartimæus recorded I in the gospel of Mark cannot fail to interest the student of Christian Science to-day, for it illustrates the mental qualities that helped Bartimæus to overcome the difficulties that beset him when he appealed to Jesus for healing. The restoration of sight to this man who sat by the wayside begging is an object lesson to all those who are seeking to gain a clearer understanding of the truth that heals the sick. In the narrative in the New Testament, it will be noted that first of all Bartimæus began to cry out to Jesus to have mercy on him, and he refused at the bidding of others to cease his supplications. The fact that Bartimæus appealed to Jesus shows that his attitude of mind was not only humble, but that he was looking for good, and therefore ready to make use of all the good that came to him. When Jesus stopped and commanded him to be called, those who would have stilled his cries now sought to cheer and encourage him. Bartimæus, however, needed no encouragement, and, "casting away his garment," he hastened to obey the Master's command. The result of his prompt and eager obedience is well known, for we are told that "immediately he received his sight." In that brief space of time after Jesus called him, it is evident that Bartimæus willingly and joyfully surrendered and cast from him his old beliefs and fears, and so prepared himself for the instantaneous healing which took place.

Those who are seeking healing from Christian Science are not always awake to the necessity of casting away their garments to enable them to gain the blessings they are seeking, and they may perhaps be hugging these garments closer to them, fearing they will lose something of value if called upon to part with them. When the light of Christian Science is turned upon them, however, these garments are seen to be nothing but rags and tatters, of no value at all,

but only a hindrance to the student's progress. For these garments that must be cast off, that have been trammeling the limbs of the seeker for Truth, are nothing more than false beliefs and fears, erroneous thoughts and materiality, which every one of us will need to cast aside in order to gain our real sight, or spiritual perception.

It may be that some one has found the process of removing the effects of some particular false belief slow, and it has perhaps been overlooked that in addition to casting away the garments of fear or wrong thinking it is also necessary to put on the garments of righteousness or right thinking, and that the affirmation of the truth should follow the denial of error. When Peter, having been imprisoned by Herod, was freed by the angel, he was ready to obey instantly the injunction, "Cast thy garment about thee, and follow me." In this case the garment was not one of false belief or materiality, but the beautiful garment of righteousness which he was able to put on because the chains of error had been lifted from him.

The individual who turns to Christian Science for healing is often ready to cast off the erroneous beliefs of hate, anger, resentment, and the like, because these are easily seen to be discordant elements which can only bring mental and physical disturbance in their train. Sometimes, however, self-pity, self-righteousness, and self-justification are found to be garments that are clung to long after others have been cast away, and they are none the less clogging the wheels of progress and claiming to hinder the full manifestation of harmony, which is the birthright of man made in the image and likeness of God.

The question that is naturally asked is: How are these garments of wrong thinking, which are simply the counterfeit of the true garments, to be cast off? On page 233 of "Miscellaneous Writings" Mrs. Eddy says: "The standard of metaphysical healing is traduced by thinking to put into the old garment of drugging the new cloth of metaphysics; or by trying to twist the fatal magnetic force of mortal mind, termed hypnotism, into a more fashionable cut and naming that 'mind-cure,' or-which is still worse in the eyes of Truth-terming it metaphysics!" It is therefore essential to make a clean sweep of all material remedies before the new garments of spiritual healing can be put on. The only way is to do as Bartimæus did, and cast these old beliefs away-turn right away from the false suggestions of material sense and seek the understanding of the real man that Jesus so wonderfully demonstrated in restoring his sight. In so doing we are following Mrs. Eddy's instructions on page 142 of "Science and Health with Key to the Scriptures," where she says, "We must seek the undivided garment, the whole Christ, as our first proof of Christianity, for Christ, Truth, alone can furnish us with absolute evidence." This absolute evidence is certainly furnished in the case of the man who regained his sight, for the fact that whereas he was blind now he could see was sufficient evidence to him to prove that he had found a far better garment to replace the old one he had cast away, and that Jesus had given him something beyond and above anything that the teaching of the scribes and Pharisees had accomplished.

The putting off of the old garments of materiality may not be accomplished in our experience so speedily as Bartimæus was able to cast his garment from him, but it would seem that in some cases little effort is made to get rid of the beliefs that are hindering progress. Every one of these false beliefs, beliefs in the effectiveness of drugs or in any power apart from God, will have to be destroyed,

and it is no use trying to hide them by putting new garments over them. If we seek the undivided garment of Christ, Truth, we shall not find ourselves depending on our own righteousnesses, which Isaiah tells us are "filthy rags," but in relying upon Truth we shall bring into our experience the proofs of our right thinking or true righteousness, in healing sickness and sin. Only when we get down to the truth that mortal man is a counterfeit of the real man, can we begin to put on the real garments of health and holiness. Then we can say with Isaiah, "I will greatly rejoice in the Lord, my soul shall be joyful in my God; for he hath clothed me with the garments of salvation, he hath covered me with the robe of righteousness, as a bridegroom decketh himself with ornaments, and as a bride adorneth herself with her jewels."

The Prophylactics of Christian Science

ROSE TITZE

In medical schools one often hears the saying: "Prevention is better than cure," and many preventive material remedies are being invented and used against certain disease The student of Christian Science, even if he has gained but a glimmer of this wonderful spiritual religion knows that he has not to fear germs. On page 392 of "Science and Health with Key to the Scriptures" Mrs. Eddy says, "Stand porter at the door of thought." This is a prophylactic activity which if practiced will benefit mankind. At any time of an epidemic a Christian Scientist does not use the preventives invented by material medicine against the disease. He knows that it is fear which produces the disease. If we are able to overcome it we shall be master over any kind of error that presents itself. But how can we gain dominion over fear? "Study thoroughly the letter and imbibe the spirit" (Science and Health, p. 495). If we carefully study and practice Christian Science we have at hand a preventive and a remedy for all diseases.

If one has what he calls a good memory, however, and it is easy for him to memorize much of the letter, he must be on guard lest he become a mere paraphraser, and his religion become a religion of the intellect. "It is the spirit that quickeneth," and without the spirit fluent words are valueless. All preventive and healing effect of the truth in the Bible rests before all on a clear recognition of what Principle is, and an understanding of true being. All the misery of mankind, disease, sorrow, misfortune, hatred, jealousy, injustice, dissipation, are but expressions of ignorance of God and true being. As we gain an understanding of the true nature of God as infinite Mind, those obstacles and limitations which may have seemed to aggregate and to have separated us from hope will be seen for what they arenothingness. Real freedom from these errors, in other words, knowledge of Principle, signifies happiness. Thus we see that it is in our power to prevent error of every sort. Does this sound presumptuous? It is not. God is divine, infinite Principle, Love, and man, as His likeness, must reflect His love. Can divine Love be afraid? Does Love boast to be itself? Can Love ever mean anything else than Love?

The mortal mind limits itself through its so-called laws to which it bows down. True understanding of Principle makes man free and enables him to prove his dominion over the manifold beliefs of mortal mind, such as faith in material medicine, health theories, or belief in physical culture. Instead of all this he learns to trust in God, who is Love, infi-

nite Mind, and humbly and confidently consecrate himself to Him. Abiding in this consciousness, it becomes easy for a man to protect himself against all error. The cares of his daily life drop from him if he obeys the Scriptural admonition to cast all care upon God. He ceases to look around fearfully or to worry about those he calls his relatives. Lack of success in business will not discourage him when he begins to correct error for himself and thus prevent error metaphysically. He knows that a seemingly discouraging condition is unreal, that what physical sight tells him vanishes before the liberating truth taught by Christ Jesus. It is our privilege and duty to guard our thought against the false belief which would even temporarily separate us from God. We must constantly strive and turn from the material to the spiritual, and so the error comes to the surface and we rejoice in the opportunity to prove that in the presence of infinite Love evil is nothingness. Thus our burdens are lifted from us through this prophylactic and healing message of our Father-Mother God.

Force of habit often seems to blind us to the many little faults which daily living uncovers and we let fear or anger overcome us without analyzing the cause of these errors. We have not been watchful, and a sense of material selfhood has put us in bondage, but recognizing that Principle is ever active we shall become master over those tendencies which Paul classifies as fruits of the flesh. For the Christian Scientist every opportunity to overcome adverse conditions through the understanding of Mind's true nature, which Christian Science has taught him, is a joy, and as we become more and more watchful and stand fast in our faith we shall learn at all times to separate the tares from the wheat. Christian Science is the religion which explains and demonstrates the teachings of our Master, and we can benefit by it in the degree of our obedience, but we must never let it become a mere formula or talk. It must become the essence of our thinking. Every one who has ever grasped its true meaning, even in a slight degree, can demonstrate the truth of this and help himself and others in the understanding and reflection of infinite Life, and thus enjoy the fruits of the tree of Life.

Right-Wiseness

VIVIAN M. KUENZLI

WHEN one is endeavoring to become a Christian Scientist worthy the name, it soon becomes apparent that each thought must be carefully weighed, and although this process may presently become so natural that it is accomplished in many instances without conscious effort, still each day affords opportunity to use the knowledge already attained, and compels the student to gain more if he would solve the advanced problems in the right way. The warning against the error of self-righteousness is well-defined throughout the Bible and also in the writings of Mrs. Eddy, especially in "Feed My Sheep," which we find in her Poems (p. 14), in the second stanza of which she says:—

Thou wilt bind the stubborn will, Wound the callous breast, Make self-righteousness be still, Break earth's stupid rest.

This shows the importance she attached to the overcoming of this pharisaical condition of thought. On the other hand, if one is not on guard he may be led into thinking, saying, and doing things which are opposed to his demonstration of the demands of this Science, merely because others are doing so, and the importance of individual work must not be overlooked. The danger of the mob-thought has often been pointed out, and it seems to work in small as well as in greater circles, to the detriment of individual growth.

While we are engaged in the effort to work out our own salvation in the way which seems nearest right to each of us, there is much of encouragement to be gained from the knowledge that desire for good, coupled with earnest, vigorous, unceasing effort to realize what God and His creation really are, will begin at once to untangle the snarl of material seeming. A mental argument may be presented something after this manner: "So-and-so does this; it is a trifling thing, anyway," or, "Other Christian Scientists have decided against such a course of action, so even if I do not exactly understand why, perhaps I'd better just be guided by them." So, unwittingly, the ability to think clearly, to work closely to the teaching of our Master as revealed by and through our revered Leader, is weakened. It cannot be too definitely impressed upon the thought that we are to study, work, think, act, know for ourselves. From the very beginning of our knowledge of Christian Science, we are to be guided by the Bible and the writings of Mary Baker Eddy through our own prayerful research, not by that of another, although this does not mean that we may not often help and be helped.

There are certain phases of error regarding which there cannot be two opinions; even the world acknowledges their wickedness. So there can be no argument concerning them except as it may be necessary to rise to the consciousness of the allness of God so that we may not be tempted to believe in their power or reality. Other forms are presented in more subtle guise, but in most cases good, honest, prayerful effort to learn will result in true spiritual understanding, and it will be found unnecessary to get human opinions or seek outside advice. Moreover, a step taken through our own prayer for guidance so strengthens thought that we are enabled to take the right step at the right time with a clearer understanding than would have been gained had the same step been taken earlier simply because others were doing it or because some one else said it was the right thing to do.

Fear is, of course, claiming to be cause when an earnest, loyal Christian Scientist refrains from acting up to his own highest understanding on any question lest others may accuse him of self-righteousness, or "for fear" such action may result in that form of error finding lodgment in his thought. There is no vacillating in the lives or teachings of either of the highest exponents of Truth the world has ever known, one of whom, Jesus the Christ, says in the Sermon on the Mount: "Be ye therefore perfect, even as your Father which is in heaven is perfect." The other, on page 451 of "Science and Health with Key to the Scriptures," says: "Christian Scientists must live under the constant pressure of the apostolic command to come out from the material world and be separate." Each must decide just how much these statements mean to him individually. It may even be possible at times that in choosing between two evils, the lesser would be to take a definite stand, although the error of self-righteousness might claim to be present. A working Christian Scientist will find it impossible to remain long at any relative mental point until perfection is reached. It is well to remember that even Jesus said, "I can of mine own self do nothing," and, "The Father that dwelleth in me, he doeth the works." This will tend to overcome in great degree both self-righteousness and self-depreciation, through the unfoldment of the knowledge of God as Allin-all.

Blasphemy

THE man in the street probably imagines that taking the name of God in vain is a mere matter of bad language. He would sum it up in a question of blasphemy. As a matter of fact, the common idea of blasphemy is only the very edge of the matter. It is about included in what Christ Jesus said of the term "raca." That is to say, it is an indication of what taking the name of the Lord in vain may amount to, rather than anything else. Jesus' instance was admirable for his purpose; he took the word "raca," probably a common expletive of the fishermen and shepherds about him, the use of which had been forbidden by the Sanhedrin, and pointed out to his listeners that any one who was heard saying it would be in danger of the council, this same Sanhedrin. But, he went on to declare, anybody who said "Thou fool!" to his neighbor was in danger of hell fire itself. This fire of Gehenna, in the valley where the refuse of the city was destroyed, was, of course, merely a figurative term of final punishment. What Jesus was pointing out was that the selection of some definite word as a sort of test of blasphemy was ridiculous. Blasphemy was contained not in a word but in the mental intent, and therefore the man who took the name of the Lord most in vain, was the man who most disregarded Principle. The use of "raca" as a mere common expletive, rather as a habit than by reason of anything else, was as nothing compared to the accentuated malice which might be concentrated in the exclamation "Thou fool!" The taking of the name of God in vain is the equivalent to making nothing of Principle. Therefore blasphemy is really something very different from the futile and foolish use of specific words, it is contained in a man's whole mental attitude in life toward Principle. Every act and thought which makes nothing of Principle is blasphemy in itself, and it gains in wickedness according to the fellness of the intent. The height of blasphemy is, necessarily, that condition of malicious animal magnetism referred to by Mrs. Eddy on page 564 of Science and Health, where she says, "As of old, evil still charges the spiritual idea with error's own nature and methods. This malicious animal instinct, of which the dragon is the type, incites mortals to kill morally and physically even their fellow-mortals, and worse still, to charge the innocent with the crime. This last infirmity of sin will sink its perpetrator into a night without a star." Any effort, however, to belittle Principle constitutes blasphemy, and that is why it is so essential to the individual to guard his own thoughts. Words, after all, are a minor issue. They are the result of thought, and never could slip out even in the grossest habitude of indifference, were it not that the human mind has been permitted an unrestrained license which necessarily ends in an excess of language. "For out of the heart," Jesus said, "proceed evil thoughts, murders, adulteries, fornications, thefts, false witness, blasphemies: these are the things which defile a man."

Jesus was speaking of the various Jewish customs, with the various Jewish precautions against defilement, and was pointing out that the mere failure to wash the hands before eating was not a true cause of defilement. As a matter of fact, it was very much on a par with the use of the word "raca." It was the washing of the outside of the platter whilst letting the inside go dirty. Real defilement, he insisted, was what came out of the heart of man. Ultimately, then, blasphemy is in thought, it need never take form in words. It is the idea of the individual that he is able to ignore Principle, it is the feeling of the individual that he is willing to ignore Principle, which constitutes fundamental blasphemy. Not until the individual has deliberately permitted himself to think contrary to Principle, and enjoyed this process of thought, is it possible for him to give outward expression to blasphemy in word or deed. Consequently, when the Third Commandment insisted, "Thou shalt not take the name of the Lord thy God in vain; for the Lord will not hold him guiltless that taketh his name in vain," it really laid down a terrific demand of acceptance of Principle which has obtained the faintest moonshine of obedience in the avoidance of specific words such as "raca."

It is easy to see, then, why, on page 392 of Science and Health, Mrs. Eddy wrote, "Stand porter at the door of thought." It is absolutely essential to a man's progress in any way that he should take this advice. There is a great deal more in Shakespeare's famous saying, "There is nothing either good or bad, but thinking makes it so," than even he was fully aware of. There is, as a matter of fact, nothing at all of man but thought. The real man is the idea of divine Mind, the physical man the idea of mortal mind. It is, in each case, divine Mind or mortal mind which is the parent, and so there is nothing good or bad except the reality which divine Mind makes good, or the supposititious counterfeit which mortal mind makes evil. The human being is nothing more nor less than the product of hypnotic suggestion, and the only thing which at any time saves him from himself by causing him to struggle to put off the old man with his works, and to put on the new man, is the eternal fact of his actual spiritual reality which can never be hidden or destroyed. Therefore, a man standing porter at the door of thought is battling with the perpetual stream of hypnotic suggestion which is endeavoring to pass into his consciousness, and striving to accept nothing but spiritual Truth. Ultimately, then, it comes to this, that every suggestion of animal magnetism, every idea, that is to say, which is not spiritual, is taking the name of Principle in vain. As a consequence, the man who attempts to keep the Third Commandment must live in the perpetual effort so to stand porter at the door of thought as to reject, so far as he may, every suggestion of mortal mind which tells him anything exists but the image and likeness of God.

All the mistakes which are made humanly originate from taking an unscientific standpoint. The idea of dualism is so firmly fixed in the human mind that it is almost impossible for it to free itself, without a long and terrific effort, so as to think in terms of absolute metaphysics. In the proportion in which this habit of thought is acquired, a man stands porter, more and more successfully, at the door of thought. And as he does this the volume of blasphemies which have daily passed unsuspected under his eyes, through the doorway, is gradually dammed, and he begins to find his whole outlook changing as he realizes that by submitting to the control of Truth he becomes the architect of his own harmonious future. Methuselah and Longevity

Or Methuselah, the son of Enoch and the grandfather of Noah, the Bible has very little to say. The fact which has made him famous is stated in the twenty-seventh verse of the fifth chapter of Genesis where we are informed that "all the days of Methuselah were nine hundred sixty and nine years;" but as to what he did during these years we know nothing. His name has stood out amid the host of Scriptural names simply because to him is ascribed the greatest number of years recorded in all the genealogical data of the Bible. In other words, he has represented throughout subsequent history what has been considered a more or less improbable ideal of longevity. This ideal humanity has often thought of with superficial amusement but with inward seriousness. Immortality is, indeed, the fundamental ideal of living; but humanity has too often regarded it merely as a desirable accompaniment of materiality rather than as inherent in Spirit alone.

In one sense, the experience of Enoch, that he "walked with God," has been of more immortal inspiration to the world than all the years of Methuselah, for true walking with God, divine Principle, is actually spiritual living. Likewise Noah, who, as Paul points out, "became heir of the righteousness which is by faith," has exemplified to the world considerable understanding of spiritual immortality. Thus Mrs. Eddy says of him (Science and Health, p. 592): "Noah. A corporeal mortal; knowledge of the nothingness of material things and of the immortality of all that is spiritual." Certainly the ministry of Christ Jesus, that was so brief when reckoned in earthly years, has meant immensely more to the world than all the years of Methuselah or even than the sense of goodness manifest through Enoch or Noah. Each unfoldment of Principle, however, proves just what needs to be proved at the time and in the circumstances.

Human longevity is merely an earthly counterfeit of the true immortality, which is without beginning or end, in Mind and not in matter. As the mortal beliefs of limitation yield to infinite Mind infinitely manifest as spiritual idea, the sense of immaturity, adolescence, and old age must, indeed, be overcome in one way or another. What the way of overcoming is to be no one can humanly outline, for the real proof of eternal Life is boundless, as shown in such experiences as those of Enoch, Methuselah, Elijah, Lazarus, and Christ Jesus. Every phase of human limitation that is replaced with the understanding of Life as infinite Mind, or Principle, shows anew the vanity of matter. So instead of desiring to dwell many earthly years in a material condition, one needs to discern and demonstrate what it means to live forever in Mind now.

Wordsworth discerned something of the basic fact of immortality when he wrote that

trailing clouds of glory do we come From God, who is our home.

Yet even he was thinking of mortal existence as beginning and ending, with a preexistence of which a man may have vague memories. Christian Science shows what Wordsworth did not comprehend: that man, spiritual idea, comes or emanates from the divine Mind now with the fullness of spiritual glory. The spiritual activity which is real living continuously expresses its one spiritual cause and thus dwells now, always has dwelt, and always must dwell in infinite Mind, quite apart from any illusory supposition of matter. Absolute longevity, therefore, is to be measured not in terms of solar years but in the continuous unfoldment of immortal Life, which is indestructible.

The process of proving the true longevity is not what has been called "creative evolution," a mere improvement of material ways and means of living. It is, instead, the acceptance of spiritual consciousness as the reality of conscious living and the rejection of the entire supposition of mortality. The instant a man accepts the truth that real living is in Mind and demonstrates it for himself by acting only in accord with Principle, that instant just so much of material sense testimony is once and for all subdued. Thus, as Mrs. Eddy so clearly points out on page 167 of Science and Health, "We apprehend Life in divine Science only as we live above corporeal sense and correct it. Our proportionate admission of the claims of good or of evil determines the harmony of our existence,-our health, our longevity, and our Christianity." The fact is that immortal Life is the only Life of the real man now and always. In the presence of this Life, every sense of material evolution must be transformed as it is superseded by spiritual unfoldment.

It is reason for rejoicing, however, that various ones in all ages have caught some glimpses of the real longevity, which is absolute immortality. When Mr. Bernard Shaw, to mention one of the most recent, indicates that "the whirlpool of force" must in the end "become all life and no matter," he is pointing to the truth that the understanding of infinite Principle alone can rightly interpret. "Of Life only is there no end," he says, and with this phrasing the student of Christian Science can, of course, agree. Material beliefs must come to nothing because they are nothing now. The only real force of the present is the force of divine Mind, or Principle, and this force is manifest for the healing of all manner of human limitations. The practicable course for every man, then, is to prove in his own experience that immortal Life is the reality. In this way he can partake of the "full fruitage yet to come" that we read of on page 348 of Science and Health, where, in the paragraph opposite this marginal heading just quoted, Mrs. Eddy says: "I have never supposed the world would immediately witness the full fruitage of Christian Science, or that sin, disease, and death would not be believed for an indefinite time; but this I do aver, that, as a result of teaching Christian Science, ethics and temperance have received an impulse, health has been restored, and longevity increased. If such are the present fruits, what will the harvest be, when this Science is more generally understood?" GUSTAVUS S. PAINE.

[Written for the Sentinel]

Victory

ELIZABETH JACOB

FEAR can never stay the armies
That are marching on for God.
Fear can never wield the pressure
Of a sanctifying rod.
For the holy truth is marching
In invincible array,
Breaking through the stoutest barrier
That would dim the light of day.

Yea, our God is One, and alway
Lord, and Life, and Truth, and Love,
Ever with divine compassion
Drawing mortals far above
All the fear and all the anguish
Of earth's weary dream, and wild,
Proving to man every hour
That he is God's holy child.

Testimonies of Healing

For a long time I have felt that I must express my gratitude for all the blessings that Christian Science has brought to me. Our first experience of healing through Christian Science occurred about thirteen years ago, when our son was afflicted with a trouble which threatened to become incurable. About every three months he was seized with attacks of convulsions lasting, at intervals, for two or three days. Physicians could do nothing for him and it was as a very last resort that we turned to Christian Science. In one week's treatment he was healed. A few years later he had scarlet fever, and diphtheria also developed. This healing took place in one week, through the faithful work of a loving practitioner.

I can also testify that the truth can save in case of accident. In crossing the street this same boy did not see an approaching five-passenger automobile, and before he could get out of the way the car struck him. For the moment fear possessed me and I seemed to be unable to think, but quickly regained composure and realized the truth. The driver succeeded in stopping the machine after the front wheel had passed over the boy's shoulders, but aside from a few bruises the child was unhurt. I was able instantaneously to heal myself of a severe attack of neuritis, about one year ago. I am very grateful for this demonstration. For six months I had had but little relief and at times the pain was quite unbearable. After one day's sincere and consecrated study I saw just what had to be destroyed in thought and was amazed to see how quickly the physical discord melted into its native nothingness.

It would be impossible for me to express in words all my gratitude for Christian Science. It is certain I could not live without it. This testimony would not be complete did I not also express gratitude for all the activities that Mrs. Eddy established. I am grateful for *The Christian Science Journal*, the *Scntinel*, and the *Monitor*.—(Mrs.) Bertha B. Johnson, Hackensack, New Jersey.

4

In the fall of 1912 I attended a Wednesday evening meeting in a Christian Science church for the first time, and I loved the service and immediately got a copy of "Science and Health with Key to the Scriptures" by Mary Baker Eddy. In a very short time I was healed of the use of tobacco and intoxicants, not having used or had any desire for either since. I have not missed a service since then when at home. I have had beautiful experiences since I have been a student of Christian Science. Last year, with the aid of a practitioner, I was healed of chronic constipation. About a year ago I met with an accident, as the result of which I was laid up in bed for four days and was helpless. On the fifth day I could sit up, and, through the untiring work of a practitioner, I was up and walking around in a little while and was at work again in a little more than a month.

My most beautiful and wonderful experience was three years ago on the day of prayer which was observed in the United States. We of course had service in our church. I usually sat about the same distance from the Readers and could barely hear the service, but that day I heard every word from first to last, very clearly and distinctly; in fact I never heard anything like it in my life before, and I realized God's presence, which was so wonderful to me that I shall never forget it. We say we are so grateful

for all Christian Science has done for us, but we cannot express our gratitude in words, and can only do so by trying to live a better life day by day, and by loving God supremely.

THOMAS M. MULLINS, San Francisco, California.

4

I am grateful to God, "from whom all blessings flow," for the many healings I have experienced since coming into a knowledge of Christian Science. Dislocated joints have been healed instantaneously and colds have been quickly overcome. I live on a farm and have witnessed many healings among the live stock. The application of my understanding of the truth keeps them well and makes them gentle. Cholera in fowls has also been overcome. I was quickly healed of a bone felon on my finger, by declaring its unreality and knowing the allness of God. I have made many demonstrations of supply. I have a family of three children and they are all kept well and their needs supplied through the application of my understanding of Christian Science. I try to realize every day that God's ideas reflect life, health, love, wisdom, honesty, uprightness, and purity.

I am grateful to Mrs. Eddy, the Discoverer and Founder of Christian Science, and I hope this testimony may be helpful to some one else who is seeking the truth.

(Mrs.) ALICE DUBLIN, Mt. Selman, Texas.

٥

I should like to express my gratitude for what Christian Science has done for me. When I first heard of it I was a physical wreck, suffering from consumption of the throat; also from a growth in the throat. After I had been suffering for two years, my doctor said that he was afraid he could do no more for me, and advised me to see a specialist. I did so, and he said that an operation was necessary but owing to my having a very weak heart it would be impossible to operate. It was at this time that I heard of Christian Science, and I was advised to see a practitioner. I did so, and I shall never forget the loving way in which she helped me. Christian Science treatment was given, and I am very thankful to say that in a very short time the growth entirely disappeared, also the other diseased condition of the throat. It is now seven years since the healing took place and there has been no return of the trouble.

What I am most grateful for is a better understanding of God and man's relation to Him which Christian Science has given me. It has helped me to overcome a sense of loss of my two dear sons, which meant much to me. For this words cannot express my gratitude. I give thanks to God, and my gratitude goes out to Mrs. Eddy for revealing this wonderful truth to us.—(Mrs.) Clara Orme Burton, Swinter near Manchester, England.

I am very glad to verify the testimony of Mrs. Clara Orme Burton. I myself was healed in Christian Science when everything else had failed and in the past seven years all my needs have been met. I shall never cease to be grateful for what Christian Science has done for me and mine.—(Mrs.) SARAH ALICE GRIFFITHS, Bowden, Cheshire, England.

20年一年5月

I have been thinking of sending a testimony for publication for a long time, in gratitude for what Christian Science has done for me. I had been carried around in my husband's arms for two years, and at one time I was unable to speak a word or to open my eyes for thirty days and

nights. I will not write any more of past suffering, as I have a great desire to write only the cheerful things.

At present I am living a life that seems to be all sunshine. Each day opens with more strength and cheer for my daily duties. Words cannot express my gratitude to the kind practitioner and to other loving ones who have done so much for me. My healing took place nearly two years ago, and I am thankful that I can help others, also for the knowledge that God can and will do as much for others as He has done for me.

(Mrs.) LORA E. RANNEY, Fontana, Kansas.

I am very glad to corroborate my sister's testimony and to acknowledge my gratitude for her healing. I helped to care for her during her prolonged illness, and after everything else had been tried and had failed I went to a practitioner in her behalf, who told me to get a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and to read it to her, together with the Bible, every day, which I did faithfully. At first she paid no attention to what I read, and sometimes I would get a little discouraged, but I would always keep on reading, until she told me she could read for herself and that I need not read to her any more. Thank God she was healed, and is well and happy, and is a close student of Science and Health and the Bible. I hope this will encourage others who have struggled on for years in suffering. Jesus said, "If ye continue in my word . . . ye shall know the truth, and the truth shall make you free." (Mrs.) LEORA LEHMAN, Portland, Oregon.

4

I desire to express my gratitude for the many blessings which I have received through the study of Christian Science. I have been able to express more cheerfulness and have a more loving disposition than ever before. The knowledge of the truth that infinite Mind governs man and the universe is an ever present help to me. One demonstration which has been made for me and for which I am especially grateful is the overcoming of a belief of loss of memory, which had continued for several years. At times I could hardly remember things that I had done a few hours previously. This demonstration was made shortly after I became interested in Christian Science. I am indeed grateful to Mary Baker Eddy, the Discoverer and Founder of Christian Science; and I am more grateful than words can express to Christ Jesus our Way-shower.

CARL E. LASS, La Porte, Indiana.

4

Feeling the deepest gratitude for what Christian Science has done for me, I want to mention a few of my many blessings. I turned to Christian Science for the healing of appendicitis. The doctors had told me that I must be operated on, and, while I was not afraid of the operation, I knew that it would not heal, as my mother was operated on many times and the result was other troubles. I was not only healed of appendicitis, but also of indigestion, from which I had suffered all my life; also of headaches that would last for one to five days at a time. I was able to lay off glasses immediately and have never used them since. I was really healed in the one treatment, but I had one week's treatment because I did not understand God's work.

For all my physical healings I am deeply grateful, as I never was free from pain of some kind until I turned to Christian Science, but I am most grateful for the understanding of God which the study of "Science and Health

with Key to the Scriptures" by Mary Baker Eddy, together with the Bible, has given me. Before becoming a student of Christian Science the Bible was like ancient history to me. I could not understand it, and whenever I read the story of the crucifixion of Jesus I felt sad. Now the Bible is my daily food and companion and I can only see the risen Christ and God glorified. I study the Bible and go to church with a sense of rejoicing instead of one of sadness. I am so thankful to have a religion that teaches us how to work out our own salvation, and that we do not have to take any person's opinion for the deep things of God. I am grateful for the protection and love that Christian Science brings into our lives.

(Mrs.) Annie C. Brooks, Memphis, Tennessee.

4

In Isaiah we read, "When thou passest through the waters, I will be with thee . . . when thou walkest through the fire, thou shalt not be burned; neither shall the flame kindle upon thee." That statement was given me to prove with my understanding of Christian Science, when we were in a strange city and awakened at two o'clock in the morning to find flames on three sides of us and our rooms fast filling with smoke. As we jumped to our feet the omnipresence of God was declared and to my thought instantly came a paragraph from one of our pamphlets, "If one were in a burning building . . . there is a law of God which would at once adjust the apparent material circumstances so as instantaneously to bring about his complete deliverance." The words were so positive that every sense of fear and haste was entirely dispelled. I calmly gathered a few trifles of sentimental value and we stepped out of the window to a balcony. On account of the flames coming up from beneath, we had to creep close to the building, but we were knowing all the time that this law of deliverance was operative then and there. Some men from the street, three stories below, put up painters' ladders for us, and so we proved, as did the three men whom King Nebuchadnezzar cast into the fiery furnace, the protective power of the truth.

Christian Science has been everything in this journey out of materiality, and we have had many healings in our family. Truth proved its sustaining power when our son was in the army. I am deeply grateful for class teaching, showing me how to apply this truth for myself and others. The study and research work required for an official position are a joyful privilege and all our periodicals are of great help and inspiration. In the heart of the business section of this great city is a church reading room giving out these publications to the weary and thirsty ones, and words are inadequate to express the gratitude for this table prepared in the wilderness. Christian Scientists owe much to our revered Leader for her courageous unfoldment of the Christ, Truth, to this age, and in these latter days we are grateful for every agency which she founded.

(Mrs.) ALICE COMAN WOOD, Chicago, Illinois.

After hearing and reading so many wonderful testimonies of healing through Christian Science, I feel that I have neglected my duty in not giving mine, thereby expressing my gratitude to our revered Leader, Mrs. Eddy, for her work in behalf of all mankind in bringing to light the truth contained in the Bible through her wonderful and inspired book, "Science and Health with Key to the Scriptures." Space would not admit of my relating here the many blessings that have come into my life through Christian Science. What I am most thankful for is the spir-

itual understanding that unfolds through its study. Mrs. Eddy says in Science and Health (p. 278): "In Spirit there is no matter, even as in Truth there is no error, and in good no evil. It is a false supposition, the notion that there is real substance-matter, the opposite of Spirit. Spirit, God, is infinite, all. Spirit can have no opposite;" and on page 574: "The very circumstance, which your suffering sense deems wrathful and afflictive, Love can make an angel entertained unawares." This we understand when we recognize sickness not only as a lie, but as an enemy, trying to make us believe in a power opposed to God, good.

I had only studied Christian Science a short time when I was completely healed of bronchial asthma, which asserted itself so often that I was completely held in bondage by it and was led to expect its return at intervals all my life. This disappeared quite suddenly several years ago, and has never returned in any form. For five years I had the privilege of doing active work during war time and afterwards. Never was I prevented from attending to my office work daily during this time, although three years of it were spent in a north of England city that is supposed to be most conducive to bronchial complaints. I also feel grateful for the overcoming of the claim of deafness. An eminent medical doctor told me that the drum of my right ear was broken and it was quite impossible to regain hearing through that ear. However, through learning the truth as taught in Christian Science about God and man in His image and likeness, by a better understanding of the law of harmony,-God's law, which is the only law,-this error has been met and absolutely overcome.

These beautiful lines of one of our hymns are always such comfort (Hymnal, No. 176):—

I look to Thee in ev'ry need, And never look in vain; I feel Thy touch, eternal Love, And all is well again: The thought of Thee is mightier far Than sin and pain and sorrow are.

—(Miss) FLORENCE H. PARKE, Ballinlough, Black Rock, Cork, Ireland.

Words seem inadequate to express my gratitude for what Christian Science has done and is doing for me and for all mankind. Some years ago I was very ill, suffering from what was supposed to be typhoid fever. I knew nothing of Christian Science, but when a friend suggested to my husband that we give it a trial I willingly consented. Absent treatment was given early in the afternoon, and four hours later I was able to be down to dinner with my family, every manifestation of illness having disappeared. This was such an absolute proof to me of the power of God that in gratitude for my healing I immediately commenced the study of the textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy. As I put into practice the little I could grasp of the truth, I found that many other physical ailments disappeared into their native nothingness. For ten years I had been a great sufferer from inflammatory rheumatism, but this condition was healed also as the purification of thought went on.

That "the word of God is quick, and powerful" has been proved many, many times. For all the physical healings I am very grateful but most grateful for the correct concept of God, and man in the image and likeness of God. I am inexpressibly grateful for all the channels for good provided by our beloved Leader, Mary Baker Eddy.

(Mrs.) Edna S. Blanchard, Mount Vernon, New York.

I had been wearing glasses for about eight years and had become slightly interested in Christian Science when a Christian Scientist told me of a healing that a Sunday school teacher had experienced. The teacher was asked by a practitioner if she kept the commandments. Her answer was that she did not know whether she followed all, but that she did try to live up to the First Commandment: "Thou shalt have no other gods before me." The practitioner, pointing to her glasses, said, "What are those?" and then showed her that the glasses were a false god, because she believed they gave her the power to see, and that she therefore believed in a power apart from God. Through the understanding that she gained she removed her glasses and was healed. Every time I heard this testimony I thought it was a miracle, but did not think it could occur to me, but the time came when I laid aside my glasses through a clearer realization of the above healing. Nausea has been overcome through the reading of the Sentinel. A severe case of poisoning which was manifested on my face was healed through the loving help of a practitioner, and I was healed in one night of a rash that covered my entire body.

I am truly grateful for all these physical healings but words cannot express my gratitude for the peace and joy that I have found through the study of Christian Science. I am thankful to God, and grateful to Christ Jesus, and to our Leader, Mrs. Eddy, and to the loving friends and practitioner who have helped me. I also wish to express my appreciation of our periodicals.

(Miss) Annie D. Winthrop, Boston, Massachusetts.

4

Christian Science has taught me that the true and living God does not send sin and sickness. This has been a great blessing to me, for it is so different from previous teaching. My home was on a ranch in the mountains. I had been ailing with heart trouble for a number of years and at last began to suffer from high blood pressure and fast failing sight. A physician was called and I was advised to go to an eye specialist, which I did, and he told me, after I had received treatment without any improvement, that he could not reach my case and advised me to go to a heart specialist in the city, which I did, only to be told that I had a leaky heart and that that was the cause of all my trouble. The heart specialists also told me that they could not cure me, but might help me, and that I must have a change of climate. I was given three or four different kinds of medicine and put on a strict diet. Meantime we moved from our ranch to the city. My condition was not much changed, and I was still taking the medicine.

In the place where I was living was a Christian Scientist. I noticed the Christian Science literature on his table, and I asked him if he was a Scientist; he replied that he was, and gave me a little book to read. It seemed good, but I did not understand it, and went to him and asked him to explain it, which he did, plainly and beautifully, and I knew I had never heard anything like that before. I could not stop at that but went and bought a copy of Science and Health and studied it, and with the loving help of the Scientist I was permanently cured of heart trouble and all other ailments. I destroyed the medicine and have never had any in the house since.

Later on a lump developed in my breast,—materia medica would have called it a tumor; but Christian Science has healed it and has overcome all my difficulties, for which I am most grateful.

(Mrs.) CAROLINE BOSTATER, Richmond, California.

Signs of the Times

["Medical Men Stand by Dry Law,"-From The Christian Science Monitor]

Action by the house of delegates of the American Medical Association, at its final session here, in passing a resolution disapproving of the misuse of the law which permits the prescribing of alcohol, places that organization on record against development of a beer traffic through the medium of the medical profession and serves notice on the liquor interests that the association absolutely refuses to lend itself to any movement which seeks to break down the aims of the prohibitory law. "Whereas," says the resolution, "reproach has been brought upon the medical profession by some of its members who have misused the law which permits the prescribing of alcohol, therefore be it resolved that the American Medical Association now expresses its disapproval of the acceptance by a small minority of the profession, of the position of being purveyors of alcoholic beverages."

This record, together with that made by the association in June, 1917, when the prohibition amendment was an issue before the states, is expected to silence any further efforts of the liquor interests to use the medical fraternity for furtherance of their campaign to discount the efficiency of the prohibition law and to prevent the circulation of propaganda designed to create an impression that the medical profession as a whole is committed to such policies as have been set forth by organizations like the Constitutional Liberty League. It is made clear that medical sympathizers with the liquor interests comprise a "small minority" of the profession and the association now goes on record in disapproval of any departure from a strict observance of the intent of the prohibition law.

[From "Something to Think About." by F. A. Walker in The Argus.

La Porte, Indiana]

An American explorer has just returned to civilization after a visit to the interior of Ecuador and the homeland of the Jibaro Indians. This tribe of head-hunting savages has lived in the same territory since long before Columbus discovered the Americas and has kept wholly free from the influence of civilization. The most striking evidence of their failure to advance in the centuries which have passed over them is, according to the report of the explorer, that the Jibaros do not believe in a God, but that they do worship devils. It is practically the universal history of the developments of all peoples from the savage state to that of civilization that the belief in devils precedes that of a belief in God. Before they conceive or deify a ruler in the realm of good they establish a kingdom of evil and nominate a being supreme in the management of one or all forms of danger and misfortune. Herbert Spencer in his analysis of human worship bases religion on the Unknown, declaring that the savage first worships those powers which he does not understand. It is the savage's inability, because of his savagery, to trace cause from effect that leads him to assign to totally unrelated things the cause for what he observes. . .

Each of us, highly civilized as we think we are, gives a tremendous power to evil. Despite the fact that we read in the Bible, and generally think we believe it, that the God of our civilized ideas is omnipotent—all-powerful—we immediately deny that fact by giving evil, which cannot be an attribute of God, equal or greater power. Practically everybody, unless we except Christian Science believers, thinks that sickness is much more powerful than health

and that death is certain to triumph over life. . . . Darkness is in itself nothing; it is only the absence of light. Silence is only the absence of sound. . . . The way to get rid of darkness is to let in the light. The way to get rid of evil is to let in and encourage good. Perhaps we should not blame the poor savage in Ecuador for failing to believe in God and having a liberal supply of devils. He has not yet been able to think out the truth. But we who are wiser and, we hope, better for that wisdom, should see to it that as little as possible of "devil worship" creeps into our existence and influences our lives.

[From The Boston Herald]

C. C. Taylor of Philadelphia, addressing the annual meeting of the American Medical Editors' Association, declared that no one wants state medicine. "One thing is certain," he said, "that the organization of medical practice cannot forever remain in statu quo in this rapidly developing twentieth century world. . . . Under compulsory health insurance the physician cannot keep his economic freedom and independence. Concrete experience in Europe has demonstrated that fact. Compulsory health insurance as the way out in avoiding state medicine was a new and startling thought to me."

This question the speaker declared to be one of the most important ones that has arisen in centuries. "For us here in America," he said, "it is essentially the question of whether the future development of our country is to continue to be based on the American principle of Anglo-Saxon individual initiative that has served us so well, or upon the idea of German socialism, which doesn't seem to be serving Russia particularly well at this moment. German socialism, and the ideas that have evolved out of German socialism, are apt, with superficial experience, to give an impression of tremendous efficiency. But to my mind they have one fatal defect: they fail to stimulate the growth of individual intelligence, initiative, and self-reliance; they fail to build men. To my mind, the ultimate failure of any plan of state medicine would be complete because of the progressive deterioration of the personnel of the medical profession that would result."

[From "Education for Citizenship," a Pamphlet Issued by the United States
Department of War]

In the past the traditional conception of training for citizenship connected it almost exclusively with training for political duties. So-called "civic education" has seemed to be either an indefinite thing with little that was practical about it, even when its aims were comprehended, or else a definite thing of narrow application which was so remote from the affairs and interests of ordinary life as to be of little general appeal. The chief emphasis has been laid upon rights rather than upon duties and responsibilities. Little emphasis has been laid upon the rest of the wide domain of economic, social, and intellectual relationships, all of them of fundamental importance in determining the disposition, character, career, and value of the citizen. . . . The citizenship of the polling booth is only one part, though a very important part, of citizenship. In the last analysis, a free government lives with the daily life of its people. There is thus a citizenship of the home, a citizenship of the school, a citizenship of business, a citizenship of the community.

Nowhere, apparently, until the recent past was there to be seen any evidence of any widespread conception of training for citizenship in this sense. To-day there is a growing recognition that the good citizen must be trained not only for his purely political relationships-duties, responsibilities, and rights-but also for his other relationships as well, and in no less definite fashion. The old type of civics, or citizenship course, no more accomplished the purpose of training than did numerous other branches of the curriculum; very often not so much. Training for citizenship, where it was actually accomplished in our schools and colleges, was a by-product of education. A study of such training reveals the absence of any specifications of the requirements of citizenship. In the professions, in the crafts, in practically every vocation of civilized mankind, there have been set up specifications of the achievements required before members are recognized as masters of their several vocations—in many cases before they can perform any of the tasks connected with them. A large part of the organized educational system of the world has been definitely designed to train for the achievement of the ends thus specified. No such specifications have been established for citizenship, which in a democratic community is the vocation of all.

The time has come to do for citizenship what has been done already for the professions and the crafts. This does not mean the setting up of formal requirements to which conformity is legally required, but it does mean a critical analysis and defining of the things involved in good citizenship, which may serve as a basis upon which to build up an effective system of training for the performance of its duties and the fulfilling of its various obligations as well as the enjoyment of its rights.

[From "Adult Education," by the Rt. Hon. Lord Ernle, M.V.O., in The Edinburgh Review]

It [education] is the strongest corrective to bias. Knowledge will not be content to remain one-sided; sooner or later it will pursue truth. . . . Thirty years ago, it was common enough to hear parents say that they did not "hold with" learning, or they did not wish their children's heads to be filled with "fool notions." That attitude has changed. Education is no longer ridiculed. . . . The demand by workers for adult education is one of the most hopeful signs of the times. The cooperation of labor and learning in the pursuit of truth means the readiness to face facts, to suspend judgment till reasonable certainty is available, to court the spirit of inquiry, to accept fair criticism, to tolerate differences of opinion.

[Principal of a High School on "Student Cooperation in Management," as quoted in *The Seattle Post-Intelligencer*]

We launch to-day an organization which may mean much to the future development of this school, but full realization of its great possibilities will depend upon the vision and ability of its officers and the fine cooperation of the student body. I honestly believe that the movement represented by this organization is here to stay, whether this particular expression of it is permanent or not, for it is the outgrowth of a growing conviction everywhere that the schools in a democratic society such as ours must do more toward the training of students in democracy by living democracy day by day. Do not be deceived. This does not mean Iess school discipline or greater freedom for students to do as they please. It means, rather, a different type of discipline; one that proceeds from within the heart of each student and is not superimposed by the faculty. In the last analysis, it ought to mean much greater freedom and liberty, arising out of a more general self-restraint and self-control. Paradoxical as it may sound, it is true, nevertheless, that the freest man in the world is he who practices the greatest self-control and self-restraint. In other words,

to be completely free one must have gained complete mastery over self. There are many paradoxes in the world and we must learn to know them. He is freest in the eyes of the law who is most completely subject to its precepts. . . .

As students interested in free and democratic government, we need to develop a discipline from within, a self-mastery to restrain us from doing certain things not because a teacher is watching, but because it is right. . . . Teachers, too, have a lesson to learn in this new departure. They must have greater faith in the young people about them. The failure or the weakness of the few must not shake their confidence in the many.

[Prof. George E. Dawson, Ph.D., in The Homiletic Review]

The solution of the problem of fear is unquestionably outlined in the words of John: "There is no fear in love; but perfect love casteth out fear: because fear hath torment. He that feareth is not made perfect in love." . . . First let us know that there is no such thing as perfect love that is not based on intelligence.

["The Church's Opportunity,"—From an address by the Bishop of St. Albans as reported in *The Luton* (England) News]

To-day, I believe, is a great one. We claim as Christians to have not merely a, but the, message of life as it is in Christ Jesus: the message of life for the individual, for the community, for the world. . . .

Our primary duty is to get people to think and to free themselves from prejudice (we are all full of it), for prejudice means judging or deciding a question before facing the facts; and that is largely the trouble to-day. We have got to get people to think, and, if possible, induce them to think, and, if possible, induce them to think rightly, and "rightly" means, for us, on the fundamentals laid down by Christ Jesus himself.

Notice

SHORT TERM SUBSCRIPTION AND ORDER RATES

Attention is called to the new rates now in effect on short term subscriptions for *The Christian Science Monitor*, Christian Science Sentinel, and The Christian Science Journal; also on single copies of the Sentinel and the Journal. These rates are stated in the advertisements found on the inside front cover page of the Sentinel and on page "iv" of the Journal.

Attention is also called to the rates scheduled below, now effective on all quantity orders for any one issue of any of the Christian Science periodicals:

Monitor\$.03	a copy
Sentinel	
Journal	"
Der Herold	"
Le Héraut	"
Quarterly	/2 "

These rates are net and take the place of the former 10% discount on periodical orders.

The uniform retail price on the Sentinel is now 10 cents a copy, and on the Journal 35 cents a copy. The Monitor single copy price remains at 5 cents.

Discounts to reading rooms on subscriptions and on orders for general publications remain as before.

Church Notices

From the Clerk of The Mother Church

Church Teners.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to Edward L. Ripley, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in *The Christian Science Monitor*, were run off at the time of their publication in the *Monitor*.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 81/4" x 103/4". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for *The Christian Science Monitor*, *Journal*, *Sentinel*, *Quarterly*, and *Heralds*, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and immediate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

There will be placed on sale in a short time six new pamphlets, containing articles reprinted from the Christian Science periodicals, as follows: "Government," "Employment," "Work and Play," "Progress," "Occupation," "Relationship." Orders for these pamphlets may be sent at once, to be filled on the date of issue. Price 5 cents a copy. Reading Room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, BOSTON 17, U. S. A.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder

of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Full leather. stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gift edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large Type (18-point) on Warren's heavy India Bible paper, bound in leather. Size 8 by 10³4 inches. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive. \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in The Christian Science Journal from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in The Christian Science Journal and Sentinel, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco. limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good. Rudimental Divine Science, No and Yes. Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error. elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single No and Yes. copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. volume, 94 pages. Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

VOLUME XXIII

JULY 16, 1921

NUMBER 46

Mary Baker Eddy

(Born July 16, 1821)

MARY BEECHER LONGYEAR

UNNUMBERED thousands, under God's bright skies That glisten nightly, since the shepherds saw The heavens illumed, and kneeling heard with awe The angels' song,—unnumbered thousands rise On earth to-day with happy fearless mien, In stately churches crowned with marble domes, In little scattered hamlets, simple homes, As witnesses to light from heaven seen.

The truth that Jesus taught Again to earth is brought; Sing praises unto God.

A hundred years in time have passed and gone Since in a room almost unknown to fame A feeble babe with God's own message came To wake sad earth with heaven's radiant dawn; With thoughts and dreams from brighter realms on high, Listening to angel voices when at play In upland pastures wild, she learned to pray And felt the motherhood of God near by.

This light from heaven to-day Shines on our earthly way; Sing praises unto God.

Maligned, ill-treated, driven far from home, Struggling with hunger, starved for loving care, Bravely she wrote her message. She could bear All for the sake of Truth and make no moan. She taught the starvéd ones who came for food That God is All and man his lovéd son, That evil, as a cloud rampant and dun, Could be dissolved by knowing God as good.

All ye who now believe,
Who healing will receive,
Sing praises unto God.
Death will be overthrown,
We worship Him alone;
Sing everlasting praises unto God.

[Written for the Sentinel]

The Founding of Christian Science

GUSTAVUS S. PAINE

THE one hundredth anniversary of the birth of Mary Baker Eddy, the Discoverer and Founder of Christian Science, is a fitting occasion for Christian Scientists, and the world in general, to consider anew what this century of spiritual achievement has meant to humanity. A century may be thought of as a stately division of earthly time or as a type of completeness. The events of any period are important only in proportion as they turn attention to Principle and illustrate how earthliness must give way to the completeness of Spirit and its idea. The human history that deserves recording is that which marks the subsidence of supposi-

tional evil because of the unfoldment of Truth. What Mrs. Eddy thought of personal history, we find explained on page 21 of "Retrospection and Introspection," where we read: "It is well to know, dear reader, that our material, mortal history is but the record of dreams, not of man's real existence, and the dream has no place in the Science of being. It is 'as a tale that is told,' and 'as the shadow when it declineth.' The heavenly intent of earth's shadows is to chasten the affections, to rebuke human consciousness and turn it gladly from a material, false sense of life and happiness, to spiritual joy and true estimate of being."

Because Mrs. Eddy herself, at what seemed an extremity of human need, in 1866, the date of the discovery of Christian Science, turned resolutely and gladly to infinite Mind as all the power there is, she was able thereafter securely to found Christian Science as the metaphysical truth which is to compass the complete destruction of sin, disease, and death through the replacement of all false belief with the spiritual idea manifesting Principle. In the passage just quoted, she continues: "The awakening from a false sense of life, substance, and mind in matter, is as yet imperfect; but for those lucid and enduring lessons of Love which tend to this result, I bless God." The way for the perfect awakening is open for all to take advantage of because of what Mrs. Eddy has done.

In appreciating Mrs. Eddy's achievements from 1866 to 1910, the years during which she was constantly active in the work of founding Christian Science, each one will find immense inspiration in the next sentences in this same passage in "Retrospection and Introspection": "Mere historic incidents and personal events are frivolous and of no moment, unless they illustrate the ethics of Truth. To this end, but only to this end, such narrations may be admissible and advisable; but if spiritual conclusions are separated from their premises, the nexus is lost, and the argument, with its rightful conclusions, becomes correspondingly obscure. The human history needs to be revised, and the material record expunged." The history of the founding of Christian Science consists of the unfoldment of the spiritual idea manifesting divine Principle.

The basic truth of Christian Science is that infinite Principle manifests itself infinitely. As her discernment and practice of Principle unfolded from 1866 to 1910, Mrs. Eddy made use of various means for giving Christian Science to the world. Seeing clearly that no one human way is adequate for the expression of all-inclusive Truth, she considered the customary methods for the propagation of ideals, understood the spiritual reality of which each such human method could be but counterfeit, and proved every step of her way forward in accord with absolute Principle. What impresses the careful investigator of the founding of Christian Science is, therefore, the completeness of her work, the consistency and yet the variety with which she expressed Principle and showed how Principle is to be practically utilized for the healing of all sorts of human ills and shortcomings.

Copyright, 1921, by The Christian Science Publi-hing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as second-class matter. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of October 3, 1917, authorized on July 11, 1918.

The story of her progress is essentially simple. She began by proving the goodness of God, infinite Mind, for herself and for others. Herself healed, she joyously ministered to the needs of those who sought her help, not only by the actual practice of healing but by teaching and by writing. In 1875, then, she published the first edition of the Christian Science textbook, "Science and Health with Key to the Scriptures," which she later repeatedly revised until its presentation of the truth was in the form finally to satisfy her and the world of sincere seekers. In the course of the thirty-five years from 1875 to 1910 she completed also, with continual revisions, her other works which are now published, in their most compact form, in seven additional volumes. As the need became apparent, she arranged for "A Complete Concordance to Science and Health with Key to the Scriptures," which has since been supplemented by the "Complete Concordance to Miscellaneous Writings, Manual of The Mother Church, Christ and Christmas, Retrospection and Introspection, Unity of Good, Pulpit and Press, Rudimental Divine Science, No and Yes, Christian Science versus Pantheism, Message for 1900, Message for 1901, Message for 1902, Christian Healing, The People's Idea of God, Poems, The First Church of Christ Scientist and Miscellany." Here, then, in her complete works we have the full revelation of Christian Science and the full opportunity for studying it with thorough consecration. The mere list of her works shows how infinite Principle is manifest as unlimited variety in her thorough presentation of Christian Science.

For years her own experience was crowded with the activity of healing, speaking, teaching, writing, and editing. In April, 1883, she founded The Christian Science Journal which she edited herself for a number of years. On September 1, 1898, she established the Christian Science Sentinel, which, however, for the first five weeks was known as the Christian Science Weekly. In 1903 she authorized the publication in German of Der Herold der Christian Science, which has since 1918 also been published in French under the name of Le Héraut de Christian Science. In 1908, after having seen for years the need of a newspaper edited and published in accord with Principle, she founded The Christian Science Monitor, an international daily newspaper, of which she writes in "The First Church of Christ, Scientist, and Miscellany," beginning on page 352, "My desire is that every Christian Scientist, and as many others as possible, subscribe for and read our daily newspaper," and on page 353, "The object of the Monitor is to injure no man, but to bless all mankind." It is interesting to see what thorough use Mrs. Eddy made of the printed word, as well as of the spoken word, in giving Christian Science to the world.

Meanwhile she had established in 1892 The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts, which is a reorganization of the original Christian Science church that dated from 1879. From time to time, as the unfoldment of Principle continued to be revealed to her, she provided for the organization of branch churches and societies, for a Board of Lectureship, for Sunday schools, for reading rooms, Christian Science organizations in universities and colleges, practitioners and teachers of Christian Science, Christian Science nurses, and a Committee on Publication. After founding the Massachusetts Metaphysical College and teaching in it for a number of years, she closed it for a time, later to reopen it with a Board of Education for the proper training of those qualified to give class instruction in Christian Science.

Thus a mere list of some of Mrs. Eddy's achievements in the founding of Christian Science is impressive. Perhaps no one thing shows more the thoroughness of her work than her provision for the church services that the Lesson-Sermon for each week should be published in advance in The Christian Science Quarterly Bible Lessons so that all may study them carefully before they are read in the public services. Along with the Sunday services, at which the Lesson-Sermons consist of correlative passages from the Bible and the Christian Science textbook, "Science and Health with Key to the Scriptures," she arranged for Wednesday evening meetings, to include, as she provides in the Manual (p. 122), "Experiences, testimonies, and remarks on Christian Science." From all these activities involved in the founding of Christian Science, even the casual observer can see how Mrs. Eddy was discerning the spiritual idea in place of mere human methods. In conformity with the unfoldment of Principle, a sense of disorder or limitation in methods had to subside.

The Christian Science Journal and Christian Science Scatincl from their founding to 1910 are full of evidence of Mrs. Eddy's divinely inspired energy. Understanding that one spiritual cause must necessarily be expressed as one spiritual effect, she was constantly replacing the false human sense of things with the truth. This is, in fact, the healing process of Christian Science. Every name, rightly used, must be a name for divine Principle or its idea, or else it is a name for nothing, since there can be nothing more than infinite Mind with its infinite manifestation. Idea, Mrs. Eddy knew and proved, must be harmoniously active in absolute accord with the one Mind which is its source. Mrs. Eddy's achievement is the presentation of this truth so thoroughly to the world that it must go on unfolding without possibility of obstruction throughout the true eternity, which is ever now.

Because the multitudes to-day are rejoicing in some understanding and demonstration of the freedom of infinity, Mrs. Eddy's centenary is indeed rightly celebrated by spiritual health and wholeness. As each one turns "gladly from a material, false sense of life and happiness, to spiritual joy and true estimate of being," Mrs. Eddy's work in discovering and founding Christian Science is rightly appreciated. Each year there is a constantly broadening comprehension of her achievement as each year more healing of sin, disease, and the various illusions of mortality is accomplished through the practice of Christian Science, which is not, however, merely a new system of alleviating ills but is actually the Comforter to reduce to nothingness every belief in matter by superseding it with the idea of Spirit. It forever remains, then, for each one to demonstrate in his living what every activity that she founded means for the blessing of humanity. In this way all can share in her love for the ever present Christ.

Taking Sides

LESTER DAVID EHMKE

WHEN Jesus commanded the disciples to cast their net on the right side, he certainly did not imply that an abundance of fish would necessarily be found on the opposite side of the dory; in fact, his meaning was far from that. It was needful for them to be taught to acknowledge God first as the source of all good, and when they did so success was at hand. There is no difference in Jesus' time and ours; every man, woman, and child is constantly under the injunction to cast on the right side. Scarcely an hour passes that we are not forced to take sides either in thought,

word, or act. How often one is asked, "Do you think it right to do thus and so?" Children, perhaps no more than their elders, are guided either consciously or unconsciously by the decisions or words of others. If every one could know the exact relation his example has to the lives of others, how infinitely more careful he would be to cast every thought on the right side. A doubting, hesitating, or faltering course does not give the needed support. In our daily dealing with one another it is therefore absolutely necessary to have a fixed standard of right ever at our command, lest we wrong or be wronged. Perchance one contemplates making a purchase at what he believes to be a bargain, and if the justice of divine Principle, God, has been given frequent hearing, it will not be long before the voice of justice is heard asking: "Are you sure that you are not trying to get something for nothing in this bargain? If such is your desire, you are entertaining a thief, and if he will steal for you, he will also steal from you. Now, therefore, choose."

So long as one must strive against false, educated beliefs, the command will be, "Choose you this day whom ye will serve." It would not be difficult to take sides were we in the presence of one who spoke slanderously of a true and faithful friend. To remain neutral in such a case is absolutely untenable, for such neutrality is nothing short of double-mindedness; but, on the other hand, honor, justice, and love would summon us to the defense with all the refutation and vigor of which we were capable. Are we as prompt to take sides for God when mortal mind speaks slanderously of His reflection, man, calling him deformed, sinful, and mortal? Do we side with mortal mind, forgetting that "one with God is a majority"? When error seems rampant and the day out of joint, the least we can do is not to add more weight to the false evidence.

Now the average person, accepting the term "Majority rules" as logically sound, has gradually come to believe that the majority therefore must be right, whereas in a scientific sense the majority is very apt to be entirely wrong, and this is so by reason of the crowd element of many minds. Was it not the majority which cried "Hosanna" in the first instance and "Crucify him, crucify him" in the next? One lone voice, however, lifted fearlessly above the tumult and fury of a mob has often been known to subdue those fears and passions and so avoid what might have ended in a panic or catastrophe. Surely, then, where one is with God or "where two or three are gathered together" in His name, there Principle reigns supreme. Though it seems paradoxical, still it can truly be affirmed that Principle operates most on the side nearest right; or as Mrs. Eddy clearly states it on page 168 of "Science and Health with Key to the Scriptures," "Whatever influence you cast on the side of matter, you take away from Mind, which would otherwise outweigh all else."

This choosing of sides is often of greater moment than we think. When Moses came down from the mount and found Israel worshiping the golden calf, he was so wroth that he broke the sacred tables of stone. Then quickly realizing his duty to God, he took his own stand and called out in no uncertain tones, "Who is on the Lord's side? let him come unto me;" and we are told that "all the sons of Levi gathered themselves together unto him." "You may know when first Truth leads by the fewness and faithfulness of its followers," writes Mrs. Eddy on page 225 of Science and Health, and further along she concludes, "There is always some tumult, but there is a rallying to truth's standard." Christian Science is furnishing us this standard of divine Principle and the moral courage to maintain it,

as well as the eternal evidence in support of its proof. Can we ask for more? Will this not supply us with profound interest in all that we do for ages to come? It assures us of progress and satisfaction; for it accords well with the teaching and practice of the humble Nazarene, the man who refused to be called even "good," for, said he, "there is none good but one, that is, God." When we see as Jesus saw, we no longer behold two sides, but only one, God's side, needing no argument nor proof other than the glory of its own effulgence.

Inquiring of the Lord

MARY H. CUMMINS

NE of the lessons which the student of Christian Science has to learn is the overcoming of self-will and the ability to challenge human desire. How often, before we knew the joy of yielding our human will to the divine, did we act largely upon mere human impulse. Human sense suggested "I want" or "I desire" or "this is best," and human will cooperating with it took possession of the field and swept all before it, frequently with entirely unforeseen and disastrous results. The Christian Scientist, however, is learning not to yield to impulse or suggestion without first inquiring of the Lord. The human sense of things rebels at this delay and argues loss of time, lack of determination, anything so as to be able to take the bit in its teeth and plunge ahead as of yore. But the one who is learning to test every impulse by the divine impulsion of Spirit will not listen to these arguments, but will quietly wait for divine direction and shape his course accordingly.

Many times we read that the prophets inquired of the Lord. Before they spoke to the people there seems always to have been a season of prayer, of listening for the voice of Truth, so as to be sure that the word which was spoken was not theirs but God's. Before they took a journey, or reached any decision of importance, time was taken to seek divine guidance, for only thus could they hope that their way would be prosperous and their mission untainted by self-will and self-interest. In Science and Health (p. 483) Mrs. Eddy says of them, "To those natural Christian Scientists, the ancient worthies, and to Christ Jesus, God certainly revealed the spirit of Christian Science, if not the absolute letter." The untempered human will is intolerant of restraint. Its handmaids are impatience, human manipulation, and human device. It will ride roughshod over everything and everybody in order to achieve its own ends, and due consideration for the rights and wishes of others is wholly lost sight of in the struggle. It was to this phase of thought that the psalmist referred when he wrote, "Be ye not as the horse, or as the mule, which have no understanding: whose mouth must be held in with bit and bridle." There we have the animal propensity in human nature which has no understanding of truth and which must be restrained by the bit and bridle of man-made laws. It is headlong, intractable, unteachable. All that such a condition of thought ever accomplishes, however, is its own destruction, a fact to which human history bears record in innumerable instances.

How different is the mental attitude which is daily learning to say, "Not my will, but thine, be done," and Mrs. Eddy defines this attitude still further when she says, "When the human element in him struggled with the divine, our great Teacher said: 'Not my will, but Thine, be done!'—that is, Let not the flesh, but the Spirit, be represented in me" (Science and Health, p. 33). What a sense of dominion

it gives one to know that he is learning not to yield to the impulse of human will, either his own or that of others, until he has taken the time to inquire of the Lord. How different our decisions would be in many cases if we quietly turned away from the clamor of human voices and listened only for the voice divine. Often after such a season of inquiry the very thing which a few moments before had appeared so desirable is no longer in the least attractive; the course which had seemed right is seen to be not the wisest after all. We begin to understand what the prophet Isaiah meant when he wrote, "And thine ears shall hear a word behind thee, saying, This is the way, walk ye in it, when ye turn to the right hand, and when ye turn to the left," and gladly and obediently we go forward, guided and protected by divine wisdom.

Time spent in inquiring of the Lord is time saved not wasted, for it will prevent our making many mistakes and having to retrace our footsteps, sometimes perhaps in sorrow and humiliation. But let us not when Love points out a certain path raise an immediate objection and say, "Oh, no, that cannot be the way!" because to human sense the path may seem straight and narrow, or because we may seem to be in danger of losing the companionship of those we love by treading it. A great many good Christian people have opened the Bible thinking that they were seeking divine guidance, and have merely read into the passage upon which their eyes rested confirmation of that which they had already made up their minds to do. It is quite possible when human will is clamoring for its own way, and bringing every argument and suggestion to bear in order to convince us that it is the right way, to read into a verse of the Bible indorsement of the course we wish to follow. If our human will is first laid down, however, the divine voice will speak to us through the inspired Word and we shall not miss its import. Sometimes it is wise to put the whole question out of thought for a while, after we have earnestly sought the divine guidance. This supplies the opportunity which we so often fail to provide, and of which we stand greatly in need, of quietly listening for the voice of God. As some one has truly said, "One cannot hear the voice divine while he is chattering mentally," and it is certain that he cannot do so while he is lending a willing ear to the dictates of human will and desire.

Sometimes we make the mistake of trying humanly to combat self-will either in ourselves or others, and thus we only seem to make it all the stronger. The wiser course is to depend lovingly and trustfully on divine Principle to deal with this false claim for us. This will immediately relieve us from any sense of strain and bring into our experience the joy of complete surrender to divine Love's demands. All that the mortal sense of things ever accomplishes is to get into the way of the divine, and not until this is laid down can God's will and way appear for us. How many times when we have thus trustingly and lovingly yielded our way to the Father's has divine Love poured into our lap exceeding abundantly above all that we could ask or think. Often the blessing comes so quickly upon the heels of the surrender that it almost takes our breath away. Sometimes, too, the sacrifice which we were willing to make is not required of us, as in the case of Abraham when he was willing to offer up Isaac. But the one thing that is required of us is that we shall daily and hourly inquire of the Lord, for only thus are we safe, only thus do we avoid the pitfalls which the carnal mind would set for us.

He who is learning to wait upon God for guidance gains

a poise and strength not easily shaken. He constantly turns away from the babel of human voices and listens for the voice of God. He is willing to follow the path which divine Love points out, no matter how few travel with him, or even if for a while he seems to tread it alone. He constantly tests his thinking and action by the Bible, the Christian Science textbook, "Science and Health with Key to the Scriptures," and all of Mrs. Eddy's other works, including the Manual of The Mother Church, knowing that the inner voice of Truth can never lead him away from these; and he rejoices to find that as he predicates his life and thought more and more upon the Sermon on the Mount he fulfills the demands of divine law with an ever increasing naturalness and spontaneity. The promise of the psalms, "I will instruct thee and teach thee in the way which thou shalt go: I will guide thee with mine eye," is fulfilled in his experience, and because he is willing to be taught and guided by Principle alone he pursues his way with confidence and joy, knowing that if he should make a mistake and take the wrong course the Mind which makes no mistakes, and consents to none on his part, will lovingly guide him back

How beautifully this attitude of inquiring of the Lord was expressed by our Leader in the lines (Poems, p. 14):—

Shepherd, show me how to go
O'er the hillside steep,
How to gather, how to sow,—
How to feed Thy sheep;
I will listen for Thy voice,
Lest my footsteps stray;
I will follow and rejoice
All the rugged way.

On page 254 of Science and Health she writes, "When we wait patiently on God and seek Truth righteously, He directs our path." It is well that we should earnestly ponder these words, for never have we stood in greater need of individual and collective inquiry of the Lord than we do to-day. Let us be sure that every question which is presented for our consideration is considered not alone from the standpoint of human wisdom and human expediency, but that it shall be made the subject of prayer, that every decision may be a prayerful decision. The consequent cleansing of our thoughts and motives will well repay us. It may mean that we shall be sifted even as grain is sifted, but it will mean purification of purpose, a more tolerant attitude toward all those who name the name of Christ, a more single eye for the glory of God. When each important step is a step taken as the result of prayer and fasting, then and then alone can we be sure that our motive is pure, and then can we with trust and confidence commit the issue to God.

The One Protection

11.0

ż

ALICE K. METZ

A STUDY of the life of Joseph as given in the last fourteen chapters of Genesis, in which is described his marvelous protection during trials of the most severe nature, together with correlative references on the subject of divine protection as found in "Science and Health with Key to the Scriptures" and other writings by Mrs. Eddy, brings out many helpful facts as to what this protection consists of and what the human family needs protection from. The hatred and jealousy that induced Joseph's brothers to sell him to the Midianite merchantmen; his blameless, consecrated life while living in Egypt, and his loving, forgiving attitude toward his brothers in later years when he provided their supply during the years of famine, are all

familiar incidents to Bible students. We find in this record no account of hatred or retaliation on Joseph's part. Had it been otherwise, how different might have been the ensuing history of his immediate family and of the entire Jewish race. On the contrary he was finally able to say to his brothers in the spirit of tender forgiveness, "Now therefore be not grieved, nor angry with yourselves, that ye sold me hither: for God did send me before you to preserve life. . . . So now it was not you that sent me hither, but God." Small wonder that such an attitude of humility and selflessness made him a prosperous man, overseer in Pharaoh's house, and that "the Lord made all that he did to prosper in his hand."

This narrative, like all others in the Bible, would be merely interesting reading and of no particular value to us could we not understand and utilize this same sure protection in our own day. Joseph's state of thought is well described by Mrs. Eddy on page 571 of Science and Health where she says: "At all times and under all circumstances, overcome evil with good. Know thyself, and God will supply the wisdom and the occasion for a victory over evil. Clad in the panoply of Love, human hatred cannot reach you." The writer will never cease to be grateful for the first ray of light that was shed on this statement years ago by a Christian Science practitioner. A certain difficulty was being talked over, and the writer stated that she was using this thought of a panoply as protection against malicious mental malpractice. The practitioner immediately asked, "But what is this panoply but the clear understanding that because God, Love, is All, hatred is unreal, therefore powerless?" What a different view this presented to thought from that of being protected or covered, by some thing, from some thing.

On this subject of protection as on all others relating to human experience, one of the most important things to achieve is the elimination of the belief of a selfhood apart from Mind and its idea, either as an I, he, she, or it, for it is only this false sense of self that can either harm or be harmed. One of the rules for accomplishing this achievement is given by Mrs. Eddy in Science and Health, beginning on page 476, where she tells us that "Jesus beheld in Science the perfect man, who appeared to him where sinning mortal man appears to mortals." And it is only as we, too, grow to understand and see, through the teachings of Christian Science, this perfect man, that we are able to utilize this panoply of scientific protection as he used it for himself and others in every phase of danger that mortal mind could devise. And why? Because it is impossible to appropriate to our use this unfailing panoply while believing in hate or a hater, in sickness or sin. It is surely as unscientific to see a fellow being in bondage to hatred or malice, sorrow or disease, and to call such a manifestation of belief man, as it is for the individual under these illusions to feel them. This brings the fact squarely before us that we are protected only as we protect, as we reflect that Love which protected Joseph and all his brethren, and with which Jesus healed the sick and the sorrowing, the Love that knows and sees only "the perfect man."

1.

10

This understanding of protection is applicable not only in the case of errors of hatred, envy, and revenge, but in every phase of the belief of a self or a governing law apart from God. It is our only defense from suggestions of sickness or sin, danger or limitation of every name and nature, for it necessitates the constant realization of perfection, at all times, everywhere, and in all circumstances. It involves affirming about ourselves and others only what we would

affirm about God. This is indeed approaching the understanding of that Love that "casteth out fear." The human family needs such constant protection against the suggestion that disease is physical and real and that it can destroy life, and the constant reminder that it is always merely false belief about God, man, and universe, no matter what form it assumes. We need protection from the unthinking use of those subtle words "return" and "again," for in the light of divine metaphysics there are really no such words. That which is, being all there is, all that ever has been or ever can be, can naturally neither be again nor can it return.

No healing has ever been brought about in Christian Science except by proving the nothingness of the specific error. Now how can nothing return, or that which has never been be again? If we would immediately exchange the first suggestion of a return for the understanding of the little word "is," holding thought steadfastly to the fact that this means God, self-existent being, good, we would experience more and more quickly the power of Truth. This reminds us of the necessity of guarding our thoughts about the past dreams. Our beliefs about the past largely determine our acceptance of a possible future, for whatever has been most certainly can be again. And so in every time and sort of trial, when this understanding of man's oneness with God is realized and applied patiently and persistently as being all that is true about a past, a present, or a future, always and everywhere, it proves a sure panoply, an invincible armor.

No one need hope to escape these trials of faith and understanding. Even now we are going through the experience described by Julia Ward Howe in her "Battle Hymn of the Republic":—

He has sounded forth the trumpet that shall never call retreat; He is sifting out the hearts of men before his judgment-seat: O, be swift, my soul, to answer him! be jubilant, my feet! Our God is marching on.

Christian Scientists are being called upon to use and reflect all that they know about the allness of God and to reach that understanding of Life of which Mrs. Eddy speaks on page 42 of "Unity of Good," where she says, "With Christ, Life was not merely a sense of existence, but a sense of might and ability to subdue material conditions." Just in proportion as we gain this understanding are we clad in the panoply of Love, the consciousness that there is nothing outside of or beyond infinite, omnipresent good, health, happiness, and perfect peace.

[Written for the Sentinel]

Obedience

BETH HUGHES D'AETH

The day seemed dark and full of gloom,
Athwart the sky the shadows fell,
My weary heart gave doubt full room
And none seemed near that I could tell.
"Be still and know that I am God,"
An angel whispered; I obeyed
That blest command, and realized
His wondrous power. My doubt was stayed.

When doubt had fled I heard a voice
Proclaiming straight from harmony,
"Rejoice! again I say rejoice!"
And as I heeded I was free;
Oh blessèd day of liberty!
The sun shone golden in the blue,
Caroled the birds a glad refrain;
Rejoicing, I found all things new.

A Great Leader

TRUE leadership is one of the greatest of qualities. Because of this it is also one of the most uncommon. It requires a degree of self-abnegation which is rarely met with, and it requires likewise an understanding of Principle which is coincident with the self-abnegation. The great leader is, therefore, as rare as the great man. Thus you may have a great soldier, like Napoleon, who is morally deficient in the virtues which go to make a great man. Napoleon, in particular, had the power of dominating those who came in contact with him, but his leadership was not true leadership, because it was instinct with self-interest. Thus the very limitations which prevent him being a great man, prevented him being a truly great leader. Washington and Lincoln were great men and great leaders. If you should search the annals of history you would not find greater. The one led his country in a tremendous revolutionary struggle for freedom, the other led his country in a terrible struggle to prove whether it, having achieved freedom, should impose slavery on others.

Twelve years after Lincoln was born in Kentucky, there was born, on a New Hampshire farm, a woman who was to surpass Washington or Lincoln in the power of leadership, and whose work was to free human thought as theirs had been to obtain political and social liberty. Mary Baker, afterwards Mrs. Eddy, was the daughter of one of the Puritan farmers of New England. Born of the Puritan stock, trained in the Puritan tradition, she became through this ancestry an inheritor of the Puritan ideals, ideals in which truth and liberty were regarded as the hallmarks of the state. Mrs. Eddy, however, possessed qualities far above these. Truth, purity, self-sacrifice, liberty, these were the breath of her nostrils. In addition to all this she was endowed with an understanding of Principle which had not been seen since the first century. She was a leader not of the type of Napoleon or Cæsar, rather of the type of Washington or Lincoln, but she surpassed these in the clarity of her metaphysical understanding, an understanding so clear that on page 34 of her Message to The Mother Church for 1901 she was able to say, "Finally, brethren, wait patiently on God; return blessing for cursing; be not overcome of evil, but overcome evil with good; be steadfast, abide and abound in faith, understanding, and good works; study the Bible and the textbook of our denomination; obey strictly the laws that be, and follow your Leader only so far as she follows Christ." This saying she repeated on page 4 of the Message for the following year, "Competition in commerce, deceit in councils, dishonor in nations, dishonesty in trusts, begin with 'Who shall be greatest?' I again repeat, Follow your Leader, only so far as she follows Christ,"

It was this quality in Mrs. Eddy's leadership, a quality which assured her followers that she really desired them to follow Christ rather than herself, which made her the tremendous moral force she is in the world. Envy, hatred, malice, and all uncharitableness, might whisper perpetually that she was not what she seemed, might dip its venomous tongue in scandal and bear false witness recklessly, but all this was futile in its intent because she understood the meaning of the gospel she preached, namely, that a man had no enemy but himself, inasmuch as she saw that every malicious utterance was merely the sting of the viper turned against itself, since the man armed with Truth was immune from successful attack. "Simply count your enemy," she wrote, on page 8 of "Miscellaneous Writings," "to be that which defiles, defaces, and dethrones the Christ-image that you should reflect. Whatever purifies, sanctifies, and consecrates human life, is not an enemy, however much we suffer in the process."

Any person who has ever been brought in close contact with the so-called world leaders and with Mrs. Eddy, must have been instinctively aware of the difference between them. Mrs. Eddy was never asking anything for herself; with the world leaders "I" was a considerable factor. The world leaders strive with arguments, threats, or promises to get their ends achieved. Mrs. Eddy was content to rest on Principle and leave Principle to work it out. She was so convinced that the earth was the Lord's and the fullness thereof, that she had never any doubt about the final issue of an undertaking. Her first and last question was, Is it right? Imagine the policy of a Napoleon or a Cæsar tried by the same standard, and the difference becomes evident in a moment. But the real triumph of Mrs. Eddy's leadership lay in the fact that she did not doubt the victory of Principle. Washington and Lincoln had terrible moments when it must have seemed to them that failure was inevitable. Such moments were impossible with Mrs. Eddy. Because she understood the omnipotence of Principle, she knew that success was inevitable. Thus she filled all those who worked under her with a confidence which probably no leader, since the days of the first century, has ever given. Those to whom she issued her requests, not commands, knew that she was never asking from them the impossible, and knowing this they went out with the conviction of success to achieve something, not in their own might, but by reason of the might of Principle.

If Mrs. Eddy had been animated by the wish of glorifying herself, the Christian Science movement could never have been built up. Its very nature was one which could never appeal to a self-seeker. A great English publicist once declared that three times in her life she had taken steps which any sane business man, lawyer, or politician, would have regarded as suicidal, yet in each case the event had absolutely justified her. In each of these decisions, he declared, she had left the human factor out of consideration altogether, and left it out of consideration so completely that any other human being would have said that even if she were right she was attempting the impossible. What the critic absolutely failed to see was that Mrs. Eddy knew that right was possibility, and that the only certainty of defeat lay in doing what was wrong. "And I, if I be lifted up from the earth, will draw all men unto me," Christ Jesus had said. There is the greatest test of leadership in the world, given by the greatest man that ever trod the planet. In her steady and persistent effort to walk in the footsteps of the Christ, Mrs. Eddy had grasped more clearly than any one else the absolutely practical signification of those words. To be a real leader it is necessary to be lifted up yourself. You may have a following; Cæsar and Napoleon had that. The one refused the purple because he feared to

take it. The other took it greatly fearing. The result was very much the same in either case. Never did Christ Jesus draw more men unto him than when he was lifted up upon the cross, a condemned felon. The followers of Cæsar, in the words of Shakespeare, turned to clay, may have filled innumerable holes to keep drafts away, but that is all. Yet nineteen centuries after Cæsar's day the followers of the Prophet of Nazareth are spread all over the world, simply because he, being lifted up, drew all men unto him.

It was Mrs. Eddy's perception of all that this meant which made her so splendid a leader. Of course, she was mocked and reviled in her own day; that is the effect of the hopeless littleness of the human mind. It always thinks that it can defeat Principle by lying and slandering person. Its defeat of itself is insured in the process. The God-inspired, the man who understands Principle, goes forward steadfastly and unmoved, to certain victory. Mrs. Eddy knew this, and never faltered in her course. She led by learning how to follow, and she won the faithfulness of her followers by being worthy of it. This was the secret of her leadership.

FREDERICK DIXON.

The Nail in the Sure Place

One phase of the overturning that has been going on throughout the world is a questioning of the Bible by those who consider themselves modernists in philosophy, literature, and general thinking. Why, it is asked, should the literature of the Hebrews, consisting of historical accounts, poetry, dramatic dialogues, essays, and epigrammatic precepts, be accepted by the modern world as divinely inspired for the guidance of daily living? Why should even the comparatively brief records of the New Testament be considered canonical, while many other similar writings are regarded as apocryphal? Why should not the records and the literature of the ancient Egyptians or Chinese be deemed of equal inspiration? For an answer to these questions, one who understands how Principle governs man needs only to point to the fruitage of the acceptance of the Old Testament and the New Testament as the inspired Scriptures.

The test of inspiration is demonstration. The reason why the Bible continues to guide the living of an increasingly large part of humanity is that the Hebrews, or at least the real thinkers among them, discerned enough of absolute Principle to put it into practice more than other nations of the ancients. With the Hebrews peculiarly there was a real expectation that the Christ, the Savior from every form of imperfection, would be manifest to them. In other words, they were eagerly expecting the sureness of Spirit, the true stability of Life, to take the place of the flux of discords in ordinary mortal affairs. This ideal they stated with splendid variety of language in both their histories and their prophecies, because it was continually active in their thoughts. Finally, then, the Christ was indeed manifest in their experience, in just the way that was right for their time and circumstances. Through all of their struggles with materiality suggesting itself as desirable and real to them, the inspiration of one intelligent Principle, one all-powerful God, was present as with no other people of ancient times, because of their earnest turning in the right direction. In proportion as they actually relied on the one ever loving Principle, they were successful in proving spirituality; and in proportion as they failed to depend on the true God, they found a further fight against materiality necessary.

Earnestly looking for the rulership of divine intelli-

gence to stabilize their own government, they tended to outline that the Christ would appear to them as a person, a great king and successor of the prophets who would maintain perfect peace and joy for all with absolute equity. When any of their kings or prophets did show more than ordinary goodness, they thought of these as at least prefiguring the Christ, and celebrated their gladness in chronicles, poetry, and further prophecy. As an example of this prefiguring of the kingdom of the Christ, it is interesting to compare the twenty-second, the thirty-sixth, and the thirtyseventh chapters of Isaiah with the eighteenth and nineteenth chapters of II Kings. Here we see that Eliakim, the son of Hilkiah, was one of those who by considerable real consecration to Principle prepared the way for the full coming of the Christ. Of him Isaiah declares: "Thus saith the Lord God of hosts. . . . I will call my servant Eliakim the son of Hilkiah: and I will clothe him with thy robe, and strengthen him with thy girdle, and I will commit thy government into his hand: and he shall be a father to the inhabitants of Jerusalem, and to the house of Judah. And the key of the house of David will I lay upon his shoulder; so he shall open, and none shall shut; and he shall shut, and none shall open. And I will fasten him as a nail in a sure place; and he shall be for a glorious throne to his father's house."

Now the "nail in a sure place" was, of course, merely a type of the stability of Principle for which they were looking, as we see where Ezra says: "And now for a little space grace hath been shewed from the Lord our God, to leave us a remnant to escape, and to give us a nail in his holy place, that our God may lighten our eyes, and give us a little reviving in our bondage." Yet it was obviously futile to think of any mortal as the nail in the holy place, the unerringly reliable manifestation of divine Love. The futility in the case of Eliakim is clearly set forth in the laconic pronouncement of Isaiah that closes the chapter quoted: "In that day, saith the Lord of hosts, shall the nail that is fastened in the sure place be removed, and be cut down, and fall; and the burden that was upon it shall be cut off: for the Lord hath spoken it." Only the Christ, the spiritual idea or activity eternally manifesting divine Principle for the complete replacement of every human belief in imperfection, can ever satisfy.

In reality, the Christ, the infinite idea in infinite Mind, has always been present to satisfy with spiritual completeness every right desire. Sooner or later all must learn the lesson of looking to the divine Mind and its spiritual expression instead of to mortals for any benefit whatever. When a man or woman has discerned something of Principle and demonstrated it in his experience, what has taken place is that just so much of the illusion of mortality has been superseded by immortal action. It is this immortal action that is to be appreciated as the expression of divine intelligence. In the study of the Bible, then, or in the consideration of human affairs to-day, the work of each one is to understand Principle and its idea as the only reality, and to prove this understanding in living. The vitality of the Scriptures is indestructible; but now, as of old, the seeker for the truth needs to turn away from the mortal sense of things to the eternal verity of which all human experience is but the counterfeit. As Mrs. Eddy says on page 41 of "No and Yes," "There are sinners in all societies, and it is vain to look for perfection in churches or associations. The life of Christ is the perfect example; and to compare mortal lives with this model is to subject them to severe scrutiny." GUSTAVUS S. PAINE.

Special Announcement

The Trustees of The Christian Science Publishing Society announce with sincere regret the resignation of Mr. David B. Ogden, who thus completes 13 years of service with the Publishing Society, as Business Manager and Trustee. Mr. Ogden's letter of resignation is as follows:

"Messrs. Herbert W. Eustace and Lamont Rowlands, Trustees— "Dear Friends:

"For some time past I have been considering the placing of my resignation as Trustee of the Publishing Society, but because of the fact that for more than 13 years I have been connected with the work of the Society, first as Business Manager and latterly as Trustee, I have felt I should withhold my resignation and do what I could to help sustain Mrs. Eddy's Deed of Trust, which created the Trustees of the Publishing Society, that when this deed was attacked placed upon them the responsibility of carrying forward that part of the great work conceived by our Leader, Mrs. Eddy.

"Now that the litigation between the Trustees and the Directors is concluded, and preceding final decision of the Supreme Judicial Court of Massachusetts, I feel I have fulfilled my duty and I therefore now tender my resignation as Trustee and respectfully request its acceptance at your earliest convenience.

"I desire to express my deep appreciation for the privilege of serving the Society and for the kindness and consideration shown me by my associate Trustees.

"Yours sincerely,

(Signed) "DAVID B. OGDEN.

"June 25, 1921."

The resignation became effective June 30.

The Trustees of The Christian Science Publishing Society announce the appointment of Mr. Paul Harvey of New York City as Trustee of The Christian Science Publishing Society, to fill the vacancy caused by the retirement of Mr. David B. Ogden, announced in The Christian Science Monitor, Friday, July 1.

Mr. Harvey was born in Chicago, Illinois, and attended the School of Painting, Chicago Art Institute; also Marietta College, Marietta, Ohio; Harvard University, Cambridge, Massachusetts; and the University of Chicago. After leaving college he was actively engaged in business in Chicago for a number of years, during the latter part of which time he was associated with the firm of Lee, Higginson & Company. For many years Mr. Harvey has been an earnest and consecrated Christian Scientist, and for a number of years has devoted his time exclusively to the interests of the Christian Science movement. Mr. Harvey is the son of Turlington W. Harvey, who was one of the pioneer business men of Chicago and the founder of the town of Harvey, Illinois, which bears his name.

The appointment became effective July 5, 1921.

Testimonies of Healing

I wish to express my gratitude for the benefits I have received through Christian Science. Before receiving my first treatment I was an agnostic, but with great joy I realized that there is a God and one we can rely upon at all times for help. I was healed of a chronic back trouble from which

I had suffered for years. I tried all kinds of medicines and doctors but they were of no avail. The tobacco habit of twenty-eight years' standing left me while I was reading "Miscellaneous Writings" by Mary Baker Eddy. I am living with my family on a homestead thirty miles from the nearest railroad, and I have found the Christian Science literature very helpful. Through a right understanding of God I have overcome many difficulties and have seen with joy the overcoming of disease in animals. I am thankful to God for leading me to this great truth.

GEORGE CARNEY, Anselmo, Alberta, Canada.

4

I am indeed grateful for Christian Science and all it has done for me. I first had treatment for constipation, and although my healing was not instantaneous I am grateful, for had it been I probably would not have given Christian Science the thought or study that I have. I had always been subject to malaria, colds, and similar ailments whenever in the South. These simply passed away without treatment during my study of the textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy. Our baby boy, who was born under Christian Science treatment, has known nothing else, and has been untouched by the numerous material laws supposed to govern babies. For this and many other proofs of God's help I am indeed thankful; also for our literature.

(Mrs.) Nainlee L. Pharr, Memphis, Tennessee.

4

It is a number of years since I was given up by the doctors, who said that there was no help for me, that I had inflammation of the liver and stomach, and valvular heart trouble. My husband had taken me to New York to see three specialists, who also said there was no help for me and simply told me to be just as careful as I could. After everything possible had been done I turned to Christian Science for help. At that time I had to be lifted about in bed, but after a practitioner had explained Christian Science to me somewhat, I was willing to give up and trust all to God. In less than one hour I got up out of bed well. The next day, when friends came who had heard that I was dying, I cooked dinner for them. I have not taken medicine from that day to the present time, but have relied wholly on Christian Science.

I had been a member of a denominational church since girlhood but was never satisfied, nor did I get the satisfaction I desired from the study of the Bible, until I became interested in Christian Science. Both my husband and I have had many wonderful demonstrations. We know that all ills can be overcome through the understanding of divine Principle, God.—(Mrs.) Ada Painter, Sparks, Nevada.

This above testimony is true in every particular. I too have relied wholly on Christian Science since my wife took up the study of it, and have found the Christian Science church the first church in which I have ever been wholly satisfied. I too have had several wonderful demonstrations during the time that I have been interested in Christian Science. I am very thankful for what Christian Science has done for both my wife and myself.—WILLIAM PAINTER.

4

I will endeavor to express my gratitude for Christian Science and to those who have so kindly assisted me. I am so grateful to the practitioner who brought the message of Love to one who was utterly cast down, and to all who

have been so kind in supplying me with Christian Science literature. It was through the help of these kind people that the most wonderful change was brought about in our home, and my heart is overflowing with love for God and gratitude to our dear Leader, Mrs. Eddy. Before coming into Christian Science I suffered from many diseases, and doctors had told me that they could not cure me. I had given up all hope of ever being a well woman again, and felt as though I had been forsaken by all my friends and that because I was sick they did not care to be bothered with me. I thought that God had sent sickness upon me because of my sins, and that He would not heal me. When I read the Bible I could not understand it, but thanks be to God a new light has dawned upon me, "old things are passed away; behold, all things are become new." is the new birth, and these are my happiest days.

When I came into Christian Science it was with the hope that I might be healed of my physical ailments, but through the study of Mrs. Eddy's writings I have not only been healed, but I have gained some measure of understanding of the spiritual teachings of the Bible. Words cannot express my gratitude for the peace "which passeth all understanding." I first started out in search of health, but I have found something that is far greater than all else, a God who is ever present Love.—(Mrs.) Sadie Scully, Tulsa, Oklahoma.

Christian Science came to me a good many years ago, and found me among those referred to by our revered Leader, Mrs. Eddy, on page 570 of "Science and Health with Key to the Scriptures" where she says, "Millions of unprejudiced minds-simple seekers for Truth, weary wanderers, athirst in the desert-are waiting and watching for rest and drink." My church did not satisfy me for it did not answer my questions about God. After investigating several other denominations I came to the conclusion that I would have to wait until I passed into another world to find out the why and wherefore of it all. At this time I had been under the care of physicians for three years, and was told by three that the stomach trouble from which I was suffering had become chronic. One Christian Science treatment healed this condition, and since that time Christian Science has been my only physician, and it has never failed when faithfully applied, no matter what the problem was.

A severe case of the grip was completely overcome in a few hours, although before coming into Christian Science a similar attack had kept me in bed for ten days and for months afterwards there was a great sense of weakness. At another time, on my way to business I had a bad fall on the stone pavement. Some men ran to my assistance, but before they reached me I was able to get on my feet. For three days I attended to all my duties, although unable to eat or sleep on account of extreme pain. Several times I was tempted to ask for aid from a Christian Science practitioner. On former occasions of need I had always done so but this time I wanted to prove for myself that "God is no respecter of persons," and my faith was justified, for on the morning of the fourth day I awoke, after one hour's sleep, entirely free from pain, and with a feeling of confidence which I would not have had if I had asked for help. Up to this time I had not looked at the part of my body which seemed most affected, and was glad that I had not done so, as there would have been a great deal of fear to overcome, for the condition seemed most serious. But day by day this faded away and left nothing to remind me that I had ever had such an experience.

I can recall many healings, physical and otherwise, but in common with all Christian Scientists, the spiritual awakening is what I am most grateful for. I am being healed of criticism and resentment, and am learning more and more to see the real man of God's creating. I give thanks to God, and my gratitude goes out to our blessed Way-shower Jesus the Christ, to our beloved Leader, Mary Baker Eddy, and to all who are following her as she followed Christ.

(Mrs.) MINNIE CLARKE, New York, New York.

It is with deep sincerity that I give thanks to God for all the benefits that He has bestowed upon me, and which I rejoice in more and more each day since I perceived the truth. Thanks to Christian Science I have been delivered from very serious moral and physical troubles, and I shall be profoundly happy if I can contribute to the consolation of any suffering heart.

A few years ago, much weakened morally and physically, I was suddenly struck down by congestion of the brain. My condition was very serious, to mortal sense, and left no hope. I was at Geneva at that time, and a friend there, alarmed at this condition, which was growing worse, brought me one day a small pamphlet published by The Christian Science Publishing Society in Boston, of which I did not understand much owing to the state of mental depression in which I then was. However, by instinct I clung vaguely to what was offered to me, with an intense desire for something true and good. In this research I used the little strength that remained to me. It was then that general paralysis, which had been feared, began rapidly to develop. Totally deprived of speech, it was in complete coma that I was carried to the hospital. The doctors used the remedies usual in such cases, but according to them no hope re-

During this time a Christian Science friend who took an interest in me worked for me in Christian Science tirelessly and with boundless devotion. The result was that at the end of two days I woke up from this long sleep realizing where I was but not being able to speak. My memory returned, accompanied by a light so distinct that I at last felt my desire realized. I understood that I was in God's hands. Feeling myself sustained I accepted the situation, with joy and patience. Ten days afterwards I was able to walk, to employ my hands for any delicate work, and to speak almost correctly. My joy was only equaled by my gratitude. All the troubles disappeared gradually like a bad dream. My strength and happiness were harmoniously established, and they increase in proportion to my understanding. Since then I have been able to fulfill happily and from day to day the ordinary duties of life, supported in times of difficulty and trouble by the truth. I have confidence, and turn in every emergency to God who governs all with love.

I thank God for the certainty of happiness which He places within our reach along the way that He reveals, for the blessed peace which He has given us, and for all the good which He bestows on us. I am grateful to Mrs. Eddy, our dear Leader, who by her clear and exact instructions directs us in this way of Truth and Love, giving us all courage to be reformed morally and physically. I am grateful to all my friends who have helped me so much to understand more clearly the beauty of this treasure, Christian Science, which satisfies all the aspirations. I am especially grateful to the practitioner who devoted herself with such loving care that nothing discouraged her, and whose great kindness sustained and guided me in my uncertain

steps at the beginning. I am grateful for my progress in understanding, for the intuitions that assure us of God's ever presence, that He protects us under all circumstances, and loves us. I am grateful for the great joy felt in reading our precious textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, translated into French, thinking of all the good that those who have waited so long are now drawing from that source, and I am also grateful for the French periodical, Le Héraut de Christian Science, bringing us such comforting reading and helping us to realize in our experience the ever presence of good.

(Miss) NITA VALDER, London, England.

4

Christian Science came to us several years ago, and during this time we have had many beautiful demonstrations. During the influenza epidemic my daughter and I were healed in five days of a severe attack and we did not suffer any after effects. My daughter was healed of a fractured collar bone, most beautifully and perfectly. She played at a piano recital just one week after the accident occurred. We are sincerely thankful to God and grateful to Mary Baker Eddy for the new-old truth which does make free.

MRS. WILLIAM S. AUGSPURGER, Franklin, Ohio.

4

With a desire to express my thankfulness to God, and with appreciation of Christian Science, which heals all our diseases and brings peace and happiness, I am writing this testimony. I first turned to Christian Science for the healing of appendicitis. Our doctor had engaged a room for me at the hospital and had made preparations for a surgical operation, but that evening a friend called and told me of the healing power of Christian Science. I decided to try it and immediately called a practitioner, and I was healed in three treatments, not only of appendicitis but of other severe ailments that had caused me untold misery since my first child was born several years before. Since then there has been no return to the use of material means. An abscess on the brain, scarlet fever, and many other ills have been healed through the truth.

I am thankful for the physical healing, but more so for the spiritual understanding I have gained and for the proof of God's nearness to us and His willingness to help us in all ways, and my desire is to help others to know the truth which Mrs. Eddy's revelation has made available to all. I wish all might have the *Scntincl* in their homes; it is such a help, and through it we learn of the good others receive, bringing us all into one universal family expressing harmony and our birthright of freedom.

MRS. EDWARD X. HERR, Montague, California.

I wish to verify my wife's testimony of healing, which was a beautiful demonstration of God's presence and power as taught by Mrs. Eddy in "Science and Health with Key to the Scriptures." I also wish to add a few words of gratitude for the healing I have lately experienced. One evening when ready to return home from the field I attempted to ride one of the horses, which threw me violently to the ground, breaking several ribs. The suffering was intense but after I arrived home my wife and I held persistently to the truth and the next day called a practitioner, who lovingly commenced work for me. I did not stay in bed a day and in a week was driving our car, and after three weeks I did all the heavy ranch work I had to do. I am truly thankful for the truth that makes man free as God intends he should be.—EDWARD X. HERR.

The power of Christian Science to heal the sick was borne in upon me in my childhood, when a beloved relative, who was also my foster mother, was restored to perfect health and activity after twelve years of invalidism. From that time on, whatever illnesses I had were overcome for me through her understanding of the truth which had healed her. I did not turn to Christian Science myself, however, until many years afterwards, when a great unrest and dissatisfaction took possession of me, causing me to leave the church of which I had been an active member for years and to delve into philosophy and whatever new cult seemed to give promise of spiritual satisfaction. At that juncture a close neighbor and friend had a wonderful healing in Christian Science, and told me of it, giving the glory to God, and I awoke as from a dream to the realization that Christian Science not only heals the sick but also satisfies spiritual yearnings. Since that time we have had many proofs that this teaching is not circumscribed in its application, but that it conquers fear, timidity, and discordant conditions of every nature and brings to the sincere student the spirit "of power, and of love, and of a sound mind." Physically I have been healed of heart trouble, of anæmia accompanied by extreme debility, and have been able to overcome in their incipiency many other ills.

The following incident is only one of hundreds that might be cited in proof of the power of the truth. Very recently, while taking a long walk, I passed through a locality of large private estates with such an abundance of flowers in bloom that I found myself wishing I could have some to carry home with me. There seemed nothing to do, however, but to enjoy, without covetousness, the glorious sight of them and the perfumed air; but walking farther I came to an open field overgrown with daisies and with a syringa bush in full bloom in the midst of them. This seemed a very simple and beautiful illustration of how, even to the human sense of things, "No good thing will he withhold from them that walk uprightly." The next day, however, I noticed that the palms of my hands were swollen and inflamed, and the soreness rapidly increased and began to spread, notwithstanding my work to overcome it. Then I remembered that while I was gathering the flowers I thought once of something I had heard about poison ivy. and, without denying its reality, I wondered what it looked like. I feel sure that I touched no foliage at all except that of the syringa, but I did entertain the thought of poison ivy as something existing, something which one must be careful not to touch, and the result was a manifestation of poisoning on my hands. As soon as this false thinking was uncovered, the belated denial was made of any such belief and of any believer in it, and the truth was declared as stated by Mrs. Eddy on page 234 of "Science and Health with Key to the Scriptures," where she says: "Evil thoughts and aims reach no farther and do no more harm than one's belief permits. Evil thoughts, lusts, and malicious purposes cannot go forth, like wandering pollen, from one human mind to another, finding unsuspected lodgment, if virtue and truth build a strong defence." The soreness vanished almost immediately, and before night the last vestige of inflammation had disappeared.

With just such little experiences is daily living crowded, and we find ourselves growing, moment by moment, into fuller understanding of the perfect harmony of God's creation. I am deeply grateful for Christian Science, and my appreciation of Mrs. Eddy and of her tremendous life work increases every day.—(Mrs.) Bernice Williamson Carter, Brighton, Massachusetts.

Signs of the Times

[From an Editorial, "Courage—What Is It?" in Chicago Herald and Examiner]

It was intellectual courage that enabled your early ancestors, with a hand almost as feeble as your own, to make themselves masters of this earth.

They built little huts and fought to protect them. They barricaded themselves in caves and, when it was necessary, went out to battle with the bear or tiger trying to roll away the protecting stones at the cave entrance. That was the early, rough kind of courage, and on that courage were built our early civilization, villages and towns, settled homes.

We travel across this country from ocean to ocean in warm, protected cars, looking out on great cornfields, wheat-fields, mountains, and rivers. And as we travel we forget that every acre was conquered by courage. Courage took the men in their wagons, with the women and the children, to wild, unknown lands. Courage and perseverance cut down the trees, dug up the stumps, cleared the land. Courage enabled families to settle among the savage Indians, isolated, constantly in danger. It was the courage of the pioneer that constructed this nation. A great courage is that of the pioneer, whether it be Columbus starting an ocean trip that men thought must end in death, the pioneer taking his family to live among savages, or the pioneer priest taking his religion to the tents of savages to save those that would murder him.

Who possesses courage? Any woman or man that puts an abstract idea, love of children, friends, country, honor, or justice, ahead of personal safety and comfort. Joan of Arc possessed courage as she walked toward the stake where she was to be burned alive when all her friends had abandoned her. . . . Mary Baker Eddy possessed courage when, disregarding ridicule, mockery, lack of sympathy among those closest to her, she persisted in her work of building up a religion that has brought happiness to thousands who find it only in her teachings.

[From "Darkness and Dawn," by Oscar L. Joseph in Methodist Review]

The declaration that things are in a deplorable condition has the sound but not the sense of piety. It is the essence of impiety and a blasphemous slander against God and His Christ. It is an expression of cynicism, a more sinister foe of hope than doubt or despair. . . . Men of heroic mold think of "impossible" as a "blockhead of a word." They accept the conventional standards of ability with a large grain of the salt of humor, and meet opposition with serene self-possession. The very genius of their Christianity leads them to expect victory, and so they estimate the forces of evil from the standpoint of the future and not of the past. They are certain that "evil is an essentially conquerable thing." Whatever may be its record, the seed of decay is in it, and its ultimate destruction is only a question of time.

[From a Report in The Luton (England) News of an address of the Rev. W. H. Haden, Before a Workers' Mass Meeting]

Every century had its great wrongs. In every century was to be found a body of men and women who had cried out against the wrongs, and they had found expression in prophet and reformer, and God had breathed through the prophets and reformers; people had longed for better things and wrong had been righted. If this was a black day it was an immeasurably brighter day than England had ever seen before in the times of its former great critical hours.

There had been evils which would not be tolerated for an hour to-day. No man would bear to be lashed and no soldier or sailor would be dragged from his house by the press gang and be forced to sea or to war. And so he would breathe a word of encouragement before leaving this part of the subject, and would say that he believed this uprising to be divinely inspired. The spirit of God was moving upon the face of the dark waters of industrial confusion, and the uprising against oppression was essentially religious. . . . He asked them to take the beam out of their own eye, to cleanse their own hearts, to be strong, for the pure were always strong. . . . Take drink. The man who drank much beer thought beer. And where would beer-thinking lead them?

[The President of the American Medical Association, as reported in The Boston Herald, opposes Liquor Prescriptions]

Dr. Hubert Work of Pueblo, Colorado, the new president of the American Medical Association, in his address on assuming office, in the Boston Opera House, gave a death-blow to the hopes of those who have looked to the A. M. A. to give its indorsement to the practice of prescribing beer and wines freely by the profession. The occasion was that known as "the opening meeting," which to hosts of members who come from afar and who do not sit in the house of delegates, is the one great occasion of the session.

Dr. Work said: "The promiscuous prescriber of alcohol, licensed as a physician, but whose ethical sense would degrade a bartender; the perfunctory prescriber for a fee; the vender of habit-forming drugs; all are educated criminals, a social menace, but posing as physicians. These physicians are tolerated by the public because of an integrity, efficiency, and self-abnegation of a majority of medical men so great that these derelicts almost escape notice." Physicians, he continued, "must earnestly address themselves to the cause and prevention of disease and disability as the primary concept of medicine, safeguarding its fundamentals, lest the profession lose its esprit de corps and its place in public esteem. If its members become pieceworkers, it may fail of public appreciation as an essential economic factor in the preservation of the national wealth, because of depreciating national health."

[From The Times, London, England]

The desire to be master of our circumstances is general, and men seek this lordship in more ways than one. Many hope for their freedom by cultivating the faculties of the mind or developing their æsthetic powers. Culture in its widest and highest sense enables them to rise above the restrictions of circumstance to find their satisfactions in philosophy, art, or literature. The man who learns to be at home with the great writers and artists finds himself carried far beyond the restrictions of the world's circumstances to a kingdom of the mind where all things temporal pass into nothingness. Such a man is no longer a city clerk, or a harassed professional man, or an anxious politician, but a citizen of an empire where each member enjoys a perfect and satisfying freedom from the conditions in which otherwise his life is too often cribbed, cabined, and confined. Such refuge, however, from the irksome conditions of life is not so much secured by victory over circumstance as by flight from its power. In thought and feeling men escape from the claims, the distractions, the tasks of the world, but their liberty is only temporary. They must sooner or later come back to earth again to find that they are not, after all, masters in the world of commonplace work. At

best they are servants who are allowed an occasional holiday. For them circumstance is still the imposition of a tedious drudgery, to which they must comply in the sheer necessity of sustenance or the preservation of their reputation in the world. They cannot claim to be rulers of circumstance. . . .

Something else is necessary. It is the claim of religion, and supremely of Christianity, that the true use of the world and all that makes up circumstance is found when it is made the instrument of the Spirit and employed in the service of a higher power than itself in the extension of the kingdom of righteousness and truth. Only in this way do men rise superior to their circumstances and become no longer the slaves but the masters of the conditions in which they live. They may not be able to alter them, but they can employ them according to their own purpose. It is in a man's use of circumstance that we test the worth of character. The same conditions have quite different results in life. One man may employ them to the development of the highest qualities, while another will make them little else than the instruments of his own degradation. Circumstances can never be offered as an explanation of virtue or be pleaded as an excuse for vice. There is something in a man which imposes upon him the sense of responsibility. . . Let him exchange bondage to circumstance, "that unspiritual god," for the service of Him who makes men masters of themselves and of the world in which they live.

[From an Address by A. Lawrence Lowell, President of Harvard College, June 19, 1921]

Although men are by nature gregarious creatures, they should not, like sheep, move under the simple impulse of the mass. Man has the ability to think for himself, to weigh reasons, to forecast in some degree the future, and to reflect upon the consequences of his acts. In times like these it is of vital import that his responsibility for his individual opinions should be relentlessly asserted. Clamor of a crowd is often mistaken for opinion. The art of producing the semblance of a public opinion by a general shout has progressed greatly within a generation. Group psychology has been studied until we are familiar with its principles and its use. Let us not suppose that because psychology of crowds is a fact its results are therefore right; or that, because organization and machinery furnish a powerful weapon for propagating ideas on the part of those who believe in them, the ideas themselves are therefore correct.

[From "The Broadening Horizon," an Editorial in The Saturday Evening Post]

Ever since the world began there have been careers for the very strong, able, and perhaps cunning men. But until recent times they were few in number, and even in the pioneer days of this country they could be numbered probably on the fingers of one hand. But now they spread out in every direction, and the avenues of approach are not closed to any one who has even moderate training. A career was formerly considered the exclusive property of the rich, the well-born, or those who possessed mere superiority in muscle, fighting skill, sheer force of personality, or low cunning. But now there are great numbers of varied and diversified occupations requiring many different qualities and temperaments, and any one of them if pursued with moderate success may fairly be said to afford a career. A certain amount of ability, of course, is needed to attain success in any line, but when the channels of activity have

become so numerous, dissimilar, and multiform, abilities which formerly had no use or recognition are called upon in ever increasing measure. . . . Success no less than government has become democratic.

[From "Luther as a Prophet of a New Age," by Prof. George W. Richards.
D.D., LL.D., in The Homiletic Review]

Instead of trying to make God gracious by making himself righteous, he [Luther] discovered that God is gracious and that He makes man righteous. In other words, "The just shall live by faith." In this experience was the dynamic of a new age. Luther ceased to be a monk working to save himself, and became a child of God, rejoicing in the assurance that he was saved. . . . The new-born age was after all only in its infancy, wrapped in the swaddling clothes of the old time. It is even now only coming into manhood, and when it has reached its maturity men will doubtless hail the monk of Erfurt and the Reformer of Wittenburg as one of its greatest prophets.

["Thinking," an Editorial from the Santa Cruz (California) High School Publication, Weekly Trident]

Thoughts are wonderful things, provided they are clean and wholesome. But a bad thought makes or ought to make one feel terribly ashamed of himself. There are a few who will read this editorial and laugh, but that will not alter facts. Good thoughts are always refreshing; bad ones become tiresome. Thoughts are our constant company. They are the only company we can keep and completely control. Bad thoughts are like bad company, they corrupt us. If every day our thoughts become a little worse than the day before we are degrading ourselves and those around us just so much more. Maybe we are unconscious of the fact that we are stepping lower. Have an ideal of cleanliness in thinking; and live up to it.

Notice

SHORT TERM SUBSCRIPTION AND ORDER RATES

Attention is called to the new rates now in effect on short term subscriptions for The Christian Science Monitor, Christian Science Sentinel, and The Christian Science Journal: also on single copies of the Sentinel and the Journal. These rates are stated in the advertisements found on the inside front cover page of the Sentinel and on page "iv" of the Journal.

Attention is also called to the rates scheduled below, now effective on all quantity orders for any one issue of any of the Christian Science periodicals:

Monitor	 .\$.03	a copy
Sentinel	 071/2	"
Journal	 30	"
Der Herold	 18	"
Le Héraut .	 18	"
Quarterly	 221/2	"

These rates are net and take the place of the former 10% discount on periodical orders.

The uniform retail price on the Sentinel is now 10 cents a copy, and on the Journal 35 cents a copy. The Monitor single copy price remains at 5 cents.

Discounts to reading rooms on subscriptions and on orders for general publications remain as before.

Church Notices

From the Clerk of The Mother Church

Church Teners.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massa-

chusetts. From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail

unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to Edward L. Ripley, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in *The Christian Science Monitor*, were run off

at the time of their publication in the Monitor. These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 81/4" x 103/4". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for *The Christian Science Monitor*, *Journal*, *Sentinel*, *Quarterly*, and *Heralds*, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and imme-

diate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

There will be placed on sale in a short time six new pamphlets, containing articles reprinted from the Christian Science periodicals, as follows: "Government," "Employment," "Work and Play," "Progress," "Occupation," "Relationship." Orders for these pamphlets may be sent at once, to be filled on the date of issue. Price 5 cents a copy. Reading Room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U. S. A.

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U. S. A.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder

of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large Type (18-point) on Warren's heavy India Bible paper, bound in leather. Size 8 by 1034 inches. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCII TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

GERMAN TRANSLATION. Alternate pages of English and German, Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1890, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes. Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Polket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

1/4

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gikt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume. 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

NUMBER 47

"The substance of good"

BLANCHE M. COLLEY

CINCE the beginning of the Adam-dream, when man was If first condemned to till the soil, one of the greatest problems of mankind has seemed to be that of supply. Out of the multitudinous illusions and false concepts of mortal mind, gradually there took form the belief that a man could not possess all that he needed to live happily and successfully. A neighbor or fellow man seemed always to have what one lacked or desired; hence the natural way to attain a desired object was to exchange with or take from the neighbor. From such simple beginnings have been evolved the vast and varied business activities of our own time. From the very first, men have striven to attain, have sought better things, reached out for good, according to the individual concept of what was good or most to be desired. In a vast majority of cases, the goal sought is wealth and the road thereto is called successful business.

Upon entering the business world one may be beset by fears and doubts and laws of limitation. A change of political régime may cause great uncertainty; it may be feared that another firm may in some way undermine the business, that some individual more keen may force one out, or one may outgrow his usefulness and be shelved; and so on and on through innumerable phases of fear and dread of failure. Since the day when Cain, jealous of Abel's manifestation of higher attainment, favor, and success, slew his brother, the zeal to obtain and retain material wealth and power has often developed and revealed the animal propensities of human nature,-greed, selfishness, malice, envy, jealousy, and dishonesty,-which one must overcome if he would climb the ladder of fame or success. The cause of all this is suppositional mortal mind. What is the remedy for it? Surely there is but one, namely, the recognition of Mind as infinite Spirit, God, Truth, Life, and Love.

Men are standing in their own light and beating the air! The thought that human beings constitute man and in and of themselves are something, when in reality they are nothing, is back of every discord and sense of lack encountered in the course of human experience. In other words, a false concept of God and man or the belief in material man and material substance or supply is the Pandora box of all ills. Christ Jesus plainly declared God to be Spirit. In his first recorded words we find him declaring that he must be about his Father's business. Throughout his life he proved, absolutely and beyond all dispute, that the same law which raised the dead and healed the sick was operative in providing for the human need of the moment in all places, under all circumstances. His whole mission was to teach men that to have a true knowledge of God, the Father of all, was to have life, and have it "more abundantly."

As in all else, the remedy for a false concept of business, with its cumulative fears of loss, lack, or failure, is in obedience to God, in keeping in letter and in spirit the commandments, "Thou shalt have no other gods before me,"

and "Thou shalt love thy neighbour as thyself." To the materially minded it may seem a far cry from business to the Commandments, but let us consider for ourselves. In the sixth chapter of Matthew we find Christ Jesus, during his Sermon on the Mount, talking of common experiences in daily life. He speaks of varied phases of human need and concludes his talk with these well-known words: "But seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you." This is no vague, indefinite suggestion of a rather doubtful possibility, but a clear-cut, well defined rule by which to order one's daily living, and a plain statement of the result of the obedience to and application of this rule. At another time, when asked regarding the coming of the kingdom of God his reply was, "The kingdom of God cometh not with observation: neither shall they say, Lo here! or, lo there! for, behold, the kingdom of God is within you." And correlative to Jesus' statements are the words found on page 560 of "Science and Health with Key to the Scriptures" by Mrs. Eddy: "The great miracle, to human sense, is divine Love, and the grand necessity of existence is to gain the true idea of what constitutes the kingdom of heaven in man."

God, the great I AM, made man in His image and likeness. God is Spirit, Mind, and man is His perfect, spiritual idea or expression. Man is not, then, a creature of matter; he is the reflection of all Godlike qualities. All that he has, all that he knows, all that he does, is as it is because of what God is, has, knows, and does. God is infinite good; therefore there can be in man's activities not one iota of anything save good. Reflecting God, man's activities are necessarily Godlike. Man's real business is simply right activity, and right activity is naturally and logically successful business.

Business is the ever present, harmonious manifestation of divine omnipotence-the activity of Mind, or God. There is but one business and that is the Father's business. Since He is unchanging, and with Him "is no variableness, neither shadow of turning," how can business be at one time good, active, productive, successful, and at another poor, inactive. nonproductive, a failure? Accepting the truth of one cause, and working always from cause to effect, leads to harmony, perfection, in each and every case. It makes no difference what mortal mind or human thought names the discord; it matters not how many voice or repeat the lie, it remains a zero. Divine Principle never made what the world calls a poor man. God never made a failure. He made all that ever was made and He pronounced it all very good. In the spiritual universe, in the all-inclusive realm of the real, there is an infinite abundance of good for every one. success of one does not mar or lessen another's success. The beauty and intelligence of one does not darken or weaken that of another. God's love and power are infinite. He gives to man perfection and completeness, for without absolute perfectibility the Father is not truly imaged or reflected.

In every phase of human experience and every field of human endeavor there is but one way to happiness, har-

1

mony, and real success, and that is through a correct and applicable knowledge or understanding of God and His man. Only through a true knowledge of God can one learn the truth about himself and his neighbor, and only as he learns this truth will he gain and demonstrate here and now the great fact that infinity cannot be exhausted, that one man need not lack because his neighbor has affluence. "Bring ye all the tithes into the storehouse, that there may be meat in mine house, and prove me now herewith, saith the Lord of hosts, if I will not open you the windows of heaven, and pour you out a blessing, that there shall not be room enough to receive it." Let us acknowledge God as All-power, as able to care for, guide, protect, bless, and supply man, not once in a while but all the time, and learn that, as Mrs. Eddy says (Science and Health, p. 301), "As God is substance and man is the divine image and likeness, man should wish for, and in reality has, only the substance of good, the substance of Spirit, not matter.'

All over the world, thinkers are fast reaching the conclusion that not only diseases of the body but business depressions, panics, social wars as well, are results of wrong thinking. True reconstruction and lasting reformation must begin in thought. The world can be truly saved through Mind and spiritual forces—never through material plans or human power. Very quickly the student of Christian Science learns to walk, calm and unafraid, in the midst of an epidemic of so-called contagious disease. Why, then, should he succumb to an epidemic of business depression or disease? Is not the same power which enabled Jesus to feed the multitudes and produce the tribute money operative and available? Grateful multitudes in all parts of the world affirm that it surely is present and demonstrable.

Disarming Mortal Mind

JAMES C. THOMAS

IT is always desirable to disarm engines of human ill will, whether they appear as war's implements, or simply hate and jealousy between individuals or nations. the abandonment of war paraphernalia and wrong motives really involves in some measure the disarmament or casting away of human or mortal mind. The mentality out of which proceeds that long catalogue of evils which Paul lists as "hatred, variance, emulations, wrath, strife, seditions, heresies, envyings, murders, drunkenness, revellings, and such like," must be replaced by the divine Mind, the Mind that was in Christ Jesus. And knowing and adhering to infinite good, or Principle, as the one great power really opens the way to infinite armament, because the true man expressing Principle can never in reality be disarmed. The true idea, man or nation, is never absent from "the secret place of the most High," and possesses the "whole armour of God." The Almighty can no more be laid aside as man's upholder than God Himself could cease to be. If this were universally understood, it would take away at once all need of armies and navies and the "pride, pomp, and circumstance of glorious war."

The spiritual truth is always the best protection. Divine Mind or God is potent, and does not withhold His might from those who seek to understand and fulfill divine requirements. For infinite Love is indeed boundless and gives all good to its likeness. Often is there repeated in the Old Testament the statement that the children of Israel did evil again in the sight of the Lord, together with the record of the troubles that came upon them in consequence, followed by the simple, inspiring assurance, "When the children of

Israel cried unto the Lord, the Lord raised up a deliverer to the children of Israel." It was the following after false gods that brought trouble to the Israelites, the false gods of material pursuits. When these ancient followers of the one God, or Principle, "cried unto the Lord" they defeated in war the enemies who were seeking to impose upon them those very gods of superstition and gross materialism. Crying to the Lord in this day, that is, having the desire to learn of divine Mind what is good for man, is bringing about disarmament of navies by achieving the disarmament of mortal or human mind, rendering its evil appetites and wrong purposes powerless. Just as the prohibition of alcoholic liquors comes swiftly when spiritual understanding has undermined the human belief of an appetite apart from the true desire to love God, so the disarmament of war's weapons will follow the subsiding of the desire for material power.

An example of the ultimate disarmament that nations will be expected to achieve and the true armament which will take its place is found in the story of the Master in the garden of Gethsemane when the armed servants of the high priest came to take him for trial and crucifixion. Peter, also armed, used his material weapon to wound one of the assailants. Christ Jesus healed the injury by restoring the ear that had been cut off and said to Peter, "Put up again thy sword into his place: for all they that take the sword shall perish with the sword. Thinkest thou that I cannot now pray to my Father, and he shall presently give me more than twelve legions of angels?" Thus the need of material arms was discounted in the face of spiritual understanding, and an ideal given for all time to men and nations by the scientific Way-shower. All who strive to do the healing works that Christ Jesus did will find that "twelve legions of angels" will be with them to fight their battles, nay, they will find that sooner or later the expression of materiality called war will begin to disappear. This wondrous time is near, and spiritual understanding is in a measure being used even now for the protection of nations. When it reaches its fullness all material armaments will be seen to be as obsolete as they really are now.

The rise of democracies giving to their people civil and religious liberty has demanded protection for the clearer sense of government thus brought forth. Hence great navies have been built up which have steamed to the ends of the earth not merely to defend and to prevent the destruction of democratic ideals, but to provide for their unhampered advancement throughout the world, together with the blessings clearly attending them. Navies have been the highest understanding of protection which the democratic nations possessed, and they have not flinched in supplying armament for themselves in their struggle toward the light. It was but thirteen years ago, in 1908, that Mary Baker Eddy wrote in The Christian Science Journal, "National disagreements can be, and should be, arbitrated wisely, fairly; and fully settled. It is unquestionable, however, that at this hour the armament of navies is necessary, for the purpose of preventing war and preserving peace among nations" (Reprinted in The First Church of Christ, Scientist, and Miscellany, p. 286). Preceding this statement is another, on the same page, in which she declares, "For many years I have prayed daily that there be no more war, no more barbarous slaughtering of our fellow-beings; prayed that all the peoples on earth and the islands of the sea have one God, one Mind; love God supremely, and love their neighbor as themselves."

The basic disarmament that mortals really need, then,

is the disarmament of the human or mortal mind and they gain this by holding to the divine Mind as the only real presence. Good being everywhere, evil is nowhere, and this truth dissolves the mirage called the world and its battlings. The belief that there is an earth filled with camps of fighting men is a mistaken assumption of a supposed mind that is itself a mistake. The world that is really here, the universe representative of Mind, is wholly spiritual. It could not be anything else, because what Mind creates must be mental, spiritual. And since one cause, or Principle, made all things spiritual, it made nothing material. Thus it is a present comforting fact that the real disarmament, the vanishing or making absent of material, mortal mind, and mortal creation, is eternally accomplished—the vanishing of what, in the language of John the Revelator, "was, and is not, and yet is."

Elimination of the carnal mentality by mortals means discarding very concrete idols of the world: the belief in material power, the doctrine that might makes right, the theories of a survival of the materially fittest, the theory in general that human beings must rule instead of divine intelligence or God. Every one can assist in this sort of disarmament and the more persistently and consecratedly one goes about it, the faster and surer will take place the elimination of the many engines of human ill-will.

The very method by which the evil purposes of the carnal mind are being disarmed at this time is also arming with spiritual power those who are in the forefront of the contest with materiality. Real armament appears as disarmament takes place, and the ever operative might of eternal Mind comes nearer in the demonstration of good. Mind and its idea are ever the basis of victory, because, being the whole of reality, they leave nothing to be fought, defeated, and destroyed. The love for God and His idea brings men and nations, choosing such love, into the province of that continuous victory which is characteristic of Mind, the Holy One who inspires love. A nation possessing the pure gold of such affection as this will be mighty in rebuking the assertions of arrogant, sinful power, and infinitely helpful and good Samaritan-like toward all in need of help and seeking it. The power of such a nation to rebuke wrongdoing or to uphold righteousness will become more and more clear-cut and quick, more like the expression of Mind, to which it aspires as its ideal of what really is. Mind's activity is the continuous triumph of good, for there is no evil. As with the nation so with individuals in that nation. Advancing understanding of the one holy God or Principle will bring greater and greater spontaneity in healing. The edge of sin, sickness, and death will be blunted until it finally disappears, and the forever and ever of demonstrated good, will take its place. "And there shall be no more a pricking brier unto the house of Israel, nor any grieving thorn of all that are round about them, that despised them; and they shall know that I am the Lord God."

The Activity of Love

CARRA L. THORESON

TRUE activity is the utilization or expression of the qualities of Spirit, such as love, unselfishness, meekness, kindness, happiness, thoughtfulness for others. The divine Mind expresses its activity through man, and cannot express anything but good. The false beliefs of disease, injustice, dishonesty, lack, and discord, with all their accompanying misery, recognized as real by the material senses, are not true activity. They are but the supposititious opposites of

the real and true qualities of Mind, expressed as health, justice, honesty, abundance, harmony. Infinite Love, knowing only the truth, cannot know anything about these false beliefs; hence man, as God's image and likeness, knows them not. These mortal beliefs cannot really prevent the apprehension of the beauty of God's universe with its infinite, harmonious activity. They reign in human selfhood alone; hence the elimination of self is imperative if we would emulate the selfless love and activity of the Christ. God, divine Love, the only real, active power, is never for an instant separate from His creation, and, as His law operates unceasingly, He is ever pouring out good and good only to His idea, which receives constantly, therefore, without limitation the abundance of good.

On page 187 of the Christian Science textbook, "Science and Health with Key to the Scriptures," Mrs. Eddy declares, "The divine Mind includes all action and volition, and man in Science is governed by this Mind." The lucidity of this statement is unsurpassed. It follows, then, that the divine Mind alone can form and determine a purpose, the accomplishment of which must be expressed through His image and likeness, man. Mrs. Eddy also writes in "The First Church of Christ, Scientist, and Miscellany" (p. 189), "The government of divine Love derives its omnipotence from the love it creates in the heart of man; for love is allegiant, and there is no loyalty apart from love;" and again, on page 268, "This time-world flutters in my thought as an unreal shadow, and I can only solace the sore ills of mankind by a lively battle with 'the world, the flesh and the devil,' in which Love is the liberator and gives man the victory over himself." The power of Love to liberate from all the ills of the flesh, as well as from all mental disturbances, has been accurately demonstrated thousands upon thousands of times in the history of Christian Science.

As we recognize Love as all-powerful, ever present, and ever operative, admitting no suggestion of some other power, we are given the victory over false beliefs. All down the ages the law of Love has actively operated, alleviating suffering and woe wherever there was found a spiritual grasp of the truth, the vision of the Christ. When the children of Israel, camping by the sea, looked up and saw their enemies in close pursuit of them, they were so frightened that they cried aloud to the Lord to help them. Then they reproached Moses for bringing them out of Egypt, saying that it would have been better had they stayed and served the Egyptians. And what was Moses' answer? "Fear ye not, stand still, and see the salvation of the Lord, which he will shew to you to day. . . . The Lord shall fight for you, and ye shall hold your peace." Moses realized that divine Love was ever present, encompassing their camp, operating to deliver them; and the proof soon came, for the waters of the sea divided as Moses, governed by divine intelligence, gave the command, enabling the Israelites to pass over on dry land, while the pursuing enemies were engulfed in the returning waters.

It seems strange that after this wonderful demonstration of God's protecting power the children of Israel could ever again doubt the ever present activity of divine Love; but again they murmured while in the wilderness of Shur, because of the bitterness of the waters of Marah; and again faithful Moses cried unto the Lord, and divine intelligence showed him a way to sweeten the water so that they might quench their thirst. But not yet were these doubting children convinced that deliverance from Egypt was really what they desired. As they journeyed through the wilderness of Sin, hungry and discouraged, their thoughts turned longingly

back to the fleshpots of Egypt, for to mortal sense there was no visible supply for their present needs. There was no necessity, however, for their fear and anxiety. Ever watchful, divine Love gives the supplies needed. Quails and manna came to them in abundance, and to prove that divine Principle supplies every need and is ever present, Moses commanded them not to save any of it until morning; but some of them disobeyed, and when the morning came the food was unfit for use. After that they were more obedient and were plentifully supplied for forty years, "until they came to a land inhabited."

Daniel, as he stood in the den of lions, had the vision of the Christ. He knew that the law of divine Love was ever operative and that, enveloped as he was in ever present Love, bestial hatred could not reach him. The three Hebrews in the fiery furnace knew that they were surrounded by Love and that Love protected them from the flames, so that not a hair of their heads was singed, "neither were their coats changed, nor the smell of fire had passed on them." Not even the smell of fire! So clear was the vision of divine Love that even King Nebuchadnezzar perceived it as a form "like the Son of God," and recognized that the men were unharmed.

With such unquestionable proof that infinite Love cares for and protects man, supplying every immediate need, why should we listen when mortal mind suggests that we are ill, unhappy, or in need of the material things of life? Instead of listening to such suggestions we should remember that Christ Jesus said, "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you." And further, "Take therefore no thought for the morrow: for the morrow shall take thought for the things of itself." Of course, if we are obeying this divine precept, and realize that to-day's needs are really already provided for by ever active Love, we cannot doubt for a moment that tomorrow's needs will be supplied in the same way. Nor need we fear that Love cannot straighten out all the tangles in the skein of doubt and worry over what may seem an unsolvable problem; the law of Love works out the solution absolutely and harmoniously. With infinite tenderness a man is lovingly corrected through the turning to Principle until he finally recognizes the true heritage of man, the reign of harmony.

One who indulges evil propensities, instead of relying upon divine Principle to harmonize all discordant conditions, is making heavier his brother's burden and multiplying his own difficulties. If one is constantly expressing Love, one cannot be entertaining a single unkind thought, nor can one be the victim of the evil thoughts of others. Love gives everything worth having, and never takes away anything which it has given; and as Love becomes paramount in our lives.

". . . the cares that infest the day Shall fold their tents like the Arabs, And as silently steal away."

The false beliefs of sickness and sin simply vanish, as Love makes felt its supremacy and power.

Because of Jesus' perfect understanding of spiritual law, divine Love was able to operate through him scientifically, instantaneously healing the sick and the sinning, and supplying every human need as it was presented. But Christ Jesus never saw a blind, lame, sick, sinful, or poverty-stricken person before him; it was the perfect creation of divine Mind which he saw, and instantly the false belief of an imperfect man was healed. This is the example for all to follow through the understanding of divine Love's activity as ever present.

"Why callest thou me good?"

CATHERINE KENDALL

HUMAN goodness at its best is but a counterfeit. How we do stand in our own light, and in the way of our own progress by leaning on this broken reed! Our highest aim and greatest happiness is to reflect divine good, God, and we do this effectually only as we rise above the human relative sense of virtue. Jesus drew the attention of the rich young man to this fact in the seeming rebuke as given in the nineteenth chapter of Matthew's gospel: "Why callest thou me good? there is none good but one, that is, God." The young man was blinded to the highest absolute knowledge of good by the importance he attributed to the human appellation. This attitude of mind acted as a deterrent, and does to-day in that it obstructs the vision of the universal good which all may reflect, for, as Mrs. Eddy tells us in "Science and Health with Key to the Scriptures" (p. 13), "Love is impartial and universal in its adaptation and bestowals." Since man always has the ability to reflect universal good, why should one address another as if he, the latter, held a monopoly? "How can ye believe, which receive honour one of another, and seek not the honour that cometh from God only?"

We need not hug to ourselves that which prevents us from realizing the one and only source of good. We break the First Commandment by making a god of the human self and placing it on a pedestal, whereas by attacking this false god, by seeing through the illusion and making a seeming sacrifice we are abundantly compensated. Thus we are enabled to reach the one and only pure good, which is healing and harmony and joy. "Blessed are the pure in heart: for they shall see God." Now this enemy must be deposed. In the endeavor one sometimes acquires the habit of self-depreciation, while still clinging unconsciously to an almost secret thought of one's own virtue. This needs following up and eradicating. One should not allow this habit of depreciation to develop into self-condemnation, with its attendant depression, and thus be blinded to his God-given abilities, the knowledge of which gives assurance and confidence, not in self but in God. We need to overcome the two extremes of self-righteousness and undue abasement, and find the happy mean, the sure knowledge of man's unity with his Maker. This is success, for, in the words of Mrs. Eddy (Science and Health, p. 192), "Whatever holds human thought in line with unselfed love, receives directly the divine power."

"Being influenced erroneously"

33

ALICE E. BARRINGER

IN the Preface to "Science and Health with Key to the Scriptures" (p. vii) Mrs. Eddy says, "The time for thinkers has come." It always has been "the time" but it was not until our beloved Leader, Mrs. Eddy, recognized the fact, that we saw how it is our own duty to practice right thinking ourselves. She says in the Manual (Art. VIII, Sect. 1), "A Rule for Motives and Acts," "The members of this Church should daily watch and pray to be delivered from all evil, from prophesying, judging, condemning, counseling, influencing or being influenced erroneously." Does not this point to the fact that we have to do our own work in thinking, and that thinking must be the dedicating of all our thoughts and actions to God, Principle, Life, Love, and Truth, who thereby purifies them and makes them an offering to Himself? The time has most surely come to us to judge righteous judgment, and those who are studying Christian Science are finding that by exercising one's own power

of right thought or judgment, and not merely relying on the thinking and guiding of others, one can protect one's self against being led astray and influenced erroneously.

When the mandate from King Darius was sent out to his people that no petition or prayer was to be made to any but the king, Daniel did not consult with any of his Hebrew brethren as to his intended mode of procedure. He knew that God alone was his guide, Principle, and lawgiver, and that there was no one to consult on any present or future action. Fearlessly he prayed, as was his custom, kneeling at his window, not considering the expediency and not counting the cost. He only knew his thoughts, actions, and their results were dedicated to God, and that what was wrong about them divine Love would bring to light, correct, and purge away. Mrs. Eddy tells us in "Retrospection and Introspection" (p. 84): "The opinions of men cannot be substituted for God's revelation. In times past, arrogant pride, in attempting to steady the ark of Truth, obscured even the power and glory of the Scriptures,-to which Science and Health is the Key." Our Father-Mother God, the source of all love and wisdom, will not fail to guide us when we are willing to be led, and willing to eliminate every vestige of self, knowing that "of him, and through him, and to him, are all things," and that all must be done to the glory of God alone. "God made all His creatures free" (Hymnal, No. 144), and when we have learned the truth there is nothing that can prevent us from declaring and proving it.

If a mathematician entered a room full of people all declaring and believing that two and two are five, that error would never influence him; so whatever we may seem to suffer through disagreement with error, we should be certain that through love, patience, and demonstration we can always prove the truth, and we need none but Principle to aid us. We read in the first chapter of James, "If any of you lack wisdom, let him ask of God, that giveth to all men liberally, and upbraideth not; and it shall be given him."

"Benefits to come"

RAY GILES

A FAMOUS French writer of maxims declares, "Gratitude is a lively sense of benefits to come." To a novice in the study of Christian Science this statement brought an added realization that, once turned toward divine Love, one finds that gratitude need no longer be confined to experiences of the past or the present, but may and should be felt actively, confidently, and expectantly for lessons and demonstrations yet to come. A characteristic of mortal mind is its attempts to suggest that one cannot count certainly upon future blessings and in some cases to declare the sheer superstition that such anticipation may invite calamity. Such whisperings received for all time a practical and convincing rebuttal in the example of Christ Jesus. In raising Lazarus from the dead, as recorded in the eleventh chapter of John's gospel, we have what to human thinking uninstructed by Science must always seem an astonishing narrative.

Conscious of the full significance of his relationship with the Father, we behold Jesus undismayed even by the belief in bodily decay and hear him thus expressing gratitude: "Father, I thank thee that thou hast heard me. And I knew that thou hearest me always," and this even before the demonstration was apparent. In those present, accustomed no doubt to give thanks only for blessings after their appearance, what curious emotions must have arisen! Here was one who seemingly gave thanks without reason. Yet a mo-

ment later Lazarus was among them exactly as he had been before his passing. Again, in the eighth chapter according to Mark, experiencing again that "lively sense of benefits to come," we find the Master fully prepared to provide for the multitude. "He took the seven loaves, and gave thanks, and brake, and gave to his disciples to set before them." His unerring perception of the spirituality and abundance of supply entitled him to give thanks even before he could point to the natural result.

Probably no study shows so simply and convincingly as Christian Science how and why a man may always be grateful for experiences yet to come. The student begins to learn that every thought which in any degree is in line with Truth, Life, or Love must inevitably bring its individual blessing. As he comes more and more to dismiss his paralysis of doubt and caution and lean with greater understanding upon the infinite, he finds, first, that it is cause enough for gratitude to be consciously at one with God and, secondly, that his whole work is done and that demonstration is inevitable when thought has so ascended. Then may he, too, give thanks with "a lively sense of benefits to come." It is of no consequence how great may have seemed the sin, how solidified the conviction of disease, how old the graveclothes, or how mistaken the thoughts surrounding him. All obstacles dissolve in his abiding conviction of the omnipotence and omnipresence of that good which reigns from everlasting to everlasting. Thus he scans in spirit the entire arc of past, present, and future, to find in it nothing but unfailing harmony, peace, right activity, and a rich abundance of strength and fruitage. As Mrs. Eddy says in "Science and Health with Key to the Scriptures" (p. 494), "Divine Love always has met and always will meet every human need."

[Written for the Sentinel]

By the Will of God

LENA H. FARRAR

"By its own volition, not a blade of grass springs up, not a spray buds within the vale, not a leaf unfolds its fair outlines, not a flower starts from its cloistered cell."—Science and Health, p. 191.

Nor by its own volition

Blossoms the violet sweet,

Nor the dandelion reveal its glory

Humbly at our feet.

Not by its own volition

Doth the buttercup unfold,

Nor the daisy open its petals white,

Revealing its heart of gold.

Not by its own volition

Comes the color and fragrance rare
Of trailing arbutus, winding its way

Over hills and woodlands fair.

Not by its own volition

Doth the water lily rise

Above the deep, dark waters,

To unfold before our eyes.

'Tis only the mother-love of God,
With its warmth and gentle power.
Can clothe the trees with beauty,
And bring forth each sweet flower.

'Tis only the mother-love of God, Can give us flowers eternal, Blossoms of purity, joy, and peace, Blossoms of love supernal.

The Seventh Day

The world has altered since Moses imposed the ordinances of the law on the people at Sinai. The old ceremonial observances prove less satisfying every day. Christianity makes different demands on the world than did Judaism. "The sabbath was made for man, and not man for the sabbath," Christ Jesus said to the Pharisees: "therefore the Son of man is Lord also of the sabbath." Nevertheless, the old idea of the Jewish sabbath lingers on in the Christian Sunday. "It is sad," Mrs. Eddy writes, on page 40 of Science and Health, "that the phrase divine service has come so generally to mean public worship instead of daily deeds."

Jesus himself made it extremely clear that man's duty to Principle was not a peculiarity of one day in seven, but that his self-denial must extend to every day of the week, and that, in every day of the week the cross had to be taken up. The Third Commandment, in reality, imposes this requirement most thoroughly. If a man is never to take the name of the Lord in vain, he will be obliged to exchange the idea of divine service on Sunday for service to Principle every day and all day. This does not mean that Sunday should not be observed in the churches, but it does mean there should be no change whatever in a man's mental attitude between Sunday and Sunday. The work he does on week days should be done in exactly the same spirit in which he rests on Sunday. After all, as Mrs. Eddy writes, on pages 519-520 of Science and Health, "God rests in action. Imparting has not impoverished, can never impoverish, the divine Mind. No exhaustion follows the action of this Mind, according to the apprehension of divine Science. The highest and sweetest rest, even from a human standpoint, is in holy work."

The truth is that if the individual is obeying the First Commandment to have no other gods, he may cease from his daily labor to devote Sunday to a more unbroken realization of Principle, but throughout the week the only change will be one of outward expression, for he will continue to guard his own thought all through the seven days, throwing down his idols as much on Monday as on Sunday, and remembering that what he should not do on Sunday he should certainly not have done on Saturday. The writer of the story of creation in Genesis certainly never meant that the work of Principle on six days made these less holy than the seventh, any more than the inscriber of the Commandments dreamed that the keeping of the sabbath would imply any license for any other day. The distinctions which the carnal mind makes between one day and another are in reality a perfect travesty of what Moses understood by the sabbath.

Christmas day, for instance, is at once what mortal mind implies by a holy day and a holiday, as if there were any difference at all between the two. A holiday is a holy day,

and it was never contemplated that the one should be a holiday from doing right, and the other a day of perforce good behavior. Christmas day is perhaps the holiest day in the whole year, just as it is the greatest of holidays. But it should be the one just because it is the other, and that is because they are the same thing. If this had been sufficiently understood, Christmas day would never have become the great banqueting day of matter, it would have been made what it was always intended to be, a day of sacred rejoicing, which is precisely what every other day should be. On page 260 of "The First Church of Christ, Scientist, and Miscellany" Mrs. Eddy says, "An eternal Christmas would make matter an alien save as phenomenon, and matter would reverentially withdraw itself before Mind. The despotism of material sense or the flesh would flee before such reality, to make room for substance, and the shadow of frivolity and the inaccuracy of material sense would disappear." In other words, Christmas day would be shorn of all those ultra expressions of materiality by which Spirit is somehow supposed to be peculiarly celebrated. There might be some differences in the manner of the celebration of it. But to make it, as Mrs. Eddy says, eternal, the understanding of what it means would have to be carried into every other day of the year or the century.

The more completely the individual lives in obedience to Principle, the more completely must one day approximate another. "For a thousand years in thy sight," the psalmist wrote, "are but as yesterday when it is past, and as a watch in the night." Time, in other words, is a purely human division of eternity, and it would be ridiculous to say that one moment of spiritual eternity was more holy than another. The frailty of humanity may make it desirable to recognize holy days and holidays, Sundays and week days, but this is obviously a concession to human weakness. Such things do not and cannot exist in the eternity of Spirit, and obedience to Spirit is the effort of the man who takes up his cross daily to walk in the footsteps of the Christ, to bring himself into at-one-ment with the divine Mind. Divine Mind knows nothing of material distinctions. It is unconscious of anything but the perpetual unfoldment of its own ideas, and among these ideas there is no opportunity for the human distinctions of opposing creeds.

The distinctions of the calendar have nothing to do with eternity. They are frankly human conveniences, wrought out with the best intention of the generation which makes use of them. This is perfectly clear in the distinction between Sunday and the sabbath. The idea in both cases is much the same, but the method of arriving at it is entirely different. Neither the one nor the other is peculiarly sacred. As a matter of fact, Sunday tends to become more of a holiday and less of a holy day, every day. The thing that really matters is the mental concept of the individual. It is exactly what Jesus said of the distinction between Raca and Thou fool! It is perfectly possible to make the holy day, morally and in every way, a worse day than the holiday. If it is regarded as a day of restraint, or as a day of mere idleness, it becomes something less than the ordinary working day. On the other hand, a clear understanding of the demands of the Decalogue and of the Sermon on the Mount, scarcely leaves any reason for separating its observance from that of any other day in the week. This being so, there will be as many degrees of Sunday as there are keepers of Sunday, and those who know most of Spirit will certainly be those who will make it and every day most truly the Lord's

FREDERICK DIXON.

The Prescribing of Drugs

THE technique of prescribing drugs, like that of every other phase of medical or surgical practice, has changed immensely, since the discovery of Christian Science, as the doctors themselves have recognized that the effect of a prescription on a patient is mental. It is interesting to see, therefore, such an open letter on the subject of prescriptions as that sent out to physicians by "The Propaganda Committee of the Retail Druggists' Association of St. Louis. Missouri." In this open letter, which has been published in the newspapers of that city, the doctors are advised to add coloring and other "inert" ingredients to simple, white remedies, since "the following of this practice will induce the patient to consider the remedy of greater importance." Later in the letter the suggestion is made: "To prescribe 'factory-made' pills, tablets, or capsules only, or continuously, may lead patients to believe that too much 'routine' treatment is practiced; variety in prescribing will tend to educate the patient to believe that the physician is 'up' in materia medica and is giving the case his individual attention as well as individual medication." Toward the end of the lengthy letter that is full of such advice, we read: "It is not always prudent to tell the patient how the prescribed medicine will 'act'; conditions with different patients sometimes show contradictory results. Should a medicine not act as you have told the patient, he may conclude that either the pharmacist or you have committed an error." These few extracts show what a remarkable piece of propaganda this is.

After reading these statements, one may well ask, Is the drug itself supposed to have any effect, or is it simply the belief of the patient that is supposed to work a change? What Mrs. Eddy says on page 149 of Science and Health is especially pertinent to quote in this connection: "Is materia medica a science or a bundle of speculative human theories? The prescription which succeeds in one instance fails in another, and this is owing to the different mental states of the patient. These states are not comprehended, and they are left without explanation except in Christian Science." Christian Science shows unmistakably that the supposed action of a drug is in every case only a belief in mortal mind. It may be a general belief, developed through extended medical practice, or it may be a specific belief on the part of a single doctor or a single patient. In either instance, it is belief without the firm basis of Principle, and as such is subject to constant fluctuations and reversals. Mortal mind itself is not real Mind but is merely supposititious opposite of the infinite Mind, Spirit, which, with its spiritual idea, is truly all there is. Thus the only sure way of healing is the way that relies wholly on infinite Mind, absolute Principle, and not on supposititious mortal mind and its illusory beliefs. This is the way of Christian Science. As Mrs. Eddy continues in the next sentence after what has already been quoted, "The rule and its perfection of operation never vary in Science." The genuine turning to Principle always brings undeniable healing results.

Mrs. Eddy further explains the action of prescribed drugs when, on page 198 of Science and Health, she declares: "The materialistic doctor, though humane, is an artist who outlines his thought relative to disease, and then fills in his delineations with sketches from textbooks." The fact that savages and animals have used various material things, whether vegetable, animal, or mineral, in seeking relief from distress proves only that they have equipped

these things with their belief in them as remedies. It was always the belief, and not the thing, that even seemingly wrought any change. That a savage or an animal or a physician in the past has believed that a certain thing would bring about a certain physical change is no reason why this thing should be used as a medicine to-day. The belief in any drug or combination of drugs as a specific is decidedly volatile. For the genuine healing, which is the replacement of false belief with the spiritual idea actively manifesting Principle, no mortal concept of medication will ever suffice. The healing wholeness of orderly action is produced only by divine intelligence. Thus the sooner a man turns unreservedly to divine intelligence and away from matter for relief, the sooner will he prove enduring health.

At the end of the paragraph on page 198 of Science and Health already quoted, Mrs. Eddy says: "Again, giving another direction to faith, the physician prescribes drugs, until the elasticity of mortal thought haply causes a vigorous reaction upon itself, and reproduces a picture of healthy and harmonious formations." Mrs. Eddy clearly comprehended why the prescribing of drugs has ever seemed to do any good, but she went infinitely further when she showed the way for all mankind to supersede the belief in drugs with the understanding of absolute Principle which requires no material aid. For the instability of mortal beliefs Christian Science gives the sureness of orderly action in Mind, not matter. The real man, in fact, lives entirely in Mind, not in matter, and is in no least respect subject to matter, mortal beliefs, experimental fluctuations, or mistakes. The real man here and now is the active idea of the divine Mind. including no element of destruction or discord. The healing process of Christian Science is the replacement of every false belief about man with this understanding of the real man as the only man there is and as ever manifesting perfect intelligence. The proof of this understanding is the disappearance of the belief in limitation and distress and the presence of true vigor and harmony. Knowing and proving this, the student of Christian Science is grateful for having progressed beyond the belief in prescriptions of drugs to the one true prescription of infinite Principle infinitely manifest as exactly right action, for he is finding the infallible remedy for every ill. GUSTAVUS S. PAINE.

[Written for the Sentinel]

Garments

MAUDE MARY CLARKE

We would discard the rags of error, Lord, So long we've clung to them For covering, and have suffered Cold and fear and heaviness of spirit, Unmindful that awaiting us Were garments of praise—
Garments beautiful—
Ready for the putting on.

Thus, covered and protected,
Dwell we safely
In the consciousness of God
And man made perfect in His likeness.
This truth held fast,
Infinity unfolds;
We verify our unity with God,
And wear
The seamless robe.

Testimonies of Healing

About eight years ago there came to me an immeasurable blessing, an inkling of Christian Science. It came at a time of seeming physical distress. I had rheumatism in both my limbs and was not able to walk or to stand. When material remedies brought no relief and despair seemed deepest my mother was advised to try Christian Science treatment for me, which she did. The practitioner whom she went to see gave me absent treatment. In two days I was able to call upon her, and in five days I was completely healed. Later another proof of the efficacy of Christian Science healing was experienced. I asked the practitioner if nosebleed could be healed and if she would treat me. She answered affirmatively. The bleeding ceased instantaneously and I was free to keep an appointment I had made.

I desire to express my love and appreciation to those who have aided in making the way clear. Also I want to give thanks for the Sunday school instruction which I received, and for the unfoldment of Truth. Through striving to enter in may I manifest gratitude to God for His gift of Christian Science to this age.

(Miss) Helen P. Campbell, Seattle, Washington.

I have long wished to express my gratitude for what Christian Science has done for my daughter, therefore I am indeed grateful that I can vouch for her testimony. I was healed of constipation in five treatments, through the loving help of a Christian Science practitioner. I have also been healed of other ailments. Christian Science not only helps us to overcome bodily ailments but strengthens us spiritually. I am grateful for blessings received and for the Christian Science literature, which I enjoy reading.

(Mrs.) ALMA P. CAMPBELL.

The centenary of our Leader's birth arouses a deep sense of gratitude in the hearts of those whose privilege it is to have lived during this period and to have known of some of her human footsteps. It recalls to my thought the first copy of the *Scntincl* which I possessed, as the result of the purchase of which I had my first proof of the protective power of the truth, for which I have never publicly expressed

gratitude.

I purchased the periodical en route to visit a sister who lived some distance away and as she was not a Christian Scientist and I was only to be with her for a few days I did not take it out of my suit case. During the early morning of the day on which I was to take the train for home, there came to memory the sweet face of an aunt of a childhood friend, whom I had seen only once and had long since forgotten, who was in a railroad accident when almost no one was saved. That evening after my friends had left me comfortably settled in the sleeper, which was the last car of the train, I got this copy of the Scatincl out of my suit case and while reading and pondering it I came to the words: "There is no death; Life is infinite." Just then our sleeper suddenly made a most peculiar movement as if running over rocks instead of steel rails. I got up and went forward in the car, when there came a terrific crash which threw the Sentinel out of my hands, knocked off my hat, tossed me back and forth against the seats, put the car in utter darkness, and left it standing at an angle of about forty degrees. The gas fumes were terrible and I expected any minute that the car would burn up or roll down an embankment, yet I felt no fear. There was only one other passenger in the car at the time. She had tried to follow me, and having been

thrown in some peculiar way under the seat was crying for help. I assisted her while mentally and continuously repeating the words read from the *Sentinel*: "There is no death; Life is infinite."

Presently some men with lanterns came to hunt for us, and with them came the conductors. When they found we were not hurt they asked me where the man was who was occupying the section back of mine. I turned to look and saw my seat one mass of splinters. The switch had been changed before our car had passed safely over it, throwing it in front of a slowly moving engine which forced its way into my section. I would not leave the car until the Sentinel had been found, and when I was safely placed in a forward sleeper and my berth made up for the night I again opened the periodical and my eyes rested on this verse from the Bible: "I will both lay me down in peace, and sleep: for thou, Lord, only makest me dwell in safety," and I fell asleep like a child. The woman whom I had helped would not leave me for a second, saying she felt perfectly safe while with me. She felt the power she knew not of, a glimpse of which I had obtained through reading one of our Leader's gifts to humanity. Is it any wonder that I love the Christian Science periodicals?

(Mrs.) KATE CARY CLEVELAND, Norwalk, Connecticut.

4

I should like to express my gratitude for all the help and comfort that I have received from Christian Science. I did not seek it for physical healing for myself, but in order to help another whose need material medicine had failed to meet. At that time I was reaching out for the truth, and was trying to find it in the teachings of theosophy, which failed to satisfy me, as did the church in which I was brought up. But when I read "Science and Health with Key to the Scriptures" by Mary Baker Eddy, my one fear was lest its teaching was too idealistic and too lovely to be true.

It was not long before the opportunity came to me to put Christian Science to the test, and the healing that immediately followed filled me with amazement. I can never forget the gratitude and sense of spiritual uplift which came to me then, because I had never known anything like it before. Since then I have gone through difficult times when doubt and discouragement seemed very real, but by clinging to the truth I have been lifted above these difficulties.

Two healings stand out especially in my memory like landmarks. The first was of terrible fear and distress when my only son received his orders to go and fight in France. I went straight to a practitioner for help, for I felt too shaken and unnerved to cope with it myself, and in one treatment only I was beautifully healed of all fear, and could see him go without any feeling of sadness or anxiety, for I was full of hope and trust in God's protection. The second healing was when one very dear to me was taken ill suddenly in the night and the end seemed very near. I tried to reach out to God for help, though feeling paralyzed with fear, and the message came to me so clearly, that "Trials are proofs of God's care" (Science and Health, p. 66). In a moment I realized the proof of God's care in the knowledge that God is Life, and in less than four hours the whole trouble was removed and the patient was peacefully sleeping.

For these and all other proofs of God's love that Christian Science has brought to me I am very grateful; also for our literature, which is an enormous help. Twice recently I have had instantaneous healings through the study of an article in the Sentinel. The first healing was of a very un-

loving attitude of thought and the second of a sudden attack of a gastric difficulty following a confused mental state. For all these helpful articles in our periodicals and in the *Monitor* I am most grateful, and also to all those who have so kindly helped me to gain some understanding of the truth that makes free.—(Mrs.) Mabel F. Pittar, Oxford, England.

The following testimony is given with the hope that some one who may be held in bondage by sin, disease, and perhaps in "the shadow of death" may be enlightened, encouraged, and uplifted by the demonstration which I have had and am able to bear witness to, through the revelation of the truth as revealed to the world through the glorious work of our revered Leader, Mary Baker Eddy. I was afflicted with pleurisy which later developed into empyema, the latter disease necessitating a tapping operation closely followed by another operation for the removal of part of one of my ribs so that a rubber tube could be inserted, through which drainage passed for nearly a year. During this period each day seemingly brought me nearer death. I had lost the use of my right lung entirely, and in order to try to restore it I was following various medical directions, but to no avail. Many times I prayed that I might die to be relieved of the suffering.

My gratitude goes out to a very dear friend of mine who brought "Science and Health with Key to the Scriptures," the incomparable work of Mrs. Eddy, to my door. It was indeed a great demonstration which took place the day I had my first treatment. I took up Christian Science whole-heartedly, giving up all material methods, and that evening there was only a small spot of fluid from the lungs, the same gradually diminishing from then on for about eight weeks, when all drainage had ceased and the wound was completely healed. Several months later the physician who attended me during my sickness asked for my consent to have an X-ray photograph taken of my lung, to which I consented, knowing that God, Spirit, had brought about a complete restoration. The X-ray plates showed my right lung to be fully developed. Here I wish to state that the physician had said I would never have the use of that lung again. Since my healing took place there has never been any trace whatsoever of the disease. I changed my residence from Illinois to California, but never for a moment have I felt any effect of the change of climate, for I am always knowing that God is ever present and fills all space. Words can never fully express my gratitude to Mrs. Eddy and to the friends who so lovingly brought to me the realization of the one and only real and eternal Mind, God, all Life, Truth, Love, over all, and All-in-all. ELMER G. RUTH, Long Beach, California.

With deep gratitude I wish to confirm my husband's testimony in regard to his long illness and suffering and his wonderful restoration to health through Christian Science. We have also had some other fine demonstrations for our young son, as well as for myself. Words cannot express how grateful we all are for the blessings we have received through the understanding of Truth, as brought forth to us by our revered Leader, Mary Baker Eddy.

MRS. ELMER G. RUTH.

Surely with the psalmist I too can sing, "Thou anointest my head with oil; my cup runneth over." Nine years ago we came to this city as strangers; but soon found a precious friend in *The Christian Science Monitor*. The first metaphysical article we read was entitled "God," and awakened

my thought joyously to a higher, better understanding of the Father. Eagerly I looked for the next issue of the Monitor, and found an article upon Christ Jesus, which emphasized the fact that the teachings and practice of Jesus are ever available. This article sent me to my much loved Bible. I began reading the gospels again, marking with a blue pencil all of Jesus' words written in the present tense—the "nows," the "to-days," every "is," and every "are."

This was only a beginning. As I continued to read and study, chronic constipation, ulcerated sore throat, and nervous indigestion faded away. After several years, glasses were laid aside when the belief that sight depends upon matter gave place to the fact that sight is spiritual, of God. With the help of a loving practitioner a third son came to me under most harmonious conditions. I am grateful for the many healings that have come to the children through their understanding of Christian Science. Two and a half years ago my husband, also a Scientist, was sent overseas for service in France. On board ship he suffered an accident caused by a tidal wave breaking over his quarters at night, which resulted in eight ribs and his collar bone being broken, contusion of the hips, and many bruises. The second day after, he was taken to a hospital in Liverpool. He cabled home for Christian Science treatment. About five weeks later, on Armistice Day, he was able to be out and to enjoy the happy celebrations of that day. In January following, he was ordered home and immediately took up his business. He has never felt any ill effects whatever.

All these demonstrations were the result of the truth that frees, as taught and practiced by Christ Jesus, and as restated to this age by our beloved Leader, Mary Baker Eddy, in her textbook, "Science and Health with Key to the Scriptures."

(Mrs.) HELEN H. HODGE, Worcester, Massachusetts.

I am very happy to confirm and vouch for the facts as given in the above testimony, and also to express at this time my gratitude for the many benefits of Christian Science.

WILLIAM W. HODGE.

In gratitude for the many blessings which I have received through the study of Christian Science I send this testimony with the hope that it may help others. Before finding Christian Science I was most unhappy and very much in need of physical healing. I gave up all medicine and applied to a practitioner for treatment. While the physical healing has meant much to me I am more grateful for a better understanding of God, and of man's relation to Him.

One night my little son called me and when I went to his bedside I discovered that he had a very high fever, and he very soon became unconscious. I declared the truth for him, but he seemed to grow worse. The thought came to me that if he was not better by morning I would send a message to a practitioner for help. The nearest one I knew of was four hundred and fifty miles away. I just kept on declaring the truth for him and pondering such thoughts from the Scriptures as: "God is no respecter of persons," "God is love," "There is no fear in love; but perfect love casteth out fear," and, "God is light, and in him is no darkness at all." I could see nothing to doubt or fear, for God is All-in-all. And in a very short time the child went to sleep peacefully and by morning was entirely free.

The words of the psalmist: "There shall no evil befall thee, neither shall any plague come nigh thy dwelling. For he shall give his angels charge over thee, to keep thee in

all thy ways," proved to be our protection when the house we had rented burned. It happened at night and I was alone with my very small children, but everybody was beautifully protected, the loss was very small, and there was a vacant house just across the street that we were able to move into. I am grateful to Mrs. Eddy and to the practitioners who have lovingly helped me.

(Mrs.) Emma Belk, Melville, Louisiana.

Christian Science was first brought to my notice when a little nephew had been given up by the doctors after a serious operation and Christian Science treatment was sought for him. With a great desire to help I asked if I might read also. I was given a copy of The Christian Science Journal and before I had finished reading the first testimony I was healed of defective eyesight on account of which I had worn glasses for twelve years and had been told that I could never go without them. While I was reading, a film seemed to come over the glasses, and though I tried in every way to clean them I found it impossible to see through them. As I was very anxious to finish the testimony, which had impressed me more than anything I had ever read, I left off the glasses and put my hand up over my left eye, which was considered much worse than the other, and tried to read that way. occurred about seven-thirty in the evening and it was about nine-thirty when I discovered that unconsciously my hand had fallen and that I had been reading for nearly two hours without my glasses. My sister-in-law said that she had read a testimony where a lady had been healed of wearing glasses by reading Science and Health, but I replied that I had not read the book so could not be healed.

The next morning I awoke expecting one of the terrible headaches which always followed the slightest strain or excitement, but to my surprise there was none. I did not wear my glasses that day but as we were to attend the Christian Science church that evening I put my glasses on. The headache came that I had expected all day and I suffered all the time I was there. As we left the church I said that my head ached so hard I did not know how I could get home. I was asked to remove my glasses, which I did, and after going the two blocks to the car line I was again asked how my head felt. To my surprise I had no headache. The remark was then made, "You must be healed." The next day I went to see the practitioner who had my little nephew's case and I asked him if he had treated me or how I could have been healed. His remark was, "You believed what you were reading, did you not?" and when I answered, "Yes," he said, "'Thy faith hath made thee whole,' and I hope you are grateful enough to read the book, 'Science and Health with Key to the Scriptures' by Mrs. Eddy, to find out how you were healed." I left his office as one walking on air and on my way home made up my mind to trust God in all things.

My mother had passed away with the belief of consumption, and the belief of heredity had been put on me. I had spent three years in the Hawaiian Islands, returning somewhat better; but after a short time I was as ill as ever, and was at that time in what is considered almost the last stage. After the healing of my eyes I knew all things were possible with God and I knew I did not have to have special treatments, that He already knows all. I spent much time reading, and one morning as I was reading I awoke to the fact that I had not been coughing and I could not tell when I had stopped. I stood up and took several deep breaths, something I had not done for five years. After that I gained in strength and weight very rapidly. About a year after my healing a little girl was born to us. I had been told by

one of our best physicians that if I were to have a child I would die in childbirth or be an invalid the rest of my life. The birth was painless. I was up every day after the first day.

When my baby was about two months old there seemed to be trouble with one of her eyes. I asked the doctor who had attended us at her birth what it was and was told that she had been born with the tear duct closed. That was met through Christian Science in three weeks; also a deep purple birthmark which covered the center of her forehead soon disappeared. These are only a few of the beautiful proofs we have had of the efficacy of Christian Science. I can never express my gratitude in words for the spiritual change, the peace, happiness, and better understanding of God that have come to me through the study of our textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy.

(Mrs.) Frances E. Sturm, Honolulu, Hawaii.

4

I became interested in Christian Science after hearing a lecture, and I have received many blessings through it and know that I have found the "pearl of great price." With inexpressible gratitude I must testify that through Christian Science treatment I have been freed from the tobacco habit and from other false appetites, from stomach trouble, constipation, and many minor ailments, and I seem to be getting younger every day. Error was certainly a coward when Truth came to me. I am certainly grateful to God for all the writings of our beloved Leader, Mrs. Eddy, and for the periodicals. They are my daily bread. The things of this world worry me less and less every day, and I could not return to my old way of thinking any more than an oak can return to the acorn. I can never cease to be thankful for the many blessings I have received and am receiving every day through Christian Science.

EDWARD F. MANCEL, Jefferson Barracks, Missouri.

4

Christian Science saved me from the grave after four doctors had said that they could do nothing more for me and that I could not possibly live. I had had kidney trouble for twenty years and had taken every known medicine for that disease. I was such a confirmed infidel and so skeptical when I first heard of the concept of God as taught by Mrs. Eddy in "Science and Health with Key to the Scriptures" that it was nearly a year before I was willing to give Christian Science a trial. Now I bless the day that I took it up. I am a better man morally, and I am trying daily to know my true selfhood as the son of God. I have better health than I ever had before, thanks to Mrs. Eddy, and to the many Christian Scientists who have helped me over the rough places.

Christian Science has healed the children of all disease manifested for the past several years. It healed a colt of distemper and our dog that was shot through the abdomen. The children carried him into the house and one of them rushed to a practitioner for help, and the next day the dog was around and was soon as well as ever. When our last baby came the birth was most harmonious, owing to the absent help of a Christian Science practitioner.

Christian Science has made me love the Bible, a book I would not look into before. I am thankful for Christian Science and grateful to that most wonderful woman, Mrs. Eddy, for teaching me what a wonderful God I have, and I hope that some one who reads this testimony will profit by my experience in this healing truth.

E. H. CROOKS, Big Creek, California.

Signs of the Times

["Mrs. Eddy's Centenary," from The Dearborn Independent]

Christian Scientists the world over are making elaborate preparations for a dignified and impressive celebration on July 16 of the centenary of the birth of the Founder of the cult, Mrs. Mary Baker Eddy. The occasion directs attention anew, and in the sharper perspective of time, to one who holds unique place among leaders in American life, as to the particular movement of religious thought in our time of which she was in a way the initiator and apostle.

In all ages, there has been witness among men to the metaphysical basis of life. The disciples of Tsao Lo in China, of Krishna and of Buddha in India, of Zoroaster in Persia, of Hermes in Greece, of the Essenes in the Sinai Peninsula, all in some degree recognized the therapeutic value of right thinking. Æsculapius, "Father of Medicine," laid more emphasis on the spiritual than on the physical factors in healing. Summed up, as to its basic philosophy, in the Master's saying, "The life is more than meat, and the body is more than raiment," there can be no doubt that this spiritual healing was taught and practiced by the apostles and the early Christians. In essence, it had large place in the metaphysical teaching of the Christian mystics and "Ouietists" of the seventeenth and eighteenth centuries and that doctrine of "the inner light" which was the inspiration of George Fox, founder of the Society of Friends or Quakers. as of the Pilgrim Fathers of New England. Theoretically, Emerson and the Transcendentalists, who exerted so profound an influence on American thought while Mary Baker Eddy was still a young woman, taught the same philosophy and may be regarded, indeed, as the natural precursors of Christian Science. . .

It was not until the advent of Mrs. Eddy's book and the organization of her system, in the seventies, when she was already past middle age, that this metaphysical philosonly became something more than the speculative toy of the intellectual few, or the ecstatic rhapsody of the religious devotee. Until then it was decidedly caviare to the general. If to bring an idea down from the clouds and give it concrete and definite form with standing upon the solid earth is the mark of genius, Mrs. Eddy must be regarded as a genius. She made metaphysics work. And one does not have to be a Christian Scientist to concede in all fairness to the teaching a marvelously wholesome influence. The average Christian Scientist is serene. He does not let his mind be troubled, and has due regard for the peace and quietness of his neighbors. He is optimistic and neither howls nor whines, and so "stays on the job and gets there." The marked success of the institution of which he is a member is apt to be reflected in his individual success. Christian Science has done much to make sickness and the habit of complaining of sickness unfashionable and to beget that quietness and confidence which leads to achievement.

["Christian Ideal in Industry," an Editorial in The Chicago Evening Post]

A significant thing has happened in England. Last month there was held a conference of business men to consider the establishing of a Christian order in industry. Lord Robert Cecil presided, and many men conspicuous in the commercial and manufacturing life of Great Britain took part in the discussions. Nor did the conference end in words. A governing council of fifty members was named to promote its aims, and plans were formulated for an international exhibition at the Crystal palace, during the com-

ing September and October, the purpose of which will be to display the progress which has been made in England and other lands toward class reconciliation, industrial peace, and social welfare, through copartnership, profit sharing, and other forms of industrial cooperation.

Among those who spoke at the conference was Arnold S. Rowntree, famous throughout the British commonwealth because his name appears on cakes of chocolate and tins of cocoa. Mr. Rowntree urged certain principles which he regarded as fundamental:—

"Industry must create and develop human fellowship. Any practices calculated to destroy such fellowship are immoral.

"Every human individual is of intrinsic worth, and human labor cannot be considered a commodity.

"Industry must consider among its first charges the provision of an income sufficient to maintain in reasonable comfort all who engage in it; provision for special burdens to which those who engage in it may be subjected; provision for superannuation; provision for healthy conditions, development of personality, talents, and self-expression."

development of personality, talents, and self-expression."

To these Mr. Charles Smithson, another prominent business man, added the following:—

"Receipt of an income from industry should carry with it responsibility for conditions and purpose of the industry.

"All natural resources and every natural privilege which owes its worth to the labor or necessities of all should be held and utilized for the benefit of all."

We quote this much merely as indication of the general lines along which these business men are thinking. It is not our purpose here to discuss the validity of the principles enunciated. What chiefly interests us, and the fact we find most stimulating and hopeful, is that this conference was not called by preachers or by any religious organization, nor even by any group or body of social workers, but by business men-by men who are owners and operators of great industries, who are employers of labor, who are the beneficiaries of our modern system of production for profit. Moreover, these business men came together in the name of their professed faith in the ideals of Jesus Christ, to discuss-not foreign missions, or church extension, or better salaries for the clergy, or more Sunday schools, or any of the many sorts of charity work-but how they might establish a Christian order in industry. These men believe the ideals of Jesus Christ will work in commerce and industry; they believe the relation of employer and employees can be governed by his principles; they believe the relation of industry to the community can be made a Christian relation. They believe more than this—they believe that any business or industry which will not stand the test of the Christstandard ought not to survive. This thing will happen in the United States one of these days. We hope it will happen before the situation grows as critical and as dangerous here as it has become in England. But sooner or later we shall discover, as the business men across the Atlantic are discovering, that it is mere waste of time and energy to attempt to solve our human problems, social, political, or industrial, by other methods than those which are in harmony with God's standards as revealed in the teaching and life of His greatest interpreter, Jesus Christ.

[From The Living Church]

About tobacco, the explicit denial, by the W. C. T. U. and the Anti-Saloon League, of all the stories (invented as wet propaganda) with regard to a crusade for prohibiting the use of tobacco ought to be sufficient. The following

article, from the Indianapolis National Enquirer, is suggestive, however: "When tobacco goes-if it ever does-the probabilities are it will be by the same route taken by the drink business. That might have lasted for many years but for the greed of those in the business of making and selling drink and the indifference toward others of those who became slaves of the habit. Here is a case in point: There have been several fires in Washington lately in government buildings in which valuable records were lost. In more ways than one protection has become a burning issue. As a means toward that end the Senate amended the Sundry Civil bill directing heads of departments to issue anti-smoking orders in government buildings. The House shouted it down, and the papers reported it as a refusal to interfere with the man peacefully smoking at his desk. Such victories are dearly bought. If the tobacco interests were wise they would accept all such regulations and help to enforce them. The indications are that they will not do so. They will fight every restriction to the last and then go down in a wave of popular disapproval in which multitudes of smokers will join. It is another way to commit suicide."

[From an address by Rev. Robert Norwood as reported in The Morning Chronicle, Halifax, Nova Scotia]

At the bottom of this present economic hell through which we are passing, is faulty education. God cannot function through the human mind. Crazy notions, nightmare vistas, jumbled words, inarticulate mouthings of creeds and social formulas, give reality to our economic hell. Back of every war is the lack of education. Halftruths are the spawn of ignorance. . . . Never in the history of man's brief experience with the forces of civilization has the world so needed the "reasonable service" of religion as at this moment. Think of the host that threatens civilization. This host is made up of every lie that ever lifted its flaming head against the gates of the City of God. The pit is open and Demogorgon is thundering to his armies, setting them in array against the City of God. The City of God is the human brotherhood knit together by the consciousness of God as Father. . . . Education must face the tyranny of an emotional majority. Education must lead men past their passions, their prejudices, their distorted rememberings, into the light of the City of God.

[From an Editorial in The Christian Century, as Quoted in The Universalist Leader]

Following the conferences on Christian unity held in Switzerland last summer, there has come to be a quickened interest in the question of a creed for the united church. . . . The real question is, What shall the church do with a creed? In the history of the church, creeds have been used for a variety of purposes. They usually have been framed as a device for confuting heresy and have been used as a sort of yardstick by which theologians of the minority opinion have been measured and condemned. . . . But creeds have been the instruments of schism in every age. Even a respectable old creed embedded in the liturgy may on occasion become a device of division and strife among Christ's followers to-day just as in the past. Why undertake to standardize the thinking of the church on the great themes of the gospel? Thought refuses any fetters. The church of the future needs no creed but Christ himself. Christ is Christianity. If religion is life, nothing but a life can adequately express it. In the unity councils of to-day it cannot be too vigorously asserted that the creedal method of unity has failed and that it is time to try the unity with which the early church began but which it failed to maintain, a unity based on loyalty to a common Lord within which the mind is left unfettered to pursue the truth.

[Mary B. Mullett in The American Magazine]

On an ocean steamship in these days one gets a sidelight on the results of prohibition. No alcoholic drinks can be served within the three-mile limit from shore; but beyond that one would expect the bar to do the greatest business in its history. The bar steward, however, has a different story to tell. According to him, Americans do not seize this opportunity to satisfy their accumulated thirst, but are drinking far less now than before prohibition. Some men who used to imbibe pretty freely on shipboard are total abstainers now.

[S. K. Rateliffe in The Century Magazine]

We must put ourselves straightly up against the fact that, as regards all convention and simple acceptance of rule and tradition in belief and personal conduct, the past is past. It was in Ibsen's day that the younger generation's knocking at the door sounded ominous. They are not knocking now; they are taking positions by storm. The old standards of right and wrong, of proper and improper, even of ugly and beautiful, they decline to take on trust. They have apparently done with hearsay and make-believe. They ask: "How do you know? Have you ever tried it?" For any sympathetic elder, looking on, it is impossible to miss the evidence that reveals, beneath the recklessness and frivolity, a resolute search for reality.

Notice

SHORT TERM SUBSCRIPTION AND ORDER RATES

Attention is called to the new rates now in effect on short term subscriptions for *The Christian Science Monitor*, Christian Science Sentinel, and The Christian Science Journal; also on single copies of the Sentinel and the Journal. These rates are stated in the advertisements found on the inside front cover page of the Sentinel and on page "iv" of the Journal.

Attention is also called to the rates scheduled below, now effective on all quantity orders for any of the Christian Science periodicals:

Monitor	•					\$.04	a	copy
Sentinel						.071/2		"
Journal						.30		"
Der Herold						.18		"
Le Héraut						.18		"
Quarterly .		•	•	٠	•	.221/2		"

These rates are net and take the place of the former 10% discount on periodical orders.

An exception to the *Monitor* rate given above is made in cases where orders specify that the copies desired are for free distribution at a Christian Science lecture or for free distribution on other special occasions. Such orders will be filled at 3 cents a copy.

The uniform retail price on the Sentinel is now 10 cents a copy, and on the Journal 35 cents a copy. The Monitor single copy price remains at 5 cents.

Discounts to reading rooms on subscriptions and on orders for general publications remain as before.

Church Notices

From the Clerk of The Mother Church

Church Tenets.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to Edward L. Ripley, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in *The Christian Science Monitor*, were run off at the time of their publication in the *Monitor*.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 814" x 1034". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for *The Christian Science Monitor*, *Journal*, *Sentinel*, *Quarterly*, and *Heralds*, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and immediate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe, have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

There are now on sale six new pamphlets containing articles reprinted from the Christian Science periodicals, as follows: "Government," "Employment," "Work and Play," "Progress," "Occupation," "Relationship." Price 5 cents a copy. Reading Room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U. S. A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U. S. A.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder

of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large Type (18-point) on Warren's heavy India Bible paper, bound in leather. Size 8 by 10³4 inches. Single copy 87.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in The Christian Science Journal from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in The Christian Science Journal and Sentinel, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good. Rudimental Divine Science, No and Yes. Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

German Translation. Alternate pages of English and German.

Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1805, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

Christian Science Literature

"Science and Health with Key to the Scriptures" and all other published writings of Mary Baker Eddy are listed on the outside back cover page of this Sentinel.

The Christian Science Journal

Founded, 1883, by Mary Baker Eddy. This monthly magazine is an official organ of The First Church of Christ, Scientist, in Boston, Massachusetts. Contains articles, editorials, and testimonies of healing, a directory of Christian Science Churches, Societies, and Reading Rooms; also in the January, April, July, and October issues a list of Christian Science Practitioners and Nurses. Subscription price, payable in advance, postpaid to all countries: One year, \$3.00; six months, \$1.75; three months, \$1.00; single copy, 35 cents.

The Christian Science Quarterly

Founded, 1890, by Mary Baker Eddy. Published January, April, July, and October. Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size. Subscription price, payable in advance, postpaid, to all countries: One year, \$1.00; single copy, 25 cents.

Christian Science Sentinel

Established, 1898, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. Subscription price, payable in advance, postpaid, to all countries: One year, \$3.00; six months, \$1.75; three months, \$1.00; single copy, 10 cents.

Der Herold der Christian Science

Authorized, 1903, by Mary Baker Eddy. A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months, 50 cents; single copy, 20 cents.

Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months 50 cents; single copy, 20 cents.

The Christian Science Monitor

An International Daily Newspaper. Founded, 1908, by Mary Baker Eddy. Daily, except Sundays. Its own world-wide news service is supplemented by the service of the Associated Press and of the United Press Association. Complete in its departments; unique in its Home Forum page. Full page of editorials dealing truthfully and fearlessly with vital questions of the day. Subscription price, payable in advance, postpaid to all countries: One year, \$9.00; six months, \$5.00; three months, \$3.00; one month, \$1.10; single copy, 5 cents.

Subscriptions will begin with the next issue after the receipt of the order. Information regarding bound volumes of the weekly and monthly periodicals will be given upon request.

VOLUME XXIII

JULY 30, 1921

NUMBER 48

The Straight and Narrow Way

ROBERT RAMSEY

IN the seventh chapter of the gospel of Matthew we read, "Enter ye in at the strait gate: for wide is the gate, and broad is the way, that leadeth to destruction, and many there be which go in thereat: because strait is the gate, and narrow is the way, which leadeth unto life, and few there be that find it." The present day application of this passage is made clear in "Science and Health with Key to the Scriptures" by Mary Baker Eddy, on page 233, where we read: "Every day makes its demands upon us for higher proofs rather than professions of Christian power. These proofs consist solely in the destruction of sin, sickness, and death by the power of Spirit, as Jesus destroyed them. This is an element of progress, and progress is the law of God, whose law demands of us only what we can certainly fulfil." To make the matter absolutely clear it is necessary to consider another passage from Science and Health (p. 72), "Mortal belief (the material sense of life) and immortal Truth (the spiritual sense) are the tares and the wheat, which are not united by progress, but separated."

Every mortal, then, is each day faced with what he calls his human life problem. This human sense of being and all that it includes would, if it were real, be a mixture of tares and wheat; but since a mixture of error and truth cannot really exist, this suppositional mixture is not scientifically real but is a counterfeit. This counterfeit, like any other counterfeit, cannot be made into a reality, but as progress separates from the wheat and destroys the tares of sin, sickness, and death, the counterfeit is dissipated and real life is found, through spiritual sense, to be the reflection of Principle. Any belief in the reality of the human, or mixture of wheat and tares, inevitably leads to destruction, for every counterfeit must be destroyed.

The Christian Science Scntincl was established by Mrs. Eddy to guard the way to Life, and to warn travelers of the broad ways which lead to destruction. These broad ways are many in number but some of them seem more in the road of the journeying Scientist than others. Every day it is demanded of the Scientist that he journey along the narrow way leading from material sense to spiritual sense. Every day material sense throws its unreal, but seemingly very real, difficulty in the human path. Temptation comes to leave the narrow way where the difficulty seems to be and take one of the broader ways which seem more easy. Reason and revelation, however, have placed signposts in front of all these wide gates and broad ways, and Christian Science enables the traveler to understand these signs.

The signpost at one wide gate leading nowhere says, "Do not trouble about your material difficulty; or, if it seems necessary, take the best human footstep; learn the letter and profess Christian Science and all will be well." The signpost on the opposite wide gate says, "Study your difficulty, learn its every corner, turn, and twist, and then you will be able

to deny it thoroughly; you must meantime know both good and evil; if you do not meet your difficulty, all is well; you are suffering for righteousness' sake." A third signpost at another wide gate says, "Make up your mind that there is no difficulty; come in here and rejoice that you are the child of God." The first attitude of thought leads to the neglect of the counterfeit, and so allows it to smolder on until material sense consumes it. The second makes a huge reality of it, and the third calls it the child of God. All these ways, therefore, accept the reality of the counterfeit and so lead to destruction. The signpost on the narrow way shows that way to "consist solely in the destruction of sin, sickness, and death by the power of Spirit, as Jesus destroyed them."

Spiritual sense, the knowledge of God and man in God's image, must be gained through study of the letter, but it must also be applied to the difficulties arising in the counterfeit or human experience, and the difficulty can never be greater than the individual's understanding of the power of Spirit can destroy. The difficulties are not neglected, but no effort is made to overcome them by any other means than reliance on the "power of Spirit, as Jesus destroyed them." The difficulties are not studied and elevated into huge realities but are recognized as latent fears, part of that material sense which progress is uncovering and separating as unreal. The difficulties are denied by understanding the truth that man is in reality perfect, that spiritual sense alone is real and is supported by God, not by human will power. The human counterfeit is not thereby confused with the real man, called the child of God, or elevated to at-one-ment with reality.

Since fear cannot turn the traveler from the straight and narrow way he will, through watching and praying, find the Father-Mother God helping and sustaining the poor struggling human sense and delivering it from belief in the material. In "Miscellaneous Writings" Mrs. Eddy says on page 115, "Your means of protection and defense from sin are, constant watchfulness and prayer that you enter not into temptation and are delivered from every claim of evil, till you intelligently know and demonstrate, in Science, that evil has neither prestige, power, nor existence, since God, good, is All-in-all."

Vision

HAZEL L. ZIMMERMAN

AMAN'S most urgent need, if he would work out his own salvation and do his part thereby in working out the salvation of the world, is vision, not the vision referred to as the act of seeing materially but, on the contrary, the act of spiritual perception which enables him to take cognizance of the unfolding of the purposes of infinite Mind through spiritual thinking, through founding his thinking upon Principle. Under the marginal heading, "Vision opening," on page 428 of "Science and Health with Key to the Scriptures," Mrs. Eddy says, "Man's privilege at this supreme moment is to prove the words of our Master: 'If a man keep my saying, he shall never see death.' To divest thought of false

trusts and material evidences in order that the spiritual facts of being may appear,—this is the great attainment by means of which we shall sweep away the false and give place to the true."

Undoubtedly the world's great need in this supreme moment of greater responsibilities, shifting standards and new ideals is a vision that will not fail, a vision that will look straight through the seeming to the real, and that vision is to be attained by the individual and therefore by the world through proving the words which Jesus has already proved: "If a man keep my saying, he shall never see death." "My" as it is used in this instance does not refer to any personal statement, but rather to the "I" or one Mind of which the Christ-idea is the infinite manifestation. Just what it is that God, Mind, requires of man is recorded clearly and concisely in the sixth chapter of Micah: "He hath shewed thee, O man, what is good; and what doth the Lord require of thee, but to do justly, and to love mercy, and to walk humbly with thy God?" It is interesting in analyzing the first line of this verse to consider the thirty-first verse of the first chapter of Genesis, where we read that "God saw every thing that he had made, and, behold, it was very good." It follows, then, that God, being the one cause and creator, and man and the universe being His perfect and complete creation, the ever presence of good as the only reality both in the creator and His creation is a permanent fact. The real man, therefore, could never do otherwise than reflect the allness of good in doing justly, in loving-kindness and merciful dealing manifested through his right activity; for man as spiritual idea is the conscious and constant reflection of infinite Mind.

The real work to be undertaken in carrying out the requirements as set forth by Micah, necessitates diligent effort in the right direction. It means proving the spiritual man to be the only reality. It means constant mental alertness; for when the supposititious opposite of the real, the counterfeit of the one Mind, called mortal mind, would lay claim to an existence of its own, an existence apart from God in which it would attempt to counterfeit God's creation in its own forms of matter, call them good, and seek to urge them upon the world in the guise of good, then the vision which calmly looks straight through the seeming to the real is imperative.

It is obvious that spiritual vision plays an important part in detecting and rejecting the counterfeit, and the process of purifying thought of its tendency to trust in forms of matter results in spiritual fact being revealed as the only real, and this revelation brings with it freedom from the belief of life in matter and the resultant recognition of life as Godbestowed, God-governed. What is this but "walking with God," experiencing each day a greater unfolding of the good that is God's present gift to His idea, reflecting divine Love which is the rightful heritage of God's child, living each day according to the measuring rule of Principle, alert always to see that each thought and act is founded upon Principle and therefore is the essence of good? This is the proving of our Master's words, and through this proving we shall obtain the promise given, we "shall never see death," for death is, in the last analysis, the belief of life in matter and that belief becomes an impossibility to the man who is actively engaged in proving the only reality to be that of life in Spirit.

Spiritual vision is, then, the recognition of spiritual law as the only law, and the fulfilling of this law is spiritual love, the love which Jesus practiced when he consistently and persistently refused to see man as fallen, sick, sinning, or dead, but always as the whole, perfect, and complete expression of

infinite Mind, upright, pure, free, experiencing always the law of perfect health which is his birthright. There is no greater love. On page 17 of "Rudimental Divine Science," Mrs. Eddy has wisely said, "The ways of Christianity have not changed. Meekness, selflessness, and love are the paths of His testimony and the footsteps of His flock."

Unity

FRANK H. SPRAGUE

HE claim of ignorance is responsible for all manner of ▲ material misconceptions. Resting as it does on the deceptive testimony of the physical senses, the method of scientific research which has dominated the activities of modern civilization has been largely responsible for the spread of agnosticism as a religious doctrine as well as a philosophical tenet, until now professed ignorance of God is frequently regarded even in theological circles as a sort of hallmark of intellectual culture rather than as a confession of the lack of spiritual perception, for have not religionists of various creeds, indeed, come to accept unquestioningly the illogical and absurd supposition that an all-wise creator made man blindfold, as it were, to grope after the truth as best he could amid a maze of decoying illusions and unavoidable pitfalls? Although the apostle John declares that to know the only true God and His reflection, spiritual man, "is life eternal," the Christian world has become so mesmerized with the notion that it was not intended that man should understand his Maker, that blind belief in the unknown almost entirely usurps the place of that living faith which enabled the early disciples to prove their knowledge of God even in ways which compelled acknowledgment from the incredulous senses. Nevertheless even the signal advances in material directions which have been made within modern times are attributable to the overcoming in some measure of the belief of ignorancethe belief that God's ways are beyond man's comprehension. Says Mrs. Eddy in the Preface to Science and Health (p. vii): "Ignorance of God is no longer the stepping-stone to faith. The only guarantee of obedience is a right apprehension of Him whom to know aright is Life eternal." As it dawns on mankind that it is not a decree of Deity but self-limiting belief that seems to set boundaries to human knowledge, the solution of every human problem is seen to lie in the spiritual understanding of God, which antidotes both ignorance and sin.

When the unity of good in divine Science is grasped, the oneness of evil, as a false claim, becomes apparent also, and the futility of trying to banish this or that symptom of evil without taking into account the baselessness of the claim of evil as a whole, is obvious. By consenting to the arguments of error or evil in one form, we put ourselves in league with the asserted operations of error in other and often unsuspected directions, and in so doing invite penalties which are supposed to attach to other specific forms of transgression. To plead ignorance, the supposition that man is separated from the reflection of infinite intelligence, as an excuse for wrongdoing, is to open the door at the same time, perchance, to malice and hate.

"The time for thinkers has come," writes Mrs. Eddy on page vii of the Preface to Science and Health. Although forced to bestir themselves in certain directions by the seeming exigencies of a struggle for existence or by the impulse to gratify personal desires, mankind, as a rule, have shown little inclination to reach out in a spontaneous effort to know the truth about God which alone frees thought

from the bondage of sin and self-deception. This sense of obliviousness or unalertness to the demand of Spirit, which induces most mortals to delegate the responsibility for their spiritual and physical well-being to a minister or priest and a family doctor, to seek salvation by proxy as it were, would prevent Christian Scientists from demonstrating man's scientific relation to his creating, sustaining, informing divine Principle by persuading them to rely habitually on the services of a practitioner and to look to teachers and church officials for wisdom and guidance more than to God, who, as the apostle James phrases it, "giveth to all men liberally, and upbraideth not." It is impossible to imbibe the spirit of Christian Science without realizing in a peculiar sense the force of the Revelator's words when he declares that those who apprehend the truth manifested by Christ Jesus are made "kings and priests unto God and his Father." No end of bitterness and intolerance has arisen in the traditional church from the delegation to ecclesiastical authorities and personal representatives of the individual's prerogative of thinking for himself, of demonstrating his highest understanding of Principle and according the same liberty to others. How can one prove that man is God-governed, as Christian Science teaches, so long as he leans on personal opinion and human authority as a guide to right activity, instead of looking to the source of all true wisdom and understanding for enlightenment and wisdom?

It is the purpose of all true religion to lead mankind to perceive and demonstrate spiritual truth, the truth about God and man. Because Mrs. Eddy discovered and demonstrated this truth, she was able to set forth in her writings a point of view which encourages and assists others likewise to discover and prove man's scientific relation to his divine Principle, God. Whether, in any case, the message is voiced through a human personality or the written word, the symbol or vehicle can at best only point the direction in which the student must look in order to discover for himself the truth which the pioneer discoverer first grasped. If, however, the means or instrument is made an end in itself, so that it becomes a substitute for the truth instead of remaining a guidepost that points the way, its saving efficacy is lost; and while, owing to the tenacity of ecclesiastical beliefs and religious sentiment, the solidarity of church organization may be preserved indefinitely, the only scientific bond of unity is that in which each member is encouraged to demonstrate his highest understanding of Principle in the sanctity of his own conscience, as must ever be the case if the spiritual order of creation is observed, in which, as Mrs. Eddy says (Science and Health, p. 125), "Reflecting God's government, man is self-governed."

Even the most flourishing social or religious bodies in which allegiance to, or domination by, personal factors is allowed to interfere with the individual's demonstration of right activity on the basis of Principle, must sooner or later suffer dissolution, because they lack a scientific foundation. Mrs. Eddy strove constantly to encourage Christian Scientists to prove in practice the scientific relationship which obtains between God and man, Principle and its idea. Thus she counseled her students: "Finally, brethren, wait patiently on God; return blessing for cursing; be not overcome of evil, but overcome evil with good; be steadfast, abide and abound in faith, understanding, and good works; study the Bible and the textbook of our denomination; obey strictly the laws that be, and follow your Leader only so far as she follows Christ" (Message to The Mother Church for 1901, p. 34); and in the Manual (Art. XXVI, Sect 6), she says of members of associations, "The pupils shall be guided by the BIBLE, and SCIENCE AND HEALTH, not by their teachers' personal views."

Loyalty to Spirit understood and demonstrated is the only ground of spiritual unity, and there can be no other real unity. Inasmuch, however, as Spirit's manifestation may seem to have a supposititious misrepresentation or falsification of the true idea in some infringing form of belief, mortal mind claims to achieve unity by bringing about unanimity in human beliefs and sentiments. To the degree that each Christian Scientist wakes to an unselfed realization of his individual responsibility in applying the understanding of right activity to the problems which confront him and his fellows in the pursuit of a common cause, his demonstration must tend to harmonize with that of others who are like-minded, until these seemingly independent currents of thought and action, obedient to Truth's leadership, are found setting steadily in the direction of a common, constructive purpose. The Master prayed for his disciples that they all might be one, even as he and the Father were one. In order to give the freest possible field for overcoming the material, counterfeit belief of unity through the demonstration of true, spiritual unity, and bringing out harmony in the bond of Christian fellowship even where individual opinions differ, our Leader established the branch churches under a democratic system of government. For while at the present stage in the spiritualization of human concepts, the sense of the minority may sometimes be nearer right than that of the majority, such a training school in which each one may learn in practice to concede freely and ungrudgingly to others the rights of conscience which he claims for himself, affords an opportunity for proving "the unity of the Spirit" which would be impossible under a system in which the church policy was dictated by even the wisest of mortals. And is it not clear that one who possessed sufficient wisdom to justify him in acting in such a capacity would recognize the incongruity, from the Christianly scientific standpoint, of doing such a thing?

Honesty

PAUL E. BUNTZLER

HONESTY is a quality of Mind, a reflection of divine Principle; it is correct thinking and therefore correct action. Man is honest just in proportion as he reflects the invariable Principle, as he brings out in daily life the fundamental spiritual cause, the allness of goodness. To be absolutely conscious of his honesty gives a man the certainty that bears him on through all difficulties and overcomes every obstacle, for he knows himself to be the reflection of Mind, infinite good. Knowing that he has sought Truth with an honest heart gives the beginner in Christian Science strength to resist the insinuations of error which present themselves to thought: "I have not studied Christian Science long enough," or, "My understanding is too small." He has learned that the battle is really not his but the Lord's.

Mrs. Eddy writes in "Science and Health with Key to the Scriptures" on page 453, "Honesty is spiritual power." This shows clearly that assurance, peace, liberty in action and speech are connected with honesty. To acknowledge to one's self honestly in the quietude of thought the ever presence and allness of God, infinite Mind, enables one to demonstrate, step by step, man in the image and likeness of God. This admission destroys the belief in many minds or powers, as well as the belief in a bad influence of these minds on our thoughts. A lie can never resist honesty, as there is no truth, no substance in it, and time always will prove its fallibility.

it.

Thousands of lies may be put before the world, be it in form of wrong reports, misinformation, or through personal influence and misrepresentation of facts, but all that cannot for any length of time affect or deceive the honest seeker of Truth. Before the clear and honest understanding of God as all-knowing Mind, who speaks always to man through spiritual discernment, as He did to the prophets thousands of years ago, the lie must disappear, and it is immaterial whether there be but one lie or legions. Yet in order to be truly honest a man must surrender his own will, give up preconceived opinions and let that Mind be in him "which was also in Christ Jesus." Then God's way will be shown, be it through a clearer discernment or through correct information. Paul was honest when he persecuted at first the early Christians; he believed himself to be absolutely serving the right; but he humbly accepted the truth when he received a clearer vision. This honesty enabled him to change his standpoint suddenly and he became a friend to those whom he had previously persecuted. He did not ask himself, "What will people say;" he stood firmly for the right, now revealed to him by the Christ on his way to Damascus.

Among business men there is a very far spread belief that personal benefit can be realized by overcharging others, or through any other transaction that cannot stand the absolute test of honesty; and this belief is not only among business men, it shows itself everywhere in the effort to deceive others for personal benefit. But as one realizes that every seeming profit or personal advantage received by such means does not bring the least benefit, on the contrary brings certain loss, inasmuch as it separates one from divine Principle, the one living God, the nothingness of selfish gain is seen. The human mind can then perceive that selfishness and jealousy can only exist because a belief in personal lack is accepted, and this again shows a belief of existence in matter. God does not need to supply one individual by taking away what belongs to another. Mind's means are not limited, and before Him not one has any special favor; as the Bible says: "God is no respecter of persons." When we realize the universe to be spiritual, then we know that every individual and every institution has its correct and right place, and selfishness, dishonesty, and jealousy will disappear. On page 8 of "Rudimental Divine Science" we read, "Be honest, be true to thyself, and true to others; then it follows thou wilt be strong in God, the eternal good." So honesty is seen to be a link that connects man with God, giving him spiritual power and freedom, without which the kingdom of God cannot be perceived.

True Rejoicing

NELLIE B. FORSYTHE

WHEN the seventy disciples returned to Jesus expressing their joy that the devils were subject unto them through his name, Jesus warned them saying, "Notwithstanding in this rejoice not, that the spirits are subject unto you; but rather rejoice, because your names are written in heaven." How well Jesus understood the hidden ways of human thought when he made this fine distinction between the rejoicing in the domination of the true or divine Mind over the false or mortal mind beliefs, and the rejoicing over the forever fact that man's being is in heaven. Mary Baker Eddy defines heaven on page 587 of "Science and Health with Key to the Scriptures." thus: "Heaven. Harmony; the reign of Spirit; government by divine Principle; spirituality; bliss; the atmosphere of Soul." "Name" and "character" are often used as synonyms in the Bible, therefore Jesus' command to the seventy was to rejoice that their character was included or expressed in harmony or in the perfect realm of spiritual government, where man's true character, the image and likeness of God, is preserved intact, having no cognizance of sickness, sin, or death.

In Science and Health (p. 340) we read, "This text in the book of Ecclesiastes conveys the Christian Science thought, especially when the word duty, which is not in the original, is omitted: 'Let us hear the conclusion of the whole matter: Fear God, and keep His commandments: for this is the whole duty of man.' In other words: Let us hear the conclusion of the whole matter: love God and keep His commandments: for this is the whole of man in His image and likeness. Divine Love is infinite. Therefore all that really exists is in and of God, and manifests His love." To one who is seeking unchangeable truth, the very essence of rejoicing would be in the great fact that divine Science reveals to him God in whom is vested all law, law which governs man at all times if he will but realize it. Law and Principle are so closely allied that one can hardly be thought of without the other, for the uniform recurrence of effect which is law is the mandate of Principle. Since man is allied consciously with the law of good, God, good is his experience.

What if the combination of circumstances does seem overwhelming and the waves of error mount one above another? These mountains of negation never touched law, never touched the true man, for "behold, he that keepeth Israel shall neither slumber nor sleep," and the true representative of Soul, allied consciously with God, who is Principle, is rejoicing in this fact. Think how many times we are told in the Bible to rejoice. Jesus, whose joy was deep and quiet, because of his thorough knowledge of his true character and that of his fellow man, gave us this encouraging command: "Be of good cheer; I have overcome the world." Let us then look away from error, and let it sink into the darkness from which it came, for as Paul tells us, "Ye are all the children of light, and the children of the day: we are not of the night, nor of darkness." Let us see the wonder and grandeur of God's universe, where man is found to be perfect and joyous and free, sustained and contained in Principle, his divine source.

Error is believing something to be true that is not true. The liar told Jesus that his name was legion, but Jesus recognized but one error, ignorance of God. Knowledge of God, good, is life and peace. As knowledge replaces ignorance, healing takes place naturally and spontaneously with those who hunger and thirst after righteousness, after right knowledge of God, for the promise is, they shall be filled. Healing and enlightenment are not dependent upon scholastic attainment or upon human intellect. Jesus said, "He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father." Nothing and no man can hinder the earnest one from applying to and proving the Mind which knows all right thoughts. The law of supply and demand is a divine statute, and wherever demand exists, that demand is unfailingly supplied in proportion to its purity of purpose. This must be so, for there can be no vacuum in the kingdom of the God who is infinite, limitless, boundless, exhaustless, universal. Each one must demand for himself, and prove his sonship with God.

It is for us to rejoice every hour that no matter how the mountains of wrong thought and its manifestations loom ahead, a grain of understanding as small as the mustard seed will remove these mountains, for they are formed of mist, mystification of thought, and are always dispelled by right knowledge of God. When these "mountains" disappear, he who has striven faithfully to replace error with truth will be found rejoicing in his new-found certainty of spiritual law, his invulnerable position as heir to the kingdom of heaven, rather than in the subjection of the devils of material sense. In the words of Bildad, in the book of Job, "Behold, this is the joy of his way, and out of the earth shall others grow. Behold, God will not cast away a perfect man . . . till he fill thy mouth with laughing, and thy lips with rejoicing."

One Cause and One Effect

R. W. BRYAN

N^O matter how black and overwhelming the clouds of erroneous thinking may seem, the student of Christian Science can always rest secure in the knowledge that, since he is conscious of his own existence, consciousness must be. Since consciousness or being is, there must be the truth about it. If true being is, then false being or the lie about being can only have a supposititious existence. It can only be on the assumption that that which really is is not. That which true being expresses must be cause, and that which is cause must be one whole, for if it were two or more entities it could not be cause in any true sense of the word. Clearly, first cause must be one, in order to produce true being. Have we not the warrant of Scripture for saying that a house divided against itself cannot stand? As it would ever need Being to produce being, first cause must exist in and of itself; that is to say, it must be self-existent Being or Life itself. From this solid basis of a self-existent first cause which is Life itself the student can logically proceed to deduce the facts of true being and apply them fearlessly to solve the problems of human existence.

It is clear that that which exists in and of itself never began and can never end; in other words, it is eternal. It is also clear that that which is eternal must be good itself in the highest sense of the word good, for if it contained within itself any elements of evil it would hold within itself the seeds of ultimate decay and destruction. If such a state of things were thinkable it would amount to an absurdity, for if it were possible for self-existent first cause to be destroyed then sooner or later a position would be reached where nothing would be-a concept which is clearly absurd. Hence matter and human thinking, both of which are subject to annihilation, have no part in real being. Reasoning after this fashion, one sees that all real being is the effect or expression of a self-existent, harmonious, spiritual cause. This cause is God, as understood in Christian Science. Cause cannot be apart from effect, hence cause must be expressed as effect. Mrs. Eddy, on page 303 of "Science and Health with Key to the Scriptures," puts this very clearly when she says: "God, without the image and likeness of Himself, would be a nonentity, or Mind unexpressed. He would be without a witness or proof of His own nature. Spiritual man is the image or idea of God, an idea which cannot be lost nor separated from its divine Principle." Man, then, is the effect or expression or image of God; hence he is spiritual, harmonious, and eternal.

Mortal man expressing discord or inharmony is not and cannot be the effect of harmonious first cause, or God. This follows naturally if one considers that the very nature of effect is to express the character, the essence, if one can so

,

1

put it, of cause. Nearly nineteen hundred years ago Jesus of Nazareth sought to make this point clear to his disciples in the phrase, "For of thorns men do not gather figs, nor of a bramble bush gather they grapes." So in like fashion one can reason with regard to all the phenomena of human existence; nothing not in accord with infinite harmony has any real being, for only that which manifests harmony can be the expression of harmonious, self-existent first cause, or God. The truth about effect can hardly be more clearly and concisely stated than in Mrs. Eddy's words on page 207 of Science and Health, under the marginal heading "One primal cause," where she says: "There is but one primal cause. Therefore there can be no effect from any other cause, and there can be no reality in aught which does not proceed from this great and only cause."

No lies can stand in the presence of the truth realized. In solving his problems, therefore, the student needs to keep ever bright the flaming sword of spiritual understanding. This understanding is the knowledge of man's perfection as the effect or expression of perfect first cause or God. With it he can keep out of his thinking every thought unlike God; with it as shield he fears no lie which says that man is sick or sinning or dying, for with it he guards "the way of the tree of life" and lets nothing enter there which defileth or maketh a lie. This sword is bright and its work well done exactly as the student is himself following in the footsteps of the Master and gaining that Mind "which was also in Christ Jesus." Jesus of Nazareth saw clearly the oneness of cause and effect. On page 476 of "Science and Health with Key to the Scriptures" Mrs. Eddy says: "Jesus beheld in Science the perfect man, who appeared to him where sinning mortal man appears to mortals. In this perfect man the Saviour saw God's own likeness, and this correct view of man healed the sick." Each one of us, in the measure of his understanding of this teaching, can go and do likewise, for did not Jesus himself say, "He that believeth on me [that is, understandeth my teaching], the works that I do shall he do also"?

[Written for the Sentinel]

Be of Good Cheer

LOUISE KING

BE of good cheer, the Master said, For the world I have overcome; And though tribulations you will have, They will help you heavenward, home.

Be of good cheer, he is saying still; Though your manifestation of good May be evil spoken of, trampled upon, Maligned, and misunderstood.

It cannot matter to you one jot What the world may think or say. It knows naught of the heaven in which you dwell, Of the peace which is yours alway.

If it said such untrue things of him, Why should it not say them of you? Do not stop to wonder, but press right on To the goal that is ever in view!

Be of good cheer, then, faithful one, For your Father is caring for you As He does for the sparrow and lily pure; And His love is eternally new.

His protection is o'er you, His arms underneath, Everlastingly, tenderly near; Then look up in His face; so, reflecting His love, Dear faithful one, be of good cheer!

Faith by Works

THE apostle James put the practice of Christian Science in one concrete sentence when he wrote, "Shew me thy faith without thy works, and I will shew thee my faith by my works." In other words, he saw absolutely clearly that a scientific theory remains merely a scientific theory until it is shown to be true. Now Christianity, as Mrs. Eddy has shown, is a demonstrable Science. "If Christianity is not scientific," she writes, on page 342 of Science and Health, "and Science is not of God, then there is no invariable law, and truth becomes an accident." God necessarily is Principle, and that is what the writers of the New Testament are unquestionably perpetually insisting upon when they talk of a scientific knowledge of God, of a zeal of God but not according to scientific knowledge, of revelation in the scientific knowledge of Him, or to come into a scientific knowledge of the truth. There is no question about this whatever. The word used in the Greek text means something more than knowledge; it means full, exact, or scientific knowledge. Consequently, when Mrs. Eddy writes that if Science is not of God, then there is no invariable law, she is adhering absolutely to the letter and spirit of the New Testament, and is saying that if Science is not of Principle, or is not of Truth, then there is no such thing as Science at all, because there is no law.

All this, of course, is the theory of Christianity, the theory of Christian Science. But Christ Jesus never intended for one moment that it should be left as a theory; he knew that any theory he might preach, so long as it remained a theory, was of no more value than the theories of the scribes or Pharisees. Consequently, when he sent out his disciples it was not only to preach his theory but to demonstrate the truth of that theory, or, as he put it, to preach the gospel and to heal the sick. What is the gospel but the good news about Principle, and what is healing but the demonstration of the truth of this good news. That is why there is no such thing as a miracle in the supernatural sense, and that is why Huxley insisted, perfectly scientifically, that what people were pleased to call miracles could not possibly be an infringement of law, which cannot be infringed, that they could be nothing other than demonstrations of hitherto unsuspected law. The gospel preached by Christ Jesus was the preaching of hitherto unsuspected law, and the so-called miracles of Jesus the Christ were simply the object lessons in demonstration of the truth of this law. And that is exactly what the writer of the Fourth Gospel means when he says, "And the light shineth in darkness; and the darkness comprehended it not." The only thing that ever has existed is infinite Principle and its infinite manifestation, and this Principle has existed in spite of the darkness, the mesmerism of human sense, though human sense has never comprehended it.

In the light of this, it is perfectly easy to see why Mrs. Eddy insisted so definitely on the necessity for healing, and why she accepted the responsibility for healing for those who went out to preach Christian Science. "In Science we can use only what we understand," she writes, on page 329 of Science and Health. "We must prove our faith by demonstration." It is perfectly clear, therefore, that the way to induce the world to accept Christian Science is through the healing of the sick. Talking about it, or writing about it, may be a necessary part of the work, but this talking and this writing will go for nothing at all unless, as the apostle James says, the talker or the writer is prepared to prove his faith by his works. Mrs. Eddy does not give any practitioner or student of Christian Science an opportunity for escaping the full significance of this. On page 149 of Science and Health, she writes, "The rule and its perfection of operation never vary in Science. If you fail to succeed in any case, it is because you have not demonstrated the life of Christ, Truth, more in your own life,because you have not obeyed the rule and proved the Principle of divine Science."

It is as plain from this as the multiplication table that the only way to heal the sick is by the practitioner living in accordance with Principle, that is, demonstrating Truth in his own life. It is not sufficient to have faith in somebody else, it is of no use being able simply to quote the Scriptures, it is quite futile to have a grasp of the metaphysics of the situation, unless the practitioner is living at the same time in accordance with Principle. When a man is convinced that life is eternal, he will never act on the idiotic lines of a man who bases his calculations on the reality of death; when a man knows that substance is spiritual, he will not waste his time in piling up material possessions; and when a man understands that power is entirely of Principle, he will not worry over the vanities of social intercourse or the intrigues of politics. There is one way, and one way alone, in which to gain eternal life, in which to acquire spiritual substance, and in which to enjoy divine power, and that is through the recognition of the fact that all life, substance, and power are in Principle, and to acquire the metaphysical understanding of what this means in such a way as to be able to demonstrate it. Then it will become perfectly apparent what Jesus meant when he said, "And ye shall know the truth, and the truth shall make you free." For this truth is the scientific knowledge of God, Principle, and the freedom which it generates is gained not through talking but through demonstration.

The way, then, to prove Christian Science to be this truth, is not so much for the Christian Scientist to tell his neighbors that they are wrong, as to prove to them that he is right. That is what James said so simply and so directly, and what the whole world has been trying to get away from ever since. When Christ Jesus preached his gospel, he demonstrated its efficacy so fully that the people crowded into the street in which he was, and, climbing on to the roof, reached him in that way. When a Christian Scientist begins to heal in the way Mrs. Eddy hoped to see Christian Science healing accomplished, there will be no need for him to defend himself against the criticism or the malice of the world. The mere fact that he can heal in this way will have raised him above the criticism and made him master of the malice. Then the world will take no notice of the criticism and will override the malice, by acting exactly as it acted in the days of Jesus the Christ. It was surely because Mrs. Eddy understood so clearly the re-

sponsibility of the Christian Scientist for Christian Science healing, that she wrote, on page 367 of Science and Health, "I long to see the consummation of my hope, namely, the student's higher attainments in this line of light."

FREDERICK DIXON.

"All that really is"

The simple gladness to be alive is fresh and vital because it is the proof of Life itself, untouched by any confused sense of human ways and means nurtured by the supposed mortal mind as it expands its unreal belief. The true being alive shows, of course, that there must be some cause for living, and this cause is Life, Mind, Supreme Being, than which nothing else can be proved to exist. God is the tender name given to the one Mind which makes and keeps the real man alive. Even though the human sense of living is but belief and must be replaced with the true idea, yet the fact that living appears in any way proves that there must be true Life, ever expressed as idea or divine action.

To know God as Mind is to be sure that God is present and takes care of all real living. Boundless Mind is all that could be always present and fully potent. Once one has proved to himself that Life or Mind is, he knows that what truly is must be all there is, for what is not simply does not exist. In other words, there is no halfway stage between what is and what is not. The one Mind with its idea must be all that really exists, and Mind must sustain idea in perfect order. As Mrs. Eddy says on page 150 of "Miscellaneous Writings," "God is universal; confined to no spot, defined by no dogma, appropriated by no sect. Not more to one than to all, is God demonstrable as divine Life, Truth, and Love; and His people are they that reflect Him-that reflect Love. Again, this infinite Principle, with its universal manifestation, is all that really is or can be; hence God is our Shepherd. He guards, guides, feeds, and folds the sheep of His pasture; and their ears are attuned to His call. In the words of the loving disciple, 'My sheep hear my voice, . . . and they follow me; . . . neither shall any man pluck them out of my hand."

Mind is what directs all true action, and the true action of Mind is the real man, the sheep of the great Shepherd, nourished, sustained, guarded from supposed evil, by perfect divine Love. Idea, the action of Spirit, cannot avoid knowing what its cause, the divine Mind, knows. The phrase "sheep of the great Shepherd" is, of course, only a figure of speech to show that true living follows always the guidance of its cause. Sheep, in this instance, is but a name for man, the image and likeness of Mind. The knowing of the truth in this respect broadens one's view of God and man, for it shows that what is true about Shepherd is always true of God, and that what is true of sheep must likewise be true of man. If this were not so, God and man would be confined to narrow human concepts. There is no halfway stage between all that truly is and what does not really exist. Mind and its idea is, indeed, all there really is in any instance, for any human name must be merely a term for either Mind or idea, and it never changes the nature of either Mind or idea to use any names one may choose for the sake of clearness.

One will find much profit in looking up in Mrs. Eddy's complete works the passages in which she speaks of "all that really is." On page 151 of Science and Health, for instance, she declares: "All that really exists is the divine Mind and its idea, and in this Mind the entire being is

found harmonious and eternal. The straight and narrow way is to see and acknowledge this fact, yield to this power, and follow the leadings of truth." Life consists of Mind and what Mind is conscious of. Of course the boundless and endless action which the one Mind knows must unfold with varied vigor which could never be tiresome. If the being conscious of Truth alone could be tiresome, it would not be the real goodness which is heaven. The heaven of "all that really is" could never be a bore to man, because it is quite without limits, and cannot be confined within any human concepts of pleasure. This is what people who object to goodness forget.

Though the human senses may accept false beliefs, the fact of Spirit and its idea remains intact and must be discerned, proved, and experienced in spite of these so-called senses. The sense of Spirit is the only real sense. Christian Science blesses with true joy all who turn to it with the sincere desire for freedom, because it gives the true sense of living in Mind instead of the false belief of living in matter. As Mrs. Eddy explains on page 116 of Science and Health, "Science so reverses the evidence before the corporeal human senses, as to make this Scriptural testimony true in our hearts, 'The last shall be first, and the first last,' so that God and His idea may be to us what divinity really is and must of necessity be,—all-inclusive."

This truth is not abstract or hard to profit by when it is studied and put into practice through the simple turning to Mind as the source of all good. In place of any seeming, each one needs to turn to the one Mind and find there the true idea of Life to replace the human concept. The doing of this is a joy that can never lessen, because it is maintained by divine Love. No matter what disease, sorrow, turmoil, or sense of evil claiming to be good may present itself to one, true Life and its idea is present to reject the error. "All that really is" must indeed suffice to take the seeming place of supposed mortal mind and its belief, in all its phases. The student of Christian Science, knowing the allness of Mind and idea, called by any name one pleases, has the sure basis of good on which to work and prove his way forward. To reason on this basis is to pray without ceasing the prayer that always avails, because it is the prayer of right knowing which can never be denied or made void. In vain, then, does one look to matter for help of any sort, but with perfect surety can be look to the divine Mind, for as Jeremiah phrases it in poetic figures, "Truly in vain is salvation hoped for from the hills, and from the multitude of mountains: truly in the Lord our God is the salvation of Israel." GUSTAVUS S. PAINE.

[Written for the Sentinel]

True Happiness

CHARLOTTE BRUNER

To leave ambition and false pride behind,
The thirst for wealth, the eagerness for fame,
To kindle in our hearts the welcome flame
Of self-forgetfulness, to know that Mind
Is both end and beginning,—this we find
Is the real road to happiness, the same
Way Jesus trod. Let us seek in his name
A better goal, with loving thoughts and kind
Live as the Christ, and strive for others' good;
To give, not get,—the sign of brotherhood
Which marks the sons of God. Lo! the deep peace
Of sacrifice of self is ours. Now cease
Vain longings for the world, and we gain then
True happiness, the selfless love for men.

Testimonies of Healing

After having experienced many blessings through Christian Science, I feel that I would indeed be ungrateful to God and to our beloved Leader, Mary Baker Eddy, if I longer withheld from publication a written acknowledgment of the blessings and benefits received, and would also fail to fulfill in part the ultimate purpose for which the Discoverer of Christian Science established the periodicals. Having been healed in a very few treatments of chronic catarrh of the bowels and also of goiter, I at once became vitally interested in Christian Science, and my desire to know and understand this great truth grew as the years passed and has become the absorbing interest and work of my life. I am deeply grateful to the practitioner whose loving ministrations at that time aided in lifting from me not only a sense of sickness and despair but a load of business cares and a sense of lack of supply.

My husband has also experienced many benefits from the study of Christian Science, and through the help of a practitioner has resumed work after a long period of discouragement and incapacity. I am enjoying membership in a local Christian Science society, and am grateful for the united and harmonious work being done here. I am also privileged to be a member of The Mother Church, and I am grateful for class instruction. I have demonstrated conclusively the following declarations of Mrs. Eddy's: "The vital part, the heart and soul of Christian Science, is Love" (Science and Health, p. 113); "Universal Love is the divine way in Christian Science" (Science and Health, p. 266); and that absolutely and emphatically "Love is the liberator" (p. 225). My gratitude is without bounds for the true idea of good which I have come to know and with which I am able to help others, as the result of reading and studying all of Mrs. Eddy's works and the Christian Science periodicals, which are always filled with vital messages of love for those beginners who are hungry and thirsty for words of encouragement to go forward, and replete with good for the advanced student of Christian Science and for the practitioner.

(Mrs.) Martha C. Kimmit, Rhinelander, Wisconsin.

4

It is with great joy and gladness that I relate my first experience with Christian Science. Having been a slave for ten years to a body with inflamed, diseased, and misplaced parts, it is not to be wondered at that after reading Science and Health for about two weeks, day and night, the relief from self-responsibility, and gratitude for a glimpse of the truth that God made man to have dominion over all, resulted in willingness to accept Christian Science and put into practice its rules, which restored health.

Five years of suffering had been spent in seeking help from physicians who treated a material body, with the thought of putting it in shape for an operation. Then after a very depressing period I decided to care for myself as well as I knew how, which took much time and medication. A specialist on such cases as mine was brought to my home, and after submitting to another period of greater suffering I declared it were better to die than be subjected to these would-be helps. Each year some new ailment was added, and nervousness and irritability increased, until quiet and inactivity afforded more relief than anything else.

Where once I felt so handicapped in caring for my family, I am now able, through the constant turning to Principle, divine Love, as taught in Christian Science, to

do all the work necessary at home and also to do the office work for my husband. The Bible and "Science and Health with Key to the Scriptures" are our daily mental food. I am trying to express my gratitude to Mrs. Eddy for her discovery of the rule governing the practice of this Christ Science by daily living, by putting on the new garment of Truth, and casting off the old beliefs with their discords and strife. My gratitude for the completeness of all of Mrs. Eddy's demonstrations for the advancement of Christian Science in the world can be best expressed by doing my share as I gain more understanding.

(Mrs.) Nellie A. Green, Salt Lake City, Utah.

The happy transformation of my wife from semi-invalidism to competent health and her continued increase in dominion over adverse circumstances, through the study and application of Christian Science, quickly won my interest in and acceptance of this teaching of God's allness. During several years I have had occasion to be grateful for many benefits, physical and financial, but chiefly for my happier viewpoint, which changes material trials to spiritual opportunities, and for the knowledge that if we cleave to Principle we prove that "the Father . . . he doeth the works."

I am grateful to Mrs. Eddy for the many clear-cut channels provided in our church movement for the fuller recognition of spiritual man. The Christian Science periodicals, daily, weekly, and monthly, have always been especially wonderful. No need to mutilate a number to file away special articles against a day of need, for always in the current issues may be found inspiration and help to solve the present problem. My hope is to express true gratitude by better living.—John Hudson Green.

4

It is many years since Christian Science was first presented to me and during that time I have had many proofs of its healing power as taught in "Science and Health with Key to the Scriptures" by Mrs. Eddy. The first reading convinced me that it is the truth as taught and demonstrated by Jesus and his disciples. I had been troubled for years with catarrh of the head, stomach trouble, and a cough from which I was seldom free, but as I studied the Christian Science literature along with the Bible, which had become a new book to me, these troubles disappeared.

My son had been subject to colds with high fever, often accompanied by biliousness. One night, after putting the children to bed I was reading the Lesson and could hear his constant coughing, and I thought, judging from past experiences, we would get very little sleep that night; then the thought came to me to apply the truths I was reading. I went to his room and talked to him of God's loving care and declared the truth as best I knew how, with the result that the coughing ceased and he slept well all night. One who was staying with us at the time remarked later how free he had been from colds, and he replied: "Well, I'm not afraid any more." He later told me how fearful he had been if he had got his feet wet or was caught out in a shower. Mrs. Eddy says on page 368 of Science and Health, "When fear disappears, the foundation of disease is gone." It was a great joy to me to know I could be of help to others.

12

A few weeks later my mother was instantaneously healed of neuralgia, also of an internal trouble which made it impossible for her to lie on either side, by my reading to her from Science and Health and the Bible and by applying the truth. When she was suffering with pneumonia and

11

hemorrhages of the lungs, again these books were our only help and in three days she was completely healed and able to keep a dinner engagement, and she suffered no ill effects although we were having severe winter weather, our home being in northern Michigan at the time. When my brother was suffering with inflammation of the eyes and was confined to a dark room and unable to get any relief from doctors' medicines I persuaded him to come home with me and have Christian Science treatment. In one night he was healed, and was able to be out in the bright sunlight all of the next day. We have also had healings of poison oak, and one member of the family was healed of an enlarged toe joint which was very painful; there was no change of shoes as it was not convenient at the time. These and many other healings came to us with no other help than the Bible and the Christian Science literature.

During the winter three years ago I had an attack of lung trouble and lost my voice entirely. I was unable to overcome fear as the condition was quite alarming, so I asked for help from a practitioner, which was lovingly given. There was a marked improvement in one night and in less than a month I was perfectly well. The same practitioner was called when my daughter, my son, and I were ill with Spanish influenza. My healing was instantaneous, with no sense of weakness following. My daughter was out in less than a week and in two weeks my son was back at his work.

It is with deep gratitude for the many blessings Christian Science has brought to me and mine that I send this testimony, hoping it may benefit some one as I have been benefited by reading the testimonies of others in the Christian Science publications. I am also grateful to the practitioners who have so lovingly and patiently worked for us when help has been needed.

(Mrs.) PHILMA N. SHIPPY, Palo Alto, California.

When Christian Science was first mentioned to me, I had hopelessly accepted the decree of prominent physicians on two continents. I say "hopelessly" because they had told me that a serious operation was the only chance of relief from a physical condition that was causing me such constant pain that I had ceased to think life worth the effort. The anguish was due to neglect at the time of the birth of my second child and was growing worse steadily, and these well meaning doctors could see no other way than to operate, nor could they give me any definite assurance of relief after undergoing such an ordeal. While on my way home I met a Christian Scientist, and he told me what Christian Science had become to him and to his family. He kindly recommended it to me, and leaving a copy of "Science and Health with Key to the Scriptures" by Mary Baker Eddy, he asked me to look it over. I opened it at various places but it seemed of an unknown tongue, for I could not understand it, though I had always deemed myself capable of reading English intelligently. I had no thought that it could help me, but to be courteous I assured the gentleman that I would visit a practitioner at my earliest convenience.

When the opportunity presented itself, unknown to any one I went to see a practitioner. I told her I was supposed to be ill and would like to hear what she had to tell me. She seemed to understand and I asked her to help me. That one treatment brought the healing, and when I arose to go I knew I was a changed person. I knew I was healed. I went home, destroyed the remedies and appliances the

doctors had said I must never be without, and set out for a walk. I remained out for two hours, rejoicing every step of the way, thanking God and resolving to take up the study—to give my best thought to the effort to find out the cause of this great change which had come over me so suddenly. It was the new birth that Jesus speaks of in John, and which Mrs. Eddy refers to on page 548 of Science and Health, where she says, "This is the new birth going on hourly, by which men may entertain angels, the true ideas of God, the spiritual sense of being."

This happened many years ago and I have never had a return of the trouble in any form. Many other complaints have been overcome and I have rejoiced exceedingly in a gradual awakening to better habits of thinking, a new interpretation of Life, a new hope. Mary Baker Eddy deserves appreciation as one of the greatest benefactors mankind has ever known, restoring to a sick and weary world the teaching and healing taught and practiced by Christ Jesus, opening for spiritual joy and peace the Book of books that all may read with understanding. Is it strange that Christian Scientists are grateful?—(Mrs.) Anna F. Loomis, Reno, Nevada.

I first heard of Christian Science a great many years ago. I saw it was the truth and accepted it at once. I did not come into Christian Science for the physical healing, although there have been many times during the years since then when I have been glad that I knew of Christian Science to help me out of some physical discords, as all my life I had resorted to medicine to heal me. It had been my habit, when planning for a long journey, to arrange about twenty little bottles of pellets in a leather case made for the purpose. These remedies were supposed to heal different ailments, to which I was subject, such as liver trouble, rheumatism, and kindred troubles. I did not know it then, but I realize now that these innocent little pellets were my god; for since studying Christian Science I have not relied upon material medicine, and have enjoyed very good health.

While playing tennis a few years ago, I tore a ligament in one of my legs. It happened while I was visiting in a doctor's family and they predicted many difficulties for me. I wore an elastic stocking for some time as a support and it had been predicted for me that I would have to wear the stocking for the rest of my life. But one day it came to me quite clearly that my real support is God. So I removed the stocking and have not worn it since. After I removed the elastic stocking the permanent healing came. That was many months ago. It goes without saying that I am sincerely grateful for these blessings, but the greatest joy of all is in being able to impart to others what has helped and blessed me.—(Mrs.) Mary Elizabeth Ayers, Boston, Massachusetts.

With a deep feeling of gratitude for all the wonderful help received from the study of Christian Science I wish to relate a healing which stands out above all others. While remedying an obstruction in a lift shaft of about three feet square, I slipped off the ladder and fell about sixteen feet to the floor. My fellow workmen ran to my aid and helped me to rise, while I clung fast to the truth. My employer was very kind to me and wanted me to go to the hospital but I explained my reasons for not going and quietly assured him that God could heal me. When I came from the shaft I was unable to walk at all, but I later walked to the train and from the train home. I was away from work just ten days and my friends

DE

在对印代国际生物的经验是这种可以 U X 生产的原则的

and relatives were surprised at such wonderful results. To mortal sense it was a miracle. I obtained the help of a practitioner and am grateful for the lessons that unfolded during the stay at home.

I am grateful beyond words for this wonderful proof of God's care, and my desire is so to live as to be worthy of the name Christian Scientist—which desire brings daily blessings. I am grateful for our wonderful periodicals, and a sincere love is felt for our dear Leader, Mrs. Eddy, for giving to mankind a demonstrable understanding of the truth that frees.—Arthur William Burkmar, London, England.

For the spiritual understanding of the Bible which I have received through the study of Christian Science, words are inadequate to express my gratitude. Christian Science was first presented to me through a copy of the Scatinel which was sent to me by a very dear friend. I was an invalid at the time. Physicians and specialists had declared the disease to be incurable, and said that I could not live over three years. That was eight years ago. Health was restored to me in three treatments, through the work of a Christian Science practitioner, but I am most grateful for the spiritual understanding I have received, and for the knowledge that man is God's image and likeness. I am indeed grateful to our beloved Leader, Mary Baker Eddy, who has given a demonstrable understanding of the teachings of Christ Jesus to the world.—(Mrs.) Ada Miller, Indianapolis, Indiana.

I have had such a clear proof of the protective power of Truth and the nothingness of evil that I feel I should share it with others. While traveling I had to wait two hours at a junction, and desiring to leave the station for a few minutes I left my traveling bag and a smaller shopping bag in the care of a lady who was sitting in the depot. When I returned, the shopping bag was over the black traveling bag apparently just as I had left them. When my train was called I picked up the bags and found that the traveling bag was not mine, being a shabbier and larger one than The lady in whose care I had left them had continued her journey on another road, and as the train that I was to take was the last one to leave that night, I came home, leaving the strange bag at the station. In the morning the station agent at my home wired to the junction, but they could find no trace of my bag either at the station or on the trains. No other inquiries were made.

The only means of identification in the bag was a copy of "Science and Health with Key to the Scriptures" by Mary Baker Eddy which had my mother's name and address in it. I felt that any one reading that book could not keep what belonged to another, and I knew that "with God all things are possible," and continued to hold steadfastly to the truth. In two weeks' time my mother received a letter from a hotel at the junction stating that a bag had been left there and that a book had been found in it inscribed with her name. We were surprised to hear from the hotel as I had not had my bag there, nor had I made any inquiry of the management. I knew no one in the junction, as I had only been there awaiting train connections. I wrote to the hotel identifying the things and telling them how my loss had occurred. Two days later, I received my bag with everything in it, thus proving the omnipotence of Truth, which means far more than the mere return of the material things. I am indeed grateful for all the blessings that have come to me during the time I have been studying Christian Science.

(Miss) Grace Elliott, Lowville, New York.

It is not easy to decide just where to begin when attempting to enumerate the manifold blessings that have come to me as a result of the study of Christian Science. The following are some of the visible effects which may help to illustrate the transforming power of divine Principle. From early boyhood I was a sufferer from severe attacks of bowel trouble. Material remedies of every description were used, and diets prescribed by eminent physicians were tried, but each experiment was attended with the same discouraging results. When I was quite a young man, a healing through Christian Science took place in our family which attracted my attention to this new-old curative agency. I secured a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and began to read it. At first its teachings seemed so revolutionary that I put the little book away, thinking never to take it up again. An irresistible desire to become better acquainted with the new ideas presented, however, caused me to renew my efforts to understand this unusual work, this time with better effect, for within a few short weeks every obstacle was overcome, the physical ailment of long standing disappeared, and a spiritual awakening, refreshing, energizing, uplifting, reaching to the innermost fiber, as it were, took place. During the weeks and months following this healing, my hunger for more of this satisfying knowledge became so compelling that every spare moment found me studying Science and Health. A startling mental chemicalization followed this constant study. Fear seemed for a while to be the ruling power; but with the loving assistance of a practitioner, this mental fermentation was seen as the alterative effect of Truth, and I perceived that the law of divine Love had been working. In the words of the psalmist, "He uttered his voice, the earth melted."

While serving overseas, an incident occurred which exemplified the omnipotent protection of Love. During the early stages of the Allied drive in the Argonne Forest, messengers were used to carry orders from place to place along the front. An order was one day placed in my hands and I was told to take it at once to the officer in command of our train, then supposed to be up ahead in a small French village which was under heavy bombardment. Just outside this village I encountered a crossroads where enemy salvos were coming over at irregular intervals, but on account of the terrain there seemed to be no feasible detour. As I proceeded, a shell zipped close but failed to explode. When I had gone a few yards farther on, the hiss of a descending shell and its accompanying detonation came almost simultaneously. It had landed not more than sixteen feet away, and the miracle was that I had not been blown to fragments. For this manifestation of Love's protecting power I gave thanks. The message was ultimately delivered, and as time and distance have lent clearer vision to the incident I have begun to see that never for an instant does omnipotent and ever present Love forsake us.

I shall never cease to feel thankful that some measure of at-one-ment has been vouchsafed to me, and to pray that I may always keep before me the works and words of our Master, rejoicing that we are privileged to share his cup. The debt of gratitude we owe to the pure and saintly woman, Mary Baker Eddy, for her immortal work in making plain the way of salvation through Christ Jesus, we cannot hope to liquidate, but we may consecrate our lives anew to the work that lies before us, and in the words of Abraham Lincoln, "Having thus chosen our course, let us renew our trust in God and go forward without fear and with manly hearts."—C. D. KEELER, Pleasanton, California.

Signs of the Times

[Excerpts from "What Gettysburg Says to America," an Address by Joseph M. M. Gray, D.D., as reported in *The Christian Advocate*]

"You will find no explanation of these two facts I have just suggested, this durable intrenchment of the Civil War in song and spirit of America, this enlarging stature of Abraham Lincoln in the ideal and progress of the world, except that the Civil War's greatness derives from the morality of its purpose, the moral sources of its passion."

"It is a victory of moral idea and purpose out of which our American unity has been reknit, a unity which deepens beneath all the fumes of sectional minds, the conspiracies of politics of the devisive moods which gather around the

stimulated sentiment of the lost cause."

"Gettysburg decided the Civil War; but the war determined more than a victory of arms. Gettysburg confirmed the Emancipation Proclamation; but in that confirmation was more than the immediate liberty of the slave. Gettysburg established beyond further questioning the supremacy of the federal constitution, but it was more than allegiance to a particular authority which here was ratified. The American Republic was the first and foremost attempt of a great modern country at government by the will of the people. The secession movement was the first and foremost attempt on the part of a powerful minority to repudiate the common covenant for which the Republic stood. If the government in such a crisis were inadequate, if that common covenant could not be maintained, then what men had come to believe was the strongest institution for the uplift and development of their kind, for centuries to come, would be proved a failure. At Gettysburg it proved to be no failure, but a success bought by incalculable sacrifice and held by incalculable valor."

"As the men who fought at Gettysburg defended American democracy from secession, we who commemorate Gettysburg must preserve it from disintegration. This demands more than maintaining our ground; we must move to new positions."

[From an Editorial, "The Mills of the Gods," in The Independent]

What is true of individuals is true of nations. What has become of the great despotic empires which so greatly abused their day of power, confident that they could never be called to account? Russia has blown away into a whirlwind of anarchy; the very name of Austria-Hungary has vanished, Germany has sunk at one blow into a third-rate power. The little people—Czechs, Slovaks, Serbians, Poles, Lithuanians, Letts, Esthonians, Finns, and all the resthave crept out from the prison house to enjoy their place in the sun. The slaves of yesterday are more powerful than their former masters. As of yore God still exalts the humble and casts down the proud; He fills the hungry with good things and sends the rich empty away. Justice in human history seems slow; so slow that tyrant and slave both question, "Where is God?" But the mills of God are grinding and it will not be long before the result is manifest to

[J. H. Oldham in the International Review. as Quoted in Public Opinion, London, England]

National genius is not expressed by imitation of any kind but by aiming at the absolute ideal. . . . When a nation has produced great original work it has not been by trying to be characteristically national but by seeking to find the absolute truth. The striving after the absolute does not exclude the adoption of things from outside when they

seem to be good or true or beautiful. But they will be adopted because they are really judged to be good or true or beautiful and not merely because they have worldly prestige. It is by keeping steadily in view the ideal and in obedience to the universal claims of truth and love that nationality will reach its highest expression.

٠

[From the Convention Address of the Bishop of South Carolina, as Given in The Living Church]

The bishop cited the movement that has transpired in this country since the visit of Mr. --- three years ago, and even before, to establish healing missions, which, he said, "can no longer be ignored nor treated as a sort of religious fad which must soon pass away." He referred to the action at the last General Convention and at the Lambeth Conference and spoke encouragingly of such a mission in his own diocese . . . which, he said, has resulted in much good. Speaking then of the history of the ministry of healing from New Testament times, the bishop showed the ministry to have been clearly established and recognized from the beginning. What, therefore, we are witnessing to-day is simply a revival of an ancient practice which has never altogether died out. There have been so many specific answers to prayer in the ministry of every earnest priest of the Church that he needs no further evidence outside of his own experience to convince him of the truth of the apostle James' words that prayer and faith shall heal the sick.

[A Step Toward a Better Understanding of Health. From The Christian Science Monitor]

If the members of the medical fraternity are to give due weight to the conclusions of Professor William MacDougall, Harvard University psychologist, they will doubtless make changes in some of the theories of disease that have held sway heretofore. Professor MacDougall says that we need "a revision of the conception of organisms as pure mechanisms, or machines, which has dominated the biological and medical sciences for more than half a century." What he arrives at is the assertion, "It is through mental influences that functional disorders are brought about." Though it may require a good bit of revision before prevailing medical theories can be brought into line with such declarations, any success that may be achieved will, at all events, be in the nature of progress toward a better understanding of health.

٠

[From an Editorial, "God in Us," in San Jose (California) Mercury Herald]

Much too rarely is it acknowledged, even by the most devout, that God is the source of our capacities and powers. Still rarer is it in these days to hear from high authority that the creator does not stop with creating the individual being but that He continues in him, the active, propelling force. Of course, no man with a deeply religious experience will fail to be "conscious of the divine presence;" but conscious of His presence or not, men must come to know that God is not only the creator of His universe, but that He is the animator of every part of it. The least individuality in it has no life or activity or force outside the life of the God who created it. He is not outside of His creation, but in it, still moving, working, and, in a sense, creating.

This is the plain teaching of the New Testament and of the early Christian teachers. Jesus reveals to us a God not outside of but in His creation, with a loving care and watchfulness over the least of His creatures. He tells us that "God is a spirit," by whom the hairs of our heads are all numbered; that not even a sparrow falleth to the ground

::

H

without the Father's notice; that He feeds the fowls of the air and clothes the field with its verdure, and will provide for all our wants if we come to know and trust in Him. Paul, too, reveals to us a God who, as he says, is "not far from every one of us;" "who is above all, and through all, and in you all." He declares that "in him we live, and move, and have our being." Again he says: "Ye are the temple of God." . . .

The conception of God as a creator who fashioned this universe and made His creatures, much as an artist would make a statue, and breathed into them the breath of life which started them going, since which time He has had little or no connection with them, is certainly not the conception of the founders of Christianity. A creator whose work was fully completed, finished and perfect, in six short days of twenty-four hours each, after which He washed His hands of the whole business, as it were, is not the loving Father of whom Jesus speaks to us in the gospels. "An absentee God," as a great English author puts it, "sitting idle ever since the first Sabbath, at the outside of His universe and seeing it go," is certainly not the correct conception of the great, all-pervading, all-embracing, loving Spirit—"the living God"—revealed in the New Testament.

These ideas of God, so repugnant to the teachings of Jesus and the disciples and apostles, have possessed the minds of men for generations because their minds were physical and the things of the Spirit could not by them be spiritually discerned. Not being able to understand the universal God of spirit whom Jesus called "our Father" and not comprehending the "living God" of the New Testament, "who is above all, and through all, and in you all," unspiritual men have conceived of God as little more than a superman. Much of the pagan idea concerning Zeus or Jupiter, Thor and Odin, seems still to cling to the conception that many have of God, although they may have outgrown the polytheistic ideas of the ancients. Let us try to think of God as Spirit, over us, all about us, and in us, and thus try to get the spiritual conception of Deity which Jesus and the disciples and apostles had-the New Testament conception, the Christian conception. Under this New Testament view man becomes a being of much greater dignity and importance than he is usually accustomed to think himself.

[The Christian Sahayak, Jubbulpore, India, as quoted in The Pioneer]

Word comes from the Indian portion of Jubbulpore city that recently the sales in the liquor shops have decreased fully fifty per cent. There is a vigorous local caste movement among the Dhobis, Chamars, Khateeks, and some others to stamp out drinking habits among their caste people. Volunteers watch the liquor shops, we are told, to catch any who are found breaking over the recent caste restrictions. A fine is imposed. If this is not effective they are threatened with being outcasted. An incident was told the writer, of a dhobi who was such a hard drinker that his children went in rags. Now he earns something like Rs. 140 a month, and has more work than he can do, and his family are clothed and happy in their suddenly altered conditions.

[From The Homiletic Review]

Here are some reasons stated by the United States Public Health Service why you should not worry:

"The birds build nests for the protection of their young against the weather; the foxes dig holes for security against their foes. The squirrels lay by stores of nuts against the coming of winter; and dogs bury bones against the day when bones will be scarce. These are the manifestations of a normal protective instinct arising from an experience of many, many generations. So far as is known, though, no bird ever tried to build more nests than his neighbor; no fox ever fretted because he only had one hole in which to hide; no squirrel ever died of anxiety lest he should not lay up enough nuts for two winters instead of for one; and no dog ever lost any sleep over the fact that he did not have enough bones laid aside to provide for his declining years. . . . In fact worry is an abnormal state."

[From Zion's Herald]

While practically all men of every nation know that a difference between right and wrong exists, and all languages have words signifying good, bad, and the like, it is only Christianity which makes a clean-cut distinction between moral extremes, and which demands from every man absolute perfection. What prophet other than Christ Jesus ever commanded, "Be ye therefore perfect, even as your Father which is in heaven is perfect"?

How frequently one overhears expressions such as, "That's about right," "He is good enough for me," "Nobody can be perfect," "Let it go at that," and the like. All these expressions are confessions of weakness and indicate a moral lack in the person who utters them. The New Testament nowhere makes any concession to such compromising characters or lackluster believers. Included in the book of Revelation is found a particularly sharp rebuke of the Laodicean church that was "neither cold nor hot," and which, because it was lukewarm, was spewed out of the mouth. Halfway things never suit God, and often are despised by men too.

Notice

SHORT TERM SUBSCRIPTION AND ORDER RATES

Attention is called to the new rates now in effect on short term subscriptions for The Christian Science Monitor, Christian Science Sentinel, and The Christian Science Journal; also on single copies of the Sentinel and the Journal. These rates are stated in the advertisements found on the inside front cover page of the Sentinel and on page "iv" of the Journal.

Attention is also called to the rates scheduled below, now effective on all quantity orders for any of the Christian Science periodicals:

Monitor\$.04	a copy
Sentinel	"
Journal	"
Der Herold18	"
Le Héraut	"
Ouarterly22 1/2	"

These rates are net and take the place of the former 10% discount on periodical orders.

An exception to the *Monitor* rate given above is made in cases where orders specify that the copies desired are for free distribution at a Christian Science lecture or for other free distribution. This should be clearly stated when ordering. Such orders will be filled at 3 cents a copy.

The uniform retail price on the Sentinel is now 10 cents a copy, and on the Journal 35 cents a copy. The Monitor single copy price remains at 5 cents.

Discounts to reading rooms on subscriptions and on orders for general publications remain as before.

Christian Science Sentinel

Church Nötices

From the Clerk of The Mother Church

Church Tenets.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in *The Christian Science Monitor*, were run off at the time of their publication in the *Monitor*.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 81/4" x 103/4". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for *The Christian Science Monitor*, *Journal*, *Sentinel*, *Quarterly*, and *Heralds*, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and immediate vicinity

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

There will be placed on sale in a short time six new pamphlets, containing articles reprinted from the Christian Science periodicals, as follows: "Government," "Employment," "Work and Play," "Progress," "Occupation," "Relationship." Orders for these pamphlets may be sent at once, to be filled on the date of issue. Price 5 cents a copy. Reading Room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U. S. A.

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U. S. A.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCII TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

German Translation. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy §3.50; six or more, each §3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

paper, single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German.

Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

Christian Science Literature

"Science and Health with Key to the Scriptures" and all other published writings of Mary Baker Eddy are listed on the outside back cover page of this Sentinel.

The Christian Science Journal

Founded, 1883, by Mary Baker Eddy. This monthly magazine is an offi-cial organ of The First Church of Christ, Scientist, in Boston, Massachusetts, Contains articles, editorials, and testimonies of healing, a directory of Christian Science Churches, Societies, and Reading Rooms; also in the January, April, July, and October issues a list of Christian Science Practitioners and Nurses. Subscription price, payable in advance, postpaid to all countries: One year, \$3.00; six months, \$1.75; three months, \$1.00; single copy, 35 cents.

The Christian Science Quarterly

Founded, 1800. by Mary Baker Eddy. Published January, April, July, and October. Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size. Subscription price, payable in advance, postpaid, to all countries: One year, \$1.00; single copy, 25 tents.

Christian Science Sentinel

Established, 1898, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. Subscription price, payable in advance, postpaid, to all countries: One year, \$3.00; six months, \$1.75; three months, \$1.00; single copy, 10 cents.

Der Herold der Christian Science

Authorized, 1903, by Mary Baker Eddy. A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months, 50 cents; single copy, 20 cents.

Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months 50 cents; single copy, 20 cents.

The Christian Science Monitor

An International Daily Newspaper. Founded, 1908, by Mary Baker Eddy. Daily, except Sundays. Its own world-wide news service is supplemented by the service of the Associated Press and of the United Press Association. Complete in its departments; unique in its Home Forum page. Full page of editorials dealing truthfully and fearlessly with vital questions of the day. Subscription price, payable in advance, postpaid to all countries: One year, \$9.00; six months, \$5.00; three months, \$3.00; one month, \$1.10; single copy, 5 cents.

Subscriptions will begin with the next issue after the receipt of the order. Information regarding bound volumes of the weekly and monthly periodicals will be given upon request.

THE LIFE OF MARY BAKER EDDY—By Sibyl Wilbur, Cloth, \$2.50; edition de luve, \$5.00.

EDITORIAL COMMENTS ON THE LIFE AND WORK OF MARY BAKER EDDY. Paper, 15 cents.

PERSONAL CONTAGION, also WHAT OUR LEADER SAYS—By Mary Baker Eddy. Special pamphlet, 10 cents.

WHAT OUR LEADER SAYS-By Mary Baker Eddy. Vest pocket folder, 5 cents.

THE MOTHER CHURCH—By Joseph Armstrong. A history of the building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Illustrated. Cloth, \$1.50.

CHRISTIAN SCIENCE: ITS LEGAL STATUS—By Judge Clifford P. Smith. Paper, 15 cents.

LAW AND WORK for the blind. Printed in New York point, American Braille or English Braille, \$1.00.

SHEET MUSIC. Poems written by Mary Baker Eddy and used by special permission have been set to music as follows:

as follows:

"The Mother's Evening Prayer," 75 cents.

"Christ, My Refuge," 75 cents.

"Love," 50 cents.

Communion Hymn—"Saw Ye My Saviour?" (Johnson), 50 cents.

"Blest Christmas Morn," 37 cents.

"O'er Waiting Harpstrings of the Mind," 37 cents.

"Shepherd, Show Me How to Go," 37 cents.

"Saw Ye my Saviour?" (Root), 37 cents.

The first three hymns are arranged for high and low voice in the same copy. The last five hymns are published separately in high and low keys. When ordering state key desired.

THE CHRISTIAN SCIENCE HYMNAT.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, \$1.15; half morocco, \$1.40; full morocco, \$4.50; levant, \$5.50; pocket edition, size 45%x63%, \$3.50.

PHOTOGRAVURE OF MRS. EDDY, printed in three sizes on India paper and mounted on heavy plate paper ready for framing, 8-inch (mount 12x16), \$1; 12-inch (mount 15x20), \$2; 16-inch (mount 21x29), \$3.50.

PICTURE OF THE FIRST CHURCH OF CHRIST, SCIENTIST, IN BOSTON, MASS, AND THE PUBLISHING HOUSE. Artist's proof with remarque on Japanese vellum, size 18x24 inches, \$5; on India paper without remarque, \$3.50. Smaller reproduction, size 11x14 inches, on Japanese vellum, \$1.25. Photogravate postcards of the Church Edifice and Publishing House, 5 cents.

BIBLES. 01483x. Clarendon Brevier, heavy-faced, dis-tinct type; Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, \$7.50. 01440x. Brevier, light-faced type, self-pronouncing, Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, 57.25.

01683x. Large type Bible, 1034x8 inches, bound in Alaska seal. Specially adapted for use of second readers, \$16.50.

The improved index will be added to any Bible listed in our catalogue, excepting the vest pocket size, for an additional charge of 35 cents.

Price List of Bible Concordances and Dictionaries of the English Language supplied on request.

Items such as leather covers for the QUARTERLY, and cases, either closed or open, for books, Sunday school supplies and other accessories, will be found in the current catalogue in The Christian Science Journal.

NUMBER 49

The Second Great Commandment

ELEANOR M. THOMAS

IN expounding the law to a certain advocate, Jesus the Way-shower declared the first and great commandment to be, "Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind," and further explained: "The second is like unto it, Thou shalt love thy neighbour as thyself. On these two commandments hang all the law and the prophets." In this instance, neighbor, in the Greek original signifies one near or close to. Now reasoning from the absolute metaphysical basis that divine consciousness, God and His infinite idea, is all there is, clearly discloses that all that the manifestation of omnipotent Mind can be near or close to is God, divine Principle. Hence, Principle is man's true neighbor. If we are loving God and being obedient to His commands we shall find that to "love thy neighbour as thyself" is fully apprehended, and kindness and thoughtfulness for others follow as a natural consequence. Of course, the desire to love God, the divine Principle of man, supremely, provokes a strenuous effort to overcome the sense of a material selfhood. As a rule people think highly and only of themselves, although, if confronted with this statement, they would, no doubt, register a vehement denial. And this mortal-self-thinking involves the lusts of the flesh, selfishness, envy, malice, hypocrisy, all the pains and pleasures of the five physical senses.

Perhaps the one turning to Christian Science for solace from this seeming whirlpool of material existence has faintly glimpsed the significance of what Jesus meant when he said that he must be about his Father's business, and the sham of mortal living looms up greater than before in its vast emptiness. He sees people vieing with people, each one trying to gather material hopes and substance into barns "where moth and rust doth corrupt." He sees those who. were at one time fast friends, now at variance with one another. Mayhap resentment on account of sturdy work and advance in position on the part of the one has left the door open for jealousy and rivalry to creep in subtly, shattering so frail a thing as material friendship. For human friendship at its best is fragile and delicate unless supported by the understanding of true being. Then does this student, striving to emulate Principle, resolutely turn his back, as it were, on all this seeming struggle and analyze what the true self is. Since man is made in the image and likeness of God, who is good, the true self, then, is God, the great I AM, and is discerned as cause expressed in effect; for cause and effect are inseparable. If all men had one Principle and worked from this common basis, a keener comprehension of the oneness of God and His image would stand revealed in its entirety, and human competition would cease. The divine idea is never found struggling against Mind but expressing the completeness of this Mind.

It is really as erroneous to condemn one's self continually as to think too loftily of this self. If Principle is adhered to as the cause of true being, it will clearly be perceived that it would be an impossibility to condemn Principle. Consequently, spiritual man as God's reflection and likeness should never be condemned. Nevertheless, all this delusion of the material universe produced by the five physical senses is unlike Spirit, the All-in-all, and sin, sickness, and all the ills that flesh is heir to should be and in reality are forever consigned to their original nothingness. This, likewise, holds good in dealing with our neighbor. One need never love and laud a disagreeable human being, neither should one fear or worship persons, thus making himself an easy prey to mesmerism and seemingly harmful influence and domination. It is an absolute necessity for each one who would attain the peace of heavenly joy to exchange whatever presents itself as a false and grossly material manifestation for the true concept of God's perfect image. "Work out your own salvation with fear and trembling," exhorted Paul in his epistle to the Philippians.

As the truth of Christian Science unfolds, it will be found that, whatever the case that presents itself for healing, one is dealing entirely with his own thinking. What is known of neighbor, in reality, then, concerns only what is mentally seen and accepted as the expression of divine consciousness, and not some personality, be it seemingly pleasant or otherwise. The instant anything mortal is allowed to disturb us and project itself as a source of annoyance, that moment do we admit an intelligence and power other than infinite Spirit, the one and only Mind and power. Does the suggestion come that we must please and cater somewhat to such a condition of mortal thought for fear of harm? What does God know and say of man? Turn steadfastly to divine consciousness, and with the understanding that God, the supreme and loving cause, is all there is, know that all man ever needs to please, all man ever comes in contact with, is this one Mind. This understanding will eliminate any seeming difficulty and man will be truly loving his neighbor as himself, for his entire thought will be centered on Principle and how best to serve God. A human being need never be feared, for he is not of God's creation.

Mrs. Eddy, the Discoverer and Founder of Christian Science, says in her textbook, "Science and Health with Key to the Scriptures" (p. 367): "The tender word and Christian encouragement of an invalid, pitiful patience with his fears and the removal of them, are better than hecatombs of gushing theories, stereotyped borrowed speeches, and the doling of arguments, which are but so many parodies on legitimate Christian Science, aflame with divine Love." Throughout the Master's ministrations among mankind there is noted time after time the compassion expressed for his fellow beings and his patience in helping mankind to overcome false material beliefs. A true student of Christian Science is not cold and unsympathetic. He is filled with the utmost forbearance and compassion for all men. Each one is working and striving to overcome this sense of mortal existence in some degree or another, and instead of becoming impatient with another's seemingly slow progress, "pa-

tience with his fears" should abound. Now this by no means engenders a mesmeric sympathy through which one must needs weep when others weep, for again the Master admonishes: "Follow me; and let the dead bury their dead." Let materiality be lost forever from view, and let your understanding of the unity of Principle, God, and His idea, be so true and firm that it can truly sympathize, that is, understand the nothingness of matter and its various phases so thoroughly as to diffuse health and harmony. "It should be thoroughly understood," says Mrs. Eddy in Science and Health (p. 467), "that all men have one Mind, one God and Father, one Life, Truth, and Love. Mankind will become perfect in proportion as this fact becomes apparent, war will cease and the true brotherhood of man will be established. Having no other gods, turning to no other but the one perfect Mind to guide him, man is the likeness of God, pure and eternal, having that Mind which was also in Christ."

"Is Christ divided?"

JOE L. PENRY

PAUL, in his first Corinthian letter, asked this question: "Is Christ divided?" The question was propounded by the apostle after he had uncovered to the church at Corinth one of the phases of error then being propagated in the fertile soil of personal following, and among the many other things, he said: "For it hath been declared unto me of you, my brethren . . . that there are contentions among you." Contentions always arise in human affairs, especially when the question of personal leadership by men is involved. In political party affiliations we often distinguish our respective brands of politics, connecting with it the name of the individual whom we like best or who we think will contend for the policy nearest in accord with our individual views and our traditional party alignment. It may be an easy matter, therefore, for us to fall into error and follow human instincts in this respect, even when we come to deal with matters affecting the cause of Truth.

It would be at this time, in the light of the revelation and demonstrations of our Leader, Mary Baker Eddy, a paradox on Christian Science for one to claim to adhere to any living personality in order to designate the quality of Truth he proposes to follow, in any of its activities. Christian Science, unlike other religions, is not susceptible of offshoots on account of dogma; in fact it dispels dogmatic illusions, which admit of minds many, and stands unreservedly on the fundamental teaching of our Leader, who anchored her work and rested her faith on the First Commandment, "Thou shalt have no other gods before me."

The material senses, guarding the strongholds of mortal mind, try to govern us, and would always lead us in the opposite direction from Truth. The lust for power, for gain and place, seeking for popularity, following the crowd, has often compromised men and meritorious measures for which they stood. Mortal mind believes that any kind of personal success means success, and is ever ready to applaud, regardless of the fact that such success may not mean success at all but the gratification of personal ambition. When we reach this phase of belief about success we invariably conclude that our personalities are indispensable. The fact is, the material senses constitute the falsity, the deception, and what is termed the frailty of humankind. It is that which goes out to deceive the nations.

The greatest thing in this world, and the one thing for which men should ceaselessly contend, is truth. It satisfies. It heals false beliefs. It intervenes and sets aside the

supposed law of mortal mind, and successfully calms the fears engendered by the senses. It never joins hands with the mortal multitude, but always feeds the hungry and heals the sick of the multitude, when they are ready for it. It is not of this world. It comes to us in the stillness of solitude and blooms radiantly in the open. It is the still, small voice for which we should listen, and bend the knee to catch its redemptive call. Its sound is like the whisperings of the gentle zephyr and we cannot tell the direction from whence it came or whither it goes. It falls like moonbeams, soft and soothing to the sick and sinning. It is the bestowal of man's heritage; it is eternal life. It says to the sin-sick and weary traveler of earth: "Come unto me, all ye that labour and are heavy laden, and I will give you rest." It directs unerringly the one who has followed after the belief of a divided Christ and has been driven by the winds of adversity from his false gods until he finds himself in swinish degradation, and is ready to return to his father's house: "Bring forth the best robe, and put it on him; and put a ring on his hand, and shoes on his feet."

No man, or set of men, is so free from error as to be at all times implicitly followed, except at the expense of the truth. There is but one God, and, happily, this one infinite God or good, the source of all reality, is the one and only Mind and Teacher. If we could only understand this fact and listen for the voice of Truth, regardless of human opinions and traditions, and constantly pray for that Mind "which was also in Christ Jesus," and catch the spirit of the words of that beautiful hymn, written by our revered Leader, Mary Baker Eddy (Poems, p. 14), which says in part:—

I will listen for Thy voice, Lest my footsteps stray; I will follow and rejoice All the rugged way,

we would find ourselves constantly holding to the undivided Christ or Truth, which has, during the past centuries been saying to the children of God: "Son, thou art ever with me, and all that I have is thine."

We are not left comfortless, to grope our way following human dictation and opinions; we need no high priest to enter behind the veil to sing Latin phrases, while we stand outside, for the veil of the temple was rent by Truth, and every man may enter into the very presence of infinite Love. If we begin rightly and continue in the way, we are constantly taught of God. Mrs. Eddy tells us how to begin aright. In "Science and Health with Key to the Scriptures" (p. 275) she says: "The starting-point of divine Science is that God, Spirit, is All-in-all, and that there is no other might nor Mind,-that God is Love, and therefore He is divine Principle." We also find the first four words of the Bible to be, "In the beginning God," and in Revelation we read, "I am Alpha and Omega, the beginning and the end, the first and the last." The recognition of the above facts results in obedience, but not obedience to human dictates and opinions. There is no place to step aside from the straight and narrow way of Truth, for "ye are Christ's."

There is real oneness in Truth, and every reality radiates from it; for all is Truth and its perfect manifestation or idea. Evil cannot proceed from, advance toward, or mingle with Truth. It may seem to the false senses that the wheat and the tares grow together, but through the understanding of Christian Science we are enabled to penetrate the mists of false beliefs and see the perfect man, who always was and always will be perfect. Evil can only have a belief of knowledge, and that only of itself, and can

never under any circumstances or conditions be other than evil. It is a lie, the direct opposite of truth.

Speaking of mortal mind and of the real Mind, in their respective order, the Revelator shows the hopelessness of the former and the continuity and permanence of the latter. Near the close of the last chapter of Revelation we find this record of Truth, showing the difference between mortal belief and the spiritual idea. "He that is unjust, let him be unjust still: and he which is filthy, let him be filthy still: and he that is righteous, let him be righteous still: and he that is holy, let him be holy still. And, behold, I come quickly; and my reward is with me, to give every man according as his work shall be." Christ, Truth, is not divided, but there will come a time when the tares shall fall on the threshing floor to be swept to the winds or burned, while the wheat will be garnered and preserved unto eternal Life.

As our Leader, Mary Baker Eddy, tells us on page 340 of Science and Health: "One infinite God, good, unifies men and nations; constitutes the brotherhood of man; ends wars; fulfils the Scripture, 'Love thy neighbor as thyself;' annihilates pagan and Christian idolatry,—whatever is wrong in social, civil, criminal, political, and religious codes; equalizes the sexes; annuls the curse on man, and leaves nothing that can sin, suffer, be punished or destroyed."

Power

FRANCES A. MOTHERSOLE

OF the various motives which have roused men to action during the history of the world one of the most general is the desire to gain power of some kind. The particular kind of power aimed at varies with the individual, but the ambition is often to attain to a position that will give a man a sense of superiority to, or control over, others. In the opinion of many, the best way to attain to such an end is by the acquisition of wealth, by means of which the labor and services of others may be purchased. So we hear on all sides the saying, "Money is power," and men spend the best years of their lives in toiling to build up a fortune which may be lost at any moment. Another favorite dictum of the world is that "knowledge is power," and many strive earnestly to obtain more knowledge than their fellows, only to be dissatisfied with the results, if their motive is a purely selfish one. Others, again, depend upon personal influence to give them control, and the orator relies upon his persuasive tongue to bring his audience under his influence. Lastly, men depend upon physical force to gain the domination they desire, and nations measure their strength by the size and range of their guns and the number of their warships. But has mankind found happiness and satisfaction from the acquisition of any one of these different kinds of domination? The history of the world gives us ample proof that they have not. Let us see, then, where the mis-

On page 203 of "Science and Health with Key to the Scriptures" Mrs. Eddy writes, "In the Science of Christianity, Mind—omnipotence—has all-power, assigns sure rewards to righteousness, and shows that matter can neither heal nor make sick, create nor destroy." Here is the answer to our question. Mortal man, believing himself to be a creator, thinks that he can gain good for himself by his own efforts, but what a mistake this is, since God is the only power! In omnipotence there is no room for any other power, and man must learn this before he can find the good and satisfaction that he desires. But one may say: In

the Bible we read that God made man to have dominion. How can he exercise this dominion, if God is the only power? Mrs. Eddy answers this question on page 102 of Science and Health, where she says, "The planets have no more power over man than over his Maker, since God governs the universe; but man, reflecting God's power, has dominion over all the earth and its hosts." God is the one infinite Mind, which is omnipotent. Jesus expressed this same truth in those wonderful sayings, "All power is given unto me in heaven and in earth," and, "The Son can do nothing of himself, but what he seeth the Father do: for what things soever he doeth, these also doeth the Son likewise." The meek Nazarene hesitated not to claim for himself this transcendent power, for he knew better than any other man his real relationship to his heavenly Father. In this he showed his true humility, for he recognized no self apart from God. And in the gospel narrative we can read of the mighty works which were the outcome of this purity and self-abnegation.

"With Christ, Life was not merely a sense of existence, but a sense of might and ability to subdue material conditions," Mrs. Eddy tells us in "Unity of Good" (p. 42). Moreover, he claimed this same power for his followers for all time, when he said to his disciples, "He that believeth on me, the works that I do shall he do also," and he did this because he recognized that man is the son of God and that as such he must inevitably express the divine nature. And this is the power, the one power, which we should desire, the power to reflect God and by this reflection to overcome mortal beliefs. Only by steadfastly claiming this our rightful heritage can we glorify God, for "he that honoureth not the Son honoureth not the Father which hath sent him." How earnestly, then, should we strive to exclude all suggestions of self-depreciation and self-condemnation which would deny this our birthright and shut us out from heaven! For, whatever material sense may say, the glorious fact remains that this heritage of power is not the privilege of a chosen few but the natural inheritance of man; it is the light of Truth "which lighteth every man that cometh into the world," and which by its clear shining dispels the dark clouds of material sense.

"The way of Life"

EDMUND R. CUMMINS

HUMAN experience has always seemingly been at the mercy of dangers and difficulties of one kind and another, and mankind is ever asking why this is so. The formal Christian religions under the influence and domination of scholastic theological dogma, in response to this query point to the second chapter of Genesis for the answer, regarding this story, as it does, of the fall of man and his dismissal from Paradise as a historical fact, and concluding that a creature so full of ingratitude as to disobey the command of his benefactor well deserves all the punishment possible to be inflicted upon him by God.

Unfortunately, those who believe that God created a sinful mortal are by such a theory placing the entire responsibility upon God for all the evil which is apparent to human consciousness, and thereby exonerate mankind from all blame either for the origination or perpetuation of evil in every form; for while they agree that God had the power to create a perfect man, they consent to the suggestion that He did not do so, but instead created a man capable of committing sin, well knowing that he would commit sin. Indeed, in order to be considered entirely guilty, He must have invented sin, otherwise it would have to be acknowl-

edged that sin existed prior to the creation, in which case man could not have been held responsible for it in any event. Furthermore, it is obvious that in order to have created man capable of sinning, as the theologians contend God did, God Himself must have been conscious of sin. in the face of the Scriptural statement, "Thou art of purer eyes than to behold evil, and canst not look on iniquity."

In this theological dilemma and upon the troubled waters of this stormy sea we gain a vision of the Christ through the understanding imparted to us in Christian Science, and if we have the courage to discard the garment of ancient dogma which is likely to shackle our free movement, and cast ourselves into the water understandingly we shall feel His protecting arm and hear the encouraging words, "Be not afraid." On page 330 of the textbook of Christian Science, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, we find these words, "Evil is nothing, no thing, mind, nor power," and we arrive at the immediate conclusion that since this is so, God knows nothing of it, as He can be cognizant only of that which is, not that which merely seems to be to human consciousness, which must therefore be the only place where sin seems to exist. Now any one who stops to consider the matter for one moment will agree that if the thought of evil were eradicated entirely from the only place where it seems to exist, it would be proved not to exist anywhere, and there would be nothing left of it, and if this truism is acknowledged to be so as regards evil in general, the same thing must necessarily apply to such specific evils as poverty, sickness, and death. But it may be asked, If there is no such thing, why is there any such word as evil? Just for the same reason that there is such a word as cipher, for there is in Science a very close analogy between the words cipher and evil. The former is used to denote nothing, or the absence of a number, whether it is written or spoken, which is, of course, a pure fiction of the imagination, as there is never a lack of numbers; they are always present and instantly available when they are wanted, while evil suggests the absence of good, which is equally fictitious, for we know that Principle, the divine Mind, is ever present and available.

The only witnesses which evil is able to summon in support of its existence are those lying witnesses commonly called the senses, which we should give no credence, for we know that they are constantly testifying to that which is untrue even in matters belonging to their own kingdom, the physical realm, and that it is impossible for them to testify to anything of a spiritual nature, for they are not conscious of the existence of Spirit, neither indeed can be. The lie these senses have palmed off on credulous humanity is that there is another power besides God, called mortal mind, which they acknowledge as their creator. This is the starting point of all evil, the lie and the liar, which is described in the second chapter of Genesis allegorically, but was never meant to be regarded as a fact in the history of mankind, and is described by the Revelator as "the beast that was, and is not, and yet is." It is a lie masquerading as the truth, and the only way in which to destroy a lie is to know the truth concerning the thing lied about.

This was the work which Christ Jesus came to do, and successfully accomplished. He came into human perception to demonstrate that man is created in the image and likeness of God as we are told in the true account of the creation in the first chapter of Genesis, and the first three verses of the second chapter, and that, being in the divine

Mind's image and likeness, he is spiritual and good, not material and evil, "who, being in the form of God, thought it not robbery to be equal with God," as Paul says in his letter to the Philippians in speaking of the Christ, which is the generic name for "the only begotten of the Father," spiritual man, the only man God ever created.

The understanding, then, of the fact that man is perfect even as his heavenly Father is perfect, because it is his birthright to be so, is "the way of Life," the way out of the dangers and difficulties which beset the counterfeit man, which is but a fiction of mortal mind and has never had any real existence whatever, and this is the way pointed out by Christ Jesus in his day, and by Christian Science in this age by Mrs. Eddy in such pregnant sentences as the following from page 171 of the textbook: "Through discernment of the spiritual opposite of materiality, even the way through Christ, Truth, man will reopen with the key of divine Science the gates of Paradise which human beliefs have closed, and will find himself unfallen, upright, pure, and free, not needing to consult almanacs for the probabilities either of his life or of the weather, not needing to study brainology to learn how much of a man he is;" and on page 137, speaking of Peter's sudden recognition of man's spiritual origin, "'Thou art the Christ, the Son of the living God," we are told, "This assertion elicited from Jesus the benediction, 'Blessed art thou, Simon Bar-jona: for flesh and blood hath not revealed it unto thee, but my Father which is in heaven;' that is, Love hath shown thee the way of Life!"

The Eternality of Substance

RUBY E. ROSS

ON page 28 of her "Poems," Mrs. Eddy writes, in the "Invocation for 1868":—

All-merciful and good,
Hover the homeless heart!
Give us this day our daily food
In knowing what Thou art!

It is the knowing that Mind is substance that manifests daily supply; and once it is discovered that the only sense of substance which is possible is spiritual, one sees clearly that substance is the evidence of things hoped for, or God manifest. Then substance, of course, is eternal and ever present, because it is God.

The student of Christian Science who learns to think in terms of infinity, silences the lie which says man is limited and dependent upon matter instead of upon God, divine Mind. "Hear that human cry: 'Oh, lend us your oil! our lamps have gone out,—no light! earth's fables flee, and heaven is afar off,'" Mrs. Eddy says in "Miscellaneous Writings" (p. 342). Now the kingdom of heaven is exactly where Jesus said it was, "within you" and at hand. Then the lamp of Life is always full and burning, and the Christian Scientist knows that heaven is eternity now expressed; therefore he does not attempt to outline his supply, for he knows that eternity cannot be outlined, for divine Love is spontaneously unfolding to man every moment; that the one and only need is to know God aright, and "this is life eternal."

Jesus once said that the Scriptures must be fulfilled. The promises recorded in the Bible are true, but are fulfilled only as one understands their spiritual interpretation. "But they shall sit every man under his vine and under his fig tree; and none shall make them afraid: for the mouth of the Lord of hosts hath spoken it." To sit under one's own vine and one's own fig tree became a proverbial expres-

[898]

sion among the Jews to denote peace and prosperity, but Jesus brought home a lesson to his disciples, and proved his understanding of supply through the practical demonstration of the parable of the fig tree, as recorded in the eleventh chapter of Mark's gospel. "And seeing a fig tree afar off having leaves, he came, if haply he might find any thing thereon: and when he came to it, he found nothing but leaves; for the time of figs was not yet. And Jesus answered and said unto it, No man eat fruit of thee hereafter for ever. And his disciples heard it." It is then further stated that this fig tree withered and died even from the very roots, and when the disciples questioned Jesus as to the withered condition of the fig tree, his answer to them was, "Have faith in God." As the natural manner of the fig tree is to bear fruit before the leaves appear, one might feel that Jesus had the right to expect to find figs on the tree, but it is recorded that "the time of figs was not vet." Now it was the knowledge of what really constitutes substance that Jesus evidenced when he caused the fig tree to wither and die, for he was not for one moment mesmerized by the sense testimony or the belief of time and season. He knew that God's idea was always omnipresent and that there was no time when the divine idea fig tree was not expressing perfect and complete fruition, and that which he cursed and caused to wither and perish was simply the false belief claiming time and season of fruition.

The Christian Scientist knows that any erroneous belief that claims to operate through a so-called material law claiming that man's substance or supply can only appear at certain times or under certain material conditions, of course is a lie and can do nothing else but wither and perish in the presence and knowledge of Truth. Then it is for him to be about his Father's business, and to do just as Jesus did,-simply to say to every single suggestion or belief in a lie which presents itself as the truth, "No man eat fruit of thee hereafter for ever." Should one think for one moment that he would gain anything by laying away treasures of material possessions for a future use, he can know right now that such thinking or theories and doctrines are of no avail in finding his way into the kingdom of heaven; for all that man has he has right now, and is supplied every single moment throughout eternity. When one comes into an understanding of Christian Science he very soon discovers this fact: that all he truly knows of anything is that which he admits as consciousness, and on finding that God is infinite consciousness, or Mind, he finds his supply of good always in divine Mind, manifest to him in exact proportion to his understanding. Then is it not perfectly clear that supply must be and is the expression of or response to the spiritual quality or demand of that which is infinite, divine Love?

One may hear voiced about him to-day that through the high cost of living one is forced to acknowledge the evidence and conditions brought about through a fear of shortage of money. Now it is not difficult for any one with a true concept of Christian Science to understand how this seeming condition has been brought about; ignorant thinking in regard to what money really is has caused the world to fear it or love it. The law of divine metaphysics is the reverse of any lie, because the lie would not be a lie unless it claimed to be the truth. Just the second that one claims that money or anything else is material he immediately places a limitation on it. But in knowing that in reality the idea of Mind is the true money, just as it is true man, he sees it for what it really is, God's eternal and perfect presence.

DAVENPORT BROMFIELD

AN acknowledged authority on good manners and politeness wrote thus to his son: "Know, then, that as learning, honor, and virtue are absolutely necessary to gain you the esteem and admiration of mankind, politeness and good breeding are equally necessary to make you welcome and agreeable in conversation and common life. All people are judges of the lesser talents, such as civility, affability, and an obliging, agreeable address and manner, because they feel the good effects of them, as making society easy and pleasing." A gentleman is supposed to be courteous and polite not only toward those who agree with him but also toward those who may disagree with him or abuse him. A gentleman realizes that each individual is entitled to his point of view; he is also moderate in speech and action. How often has it been heard that a certain individual had charming manners but a bad reputation. The whole world acknowledges a certain kind of courtesy and good manners as being necessary and essential to an enlightened civilization but this courtesy is often of the outward appearance and not of the heart.

A study of Jesus' life and activities shows clearly that while at times severe toward error, he always manifested true compassion and courtesy to those about him. He said to his students, "When ye come into an house, salute it." The testimony of those who knew her personally, and all that has been written of her prove Mrs. Eddy, the Founder of Christian Science, to be most courteous. Her words and writings breathe out a gentleness and refinement which are healing. Christian Science, being metaphysical, heeds not the outward appearance but finds man in the image and likeness of perfect Principle, God. It shows the real man loving God with all his mind and his neighbor as himself. The real man, recognizing Principle, God, as his Father and loving his neighbor as himself, manifests a divine compassion and courtesy that casts the mote out of his brother's eve and heals the sick. As Peter in his first general epistle wrote, "Finally, be ye all of one mind, having compassion one of another, love as brethren, be pitiful, be courteous: not rendering evil for evil, or railing for railing: but contrariwise blessing; knowing that ye are thereunto called, that ye should inherit a blessing."

[Written for the Sentinel]

Harmony

C. M. PERKIN

EACH day with love
Roll back the clouds,
And your reward shall be
More understanding from above,
More Life and Truth to see.

Each day with truth
Pierce through the clouds
Of mortal sense, and see
The light of ever present Love,
Eternal harmony.

Each day with progress
You shall find,
The clouds that seem to be
Are nothing but the lies of sense,
For all is harmony.

The Father-Mother God

THE Fifth Commandment, though it may seem almost the easiest to understand of the ten words of the Decalogue, is, in some ways, perhaps the most difficult. The social relations of the centuries before the Christian era were scarcely those of to-day, and what seems a very natural and almost unnecessary requirement in the twentieth century was hedged with all sorts of difficulties in the days of Moses. It seems to be quite apparent that the effort to avoid responsibility for the help of parents was not only common then, but was even connived at by the priests. Thus the word honor seems to have enjoyed a very much more comprehensive meaning than mere respect, and to have included both clothing and feeding. This, presumably, was what Christ Jesus was alluding to when he accused the scribes and Pharisees of making of no account the law. "For Moses," he declared, "said, Honour thy father and thy mother; and, Whoso curseth father or mother, let him die the death: but ye say, If a man shall say to his father or mother, It is Corban, that is to say, a gift, by whatsoever thou mightest be profited by me; he shall be free. And ye suffer him no more to do ought for his father or his mother; making the word of God of none effect through your tradition, which ye have delivered: and many such like things do ye." What Jesus meant was quite simple. Corban was the expression for something put aside for sacrifice, and so given to God. Therefore, the priests were encouraging the man to neglect honoring his father and mother, by the subterfuge that what they needed was already dedicated to God. In this way the plain meaning of the Commandment was set aside by a mere quibble.

Jesus' demand was for a return to the obvious meaning of the Commandment. But the Hebrew Scriptures were at all times an opportunity for enforcing the spiritual truth by means of material illustration, and Jesus no doubt saw clearly that the man who did not honor his material father and mother would be incapable of honoring his spiritual Father-Mother, God. The writer of the first epistle of John makes this quite clear, when he says, "If a man say, I love God, and hateth his brother, he is a liar: for he that loveth not his brother whom he hath seen, how can he love God whom he hath not seen?" Now, though Jesus was insistent that men should honor their material parents, he was equally clear that the real Father and Mother of all mankind was God, Principle. He told the Pharisees plainly that the material father was personified evil, meaning undoubtedly by this the belief that human generation was not the reality, but that spiritual creation was. And this he made equally clear to the multitude when he insisted, "Call no man your father upon the earth: for one is your Father, which is in heaven." And this is surely what Mrs. Eddy is referring to when she writes, on page 416 of Science and Health, "The material body, which you call me, is mortal mind, and this mind is material in sensation, even as the body, which has originated from

this material sense and been developed according to it, is material. This materialism of parent and child is only in mortal mind, as the dead body proves; for when the mortal has resigned his body to dust, the body is no longer the

parent, even in appearance."

The spiritual lesson, then, which has to be derived from the superficial material meaning of the Commandment, is that which Jesus drew, and which Mrs. Eddy has explained in Science and Health. It is that the real Father-Mother is God, and that man, in the image and likeness of God, cannot be a human being, but must be a divine idea. In this way only can the human family be made one, and in this way only is it possible to understand what Jesus meant when in the press of the crowd, he replied to those who declared that his mother and his brethren sought him, "Who is my mother? and who are my brethren? And he stretched forth his hand toward his disciples, and said, Behold my mother and my brethren! For whosoever shall do the will of my Father which is in heaven, the same is my brother, and sister, and mother." Thus the fatherhood and motherhood of God has to be realized exceedingly clearly if healing is to be accomplished, in the only way it can be accomplished, through Love. The man who saw all creation as the children of divine Mind, and who claimed for all God's children the fatherhood of Principle, had reduced the whole question of family, nation, and humanity, to its true metaphysical significance. The unity of mankind, he recognized, could only be brought about by unity of thinking. The children of God were those who understood and acted on Principle. These people, whether fishermen from Capernaum or publicans from the receipt of custom, were to him brother, and sister, and mother. He was prepared to love them all alike, just as he knew they must love him. God was not his Father alone, but the Father of all who did the will of Principle. Never once did he claim that this fatherhood was confined to himself. He spoke of our Father and your Father indiscriminately, obviously meaning that the real man had only one Father and one Mother, Principle. "Father-Mother," says Mrs. Eddy, on page 332 of Science and Health, "is the name for Deity, which indicates His tender relationship to His spiritual creation. As the apostle expressed it in words which he quoted with approbation from a classic poet: 'For we are also His offspring."

Now, Christ Jesus was the way, and no man can climb into the sheepfold by any other way. Therefore, clearly, any person who is desirous of walking in the footsteps of the Christ must come to understand the teaching of the Christ on this subject. In honoring his human father and mother, whom he has seen, he is but taking a preliminary step to honoring his spiritual Father-Mother God, whom he has not seen. The crucifixion of the flesh means, if it means anything at all, the getting clear on this momentous question. Behind it lie all the passions of separation with which the world is flooded, because these passions have their source in the belief of a limited love of the human being for a select and selected number of other human beings. This is not honoring divine Mind, for it is attempting to limit love first to family, and then to nation, in a way which is the foundation of strife. In order to obliterate all strife, to heal the sick, it is absolutely essential that the practitioner should realize that nothing but the image and likeness of God exists. It was, among other reasons, because he realized this so clearly, that the human being gave place always, in Christ Jesus' consciousness, to the image and likeness of God, with the result that the patient was healed. "Jesus," Mrs. Eddy writes, on pages 476-477 of Science and Health, "beheld in

[900]

Science the perfect man, who appeared to him where sinning mortal man appears to mortals. In this perfect man the Saviour saw God's own likeness, and this correct view of man healed the sick." Thus Jesus, in honoring his Father-Mother God, made the days of the human being longer in the land which Principle had given him; for he taught the world how to master sin, and thus, in overcoming sin, to overcome disease and death.

FREDERICK DIXON.

Moments of Healing

In the practice of Christian Science one often finds that those seeking help will report, before the complete healing comes about, that they have had certain periods of relief, lulls in the seeming tempest of trouble, which have been welcome foretastes of what whole freedom is. The best way is, of course, for healing to be instant and perfect, that is, the true healing which replaces sin as well as sickness with the wholeness of Mind's right action. If, however, the healing has seemed slow, it is good to accept every moment of healing as showing that it is possible for one to be free all the time. The control of Mind over its idea that is proved for a day, an hour, or a single instant, must in the end be proved for always.

Each moment in which the student of Christian Science is conscious of divine order in his living is to be cherished with joy, but not with any fear that it may slip away from him or fade into a mere memory that is precious. Just as the man who observes the stars with exact care sees a planet to-. day from one angle and next year from another angle, thus gaining here a little and there a little of the knowledge he is seeking, so the searcher for the true health of Spirit, not matter, rejoices in each real sense of the divine concord, today one phase and to-morrow another, until he fully proves for himself what is real. All that ever has been the feeling of true health is still present to bless, for the being conscious of the one true Life, even for a moment here and a moment there can never be reversed or made void. In the process of healing, the mists of mortal mind which suggest themselves as one's own being may melt and disperse into the nothing which they have always been, either all at once or by degrees. The way to go forward is to be grateful for every moment of freedom and to persist in knowing that the good that is now or ever has been must unfold as the good of eternity.

Healing as found in Christian Science is the new birth. On page 15 of "Miscellaneous Writings" Mrs. Eddy tells us: "The new birth is not the work of a moment. It begins with moments, and goes on with years; moments of surrender to God, of childlike trust and joyful adoption of good; moments of self-abnegation, self-consecration, heavenborn hope, and spiritual love." Every giving way of the belief in matter to the knowing of the truth that Mind alone controls man as idea is progress in healing. To trust in God is to accept the divine Mind as the one I AM, the only "I," the real selfhood, which is Spirit. Man as idea is effect of this one supreme I AM, and thus is truly humble, for effect can do nothing without cause. Surely part of the new birth is the awakening to the fact that man is effect, the action of Spirit, as well as to the fact that Mind alone is cause.

Real joy in any moment of healing is not mere human feeling, but is the certainty of Mind's right action, of Life's constant goodness, in spite of any seeming. As the sureness of Principle it is revealed through true reason and practice, and thus is far greater than mortal emotion, which is subject to whims and change. Mrs. Eddy's statement on page 24 of "No and Yes," "There was never a moment in which

evil was real," is proved to be the fact when a man is able to rejoice in the goodness of Life, no matter what may have seemed to be, for through this joy of the divine Mind he replaces just so much belief in errors and discords of a supposed past with the understanding of Principle which was before Abraham.

The right time for healing is always now. Sooner or later one who has seemed to suffer or be limited must come to the understanding with which he is able to say, "I am free now, because I do express and actually manifest only divine intelligence at this very moment." He probably will not put his recognition of real health as present in those words or any similar to them; but the awakening to spiritual wholeness in Mind, quite apart from the belief in matter, is inevitable. When, therefore, the seeker for healing is even for an instant conscious of relief, then is the time to know and prove, with gladness but without any sense of human intensity, that good continues. The genuine experience of spiritual order cannot be nullified, but remains to unfold with infinite blessing, regardless of suppositional mortal mind's further arguments, which are sheer illusion without the slightest chance of ever becoming real. Nothing can be added to or taken away from the harmony of genuine living which is eternally intact as the one Mind knows it.

On page 11 of "Rudimental Divine Science" Mrs. Eddy says: "What seem to be disease, vice, and mortality are illusions of the physical senses. These illusions are not real, but unreal. Health is the consciousness of the unreality of pain and disease; or, rather, the absolute consciousness of harmony and of nothing else. In a moment you may awake from a night-dream; just so you can awake from the dream of sickness; but the demonstration of the Science of Mind-healing by no means rests on the strength of human belief. This demonstration is based on a true understanding of God and divine Science, which takes away every human belief, and, through the illumination of spiritual understanding, reveals the all-power and ever-presence of good, whence emanate health, harmony, and Life eternal." The moment of awakening is continuously at hand, and, in the last analysis, no one can judge as to how much of the awakening or healing which is the new birth is going on with another. That each one can be conscious of for himself.

GUSTAVUS S. PAINE.

Requiescence

INEZ CAMPBELL

Pursuant of the truth I dwell in ecstasy,
Nor find the pathway dull nor hard to tread;
Each new effect unto its cause is wed,
One light supreme, divine, in all around I see.

No carping care can enter Mind's great calm domain; All wrong as ignorance alone I know, Right acts from better understanding flow; Where sense feels direct loss I know it all as gain.

There is no fickle chance, naught but all-present law,
No boding fate, save what we weakly fear;
The reading of our lives needs not a seer—
Prophets all were they who life's unwavering purpose saw.

Since I have realized the "ours," not "mine" or "thine,"
The joy that comes in knowing all one's own,
Transcendent peace has made my heart its throne;
From beauteous day to day I am vouchsafed a sign.

Testimonies of Healing

It is with ever increasing gratitude that I testify to the healing and regenerating power of Christian Science. After hearing a lecture on Christian Science in London, I was so impressed with the reasonable and logical statements made by the lecturer, that I determined to buy a copy of the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, at once. In my ignorance at that time of the existence of such a place as a Christian Science reading room, or a church even, I went to a wellknown secondhand dealer in books and asked for the abovementioned volume. I was told that they already had fifteen names down in waiting for such a book, and that up to then no sign of one had come their way. I thereupon ordered a new copy through them, and after a daily journey to the shop for a fortnight, I was at last rewarded. Had I been more alert, inside half an hour from the time of the lecture I would have been in possession of one.

For five months I studied the contents of the textbook, this being my only instructor, as I was not acquainted with any Christian Scientists. The results were as follows: Inside of three months all desire for tobacco, alcohol, and the use of bad language had entirely disappeared. I might mention that those habits had gained a considerable hold on me; also, that the awkward and irritating twitching of a nerve about the face ceased, and even amidst explosions of bomb and shell gave me no trouble. Again, at a time when a serious influenza epidemic scare was prevalent I was stricken, but at the end of forty-eight hours was perfectly well, simply through reading Science and Health and putting into practice the little I then knew. My general health was unmistakably greatly improved.

At the end of three years, through the continued study of the textbook and Mrs. Eddy's other works, together with the Christian Science periodicals which she founded, I find myself a changed man, better morally, physically, and spiritually. During the last fifteen months a steady healing of deficient sight has been taking place. Condemned, on the advice of an oculist, to wear two pairs of glasses for life, one for "near" and the other for "far" sight, I found myself face to face with what seemed to be a difficult problem. But this has been met and overcome through the persistent study and practice of Christian Science, until with the unfolding spiritual understanding thereby gained I have proved the truth of the definition of eyes as given by Mrs. Eddy in Science and Health (p. 586), "Eyes. Spiritual discernment. -not material but mental," so that now I am able under normal conditions to see without the aid of either inside or outside glasses.

For all these and countless other minor healings I am deeply grateful and never a day passes by without my proving in some little way my thankfulness to God and my gratitude to Jesus the Master, and to Mrs. Eddy, our courageous Leader, for the wonderful, uplifting, and energizing power of Christian Science. I am also grateful for the privilege of class instruction and for the Christian Science literature and the reading rooms.—James Currie, Dublin, Ireland.

When I turned to Christian Science for healing, several years ago, I did not resort to it because I had any faith in it or understood it in the least. In fact I had always opposed what I believed Christian Science to be. All my life I had been considered rather delicate and had had numerous ailments at one time and another. At last the physician who

was then attending me told me he could do nothing more for me except perform an operation, which he would not do because he did not consider me strong enough to go through with it. In desperation I went to see a Christian Science practitioner. I was greatly helped at that first visit and I went back the next day and for many days after that, because I wanted to learn more of Christian Science. I bought a copy of "Science and Health with Key to the Scriptures" by Mary Baker Eddy and commenced reading the Lesson-Sermon every day. In three days the members of my family remarked about the decided improvement in me, and the condition which the physician said could only be relieved by an operation was perfectly corrected in a few months.

A little over a year after I began the study of Christian Science, our little son came to us. Although material law had voiced many adverse decisions, his advent was normal. I went through the experience absolutely unafraid, which was a great demonstration to me, as I had always been very full of fear at the thought of such an ordeal. I am grateful to the practitioner whose clear thinking was a great help and comfort at that time. In our family, we have had many demonstrations of the curative power of Truth, some of them instantaneous, some more protracted, but all of them proving the healing efficacy of Christian Science when rightly applied. I am very thankful that Mrs. Eddy, through her purity of thought and self-immolation, was enabled to give this wonderful truth to humanity. The Christian Science literature, which Mrs. Eddy established, is a constant inspiration, especially The Christian Science Monitor, which comes every day with its message of good cheer and its authentic world news.

I wish to acknowledge my gratitude to the practitioners who have so patiently and kindly helped me in my search for Truth. I am also grateful to all earnest Christian Scientists, who, through their writings, and their practice of Christian Science, are helping to purify and enlighten the thought of the world. I rejoice that through the study of Christian Science I have gained some understanding of what God is, and what man, in the image and likeness of God, is. For the assurance that "this is life eternal" and "now is the day of salvation," I am most thankful.

(Mrs.) MARY FRANCES Foy, Berkeley, California.

Having in some degree learned, thanks to Christian Science and to the devoted help of Christian Scientists, "to know the love of Christ, which passeth knowledge," I gratefully send this testimony. I am thankful to God and grateful to Christian Science for the overcoming of sin, and of the mental agony and shame it occasioned. By quiet mental insistence on God's ever presence and ability to supply our every need, I find the reward daily and hourly.

PHILIP JOHNSTON, London, England.

I am so happy and thankful for what Christian Science has done for me and mine that I must tell it with the hope that my testimony may help some one as the reading of the testimonies in the Sentinel helps me. I love all of Mrs. Eddy's writings and read little else. We have had many wonderful healings in our home, including colds, catarrh, and rupture, and one member of the family was healed of an ingrowing toenail.

One day I fell downstairs and was apparently very badly hurt and was in so much pain that I could not sit down, lie down, or stand with any degree of comfort. I turned thought to the only Physician, divine Love, and was

wonderfully and instantaneously healed. I felt such a spiritual uplift, and was able to do a small family washing with not the slightest sense of fatigue. My gratitude goes out to our revered Leader, Mrs. Eddy, for bringing the truth to this age. I am grateful for membership in The Mother Church and my desire is that I may express more of God's love.—(Mrs.) Anna B. Grable, Toledo, Oregon.

I can truthfully verify all statements contained in Mrs. Grable's testimony and also wish to add my own. I have been completely healed of chronic catarrh of ten years' duration. I was also cured of rheumatism, which prevented me from raising my left hand or arm to the table when eating. I am now completely healed of both infirmities, and I am thankful to Mary Baker Eddy for showing us the way so plainly that all who will may follow in it, ever trusting in God and knowing all good is His and that He supplies all our needs.—A. F. Grable.

4

Christian Science has benefited me in many ways. I am very grateful for the healing of quinsy sore throat which took place many years ago, from which I had suffered nearly all my life until I became interested in Christian Science. My tonsils had been removed, but this did not help me. After I had Christian Science treatment, and read Christian Science literature for a few months this disease was healed and has not returned. For this and many other healings I am very thankful.

(Mrs.) EMILY FORBES RAVELL, Chicago, Illinois.

4

I came to Christian Science for healing, as I was suffering from rheumatism in my feet and ankles. For years I had been a nurse and I knew that according to materia medica there was no real, permanent help for rheumatism, so when I felt it slowly creeping upon me I felt as though I were doomed. I thought in time it would take possession of my entire body, and in fancy I could see myself a helpless invalid with nothing to look forward to but death. I tried very little material help as I had no faith in it. Being a medical nurse I had never given Christian Science much thought, although I did not feel any special dislike for it, as I knew nothing whatever about it. By the time I had arrived at the stage where I depended on a cane or some friendly arm to support me, one of my friends was taken ill, and all through her illness everything that materia medica could do for her was done. She seemed to be rapidly nearing death. At last, in desperation, she called a Christian Science practitioner, and was instantly healed. Her healing made a great impression on me and as she kept pleading with me to try the same means for my own trouble, I at last yielded to her wishes and went with her to see a practitioner. From the very first I lost sight of the reason for my visit in the joy of hearing that God does not afflict His children, that He does not know evil, therefore it is not real. From that moment I knew that I had found the true God, whom I had been seeking all my life.

The healing was slow, but even for this I am very glad, for had it been instantaneous I might not have kept on studying. It was two years before the belief was destroyed, although I experienced a great many healings from other discordant conditions during that time. I walked three miles from my home to the church to attend a Wednesday evening meeting, and after the meeting, when I had reached the sidewalk in front of the church, it came to me that I had walked all that distance, sat all the evening, and that

my feet and ankles were not stiff or painful in the least; in fact, I knew that I was free, that the bondage was entirely destroyed, and, in the words of Isaiah, I could "run, and not be weary . . . walk, and not faint." For this, and all other healings I am indeed grateful, but more than all is the knowledge that divine Love is always present with me and that in the degree I let God govern will there be peace and happiness.

(Mrs.) CLARA E. MILLS, Portland, Maine.

4

I am thankful to God that I was led to read "Science and Health with Key to the Scriptures" by Mary Baker Eddy. I had not heard of Christian Science until seven or eight years ago, when my daughter was suffering from a sore leg and foot, which different doctors had treated but had failed to cure. A dear niece, who had been healed, wrote and asked her to try Christian Science so I wrote to a practitioner, who came and talked very lovingly to us and lent us a copy of Science and Health. I must acknowledge that I began to read the book through curiosity, for I had no faith in Christian Science. I had not read a dozen pages, however, before the scales fell from my eyes.

I had been a member of a denominational church for sixty years but was never satisfied. I read my Bible but could not understand it. I had worn glasses for thirty-five years, but have now laid them aside. My daughter's foot has been healed and I have been healed of different diseases in the last five years. The healing power of Truth has been proved in my home many times, and I feel so grateful to my niece and to all who have helped me. Now I know that God is ever present. I have not taken a drop of medicine for several years and I am in perfect health. I used to have fears but they are overcome. I am trying to be guided by the teachings of Christian Science and to live the truth. I hope some one who reads this may be brought from darkness and fear to the light of Truth as I have been.

MRS. GEORGE W. POE, Sanford, North Carolina.

٠

Christian Science came to our home through a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, which had been borrowed from the public library. This was early in the month of November, many years ago. We made a compact to read nothing but the Christian Science textbook for the remainder of the month, which resulted in a miraculous healing of a long-standing chronic condition over which many a prayer had been prayed. Healing must have taken place during the reading of the chapter on Prayer. We were so busy trying to ascertain what Christian Science really is that ailments of the body and business troubles were entirely forgotten. Many healings have taken place since, including that of an ulcerated tooth, of coughs, colds, sick headaches, and the overcoming of a severe pain in a limb.

Christian Science is the only healer of grief, and has taught me how to be happy in the midst of every conceivable turmoil. Every day brings greater joy and appreciation of Mrs. Eddy's revelation of Truth. The unfoldment of divine intelligence as true activity is realized more and more as we daily study the Lesson-Sermon and the uplifting literature established by our Leader. I would urge the study of Science and Health and all of Mrs. Eddy's other works for the healing of every kind of error,—ignorance, fear, and sin.

(Mrs.) Ella M. Waterhouse, Boston, Massachusetts.

An editorial in a recent Sentinel reminds me that a testimony for publication is one of the debts I still owe to our beloved Leader, Mary Baker Eddy, and the glorious cause she espoused. When Christian Science found me, many years ago, life seemed little worth while. My advent into the world was attended with ague, the usual remedy at that time being administered when I was but three days old. Each summer I was seriously ill, until while still a young girl I had become a dyspeptic, as the result of which so many ills developed that health seemed very remote. For many years I tried the skill of many physicians, only to grow worse and worse, until I was a physical wreck, suffering from indigestion, constipation, rheumatism, inherited sick headache and spinal trouble, and a number of minor ills.

Because I could not agree with the denominational belief of heaven I was called an infidel. Here Christian Science poured oil on the troubled water, and taught me "Thy kingdom is come; Thou art ever-present" (Science and Health, p. 16). I became so absorbed with the thought that all could become apostles of the Master through the understanding and demonstration of the Word, that matter was forgotten, and when I did think of it, lo, it had no message of discord to impart. It would take a large volume to tell of all the blessings I have received since then, some of which are the overcoming of grip, pneumonia, smallpox, measles, fistula, and other ills. Heaven is very near, and life is indeed worth while.

It is with pleasure and great profit that I obey our Leader's injunction to subscribe for the periodicals. The time was when the *Journal* was our only periodical, and I well remember how I earnestly longed for a weekly, and with what joy the first *Scntincl* was received. And now we are blessed with the daily *Monitor*. With these publications to correct the errors of mortal thought, the way should be and is made much easier for all who avail themselves of them. I can truly say they each and all have shed many a benignant ray along my path.

(Mrs.) SARAH A. B. PHILLIPS, Doyline, Louisiana.

I am glad to verify my sister's conservative statement and also wish to testify to my own healing. After months of worry, anxiety, and sorrow, my sister wished me to come South with her. I was then living in the middle western part of the United States. I was nervous and exhausted, could get around but little, and had been bothered severely with asthma for many years. These spells would last for months at a time, but as I gained an understanding of Christian Science, all these conditions faded from thought. Now I am strong and well, and for several years I have farmed and both sister and I do much hard work, yet renewed strength and vigor attend each year. I was slow to take hold of Christian Science, but found it is for all when we are ready for it. I bear grateful testimony to its healing power.—Charles P. Baldwin.

I first became interested in Christian Science when a friend invited me to attend a lecture, which I did only because there was nothing else to do that night. I was intensely interested in the lecture, although it was several years before I took up the study of Christian Science. One night I went over to a neighbor's house, going in the back way, and by mistake stepped through an open cellar doorway and fell to the bottom of the stairs. Later, finding that something was internally wrong, I went to a physician who

told me that I was ruptured and must be operated on, but I immediately decided that this was my opportunity to try Christian Science. I asked for treatment and within two weeks was entirely healed. Since then I have had many proofs of the healing efficacy of this wonderful truth. On two different occasions I sprained my ankle which, after becoming so swollen and painful that I could hardly touch my foot to the floor, was almost instantaneously healed in each case by earnestly applying my understanding of Christian Science.

Little by little, through the study of the Bible and Mrs. Eddy's works, I am putting off the shackles of erroneous thinking and learning to rely more and more on our Father-Mother God. It is impossible to express my gratitude for the joy and peace that have come to me through the knowledge that divine Principle is Love, and that through the application of our understanding of divine Principle every problem can be met. I am very grateful to Mrs. Eddy for the consecrated work she has done for mankind and for all the activities which she established. I get much help and inspiration from the Journal, Sentinel, and Monitor, and wish to express my sincere thanks to those who contribute to them.—(Mrs.) Flossie S. Harrison, Washington, District of Columbia.

I am very happy indeed to verify the testimony of my daughter, as given above. I am conversant with the healings mentioned. I also have had many healings through the power of divine Love, the first one being of pyorrhea, from which I suffered continually and as the result of which dentists had told me that I would lose all of my teeth; but with the help of a practitioner I was healed. I have also been healed instantaneously of sick headaches and colds, as well as of many other ailments. I have not words with which to express my gratitude for the understanding I am gaining each day of the allness of God. I am grateful for class instruction and for all of the activities of the Christian Science movement. I wish to express sincere gratitude for the literature which helps me to meet the problems of each day as they come up.—(Mrs.) ISABEL LUSK, Washington, District of Columbia.

It is with a heart full of gratitude that I write my testimony, hoping it may help others, as I have so many times been helped by those in the Journal and Sentinel, which have been just what I needed and at the very time I needed help. The more we read and understand of "Science and Health with Key to the Scriptures" by Mrs. Eddy the more we find its teachings an ever present help in time of trouble. I am so thankful that I learned of Christian Science in time to teach it to my children. We have had many demonstrations for them. Our oldest boy has not had any medicine since he was two years old and the baby has never had any in any form. Both of the children have been healed of chicken pox, itch, sprained ankle, colds, and many minor ills through the application of our understanding of the truth. I myself have had many problems solved, not only physical and financial ones but others.

Words cannot express my love for Mrs. Eddy, who gave Science and Health to the world, in addition to the other literature, that we may learn of the truth that makes free. I am grateful to the practitioners who have so patiently and lovingly helped me to see that my biggest problem had no more reality than any other false belief about man. My greatest desire is that I may be able to help others as I have been helped.—(Mrs.) Grace Dunigan, Sumner, Missouri.

Signs of the Times

[From The Providence Sunday Journal]

The one hundredth anniversary of the birth of one of the most remarkable women of those who labored to benefit humanity will be memorialized next Saturday. Born in the little New Hampshire village of Bow, on July 16, 1821, Mary Baker Eddy, by her determination to devote her life to spiritual things, has risen in the hearts of millions of human beings to a height achieved by few. The storm center of as bitter a medico-theological controversy as modern times have ever seen, Mrs. Eddy went steadily forward to the accomplishment of her avowed purpose, the restoration of the earlier Christian teachings in their full significance, and lived to see her work firmly established.

That Mrs. Eddy was an American, born of a long line of Puritan ancestors, and whose genealogy is that of the Anglo-Saxon founders of this country, is, in the minds of many thoughtful people, but another concrete evidence of the vast spiritual destiny of America. To those who are not unmindful that genealogy has a place in the affairs of the world, it will be of interest to note that Mary Baker Eddy's lineage goes back to those Scotch forbears who were mightily associated with the affairs of their times, for a direct ancestor was a daughter of a king of Scotland, and thus her line is connected with the present royal house of Great Britain, which, as has been recently shown by many authorities, goes back straight in history through Scotland and Ireland to David, King of Israel.

The women of America and of other lands, have recognized the value of the labors of Mary Baker Eddy, and to-day her name stands highly placed in the list of those who have toiled in the interests of humankind. It was on February 1, 1866, that Mary Baker Eddy fell upon the ice at Lynn, Massachusetts, and sustained what physicians pronounced a fatal injury. For years previously she had been seeking a greater light upon the Scriptures, and now, in her extremity, she turned to her Bible for help. It was three days after her injury that she regained consciousness, heard the verdict of the doctors, and asked for her worn copy of the Scriptures. She turned to the gospel of Matthew, and after she read the account of the healing of the palsied man she rose, dressed herself and walked into the parlor of the house, where were gathered those who had but a few moments previously left what they believed was her deathbed. That incident marks, she has said, the discovery of Christian Science.

Many writers have pointed out that it is not frequently given to the inspirers of great enterprises to see their life work bear vast fruition. With Mary Baker Eddy apparently it was otherwise, for, while she had entered upon her work at an age when most women are given to believing that they are close to the end of their earthly journey, she lived during the next forty years to see her discovery become one of the accepted religions of the world, with churches numbering thousands dedicated to its service, and countless thousands of adherents in every civilized land. Those who knew her best have said that she was a great leader. Among her followers were business men who left their work to do the things she bade them. They numbered bankers, financiers, manufacturers, literary men, and merchants. Each and every one she inspired with courage and gentle determination that marked her own character, it is said. She was a woman of high emprise, if one may judge by her works, and she was possessed of a keen insight. On

Thanksgiving Day, 1908, appeared the last of her ideals: a daily newspaper which should, in her own language, injure no man, but bless all mankind. Quietly, and from all parts of the United States and Europe, she gathered the men to whom she entrusted the carrying out of her new enterprise. It was all very simple. She wrote to a select few of her students, and told them that the time had come for the establishment of The Christian Science Monitor, and asked them how long would be required for them to produce the first copy. They replied, Three months, and the paper made its appearance on time. Those who have contended that women lack the executive ability to carry forward great enterprises have been met many times with the record of Mary Baker Eddy, a simple New England woman of great culture, refinement, and courage, who in less than fifty years built up an organization that has spread all over the globe; that has for one of its expressions a magnificent temple that dominates the exclusive Back Bay district of Boston, and that is devoted to the amelioration of the lives of mankind. . . .

The world has numbered few women as leaders of great spiritual movements, and to the thoughtful student the figure of Mary Baker Eddy is looming larger as the years go by. Those who came most intimately in contact with her have always spoken of her straight Americanism, and her conviction of the great destiny of the land of her birth. She laid upon her followers strict injunction to obey and respect the laws of the land. And she practiced strictly what she preached in that respect. She held no great illusions of herself; she was content to worship God and to do her duty as an American.

[From a Sermon by Canon H. Scott Holland, as quoted by Graham Wallas in "Our Social Heritage"]

ness that the faith of Christ Jesus lays all its emphasis. There are religions, as we know, which tend in the other direction. They invite men to communion with the Divine by swooning back into those inarticulate and unreasoning abysses of emotion in which personal and individual consciousness is lost. But the Jew passed on the word to the Christian church that truth has not to be sought in chants or ecstasy, but in the reasonable hope of prophecy.

[Henry Foster Adams, in Scribner's Magazine]

Popular systems which deserve inclusion among the "gold bricks" are those for training the will. Their advertisements suggest that, because exercise makes the arms grow stronger, mental exercise has a similar effect on the will. They mention that after a brief "course" we shall no longer vacillate; our knowledge will always control our actions; we shall always do that which is right-in short, the millennium will be here. . . . Many years ago the idea of a separate entity, a discrete mental structure known as the will was abandoned by psychologists. There exists no little manikin that sits up in our brain with his hand on the tiller steering our thoughts and actions, for the manikin in turn would necessitate another of similar kind but of greatly reduced size to control the thoughts in the head of the first; the second would demand a third; the third a fourth; and so forth ad infinitum. Such a hierarchy suggests the logic of the ancients about the support of the flat world. It was supposedly upheld at the four corners by elephants, who, in turn, stood on the backs of turtles, who, in their turn, were upheld by eagles flying in the air. The air needed no support, for it was so light that it floated in space. It is obvious that any such theory, instead of explaining the unknown in terms of the known, leaves the mystery still unexplained and introduces many additional elements even more difficult to understand than the original ones. At the present time of psychological development emphasis is placed on function, that is, on doing rather than on the structure which works.

[From "The Spiritual Basis of Politics," by Sir John Macdonell, K.C.B., LL.D., in The Contemporary Review]

It is often said that rarely, if ever, was there a time in which pessimism in some of its many forms was so widespread as it is to-day. It is no longer the mood of a few soured or disillusioned spirits, of "those young gentlemen who would be as sad as night for only wantonness." Men, young and old, it is often said, are tired, hopeless, and perplexed. The world, we are told, is sick as it never was before; sick with many maladies, some of them obviously of war origin, others of an earlier date, but accentuated and disseminated by the great struggle. It is a restless as well as a sick world; restlessness and instability of mood and conviction are visible in all lands. . . . The above is a very rough sketch of a complex situation. But if it is in the main correct, important consequences follow. With no common spiritual basis of political and social life, can there be unity of purpose or of policy?

[From the Glasgow (Scotland) Citizen]

It is always being drummed into us, writes a clergyman, in the National News that the man of to-day will not listen to sermons; but it all depends on the sermons-what they are made of and by whom they are delivered. As a matter of fact, there never was so much preaching as there is today, and never were there so many listeners. Not that every preacher stands in a pulpit or every listener sits in a pew. With few exceptions, the best sermons to-day come from men and women who do not write "Rev." before their names and have nothing to do with the clerical profession. In the widest sense, ours is a day of lay preachers; novelists, dramatists, doctors, judges, vie with each other in driving home, from their different points of view, the great moral issues. It is also to be noted that many of the most interesting and significant contributions to religious thought in recent times have come from the laity of both sexes. These are remarkable facts, and they carry a far-reaching significance. What religion needs above all else is to open its windows and to loosen its suffocating collar of ecclesiasticism and orthodoxy, so that it can breathe freely the fresh air of enlightenment and common sense; and this is just what happens when the lay mind gets its opportunity.

[David Starr Jordan, as Quoted in Association Men]

Virtue is never negative. The father can promote the plain virtues of sobriety, honesty, tolerance, and kindness. The most effective way of teaching these virtues is for him to illustrate them in himself—to show how righteousness looks when it is lived. And remember always that right living is a positive thing.

["German Dry Law in Preparation"-From The Boston Herald]

Is Germany doomed to ultimate prohibition? The first toddling steps toward teetotalism are revealed by this ominous news item: "Privy Councilor Melior told the Reichstag committee on population policy that the government

draft of a law for fighting alcoholism was in preparation, whereupon a member of the ultra-reactionary German national party proposed a resolution calling upon the government to place the draft of a law against the misuse of alcohol before the Reichstag at the next session; secondly, to negotiate with all the German states with a view to joint, ruthless action against the weedlike growth of bars, dancing saloons, and liquor parlors; thirdly, not to give in to urgent demands for making the hours of police duty longer; and, fourthly, not to permit the rank and luxuriant growth of alcoholic advertisements on the state railroads." The resolution was unanimously passed.

Notice

SHORT TERM SUBSCRIPTION AND ORDER RATES

Attention is called to the new rates now in effect on short term subscriptions for *The Christian Science Monitor*, *Christian Science Sentinel*, and *The Christian Science Journal*; also on single copies of the *Sentinel* and the *Journal*. These rates are stated in the advertisements found on the inside front cover page of the *Sentinel* and on page "iv" of the *Journal*.

Attention is also called to the rates scheduled below, now effective on all quantity orders for any of the Christian Science periodicals:

Monitor\$.04	a copy
Sentinel	1/2 "
Journal	
Der Herold18	"
Le Héraut	"
Quarterly	1/2 "

These rates are net and take the place of the former 10% discount on periodical orders.

An exception to the *Monitor* rate given above is made in cases where orders specify that the copies desired are for free distribution at a Christian Science lecture or for other free distribution. This should be clearly stated when ordering. Such orders will be filled at 3 cents a copy.

The uniform retail price on the Sentinel is now 10 cents a copy, and on the Journal 35 cents a copy. The Monitor single copy price remains at 5 cents.

Discounts to reading rooms on subscriptions and on orders for general publications remain as before.

Church Notices

*** * ***

Boston, Mass.—The First Church of Christ, Scientist. Sunday service (during July and August), 10:45 a.m.; Sunday school, 10:45 a.m.; Wednesday evening meeting, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading rooms: Little Building, corner of Tremont and Boylston Streets (fourth floor); open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. National Union Bank Building (seventh floor), 209 Washington Street, opposite old State House; open daily, except Sunday, from 9 a.m. to 5.30 p.m. Massachusetts Trust Company Building, 236 Huntington Avenue; open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 7 p.m.

[906]

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in *The Christian Science Monitor*, were run off at the time of their publication in the *Monitor*.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 81/4" x 103/4". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for *The Christian Science Monitor*, *Journal*, *Sentinel*, *Quarterly*, and *Heralds*, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and immediate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

There will be placed on sale in a short time six new pamphlets, containing articles reprinted from the Christian Science periodicals, as follows: "Government," "Employment," "Work and Play," "Progress," "Occupation," "Relationship." Orders for these pamphlets may be sent at once, to be filled on the date of issue. Price 5 cents a copy. Reading Room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the Editorial Department, The Christian Science Publishing Society, Boston 17, U. S. A.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder

of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large Type (18-point) on Warren's heavy India Bible paper, bound in leather. Size 8 by 103/4 inches. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in The Christian Science Journal from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in The Christian Science Journal and Sentinel, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

German Translation. Alternate pages of English and German.

Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY BOSTON USA

Christian Science Literature

"Science and Health with Key to the Scriptures" and all other published writings of Mary Baker Eddy are listed on the outside back cover page of this Sentinel.

The Christian Science Journal

Founded, 1883, by Mary Baker Eddy. This monthly magazine is an official organ of The First Church of Christ, Scientist. in Boston, Massachusetts. Contains articles, editorials, and testimonies of healing, a directory of Christian Science Churches, Societies, and Reading Rooms; also in the January, April, July, and October issues a list of Christian Science Practitioners and Nurses. Subscription price, payable in advance, postpaid to all countries: One year, \$3.00; six months, \$1.75; three months, \$1.00; single copy, 35 cents.

The Christian Science Quarterly

Founded, 1890, by Mary Baker Eddy. Published January, April, July, and October. Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size. Subscription price, payable in advance, postpaid, to all countries: One year, \$1.00; single copy, 25 cents.

Christian Science Sentinel

Established, 1898, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. Subscription price, payable in advance, postpaid, to all countries: One year, \$3.00; six months, \$1.75; three months, \$1.00; single copy, 10 cents.

Der Herold der Christian Science

Authorized, 1903, by Mary Baker Eddy. A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months, 50 cents; single copy, 20 cents.

Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months 50 cents; single copy, 20 cents.

The Christian Science Monitor

An International Daily Newspaper. Founded, 1908, by Mary Baker Eddy. An International Daily Newspaper. Founded, 1908, by Mary Baker Eddy. Daily, except Sundays. Its own world-wide news service is supplemented by the service of the Associated Press and of the United Press Association. Complete in its departments; unique in its Home Forum page. Full page of editorials dealing truthfully and fearlessly with vital questions of the day. Subscription price, payable in advance, postpaid to all countries: One year, \$9.00; six months, \$5.00; three months, \$3.00; one month, \$1.10; single copy, 5 cents.

Subscriptions will begin with the next issue after the receipt of the order. Information regarding bound volumes of the weekly and monthly periodicals will be given upon request.

AUGUST 13, 1921

NUMBER 50

Christian Science and the Communal Life

HRISTIAN SCIENCE has made itself conspicuous by its teaching that the only freedom-bringing fact in all the universe is demonstrable truth. Further, it affirms that "the truth," a knowledge of which gave Christ Jesus such beneficent authority and power, may be apprehended by spiritually aspiring men so that in conscious obedience to divine law they may do his works and thus solve their problems whether individual or communal. The failure of human philosophy and long-time, earnest effort to accomplish this end, together with the marked reserve of Christian believers in accepting the practicability of our Lord's teaching respecting the power of the ideal-all this has had immediately to do with that sense of the hopelessness of the tragedy of human experience which has oppressed thoughtful hearts in all the Christian past, and which is more openly expressed to-day, perhaps, than at any previous time.

One of the most distinctive teachings of the gospel is this, that spiritual truth is available for all and that when understood it is adequate to humanity's every need; hence pessimism can have no place in the thought of those who have really accepted it. Speaking of the redemptive scope of the monotheistic concept of Spirit for which she stood, Mrs. Eddy has said in "Science and Health with Key to the Scriptures" (p. 340): "One infinite God, good, unifies men and nations; constitutes the brotherhood of man; ends wars; fulfils the Scripture, 'Love thy neighbor as thyself;' annihilates pagan and Christian idolatry,-whatever is wrong in social, civil, criminal, political, and religious codes; equalizes the sexes; annuls the curse on man, and leaves nothing that can sin, suffer, be punished or destroyed." Elsewhere (Miscellaneous Writings, p. 144) she emphasizes the beneficent relation of true Christian Scientists to the communal welfare in affirming that "The Church, more than any other institution, at present is the cement of society, and it should be the bulwark of civil and religious liberty," and, (p. 155), "Forget self in laboring for mankind; then will you woo the weary wanderer to your door, win the pilgrim and stranger to your church, and find access to the heart of humanity."

Honoring this call to the fulfillment of civic duty we shall certainly do all we can to secure them the administration of civil and economic justice, the insurance of an entirely fair chance for every man, and it is only thus that we as professed Christians may hope to convince the world that we are sincere and consistent in our asserted devotion to the Master's teaching as expressed in the second great commandment. The knowledge of God and man in His image logically and inescapably relates its possessor to practical affairs, and this in view of the fact that all our communal problems are ethical. They all involve questions of right and wrong. It is clear, therefore, that he alone who discerns spiritual truth and is obedient thereto is efficiently equipped to cope with these problems. Further, a

mathematician may have a clear grasp of the rules involved in the construction of a bridge but he cannot use this knowledge successfully until he has acquainted himself with the length of the required span, the load to be carried, the tensile strength of the steel to be used, and so on, and this is no less true of him who would like to aid in the collective endeavor to bring an existing moral sense to the determination and enforcement of right human relations.

The Master enjoined that we let our light so shine before men that they may see our good works and glorify our Father which is in heaven. In fulfilling this command it is apparent that the light of Truth is, first of all, to be consciously possessed and radiated in the maintenance of scientific right thought and compassionate fellow interest. More than this, if one is intelligent respecting the factors involved in the situation, it is possible for him to awaken the existing moral sense and make clear to others the way in which, by working together, improved beliefs may be brought about. He thus becomes a leader of the people by adjusting the Christ-idea, the rule of right, in so far as it has been recognized, to the present human need. This calls both for a knowledge of the claim to be met and for that love of humanity, that good Samaritan good will, which the Master so highly commended, which prompts to unselfish effort to advance the common weal, and which leaves no doubt among men respecting the genuineness of our love for them. He who would be successful in that fishing for men which Christ Jesus commended to his disciples, must have "the wisdom from above" which can both perceive and supply the present, pressing needs. The dispelling of the darkness of this world demands our cooperation both with God and with men. The dynamic currents of truth He supplies, but the film which He thus makes radiant is true and well informed brotherliness. If our right hand firmly clasps our Father's, and our left no less firmly grasps that of our fellow man, then our ability to uplift and benefit him is no longer a matter of question. The saving connection has been established.

Through the delegated effort of missionary representatives Christian people have always done much, and especially in the last century, toward the world-wide dissemination of their faiths. As a whole, however, they have always come short in exhibition of the spirit of universal brotherhood, and especially with respect to concerted insistence upon the fulfillment of economic justice. This fact has given rise to much just criticism of the church and separation from it, and to the prevailing pessimism to which we have referred, and it is altogether discreditable to professed Christianity. If, when economic difficulties are come upon, there were a sincere and earnest collective purpose to see that the right is done, then a way to the heart of the situation would be easily blazed. Things are always opening up to the man who is honestly seeking to discern and do the just thing. This is evidenced in the life of our Leader, as in the lives of all other great reformers. Each has been

given a larger measure of that divine light which "lighteth every man that cometh into the world," because each has fearlessly followed the light already possessed. It is in this that the tremendous responsibility of those who have been given the light, inheres. Jesus' words, "Let your light so shine," speak unmistakably both for our possession of the truth and for its largest use in human affairs. To illustrate: In a world supplied with a superabundance of natural resources, involuntary poverty witnesses unequivocally to the rule not of the Christ-spirit but of human selfishness. This condition of wretchedness has always featured so-called Christian civilization, even as it does to-day, and in so far as it results from our lack of insistence upon the reign of economic justice, or our failure to utilize our apprehension of truth to dispel the error of selfish or stupid indifference to wrong, in so far we can but recognize our responsibility.

Christ Jesus declared that his yoke was easy and his burden light, and yet he imposed a splendidly high standard of social requirement upon his every follower. This must mean that our success in solving our own individual problem is to be found in part in the intelligence and unselfishness of our interest in unburdening our neighbor. Our joy and rejoicing are to be measured in the cup of comfort which we bring to our fellow men by loving and intelligent devotion both to their spiritual uplift and to their human welfare, and this is the urgent call to every Christian Scientist today. Much of the philanthropy and legislative endeavor to lessen existing distress and inequalities has utterly failed to secure any substantial betterment of the situation, and this fact has greatly discouraged many of the well disposed, and correspondingly reduced their active interest in all such attempts to solve the human problem. They have reached the conclusion that world conditions can be essentially bettered only by the redemption of the individual, hence that legislative effort in this direction is futile, and unworthy the consideration of those who have come to see that in the last analysis redemption means the illumination of consciousness, the transformation of character. These persons, however, are forgetful of Jesus' words, "Gather up the fragments that remain, that nothing be lost." There is a sense of right, and a respect for it, in common consciousness to-day,-the residuum of all the good that has been taught and lived by the saints and seers of the past,-which if "gathered up," appealed to, and focused upon existing economic wrongs would speedily eliminate them. Further, it is ours to discern and make others see these economic wrongs which are the cause of so many ill results, and by removing them do vastly more than merely remedy effects. It is ours also, in all these human relations, to know and rely on the power of "the truth," when bravely spoken and consistently lived. William Lloyd Garrison proved that the force of a right idea is irresistible as we unflinchingly stand for it, and by it. He proved that one with God is a majority, and as Christian Scientists and lovers of men it is our business to do just that thing.

To-day there are many who are open to the philosophy, the spiritual teaching of Christian Science, and to these we may minister in the most direct and effective way. More than this, all mankind, whatever their religious prejudices, are open to the fruits of Christian Science, to the ministries of that brotherly love of which Christ Jesus speaks so urgently and specifically, as recorded in the twenty-fifth chapter of Matthew (verses 34-45). And this is the keystone of the arch: "Inasmuch as ye have done it unto one of the least of these my brethren, ye have done it unto me."

The Sea

SIR HENRY JAPP

IN crossing the ocean it is impossible for one to escape the evidences of creative Mind. Especially is this so at night when, if the sky is clear and the sea smooth, it seems as if the ship were in the center of a large round black table under a huge inverted bowl of blue closing one in from above and fitting tightly around the table edge at the horizon. The only promise of something beyond those limits is the innumerable stars which appear to be formed by an all-pervading light shining from without through small holes pierced in the blue bowl. The finely cut crescent of the new moon but enhances the illusion. When one realizes that from every point of the earth's surface a continuing vision of an endless number of stars can be seen, which may be multiplied many times as the limited human vision is enlarged by means of a telescope, and again multiplied if a camera is substituted for the eye at the telescope, it is impossible to avoid the conclusion that the true universe. of which this ordered host in the heavens is but our human sense, must be the effect of infinite creative Mind.

Since the infinite extends in all directions, one sees that infinite Mind must fill all space and must contain no element of destruction, so that in contemplating the nature of Mind one can but conclude that it must be good and contain no evil, for evil is self-destructive. It must be Love, for an infinite Mind containing hate must of necessity be self-destroyed. For the same reason it must be Truth and contain no error, it must be Life and contain no death, and it must be omnipotent, the only power, else if there were other powers one would ultimately conquer the others and be supreme, which God is. So, then, one reaches the divinely logical conclusion that since all space is filled with omnipotent Mind, good, Love, Truth, and Life, there can be in reality nothing unlike Mind, so that its opposite, matter, evil, sin, disease, and death have really no existence, and only seem to be real, as delusions, mirages, or false beliefs. Such conclusions although divinely logical seem to the human mind absurd, for this mind argues that the material universe and material man are the only realities, and that evil, sin, disease, and death are real experiences and no delusion. These conclusions are reached from the evidence before the senses, on the assumption that the senses are competent judges, but the inverted bowl of blue sky meeting the black table of the sea around the horizon, or the gray sky in the daytime meeting the green ocean, are the evidences of the senses which are refuted every mile the ship advances, for the sky is found to be as far from the sea when one arrives where the horizon seemed to be, as it was before.

There are innumerable instances with which every one is familiar where the senses are just as deceptive, and it requires only additional enlightenment to see that the senses are altogether liars, as Jesus said, and incapable of knowing Truth. In Christian Science we learn that this enlightenment is spiritual understanding and that the material senses are the material beliefs through which we have been looking at God's spiritual man and spiritual universe. We can escape the results of our false material viewpoint and become conscious of the joyous activity of infinite Mind, divine Principle, and of its perfect manifestation, man, by spiritualizing our thought through the study of the Bible along with the writings of Mary Baker Eddy, the Discoverer and Founder of Christian Science, and by putting her teachings into practice in our daily lives and proving by

demonstration that Christian Science heals the sick and sinning.

In this way we come to understand that divine Mind expresses itself as idea and never in matter, and that therefore where the wild, stormy, material sea seems to be, God's idea is, altogether joyous, beautiful, perfect, and safe. When Jesus was awakened by his terrified disciples, surely it was this truth which he saw, for we read, "Then he arose, and rebuked the wind and the raging of the water: and they ceased, and there was a calm. And he said unto them, Where is your faith?" In an instant the fury of the waves, representing thousands of horse power of material energy in the moving mass of water, was stilled. In the face of the so-called material law which insisted that such a great amount of stored up energy can only be dissipated by the destruction of anything opposing it, or become gradually absorbed by the friction of the water on itself, Jesus proved its nothingness and caused it to vanish with a word, "Peace, be still." In doing this he proved the omnipotence of what Mrs. Eddy calls "the unlabored motion of the divine energy," where, on page 445 of "Science and Health with Key to the Scriptures" she says, "Christian Science silences human will, quiets fear with Truth and Love, and illustrates the unlabored motion of the divine energy in healing the sick."

Jesus could not have overcome the raging sea and the tempest if God had made them so, or if they were acting in accordance with divine law, for an all-wise God does not make laws to be set aside; but is it not obvious that Jesus was acting in accordance with God's law in producing peace and safety for his followers? A raging, destructive sea must be wholly unlike Love, and we read in Psalms, "The sea is his, and he made it," and again, "Thy way is in the sea, and thy path in the great waters, and thy footsteps are not known," also, "All the paths of the Lord are mercy and truth;" so that when we know God's path, righteousness or right thinking in Truth, we shall understand the sea of God's creating and see why Jesus said when he stilled the storm, "Where is your faith?" for is it not obvious that he meant that if his disciples had but had sufficient faith they themselves could have stilled the storm through the Mind "which was also in Christ Jesus"?

The lack of faith on the part of the disciples was the result of this storm in mortal mind tempting them to believe that God was absent and that God made the storm. Jesus, knowing that the storm was an unreal concept of this unreal, supposititious mortal mind, destroyed it through his understanding of the divine Mind, which knows no matter. The Christian Science textbook makes several references to error or mortal mind in the form of the sea, and on page 569 Mrs. Eddy writes, "Alas for those who break faith with divine Science and fail to strangle the serpent of sin as well as of sickness! They are dwellers still in the deep darkness of belief. They are in the surging sea of error, not struggling to lift their heads above the drowning wave."

It is this sea of error which Christian Scientists the world over have enlisted to destroy, so that the vision of the beloved disciple on the isle of Patmos may be realized. In Science and Health Mrs. Eddy interprets this vision, on page 536, as follows, "In the Apocalypse it is written: 'And I saw a new heaven and a new earth: for the first heaven and the first earth were passed away; and there was no more sea.' In St. John's vision, heaven and earth stand for spiritual ideas, and the sea, as a symbol of tempest-tossed human concepts advancing and receding, is represented as having passed away. The divine understanding reigns, is all, and there is no other consciousness."

Will Power

ELEANOR M. CONANT

THE true idea of will is defined in the Glossary of the 1 textbook of Christian Science, "Science and Health with Key to the Scriptures" by Mary Baker Eddy (p. 597), in part as, "The might and wisdom of God." This must be then the only will power there really is. Mortal mind, however, believes in and values a counterfeit will power. Students of Christian Science, when first beginning to realize how much alteration is needed in their character, how many bad habits have to be broken down, how much self-indulgence and apathy must be overcome, and finding that this reformation is not accomplished without a struggle, sometimes express fear lest they should be using will power. The study of Science and Health has taught them that "Human will-power is not Science" (p. 144) and that "Human will is an animal propensity, not a faculty of Soul. Hence it cannot govern man aright" (p. 490). Consequently they fear any use of the human will, and are inclined to think it safest not to make much effort, but to wait in hope that with more study of Christian Science the instantaneous healing of faults, such as they sometimes hear and read of, may come to them. But this cannot be the right way of facing the difficulty.

In our present experience healing is not always instantaneous. More often great patience and perseverance are necessary in overcoming the error that has enslaved us in the past. The striving against evil certainly implies use of will, but there need be no fear of using it if we remember Mrs. Eddy's warning on page 206 of Science and Health, "The power of the human will should be exercised only in subordination to Truth." If our motive in striving to overcome any form of error is the desire to be obedient to the voice of Truth, then we may be sure that the power we use in fighting error is not erring human will power but is the right idea of will, the "might and wisdom of God." The time will come, as we gain more spiritual understanding, when obedience to Truth will no longer seem to us to be a struggle against our human desires, but it will be, on the contrary, the fulfillment of our hearts' strongest desire.

Our Periodicals

HELEN ANDREWS NIXON

In the lives of Christian Scientists all over the world there is a great wealth of spiritual treasure laid up, which should be earning interest through the medium of our valuable periodicals. As this is done, those who write and those who read become joint partakers of these fruits of scientific thinking and living, and the pæan of praise to God begun in the hearts of the writers swells to a chorus in the hearts of the readers, and joyous tones reverberate from one uplifted, grateful student to another, thus fulfilling divine Love's law of blessedness in giving.

The writer well remembers a winter's evening, not many years ago, when, after a good full day's work alone, there was a strong desire for the companionship of others. After contemplating this desire for a while, she took up a new number of *The Christian Science Journal* and read it from cover to cover. The number was a strong one, maintaining its pure and helpful spirit throughout. Following this reading came the quiet, sweet realization that the evening had indeed been spent in the choice society of good men and women. There had been nothing to mar, nothing to detract. The reader had been granted intimate converse

1

i z

SI.

r.

with the very best, the very ϵ ssence in the lives of those who had written for her and for others.

In the writing and the reading the false mask of personality had been essentially dropped, and heart spoke genuinely to heart, with no need of an interpreter, for the language was one, the language of common longing and aspiration and of common joy in the truth of Christian Science made practical. The unity of desire, purpose, and true fellowship disclosed by the writers testified to the fatherhood of God and the brotherhood of man. Christian Scientists well recognize that to prevent the accomplishment of such good, the false claim of evil would, in belief, put up all sorts of subtle arguments to hinder the altogether natural and spontaneous written expression of Christian Scientists. We should all be alert to detect and silence the suggestions and prove that what we want to do we can do.

The Bible and our Leader's incomparable writings only are to be pored over for self-instruction (see Manual, p. 34), but do not the writings of students in our periodicals serve to bind these students together, revealing to them, through glimpses of genuine being, the indissoluble bond, the true family tie, namely, the spiritual? Our written expressions tend to encourage, uplift, and bless one another because of their very naturalness in fulfilling their purpose to comfort and to give good cheer to fellow pilgrims. The written words of Christian Scientists are like milestones and signboards along the road, which would say: "We have been along here; this road leads to where you want to go; take courage; be of good cheer." It does strengthen us to find others are passing the same landmarks, gaining the spiritual idea of progress, as defined by our Leader, on page 181 of "The First Church of Christ, Scientist, and Miscellany," where she says, "Progress is the maturing conception of divine Love; it demonstrates the scientific, sinless life of man and mortal's painless departure from matter to Spirit, not through death, but through the true idea of Life,-and Life not in matter but in Mind," and we

"O, my people! journ'ying onward,— You of Christ's great brotherhood."

Though unknown to one another, we press on, confident that all is well and that we can and shall work, watch, and pray up to the great awakening when we shall know as we are known. At a cost we cannot estimate our Leader established the Christian Science periodicals. Ours it is to maintain them loyally.

Charity

BERNARD M. JOY

PASSIVE goodness receives little encouragement in these progressive days of industrial expansion, inventive achievement, and social experimentation. Unless a project can meet the test of usefulness it will lack even consideration. This condition is not new to human experience; it only seems new because it appears to this generation in a new guise. Utility has always been a universal demand, but human ingenuity tries always to avoid the issue because, no doubt, of evident lack of ability to meet the test. In no realm of endeavor has this demand been more persistent than in religion, and the Scriptures abound in practical examples of its fulfillment. "Pure religion and undefiled before God and the Father is this, To visit the fatherless and widows in their affliction, and to keep himself unspotted from the world." In other words, individual spiritual integrity must be maintained and expanded into good will and good deeds. Paul in his great proclamation of love

sets forth the same idea: "And now abideth faith, hope, charity, these three; but the greatest of these is charity." The greatest Christian attribute is an actual, active expression of the divine Love which is infinite Principle.

Now charity is a word used in the Bible exclusively by writers of the epistles, with one exception, and is in all cases translated "love" in the Revised Version of the year 1881, and by other modern translators. Although one can hardly love without being charitable, there seems to be a sense in which love as an abstract idea does not include charity as popularly defined. Love may be accepted theoretically as a static or basic Principle without regard to the fact of its ceaseless, unerring power, just as electricity may be considered only a name for a certain force, without knowledge of its laws of operation. It is here that Christian Science makes a clear distinction between a passive and inactive religious system depending upon negative forms for expression, and the positive and invariable life-giving Principle that heals and lifts up mankind.

Charity is one of the greatest channels for this activity, and its particular office may be inferred from its use as one of the definitions of "oil" given by Mrs. Eddy on page 592 of her textbook, "Science and Health with Key to the Scriptures": "On. Consecration; charity; gentleness; prayer; heavenly inspiration." Charity is the application of Christly affection that offers healing to the galling wounds of social inharmony manifested in mistreatment, mistakes, misfits, and misery. It is that unswerving attitude of thought, that resolute disposition expressed by Abraham Lincoln in memorable words: "With malice towards none, with charity for all, with firmness in the right, as God gives us to see the right." With this definition in mind it is plain that charity is more than mere almsgiving. Indeed in his letter to the Corinthians, who were trusting so much in their beneficence, Paul makes it plain that one may give away all that he possesses and may even sacrifice his person or body and not express charity or Love. Charity is Love in the process of blessing by act or attitude.

It must be clearly seen, therefore, that charity begins at home, that is, in the heart of mankind. This mental attribute is frequently designated as good will, and its effect is aptly and accurately described by Mrs. Eddy in a message to the field, entitled, "What Our Leader Says" (Miscellany, p. 210), "The right thinker abides under the shadow of the Almighty. His thoughts can only reflect peace, good will towards men, health, and holiness." Students of Christian Science endeavor to "put on charity," to emulate the affection of Christ Jesus in loving their enemies, forgiving their persecutors, and spreading the good news of healing at all times and on all occasions. A protestation of Christian conviction is of no avail without the fruits of loving thoughts expressed in brotherliness, loving-kindness, and forgiveness. "Above all things," declares the apostle Peter, "have fervent charity among yourselves: for charity shall cover the multitude of sins."

It cannot be inferred correctly that any human act condones sin, although the Scripture just quoted has often been used as an excuse for condonation. It simply means that such affection as that exemplified in the life of Jesus is broad and effectual enough to wipe out every vestige of evil in human experience. "The way to extract error from mortal mind is to pour in truth through flood-tides of Love" (Science and Health, p. 201). Though often helpful and praiseworthy, neither money, clothing, nor arguments will answer the cry that humanity sends over the seething waters of human misery and discord. The work of healing de-

mands humble consecration, charitable motives, and compassionate kindness, besides requiring one to forgive as he would be forgiven, to lead gently, and to lift tenderly. "He that loveth not his brother whom he hath seen, how can he love God whom he hath not seen?" asks the beloved apostle John. Righteous living wins one's own pardon and will be sufficient to bear the blessed message to others.

The exercise of the right sense of charity requires courage, for it sometimes is contrary to the prevailing form of expression. The effectiveness and sincerity of many philanthropic enterprises of recent years have often been a debatable question. Those who ordinarily manifest good judgment have under the stress of unusual, tragic conditions fostered projects which if not actually harmful from an ethical standpoint, are at least questionable. The truest aid is that which inspires a man to help himself.

One need not fear to spend himself in loving service, for did not Jesus assure those who bore his yoke that they would find rest? It is a matter of history and of daily experience that workers for the welfare of mankind have been able to bear toil far beyond that ordinarily accorded human strength. It is fruitless labor and careless spending that exhausts. That is why Christian Science so aptly and fully teaches how to be truly charitable. Compassionately tactful, a Christian Scientist tries to be just as well as kind, constantly keeping in thought that appeal which so beautifully closes a hymn of Mrs. Eddy's (Poems, p. 13):—

My prayer, some daily good to do To Thine, for Thee; An offering pure of Love, whereto God leadeth me.

Strength

BETH HUGHES D'AETH

"THE Lord is the strength of my life," asserts David in that wonderfully eloquent and inspiring twenty-seventh psalm. We are given the recipe for endurance with a very lavish hand through the whole of this piece of minstrelsy of the psalmist. David had no belief of strength in matter; he attributed all his energy to the Lord, the Supreme Ruler. In the thirteenth verse he proclaims, "I had fainted, unless I had believed to see the goodness of the Lord in the land of the living." And that is the secret of strength. What a very simple solution after all! Just seeing the goodness of the Lord expressed. That is perfect prayer, and perfect praise. Though the solution is simple it may not always seem easy to work it out consistently. David knew this just as well as any of us.

Strength does not mean physical strength, though this is generally the aftermath if it has erstwhile been lacking. There is the strength of affection, strength of purpose, strength to do right under trying and perverse conditions, strength to see good though evil seems to predominate, and to keep the perfect vision in front of us till at last error yields. And the condition vanishes as we "see the goodness of the Lord" in all things. "The Lord is my strength," and this strength is perpetual, continuous, inexhaustible. "As thy days, so shall thy strength be." There is plenty to draw from. This same strength is one of "the unsearchable riches of Christ," Truth; it is limitless. Since the divine Mind is strength and is everywhere, filling all space, here at this minute with you and me, then we have strength always at hand. The whole of this energizing force is ours, so long as it is rightly used.

The suppositional opposite of strength is weakness. How often we have heard it said, "There is no reliance to be placed on him; he is such a weak character." How should we act in such a case? Error is subtle; it may whisper that it is too trivial to be taken notice of, or suggest that you "treat" the one under discussion. One course would be neglecting a duty, the other gross officiousness. The demand is simple. Reverse the sense testimony; know no weakness, realize strength, "see the goodness of the Lord" as manifest through man. On page 183 of "Science and Health with Key to the Scriptures," Mrs. Eddy says: "Obedience to Truth gives man power and strength. Submission to error superinduces loss of power." We must stick to the truth unflinchingly, and in proportion as we faithfully work, strength will be given for fresh conquests. God, good, must be first, last, and all the time, then we shall be able to sing with David, "It is God that girdeth me with strength, and maketh my way perfect."

The Law of Gravitation

FANNY DE GROOT HASTINGS

ON page 60 of "Miscellaneous Writings" Mrs. Eddy writes: "Every material belief hints the existence of spiritual reality; and if mortals are instructed in spiritual things, it will be seen that material belief, in all its manifestations, reversed, will be found the type and representative of verities priceless, eternal, and just at hand." In place of every so-called law of nature stands the spiritual law awaiting our perception. So it is with the law of gravitation. Every one knows the mortal aspect of it. Ask the man in the street, and he will tell you that it is the attraction which the earth holds for all material bodies.

Only when we turn from the material aspect and waken to its spiritual significance do we realize the true meaning of the law of gravitation. From this latter point of view it is the original and ultimate law of man's inseparability from God, of which Moses spoke when he declared, "The eternal God is thy refuge, and underneath are the everlasting arms." and to which Mrs. Eddy referred when she wrote in Science and Health (Pref., p. vii), "To those leaning on the sustaining infinite, to-day is big with blessings." This is the new-old law which Christian Science is again writing in our hearts. We are learning that "the earth is the Lord's, and the fulness thereof," and that the idea of good is held in its own perfect place in that universe through all eternity. In the light of a richer understanding we read: "Whither shall I go from thy spirit? or whither shall I flee from thy presence? If I ascend up into heaven, thou art there: if I make my bed in hell, behold, thou art there. If I take the wings of the morning, and dwell in the uttermost parts of the sea; even there shall thy hand lead me, and thy right hand shall hold me."

In reality we cannot be found in conditions or surroundings where God, Love, is not, and in proportion to our realization of this great fact will all apparent discord vanish. Though at times we may seem tested, and doubt, selfpity, or fear may lead us to exclaim: "Why hast thou forsaken me?" we can rest in this blessed assurance: "Yea, I have loved thee with an everlasting love: therefore with lovingkindness have I drawn thee." We are but little children in our study of Truth, still in a measure held down by the earth weights and gravitations of a false sense of self, but we are beginning to take our first steps Godward, and the eternal God is our refuge, and the everlasting arms have no sense of time or weariness.

On the Washing of Hands

THERE is a common belief that the mentality of Pilate may be summed up in his famous question, What is truth? This, of course, is a complete mistake, and it probably had its birth in that famous sentence of Lord Bacon's, "What is truth? said jesting Pilate, and did not stay for an answer." As a matter of fact, when Pilate asked what truth was, he was far from jesting. He was as grimly serious as a man could be. As serious as Goethe praying for "more light," or Kelvin regretting the fleetingness of time. Bacon was not thinking particularly of Pilate when he wrote the words. He was looking for an effective opening sentence for his famous Essay on Truth, and he certainly found it. But he has put the world astray ever since.

The real consciousness of Pilate is summed up in his washing of his hands. "I find no fault in this man," he said, and straightway "took water, and washed his hands before the multitude, saying, I am innocent of the blood of this just person: see ye to it." There, in one terrible sentence, is revealed the moral cowardice of the Roman proconsul. When he heard the Jews scream on the Pavement, "If thou let this man go, thou art not Cæsar's friend," his heart failed him. He knew too well what might happen in Rome if those words came to Cæsar's ears. though he declared that he could find no fault in the prisoner, though he described him as a just man, he quailed before the rage of the chief priests and the Pharisees, who saw their ecclesiastical supremacy, their privileged position, their whole future, jeopardized by the man who knew they were whited sepulchers, and was not afraid to say so.

What, however, Pilate sinned against was not only Jesus of Nazareth, it was divine Principle. The man he faced, in those terrible conflicts, when he tried to find the opportunity to acknowledge Principle without injuring his worldly prospects, was, he admitted, guiltless. Yet having admitted this, he actually imagined that he could wash his hands of the guilt of surrendering him to the hatred of the Jews. And be it remarked that by Jews the author of the Fourth Gospel means the Hebrew hierarchy, the chief priests and the scribes and Pharisees, the men who posed before the common people as their leaders and rulers, and by whom the common people were misled. Not that this made the sin of the common people less, but it did make the crime of the hierarchy worse. There was not one man present in those interviews who had not subsequently to give account of his share in them; but the part played by Pilate, conscious that his prisoner had done no wrong, yet imagining that he could wash his hands of bowing to the mad storm of fury and hatred which burst out on the Pavement, at the mere idea that a just man should be acquitted, was inexpressibly mean.

Pilate had talked with Jesus the Christ, and had been silenced by the direct simplicity of the truth he sought and

yet could not recognize when he heard. He had threatened him, only to find that he was threatening a man of greater powers than his own. Then, when sitting in the seat of Roman judgment he had failed to find his prisoner guilty of any of the crimes attributed to him by his accusers, he had determined to sacrifice him to their lusts rather than risk the consequences of the clamor of their outcry in Rome. And he imagined that after this he could wash his hands. No man can yield to the mesmerism of evil suggestion, no man can bow before the fear instinct in animality, no man can follow in the wake of the hypnotized multitude rather than stand alone in the right with two or three, and then wash his hands of the effects of his own carnal-mindedness, treachery, and cowardice.

Every man who attempts to wash his hands of his duty to Principle is guilty of deserting Truth, and in proportion to the enormity of his desertion must the penalty necessarily be. "The disciples' desertion of their Master in his last earthly struggle was punished," Mrs. Eddy writes, on page 47 of Science and Health; "each one came to a violent death except St. John, of whose death we have no record." Really what Pilate did, and what the disciples did, was not very different. The disciples deserted Jesus when the chief priests had made a prisoner of him and when they saw that it was dangerous to stand by him. Pilate deserted him when he heard the Jews cry, "If thou let this man go, thou art not Cæsar's friend: whosoever maketh himself a king speaketh against Cæsar." Pilate was afraid of Cæsar, the disciples were afraid of the high priests; both were victims of the mental suggestion which fed upon the fear generated by their own animality. If the disciples had lived in accordance with Jesus' own teaching, they would have known that all power was spiritual and all power was mental, and then they could have answered their own fears, when they tried to show themselves, in the very words in which their Master answered Pilate, when Pilate boasted to him of his power to crucify him, or to release him, "Thou couldest have no power at all against me, except it were given thee from above." In just the same way, if Pilate had exercised the mere animal courage of one of his own centurions, the malicious taunts of the Jews would have fallen upon his ears in vain. As it was, he believed in material power, and material riches, and material pride of place, and so he fell a victim to the suggestion that he might lose all these if he acted in accordance with Principle.

It is perfectly true, as Mrs. Eddy writes, on page 48 of Science and Health, that "Pilate was ignorant of the consequences of his awful decision against human rights and divine Love, knowing not that he was hastening the final demonstration of what life is and of what the true knowledge of God can do for man." But this was because of his own materiality. To him Jesus was a Jew, and he summed up his contempt for the whole race in the sarcastic question, "Am I a Jew?" In a way his materiality, like that of the scribes and Pharisees, was proof, for the moment, against the consequences of his own sin. But the more adamantine the human error, the more terrible the inevitable struggle to dissolve it in the effort to recognize Principle. It is easy enough to take the side of the mesmerized multitude at all times, but it is just as easy to stand with the apparently inconsequent minority in defense of Principle, when once Principle is understood. As Wendell Phillips points out, "One with God is a majority." It is only possible to realize this, however, in the proportion in which the infinity of Principle is understood. And this realization, again, can only be achieved in the proportion in which the

individual succeeds in defending himself against malicious mental suggestion. That surely is why Mrs. Eddy, on page 42 of the Church Manual, has made such defense the daily duty of the Christian Scientist. "It shall be the duty of every member of this Church," she writes there, "to defend himself daily against aggressive mental suggestion, and not be made to forget nor to neglect his duty to God, to his Leader, and to mankind. By his works he shall be judged, —and justified or condemned." It is absolutely useless for any man to plead that he has been led astray, or that he acted through ignorance, in the face of this, since it is by his works that he is to be judged.

FREDERICK DIXON.

The Interpretation of Scripture

THE study of the Bible in the light of Christian Science is an awakening to the spiritual meaning of the creation which the divine Mind knows. Often the true metaphysical idea shines through faltering human words as light breaks through clouds. It is always the idea of infinite Mind which the student must seek and not merely the intention of the original chronicler or of a translator coloring his version with his own preconceptions. From the beginning of one's interest in Christian Science, one needs to knows that divine intelligence and its expression are what one is turning to through study, reasoning, and practice. To the one with this right attitude, old phrases will take on fresh significance, since the inspiration of infinite Principle is infinitely manifest. Because no single human interpretation is all there is to true interpretation, each student is entitled to get from the Bible exactly the right meaning to bless him by dispelling just so much false belief that had suggested itself to be his; but because he catches a glimpse of Truth and phrases for himself this glimpse in words that satisfy him, he need not insist that every one else accept that phrasing as the whole expression of Truth.

Thus there is that kind of Biblical interpretation which depends entirely or in part on a literal rendering of the original words as they appear in the Hebrew or Greek, or rather in special Biblical dialects of those languages. This may be more or less profitable; but even those scholars who have reasoned out the meaning of the original words have disagreed and in their disagreement have expressed their various opinions in their renderings. It requires, therefore, metaphysical discernment to see Truth's idea in place of human concepts, for, as Mrs. Eddy says on page 241 of Science and Health, "Take away the spiritual signification of Scripture, and that compilation can do no more for mortals than can moonbeams to melt a river of ice."

Suppose, then, that a student of Christian Science finds his thought illumined by considering a Scriptural passage in a certain way, and another equally earnest student gains from the same passage what seems to be quite a different conclusion. Is either necessarily wrong? The flash of inspiration that one gets from thinking of familiar words from a new point of view may have to be very carefully explained indeed if it is to be helpful to others who have not gone through the same process of preliminary reasoning that resulted in this particular unfoldment. Neither of two or more human interpretations that seem contradictory is necessarily erroneous, for a still broader view of the meaning may show the connection which cancels the sense of inconsistency and leaves only the unified idea manifesting Principle, or divine Love.

That this is so is no reason why what may seem to others

an outlandish exegesis should be obtruded on any one's attention. It may be better for the student to be sure that the inspiration is absolutely clear to him and quietly to profit by it in his own daily experience, than for him to present to others what they may not be prepared for. If the reasoning is right because it is in fact supplied by divine Principle, it cannot fail to be of infinite blessing, in accord with what Mrs. Eddy says on page 206 of Science and Health: "In the scientific relation of God to man, we find that whatever blesses one blesses all, as Jesus showed with the loaves and the fishes,-Spirit, not matter, being the source of supply." One can always, therefore, be patient in his own study and practice, actually proving the maturity of true inspiration in every way. The way of giving by expressing divine intelligence is ever open because it is infinite, not limited to any human sense of what it should be.

In a good article on Christian Science a brief Scriptural quotation may be introduced to illustrate a point that has been carefully reasoned out, without any attempted use of such a citation as a proof of truth. It is futile to try to prove any point by a mere reference to the Bible, for a statement is not true simply because the Bible contains it, but is, instead, in the Bible because it is true first of all. What is universally true was progressively discerned and set down by prophets, apostles, and other writers. After a man has demonstrated some understanding of Principle for himself. he will usually find that the same understanding has been wonderfully recorded in the Scriptures, though in somewhat different language from that which he might use, because of the unfoldment of the truth since then. Thus he may refer, in an article that he writes as a sequel of demonstration, to some Scriptural statement of the one Principle which he has proved to be ever available.

The opportunity to express Principle, either in the writing of articles or otherwise, is a great privilege. With a right motive, no one need be afraid to do his best and give it gladly for the blessing of all mankind. When one has done his best, he is not in the slightest concerned as to how others may regard his work, for he knows that what the divine Mind requires expressed is inevitably expressed and that no supposition of anything else can be. There is the right way to express the meaning of infinite Truth so that all may understand it; and fortunately this right way is not limited to any set phrases. Each one must go forward fearlessly, rejoicing that the manifestation of divine intelligence continuously unfolds. By turning first of all directly to infinite Mind and finding what Mind knows as the true idea of any possible statement, the student of Christian Science learns constantly that, as Paul says, "All scripture is given by inspiration of God, and is profitable for doctrine, for reproof, for correction, for instruction in righteousness: that the man of God may be perfect, throughly furnished unto all good works." GUSTAVUS S. PAINE.

+++

COME, Brother, turn with me from pining thought And all the inward ills that sin has wrought; Come, send abroad a love for all who live, And feel the deep content in turn they give. Kind wishes and good deeds,—they make not poor; They'll home again, full laden, to thy door; The streams of love flow back where they begin, For springs of outward joys lie deep within. Even let them flow, and make the places glad Where dwell thy fellow men.

Testimonies of Healing

I first heard of Christian Science many years ago, at which time I was living in Switzerland. During the two years previous I was very unhappy, and I was searching for a demonstrable understanding of God, but my search seemed to be in vain. In my search I tried all Protestant religions and at last I decided to return to America for one month, hoping that perhaps there, in the church of which I was then a member, I might find what I was seeking, ever mindful that in the Bible we read: "He that seeketh findeth." I arrived in America, and Truth led me right to Christian Science. Mrs. Eddy's explanations of God in "Science and Health with Key to the Scriptures" on pages 465 and 587, were just what I was looking for, and I became very happy. I was so satisfied to know that God is that I did not try any further to demonstrate the truth.

Eight years later, when in America again, I had Christian Science treatment for gallstones, from which I had suffered very severely for many years. Each time the pain returned, after the first treatment, the truth that evil has no power, for God, good, is all there is, would come to me so clearly that the pain would cease immediately, and each time it became less severe, and after two weeks I was entirely healed. From the first day I took up Christian Science for healing I have not taken any medicine, although before that there was not a single day that I did not take two or more kinds. Christian Science has healed me of headaches, nervousness, and of insomnia, from which I had suffered ever since I can remember. One healing which I have experienced through Christian Science, and which to me seemed the greatest, although one thing is not more difficult for God to heal than another, was the fear of traveling overnight. I formerly could not take a night train as far as Paris without feeling very tired the next day as the result of fear which had kept me awake the whole night. I now very often travel from New York to California, spending four nights on the train, and during those nights I always feel so happy and safe in God's protecting care that I sleep peacefully. I have had many other proofs of God's ever presence. My children have also had many beautiful healings through Christian Science. I am grateful for all of Mrs. Eddy's writings, which have proved such blessings to me. I also look forward to the mail bringing me the Christian Science periodicals, all of which are my daily reading. (Mrs.) CLARA ISELIN, Zurich, Switzerland.

٠

It is many years since I became interested in Christian Science and I realize that it is time that I attempted to acknowledge some of the benefits that have come to me as the result of some little understanding of the truth of being which was gained gradually as I studied the inspired writings of Mary Baker Eddy. Like many others, at the beginning of the release from suffering I was greatly uplifted, but with more faith than understanding. I thought that a practitioner had taken the place of a doctor and could keep me well, but I later found that I had something to do, that there had to be first the uprooting of some of the accumulation of erroneous thinking in order to build on a firm foundation and thus avoid being engulfed by the many manifestations of evil belief that seemed to attack me.

Before accepting Christian Science I had practically become an invalid and was well grounded in medical theories and fears, and seemed to have rather a long and hard struggle to overcome some physical difficulties, while I was

quickly freed from others. I am especially grateful for the healing of a diseased condition of the ankle which for years had held me in bondage, an eminent specialist having declared it incurable. I had always to wear a support, and the least jar or a slight knock would bring on intense inflammation and prevent me from using my foot for many weeks afterwards. Colds, bronchitis, influenza, a badly poisoned finger, about which relatives expressed fear of the loss of the whole hand, have all vanished into their native nothingness through the truth as taught and practiced in Christian Science.

I owe much to the patient work of a practitioner who not only helped me through many difficulties but taught me how to work for myself. Christian Science has given me a practical religion which is explaining the teachings of the Bible; also the truth about God and man's relation to Him. Before knowing something of Christian Science I would, like many others, have had to own to a sense of fear if I had been asked the question, "Are you ready to meet your Maker?" In the light of Christian Science I can now answer: Why should man be afraid to meet omnipresent good, Life, Truth, and Love, from whom man is never separated? One naturally entertains thoughts of love and gratitude for our dear Leader, Mrs. Eddy, for discovering and giving to the world Christian Science; also for founding the periodicals, the Journal, the Sentinel, and the Monitor, which are bringing to mankind countless blessings. (Miss) RICA BENSUSAN, London, England.

٠

It is with the deepest sense of gratitude to God for all the blessings I have received through Christian Science that I offer my testimony, hoping it may be as helpful to some one else as the testimonies of others have been to me. I was delicate from childhood, subject to frequent colds, sore throat, bronchitis, and chronic bowel trouble resulting from typhoid fever. I was almost continually under a physician's care, but found no permanent relief. As time went on and I saw no prospect of health before me, I settled into a kind of hopeless depression, feeling there was no joy in life and that I was a burden to myself and family. This state of mind was not from lack of faith in God, for I was brought up in a Christian household and loved the Bible and had been a member of a denominational church for thirty-five years, but I could not apply my religious belief in a way to dispel the cloud that rested over me.

Finally I was persuaded to take up the study of Christian Science. I was slow in grasping the spiritual interpretation of the Bible, the allness of God and the nothingness of matter, but by degrees the truth dawned upon my thought and I was made free,—free from the bondage of fear, oppressed breathing, colds, bronchitis, fear of thunder storms, chronic bowel trouble, and other minor ailments. Only those who have experienced this wonderful healing can realize the joy, peace, and gratitude that filled my heart when I found I could take an active place once more in the home and in the world, with a healthy body, peace of mind, and a joyous heart. My grateful desire is that I may be instrumental in bringing this truth to help and heal others as it has helped and healed me.

(Miss) H. F. Dun, Columbus, Ohio.

4

My heart overflows with thankfulness to God and gratitude to Mrs. Eddy through whose purity of thought the Comforter was revealed to us, as Christ Jesus promised. I have been healed of severe bronchial trouble, after being

told that I could never be free again. I was also healed of the need for wearing glasses, through reading "Science and Health with Key to the Scriptures" by Mrs. Eddy. All sense of pain from a badly sprained ankle was overcome in less than an hour, although the discoloration and swelling lasted about a week. I could only think of the "scientific statement of being" at first, which was followed by the thought that God's idea was never supported by matter. Whereas there was a sense of lack, there is now plenty, through the realization of the abundance of God's goodness to all. I wish to express my gratitude for the literature and all it is doing for the world.—(Mrs.) Marion Mason, Glendale, California.

When Christian Science came to me there was an immediate healing of sorrow over the loss of a child. My desire for this new-found joy and peace was so great that no time was lost in getting to a Christian Science reading room and applying for "Science and Health with Key to the Scriptures" and the other writings of Mrs. Eddy, which were read in quick succession, and with the reading of each came the desire to own the book. The sense of calm which was then mine was such a contrast to the previous thought of restlessness and sorrow that though it seemed hard to understand all I read, I knew without a doubt that this is the truth, the promised Comforter, and that I would some day understand it all.

Up to that time we had been in missionary work and had been trained to believe that the lack of this world's goods was a condition accompanying in very large degree consecration to God's service, hence the cost of Mrs. Eddy's works at first seemed high, and more than I could afford, but very early came some realization of the falsity of such thinking and the all-sufficiency of God. The understanding that God has enough to supply all good to all soon brought little by little, in the most unexpected ways, the means to purchase one book at a time until all of the writings of our Leader, as well as the periodicals she established, were provided for me in the space of a few months. I did not realize at the time that this was a truly scientific demonstration of supply, for I had very little understanding of the letter of Christian Science, but the joy that all this was mine was unlimited.

I am grateful that the real missionaries, the Christian Science periodicals provided by our Leader, bring to our home their messages of boundless joy, and that to-day I am privileged to assist in this missionary work.

(Mrs.) S. Emma Klebsattel, Brookline, Massachusetts.

I wish to add my testimony to the many others which are given in the Christian Science Sentinel. I have had many beautiful healings. The first one was of ingrowing toenails from which I had suffered for many years. At the time an infection of one nail was causing much pain and annoyance; the whole foot was swollen and I was unable to wear a shoe. My husband wanted me to go to a doctor as he feared blood poisoning, but this I would not consent to, because the previous day I had gone to a chiropodist and the foot was so painful I could not let him touch it. The next day I decided to see a Christian Science practitioner. I did not know anything of Christian Science at the time but had been reading Science and Health, although I did not understand it. I knew, however, of several healings which had taken place, and I had attended services in the Christian Science church, and my little son attended the Sunday school. The practitioner asked me

to remove the application from my foot, which I did before he called. When he came into the room my foot was resting on a pillow on a chair and I had not worn a shoe for three days. I did not know what the treatment was in Christian Science, but I did know that it healed, and this knowledge must have helped me, because when the treatment was over the blood was again circulating in the foot, all pain had vanished, and I put on my shoes and went out and walked several blocks without any discomfort except a slight swelling, which had entirely disappeared by the next treatment.

I am very grateful for this healing for it has led to many others. Glasses were laid aside although I had been told by two leading specialists that I would soon have to wear them on the street; ptomaine poisoning has yielded to the truth, as has also yellow jaundice, and I have been able to overcome instantly many small burns on my hands. My young son has had many healings, among which was that of a very sore throat together with chills and fever. I am also very grateful that I have to a great extent been able to overcome worry on account of being separated from my son. Before studying Christian Science I was subject to great anxiety while traveling with my husband when the boy was in school, but I have learned that the arms of Love are around, above, and beneath His child. I am grateful for the Lesson-Sermons, for the textbook, and for all the periodicals founded by our revered Leader, Mary Baker Eddy. My daily prayer is that I may grow in grace and express my gratitude in my daily life, and thus become a real Christian Scientist.

(Mrs.) M. LE MAIRE, New York, New York.

٠

We have had so many benefits through Christian Science that I would like to express my thanks through the Sentinel. The first healing that was witnessed in our home took place several years ago when my husband was healed of a very severe form of bleeding piles. My two little boys have both been healed of constipation, and the younger one of various discords, and he is now in perfect health. When a young baby he swallowed the top of an aluminum pepper shaker, but with the help of a practitioner he was perfectly normal in a week, and has not suffered any effects from it since. I feel very grateful for this demonstration, which proved that life is not in matter and that Life is God.

I have had many benefits myself, just through reading Christian Science literature. We have also had financial problems worked out through Christian Science, with the help of a practitioner. For all these blessings I feel very grateful, but most of all for the peace of mind I have gained from the study of Christian Science in connection with the Bible. I am grateful to Mrs. Eddy for revealing the truth to all mankind.

MRS. EDWARD TRIPLETT, Big Fork, Montana.

*

I wish to express my gratitude for Christian Science. Through it I was healed of neuritis, chronic constipation, headaches, colds, and many other ailments. For these physical healings I am indeed very grateful, but I am most grateful for the correct understanding of God. I am thankful for all the literature, for the reading rooms, for the church services, and for the practitioners who are always so ready to help us. I am thankful to God and to Christ Jesus the Way-shower, and my gratitude goes out to Mary Baker Eddy who has made the truth so plain to us. I could not

M.C

: :

. .

i

understand the Bible until I became a student of Christian Science. I can truly say that when rightly applied Christian Science does meet every human need.—(Mrs.) Anna King, Indianapolis, Indiana.

4

Some years ago I was a physical wreck, having been for several years either bedfast or chairfast continually. I had submitted to two serious operations, only to find my condition worse than before and I could not sleep at all unless I took a powerful drug; in fact, I was kept under this influence much of the time. I could only eat two or three articles of food. After being treated by at least fifteen different physicians, who without doubt did all in their power to aid me, I was finally advised to go to another locality to spend my remaining days, where it was thought a lower altitude and sea air might alleviate my suffering. Soon after arriving there I became interested in Christian Science through the healing of a lady I met there who had had troubles similar to mine. I received help at once, and after the first treatment I arose, dressed myself, and walked into the next room, and later went with my husband about four miles on the street car to visit my parents. I began at once, with great rejoicing, to eat whatever food the family ate, and, better still, to sleep quietly at night. In nine weeks I traveled about two hundred miles alone with my two children and took charge of my own work, which I have continued to do.

Many are the blessings that have come to us, the realization of the comforting presence of God that came to me at the time of the passing on of one most dear to me being one of the greatest; and I am learning that if it is right for me to do things I have never done before I can do them through divine guidance. Man is the reflection of infinite intelligence and, as Mrs. Eddy tells us on page 123 of Science and Health, "Divine Science, rising above physical theories, excludes matter, resolves things into thoughts, and replaces the objects of material sense with spiritual ideas." I am grateful for Christian Science, for the loving help that has been so freely given me, and for the privilege of reading the Christian Science literature. I am most grateful for what Christian Science is doing for the world to-day.

(Mrs.) Nellie I. Clark, Stockton, California.

I feel that the time has come for me to add my pæan of praise to swell the mighty chorus of gratitude that has spontaneously burst from the hearts of men and is rising heavenward in one grand song of thanksgiving to God for the greatest blessing that has ever come to mankind,—Christian Science.

I became interested in Christian Science nearly four years ago. My progress has not been very rapid but my blessings are numerous. It is with the sincere desire to help some one, who may be struggling along a rugged path, that I give my testimony. Before taking up this study, I suffered severely from stomach trouble and could eat very little, and what little I did eat caused suffering. I was an unbeliever at the time and had no faith in God, medicine, or doctors. I did not take medicine to alleviate my suffering because I had no faith in it. I was afraid of doctors. I felt that they would load me down with diseases that I never thought of, and in my heart of hearts I felt that there was nothing wrong with me but my thinking.

My case seemed hopeless because there was no one to turn to but God and I had no faith in God. I was fast gaining a very morbid outlook on life, but when things looked the darkest then came the light. A younger sister of mine returned from the western part of the United States where she had gone for her health and had experienced a wonderful healing through Christian Science. I became interested at once. When she told me that my stomach could never know what I put in it unless I gave it the intelligence myself, which of course I could not, I at once felt that she had told the truth. Then, when she opened the Bible, a book I had read but little before, and pointed out the fact that God gave man dominion, I knew that the truth itself was being unfolded to me. I immediately ate whatever I desired and have never been afraid to do so since.

Of course there have been testing times, but Truth was always victorious. My progress was slow and often very discouraging, because it seemed so easy for my thoughts to go astray and so difficult to keep them filled with Truth and Love. But now, after nearly four years of striving to live the truth in my daily life, I can honestly say that I am very glad that my progress has been slow, for it has made me value every lesson and dearly treasure above all else the knowledge of the ever present and all-powerful Truth. I find that, as Mrs. Eddy says, beginning on page 253 of Science and Health: "The divine demand, 'Be ve therefore perfect,' is scientific, and the human footsteps leading to perfection are indispensable. Individuals are consistent who, watching and praying, can 'run, and not be weary; . . . walk, and not faint,' who gain good rapidly and hold their position, or attain slowly and yield not to discouragement."

Christian Science has proved useful not only in healing sickness but in business as well. The spiritual uplift has been wonderful and the greatest blessing of all is to know that we are all brothers and sisters, living, moving, and having our being in the one infinite Mind. I am thankful to God and grateful to Christ Jesus, the Way-shower, and to our revered Leader, Mary Baker Eddy.

PHILIP ALLEN, Baldwin, Long Island, New York.

4

For a number of years I had an earnest desire for some way to study the Bible whereby I might understand the Christianity that Jesus taught and lived and find a religion that was practical and certain in its results and not hazy and theoretical as the denominational religion seemed to be. I am grateful to say that Christian Science far exceeded my expectations in every way. The Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, has proved to be a veritable "Key to the Scriptures," unfolding to me more and more each day the truth that makes free.

When I began to read Science and Health I had no thought of being healed, although I had always been in bondage to ill health, but I was very grateful when I realized that I had been healed of stomach trouble of many years' standing. I have also been healed of neuralgia, headaches, general debility, and many other ailments common to mankind. I have been upheld and sustained through the valley of the shadow of death, and by constantly knowing the omnipresence of God I was able to find peace when my son enlisted in the army and later went to France and Germany. For all these blessings I am very grateful, because it has proved to me that God is, and that "He is a rewarder of them that diligently seek him."

(Mrs.) IDA R. FOSTER, Reno, Nevada.

Signs of the Times

[Extracts from "The Salvaging of Civilization," by H. G. Wells]

"You will accuse me of wanting to bury and forget Aristotle and Plato, Heraclitus and Lucretius, and so forth and so on. But I don't want to do that—so far as their thought is still alive. So far as their thought is still alive, these men will come into the discussion of living questions now. If they are Ancients and dead, then let them be buried and left to the archæological excavator. If they are still Moderns and alive—I defy you to bury them if you are discussing living questions in a full and honest way. But don't go hunting after them, there are still modern Immortals in the darkness of a forgotten language. Don't make a superstition of them. Let them come hunting after you. Either they are unavoidable if your living questions are fully discussed, or they are irrelevant and they do not matter."

"I am inclined to think that this swamping of a large part of the world's press by calculated falsehood and partisan propaganda is a temporary phase in the development of the print nexus; nevertheless it is a very great inconvenience and danger to the world. It stands very much in the way of that universal adult education which is our present concern. Reality is horribly distorted. Men cannot see the world clearly and they cannot, therefore, begin to think about it rightly. We need a much better and more trustworthy press than we possess. We cannot get on to a new and better world without it. The remedy is to be found not, I believe, in any sort of government control, but in a legal campaign against the one thing harmful-the lie. It would be in the interests of most big advertisers-for most big advertisement is honest; it would be, in the long run, in the interests of the press, and it would mean an enormous step forward in the general mental clarity of the world if a deliberate lie, whether in an advertisement or in the news or other columns of the press, was punishable -punishable whether it did or did not involve anything that is now an actionable damage. And it would still further strengthen the print nexus and clear the mind of the world if it were compulsory to correct untrue statements in the periodical press, whether they had been made in good faith or not, at least as conspicuously and lengthily as the original statement. I can see no impossibility in the realization of these proposals, and no objection that a really honest newspaper proprietor or advertiser could offer to them. It would make every one careful, of course, but I fail to see any grievance in that. The sanitary effect upon the festering disputes of our time would be incalculably great. It would be like opening the windows upon a stuffy, overcrowded, and unventilated room of disputing people. Given adequate laws to prevent the cornering of paper or the partisan control of the means of distribution of books and printed matter, I believe that the present freedom and unhampered individualism of the world of thought, discussion, and literary expression are and must remain conditions essential to the proper growth and activity of a common world mind."

[From an Editorial, "Learning to Accept Truth," in The Daily Journal-Press, St. Cloud, Minn.]

What an appalling amount of energy has been expended by the churches of the past in trying to combat truth. In the so-called Dark Ages, the church was in a deep groove. Education was denied the people, and even the Bible was a chained book, to be studied and expounded only by the chosen

few. Later the shackles were taken off, and the reading of the Scriptures became more universal as people acquired education. . . . The able churchmen of all denominations accept demonstrated truth, from whatever source, and do not attempt to condemn the sincere searchers. There never has been a conflict with truth and religion, because religion is founded upon truth, very simple and understandable. The Golden Rule and Christ's commandment, which contain the essence of the whole relation between God and man and man and man, are fundamental.

[From a Letter in The Living Church]

I have just read your editorial regarding the action of the Bishop of Michigan in offering to resign his office, et cetera. In connection with the whole matter of free speech, as it is called, certain thoughts come to my mind-not for the first time-which I believe are worth some consideration, for the question of free speech is an important one for the church as well as for the nation. Why is this generation so afraid of its prophets? Why are we so easily alarmed by the public utterances of men who criticize our institutions, government, or economic conditions? Is it because we love darkness rather than light? Is it because our deeds are evil? Is it because we have so much to hide that cannot endure the light of truth? No man who is perfectly sure in his own mind that he has done nothing wrong is afraid of what another may say about him. It is the man who knows that he has done wrong, or who is troubled by the uneasy consciousness that he may be doing wrong, who resents what others may say about his acts. Such a man will protest against having the attention of other men called to what he is doing, and, if it is within his power to do so, he will often try to crush his accuser by force.

To-day we are supersensitive about the danger of free speech. Are we equally concerned about the far greater danger of enforced silence? God help the nation which succeeds in closing the mouths of its prophets! I, myself, would far rather live in a land where a thousand false prophets were babbling nonsense, so that the true prophets were free to deliver their God-given messages, than in a country where all prophecy was dead. The glory of a nation is in its prophets! Take from the literature of Israel all the prophetic passages—the sublime utterances of Isaiah, the terrible predictions of Jeremiah, the bitter denunciations of Amos, yes, the divine prophecies of the gospelsand see how greatly Israel's glory would thereby be lessened! Among the Greeks, see by how much Socrates and Euripides, both of whom were greatly persecuted for the truth's sake-by how much they increased the glory of Greece! But why urge truth that is so exceedingly trite? Euripides prayed: "Almighty God, send light unto men, that they may know whence their evils flow and how they may avoid them." But when God sends the light, men cry out against it! We Americans are wont to boast of our freedom, but we have in part forgotten that it is the truth that makes us free. As long as men love the truth there is no danger that they will lose their freedom. A nation whose citizens are devoted to the truth above all else will never be a nation of slaves. All the harm which can possibly result from the utterances of false prophets is as nothing compared to the calamities which are sure to follow the suppression of the truth. Therefore it is far wiser to endure the former than to allow the latter to take place.

"What?" some man may say, "Do you really mean to maintain that the danger from free speech is so small as that? The abuse of free speech often causes revolution!" I

answer: Prove it. Violent haranguings by street orators have often preceded revolutions, but they are not the cause of revolutions. The cause of any revolution is to be sought far deeper. The abuse of free speech is a symptom, not a cause. It is no more a cause of revolution than sunstroke is a cause of the sun. Bad economic conditions, injustice, tyranny of governments, neglect of education, bad social customs, neglect of religion, these may be contributing causes of revolutions, but not what any prophet, true or false, may say.

[From a Letter in The Saturday Review]

The more we strive for truth for its own sake, the more and clearer light is given us. While fully admitting the indispensability of practicing right, that is, truth, in order to attain to clearer consciousness and larger understanding of its relation, I fail to see how any one could be said to strive for truth who did not practice it, for as Blake truly says, "Thought is act."

"I am the way, the truth, and the life," said Christ Jesus. . . . The person who loves truth and strives for it for its own sake and that he may benefit his fellows, thereby loves and strives for God for His own sake, the affinity between God and himself and truth and himself being identical and supreme. . . . A good life is not necessarily a life on a small dimension as many seem to think. Many of the religious and moral luminaries of the human race have been people in no way intellectually supereminent. Hence the true way, that is, the practice of right, is the highway of which Isaiah says, "The wayfaring men, though fools, shall not err therein."

[The French Ambassador to the United States, on a Right Concept of Commerce. From The Christian Science Monitor]

"People are apt to lose sight of what a grand and noble thing commerce is," said Jules J. Jusserand, French Ambassador to the United States, in taking the chair at the opening session of the Conference of Ambassadors on Foreign Trade, held in connection with the recent convention of the National Association of Manufacturers. "To be practiced profitably it must be practiced honorably. It needs peace, and is therefore an encouragement to peace. It obliges men to know other men better, and to study their characters and their wants. An intercourse is established between the honest people of one nation and the honest people of the others. Commerce is an excitant for men's genius, it leads to inventions and discoveries, that, for example, of nothing less than this continent of America, and of the road to the East by the Cape of Good Hope, found by men whose first incentive had been to facilitate trade with India. The ideal of trade is a very high one. To secure a maximum of advantage for all the inhabitants of this planet is the goal, as yet a distant goal. For the present we cannot dream of an even distribution of profits; the labor of deserving people must be taken into account; it could be another sort of inequality and of the worst kind if merits and demerits secured the same advantages, and if the hard-working had to suffer for the lazy. The lazy must have their punishment, which will be for them a valuable encouragement to work, to learn, to rise.

"The remedy is in the development of human character; to deny that it has progressed is to deny evidence; it will continue to do so, and it will perhaps become one day obvious to all, what is already obvious to many, that in the hunt for happiness one will garner a much more abundant harvest in limiting, not one's efforts, but one's profits."

[From The Independent]

During the course of the first quarter [at the University High School, University of Arkansas] a question was raised in the biology class about the ability of the boys who smoke to do high school work. In order to answer the question scientifically the names of the boys were first divided into two groups consisting of the names of those who smoke and of those who do not smoke. . . . The result showed that the intelligence level of the boys who smoke is fifteen per cent lower than that of those who do not smoke, and that those who smoke are thirty per cent lower in ability to do school work than those who do not. All of the boys in the University High School are of normal high school age. The classification into "smoker" and "non-smoker" groups was made by one of the boys, a smoker himself.

[Maude Royden, as Quoted in Zion's Herald]

The astounding originality of his [Jesus'] attitude toward women has not been sufficiently realized even by his followers. It is true that one reads and hears a good deal of sentimental talk about the effect of Christian teaching on the position of women. I cannot help calling it sentimental, because it is so often insincere; it is used as an argument to prevent further advance on the score of "gratitude" and is based on a misunderstanding of what our Lord's teaching about women really was. It will seem paradoxical indeed to go on from such a statement as this to say that in all the four gospels there is no teaching about women at all! And yet, so far as actual precept or instruction goes, it is literally true. Our Lord said nothing about women. He never told us what virtues we should practice, what ideals we should aim at, or what sphere we should occupy. . . . He gave the loftiest spiritual teaching to men and women so impartially that it is impossible to divine the sex of the one addressed unless one is familiar with the context.

Notice

SHORT TERM SUBSCRIPTION AND ORDER RATES

Attention is called to the new rates now in effect on short term subscriptions for *The Christian Science Monitor*, Christian Science Sentinel, and The Christian Science Journal; also on single copies of the Sentinel and the Journal. These rates are stated in the advertisements found on the inside front cover page of the Sentinel and on page "iv" of the Journal.

Attention is also called to the rates scheduled below, now effective on all quantity orders for any of the Christian Science periodicals:

Monitor\$.04	a copy
Sentinel	
Journal	"
Der Herold	"
Le Héraut	**
Quarterly	"

These rates are net and take the place of the former 10% discount on periodical orders.

An exception to the *Monitor* rate given above is made in cases where orders specify that the copies desired are for free distribution at a Christian Science lecture or for other free distribution. This should be clearly stated when ordering. Such orders will be filled at 3 cents a copy.

The uniform retail price on the Sentinel is now 10 cents a copy, and on the Journal 35 cents a copy. The Monitor single copy price remains at 5 cents.

Discounts to reading rooms on subscriptions and on orders for general publications remain as before.

Church Notices

From the Clerk of The Mother Church

Church Tenets.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in *The Christian Science Monitor*, were run off at the time of their publication in the *Monitor*.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 81/4" x 103/4". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for *The Christian Science Monitor*, *Journal*, *Sentinel*, *Quarterly*, and *Heralds*, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and imme-

diate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

There will be placed on sale in a short time six new pamphlets, containing articles reprinted from the Christian Science periodicals, as follows: "Government," "Employment," "Work and Play," "Progress," "Occupation," "Relationship." Orders for these pamphlets may be sent at once, to be filled on the date of issue. Price 5 cents a copy. Reading Room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

A A A

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U. S. A.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder

of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp. round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large Type (18-point) on Warren's heavy India Bible paper, bound in leather. Size 8 by 1034 inches. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1800, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume. containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

CHRISTIAN SCIENCE

SENTINEL

"What I say unto you I say unto all-WATCH." Jesus

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

BOSTON USA

Christian Science Literature

"Science and Health with Key to the Scriptures" and all other published writings of Mary Baker Eddy are listed on the outside back cover page of this Sentinel.

The Christian Science Journal

Founded, 1883, by Mary Baker Eddy. This monthly magazine is an offi-cial organ of The First Church of Christ, Scientist, in Boston, Massachusetts. Contains articles, editorials, and testimonies of healing, a directory of Christian Science Churches, Societies, and Reading Rooms; also in the January, April, July, and October issues a list of Christian Science Practitioners and Nurses. Subscription price, payable in advance, postpaid to all countries: One year, \$3.00; six months, \$1.75; three months, \$1.00; single copy, 35 cents.

The Christian Science Quarterly

Founded, 1890, by Mary Baker Eddy. Published January, April, July, and October. Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size. Subscription price, payable in advance, postpaid, to all countries: One year, \$1.00; single copy, 25 cents.

Christian Science Sentinel

Established, 1898, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. Subscription price, payable in advance, postpaid, to all countries: One year, \$3.00; six months, \$1.75; three months, \$1.00; single copy, 10 cents.

Der Herold der Christian Science

Authorized, 1903, by Mary Baker Eddy. A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months, 50 cents; single copy, 20 cents.

Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months 50 cents; single copy, 20 cents.

The Christian Science Monitor

An International Daily Newspaper. Founded, 1908, by Mary Baker Eddy. Daily, except Sundays. Its own world-wide news service is supplemented by the service of the Associated Press and of the United Press Association. Complete in its departments; unique in its Home Forum page. Full page of editorials dealing truthfully and fearlessly with vital questions of the day. Subscription price, payable in advance, postpaid to all countries: One year, \$9.00; six months, \$5.00; three months, \$3.00; one month, \$1.10; single copy, 5 cents.

Subscriptions will begin with the next issue after the receipt of the order. Information regarding bound volumes of the weekly and monthly periodicals will be given upon request.

NUMBER 5

The Naturalness of Good

"WE know that all things work together for good to them that love God," was the message of cheer which Paul left to the world. He reminds us, too, of the Old Testament promise, "Eye hath not seen, nor ear heard, neither have entered into the heart of man, the things which God hath prepared for them that love him." He had learned that good was natural, that man in the care of loving, divine Principle can look forward to good, and not to unhappiness, disaster, or misfortune. Paul was essentially a man of the world. He was not a sheltered dreamer unfamiliar with the vicissitudes of human life. He was a scholar, a man of affairs, and in the turmoil of world interest he was led to Christianity, which taught him the good news of the kingdom of heaven at hand, and thus he learned the ever availability of good.

Paul's experiences while he was preaching this good news, which had regenerated him, were not experiences of ease, comfort, popularity, and success such as the world calls success. On the other hand, there were hardship, hatred, suspicion to be faced continually. There were imprisonment, shipwreck, the bite of the serpent, but these did not overwhelm Paul. He saw them as opportunities to prove the power of God, good. Through all of these experiences he was able to know that all things do work together for good when one loves good, and it was this knowledge which sustained him and enabled him to be of such inestimable value to the world, not only in his own day but throughout the

The human mind is loath to believe in the reality of good and in the power, permanence, and allness of good, but clings tenaciously to the belief in evil as power, making for itself a dreaded devil of some sort. In most cases the devil of the cloven hoof and forked tail has been outgrown, but in its stead fear of evil still remains in thought to disturb and terrorize. Mankind looks for evil rather than good, expects sickness rather than health, believes in a law of accident and chance instead of turning to the all-powerful and just law of God. Joy, happiness, success, and health seem too good to be true. One of the fundamental truths of Christian Science is the unreality of evil and the naturalness and all-power of good. This does not mean that Christian Scientists go about blindly saying there is no evil or calling evil good. It means that in the divine Mind's creation there is no evil, no sickness, no sin, no death, and that Mind's creation is actually the only creation there is. Any belief in or fear of evil breaks the First Commandment. To human sense, however, evil seems very real and inevitable, and is destroyed only as this human sense yields to spiritual sense; in other words, as a man learns to see as the divine Mind sees, and reasons from cause to effect and not only from effect to cause.

The Christian Scientist, then, must take his stand on the side of good, and as he does this he will be a power

for righteousness in the world. There are countless suggestions of evil which the Christian Scientist is called upon to silence daily. One of these is that, because of the material evidence presented, it is so much easier to believe in evil than in good. This is at once mastered when one realizes what man actually is, the expression of Principle, and as such no more separated from Principle than the ray of light is separated from the sun. It is mastered when one realizes that man's heritage is from the divine Mind and therefore is good, that man's understanding is from Spirit and therefore is spiritual, and that God is working in man "both to will and to do of his good pleasure." An argument which presents itself time and time again is that one's environment, or human bringing up, or the people that surround one, can keep one from good, interfere with one's work, or hinder progress, or that enemies, jealousy, or hatred can destroy one. This is not true when we realize that man is always in the care of the divine Mind, that man is Mind's spiritual idea, developed, governed, and directed by this Mind.

There is no Bible story which illustrates more beautifully than the story of Joseph that "all things work together for good to them that love God," that no jealousy, hatred, or human environment can keep man from his rightful work or from doing good. Neither jealousy nor the hatred of Joseph's brothers nor his years in a heathen land nor the intriguing of Potiphar's wife could harm him, because, as the Bible says, the Lord was with him. Neither did these things keep him from fulfilling his destiny. They were opportunities to prove the ever presence and availability of God. So filled was Joseph with the spirit of good that when at the height of his power he was confronted by the brothers who had done their best to destroy him, he forgave them and returned love for their treachery. All this does not in the least illustrate that evil is good in the making, but on the other hand it serves to emphasize that the bitterest attacks of evil are powerless to harm or to interfere with the government of Principle.

The claim that the healing of disease or sin, especially in their supposedly serious forms, is miraculous, still clings to thought. It was just this dangerous doctrine that attributed the healings of Jesus and his disciples to a supernatural power and kept men from attempting this phase of salvation for so long a time. This claim keeps reappearing in various forms even to students of Christian Science who know better. It may argue that only experienced practitioners can heal, that those in official positions must be the best healers, that the practitioner who is just beginning should not take serious cases, that the average student of Christian Science should turn over his problems to some one considered more advanced to work out. Since sin and disease are unreal, mere illusions, then there are no fearful odds to fight against, and he who can calmly, quietly, and confidently know this and realize the allness and might of God, is adequate to meet the most startling case, for it is always God who heals.

Copyright, 1921, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as second-class matter. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of October 3, 1917, authorized on July 11, 1918.

Moreover, it is only as we prove these truths for ourselves that we actually understand the power of good. The same lie often argues that one has had a real disease or has been the victim of a real sin, and that freedom is the result of a special favor granted in one's behalf. One may be most grateful for healing and may realize the possibility of similar favors being granted to others, but still the healings seem miraculous and not divinely natural. "It was the consummate naturalness of Truth in the mind of Jesus, that made his healing easy and instantaneous," Mrs. Eddy reminds us on page 200 of "Miscellaneous Writings," and she continues, "Jesus regarded good as the normal state of man, and evil as the abnormal; holiness, life, and health as the better representatives of God than sin, disease, and death."

Another suggestion of the reality of evil is self-condemnation. While a recognition of one's faults is necessary for correction, the habit of self-condemnation would fasten evil upon one as a reality. Both Peter and Paul had much in their lives to regret. Had they spent their days in brooding or self-condemnation, or in fear that their mistakes made them unfit for the work that lay before them, the world would have lost much. Paul tells us that he did not consider that he had fully apprehended the truth; nevertheless he set himself to the task of forgetting the mistakes that were behind and pressing forward as best he knew how toward the goal, the actual manifestation of man in the image of God, of which Christ Jesus was the best earthly representative. Mrs. Eddy encourages us all with the little verse which she quotes on page 4 of "Pulpit and Press":—

"What if the little rain should say, 'So small a drop as I
Can ne'er refresh a drooping earth, I'll tarry in the sky.'"

and she adds: "You have simply to preserve a scientific, positive sense of unity with your divine source, and daily demonstrate this. Then you will find that one is as important a factor as duodecillions in being and doing right, and thus demonstrating deific Principle."

Religion has been a theory for so long a time that the student of Christian Science must continually watch that he does not let the truths which have been revealed to him lapse into mere theory. To understand Love he must love, and in order to understand the naturalness and all-power of good he must love good, do good, and take his stand for good. As he does this he will not only bring good into his own experience but he will be lessening the hold of evil upon mankind.

The Oneness of Authority and Service

FLORENCE HELEN BOSWELL

ON page 127 of "Science and Health with Key to the Scriptures" Mrs. Eddy says, "If God, the All-in-all, be the creator of the spiritual universe, including man, then everything entitled to a classification as truth, or Science, must be comprised in a knowledge or understanding of God, for there can be nothing beyond illimitable divinity." The universality of truth and its application includes right solution to all problems, universal and individual, and yet they are not diverse, but one problem. One knowledge that two times two equals four, destroys, when applied, every misstatement about it, and in the same way, the truth about authority, authorization, and government, destroys every false belief, misunderstanding, and misrepresentation about them. Just now the question of authority and authorization is very largely in the world's

thought, and it is searching for some rock, some sure foundation. Jesus said, "Upon this rock I will build my church," and that rock, through the clear spiritual illumination of our textbook, becomes visible, not as a human personality, but as the supremacy of infinite Spirit. The church founded on that rock is destined to fulfill the church's mission of proving that "illimitable divinity" is adequate to unfold every honest search for more enlightenment and expansion into fruition.

This truth about church reveals also the true worshipers and their wonderful bond of brotherhood, the unity of Spirit against the same doubts and fears, the same malice and hate of the carnal mind, the hell of malicious hypnotism, which would attempt the disintegration and destruction of this spiritual bond. The Master said, "By this shall all men know that ye are my disciples, if ye have love one to another." This condition fulfilled reveals the church of which Isaiah prophetically foretold that "all nations shall flow unto it." As a natural sequence of the desire to fulfill that condition, to tell others of the supremacy of Spirit, revealing the brotherhood of man, came the opportunity afforded by our beloved Leader in her establishment of The Christian Science Journal, the Christian Science Sentinel. Der Herold. and Le Héraut, to knit together in ever increasing number in all parts of the world those endeavoring to worship the Father in spirit and in truth, for mutual help and encouragement. Thus these periodicals were founded on the truth of being, that which is eternally true of God, man, and the universe, and so long as they are correct in stating the Principle of Christian Science, and are in conformity with what Mrs. Eddy says in the Manual (Art. VIII, Sect. 11), of any writer, "His writings must show strict adherence to the Golden Rule, or his literature shall not be adjudged Christian Science," the periodicals are living witnesses of the new tongue of Spirit, a characteristic of all believers who are "kings and priests unto God," and as such are indeed "living stones." No cruel dogmas or excommunication pronounced by creeds can touch those witnesses to Truth, nor can they be thought of as emanating from matter, persons, printers, or printing press, or be killed by being held in

How the true idea of divine authority and service rules out all mammon worship, all substitution of the mesmerism of materiality and subservience thereto, for the humbleness of mind, "the simplicity which is in Christ," which waits on divine intelligence for its expression of intuition and inspiration, because the impartation of Truth is exactly adapted and adequate to meet the demand, universally, collectively. Under that authority there is neither mutiny nor rebellion, because in it there is no threat to terrorize into fear of loss, no lack of understanding that would crush the thought seeking rightful expression, but instantaneous, spontaneous response. Thought obedient to divine revelation is never lawless, is untouched by desire for human approbation and applause, for Truth communicates such a sense of divine assurance that the human will, wish, and desire is lost, becomes nothing in the grandeur and largeness of the expanding outlook. The highest peaks of the Alpine mountain ranges first catch the rays of the rising sun, because they are the highest, but it is the sun that reveals their beauty and purity of expression and outline.

S 3

₹. ₹.

The truth about Church and authority and government is so wonderfully revealed in all the writings of Mary Baker Eddy, so free from tradition, custom, and servile fear, that her words of more than ten years ago, "In time its present rules of service and present rulership will advance nearer

perfection" (Miscellany, p. 342), though disturbing to the self-complacency and apathy of the carnal mind, must leaven universal thinking, its theology, its jurisprudence.

Our Leader had the faith in good that enabled her to state truths and leave them to certain unfoldment, when the thoughts of men were ready to receive and assimilate them, though she was maligned and stoned for her larger vision, a vision inseparable from an ever unfolding knowledge of Principle. Mind's unfoldment may seem formidable to human policy shrinking from the demands of Truth and tending to serve Diana rather than Christ, but to those seeking the Mind of Christ come renewed courage and comfort from this incisive test of true service, which is true authority. As Mrs. Eddy says in the Letter to First Church of Christ, Scientist, London, England (Miscellany, p. 200), "Striving to be good, to do good, and to love our neighbor as ourself, man's soul is safe; man emerges from mortality and receives his rights inalienable—the love of God and man."

"Cling steadfastly to God and His idea"

GEORGE E. DANIEL

THE world has reached the point where men must do their own thinking, and not let others do the thinking for them and then follow their dictation, as if they themselves could not think, and as if there were no possibility of the others ever being wrong in their thinking. Mrs. Eddy says in "Science and Health with Key to the Scriptures" (Preface, p. vii): "The time for thinkers has come. Truth, independent of doctrines and time-honored systems, knocks at the portal of humanity. Contentment with the past and the cold conventionality of materialism are crumbling away. Ignorance of God is no longer the steppingstone to faith. The only guarantee of obedience is a right apprehension of Him whom to know aright is Life eternal. Though empires fall, 'the Lord shall reign forever.'" Through the teachings of Christian Science the student learns that God is the only intelligence there is, and man made in God's likeness must express the divine intelligence, and cannot, therefore, be dictated to by other than God, his creator.

The person who does a thing simply because some one else did it, or because some one has told him to do it, is to be pitied rather than censured, because ignorance alone seems to limit a man's capacity to think and act for himself, and the moment this seeming spell is broken and one realizes that God is the only intelligence, then he comes into his rightful heritage as the son of God, and can no longer be controlled or governed by persons or by things material. Had the three Hebrew children allowed themselves to be dictated to and controlled by persons, they would not, perhaps, have been thrown into the fiery furnace, but they would have broken the First Commandment, been disobedient to God's eternal law, and have had other gods before divine Principle. Had Daniel listened to persons and their edicts, allowed himself to fall under the hypnotism of fear, he would never, perhaps, have been thrown into the den of lions, but he would have broken the commandment by trying to give unto persons that which belongs to Principle alone, the right to govern and control the universe

Jesus said, "What went ye out for to see? A man clothed in soft raiment?" What is it we go out to see, and obey? Is it a man, as mortals see man? Is it a human personality, or is it God, divine Principle and its idea? If

we are looking to Principle, God, it is certain that we shall never be led around by any human personality, hypnotism, or suggestions. On page 464 of Science and Health, Mrs. Eddy writes: "In founding a pathological system of Christianity, the author has labored to expound divine Principle, and not to exalt personality. The weapons of bigotry, ignorance, envy, fall before an honest heart. Adulterating Christian Science makes it void. Falsity has no foundation. 'The hireling fleeth, because he is an hireling, and careth not for the sheep.' Neither dishonesty nor ignorance ever founded, nor can they overthrow a scientific system of ethics." It is always dishonesty or ignorance that would seem to cause a man to fall under the influence of personal mesmerism, and allow himself to be used as a channel through which aggressive mental suggestion would try to work. A student of Christian Science, recognizing divine Principle as supreme in the universe, cannot allow himself to be used as a channel through which error would try to destroy harmony.

Mrs. Eddy again says, on page 495 of Science and Health: "When the illusion of sickness or sin tempts you, cling steadfastly to God and His idea. Allow nothing but His likeness to abide in your thought. Let neither fear nor doubt overshadow your clear sense and calm trust, that the recognition of life harmonious-as Life eternally is-can destroy any painful sense of, or belief in, that which Life is not. Let Christian Science, instead of corporeal sense, support your understanding of being, and this understanding will supplant error with Truth, replace mortality with immortality, and silence discord with harmony." God's eternal law of harmony exists, and no person nor multitude of persons will ever be able to overthrow or disturb this law, since "one with God is a majority." It is not always the case that the multitude is right or correct in its views: it was the multitude that crucified Jesus, and it was the few who understood and followed his teachings. It was the multitude that said the earth was flat, but it remained for Columbus to prove to the multitude that the earth is round. It was the multitude that said that matter was real, but it was Mrs. Eddy, who, reflecting clearly divine Principle, proved matter to be absolutely unreal.

Jesus' disciples, during his sojourn upon earth, relied almost entirely upon his personality rather than upon the truth he came to reveal to them, and it was because of this mistaken attitude of his followers that he said to them, in the sixteenth chapter of John, "It is expedient for you that I go away: for if I go not away, the Comforter will not come unto you." When one seems to become so wrapped up in persons and personality that he fails to see or realize Truth or Principle, it is time to face about, correct one's thinking, and, as Mrs. Eddy advises in the passage quoted above, "cling steadfastly to God and His idea," and look to Christian Science, instead of to corporeal sense, to support his understanding of reality and "silence discord with harmony."

Our Antidote

CAROLINE E. ROBSON

In three of the gospels we read how, directly after his baptism in the Jordan, Jesus was "led up of the spirit into the wilderness to be tempted of the devil." In our old thought this wonderful narrative could not bring all the help and inspiration that we get when studying it in the light of Christian Science. Most of us had been taught that Jesus was God, and perhaps we pictured to ourselves the impossible situation of God having a face to face interview

with a material person called Satan. If Jesus were God, the voice of evil could not have reached him, and even had that been possible it would have cost him no struggle to resist the suggestions of error. How could such a supposed encounter be of any assistance to poor humanity in its daily temptations? But we are told in the Scriptures that Jesus took upon him our nature and was tempted like as we are, and Mrs. Eddy says on page 53 of Science and Health, "He knew the mortal errors which constitute the material body, and could destroy those errors; but at the time when Jesus felt our infirmities, he had not conquered all the beliefs of the flesh or his sense of material life, nor had he risen to his final demonstration of spiritual power."

One definition of the word "temptation" is, "An inducement, an allurement, especially to something evil." Later on Jesus was able to say, "The prince of this world cometh, and hath nothing in me," but may we not believe that in those very early days of his ministry human sense may have whispered enticingly, tempting him to an acquiescence in what might have appeared to the world almost legitimate even if not advisable. After his long fast Jesus was "an hungred." The man who later on was able on two occasions by his spiritual power to feed the multitude could doubtless have satisfied his own human craving by the means suggested by the tempter; nor can we doubt that had he so willed he could have acquired dominion over "the kingdoms of the world, and the glory of them," or won the acclamations of the populace by a spectacular miracle; but we never read of Jesus performing miracles for his own satisfaction or aggrandizement; invariably they were done to the glory of God and to benefit mankind. We have no authentic record of the life and work of Jesus between the age of twelve and his mature manhood when he appeared to John the Baptist, but may we not assume that during those intervening years he was meeting and overcoming all the temptations to which flesh is heir, and that at this stage of his career the only temptations Satan could find with which to entice him were those allurements to worldly vainglory and fame or to the so-called reasonable claims of the flesh? One lesson we may take to heart from this event in our Master's life surely is, how Jesus immediately countered evil suggestions. He did not stop to argue with the tempter, but the moment he was conscious of the voice of Satan he silenced it with the right thought.

To turn to the dictionary again, we find this definition of the word "antidote": "A remedy to counteract the effects of poison; whatever tends to prevent mischievous effects, to counteract evil, which something else might produce." Mrs. Eddy frequently makes use of this word in her writings. In Science and Health (p. 273) she says: "Science shows that material, conflicting mortal opinions and beliefs emit the effects of error at all times, but this atmosphere of mortal mind cannot be destructive to morals and health when it is opposed promptly and persistently by Christian Science. Truth and Love antidote this mental miasma, and thus invigorate and sustain existence." Jesus found in the early Scriptures the authority and the right thought with which to counter error, and surely we, who have the whole Bible as well as "Science and Health with Key to the Scriptures" and our Master's wonderful example, should have no difficulty in finding at once and at hand our antidote against not only actual sin but all the enticements to indulgence of the senses, to self-aggrandizement, presumption, and all the inclinations which, because of their apparent reasonableness are more likely to deceive us than would be the temptation to obvious sin against which we may be on our guard.

Another lesson this story teaches is that we cannot allow ourselves to read into the Scriptures a meaning to suit our own human desires and inclinations or to imagine that they ever excuse any pandering to error. We see how mortal mind strove to wrest the word of God from its spiritual interpretation and to use it as an argument to justify seductive persuasions, but our Master in each case corrected this false interpretation and walked calmly forward in the path of duty, leaving us the example to go and do likewise. In the words of a well-known hymn (Hymnal, No. 113):—

Onward, Christian, though the region Where thou art be drear and lone; God hath set a guardian legion Very near thee,—press thou on! By the thorn-road, and none other, Is the mount of vision won; Tread it without shrinking, brother!

No Good or Bad Luck

Jesus trod it,-press thou on!

GEOFFREY HAMLYN

THE fact that God is Principle, "with whom is no vari-A ableness, neither shadow of turning," does away at once with any possibility of either good or bad luck; for belief in luck is belief in chance, and belief in chance presupposes, whether the believer realizes it or not, belief in a fickle or possibly an absentee deity. The hold which the belief in good or bad luck seems to exercise over Christendom is remarkable, and one is often astonished at the extent to which professed Christians are dominated by superstition. The fact that God, good, is Principle involves the correlated fact that every thought, and consequently every action, in accord with Principle brings the harmony of God's kingdom with it, whilst every thought, and consequently every action, which departs from Principle, forfeits the harmony which belongs to Principle. "The sinner," writes Mrs. Eddy, on page 266 of "Science and Health with Key to the Scriptures," "makes his own hell by doing evil, and the saint his own heaven by doing right," which is only another way of saying, "Whatsoever a man soweth, that shall he also reap." The Bible teems with such pronouncements, and there is reason to believe that the myriad so-called laws of superstition would have had no chance of creeping into Christian belief had not the true concept of God as both Principle and Love been lost, and Christians therefore been largely ignorant as to which thoughts were in line with Principle and which were not. The crux of the whole question is to know God aright. And this is just where Christian Science comes to our help, for it explains God with a comprehensiveness and precision which revolutionizes our whole concept of Him.

"God," explains Mrs. Eddy, on page 465 of Science and Health, "is incorporeal, divine, supreme, infinite Mind, Spirit, Soul, Principle, Life, Truth, Love." The infinity of Spirit or Mind makes impossible the reality of matter; the infinity of Life makes impossible the reality of sickness and death; in short, the infinity of good makes impossible the reality of evil. The understanding of this demolishes that "tree of the knowledge of good and evil," that belief in a power opposed to God, good, against which God is represented in the allegory of Genesis as warning man. The fact is that the belief in good or bad luck is merely one expression of "the knowledge of good and evil," and it is only as we supersede this so-called knowledge by the understanding of the omnipotence and reality of good alone that any bad luck we may have seemed to experience will

BENEFIT TO THE

disappear; and it is well to remember that we make evil unreal to ourselves only in the proportion that we cease to think it or to act it. As the Discoverer and Founder of Christian Science puts it, on page 167 of Science and Health, "Our proportionate admission of the claims of good or of evil determines the harmony of our existence,—our health, our longevity, and our Christianity."

Inheritance

PERSIS COX

ONE of the beautiful and helpful thoughts which unfold to the student of Christian Science through the study and practice of the teachings of the Bible and Science and Health is this: that his entire inheritance is from God, the divine Mind. This leads to an awakened understanding of God and a growing understanding of man in God's image. The student may have believed himself liable to inherit undesirable qualities or conditions, nervousness perhaps, poverty, or rheumatism, laziness, or even that graven image "temperament," but now he is learning that neither the human brain nor the human body has the intelligence to confer any characteristic upon man, and if he has perceived even faintly his sonship with God, consequently his inheritance from God, he may begin at once to prove that he is "not under the law, but under grace" that grace which is but another name for divine Love.

To human thought an inheritance of houses and lands seems the most substantial possible, and those individuals with such a legacy are said to be well placed; while he who starts without worldly possessions is expected to find his path strewn with difficulties. The study of Christian Science, however, shows us that our inheritance from God is infinitely more secure than anything which could come to us in a material way; no flaws can be found in our title to it, we do not have to wait for the use of it, nor fear that we may be robbed of it when we receive it. The Bible is full of the records of those who experienced, in varying degrees, their divine inheritance. "But the Lord hath taken you, and brought you forth out of the iron furnace, even out of Egypt, to be unto him a people of inheritance, as ye are this day," were the words of Moses to the children of Israel, who needed constant reminders of their inheritance from God, even as we do to-day; whenever they were conscious of this great fact, as individuals and as a nation, they were able to prove the ever presence and power of God to meet all human needs.

Paul in his epistles makes many references to this point, having first proved in innumerable instances his inheritance, as he himself says, in perils on land and sea, in weariness, hunger, thirst, and cold. To the Hebrews he wrote, "By faith Abraham, when he was called to go out into a place which he should after receive for an inheritance, obeyed; and he went out, not knowing whither he went." This patriarch's experience shows clearly that trust in God, good, is perhaps the first essential for inheritance of God's gifts, and Mrs. Eddy has beautifully written of Abraham, "This patriarch illustrated the purpose of Love to create trust in good, and showed the life-preserving power of spiritual understanding" (Science and Health, p. 579). Speaking of Esau, "who for one morsel of meat sold his birthright," Paul says, "For ye know how that afterward, when he would have inherited the blessing, he was rejected: for he found no place of repentance, though he sought it carefully with tears." What was this birthright, this inheritance which Esau deliberately sold, what but the knowledge of man's spiritual being, of his connection with God and his dominion over all the earth? This priceless inheritance was bartered away for something which had no life, substance, or intelligence of its own but which to the senses seemed desirable or even necessary at the time. We shall do well if we take to heart the lesson of Esau's experience. It is interesting to see how almost all the Bible references to divine inheritance contain a condition to be fulfilled; in other words, something more than mere passive acceptance is necessary. Jesus' promise, "Blessed are the meek: for they shall inherit the earth," requires constant spiritual activity on the part of the recipient; for surely one needs to be active to be truly meek, to know under all circumstances that God is the Principle of every good thought and deed and that man accomplishes everything by reflection of this Principle alone. Again, in the psalms we read, "Those that wait upon the Lord, they shall inherit the earth," and in Hebrews Paul's advice, "that ye be not slothful, but followers of them who through faith and patience inherit the promises."

A legacy of material wealth is often spoken of as a curse, for it may tend to lessen the legitimate ambition and energy of its possessor and consequently to retard his development. What a blessing that our inheritance from God is dependent upon right activity, for we soon learn that if we allow our study and practice of Truth to decrease, just then does our sense of divine inheritance become dimmed. When the rich young man came to Jesus his question was, "Good Master, what shall I do that I may inherit eternal life?" He was already what the world would call good, even very good; indeed it is recorded that Jesus, looking on him, loved him. Our Master, however, with unerring spiritual discernment, saw the flaw in this otherwise splendid character-his love and dependence upon material possessions. It was a condition of thought which must be healed before his divine inheritance could be realized. If he could have met Jesus' demand that he share his blessings with those who were at that moment in want of them this would have proved that the healing had begun; but as the record states, he "went away grieved."

The activity which is required as a condition of man's inheritance is fully summed up in the book of Revelation, "He that overcometh shall inherit all things; and I will be his God, and he shall be my son." Whatever is unlike God, and therefore unlike His image and likeness, is the thing which is to be overcome; in other words, the individual's belief in or fear of evil. As we study the Bible records of overcoming, and the consequent inheritance of God's promises; as we ponder similar experiences in the life of our revered Leader, Mary Baker Eddy, and in the lives of present day students of God's word, the records of which are given to us in the testimonies in the Wednesday evening meetings and in our periodicals; above all, as we endeavor to use every day the spiritual wisdom gained from these lessons, we realize the truth of these words of wisdom from Proverbs: "I lead in the way of righteousness, in the midst of the paths of judgment: that I may cause those that love me to inherit substance; and I will fill their treasures."

4 4 4

At every tomb there stands the risen Christ;
The stone once rolled away can nevermore
Block human hope,
The last illusion error taunts us with
Has lost its power,—
There are no dead in this, Love's victory hour.

CATHERINE SICHEL.

Murder

Every people, in every age, have done their utmost to protect themselves against murder. It is the instinct of the primitive man, it is the calculated insurance of the civilized man. In conditions of rude society, where there is neither law nor police, protection assumes the form of killing in revenge. To this day the people of the East will remorselessly track down a murderer to murder him in return. Even in so highly civilized a country as modern Italy, the vendetta still continues. All this has always been so, and therefore the command, "Thou shalt not kill," had presumably a more subtle as well as a superficial meaning, for there are more ways of attempting a man's life than by mere assassination.

At the same time the excuse for murder lies in the belief that life is human, man-given, and destructible. It is the instinct which lies in the animal consciousness, and which was alluded to by Christ Jesus, when he said, speaking of the animal magnetism which constitutes the belief in matter, which he personified as the devil, "He was a murderer from the beginning, and abode not in the truth, because there is no truth in him. When he speaketh a lie, he speaketh of his own; for he is a liar, and the father of it." This animal magnetism or hypnotism, in other words mortal mind, is nothing but a supposititious belief which is necessarily a lie from the beginning. The only law it can be said to manifest is a belief in death. Everything known to it, from a man to a mountain, or a dinosaur to a daisy, it destroys in time. Its belief in destruction is therefore so acute that there is nothing to be surprised at in the fact that it should have been typified in Genesis in the person of Cain. "Cain very naturally concluded," Mrs. Eddy writes, on page 89 of Science and Health, "that if life was in the body, and man gave it, man had the right to take it away. This incident shows that the belief of life in matter was 'a murderer from the beginning.'"

Material education teaches man the lesson of Cain. Not even Jesus' denunciation of the error of human generation, and his insistence on God as the Father of mankind, has been sufficient to convince the human race of the fact that life is spiritual and indestructible. Yet only in the ratio of its grasp of this fact can it hope to overcome the instinct against which the Sixth Commandment is launched, and to begin to realize the truth which alone can free it from the consequences of the lie. Civilization may have curbed the instinct to kill, fear of the law may have made man obedient to the law, but so long as the instinct of life in matter is preserved, just so long must the instinct to kill exist, and so long will it be liable to gratification in its innumerable subtle forms. The most subtle of all of these is, of course, the effort to prolong the belief of man's life in matter, and so fundamentally to protect the instinct to kill. "Above physical wants," Mrs. Eddy says on page 67 of

"Miscellaneous Writings," "lie the higher claims of the law and gospel of healing." And a few lines lower she goes on to explain that this law saith—"Thou shalt not kill;' that is, thou shalt not strike at the eternal sense of Life with a malicious aim, but shalt know that by doing thus thine own sense of Life shall be forfeited."

The animal instinct in humanity which urges the effort to kill outright, or to assassinate a man through the destruction of his reputation, or some other means, is all predicated on the belief of temporal life. Immediately the individual begins to grasp the fact that Life is eternal, he also begins to realize the futility of his effort, and its danger to himself. For even should he succeed in his undertaking, even should he escape the apparent consequences of his deed on this plane of existence, he still has to face the inevitable and unescapable consequences in the future. He has filled his human consciousness with the belief of physical death or in the belief in a destroyed reputation, and these things become to him realities which prevent him from realizing the truth about man, and compel him to pay the uttermost farthing of penalty. It may take time for a man to discover that he is himself always the target of his own wrongdoing, but the discovery, however long delayed, is inevitable. The absolute murderer, as the law considers murder, is only the ultimate effect of the belief of life in matter, and by no means necessarily the worst effect. The worst effect of all is that described by Mrs. Eddy, on page 564 of Science and Health, where she writes: "As of old, evil still charges the spiritual idea with error's own nature and This malicious animal instinct, of which the dragon is the type, incites mortals to kill morally and physically even their fellow-mortals, and worse still, to charge the innocent with the crime. This last infirmity of sin will sink its perpetrator into a night without a star."

The instinct of murder is that which forces a man to attempt in every way the destruction of a fellow creature. It may be directly by assassination, or indirectly by lying about him, or by stealing from him, but if the instinct is malicious the effort also must be equally malicious. The primitive instinct is, however, always the belief that there is life or substance in matter. That was surely why Jesus described this belief as a liar and a murderer, and that was why he insisted that a knowledge of the truth was a necessity of salvation. What the truth was he was as insistent in impressing on the world as he was in exposing the lie. He was engaged perpetually in telling those who came to listen to him what man really was, and how completely the truth was available to him any moment. The kingdom of God, he declared, was not afar off, it was actually in the midst of the world, though the world, owing to its material sense, failed to see it. To find the truth no man had to go on a journey; all that was necessary was that he should deny his supposititious self, his belief of life in matter, and so start to follow in the footsteps of the Christ, in a daily and hourly effort to prove that Life is spiritual and not material. FREDERICK DIXON.

"Spiritual tangibility"

Whoever thinks of Christian Science as presenting to the world intangible ideals does not understand what tangibility consists of, for to think in terms of material things is not to know reality. It is easy enough to show conclusively that matter or any material thing is but a concept of an utterly hypothetical mortal mind. The physicists have long since done this by resolving matter into atoms and

electrons, and electrons into positive and negative activity in the ether, which is itself a hypothesis of a logical impossibility. The ether, like electrons and atoms, is merely a concept in a hypothetical mortal mind, and is being accepted as such by thinkers more and more generally nowadays. Of course the supposition that there is a mortal mind is impossible in the realm of reality, where the divine Mind with its idea is provably all that exists. The whole belief in matter thus is resolved into sheer illusion.

All that a man has of anything, shelter, food, clothing, health, pleasure, or anything else, is his concept of it. It in no way diminishes the tangibility of real experience to resolve it into thought and replace the human thought with the spiritual idea, for all through earthly history mortals have been in a world of thought where every incident, every sense impression, has been a registering of thought in mortal mind. The supposed tangibility of material things has always been a fictitious tangibility of mortal concepts. Christian Science replaces the mirage with the absolute reality of the divine Mind and its idea, thus taking away from a man nothing of shelter, food, pleasure, and so on, but giving the true idea in Mind in place of illusory mortal concepts.

The feeling of health, vigor, and control which a man proves for himself through the understanding of Christian Science is neither animal nor vague and indistinct. It is perfectly real because it is spiritual, existing indestructibly in the one true Mind of which the genuine man is the idea or activity. Just so, the experience of true spiritual abundance, of right work or service, of infinite variety of satisfaction, is not imaginary and nebulous. The conscious expression of the divine Mind which is demonstrated through the practice of Christian Science is the living which satisfies because it is actual as no mortal dream of wealth or enjoyment could ever be actual. The idea, the spiritual order of which infinite Mind is conscious, is indeed tangible in the true sense.

On page 269 of Science and Health Mrs. Eddy says, "Metaphysics resolves things into thoughts, and exchanges the objects of sense for the ideas of Soul." The work of each one turning to Christian Science, then, is to prove that the true man is right now living in Mind, and that for him spiritual idea is the whole universe, infinitely manifest, if we wish to put it so, as spiritual ideas or the infinity of idea. Continuing, Mrs. Eddy says: "These ideas are perfectly real and tangible to spiritual consciousness, and they have this advantage over the objects and thoughts of material sense,-they are good and eternal." The infinity of spiritual idea, including the true variety which is all that can satisfy, is indeed tangible to the divine Mind, God, which is the only Mind there is to be conscious of anything. Infinite idea or manifestation is the effect, and infinite Mind, or God, is the one cause. "Ideas," Mrs. Eddy says again, on page 279 of Science and Health, "are tangible and real to immortal consciousness, and they have the advantage of being eternal." This sentence is at the beginning of a paragraph of which the marginal heading is "Spiritual tangibility." Each one is privileged to prove for himself that Mrs. Eddy's words are true.

Though a man may think that, at the best, he has realized only glimpses of spiritual tangibility, the fact is that the only man there is, the real expression of divine intelligence, is constantly experiencing Spirit, Life, Principle, for he lives and moves and has his whole being in the divine Mind. Knowing only Mind and what Mind includes, he finds in Mind the reality of which any human sense of things

is counterfeit. It is impossible to think of any human concept, any positive quality, any condition of existence, without there being the reality in place of it. The spiritual reality cannot possibly be humanly outlined, however, for it is the infinite effect of infinite cause. Any name for a positive condition, entity, or quality, rightly used must be a name for this one cause and effect, for the divine Mind manifest as spiritual idea. The use of all sorts of names for Mind and its manifestation is not confusing to the one who is considering the spiritual fact in place of the suppositional mortal opposite. Because Mind is actually infinite, it infinitely unfolds.

The infinity of Mind and its idea may, of course, appear to the one seeking the truth as a multitude of good experiences. The sense of many is, however, but the human counterfeit of the infinite unity of the one creator and one creation. Mrs. Eddy states it unmistakably on page 264 of Science and Health, where she says: "As mortals gain more correct views of God and man, multitudinous objects of creation, which before were invisible, will become visible. When we realize that Life is Spirit, neither in nor of matter, this understanding will expand into self-completeness, finding all in God, good, and needing no other consciousness." This reality, even though it may not seem distinct to the one who is just beginning to turn consciously to Principle as the source of all good, becomes clearer in proportion as one is consecrated in putting into practice all that he learns of it through the study of Christian Science. As he goes forward, he begins to see that all the absolute reality of past, present, or future, is idea in Mind, quite apart from material sense testimony. Thus he awakens to the truth that man's whole living always has been in Mind, not matter, and he proves in the present just so much of the unlimited possibilities of entirely tangible eternity.

GUSTAVUS S. PAINE.

[Written for the Sentinel]

Winds

For thou hast been a strength to the poor, a strength to the needy in his distress, a refuge from the storm, a shadow from the heat, when the blast of the terrible ones is as a storm against the wall.—Isaiah 25:4.

W. EDSON SMITH

The blast of the terrible ones may come
as a storm against the wall!

What of that? For our God is a God of calm:
I have harked to a pine cone's fall

And missed never a word of that still, small voice
Which told me the way to go;
I have heard His whisper ride down the gales
of summer—of blizzard snow.

The blast of the terrible ones is strong;
yet I know where the butterflies drift—
At top of the world—where a rough young wind
riots up through a Titan rift.

Purple and bronze and golden and black,
fragile as blossoms of spring,
And they join in the play of the mountain day
with never a broken wing.

Is the blast of the terrible ones so strong?

Do you crouch in a place of fear

While trees of righteousness bend afar

and the rocks are breaking near?

There's a king to crown and a prophet to make—

God's man at the last great test;

And a river to smite, ere you higher rise

by the burning heart in your breast.

Testimonies of Healing

For many years before reading "Science and Health with Key to the Scriptures" by Mary Baker Eddy, I had not attended any church or accepted any creed, or engaged in any church work, though, strange to say, I did vaguely believe in God. I was a victim of the whisky habit with its attendant vices, and although I had some desire to quit it, will power did not enable me to let it alone. The desire for liquor was overcome quickly and easily through Christian Science, and although I am not as yet a member of the church, for the past two and one half years, since reading Science and Health, I have been a regular attendant of the Sunday services and of the Wednesday evening meetings. Before reading this book I was continually taking some kind of medicine, but since reading that "Desire is prayer; and no loss can occur from trusting God with our desires, that they may be moulded and exalted before they take form in words and in deeds" (Science and Health, p. 1), it has been my earnest endeavor to put this into continuous practice.

I can most gratefully say that in so far as I have gained the understanding to seek "first the kingdom of God, and his righteousness" I have found each need has been supplied, sometimes even before I asked, and many minor ailments have been healed. Truly all good is possible to God, and the "wrath of man" is made to praise Him. I am indeed grateful to God for a knowledge of His Christ, Truth, as explained through Science and Health.

W. H. LEWIS, Indianapolis, Indiana.

4

Christian Science was first presented to me by a relative who had been healed through Christian Science and who, while visiting me, asked me to read the daily Lesson-Sermon. I saw at once what a wonderful book Mrs. Eddy has given us in "Science and Health with Key to the Scriptures," and it has never ceased to be a joy to me to study all of our Leader's writings and to read the periodicals founded by her. Having noticed how eagerly those seeking help turn to the testimonies in *The Christian Science Journal* and in the *Sentinel*, I see how mankind is reaching out for the healing truth as taught by Christ Jesus, the Way-shower.

I have thought it unnecessary for me to give a testimony of healing because the physical healings have been so simple, but I am most grateful for the healing of grief over the seeming loss of loved ones. Mrs. Eddy says on page 521 of Science and Health: "All that is made is the work of God, and all is good. We leave this brief, glorious history of spiritual creation (as stated in the first chapter of Genesis) in the hands of God, not of man, in the keeping of Spirit, not matter,—joyfully acknowledging now and forever God's supremacy, omnipotence, and omnipresence." Whatever our seeming problems may be we can go on joyfully expressing gratitude for Christian Science.

(Mrs.) MINNIE J. HOLDEN, San Francisco, California.

The Bible tells us that "the last enemy that shall be destroyed is death." Through the study and application of Christian Science we find that even this grim enemy can be overcome here and now.

A few years ago my little son, then a child of less than two years, developed the disease known as whooping cough. He had a severe attack of it, and the coughing spells filled me with fear and distress in spite of the fact that I had been studying Christian Science for several years. One day while I was feeding him with some solid food, a paroxysm of coughing came on, and evidently a piece of food was drawn into the windpipe. The child's face grew distorted; he became limp in my arms, and so far as I could tell his breathing ceased. I went to the door and called my husband, who was out in the yard. He came quickly and took the child but did nothing for him in a material way, while I went to the telephone and called a practitioner nine miles away, asking her to help me, as the baby seemed to have gone. I then waited, 'trying to realize the truth myself; but the fear seemed very great. I do not know how many moments passed before the joyful words came to me from my husband, "He is all right now." I turned and looked at the child. The little face was relaxed and he was breathing quietly. Can any one who has not been through such a trial realize the joy and gratitude of that moment for the proof that man dwells in the abundance of Life continually? The child is now a normal, healthy boy.

Words cannot express my gratitude for our periodicals. They have ever been a source of great inspiration, joy, and help, and never more so than at the present time. My gratitude to our beloved Leader, Mrs. Eddy, is unbounded, and my desire is to live the life of a consecrated Christian Scientist, for in that way only can I truly show my gratitude.—(Mrs.) Bessie G. Kraber, Lakewood, Ohio.

4

For over eighteen years prior to my gaining a knowledge of Christian Science, I had, because of my human ambition, always made money, but had repeatedly lost it. After becoming interested in Christian Science, although I had seemingly been successful, the money I had accumulated was once more taken from me, until I was down to the point where I had but a few dollars to my name, with my business gone and nothing left but this small sum to make a new start. I was still ready to go on fighting, but it suddenly came to me that I had been making a most exhaustive human effort for eighteen years, only to arrive at this point. Therefore, what did my human effort avail? "Man's extremity is God's opportunity." I went to a practitioner and told her I was ready to take my stand for the truth and that if she would show me how to apply Christian Science to my everyday affairs I was ready and willing to be led by Truth.

From that time on I did faithfully strive to apply what I knew of the truth and relied on Principle to an extent that I had not thought it possible to rely on anything which I could not see or touch, and with the increased understanding which came to me through the sincere efforts of a practitioner and my willingness to be led, my needs were met more generously than they had ever been met before. I had previously considered myself "hard-headed" and practical and thought that I knew what "good business" is, but the unfolding of the truth to my consciousness was constantly showing me the many errors in what is ordinarily considered "good business." Since that time problems have come up to be met in business where the advice of friends and associates has been, "Let it alone," yet, through reliance on Principle, things which have seemed utterly impossible from the human standpoint have been accomplished.

When my wife and small daughter developed symptoms of influenza I called upon a practitioner for treatment, and shortly thereafter my wife was healed, but probably because of our unconscious fear for our daughter, she became worse and seemed to be burning up with fever. We constantly

declared the truth and did our work faithfully, and although the child was delirious during the night and still had a high fever in the morning, accompanied with a severe cough, when she later on asked to get up, we took her up, dressed her, and she was never put back to bed except at her regular hours, although the claim persisted for several days, but each day she improved, until on the seventh day she was completely healed. It is hard to express in words my deep thankfulness to God and my gratitude to Mrs. Eddy for having made the truth available to us at all times, and especially in times of extremity.

JAMES S. BARRON, Scarsdale, New York.

For some time it has been my desire, and I believe my duty, to tell what Christian Science has done for me. It has been many years since Christian Science found me, at which time I was in a discouraged and hopeless condition, after having given thirteen physicians a fair trial. I feel that they did the best they could, according to their understanding. Their only advice was an operation, to which I could not give my consent. Each physician left me a little more hopeless, though I prayed each day that God would bless the medicine I was taking to help me. One day a friend came to see me and talked to me about Christian Science. I felt it was beautiful. She wanted me to get a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy. I told her I could not read the English language, for my education had all been in German. Then she advised me to see a practitioner. I did so, and treatment was given for a short time.

As my husband was not willing for me to continue the treatment, the practitioner said I had better learn to read, for many were healed through reading Science and Health. I purchased the English Bible and went to work with the dictionary, Quarterly, and German Bible to learn to read English. I never can tell in words the spiritual uplift I received with each effort I put forth. In six months I was entirely healed. I have always felt so grateful for the effort I had to make for this healing. It gave me a solid foundation upon which to stand in the severe trials that came up in later years, during which all discordant conditions have been beautifully overcome through the application of the truth. For this and many other blessings that have come to me and mine, I am very thankful to God and grateful to Christ Jesus our Way-shower, and to our Leader, Mary Baker Eddy.

(Mrs.) EMMA C. HILDEBRAND, Wichita, Kansas.

The above testimony is correct. I am truly grateful for Christian Science. It has been our only physician for many years.—C. R. HILDEBRAND.

Like many others I came into Christian Science through a longing for something more satisfying and practical than I had been able to find in a denominational church. There was no thought of physical healing in my first effort to understand and apply the teachings of Christian Science, and there was a great joy and gladness in my heart when I knew I had found a religion which was applicable not only to the great problems but to the most trivial things in the daily routine. As time passed I found that many physical discords, some the result of childhood sickness and of a surgical operation and others supposed to be inherited, gradually lessened and finally disappeared. I was not only happier and healthier in mind and body but a decidedly marked improvement in my appearance became evident to all and I was more active.

I have seen and experienced many proofs of the healing power of Christian Science. Colds, coughs, measles, whooping cough, influenza, fevers, burns, and sprains have all been healed. Business difficulties have been solved and sorrow and anxiety overcome through this wonderful truth as given to the world, in practical, demonstrable form, by Mary Baker Eddy, Discoverer and Founder of Christian Science, who on page 4 of her Message to The Mother Church for 1902 says, "I again repeat, Follow your Leader, only so far as she follows Christ" and on page 15 of "Science and Health with Key to the Scriptures," "The Master's injunction is, that we pray in secret and let our lives attest our sincerity."-(Mrs.) Blanche M. Colley, Cambridge, Massachusetts.

I very gladly add my expression of gratitude to that of my wife. We both have been healed and benefited in innumerable ways through the study and practice of Christian Science. I can testify not only to the healing in our own experience, but to splendid, indisputable results which I have witnessed in the lives of others.-W. A. Colley.

When Christian Science came to me several years ago I was suffering from a very serious internal complaint, and a London specialist who had been attending me for many months finally pronounced an operation to be my only hope, although that might leave me a semi-invalid for a long time, and probably for the rest of my life. I had been very delicate from childhood, suffering from sleeplessness, nervous debility, and almost constant sick headaches, and before my marriage I had spent several months in a nursing home, where I underwent very drastic treatment for internal abscesses. Some years after this, when my son was born, I was so desperately ill that for weeks my life was despaired of, and until I heard of Christian Science my experience was one of weariness and suffering. I had induced the specialist who had decreed an operation to postpone this for a week, in the hope that some way of escape might be found for me, as I felt I should continue to be a burden to my friends if I submitted to it. At this time my parents came to see me, bringing with them some Christian Science literature which an acquaintance, hearing of my illness, asked them to bring to me. As soon as I was able to do so I read these pamphlets and copies of the Sentinel and at once I realized that the healing others had experienced I could have and I began the study of "Science and Health with Key to the Scriptures" together with the other works of Mary Baker Eddy. It is with the greatest joy that I testify to the complete cure of the internal disease through the study of Christian Science alone, and the dismal prophecies of many medical men have been entirely overthrown.

From my childhood I had wished that I had lived when Jesus was here, for he might have healed me, but I was soon to learn through Christian Science that the truth which he taught and by which he healed the sick and sorrowing is here to-day, available for all who are willing to put off their old false beliefs about God and man and in their place learn the truth which Jesus taught and which has again been

given to the world in Christian Science.

After a few months' study of the textbook and the Bible, aided by the periodicals and pamphlets, I was able to take up my duties in the home, and I gradually gained strength and a degree of freedom and happiness such as I had never known before. My healing seemed slow but the attacks

became less frequent and I was never again laid up with that trouble, whereas before I took up the study of Christian Science I had long spells of severe suffering and was under the care of doctors and with a trained nurse in attendance most of the time. In the meantime many physical ailments dropped away without conscious effort on my part, such as sleeplessness, a skin disease, and defective eyesight, for which I had worn eyeglasses for eight years, proving to me that the awakening to a truer knowledge of God and man heals the sick. The small understanding of Christian Science which I have gained has supported me through the greatest earthly sorrow, giving me a wonderful sense of God's love and care for His children and proving to me in innumerable ways that all good comes direct from God to man, and that by acknowledging and recognizing this fact and rejoicing in it the way opens for all the good God has bestowed on man. That my physical healing is complete was proved to me last summer, when I spent three weeks on a cycling tour with my son, during which time we never had to make use of a train.

For all the blessings I have received through the study of Christian Science I can never express the debt of gratitude I owe to our beloved Leader, Mrs. Eddy, who through her life of consecration brought again to suffering humanity the Christ-cure.

(Mrs.) ETHEL HULKS, Kew Gardens, Surrey, England.

4

"No greater blessing could come to mankind than Christian Science, which teaches and demonstrates the omnipotence of God, good, and the nothingness of sin, sickness, and death." These words from a recent helpful testimony in the Scatincl exactly express my thought about the value of Christian Science to the world. The testimonies in our periodicals never fail to be a source of inspiration to me and to give just the light needed to solve some seemingly pressing problem. It is a privilege to add my testimony to those appearing each week and month in our periodicals, for the testimonies are one of Mrs. Eddy's wise provisions for spreading this gospel of freedom from the belief in a power apart from God. In an article entitled, "To Correspondents," on page 155 of "Miscellaneous Writings," Mrs. Eddy makes plain her desire with regard to the activity of her students in this world-wide blessing, when she says: "If my own students cannot spare time to write to God,-when they address me I shall be apt to forward their letters to Him as our common Parent, and by way of The Christian Science Journal; thus fulfilling their moral obligation to furnish some reading-matter for our denominational organ. Methinks, were they to contemplate the universal charge wherewith divine Love has entrusted us, in behalf of a suffering race, they would contribute oftener to the pages of this swift vehicle of scientific thought; for it reaches a vast number of earnest readers, and seekers after Truth." This thought is emphasized again by her on page 271 of the same book in an article entitled "Compounds," in which, speaking of students of Christian Science, she says, "They should take our magazine, work for it, write for it, and read it."

Christian Science came to my attention many years ago, since which time it has been my religion and physician. An increasing realization of true joy and genuine health has resulted, in exactly the proportion that I have faithfully studied and applied my understanding of the Science of Christianity as taught in Mrs. Eddy's writings. A college course, which I thought was to be denied me, was made possible after turning to Christian Science for help. Through-

out my college experience my infallible guide was reliance on Principle. The college requirements of physical examinations, courses in hygiene, and infirmary excuses for absence, when Christian Science treatment was desired in place of material medicine, were all satisfactorily and easily handled through the understanding that God and His idea constitute man's entire knowledge.

Throughout these years of the study of Christian Science many physical ills have been overcome, for all of which I am grateful to the extent that I see they were a means for growth in grace and in the knowledge of God. The unfoldment of this religion of Love to the thought of our little girl is cause for great gratitude. Frequently unexpected remarks or occurrences show how quietly and surely the truth is becoming real to her. I am truly grateful for Christian Science.

(Mrs.) FAY FRISBIE JOHNSTON, New York, New York.

It is my desire to express publicly my gratitude to God for the healing and protection I am constantly experiencing through the understanding of Christian Science and the application of its teachings.

In crossing a busy street one evening I was knocked down by an automobile, the wheel going over one foot. As I fell, the weight of my body was thrown on the other limb, which seemed to strain it quite severely. I instantly worked to realize the fact that all that God knows about idea is spiritual, and that there is no material counterfeit to be affected by any belief of an accident. The next day I was called upon to start on a two weeks' trip, which I did, but with quite a bit of pain at first; but in proportion to my rejoicing that I was already healed, I began to realize my freedom. During the period of this same trip, as I stepped into one of the hotel elevators the operator let the wheel slip, and the foot of the same limb was caught in between the shaft and the elevator, throwing me on my face. I rode in this position half the distance between floors, and while lying there I realized the truth and felt no sense of fear or disturbance. My foot was then released, without the slightest injury. In less than three weeks from the time of the first accident, I was conscious of absolute freedom. This demonstration was made through my own realization of the truth and without calling upon a practitioner for help. I also desire to express my appreciation of all the Christian Science periodicals. During the period of the war I found them indispensable, especially The Christian Science Monitor, for accurate information. They are so completely filled with truth that they dispense healing wherever they are received. The following is one specific instance in my own experience. I was greatly disturbed over a very important decision which I seemed called upon to make. It seemed to affect very seriously another person, and I felt it necessary to call upon a Christian Science practitioner for help, but could not arrange for an interview at that time. I was positive, however, because of God's ever presence, that my help was at hand. I at once picked up a copy of the Monitor that was beside me and there found a complete and satisfactory answer to my prayer. Needless to say, the decision proved a blessing to us both. I had been trying to see the fact about this problem for several years. This is only one of the many blessings I have recently experienced through the periodicals. I am indeed grateful for these healing truths, which are being presented to all mankind through the Christian Science literature.

(Mrs.) HELEN W. BARNARD, Berkeley, California.

F 936

Signs of the Times

[From "A New Spirit in Literature," by Felix Grendon, in The Forum]

In contrast to Biblical times, the modern western world has rarely furnished literary artists who were also prophets, or prophets who were also literary artists. Barring a few exceptions like Langland, Milton, Bunyan, and Blake, our Doctors of Literature have functioned chiefly as professional amusers. Their specialty has been the manufacture of voluptuous sense impression and the annihilation of serious thought on the basis that, with

"A jug of wine, a loaf of bread, and thou, The wilderness were Paradise enow."

But these verbal opiates, quick to narcotize, but powerless to cure what weaklings called the great disease of living, eventually lost their charm. Men began to suspect that the human mind had been developed for a purpose nobler than that expressed in the injunction to eat, drink, be merry, and otherwise to gamble with death. But what purpose? This question, a profoundly religious question, was the cue for the modern author to step upon the scene and sweep away the old literature of sweetmeats, roses, and wine. The new writers were brimful of three ideas. The first was that, the human race having reached a degree of maturity which qualifies it to look the facts of life straight in the face, an attitude of realism is not merely possible but imperative. For, in the walls of man's earthly house the most alarming cracks are appearing, and the old business of nicely papering over these cracks bids fair to land him in disaster. . . .

The new spirit has influenced even those writers who, lacking the specific religious sense, are entertainers pure and simple, however high their rank in this capacity. Mark what has happened to the Kiplings, the Barries, and the Conan Doyles of 1900, of the period when "Soldiers Three," "Sentimental Tommy," and "The White Company" took two continents by storm. Where is the old rollicking faith in this best of all possible worlds, in this epoch of bullets and beer? Where is the skittish assumption that social evil is, at worst, a negligible by-product of a community of nature's noblemen and, at best, a sort of moral dumb-bell for the hero to get spiritual muscle by? Not but what Kipling, Barrie, and Conan Doyle are still past masters of the arts of romance and illusion; but they are no longer the men they were. And something more than age or experience has overtaken them, as a reading of their recent "Diversity of Creatures," "Mary Rose," and "Fires of Fate" will speedily prove. . . .

In other words, modern literature is making reformers of us all. The responsible literary artist does not deny that men can, if they so will, turn the earth into a sort of international Coney Island or continuous Broadway musical show of world-wide dimensions, but he warns us that, if we want a new world, a world that is neither a Purgatory of Pleasure or a Paradise of ghastly Make-believe, we must get beyond the honeydew school of literature with its dainty, sweetish pabulum of the "How silver sweet sound lovers' tongues by night" variety. We shall have to take ruggeder fare. Our intellectual entertainment must make us experience the keenest joy of living, the consciousness that we are active in creating a finer, intenser social life. This is the new Word in literature—and the Word is with God, the Word is God. It is the new Word with which the modern writer tunnels to the spiritual realities behind material facts, and accomplishes such startling conversions amongst the young men and women of our time.

[From Report of The American Bible Society]

In the United States the Scriptures for the Navajo Indians have been published. In Latin America a new Spanish Version of the New Testament has been prepared, and certain translations of the gospels in the Bolivian Quechua and a gospel of St. John in the Ecuador Quechua have been issued. In Asia, a Siamese Version has been carried forward in its revision and a beginning of the translation of the Bible in Kamu has been made. The Revised Japanese New Testament has been published, and in the Philippines revision work has gone forward in the Cebuan New Testament. Most important of all probably has been the completion of the task of a generation in the revision of the Wenli and Mandarin Bible in China. This new Mandarin Bible will probably be to the Chinese people what the King James Version has been to the English speaking people.

[From Jamaica Plain (Massachusetts) News]

Speaking of appreciation for the Bible, the one hundredth anniversary of the birth of Mary Baker Eddy, which is being celebrated to-day, reminds one that whatever else Mrs. Eddy has accomplished and however much one may disagree with her views, the acknowledgment must be made that she has created a renewed vital interest in the Bible among her followers, who, most of them, read it every day, with benefit to their minds and morals.

[From "Industrial Government," by John R. Commons]

We visited some thirty establishments from July to September, 1919, and Wisconsin to Maine. We prepared by studying industrial government in books, papers, and pamphlets from Russia to Australia. We selected as large variety of types that had successful experience as we could find. America had examples of every kind, from industrial autocracy to the farthest left wing of revolutionary democracy. . . . One interesting fact was found: the sudden or gradual moral conversion of an employer from business to humanity. Employees noted it, and could not at first believe it, or were still incredulous, and told us about it, and so did the employer himself.

[From "The Morality of Music," by W. J. Turner, in The New Statesman]

Any man who thinks that his griefs or joys are in themselves worth expressing is mistaken. The first thing that an emotional composer has got to learn is that no matter how intensely he may feel, that intense feeling is not of the slightest interest to anybody. When he has passed beyond all wish to interest mankind in his sufferings or his joys, and when in his artistic activity he is purged of all individual desires, he may perceive beauty with such suddenness and intensity that he praises it as Milton imagined the Cherubim and the Seraphim praised the Son of God. . . . What makes the artist, it cannot be too often declared, is his consciousness. . . . It is of the very essence of his nature that his mind does not dwell, as the minds of ordinary men do, chiefly upon the pleasures of the body or the satisfactions of social prestige. To imagine that he could be mainly occupied with such things is to imagine that he is an ordinary, undeveloped person, who has not got beyond a very rudimentary consciousness. To compare such a person with a great artist is like comparing to a man a dog that runs about following its nose. We demand of a great artist neither tricks nor the vivid expression of our own passions, but a profounder and wider consciousness than we possess ourselves. The values here are entirely spiritual. In judging music, as in judging every other art, there are no other values, and there can be no other values.

[From "An Educated Nation," by Basil A. Yeaxlee]

When a government committee, dealing with a mass of hard facts and required to make businesslike recommendations on the practical aspects of the subject, describes education as "a spiritual activity," it is worth while to inquire somewhat closely into the phrase. True education is the development of the whole personality. . . . The process involves the sinking of prejudice and the doing away of all suspicion. The educated man is he who can listen receptively to unfamiliar facts or unwelcome truths, who can face with equanimity extreme or exaggerated statements and points of view for the sake of drawing out and adding to the common stock the measure of truth that these may prove to contain, and who wins a way for his own opinions by his toleration of differing or opposing ones. The nation that desires to be educated must be willing to take that path.

[From The Congregationalist and Advance]

There is marked advance in prohibition sentiment in Holland. A number of referendums (straw votes) have shown that in many places the majority of the inhabitants over twenty-one years of age favor prohibiting the sale of alcoholic liquors.

[From The Living Church]

The memorial service to the American soldiers and sailors who lie buried in the United Kingdom was held in St. Paul's Cathedral last Monday. It was a brief function -a hymn, the paternoster, three collects, an address, and an anthem-but for all that was highly impressive. The opening hymn was Mrs. Howe's "Battle Hymn of the Republic," sung to its well-known melody, the great congregation taking it up with a will, and making the triumphant words ring out with splendid effect. The Dean of St. Paul's address was worthy of the occasion, and well merits a brief summary. Dr. Inge began by saying that they were gathered there to do honor to those who came from America to fight in a righteous cause, and whose bodies now rested in British soil. Their graves were in the land that was still sometimes described in America as "the old country." He doubted whether Americans who had not crossed the Atlantic realized how strong was the feeling of kinship on this side of the water. We were not an effusive people, and least of all were we effusive toward those whom we considered should take our good will for granted. The history of the United States of America was far more than one hundred and fifty years old. It was as old as our own. because it was our own. When America came into the war, our rejoicing was deeper than a mere sense of relief from anxiety. Behind it was a feeling that the two flags were side by side, as they ought to be in every battle of right against wrong. . . . Lord Bryce said that some are heroes of a nation and some are heroes of a race. "George Washington," he concluded, "is a hero of a race, a race that loves liberty and sets it higher than any mechanical theory of loyalty."

[From The Woman Citizen]

Nation wide municipal elections have just taken place in Belgium. It was the first opportunity the women have had to use their new electoral privilege. It was said there, as elsewhere, that women did not care for the vote, and this was the most urgent opposition argument. The election data record that 700,000 more women than men took part in the election, a fact which forever disposes of that outworn excuse. Among the women was Queen Elizabeth, who voted in Brussels, taking her place in line and awaiting her turn.

[From Public Opinion, London, England]

"The great object of the conscientious journalist," said Lord Robert Cecil at the Centenary Dinner of the Manchester Guardian, "is to make righteousness readable." . . . Adds the Nation, "If we take righteousness in its broadest sense, is it not the first mark of all great writers that they make it readable? . . . Limiting ourselves only to the last century, we find the best writers-Dickens, Tolstoi, Carlyle, Browning, Ruskin, Matthew Arnold, George Eliot, Thoreau, and a few others-pretty steadily on the side of righteousness, and for the most part readable. Or if we turn to more ancient examples, the Old Testament, with the exception of a few passages of bloodthirsty patriotism, is on the side of righteousness and a great proportion of it is readable. In their wide appeal to the better impulses of mankind how fine are the stories of Joseph and David and Elijah and Job and Ruth (so strangely misread by Keats)! How readable and attractive they must be to have passed into the language of Europe and America as they have done!

"Or we may move to a higher example still, and remember the stories of the good Samaritan, the prodigal son, and the woman who found her piece of silver. We read that Christ Jesus did not speak to the people without a parable, and we may suppose that he recognized the necessity of making righteousness attractive, or, as we now say, readable. Many modern writers appear to disagree with Plato's saying that it is best to learn the nature of evil by the canon or rule of good. They teach more directly by the canon of evil. Of course, they find it easier, or perhaps they never knew the canon of good and so cannot help themselves. But, on this occasion, truth and Plato seem to be on the same side, and both are our friends."

Notice

SHORT TERM SUBSCRIPTION AND ORDER RATES

Attention is called to the new rates now in effect on short term subscriptions for *The Christian Science Monitor*, Christian Science Sentinel, and The Christian Science Journal; also on single copies of the Sentinel and the Journal. These rates are stated in the advertisements found on the inside front cover page of the Sentinel and on page "iv" of the Journal.

Attention is also called to the rates scheduled below, now effective on all quantity orders for any of the Christian Science periodicals:

Monitor\$.04	a	сору
Sentinel		"
Journal		"
Der Herold18		"
Le Héraut		"
Quarterly		"

These rates are net and take the place of the former 10% discount on periodical orders.

An exception to the *Monitor* rate given above is made in cases where orders specify that the copies desired are for free distribution at a Christian Science lecture or for other free distribution. This should be clearly stated when ordering. Such orders will be filled at 3 cents a copy.

The uniform retail price on the Sentinel is now 10 cents a copy, and on the Journal 35 cents a copy. The Monitor single copy price remains at 5 cents.

Discounts to reading rooms on subscriptions and on orders for general publications remain as before.

Church Notices

From the Clerk of The Mother Church

CHURCH TENETS .- The tenets of The First Church of Christ, Scientist,-The Mother Church,-printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to CHARLES E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail

unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in The Christian Science Monitor, were run off at the time of their publication in the Monitor.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 81/4" x 103/4". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for The Christian Science Monitor, Journal, Sentinel, Quarterly, and Heralds, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and imme-

diate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley

House, Norfolk Street, London, England.

New Pamphlets

There will be placed on sale in a short time six new pamphlets, containing articles reprinted from the Christian Science periodicals, as follows: "Government," "Employment," "Work and Play," "Progress," "Occupation," "Relationship." Orders for these pamphlets may be sent at once, to be filled on the date of issue. Price 5 cents a copy. Reading Room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

* * *

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUB-LISHING SOCIETY, Boston 17, U. S. A.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$5.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each 83.50; six or more, each 83.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

German Translation. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1806, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good. Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism. Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 04 pages, single copy 00 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 0. 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years aco. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

AUGUST 27, 1921

NUMBER 52

The Thirty Pieces of Silver

ROSE N. SUTRO

AFTER finding that the young man, spoken of in the gospel according to Matthew, knew and kept the commandments, Jesus gave an answer to his question which was fraught with a meaning which only becomes clear to humanity when it really is seeking to understand and express the Christ, Truth, in a love that is patterned after the divine. "Jesus said unto him, If thou wilt be perfect, go and sell that thou hast, and give to the poor, and thou shalt have treasure in heaven: and come and follow me." According to this same account the young man was sorrowful, and departed, evidently feeling himself unable to give up his material possessions, or the belief of life in matter, in order to follow the Christ, Truth, which would lead him to that spiritual consciousness which is Spirit, Life eternal. It is not until one has made a study of Christian Science that the full import of Jesus' remark which followed this occurrence comes home to one with its deep significance. For Jesus said, "And again I say unto you, It is easier for a camel to go through the eye of a needle, than for a rich man to enter into the kingdom of God." To one loaded with riches conditions seem to be comfortable and satisfactory. As Mrs. Eddy says on page 85 of "Miscellaneous Writings": "The pleasures-more than the pains-of sense, retard regeneration; for pain compels human consciousness to escape from sense into the immortality and harmony of Soul. Disease in error, more than ease in it, tends to destroy error: the sick often are thereby led to Christ, Truth, and to learn their way out of both sickness and sin." So it is that until one learns to look upon the desire for material possessions, whether wealth, position, fame, power, or what not, as the tempter and the tempted, the Judas in human consciousness, one has not really begun the battle which all must fight between the flesh and the Spirit, in order that the kingdom of heaven, peace and harmony, may be attained.

The story of Judas Iscariot's betrayal of Jesus the Christ for thirty pieces of silver is constantly being repeated in human history. Judas was but the tool of supposititious evil aiming its blow, through him, at the Christ, the Truth, which the pure and inspired Jesus exemplified and taught. Every temptation which comes to a mortal to renounce his ideals, his highest sense of good, for material gain or profit, is the same quality of thought that Judas represented when for thirty pieces of silver he forswore the Christ. Many times daily has one to choose between his ideals, the dictates of his conscience, and what seems to him the easy, agreeable, or materially profitable way. This choice means always the same thing, the choice between the temptation of ease in matter, the belief of life in matter, or what to human sense appears quite intangible, spiritual unfoldment, or the kingdom of God. For this warfare is against the serpent, or impersonal evil, as Mary Baker Eddy puts it so succinctly in "Science and Health with Key to the Scriptures" (p. 564): "The serpent is perpetually close upon the heel of harmony. From the beginning to the end, the serpent pursues with hatred the spiritual idea." After the student of Christian Science realizes that his choice must always be on the side of right, on the basis of divine Principle, and he knows what is right because it is in reality constructive, he prays each day to be delivered from all evil, from temptation; in other words, from being made to neglect his duty to Principle. He recognizes his inseparability from divine Principle which guides him and guards him from the temptation of believing in any life apart from God, good, or from being mesmerized into a belief of life in matter.

Had Judas fully understood the teachings of the Master, he could not have been tempted through his envy and jealousy of Jesus' spiritual power, nor would the expectation of material gain have held out any inducement for his betrayal of Jesus. Were it not for the fear of extinction and oblivion humanity would not be guilty to-day of bloodshed, of unscrupulous business dealings, of the underhand methods in national and international relations as well as in almost every human relationship. It is not until the light of Christian Science is thrown on the Bible, and a key is furnished to the Scriptures through the study of Science and Health that it is learned that the pearl without price is the understanding that because all life is of and in God, it is indestructible and therefore there is no extermination to fear. Because the Scriptures say, "But rather seek ye the kingdom of God; and all these things shall be added unto you," a state of being is constantly sought which expresses the one Mind which is God, and in so doing the student realizes that all that he needs he already has through his perfect relation to the one supply which is Mind. Seeing that accretion really gets him nothing, and desiring to express constantly more of that Mind which was also in Christ Jesus, he does not attempt through mere human will to escape experience. He learns to pray, "Not my will, but thine, be done," knowing that the only experience he can be called upon to go through is the experience of good, and in it there is sure to be spiritual unfoldment and growth.

Jesus could, if he would, have escaped that experience on the cross which he foretold and which he recognized Judas would bring about, but he also saw that in order that he might prove the eternality of life he must go through the experience. All who discern this great truth are awake to the fact that they, too, are being called upon to give up the human sense of life to prove that the only life there is is spiritual; and they realize full well that each time that they fail to live up to their highest understanding they will have to retrace with bleeding footsteps the path they have already trodden. Indeed they know that just as Judas threw away his blood money and killed himself after committing his crime, so will every seeming material gain have to be given up and the belief of self-existent evil be destroyed. It is in living in accord with Principle, and laying aside all greed,

sensuality, selfishness, envy, and jealousy that the Judas in human consciousness is being destroyed and the Christ is accepted. It is in denying the claims of every man-made law, such as heredity, race, nationality, sex, or temperament that one frees himself of the bondage imposed upon him by the so-called mortal mind, and the only way that this can be accomplished is by knowing that instead of these so-called laws there is the divine law, the government of Principle which maintains man as idea forever perfect, inheriting all good from the one Father-Mother God, having only the disposition to reflect Mind, in which the only greed is the greed for good, where the only betrayal is the betrayal of evil which destroys itself. He must know that right where the Judas and his thirty pieces of silver seem to be expressed, all that there really is is God and His idea, forever manifesting and expressing the Christ, Truth, and destroying forever the claim of evil in human consciousness.

Making Our Choice

CHRISTOPHER DILWORTH

AFTER the resurrection, finding that their number lacked one, and prayerfully considering the situation, the disciples immediately took steps to fill this vacancy. In the first chapter of Acts we read: "And they prayed, and said, Thou, Lord, which knowest the hearts of all men, shew whether of these two thou hast chosen. . . . And they gave forth their lots; and the lot fell upon Matthias; and he was numbered with the eleven apostles." This incident shows that the eleven disciples felt their need for guidance in the choice they were about to make; there was no hesitation or delay in the appointment, and it then only remained for those present to cast their lot.

If Christian Scientists took this little incident into consideration when making their choice of officers it would not be necessary to spend hours trying to fill a vacancy, and much would be gained. Often a whole evening may be taken up in an election, for the simple reason that members have not given sufficient time to the study of the situation or the requirements necessary for the fulfillment of a particular branch of church work. As Mrs. Eddy says in "Science and Health with Key to the Scriptures" (p. 34), "If Christ, Truth, has come to us in demonstration, no other commemoration is requisite, for demonstration is Immanuel, or God with us; and if a friend be with us, why need we memorials of that friend?" It will thus be clearly seen that for demonstration it is necessary to be acquainted with Principle, or cause, from which one must deduce the absolute conclusion, and that this deduction must be governed by an unchangeable and dependable law in order that a correct solution to the problem confronting the members may be gained. From this viewpoint it is necessary that each individual should ask: "What are my reasons for voting? Am I prompted by personal considerations, or selfishness, or by desire for the advancement of our cause?" Sometimes it may be found that one is being influenced by the fact that some person has held the position so long that it is feared he may feel hurt if he is removed. We have only to know that we are advancing and are helping others to advance, and when true Christian Science is demonstrated it will be seen that mortal personality is excluded from the truth and Mrs. Eddy's statement on page 513 of Science and Health will be understood, where she says, "Advancing spiritual steps in the teeming universe of Mind lead on to spiritual spheres and exalted beings." The realization that man is in his proper place all the time and that mortal personality is out of place in a Christian Science demonstration would prove that Truth and Love control man, and a correct solution would be promptly gained.

Christian Scientists have realized that rotation in office is requisite, since there should be activity. Limitation means stagnation, and when any officer thinks he is indispensable he is not only limiting others but himself also. Filling a position for such a time that it is looked upon as a source of supply hinders one's advancement and realization of his dependence upon God. It is divine Love expressed that delivers us from selfish motives, from mortal personality, from being ruled over, or from ruling over others, and on no other basis can a demonstration in Christian Science be made.

Mrs. Eddy writes (Miscellany, p. 250), "Rotation in office promotes wisdom, quiets mad ambition, satisfies justice, and crowns honest endeavors." No disaster can come to those who trust God. Supply is secure if we obey Truth, take up the cross and follow our Master, losing sight of worldly position and the ambition for recognition. Thus we prove true place and work of the true character. Mrs. Eddy says on page 507 of Science and Health, "Spirit duly feeds and clothes every object, as it appears in the line of spiritual creation, thus tenderly expressing the fatherhood and motherhood of God."

"Come now, and let us reason together"

ETHEL SANOR COMMERFORD

WE arrive at the fundamental fact of being through our ability to reason on the basis of Principle. Divine reasoning consists in persistently and consistently reversing the false material sense of things with that which is true. The prophet of old understood this process when he said, "Come now, and let us reason together, saith the Lord: though your sins be as scarlet, they shall be as white as snow; though they be red like crimson, they shall be as wool." Christian Science, as given to the world by Mary Baker Eddy, is the fulfillment of this call. Its divine reasoning is the Christ, the Comforter, foretold by Isaiah and afterwards embodied in Jesus' mighty healing works. Of the fruits of this process of right reasoning the prophet Isaiah declares it gives "beauty for ashes, the oil of joy for mourning, the garment of praise for the spirit of heaviness." "Every valley shall be exalted . . . and the crooked shall be made straight, and the rough places plain: and the glory of the Lord shall be revealed."

There is never a condition or circumstance, however severe it may appear to be to the material senses, that cannot through right reasoning be replaced with divine actuality. The Bible narratives prove this in every instance; for illustration, take the experience of Daniel. It must have seemed a tremendous trial to material sense to be placed in a den of lions, but Daniel knew that what seemed a great trial was really a joyful opportunity to prove God's loving, protecting care under all circumstances. The enemies of Truth conspired against Daniel and through subtle suggestion and trickery succeeded in persuading the king to sign the decree to have Daniel placed in the den of lions. This was the most severe punishment error could contrive, for it seemingly meant the destruction of Daniel. The record reads, "And a stone was brought, and laid upon the mouth of the den; and the king sealed it with his own signet, and with the signet of his lords; that the purpose might not be changed concerning Daniel." Material mortal reasoning had left no stone unturned. He was thus seemingly

doomed to destruction. Daniel spent no time with material reasoning but serenely and steadfastly reasoned with Principle. He knew that, no matter what seemed to be, the activity of Truth was in operation, and he proved it beyond a doubt. On page 514 of "Science and Health with Key to the Scriptures" Mrs. Eddy says, "Moral courage is 'the lion of the tribe of Juda,' the king of the mental realm." This spiritual idea is the only lion which Spirit, God, knows anything about and it is indestructible, eternal, and continually governed by spiritual law. Mortal mind might try to reverse the divine idea and call it a destructive, ravenous beast but to one who understands spiritual creation a lie about God's creation cannot even seem real. The Bible record shows that proving Principle was a joyous experience, for there was certainly great gladness and love expressed in Daniel's answer to King Darius: "O king, live for ever. My God hath sent his angel, and hath shut the lions' mouths, that they have not hurt me." He proved that Principle never ceases to operate to save and bless even one's enemies. These words have rung down the centuries, giving strength and courage to all, proving that no circumstance is beyond God's loving care when rightly interpreted. Mrs. Eddy confirms this conclusion when she says, on the page already referred to: "Understanding the control which Love held over all, Daniel felt safe in the lions' den, and Paul proved the viper to be harmless. All of God's creatures, moving in the harmony of Science, are harmless, useful, indestructible. A realization of this grand verity was a source of strength to the ancient worthies. It supports Christian healing, and enables its possessor to emulate the example of Jesus. 'And God saw that it was good." As one displaces the mortal sense of things with the spirituality of the one true consciousness, creation will be found wholly good. Whether it be called rock, beast, or star, the spiritual idea manifesting the pure, perfect qualities of the one Mind, without an element of inharmony, is all that is true about anything.

The understanding that God's creation is wholly perfect, continually expressing the divine nature, underlies all Christian Science healing. If one believes that he is suffering from a so-called disease caused by a harmful germ, could one possibly suffer longer if he knew that the only germ there is is the germ of Truth, testifying continually to divine Love, always constructive, not destructive? The understanding of this fact is bound to heal one. Paul understood this spiritual fact of creation so thoroughly that the serpent's bite could not even alarm him. He knew serpent as spiritual idea expressing Love and imparting only love. Spirit being the only cause, the effect must invariably be spiritual. Mrs. Eddy exemplifies this on page 515 of Science and Health where she says, "The serpent of God's creating is neither subtle nor poisonous, but is a wise idea, charming in its adroitness, for Love's ideas are subject to the Mind which forms them,-the power which changeth the serpent into a staff."

The confident knowing that idea is forever expressing the one perfect action of the divine Mind is the sure healing for any so-called discordant action. God being the only creator, all creation is expressing the qualities of the creator, and is directly controlled by spiritual law. The destruction for so-called trouble of any kind is the sure knowing that Mind and its idea is all that is true in place of the supposed discord. Mind always sustains and governs its own pure and perfect idea. Idea is forever rejoicing in perfect, harmonious action, reflecting the one creator. Willingness to

reason with Principle concerning every situation is fraught with infinite blessings. It spiritualizes thought and action, unfolds the one perfect universe as ever present and supremely good. The dark places in human experience are lighted by "the Sun of righteousness" "with healing in his wings." It enables one to replace every material concept of creation with spiritual reality and find the manifestation of Spirit in its purity and beauty right in the very place where mortal sense declares a perishable, material object or flesh and blood creation. It reveals the new heaven and the new earth as present here and now as it was revealed to John, and one hears the same great voice out of heaven (harmony) proclaiming, "Behold, the tabernacle of God is with men, and he will dwell with them, and they shall be his people, and God himself shall be with them, and be their God. And God shall wipe away all tears from their eyes; and there shall be no more death, neither sorrow, nor crying, neither shall there be any more pain: for the former things are passed away."

Mrs. Eddy fully elucidates this eternal fact in Christian Science and shows clearly that it is entirely a spiritual process of reasoning, that it is possible for every man to attain here and now. Under the marginal heading, "Man's present possibilities," she writes on page 573 of Science and Health: "The Revelator was on our plane of existence, while yet beholding what the eye cannot see,that which is invisible to the uninspired thought. This testimony of Holy Writ sustains the fact in Science, that the heavens and earth to one human consciousness, that consciousness which God bestows, are spiritual, while to another, the unillumined human mind, the vision is material. This shows unmistakably that what the human mind terms matter and spirit indicates states and stages of consciousness." Illuminated spiritual consciousness is all the consciousness there truly is. As a man steadfastly reasons on the basis of Principle he replaces the corporeal sense of heaven and earth with spiritual reality and finds scientific spiritual consciousness as omnipresent.

"It is finished"

MARGUERITE MORRIS HAWKSLEY

IN the first chapter of Genesis we read, "And God saw every thing that he had made, and, behold, it was very good." This is the underlying, all-pervading fact of creation, the unity of good. Jesus the Christ knew this as no one had ever known it before and therefore he spoke "as one having authority, and not as the scribes," who believed that evil was as real, and therefore as powerful, as good.

To Jesus the meaning of the words, "It is finished," had all the depth and beauty of a positive truth, which nothing could reverse, alter, or deny. God's work is finished and it is very good. Jesus knew there could only be one great First Cause, and that causation was positive and divine, that effect therefore must be positive and divine. This standpoint enabled him to claim the unity of good persistently and triumphantly. He knew what our Leader, Mrs. Eddy, knew, when she wrote in "Science and Health with Key to the Scriptures" (p. 304), "This is the doctrine of Christian Science: that divine Love cannot be deprived of its manifestation, or object; that joy cannot be turned into sorrow, for sorrow is not the master of joy; that good can never produce evil; that matter can never produce mind nor life result in death." When the false witness, corporeal sense, declared that Bartimæus was blind, Jesus, knowing that God, divine Love, alone was causation, and

that God had said, "Let there be light," and that there was light, said to the blind man, "Go thy way; thy faith hath made thee whole," and immediately Bartimæus received his sight. Had Jesus for one moment thought that God's work was unfinished, imperfect, or marred, he could never have destroyed the false testimony which denied the unity of good. Jesus said, "I knew that thou hearest me always," and he raised Lazarus from the dead, healed the sick, and forgave the woman taken in adultery. He saw always what his heavenly Father saw, "and, behold, it was very good," the finished, perfect product of divine intelligence.

No amount of sense testimony that might try to reverse effect or to separate it from cause could ever deceive Jesus. He claimed man's oneness with God, and declared, "The Father that dwelleth in me, he doeth the works." absolutely repudiated all suggestions of separation from God. He knew that Truth is absolute, almighty, divine, omnipresent substance, against which no false witness can prevail. The only separation he acknowledged was the separation of creation from all sin, sickness, and death. It was because of this wonderful understanding of Truth which Jesus possessed that he could say when on the cross, "It is finished." He knew before he entered the tomb that Life alone is real and can never be negatived, that Love, the great First Cause, has never created anything capable of destroying Life. He knew that Life is God, and because he dwelt in the bosom of God, because he clung persistently, honestly, and tenaciously to the unity of good, and refused to believe suggestions which would belittle the divine nature, he came forth triumphant from the tomb. "His disciples believed Jesus to be dead while he was hidden in the sepulchre," Mrs. Eddy writes on page 44 of Science and Health, "whereas he was alive, demonstrating within the narrow tomb the power of Spirit to overrule mortal, material sense. There were rock-ribbed walls in the way, and a great stone must be rolled from the cave's mouth; but Jesus vanquished every material obstacle, overcame every law of matter, and stepped forth from his gloomy resting-place, crowned with the glory of a sublime success, an everlasting victory."

We, as students of Christian Science, are filled with gratitude to Jesus for his fidelity to Truth, and we are grateful also to Mrs. Eddy, who meekly and lovingly followed in his footsteps. In humility and obedience Mrs. Eddy listened always to the still, small voice of Truth, and was enabled through the mighty power of God to found the Christian Science movement and all its activities. She, too, clung to the fact of creation, "It is finished," and waited for the unfoldment of good. She knew the light of divine Love could dispel all the darkness of materiality. Her books were written, her church was built, her periodicals were founded in accordance with divine wisdom and Love. She, too, dwelt in the bosom of the Father, in the understanding of the unity of good; and knew the substance of Truth. She taught her followers the same broad-minded tolerance which Jesus taught his disciples. In the ninth chapter of Luke we read, "And John answered and said, Master, we saw one casting out devils in thy name; and we forbad him, because he followeth not with us. And Jesus said unto him, Forbid him not: for he that is not against us is for us." He knew that man's homage and obedience are due to divine Principle, Love, and not to personality, that man must follow the light of divine intelligence, not personal opinions. This is the "friend that sticketh closer than a brother," the friend who never fails us, never forsakes us, the friend who knows the infinite goodness of God, and the infinite goodness of man as God's reflection.

The still, small voice still speaks above the seeming tempest of false beliefs, malice, and hate, "And God saw every thing that he had made, and, behold, it was very good." "Thus the heavens and the earth were finished, and all the host of them." Can anything undo the work of infinite intelligence? The efforts of error to disturb, pull down, or destroy the work of wisdom and Love, must always be utterly futile. We, too, must try persistently to realize, as Jesus did, that man dwells in the bosom of the Father, in infinite good; and when the storms of criticism and hatred seem to rage around us, we can cling to the truth about God and man, and trustfully say, like little children: I know that Thou hearest me always.

"The Father hath sent me"

OLIVER BOWLES

CERTAIN earnest students of Christian Science have found some difficulty in reconciling the thought of a God who knows no evil with the statement of Scripture that God sent Jesus into the world to redeem the world from sin. Specifically stated the question is: How could God send Jesus to redeem mankind from sin if He knows nothing of sin? It is highly desirable that such students should read and study that part of "Unity of Good," by Mary Baker Eddy, entitled, "The Saviour's Mission" (p. 59). In connection with this study it may be helpful to direct thought toward the nature of the call that came to Jesus, and its divine authority.

Jesus repeatedly stated that the Father had sent him. This is particularly in evidence in the fifth chapter of John, where the definite statement is made six times. It is plain, therefore, that Jesus wished to emphasize the divine nature of his mission. It is important to note, however, that this was not a unique experience, for, while Jesus heard and understood the divine call more clearly than all others, a commission to bear important messages to mankind was bestowed also upon the ancient prophets. Jeremiah heard the call, "Thou shalt go to all that I shall send thee, and whatsoever I command thee thou shalt speak;" and the voice of God came to Ezekiel, proclaiming his mission to the children of Israel, saying, "I do send thee unto them; and thou shalt say unto them, Thus saith the Lord God." These, and other holy men thus inspired with a vision of a message they were impelled to proclaim, were the beacon lights that pointed the way to a clearer understanding of God and enabled humanity to grasp in some measure the fuller revelation which Jesus brought. Furthermore, the divine commissions were not confined to the time of Jesus and earlier periods. His followers who carried on his work were likewise inspired with the call to noble service. The word of the Lord that came to Ananias concerning Paul was, "He is a chosen vessel unto me, to bear my name before the Gentiles, and kings, and the children of Israel;" and Paul himself said, "For Christ sent me not to baptize, but to preach the gospel."

A remarkable number of the outstanding figures in all Biblical history were messengers or heralds of the truth. What was the secret of their selection? Were they chosen arbitrarily, as soldiers in the ranks are sent forth to various duties? The Bible clearly teaches that the mantle of divine prophecy, pointing the way of salvation, falls only upon those who have the vision to see it and the understanding to apply it. Was the word of prophecy sent only to Isaiah,

Ezekiel, and the other noble seers? The world was filled with the voice of God, divine Principle, but they alone heard it. Were Jesus and his immediate disciples the only ones to whom God sent the impulse to spread abroad the gospel of healing from disease and sin? The hills and valleys of Palestine reechoed with the healing message, but the ears of the multitudes were so filled with the discordant tones of material living that they heard not the call. The messengers were not arbitrarily chosen. The cry was to all who had ears to hear, but only those who had attained some degree of spiritual insight heard the call, and delivered the message upon which all civilization and Christianity now rest.

What was the essential character of Jesus' mission? In speaking of his wonderful works Mrs. Eddy states in "Science and Health with Key to the Scriptures" (p. 26), "His mission was to reveal the Science of celestial being, to prove what God is and what He does for man." It was the unquenchable impulse to prove the power of God and to enable others to prove it for themselves. Such an impulse is quite independent of any knowledge of sin, for it originates in heaven, harmony, and transcends all mortal belief. On page 584 of Science and Health it is stated, "The objects of time and sense disappear in the illumination of spiritual understanding, and Mind measures time according to the good that is unfolded." Error stands in the way of this unfoldment, and therefore error is destroyed; but the divine call for progressive growth in the knowledge of God, and the demonstrations that result therefrom, are no more dependent on a knowledge of sin than the reflection and refraction of light depend on any phase of darkness. The call of Principle is not only a cry to save the world from sin but it is the impulse directing attention to spiritual good, that all may behold and understand more and more clearly man's innate perfection and abide in the joy and comfort of that consciousness. Through obedience to that call, seeming inharmony, sin, and distress are destroyed simply by unseeing them, but such overcoming is a mere incident in an infinitely broader program of spiritual unfoldment. The Bible speaks, in figurative language, of the voice of God urging patriarch and prophet to bear the message of Truth against error, but what was that voice but the ever present stimulus to spiritual progress to higher and higher levels of attainment, a voice which the materialist hears faintly, but which grows in intensity as the ear becomes attuned to spiritual tones?

A still broader interpretation, however, must be given to this call which Jesus heard in its fullness, and which was heard more or less distinctly by his heralds and his followers. It sounds to-day. Its voice is insistent and its appeal is to all. Jesus surely recognized that the call was not to him alone but to his followers also, for he said, "As my Father hath sent me, even so send I you." Our Leader, Mary Baker Eddy, received the call as surely as any of the ancient prophets. In the Preface to Science and Health (p. xi) she has stated, "When God called the author to proclaim His Gospel to this age, there came also the charge to plant and water His vineyard." Her task was to present the further unfoldment of the truth in such a form as this age was ready to receive. She heeded the call and wrote the textbook which has brought to thousands healing from sin, inharmony, and physical disability.

The divine call takes on a new significance in the light of its applicability to all mankind. We can all hear the call if we but listen, and the proof of our obedience to it is the evidence we can give of practical accomplishment. Jesus said, "The same works that I do, bear witness of me, that

the Father hath sent me." This statement is very significant, for it indicates that Jesus regarded his works as proof of his obedience to the call of Principle. By the same token the healing of all manner of sin and sickness is evidence that our Leader also obeyed the heavenly call. Can we likewise give proof of our obedience? Even the smallest demonstration over inharmony in one's self or others is a proof that at least an echo has been heard of the call of God to bear witness to the power of Truth. A recognition of the fact that practical demonstration over any claim of inharmony is proof of our obedience to a universal call which far too few have unstopped their ears to hear, surely provides inspiration for further effort. It gives a new dignity and honor to every thought or act that helps a neighbor toward a clearer vision of reality, for it enables each one to say with humility and gratitude, and at the same time with a sense of deep responsibility, the same words that Jesus uttered, "The Father hath sent me."

[Written for the Sentinel]

Service

Whatsoever thy hand findeth to do, do it with thy might.-Eccl. 9:10.

GERTRUDE GOODING MC CLOUD

FATHER, what is Thy will for me? How may I serve the best for Thee? Shall I go forth to seek my task, Or is my work at hand, I ask.

Shall it be just the loving labor
Of serving home, or friend, or neighbor?
Or shall I try the loaf to leaven
Of mortal mind, with thoughts of heaven,
As I meet those whose thoughts are bound
To things of earth, as yet uncrowned
By knowledge of their heav'n-born right,
As sons of God, to reach the height
Of proving now, to-day, and here,
That God is All, and ever near?

Shall I write words to calm and bless
Those who are tired of earthly stress,
Who search for Truth, from page to page,
Truth's sentinel to this our age?
This is my prayer, dear God, to Thee.
And lo! Thy answer comes to me:

"Each day I send each child his work; He must be faithful, must not shirk. Each has a duty to perform Whether it be in sun or storm. Each day will bring its meted task To all who listen, when they ask, To the demands of Love and living; Who of their own true selves are giving To the redemption of mankind, As demonstrations of one Mind."

Therefore, to-day may send one thing
For me to do, another bring
Another: whether great or small,
It is my work, my Father's call.
Always the tasks God gives to do
With thoughts of joy and love imbue,
And I can rest content to know
God's will is done on earth below
E'en as in heav'n, and I my part
May have, and serve with all my heart.

On the Damascus Road

Law is irreversible. The mere fact that a thing is reversible proves it not to be law. That is exactly what Principle was saying to Paul on the day, when journeying from Jerusalem to Damascus, he heard the voice which said unto him, "It is hard for thee to kick against the pricks." Kicking against the pricks is, indeed, an occupation to be avoided. Therefore, it is well for men to learn what law is, and to strive to be obedient unto law. Until they do this, they are destined to a perpetual conflict with Truth, a conflict in which they must inevitably be worsted. The wise man realizes this, and endeavors industriously to put his house in order. For his house is simply the consciousness in which he dwells, and this consciousness will be spiritual or material, in accordance with his ordering of his thoughts.

What, therefore, a man thinks is the thing that matters, and this for the very simple reason that what he thinks is what he does. Every act must be thought before it can be given effect to. Therefore, it is the daily guarding of his thought which constitutes the protection which makes it impossible for temptation or suggestion to appeal to him. To say, then, that Spirit is all, and to act as if matter was all, is to make plain your disbelief in your own premises. No person who really knew that Spirit was all would put himself in the position of denying Spirit by acting unnecessarily materially. Of course, it is only little by little, as the individual grasps the meaning of the allness of Spirit, that he is able to order his thought, and consequently his life, so as to demonstrate his increasing understanding. "To stop eating, drinking, or being clothed materially," Mrs. Eddy writes, on page 254 of Science and Health, "before the spiritual facts of existence are gained step by step, is not legitimate. When we wait patiently on God and seek Truth righteously, He directs our path. Imperfect mortals grasp the ultimate of spiritual perfection slowly; but to begin aright and to continue the strife of demonstrating the great problem of being, is doing much." The aim of the individual, then, is to put off the carnal mind as quickly as may be by demonstrating the fact that the only Mind is the Mind of Christ. But when once this admission has been made, it is inadmissible to give more thought to matter than is temporarily inevitable. And so the battle with the flesh begins, the individual's daily effort to take up the cross, the denial of matter, and to walk in the footsteps of the Christ.

It is here that the futility of kicking against the pricks becomes so apparent. If Spirit is the only reality, then every unnecessary surrender to matter is just this kicking against the pricks. "Christ, Truth," Mrs. Eddy writes, on page 442 of Science and Health, "gives mortals temporary food and clothing until the material, transformed with the ideal, disappears, and man is clothed and fed spiritually." Whilst a man is learning the whole lesson, it is necessary for him to eat and drink materially, but it is not necessary

for him to endow this eating and drinking with sensuous gratification. Doing so is obviously kicking against the pricks, and can only delay his own progress and add to the material troubles already surrounding him. The example is just one indication among many of the way in which the individual is tempted, by mental suggestion, to make his own way more difficult. Christ Jesus said, "Judge righteous judgment." Now this judgment is just the ability to separate the spiritual from the material, and the failure to judge this righteous judgment, to separate the material from the spiritual, and to reject the material, is kicking against the pricks. Sooner or later this righteous judgment has to be judged, and the only way for the individual to prepare himself to sit in judgment is by the persistent effort to understand and to live in accordance with Principle.

Now, in judging righteous judgment a man must stand on his own demonstration of Principle. To accept the judgment of another person is simply to run the risk of being led by the blind, and falling into the ditch. Another person may tell you what he thinks, but this will never absolve you from judging for yourself. For that reason the wise man will refuse to judge for you; he will tell you that you, like himself, possess reason, and that this reason you must rely upon to guide you. "Reason," Mrs. Eddy says, on page 327 of Science and Health, "is the most active human faculty." But it is only this because it is directed by Principle. When the passions of the human senses produce any result, it is a result not of reason but of material unreason. It is this human belief of reasoning that urges its victims to kick against the pricks. In other words, any surrender to the passions of anger, prejudice, hatred, dislike, misrepresentation, or ignorance, is not the consequence of true reasoning, but is the result of a material outlook susceptible to the suggestions of animal magnetism.

The only way, then, for any person to make sure that he is keeping to the narrow road, instead of plunging along the broad way, is through his own demonstration. The determination to know that Principle governs, and to destroy every fraction of materiality in doing this, brings the individual face to face with his ability to prove Truth. The result may not be what he wishes, may not even be what he thought it would be, but to repudiate that result is to repudiate his own appeal to Truth, and to kick against the pricks in a blind access of passionate resentment against Truth appearing in an undesired guise. It is hopeless for the individual to attempt to outline Principle. It is worse than hopeless to decide what Principle requires, and then to set to work to accomplish this requirement. It is only possible to know that Spirit is the only reality, and that Truth alone governs. If this is done with entire sincerity, then the operation of law will become manifest, and the journey from Jerusalem to Damascus will be avoided.

If, on the other hand, the journey is made, it is safe to say that the traveler will regret it. As the days go by, he will learn the mistake he has made, and he will learn something else: that it is impossible to pursue a wrong course without being compelled to retraverse your footsteps. But retraversing your footsteps takes time, and is painful as well. Indeed, if you have gone far enough in the wrong direction, the journey back may be an extremely difficult one. It is impossible to fill your mind with false arguments, and to buttress these with mere efforts of will, without so confusing your power of judgment as to find it increasingly difficult to judge righteous judgment. Then, when the occasion comes, your demonstration is likely to fail. It was precisely because Christ Jesus was without sin, that he was

able to make his journey without ever faltering or retracing his steps. No matter how fierce the temptation, he was equal to it; no matter what the danger might seem, he feared it not. He knew the power of righteousness, and the hopelessness of the position of the man who fought against it. And so the warning never had to come to him as to Paul, on the Damascus Road, "It is hard for thee to kick against the pricks."

FREDERICK DIXON.

Building

From the tower of Babel and the temples of Egypt to the mansions and skyscrapers of to-day material building has seemed difficult, because it represents a human concept of permanence that is impossible. Delays and discords in the process of building always come from mortal mind's aim to imitate the constructive unfoldment of Principle. If building is to be successful there must be a change in the mental attitude toward it, and this change must, sooner or later, come about through the understanding of Christian Science, which shows what the true idea of building is in place of the counterfeit. The real structure is not a mass of stone, steel, and other earthly materials that may last only some hundreds or thousands of mortal years, but is the eternal idea in Mind.

A material building, whether it be a house, an office building, a museum, or a church, is of no real value in itself, for matter in all its phases is only belief in supposititious mortal mind. It is the divine intelligence which the true idea of building manifests that counts. As Mrs. Eddy says on page 162 of "The First Church of Christ, Scientist, and Miscellany," "Our proper reason for church edifices is, that in them Christians may worship God,-not that Christians may worship church edifices!" The material building is a temporary human means which should be a useful, beautiful, and simple structure, not calling special attention to itself as a thing of matter, but turning thought to divine intelligence and its expression. It succeeds in fulfilling its purpose in proportion as the sense of materiality is subordinated rigorously to the understanding of Principle.

From its very nature mortal mind prefers destruction to construction, for mortal mind itself is the suppositional opposite of the only constructive power there is, the divine Mind. That is why the suggestions of discord and delay appear in the midst of a process of building. Mortal mind dislikes true permanence and stability, which, as the manifestation of Principle, must inevitably reduce mortal mind and its beliefs to nothingness while replacing them with the true idea. Thus mortal mind revels in the destructiveness of war and is reluctant to accept the constructive activity of peace as necessary. The settling down to constructive work, including the wise building of what is nearest right in any circumstances, is insured only by the understanding that the divine Mind always has been unfolding and always must unfold as spiritual idea, which alone is truly substantial and durable.

The realization that infinite Mind is actually manifest now as real shelter, beauty, dignity, and utility generally, is what demonstrates the presence of all that is necessary. The consciousness of the spiritual fact satisfies as no seeming possession of a material structure could ever satisfy. That is to say, the material building without spiritual understanding must in the end come to ruin, as in the case of the tower of Babel, while spiritual understanding, the idea in Mind, remains the true temple which manifests the glory

of Principle. As this is demonstrated to be eternally unfolding, the human result is that a belief in lack of building or trouble in building disappears. The sense of obstruction is replaced by the irresistible activity of divine Love, tangibly manifest in just the way for all to understand. In connection with the building of a church Mrs. Eddy once wrote (The First Church of Christ, Scientist, and Miscellany, p. 195): "The praiseworthy success of this church, and its united efforts to build an edifice in which to worship the infinite, sprang from the temples erected first in the hearts of its members—the unselfed love that builds without hands, eternal in the heaven of Spirit. God grant that this unity remain, and that you continue to build, rebuild, adorn, and fill these spiritual temples with grace, Truth, Life, and Love."

All this which is true of church building is likewise true of any other constructive work. In the building of a house, for instance, it is necessary for one to know that infinite Mind is unfolding harmoniously as spiritual idea, for without this understanding the material work has not the permanent unction of divine Love expressed. The arguments of lack of money, lack of materials, and lack of competent labor must be rejected, on the basis that divine Principle inevitably supplies and sustains all right activity. The supply of intelligence is spiritual confidence, energy, and success. The real man, endowed with every right quality by infinite intelligence, has boundless opportunity for unfoldment, and is equal to every demand made upon him by the one creating Mind. As the understanding of this truth takes the place of mortal mind's belief that there is a reason for delay and inertia, the proof of Principle is manifest in exactly the right way. It is impossible to outline humanly what this right way is to be, for the way of Mind is infinite and quite apart from human concepts. In considering the subject of building, therefore, the work of a student of Christian Science, whether he be an architect, a contractor, a day laborer, or an owner, is to be active in knowing that the perfect idea in Mind is the present and sufficient reality, in spite of all the false human beliefs about building. Thus he can prove that the right unfoldment goes on through the very midst of human obstacles, for he is using the infinite wisdom of which the builders of Biblical times caught some glimpses. The accounts of building given in the Bible show us what true constructive work is, in proportion as we discern the spiritual idea of Principle as recorded in the historical accounts. The absolute fact is that true building never has been interrupted or diminished, because it is the unfoldment that ceaselessly continues in consciousness.

GUSTAVUS S. PAINE.

[Written for the Sentinel]

Dawn

B. CARTER

Opening eyes behold the glory
Of the things Love has prepared;
Listening ears attend the story
By the might of Mind declared;
Alleluia! Dreams are ending,
Truth has dawned, and in its light
Thought, on joyful wing ascending,
Sheds the terrors of the night.

Calm and glowing in reflection, Knowing only fadeless good, Man stands forth in full perfection; Principle is understood!

Testimonies of Healing

In the second year of the world war, while standing on a street corner in a mental attitude of mistrust,—mistrusting everybody, even myself, having a fear of becoming a cripple, homeless and penniless, haunted with cowardly suicide thoughts and pronounced by doctors incurable,—I saw a sign stretched across the two sides of the street, advertising a free lecture on Christian Science, in the Municipal Building. I went in when the lecture was about half over and was one of the first to leave. A lady, noticing that I had refused free literature, asked me if I were interested in Christian Science. I answered in the negative, but she induced me to take some of the literature.

I was an atheist, and at my marriage I would not consent to have any minister or priest of any religion perform the ceremony, and my children were forbidden to go to any Sunday school of any religion. One testimony in the Scntinel seemed to impress me very much, but with the thought that my case was hopeless I felt I could prove Christian Science powerless. In leisure hours I went to the public library and found a copy of Der Herold der Christian Science. I knew I had to give Christian Science a fair trial and put it to a test, so I went to a reading room and borrowed the German edition of Science and Health. After the close of the first Wednesday evening testimony meeting which I attended I was advised to go to a practitioner. Never can I forget how I felt after my first visit. I had become a different man, I had found new hope, and it has been rising steadily.

Chronic catarrh of thirty years' standing, and the smoking and drink habits have disappeared. An abscess which I thought would necessitate my going to a hospital the next morning healed almost overnight. A better and healthier life is manifested in our home; the grandchildren go to Sunday school. My gratitude to Mrs. Eddy for Christian Science and for gaining the understanding that God is Love, the only adorable One, is indescribable. It is my desire that this may reach some seeker in the desert and help him to see that, as Mrs. Eddy says in Science and Health (p. 494), "Divine Love always has met and always will meet every human need."

RICHARD F. RABE, Yonkers, New York.

4

When I first began the study of Christian Science it was not with a view to physical healing, for I was accustomed to accept as inevitable a general ill health which was not extreme enough to interfere seriously with work, but was a constant discomfort. Heavy colds, lasting sometimes six weeks, which resulted in doctors' visits and warnings to beware of tuberculosis, had been lifelong and had become increasingly severe. A symptom of the dreaded disease which is usually considered cause for alarm was immediately healed by treatment from a relative who had just begun the study of Christian Science. Later, as the result of one treatment from a practitioner, I became convinced of the existence of God, and the reading for the first time of the New Testament narratives brought a revelation of the truth of Christian Science which became from that moment the one great interest of life, my outlook being transformed. What struck me very particularly was that after that one treatment in which God became a reality to me, the habit of smoking, acquired as the result of a doctor's advice to smoke one cigarette a day for indigestion, left me. Naturally I had not kept to one cigarette a day, but had grown

to smoke more than I thought was good for me, and my efforts to stop by means of will power had been unavailing. The practitioner did not know that I smoked until I told him the next day that the desire had left me. I was very conscious that the change came hand in hand with a peace I had never known before. I have never since had the least temptation to smoke and my idea of what constitutes pleasure has completely changed.

I had often tried to read the New Testament, being frequently urged to do so by friends who were anxious that I should not miss its literary beauty, but I could not read it even in that way. Every time I came to a healing I rebelled against reading a narrative purporting to be true but which seemed to conflict with experience and of whose truth I had no evidence. Christian Science told of healings which it was possible to investigate and this I still wished to do, even after I had had the truly wonderful experience of reading the gospels for the first time in the light of Christian Science. I got from a medical man a list of diseases which he assured me I would never find healed by Christian Science. With his list I approached Christian Scientists and they helped me to get in touch with people who had been healed of these very diseases. The investigation made it very clear to me that there was sufficient evidence that healings of incurable disease occurred through Christian Science now, as they did in Jesus' time. At the same time I was beginning to discover that a much more satisfactory way of gaining evidence was to learn to do the healing work one's self. I also received proof when the first of the dreaded colds to appear was healed overnight. My teeth, which had been very poor, became exceptionally good, and though I continued to visit the dentist, the intervals became longer and longer and there was very little or no work to be done when I did go. A slight deafness in one ear, which increased, was followed by the appearance of a painful lump in my throat, and fear became acute. I asked a practitioner for help, and about half an hour later the lump disappeared and, to my great joy, the hearing began to improve and continued to do so until it was normal. I have had much to be grateful for since I first opened "Science and Health with Key to the Scriptures" by Mary Baker Eddy, and have received much help from the testimonies of others in the periodicals. I am grateful for all of the activities which Mrs. Eddy instituted and perhaps especially so for the periodicals, which, besides giving one a sense of fellowship with members of a world-wide interest, often throw the light of understanding on the solution of the problems of life which are common to all.

(Miss) IGERNA B. J. SOLLAS, Oxford, England.

Through the study of Christian Science and the aid of faithful, patient Christian Scientists, and the help of our periodicals I have been delivered from many discordant conditions. I subscribed for the Monitor and Sentinel several years ago, and last year I felt I must also have the Journal. At that time I was holding a temporary position in one of the government departments in Washington, District of Columbia, and although friends were trying to have it made permanent, there seemed to be very little hope, but I clung to the little hope held out to me, and tried to know that my right place would be revealed to me. Afterwards, however, I knew I had only been outlining that my right place should be a government position, for when I was finally told that they could not retain me, I was as one without hope, and pride and fear took hold of me. I wondered how I could ever tell my friends, and there was one

family in particular that I said I would not tell if I could possibly help it.

I even shrank from going to the practitioner who had helped me so much, for error argued, "What more can be said?" On my way home I began to slowly wake up, and tried to recall some helpful thought. Then I remembered that the practitioner had so often told me to rejoice, but I only said to myself that this was the hardest thing I had ever been given to do. How could I rejoice when everything looked so dark and hopeless? But something seemed to whisper, "You can at least say the word." I began doing this, and very soon this verse came with healing to my troubled thought, "Thou wilt shew me the path of life: in thy presence is fulness of joy; at thy right hand there are pleasures for evermore." This was Saturday evening, and on Monday evening I went to the practitioner, and I found there was something more to be said. I came away greatly strengthened and comforted. On the following Monday evening the very friend whom I had felt I could not tell of my distress, called me over the telephone and told me of a position in one of the banks of the city, and advised me to go the next day and see about it. This I did, and the following Monday I went to work there. I am very grateful for Christian Science, and to all who have helped me.—(Miss) HATTIE A. McGeorge, Fort Myer Heights, Virginia.

Our two young sons lay ill with scarlet fever. We tried to realize, to the best of our understanding, God's love and omnipresence, but as on the third day the fever was greatly increased, we wrote to a Christian Science practitioner for treatment and the following night the fever had entirely disappeared and there were none of the usual after effects. We gratefully acknowledge this blessed and healing experience and thank God sincerely for His help, and we are grateful to those who through a better understanding of this teaching are making it clearer to us.

(Mrs.) Marie Stahli-Trittibach, Bern, Switzerland.

I am very glad indeed to testify to the efficacy of Christian Science. During the time in which I have been actively studying and seeking the truth as taught in Christian Science, I have received many blessings. A chronic internal trouble of long standing, which physicians had given up saving that only an operation could benefit and

given up, saying that only an operation could benefit, and which at times was intensely painful notwithstanding the strongest material remedies, has been entirely overcome. I can truly say that when I have faithfully, consistently, and persistently applied this knowledge of Truth, it has met my every need. Christ Jesus, the Way-shower, said, "If ye continue in my word . . . ye shall know the truth, and the truth shall make you free." Words are inadequate to express the gratitude I feel for this truth as revealed in Christian Science. I can only hope to let my daily living

(Mrs.) BERTINE L. STEERE, Palo Alto, California.

A few years ago I was confronted with a very difficult situation due to complications brought about by war conditions. While working earnestly on the problem, with the help of a practitioner, it came to me very clearly that the use of tobacco was not in keeping with what I was trying to demonstrate in Christian Science. With this realization, all desire for smoking entirely left me, although up to this time I had smoked for many years. I am also happy to say that this same clear realization of Truth has cleared

up my other problems in a most satisfactory manner. The understanding I have gained of the one infinite Principle, Life, Truth, and Love, has enabled me to meet the daily problems in business with the utmost confidence. In fact I have found Christian Science an ever present help in times of need.

I am very thankful indeed for the many benefits I have received through the knowledge I have of Christian Science, and I wish to send my testimony, trusting that it may be of some benefit, for the words from a hymn in the Christian Science Hymnal often come to me (No. 86),

Ceasing to give, we cease to have, Such is the law of love.

I have found that the more we give, the greater is our supply.

Collis Huntington Steere.

4

For some years I have had the privilege of enjoying and being helped by the many earnest and convincing testimonies of healing which I have read in the Christian Science Sentinel and Journal. Many times have they been just the inspiration and encouragement I seem to have then needed, so that it is natural that I should desire to add my words of gratitude for all that Christian Science has been to me, and my daily appreciation of its ever present power to bless.

Having been brought up from early childhood under material medicine, and having "suffered many things of many physicians," I naturally hailed with interest the first mention of Christian Science, which came to me through a friend who was not a Christian Scientist and did not know much more about it than the mere name but who was interested in my welfare and asked why I did not try it. I had always been very devoted to religious subjects and had been a member of a denominational church since girlhood. I grasped with delight the idea of seeking Christian Science help, not in the least knowing what it stood for but having a vague sense that it had something to do with The old teaching did not give me what I was religion. seeking, "the peace of God, which passeth all understanding," and I was discouraged, yet I clung to my blind beliefs, while constantly longing for a larger understanding of God and the Scriptures. The first glint of Christian Science into my thought brought a sense of mental disturbance, which I did not then realize was "chemicalization," but this was followed by such a sense of joy as I had never known before, making the daily unfoldment of the truth a continual feast and blessing. I shall never forget the wonderful feeling over my first demonstration when I was a very young student of Christian Science. The memory of it has been most helpful to me during these many years of progress, encouraging me when in doubt, and giving me a clearer understanding of Christian Science.

I was subject to many attacks of the grip which usually kept me in bed for many days before recovery was considered sufficient to allow me to be about again as usual, making the period of convalescence almost as unpleasant as the disease. While experiencing one of these attacks I sat down to dinner one day and during pauses in the conversation was deep in thought, trying to gain a clear understanding of the divine power that heals. It came to my thought quite suddenly that God never made sickness and that this disease had nothing to do with me in any way, and that because God could not be sick, man, His image and likeness, could not be. The vision of Truth was so clear that I arose from that table healed, fever gone, aches and pains vanished, and no time to be wasted on convalescence, for there

31

CU:

31

remained nothing from which to recover. How truly that Scriptural sentence was then fulfilled, "The word of God is quick, and powerful, and sharper than any twoedged sword." That instantaneous healing, which was my first real proof that Christian Science heals quickly, filled me with joy and gratitude, especially when I felt that I was free from the bonds of material medicine. I have been healed of many ills since that first glimpse of Principle and have also been able to help others in some ways. In ways too numerous to mention have I and my household been sustained, protected, and blessed, through trials of illness and sorrow, by Christian Science, which teaches us that God is ever present and that our needs are met.

I do so thoroughly appreciate Mrs. Eddy's consecrated work in giving to us our textbook "Science and Health with Key to the Scriptures" and all her other writings, as well as the Journal, Sentinel, and Monitor. Especially do I love the Monitor, for that paper has been more to me than I can express. It comes to me daily before my breakfast, so that it is veritably my morning meal and I find in its pages food for thought and encouragement, and have an earnest desire to share the paper with others. "Oh that men would praise the Lord for his goodness, and for his wonderful works to the children of men!"—(Mrs.) Mabel Wheeler Train, Brookline, Massachusetts.

202

In the forty-second chapter of Isaiah we read: "I will bring the blind by a way that they knew not; I will lead them in paths that they have not known: I will make darkness light before them, and crooked things straight. These things will I do unto them, and not forsake them." This is what Christian Science has done for me from the very moment I first sought a practitioner for physical healing. I could tell of many healings and of much that has been overcome in ridding my thoughts of things that claimed to be a part of myself, but I want particularly to express my gratitude for the knowledge of God as Love, and always at hand to aid us in every difficulty.

During the war I lived in an apartment with a lady who was having medical treatment for the same physical disorder that brought me into Christian Science. At this time I had been a student of Christian Science for only a few months and as the memory of the suffering had not been completely erased I feared that I might again come down with the disease, and did not at that time know how to protect my thought. One night after letting the physician out of the apartment, I went to my room so filled with fear that I started to call for help and then decided that I would seek the help which was right at hand, for I knew that God's help was just as available to me. I picked up my Bible and offered up an earnest prayer to be guided in what to read to heal me of the fear of making a reality of that inharmonious condition. I opened to the fifth chapter of Galatians, and my eyes fell upon the first verse: "Stand fast therefore in the liberty wherewith Christ hath made us free, and be not entangled again with the yoke of bondage." As I am the daughter of a physician the word "bondage" meant much to me, and no one but those who have had a similar experience can understand the joy, assurance, comfort, and calmness with which I closed my Bible and made my preparations for bed, knowing that all I had to do was to "stand fast." My need was met.

I am grateful for membership in The Mother Church, and in a branch church, for class instruction, and for what our Leader has done and is doing for the world through her writings, which have thrown such a wonderful light on the teachings of the Bible and have made the power of the Christ, Truth, available to us here and now in the degree that we abide in Him. For the periodicals I could never say enough as they have been a source of great comfort to me during the years that I have been studying Christian Science. The lectures, the reading rooms, the practitioners, and the daily Bible-Lesson are more to me than words can express. My heart is filled with love and grateful appreciation for all that Mrs. Eddy has done for me in showing me the way out of this material wilderness.—(Miss) Henrietta Alston Kenan, Washington, District of Columbia.

4

I would like to express my gratitude for the many blessings that have come into my life through some degree of understanding of the truth as taught in Christian Science, but it can never be done in mere words, for by our works are we known. Many years ago one of my brothers had passed away as the result of tuberculosis, while a second brother was seeking health in the West, and a sister was ill at home suffering from a wound which had resulted from a second operation and was accompanied by a high fever. I was so consumed by fear that I was fast manifesting the same disease, together with indigestion and several other ills. As a last resort I sought a Christian Science practitioner for this sister, and she was instantaneously healed of the fever the second day and later of the wound, which had continued for a period of about two years; while I was so uplifted I was healed by reading the textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, and have remained healed. While I am unspeakably grateful for my healing, the thing I am most grateful for to-day is the different outlook on life which Christian Science has given to me. I never knew God before as a real help in trouble, although I was brought up by good parents and always went to Sunday school. There is no problem that cannot be solved through Christian Science if we apply its teachings earnestly and honestly. I have proved it enough in my own experience to know that this is true.

My heart goes out in gratitude to Mary Baker Eddy, our beloved Leader, who was pure enough, good enough, and selfless enough to give to the world this wonderful truth about God, and man in his relationship to Him, so clearly and simply that even little children can understand it. I am grateful for every word she wrote and for each periodical she established, and for the wisdom she displayed in every direction. Those of my family who are interested in the teachings of Christian Science have also received many blessings, and we are all indeed very grateful.—(Mrs.) Sallie Griffin Herring De Vall, Memphis, Tennessee.

4

When I first began to read "Science and Health with Key to the Scriptures" by Mary Baker Eddy, I found it to be most beautiful. I was not then in search of physical health, but after reading the book for a few weeks I was able to discard my glasses, which I had used for several years. I remember well how grateful I was to the Giver of all good. The quality of my thinking has been improved and if there are errors to be overcome I have learned through Christian Science, that "with God all things are possible." I am very grateful for these healings, for the literature, and for the realization of the power and ever presence of God.

(Mrs.) EMMA SCHULTHEIS, San Jose, California.

[952]

Signs of the Times

[Extracts from "The Salvaging of Civilization," by H. G. Wells]

"The generality of men and women, so far as their natural disposition goes, are scarcely more capable of apprehending and consciously serving the human future than a van full of well-fed rabbits would be of grasping the fact that their van was running smoothly and steadily down an inclined plane into the sea. It is only as the result of con-. siderable educational effort and against considerable resistance that our minds are brought to a broader view. In every age for many thousands of years men of exceptional vision have spent their lives in passionate efforts to bring us ordinary men into some relation of response and service to the great issues of life. It is these pioneers of vision who have given the world its religions and its philosophical cults, its loyalties and observances; and who have imposed ideas of greatness and duty on their fellows. In every age the ordinary man has submitted reluctantly to such teachings, has made his peculiar compromises with them, has reduced them as far as possible to formula and formality, and got back as rapidly as possible to the eating and drinking and desire, the personal spites and rivalries and glories which constitute his reality. The mass of men to-day do not seem to care, nor want to care, whither the political and social institutions to which they are accustomed are taking them. Such considerations overstrain us. And it is only by the extremest effort of those who are capable of a sense of racial danger and duty that the collective energies of men can ever be gathered together and organized and orientated toward the common good. To nearly all men and women, unless they are in the vein for it, such discussion as this in these essays does not appeal as being right or wrong; it does not really interest them; rather it worries them; and for the most part they would be glad to disregard it as completely as a lecture on wheels and gravitation and the physiological consequences of prolonged submergence would be disregarded by those rabbits in the van. But man is a creature very different in his nature from a rabbit, and if he is less instinctively social, he is much more consciously social. Chief among his differences must be the presence of those tendencies which we call conscience, that haunting craving to be really right and to do the really right thing which is the basis of the moral and perhaps also of most of the religious life. In this lies our hope for mankind. Man hates to be put right, and yet also he wants to be right."

"I will confess I cannot see any single individual human head in my vision of the World State. The linking reality of the World State is much more likely to be not an individual but an idea—such an idea as that of the human commonweal under the God of all mankind."

*

[From an Editorial, "Thy Faith Hath Made Thee Whole," in The Breeze, Redondo, California]

"Thy faith hath made thee whole" were the words of the Christ himself. Has faith died since that day? Has the power of the Supreme grown weaker since that day? Have commercialism and greed forced the teachings of the Christ into the discard? Has the vivisectionist made a law greater than the law of Christ? Is materia medica the only power on earth to-day that can relieve suffering?

Note the fight of materia medica against any form of treatment or healing that is not of their school. They condemn the Christian Scientist, the osteopath, the chiroprac-

tor, every sort of healing that does not believe in their poisonous dope. And yet we call this a free land? What right has any profession, any clique of individuals, saying to you and me what method of salvation we shall accept, what sort of treatment we shall seek for the alleviation of our suffering? Just as much right as to tell us what we shall eat for breakfast, or what manner of clothing we shall wear. Verily those words, "Thy faith hath made thee whole," are far greater to the world than a prescription of morphine, or some other poison. Please bear in mind, we are defending no manner of treatment or belief, all we ask is fairness for all and dominance by none.

[Rev. Elmer A. Leslie, in Zion's Herald]

The need of to-day is for single track minds among the followers of Jesus Christ. By this I do not mean that we need narrow Christians. Of these we have too many already. Nor do I mean Christians that have one hobby of activity or belief which they constantly and often tiresomely emphasize. Rather do I mean men and women of charity and breadth of religious opinion and brotherliness, who combine with that an unswerving emphasis upon allegiance to Jesus Christ. The single track Christian is the Christian that has one supreme passion—to be Christlike and to make his Christlikeness contagious.

[Tertullian Browne, in The Universalist Leader]

The water-tight compartment view of life has vanished; and we are recovering a conception of life as a single whole. To religion nihil humanum est alienum any more, for it understands that its concern is with life. The point that the conservative critics of the advanced social groups within the church have to grasp is that these groups are the symptoms of a new orientation of the church as a whole. There is a much larger matter afoot than "radicalism in the church;" there is a slow but sure insurgence of a new spirit. . . . The movement has not made itself articulate in any systematic way, has not indeed gone beyond the beginning of a critique of modern institutions. But it may be said that this [ideal] is twofold; and turns upon every institution, every dogma, every mode of behavior, public or private, and asks concerning it, first: Does this make for the increase of life? And second: Does this make for the unity of life?

["Church Unity by Wireless,"-From The Living Church]

The rector of Calvary Church, Pittsburgh, Pennsylvania, has been supplying the pulpit of the Herron Avenue Presbyterian Church, in the same city. His choir, also, has been pressed into service to furnish music. Let nobody fear, however, that the rector of Calvary Church is in any way guilty of disloyalty, or that the choir is lax in the faith. Neither priest nor choir has been absent from Calvary Church at the hour of service, which is the same in both churches.

The Herron Avenue church has been for some time without a pastor. For some time, also, the services and sermon
at Calvary Church have been sent out by wireless every
Sunday to receiving stations throughout the country. Wireless enthusiasts in the Presbyterian congregation, in touch
with the electric company, asked it to install a small receiving outfit in their church in order that the members
might hear the service at Calvary. This was done, and on
Sunday evening, April 24, the experiment was tried, with
an expectant throng in the Presbyterian church. Voices
and music of rector, choir, and organ were distinctly heard

from a loud-speaking horn resting directly on the pulpit. In spite of the difference in the service, the Presbyterians followed throughout, taking an offering during the singing of a hymn and finding intense interest in the sermon.

[From The Christian Register]

Press dispatches from London ascribe to a "lack of public interest" the act of the Imperial Maritime League in voting its own dissolution on April first. The League for the past twelve years had been preaching the "greater navy" doctrine with energetic persistence.

[From "Shall America Disarm?" by Hudson Maxim in Current Opinion]

The editor of Current Opinion prefaces this article with the following note: "The chief interest in this article is that it is a plea for reduction of armaments from one who represents those who have been most urgent heretofore in pressing the need of a big army and navy. It is a significant change of attitude induced by the developments of the last year or two."

Mr. Maxim says in part: "Entirely aside from the question of ultimate world disarmament there is one thing which seems very evident to me, and it is that the leading nations of the world-at any rate, Great Britain, Japan, and the United States-should suspend naval and military preparations and agree to an armament truce for a period of five years in order to save the colossal cost of a race for supremacy by force of arms. I have not changed from militarist to pacificist, but the world war has altered circumstances and the supreme need is now for an armament truce and not for more armament. Under the same circumstances and with the same needs as we had before the world war, I should just as strongly advocate the same measures for adequate national defense that I then recommended. that time no armament truce would have been possible, and our only security lay in immediate substantial increase in our army and navy and all the munitions, equipment, and paraphernalia of war. Since the world war there is altogether too little liquid capital with which to prosecute industrial development. The people are weighed down by most oppressive burdens of taxation. These burdens should be lightened if possible, instead of being made heavier."

[From The Pioncer]

The interview given out by Police Commissioner Enright, of New York City, to the Atlantic City Gazette-Review, and published on May 15, was in part as follows: "The home brew, which we hear so much about right now, will soon be obsolete. Many who are brewing and distilling in their own homes are doing so because it is a fad, but they will soon stop it—when the realization comes to them that the real test of patriotism is obedience to laws, whatever they may be. It will not be long until every lawabiding American will be as scrupulous in his observance of the prohibition law as he is of other laws. He will no more think of making, buying, or selling liquor than he does of stealing his neighbor's money or murdering his wife out of a spirit of covetousness. Those who are trying to cajole Congress into liberalizing the present prohibition law so as to permit the manufacture of beer and light wines are wasting their effort. It will never be done. Public sentiment will not stand for it. The vote of the women -yes, and the men, too, would completely overwhelm any effort toward legalizing the manufacture or sale of alcoholic beverages."

["Fundamentals of Business Prosperity Are the Ten Commandments"— Roger W. Babson, in Work, Columbus, Ohio]

Business conditions are due to a man's attitude toward life. Business conditions can be changed for the better only as a man's attitude toward life changes. Business runs in cycles—first a period of prosperity and then a period of depression. When studying these business changes, it was necessary to resort to certain statistics. In endeavoring to ascertain what causes the statistics, it was found: that a period of depression is the result of unrighteousness, dishonesty, extravagance, and inefficiency which develop in the latter half of a period of prosperity, and that a period of prosperity, and thrift which develop in the latter half of a period of depression.

The meaning of this is plain. It is not railroads, steamships, or factories which cause our prosperity; it is not bank clearings, foreign trade, or commodity prices which give us good business. All these things are like the thermometer that registers the temperature of the room. Prosperity is based on those fundamental qualities of faith, temperance, service, and thrift which are the products of religion. The fundamentals of prosperity are the Ten Commandments.

[Lord Inchcape, in The Times, as quoted in Public Opinion, London, England]

It would be laughable, if the matter were not so serious, that the great captains of industry the world over are now becoming most active evangelists and preaching with an energy Paul might envy, the apostle's great sermon that we are all members one of another, and that we cannot be rich while others are poor.

Notice

SHORT TERM SUBSCRIPTION AND ORDER RATES

Attention is called to the new rates now in effect on short term subscriptions for The Christian Science Monitor, Christian Science Sentinel, and The Christian Science Journal; also on single copies of the Sentinel and the Journal. These rates are stated in the advertisements found on the inside front cover page of the Sentinel and on page "iv" of the Journal.

Attention is also called to the rates scheduled below, now effective on all quantity orders for any of the Christian Science periodicals:

10

ıI,

Monitor\$.04	a	copy
Sentinel		"
Journal		"
Der Herold		"
Le Héraut		"
Quarterly221/2		"

These rates are net and take the place of the former 10% discount on periodical orders.

An exception to the *Monitor* rate given above is made in cases where orders specify that the copies desired are for free distribution at a Christian Science lecture or for other free distribution. This should be clearly stated when ordering. Such orders will be filled at 3 cents a copy.

The uniform retail price on the Sentinel is now 10 cents a copy, and on the Journal 35 cents a copy. The Monitor single copy price remains at 5 cents.

Discounts to reading rooms on subscriptions and on orders for general publications remain as before.

Church Notices

From the Clerk of The Mother Church

Church Teners.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society

Notice

Several hundred copies of the proceedings in the Supreme Judicial Court of Massachusetts, in the case between the Board of Trustees of The Christian Science Publishing Society and the Board of Directors of The Mother Church, as published in *The Christian Science Monitor*, were run off at the time of their publication in the *Monitor*.

These extra copies will be bound in simple and substantial book form, of about 1200 pages, with board covers, size 81/4" x 103/4". The book will contain the verbatim report of the hearings on the Bill in Equity, as transcribed from the notes of the official stenographer, including the arguments of counsel before the Special Master and the final arguments before the Full Bench of the Supreme Judicial Court of Massachusetts. It will also include the decision of the court when given. It will include, as well, the Master's Report, the hearing on extension of time for exceptions, the arguments on exceptions to the Master's Report, the hearing on Motion to Intervene, the Attorney General's arguments on Motion to Intervene, and the official report of the hearings in the Contempt Citation Proceedings. The book will also contain the principal pleadings, including the pleadings in the case of Dittemore vs. Dickey et als., and the Plan of Properties and List of Deeds. The testimony and the exhibits which appear as part of the testimony will be indexed.

These copies will be sold at one hundred dollars each, and the orders will be entered for future delivery in the order of their receipt accompanied by remittance for this amount.

Orders for Pacific Coast and Rocky Mountain States

In order to facilitate the filling of orders for the Pacific Coast states and to expedite delivery, orders and remittances from reading rooms and individuals in the five postal zones east of San Francisco, with the exception of orders and subscriptions for *The Christian Science Monitor*, *Journal*, *Sentinel*, *Quarterly*, and *Heralds*, should now be sent direct to The Christian Science Publishing Society, Pacific Coast Depot, 255 Geary Street, San Francisco, California.

The Pacific Coast Depot will continue to handle subscriptions and supply periodicals only to San Francisco and imme-

diate vicinity.

The first five zones east of San Francisco include all of California, Oregon, Nevada, Washington, Idaho, Utah, Arizona, and approximately all points west of Billings, Montana; Cheyenne, Wyoming; Denver, Colorado; and Las Vegas, New Mexico, including these cities. The local post offices in the last four states mentioned will supply further information regarding the fifth zone limit.

The above notice does not apply to Canadian territory.

European Orders for Bibles

The arrangement of the Publishing Society, whereby the Christian Science reading rooms in Great Britain and Continental Europe have been accustomed to order Bibles directly from the Oxford University Press, London, sending payment for these orders to The Christian Science Publishing Society in Boston, has been discontinued, and these reading rooms are now requested to send their orders accompanied by remittance to the London office of The Christian Science Publishing Society.

The Oxford University Press will henceforth fill for the Publishing Society only those orders received through our London office. Address all such orders for Bibles to The Christian Science Publishing Society, London office, Amberley House, Norfolk Street, London, England.

New Pamphlets

There will be placed on sale in a short time six new pamphlets, containing articles reprinted from the Christian Science periodicals, as follows: "Government," "Employment," "Work and Play," "Progress," "Occupation," "Relationship." Orders for these pamphlets may be sent at once, to be filled on the date of issue. Price 5 cents a copy. Reading Room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

Articles and Testimonies

* * *

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U. S. A.
